Social Effects of the Postal Derangements.—The effects social and moral which the interruption of postal communication on Sundays develops every week are of the most mischievous and painful character. Last week we noticed one of its results in the escape from the hands of justice of the perpetrators of a frightful crime. This week we have to announce a most lamentable consequence of the same Puritanical system, viz. an instance of suicide, which occurred at Shipston-on-Stour, on the morning of Monday last. Some fortnight since, a lady, named Elizabeth Rees, whose family live at West Bromwich, about five miles from Birmingham, came to reside in the town, with the intention of opening a seminary for young ladies, of late years kept by the Misses Stowe. She had experienced considerable trouble and annoyance in her behaviour or general conduct that created any suspicion of her intellect being impaired; she appeared what she represented herself to be, and was accepted as such by the inhabitants. On Monday last the female servant went into the back playground, and entered a shed, in which were swings used in the amusements of the pupils, when, to her horror, she beheld her mistress suspended by a rope to one of the beams, and life quite extinct. An alarm was instantly given, but all aid was useless; vitality had fled some hours. The inquest on the body was held on Tuesday, at the George Hotel, before Mr. H. G. Hunt, coroner, and the investigation lasted upwards of eight hours. Nine witnesses were examined among them a Mr. Williams, of West Bromwich, with whom the deceased had resided for several years. It appeared she had lost a large sum of money by unfortunate railway investments; and this, with some disappointments in regard to the opening of the school, had doubtless impelled her to commit the awful act. The jury returned a verdict of "Suicide while in a state of temporary insanity." At the inquest it appeared that her friends at West Bromwich had, in the course of Tuesday or Saturday, posted their letters addressed to the deceased, referring to the peculiar position of her affairs, and calculated to ease her mind regarding her future prospects. This letter, however, owing to the stoppage of postal communication on Sunday, did not arrive in the deceased till late on Monday. But for this, we might not have had the painful duty of recording this distressing affair.

Her Sunday Delivery.—A petition for the restoration of the Sunday post, on the grounds of present inconvenience, individual hardship, loss to the revenue, &c., and praying the House of Commons to rescind the resolution on which the obstruction was founded, has been handed round, and in two days received the signatures of the nobility, all the gentry in the town, six town councillors, eleven firms of carpet manufacturers, four solicitors, and 130 of the most respectable men of business in the place.—*Worcester Chronicle.*

Yorkshire Agricultural Society's Annual Meeting.—The thirteenth annual meeting of this society was held during the week at Thirsk, and was one of the most successful of any held since the formation of the society. The entries of stock was 590, being nearly 200 more than have been exhibited in any previous year since the formation of the society. The amount awarded in prizes for implements was £170.

Northumberland Agricultural Society.—On Tuesday, at Alnwick, the annual show of stock of the Northumberland Agricultural Society took place The exhibition was held under the most favourable auspices, the Duke of Northumberland having taken a very active part in it. The showground was situated on the highest part of the town, and animals exhibited at the recent great meetings at Exeter and Glasgow, and which carried off first-class prizes, were again shown here with equal success. After the show a banquet took place, the Duke of Northumberland presiding.

A letter from Hanover states that, on the 27th ult., some unknown person sent 400 louis d'ors to the Schleswig Holstein funds. The Council of Gredingen had sent 1000 thalers. Several committees to receive subscriptions had been formed, the letter says, at Osterode, Nesse, and other towns.

The *torero*, Montes, is slowly recovering from the terrible wound he received in the bull-ring (illustrated in our last Number). Amongst the hundreds that daily call to inquire after his health may be cited the names of the veteran Castanos, Duke of Bailen; the Duke of Osuna, San Carlos, Castiglione, Noailles, &c.

The imports of foreign corn and provisions of all sorts continue to be prodigious—larger in the period, as regards Liverpool, that any on record. For the two weeks ended the 31st ult., they are as follow:—596,670 bushels wheat, 7177 bags ditto, 19,988 bags flour, 6844 barrels ditto, 204,723 bushels Indian corn, 3641 bags ditto, 29,264 bushels barley, 125 bags ditto, 8704 bushels peas, 287 bags ditto, 27,864 bushels beans, 39,04[illegible] bushels oats, 422 bags Indian corn meal, 18,104 bushels rye. In addition to this supply from abroad, we have the following quantity of beef, pork, and other provisions for the month of July last: 743 tierces beef, 306 barrels ditto, 1071 barrels pork, 1634 boxes bacon, 70 hogsheads hams, 7 barrels ditto, 600 hams.

The *Giornale di Roma* of the 24th ult. announces that Cardinal de Latour d'Auvergne has presented to the church of St. Agnes *extra* [illegible], a magnificent silver pyx, ornamented in the Gothic style [illegible] bas-reliefs and figures of the Saviour, St. Peter [illegible] and the inscription:—Ren [illegible] addressed to Jesus Christ, 1850. Hommage de souvenir [illegible] ce glorieux événement offert à son église titulaire de St Agnes *extra muros*, par le Cardinal de Latour d'Auvergne, Evêque d'Arras, 24 Juin, 1850."

THE SUNDAY POSTAGE DELIVERY.

On Monday evening a very crowded public meeting was held in the Freemasons' Tavern, Great Queen-street, Lincoln's Inn-fields, "for the purpose of obtaining the immediate rescinding of the recent postal regulations stopping the delivery of letters and newspapers on Sunday." About seven o'clock, the appointed hour, the chair was taken by Joseph Hume, Esq., M.P.

The chairman said he had attended that evening at the request of the committee by whom the meeting was convened, and he was anxious to offer a few words before the resolutions were submitted. There was, in his opinion, no question of more public importance than the facility of communication between place and place, and the general regulations of the postal department of the country. He recollected when it would require four or five days to convey communications which might now be done in a few hours; and he had no hesitation in saying that in all the social changes which had taken place since he was a public man (and that was now a great many years), none was of greater importance than those which gave increased facilities to communicate between place and place and man and man. He believed that any interference with such facilities would be depriving the public of the great advantages they were calculated to produce. He was sorry to see such an attempt at retrograde principles. (Hear, hear.) He was not, however, responsible for it. Nothing was of such inestimable value as the diffusion of knowledge amongst the people. They learned their proper position in society, and how to estimate the respective rights of all classes. Those were advantages, and the facilities for obtaining them should not be diminished. He was, as much as any other man in this country, desirous of seeing the Sabbath-day properly observed—it was consistent with all the acts of his life and his habits from boyhood. But when he found individuals differing from him and others—taking upon themselves to lay down rules on which he and others should act and conduct themselves on the Sabbath day, he looked upon such conduct as an encroachment upon religious liberty. (Loud cheers.) He was satisfied that those who had stopped the mails upon the Sabbath were ignorant of the real effects of their conduct in doing so, for one man they had released from labour, they had caused additional labour to be given to ten others who usually required it. He, therefore, felt deep regret in having witnessed the attempts made to alter the original postal arrangements. It was injurious in a commercial as well as in a social point of view. The greater the facility given to communication, so in proportion was the diffusion of knowledge and intelligence increased. (Hear.) When he found any class of men attempting to dictate to another upon a subject like that, or, in other words, thinking they were able to do an act of Parliament to make men religious, he looked upon all such attempts as perfectly ridiculous. (Cheers.) They were liable to mistaken views upon any question. For his own part he always asserted his opinions (cheers)—and stated openly what he would

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Fifty six secretaries of the charitable institutions of the metropolis have intimated to the committee their cordial co-operation in the good work of erecting a monument to the memory of the late Duke of Cambridge.

The Lord Provost of Edinburgh has received a letter from the secretary to the Admiralty intimating that her Majesty will visit Edinburgh on the 29th August, and that on the following day (Friday the 30th) Prince Albert will lay the foundation-stone of the National Gallery on the Mound, the grant to which was voted by the House of Commons on Thursday last.

The Earl of Lincoln arrived at Portsmouth on Saturday last, in his yacht the *Gitana*, after a lengthened cruise in the Mediterranean, and a journey through Egypt, Arabia, and Palestine. We are glad to hear his Lordship's health has greatly benefited by the warm climate of those countries.

A fire broke out on board one of the Windermere steamers, the *Lord of the Isles*, on Wednesday night week, by which that fine vessel, although not totally destroyed, has been so much damaged as to be rendered, for the present at least, quite useless.

Letters from Naples state that the affair of the English indemnity has been settled by the King having submitted to pay it out of the revenues of Sicily.

On Sunday morning, about half-past twelve, an elegantly dressed female was seen to place a bundle on the step of the door of 32, Guilford-street, Russell-square. Some persons who witnessed the occurrence went to inspect it, when, to their astonishment, they found a female child, four days old, with a paper, having Ann Morland written on it, pinned to its sleeve; in the meantime the woman escaped. Soon after, on the same morning, another child was found dropped in Camden-street, Camden Town.

The other evening, says the *Birmingham Mercury*, "a labourer who attends at Pedmore church came to hear a farewell sermon at Stourbridge, which had no little effect on several members of the congregation, who could not refrain from weeping. After the service, a friend said to the Pedmore man, 'I couldn't help crying myself; why didn't you cry?' 'Oh,' replied the labourer, 'I belong to another parish.'"

Authentic advices state that the Conde de Montemolin and Cabera disprove of an insurrectionary attempt in Spain at the present moment, notwithstanding that their adherents are in arms in the north.

A fire occurred on Monday morning, about four o'clock, at Mr. Marrion's dye and scour mills, Rainford-square, Liverpool. The fire is supposed to have originated from some sacks being placed on the boiler for the purpose of drying. The damage done is estimated at about £2000, but the property was insured in the West of England and Manchester Fire-offices. The fire lasted about one hour.

Letters have been received from the Apostle of Temperance by his brother, dated 30th June, from the hot springs, Arkansas, in which he states his health is very much improved.

In the course of last week a specimen of the rare fish, the striped bonito, *Thynnus pelamys*, was caught in a net at Looe, Cornwall, and presented to Mr. Couch at Polperro. It measured in length about 1 foot 8 inches.

From a return obtained by Mr. Hume, and ordered by the House of Commons to be printed, it appears that the solicitor or law agent, in Scotland, of the Commissioners of Woods and Forests, received during the four years ending 31st March, 1850, for outlay and actual expenses, £3004 17s 4d.; and for charges for professional services, £4134 19s. 7d.: total, £7139 16s. 11d. The number of suits, &c., in respect of which emoluments have arisen, was 180. The number of suits, &c., in respect of which emoluments have arisen, was 180.

At the end of 1848 the 6998 miles of railway in operation in this country represented a capital of about £197,500,000, showing for works, stations, plant, &c., an expenditure of about £33,000 per mile in the construction of the line and the provision of the necessary plant and material for working.

The Emperor Nicholas has issued an ukase ordering seven men in each 1000 of the population of the western provinces of Russia, and ten in each 1000 in some other provinces, to be raised for the army. The population of those districts is computed at 31 millions, whereby an addition of about 180,000 men will be made to the already formidable military force of Russia.

On Saturday last the *La Clarata*, from New Providence, arrived at St. Katherine's Docks, with on board from his place of captivity, the *soi-disant* Prophet Bale, whose followers have become so numerous as to threaten the overthrow of the established religion. The government had condemned him to be publicly executed, by discharging him from a mortar, on the 10th inst., but he is represented as a very handsome young man, but decidedly *non compos mentis*.

On Monday week, as his Royal Highness the Prince of Prussia was reviewing the cavalry in the vicinity of Potsdam, he unfortunately fell with his horse under him. The fall was extremely dangerous, but his Royal Highness, though slightly bruised externally, does not appear to have sustained any internal injury whatever, and is at this moment perfectly well.

By a decree of the 30th of April, the Government of Chili, in South America, have enacted that glues and earthenware retorts and pure lead were henceforth to be admitted duty free, and spirits of wine were to pay the same fixed duty as the articles in No. 10 and 11 of the tariff.

The desertion of seamen from their ships had for some time past (May last) been a growing evil in Valparaiso (Chili), and one likely to be attended with such serious consequences that numerous complaints had been made to the authorities as well by the naval commanders on the station as by the various consuls, and the shipmasters and consignees of merchant vessels. The Chilian Government had taken the matter in its serious consideration and seen the absolute necessity of resorting to extreme measures in order to strike at the root of the evil and prevent a recurrence of it.

We have news from Guatemala (Central America) to the 10th ult. Several petty chiefs had been assassinated by their own followers. The states of Salvador, Honduras, and Nicaragua are bent on the project of forming a federative union. Delegates have been appointed by the legislatures to represent the states in the general government.

Very important Intelligence has been received from Mexico and New Orleans, to the effect that Mr. Letcher, United States Minister to Mexico, has concluded a treaty with the Mexican government for the construction of a railroad across the Isthmus of Tehuantepec. The treaty was signed on the 24th of June. The route from the United States ports to California will be nearly 2000 miles shorter than that *viâ* the Isthmus of Panama.

The Prairie Indians continue to commit atrocious murders among the overland emigrants to California, and especially hostile have they proved near Santa Fé.

The following is a total number of vessels which have sailed from the United States for California :—395 ships, 347 barques, 271 brigs, 212 schooners, 2 sloops, 31 steamers: total 1857

The cholera continues its deadly ravages in the United States western district and especially at St. Louis and Cincinnati, there being from twenty to sixty victims a day in each city.

Eleven Americans, on their way to California across the plains, have been murdered by the Yumas Indians. At the crossing of the Colorado there is a gang of American and Mexican outlaws, who rob and murder travellers.

Mr. Nicholl has prepared and brought in a bill to enable the inhabitants of he peace to direct portions of fines and penalties in certain cases to be paid for the benefit of the superannuation fund of the police force established in any county.

The Pope, in recognition of the great theological attainments of Mr. Newman, late of Oxford University, has conferred on him the degree of Doctor in Divinity by diploma.

The banquet intended to be given at York to the Lord Mayor of London, is to take place on Friday, the 25th of October, this day having been named by his Royal Highness Prince Albert, who has graciously signified his intention to take part in the entertainment.

The town council of Edinburgh have just voted the freedom of that city to Lough, for his distinguished military services

The commune of Gentilly (Paris), at the suggestion of the parish priest, has purchased the piece of ground on which stood the guardhouse in which General de Bréa and Captain Mangin were assassinated in the insurrection of June. It is intended to construct a church, and to have the altar of it on the very spot on which they fell

M. Bocage, the director of the Odéon Theatre (Paris), has been dismissed from that post by the Minister of the Interior. Among the motives assigned by the Minister for his dismissal, is that of his having constantly made choice of pieces which indicated a fixed hostility to the authorities.

The first sack of flour, the produce of the present French harvest, was exhibited at the Halle, Paris, on Friday week, gaily adorned with bouquets of flowers.

On Monday forenoon, between eight and nine o'clock, as some men were employed on a scaffold raised for the erection of the New City Prison, Holloway, the puttock of the platform on which they were standing gave way. The whole of them, except a man of the name of Dennis Marchant, succeeded in preventing themselves from falling. Marchant was unable to lay hold of anything, when he was precipitated a depth of 120 feet. He alighted on his feet, the effect of which was that both legs were frightfully fractured. He was taken to the University College Hospital in a state of insensibility, where he was left without any hopes of recovery.

CHESS.

TO CORRESPONDENTS.

K—Y. Paris—The numbers of *La Regence* reach us many days after they are due, and latterly at an expense of postage, which, it continued, will oblige us to decline them. They ought to be sent to us prepaid. Paris, the people in then a mere trifle.

ANGUS ; SHETLENDS—We have examined the stratagem to which you directed our attention in the *Chess-Players' Chronicle* of the month, and find that either the authors, Messrs Angus and Robson, or the printers, have unwittingly placed a Black Pawn at K 8 6th, whereas it ought to stand at K 7 6th. With that slight emendation, the Problem appears to us correct, and highly ingenious

RENAUT.—"In a game of Chess by Correspondence my opponent sends me as his move, 'Castles.' Now, as he can legally do so on either side, have I a right to compel him to Castle on which side I please?" The point is a novel one, and not being provided for by any rule in the ordinary code of laws, we should say you had no "right" in the case

STUDIOUS, P. V.—We have recently been favoured with several games played by Mr S, since his illness, and shall take an early opportunity of presenting them

RESPONS.—Black would play, perhaps, 1. B to K Kt 4th

P M J. H R, GREGORY, H K, and G P, under consideration

HOPEFUL—We believe you are mistaken. The principal, if not the only Chess Club in London at the period named (1746-48, was held at Old Slaughter's coffee-house, in St. Martin's-lane

F I and R S—Curiously not. When a player's King is checked, he must do one of three things, remove his King out of check, capture the checking piece, or interpose a man between his King and that piece

EXCELSIOR—You may obtain blank diagrams of Hastings, the publisher, in Carey-street, Lincoln's-inn-fields.

A W, Wiesenfeld, India—Your solution of the Stuttgardt Problem, No. 321, is defective, as also is that of No. 323

J B T—"A surprise to beat 8 nineteen games out of twenty. A wins eighteen, and one is a stale-mate. Who wins?" The stale-mate making a drawn game, the parties must play on until one or the other wins a game to decide the match

SOLUTIONS OF PROBLEM No 340, by G E O, ADOLESCENS, AN ENGLISH RESIDENT, Dunkerque, W H T, J C B, F K S, MARIUS, PAOLO, PELMOSE, DOCTOR, PUTEL, D C L, AN OLD SOLDIER.

SOLUTIONS OF PROBLEM No 341, by J B, Worcester; Rev R T, M P, M D, S F Q, R D, STOP-BOY, EXPERIENCE, ARIES, P R, BELLARD, CAPE COVE, BY EDMUND'S, ANNIE, W S T, DERBYON, J A W, JUVENTUS, SUBSCRIBER, are correct. All others are wrong

SOLUTION OF PROBLEM No. 341.

14. K R takes Kt	P takes B	39. Q R to Q 3d	K to Kt 4th
15. Q R takes P	B to K B 4th (e)	40. K R to K R 7th	P to K B 5th
16. R to K B 4th (f)	Q to K B 3d	41. Q R to K Kt 2nd (ch)	K to B 4th
17. B to K Kt 5th	Q to K Kt 3d	42. K R to K R 8th (ch)	K to his 3d (m)
18. Kt to K R 4th (g)	Q takes B	43. Q R to K Kt 6th (ch)	K to B 3d
19. Kt takes B	B to Q B 2d (h)	44. R takes R	K takes R
20. K to K B sq	Q takes Q	45. R to Q 6th (ch)	K to B 4th
21. K R takes Q	K R to K sq	46. R takes Kt	
22. P to Q 5th	Kt to K 4th	And the veteran finally won the game.	
23. P to Q 6th	B to Q Kt 3d (ch)		
24. K to R sq	Q R to Q sq		
25. P to Q Kt 3d (i)	P to K B 3d		

(a) This loses a move, but, where large odds are received, is not, perhaps, so disadvantageous a move as it looks.

(b) Better to have played the K B to Q B 2d, and try to maintain the Pawn gained.

(c) Intending mischief if Black venture to Castle.

(d) When giving large odds, these dashes must be tried, or the modern system of forcing exchanges exhausts you in the long run.

(e) Taking the B with K R P would have been playing White's game.

(f) R to K R 4th would have been hazardous, on account of Black replying with Kt to K 4th next move

(g) Doubles White to bring his two Rooks into co-operation, but only at the expense of exchanges which cripple him a good deal

(h) A daring move for White.

(i) To prevent the advorse Kt being posted on Q B 5th, a move fraught with peril for White.

(k) Seeing the Pawn must fall, he aims at securing a good position for the Kt.

(l) Taking the Kt with his K if would have been injudicious.

(m) Better to his 4th.

CHESS ENIGMAS.

No. 595.—Termination of a Game, by a "SHEFFIELD GRINDER."

Black: K at Q R 4th, Ps at Q 4th and Q B 4th.

White to play, and mate in four moves.

WORKING MEN'S MEMORIAL TO THE LATE SIR ROBERT PEEL.

A public meeting, in aid of this object, was held on Wednesday evening, at the Whittington Club (late Crown and Anchor), Strand, Mr. Hume, M.P., in the chair, supported by Messrs. Cobden, M.P.; Bright, M.P.; G. S. Brown, M.P.; Wyld, M.P.; George Thompson, M.P., &c.

The great majority of the meeting were entirely favourable to the object for which it was convened; but a considerable number of Chartists, costermongers, and others had taken their seats close to the platform in the position where they caused a great amount of annoyance and interruption throughout the proceedings.

The Chairman made some preliminary remarks, and said that the first intention of raising a testimonial to the late Sir Robert Peel had originated at the Belvidere Tavern, Pentonville, where, at a public meeting held, it was considered that Sir Robert Peel deserved a memorial from the working classes. It was, therefore, proposed that the subscriptions to be received should range from 1d up to 1s. He was informed that there were 167 committees now at work in different parts of the metropolis; a thousand circulars had been sent out, and there had been already received from a large number of subscribers and gentlemen, a list of whom would be announced at no distant period. They had resolved to defray the expenses of printing, &c., it being determined that the one penny subscription should remain untouched. He hoped that each member of a family would deposit his penny.

Mr. Bright, M.P., moved the first resolution. The crowded state of the room showed that those who had first proposed this testimonial had not overrated the sympathy which existed amongst the people at the unfortunate event which had deprived this country of the services of Sir Robert Peel. It was proposed to raise a memorial to the memory of that departed statesman, and he trusted that it would be borne by thousands and, perhaps, millions, of his fellow-countrymen. (Cheers.) He (Mr Bright) was, in principle, generally opposed to monuments, believing that there had been more raised to bad men than to good; and, with regard to the memory of the late Sir Robert Peel, he might ask with the poet—

> Why need we monuments supply
> To rescue what can ne'er die?

He asked that question, because he felt that every man's household must contain a memorial of the advantages of the policy of the late right hon. baronet. (Cheers, and cries of "No, no.") The policy which Sir Robert Peel had pursued from 1842 to 1846, in ameliorating the fiscal and commercial regulations of the country, had been of essential service in raising the condition of the working classes. (Cheers, and cries of "No, no.") If they looked to Parliamentary returns, they would see that grim poverty had been driven back to its retreat, and shorn of its terrors. (Uproar, cries of "No, no," and "Turn him out.") He maintained that the man must be ignorant, or prejudiced indeed, who could deny that pauperism had been much diminished within the last three or four years. (Cheers.) That was owing, in a great measure, to the policy of the late Sir Robert Peel, rendering it easy for every working man to obtain a sufficiency of food. (Loud cries of "No, no," "Yes, yes," and "We hope there has been.") That, too, was owing to the policy of the late Sir Robert Peel, which rendered food cheap. (Cries of "No, no," and "What's the use of cheap food without money?") From the year 1843 to 1846 he had been in Parliament, and watched the alterations which had taken place in the opinions of Sir Robert Peel, by his changes in the fiscal regulations of the country, until he finally threw to the winds his former opinions, and gave to the country a free supply of food, which he felt convinced no Minister ever dared again to attempt to take from them. (Loud cheers.) The hon. gentleman concluded by moving—

That this meeting recognises with gratitude the benefits which, as a great sacrifice of himself, were conferred on the country by Sir Robert Peel; that it has seen with satisfaction the spontaneous disposition among the working classes to raise a fund for the erection of a durable memorial to his public and private virtues, and that it pledges itself to give all the aid in its power to carry that object into effect.

Mr. Yates seconded the motion amidst signs of growing discontent and commotion, which Mr. Souther endeavoured in vain to appease.

As Mr Hume was about to put the resolution, several persons from the body of the hall claimed to be heard in support of amendments. One of these was a little man, who gesticulated with vehemence, and wanted to know what Sir Robert Peel had ever done for him that he should contribute to a monument in commemoration of him. Sir Joshua Walmsley and others in vain attempted to quell the tumult which arose at this point, and which must have lasted for nearly an hour. At last a costermonger succeeded in getting a hearing, and he availed himself of the opportunity to recommend that the Sir Robert Peel fund should be devoted to educational purposes. He was followed by another young man, and managed to produce such an impression, that, with the unanimous consent of the meeting, a rider was attached to the original motion, recognising the propriety of having education for the poor considered when the question of how the fund should be appropriated came on for discussion.

Mr. Cobden, in brief terms and amidst considerable interruption, pressed upon the meeting the importance, as the working classes were now in a manner pledged to the erection of a monument to Sir Robert Peel, that that idea should be successfully and creditably carried out. He accordingly proposed for their adoption the following resolution, the propositions contained in which and their bearings he explained :—

That this meeting recommends that preparations be made for a simultaneous collection throughout the kingdom on the 31st of August, and that all sums therefore be paid into the Bank in the names of the trustees, and the accounts closed in the month of September next.

Mr. W. Brown, M.P., seconded the motion ; after which

Mr. Bronterre O'Brien, of Chartist notoriety, rose, and passing in review the incidents of Sir Robert Peel's political life, his private as well as public and political rights as the people, read many particularly the establishment of the new police, concluded by moving, as a rider to the resolution before the meeting, that the fund proposed to be collected should be devoted to the erection for the statute-bodies of all the principal measures carried by Sir Robert Peel within the last 40 years

On a show of hands this amendment was lost, and the resolution moved by Mr. Cobden carried.

Mr. G. Thompson, M.P., then addressed the meeting, the proceedings of which terminated at a very late hour by the appointment of a central committee, to take upon itself the responsible management of the preparations connected with the proposed memorial.

In the country, active steps are being taken in several localities to do honour to the late lamented statesman. From Liverpool we learn that, during the early portion of the week, it was determined to originate a subscription there for the erection of a statue to the memory of the deceased Baronet either in St. George's Hall or in some other public building in Liverpool; and on Thursday subscription-lists were opened in the Exchange-rooms, with a result of a very gratifying character. Numerous signatures were at once appended, by men of all political distinctions, and in the course of two days upwards of 140 subscribers were enrolled, whose contributions amounted to nearly £650. At Manchester, the total amount of subscriptions announced amounted to £4782. In Bolton the amount subscribed towards this testimonial, at two meetings, was £328. Districts have been formed, and gentlemen appointed to canvass them. The nature of the testimonial must, of course, be regulated by the amount subscribed, and will be determined by a majority of the subscribers. Busts, parks, or dispensary have been named, all of which are required in the town Subscriptions are also being made for the erection of a monument to the late Sir Robert Peel on Stinchcombe Hill, in Gloucestershire, from the summit of which several counties can be overlooked.

The committee appointed last week at the meeting convened to consider the propriety of erecting in Bright a testimonial to the memory of the late Sir Robert Peel, have determined on the formation of a Public Library and Museum. The Marquis of Bristol gives ten guineas to the fund.

THE FREEHOLD LAND MOVEMENT.—It is not much more than two years since the first freehold land society was established upon the present improved and equitable plan. Now there are nearly fifty in full force in various parts of the country, having no less than 14,321 members. They have issued 20,478 shares, 31 estates have been purchased and allotted, the number of allotments being 3193, and the votes created 3199, whilst the price of the shares has varied. in the different societies, from £9 10s. to £40. The number of votes actually created is as yet but a drop in the ocean towards the political emancipation of the masses by the aid of their own industry; but before five years have passed away, the above number will be augmented to not much less than 50,000 a power of no insignificant nature, and which may be wielded with immense weight either for good or for evil.—*The Reporter.*

MEETING OF THE BRITISH ASSOCIATION AT EDINBURGH, COMMENCING 31st JULY, 1850.

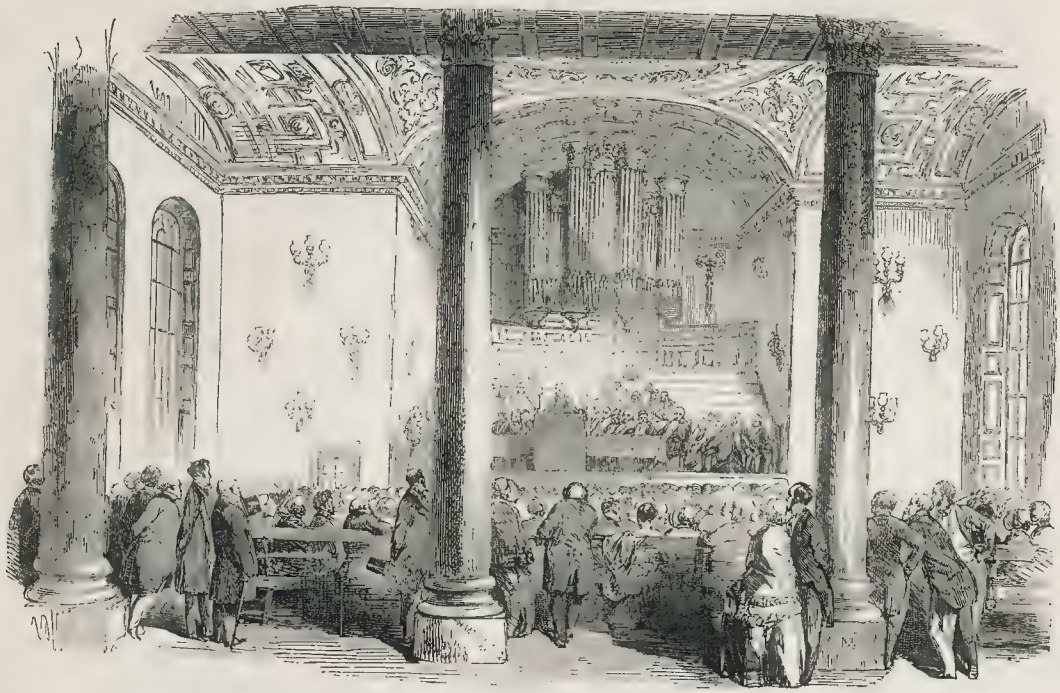
(From our own Correspondent.)

A GOODLY number, about 1200 old and new members of the British Association, have assembled themselves for the second time in the capital of the North. All the arrangements for the accommodation of the cultivators of science have been rendered complete by the local committee, and the meeting must be regarded as being, in nearly every respect, a most satisfactory one.

The first general meeting was held on Wednesday evening, in the Music Hall, when Professor Robinson, in a brief but elegant and tone-ingly eloquent address, resigned the President's chair to Sir David Brewster. That eminent philosopher delivered his opening address. It is impossible that we can, within the limits which we can devote to the subject, give the whole of the address, which was characterised throughout by that strong philosophic view of things which distinguishes all Sir David Brewster's works, and by that eloquence which is to be found in all his literary labours, and which has tended greatly to render those departments of science which he has cultivated exceedingly popular.

The President commenced by taking a rapid review of the origin and progress of the British Association, and he then proceeded to give a sketch of the progress of science during the past year ; and alluding to the advances now making in the science of light, and the powers allied with it in the sun-beam, he re-

MEETING OF THE BRITISH ASSOCIATION AT EDINBURGH.



SIR DAVID BREWSTER, THE PRESIDENT, DELIVERING THE OPENING ADDRESS.

ferred to the truly illustrious Arago, and announced to the assembly a calamity all Europe must regret—"the loss of that sight which has detected so many brilliant phenomena, and penetrated so deeply into the mysteries of the material world. He is now completing, with the aid of other eyes than his own, those splendid researches which immortalize his own name, and add to the scientific glory of his country." After calling attention to the pleasing fact, that the present Government has granted £1000 per year to the Royal Society for promoting scientific objects, and hoping that increased activity would be given to the Observatory of the British Association at Kew, Sir David Brewster spoke as follows on the Patent Laws. The remarks are so much to the purpose at the present time, that we give them as nearly as possible in his own words

"The protection which is given by statute to every other property in literature and the fine arts, is not accorded to property in scientific notions and discoveries. A man of genius completes an invention, and after incurring great expense, and spending years of anxiety and labour, he is ready to give the benefit of it to the public. Perhaps it is an invention to save life—the life-boat; to shorten space and lengthen time—the railway; to guide the commerce of the world through the trackless ocean—the mariner's compass; to extend the industry, increase the power, and fill the coffers of the State—the steam-engine; to civilise our species, to raise it from the depths of ignorance and crime to knowledge and to virtue—the printing-press. But, whatever it may be, a grateful country has granted to the inventor the sole benefit of its use for 14 years. But, what the statute thus freely gives, law and custom as freely take away, or render void. Fees, varying from £200 to £500, are demanded from the inventor; and the gift thus so highly estimated by the giver, bears the Great Seal of England. The inventor must describehis invention with legal precision. If he errs in the slightest point—if his description is not sufficiently intelligible—if the smallest portion of his invention has been used before—or if he has incautiously allowed his secret to be made known to two or even to one individual, he will lose in a court of law his money and his privilege. Should his patent escape unscathed from the fiery ordeal, it often happens that the patentee has not been remunerated during the fourteen years of his term. In this case, the State is willing to extend his right for five or seven years more; but he can obtain this extension only by the expensive and uncertain process of an Act of Parliament a boon which is seldom asked, and which, through rival influence, has often been withheld."

The conclusion of the learned President's address is too forcible to be omitted:—

"It is a great problem yet to be solved to determine what will be the state of society when man's physical powers are highly exalted, and his physical condition highly ameliorated, without any corresponding change in his moral habits and position. There is much reason to fear that every great advance in material civilisation requires some moral and compensatory antagonism. But, however this may be, the very indeterminate character of the problem is a warning to the rulers of nations to prepare for the contingency by a system of national instruction, which shall either reconcile or disregard those hostile influences under which the people are now perishing for lack of knowledge."

On Thursday morning the business of the sections fairly commenced, certain under the direction of the appointed list of officers:—

On Thursday morning, the report of Mr. Ronalds on the state of the Association Observatory, at Kew, occupied the earliest attention of the Physical Section. Mr. Phillips explained that this was an institution strictly for experimental observations, not for astronomical, nor even meteorological, but a place where new methods of inquiry could be tried, and new trains of investigation had open.

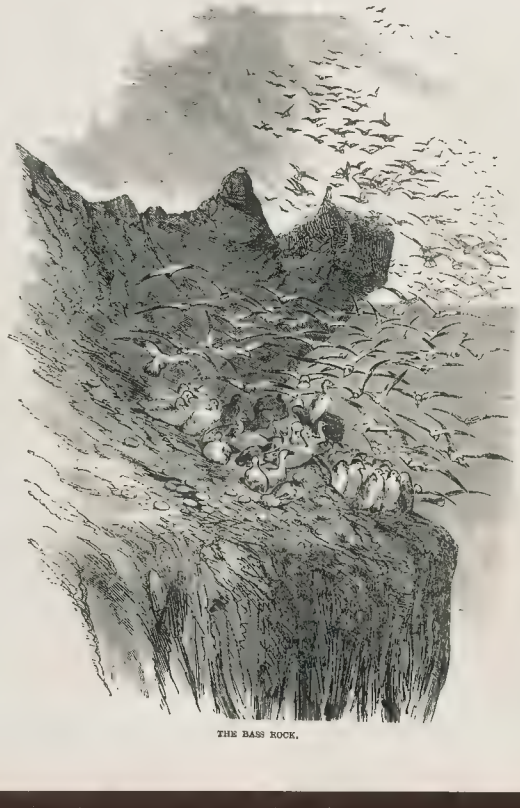
Dr. Scoresby, in a paper on Atlantic Waves, stated that he had ascertained the height of ten waves to be more than 26 feet above the trough of the sea. The height of the highest crest was 45 feet from the trough, and the length or the wave 650 feet.

In the Chemical Section, Dr. George Wilson opened with an interesting account of Dr. Black. There, Dr. Wilson stated, he had obtained from Mrs. Elizabeth Hunter, a servant in Dr. Black's family during the last five years of his life. Among other particulars, it was stated that the eminent chemist had been in the habit of wearing thin shoes above his heavier ones, and that he used occasionally to be seen in the middle walk of the meadows, followed by a troop of boys, attracted by the novelty of this article of dress. It appears also that he had thermometers hung in his sitting-room, which he invariably examined on first entering the room. The servants, however, ultimately discovered that the "mercury-glasses," as they called them, told tales against them when they neglected or overheated the apartments, and were in the practice, when the thermometers stood too high, to hold them in the cool breeze at the window, and when too low, in front of the fire, a little before Dr. Black entered

Professor Voleaker read a paper on "the percentage of nitrogen as an index to the nutritive value of food," which was highly important as showing the objections which apply to the present method of determining the nutritive value of food by chemical analysis The nature of the paper, however, does not admit of abstract.

Mr. J. P. Gassiot, F.R.S., the well-known electrician, read a paper "On a peculiar form produced in a diamond under the influence of the voltaic are." He exhibited to the section a diamond which had been exposed to the intense heat produced by the voltaic battery when arranged as in the device for the electric light The diamond had been fused, but, instead of changing into coke, as in such circumstances diamonds generally do, it had become a glassy mass, and seemed to consist of a multitude of small crystals adhering to each other. The diamond was examined with much interest and curiosity.

Mr. H. C. Sorby, F.G.S., read a paper "On the trimorphism of carbon," the object of which was to establish the fact that coke was in reality crystallised in structure when very hard, and in the very same form as the diamond, from which it differs in so many respects. Mr. Sorby stated that he had also obtained anthracite or blind-coal in the form of crystals. His paper excited a good deal of discussion.



THE BASS ROCK.

In the other Sections, a considerable number of very valuable papers were read; and each of the four working days of the Association were marked by the large amount of matter which was brought before each Section.

The Physical Section, and particularly the Geological Section, was constantly crowded. The Section for Chemistry was more than usually dry and uninteresting; and the Chemists frequently read their papers to half a dozen people. The Mechanical Section, under the presidency of Dr. Robinson, stood forth with unusual attractions and interest, and many very valuable communications were made. The Natural History Section was crowded with papers, as was also itsSub-Section of Ethnology.

The Physiological sub-section of the Natural History division also had many valuable communications made to it. It is, however, much to be regretted, that, in an association essentially in all its features popular, any papers should be admitted that should offend the delicacy of any of its members. The secretary at the evening meeting boasted of the number of lady members; and yet, in the daily lists of papers read, were some the very titles of which justly raised the strongest marks of reprobation. The subjects themselves should never have been heard of beyond the precincts of a medical class, and the obtrusion of them before such a gathering as that of the British Association argues a most depraved taste, if it does not, indeed, indicate something worse.

Two evening lectures were given, one by Dr. Bennett, on the blood, and another by Dr. Mantell, on the Dinornis: this last lecture has been so often delivered in London and elsewhere, that we should have thought some more novel subject might have been selected

The excursions to Tantallon Castle, the Bass Rock, and a geological ramble over Arthur's Seat were very delightful of their kind; but much inconvenience was found to arise from the loss of a day in the middle of the session.

On the whole, this, the second meeting at Edinburgh, may be regarded as a successful one; and certainly the people of Scotland have done all in their power to render it agreeable.

The general committee have decided that the next meeting shall be held at Ipswich, under the presidency of the Astronomer Royal; the time of meeting to be fixed by the London council, but to be either at the latter end of June or the beginning of July.

The Bass Rock is visited in summer by numerous pleasure parties, in boats, either from North Berwick or at Canty Bay, near Tantallon Castle. The Bass Island, or rather Rock, rises two miles north of Tantallon, 400 feet sheer out of the sea. It is about a mile in circumference, and is conical on the one side, presenting on the other an abrupt and overhanging precipice. It is remarkable for its immense numbers of sea-fowl, chiefly Solan geese. Upon the top of the rock grabbs out a spring of clear water, and there is verdure enough to support a few sheep. The Bass was long the stronghold of the Lauder family, one of whom distinguished himself as a compatriot of Wallace. The Castle, situated on the south side of the island, is in ruins. In 1671 it was sold by the Lauder family, for £4000, to Charles II., by whom it was converted into a Royal fortress and state prison. Many of the most eminent of the Covenanters were confined here It was the last stronghold in Great Britain that held out for James VII., but, after a resistance of several months, the garrison were compelled to surrender, by the failure of their supplies of provisions. The Bass is now the property of Sir Hew Hamilton Dalrymple, Bart. The last edition of "Black's Picturesque Tourist of Scotland," an excellent book of its class, has supplied the above data

SIR DAVID BREWSTER.

With this distinguished *savant* originated the establishment of the Association whose anniversary we have just reported; for it was Sir David Brewster, who, in 1831, at York, proposed the preliminary meeting which led to the formation of the Society.

SIR DAVID BREWSTER, K.G., PRESIDENT OF THE BRITISH ASSOCIATION.

Sir David Brewster is a native of Jedburgh, in Roxburghshire; where he was born Dec. 11, 1781. He was educated for the Church of Scotland, of which he became a licentiate; and in 1800 he received the honorary degree of M.A. from the University of Edinburgh. While studying here, Mr. Brewster enjoyed the friendship of Robison, who then filled the Chair of Natural Philosophy; Playfair, of Mathematics; and Dugald Stewart that of Moral Philosophy.

In 1808, Mr. Brewster undertook the editorship of the "Edinburgh Encyclopædia," which was only finished in 1830. In 1807, he received the honorary degree of LL.D. from the University of Aberdeen; and in 1808, was elected a Fellow of the Royal Society of Edinburgh.

Between 1801 and 1813, Dr. Brewster devoted his attention greatly to the study of Optics: and the results were published in a "Treatise on New Philosophical Instruments," in 1813

In 1815, Dr. Brewster received the Copley Medal of the Royal Society for one of his discoveries in optical science; and soon after was elected a fellow of that body. In 1816, the Institute of France adjudged to him half of the physical prize of 3000 francs, awarded for two of the most important discoveries made in Europe, in any branch of science, during the two preceding years; and in 1819, Dr Brewster received from the Royal Society the Rumford gold and silver medals, for his discoveries on the Polarisation of Light.

In 1816, Dr. Brewster invented the Kaleidoscope, the patent-right of which was evaded, so that the inventor gained little beyond fame, though the large sale of the instrument must have produced considerable profit.

In 1819, Dr. Brewster, in conjunction with Professor Jameson, established the "Edinburgh Philosophical Journal;" and subsequently, Dr. Brewster commenced the "Edinburgh Journal of Science," of which sixteen volumes appeared.

In 1825, the Institute of France elected Dr. Brewster a Corresponding Member; and he has received the same honour from the Royal Academies of Russia, Prussia, Sweden, and Denmark

In 1831, Dr. Brewster received the Decoration of the Hanoverian Guelphic Order; and in the following year, the honour of Knighthood from King William the Fourth.

Sir David Brewster has edited and written various works, besides contributing largely to the "Edinburgh Review," the "Transactions of the British Association" and other scientific societies, and the "North British Review." Among his more popular works are a Treatise on the Kaleidoscope; an original Treatise on Optics for the "Cabinet Cyclopædia;" and Letters on Natural Magic and a Life of Sir Isaac Newton for the "Family Library." The latter work has been translated into German Sir David Brewster is likewise one of the editors of the "London and Edinburgh Philosophical Magazine."

The discoveries of Sir David Brewster range from the kaleidoscope to the law of the angle of polarisation, the physical laws of metallic reflection, and the optical properties of crystals; and our philosopher is the author of an immense number of facts and practical applications in every branch of optics

The accompanying Portrait is engraved from a beautifully executed Talbotype by Messrs. Henneman and Malone, of Regent-street.

TERCENTENARY COMMEMORATION OF KING EDWARD'S SCHOOL, BURY.

THIS very interesting festival, in commemoration of King Edward's School, founded at Bury St. Edmund's in 1550, was held on Friday week, and was most numerously attended. The proceedings of the day commenced by the assembling of the pupils of the School at the Guildhall, amid many distinguished visitors, among whom were the Bishop of London and the two Judges of Assize, Barons Alderson and Rolfe, formerly members of the School. From the Guildhall the parties assembled proceeded to St. James's Church, where the service was preached by the right rev. prelate, Dr. Donaldson, the Master of the School, delivered an address at the School-Hall, of great historical interest as regards this Royal foundation; and in the afternoon a *déjeûner* took place at the Assembly-rooms, W. B. Donne, Esq., in the chair, which was attended by about 240 persons. The addresses delivered by the right rev. prelate and the two learned Barons previously named excited great interest, and were followed by several bursts of applause. Previously to the termination of the proceedings, the chairman announced that the Bishop of London had communicated his intention of founding an annual medal of the value of five guineas for the best Latin essay, on a subject to be selected by himself and the Head Master, Dr. Donaldson.

The School-house is a neat modern building, with the bust of King Edward VI. placed over the door, with an appropriate inscription.

"The fame of Bury St. Edmund's (it is remarked in the *Bury and Norwich Post*) was not more inseparably connected with the Royal shrine and Royal endowments of its Abbey in Roman Catholic times, than it has been, since the Reformation, with its Royally-founded Grammar School. The one arose out of the ruins of the other—a phœnix from its ashes—a light out of darkness. It was a good thought, therefore, that the year which completed the third century of its existence should not be suffered to pass unmarked by some appropriate celebration—some recognition of the debt which the scholars and the inhabitants of the town alike owed to the institution of the Protestant King."

KING EDWARD'S SCHOOL, BURY ST. EDMUND'S.

A. J. E. COCKBURN, ESQ., LL.B. M.P. FOR SOUTHAMPTON; SOLICITOR GENERAL FOR ENGLAND.

NOOKS AND CORNERS OF OLD ENGLAND.

GLASTONBURY ABBEY.

(From a Correspondent.)

THE celebrated antiquary, Browne Willis, informs us that this place is famous in our old histories as being the site of the first Christian church in England, and it is reported to have been founded thirty-one years after the death of Christ, by Joseph of Arimathæa. According to the monkish legends, the parts of the wainscoat, but now defaced.

Leaving the house at some distance, we see, amidst a vast heap of ruins, the great kitchen of the monastery standing undemolished. It is a large regular octagon, covered with a dome of stone, in the centre of which is an aperture for the smoke. In four of the sides are windows; in the other four are fire-hearths, the magnitude of which sufficiently testifies the convent's hospitality. Not far from hence, as I guess from the ruins, stood the refectory, dormitory, and the guest-hall. The whole site is encompassed by a very high and strong stone-wall, in which is a spacious gate leading from the monastery to the Church.

We have engraved two views of these celebrated monastic ruins. First is the interior of St. Joseph's Chapel, from the crypts, excavated in the spring of 1825, when was discovered a well underneath a freestone Norman arch on the south side of the chapel. The well was supplied from a mineral spring at the foot of the Tor; hence, probably, the prevailing tradition of a subterranean passage from the Tor to the Abbey

St. Joseph's Chapel was finished both within and without, in its forms and ornaments, with the best skill, the nicest art, and the most correct taste; and presented to the eye, probably, the choicest and most perfect specimen in the kingdom of an Anglo-Norman ecclesiastical edifice On the north and south were two grand portals, high in the western wall was an elegant trifurial window with a semicircular head, and, at the opposite end, another window, probably of the same size and pattern. On the north and south sides four uniform, but larger, windows rose gracefully and lofty, till

GLASTONBURY ABBEY.—INTERIOR OF ST. JOSEPH'S CHAPEL, FROM THE CRYPT.

GLASTONBURY ABBEY.—NORTH DOOR OF ST. JOSEPH'S CHAPEL.

Glastonbury Abbey is reported to have been founded thirty-one years after the death of Christ, by Joseph of Arimathæa. According to the monkish legends, it was originally a wicker building, thatched with reeds; and it was always reported to be the most ancient church, not only in England, but also in the whole world. Thus, Henry III., in a grant of his, designates it as "Totius Angliæ et orbis Ecclesiarum antiquissima." Afterwards, it became tenanted by a colony or congregation of Benedictine monks, conducted thither, A.D. 435, by a disciple of St. Patrick

On referring to Wilkins's "Concilia," we find that Ina, King of the West Saxons, in a special charter granted to Glastonbury Abbey, A.D. 725, exempts it from all episcopal jurisdiction, as well as "from all regal exactions and services, such as military expeditions and the building of bridges and citadels; and also from the direction and interference of all Archbishops and Bishops." Large grants of land accompanied these extraordinary privileges. The Bishop of Wells was to go once a year with his clergy to his mother church at Glastonbury, and sing the Litany there; and the Abbot might permit any Bishop, who celebrated the canonical Easter, to officiate and administer the sacraments in the churches within his (the Abbot's) jurisdiction. King Ina, moreover, strictly forbids his subjects of every degree from entering the precincts of the Abbey for the purpose of "pleading, searching, plundering (*rapiendi*), commanding, or interdicting;" and it is further ordered, that "whatever causes shall arise concerning murder, sacrilege, witchcraft, robbery, &c. &c.; concerning ecclesiastical discipline, the ordination of clerks, or synodal conventions, let them, without prejudice to any man, be defined by the judgement of the Abbots and Monks: and whosoever shall presume to violate this grant, let him know that, being eternally damned, he will perish in the ineffable torment of devouring flames."

We learn from Leland that this Church contained the monuments of King Arthur and Guenevira his Queen, King Edmund the Elder, Edward de la Zouch, and others; and it is reported, also, in the "Monasticon," to have been the burial place of several other kings and great personages, as King Kegar, Edmund Ironside, Coel King of Great Britain, the father of Helen, mother to Constantine the Great; also of saints and holy men not a few, as St. Joseph of Arimathea, St. Patrick, with two of his disciples; St. Idractus, with his seven companions, martyrs; St. David, St. Dunstan, Gildas, the British historian, and several of the early Bishops whose names, if they could be recovered, it would be tedious to record; for, as this surpassed in revenues all the abbeys in England except Westminster, and exceeded in size all the cathedrals except Old St. Paul's, so we may reasonably conclude that it was adorned with as many, if not more monuments than any other sacred edifice, and that the number of eminent persons interred here is so great that it cannot be reported.

Richard Whyting was the last Abbot of Glastonbury. Upon the dissolution of the monastic establishments in 1540, this venerable person, in consequence of his refusing to surrender his Abbey into the hands of the King's visitors, was condemned for high treason at Wells, drawn from that city to Glastonbury on a hurdle, and, despite his white hairs, hanged with two of his monks on the Tor Hill. From that date the noble Monastery fell to decay, nothing being now left but vast ruins discovering its former grandeur. Of the great Church of the Abbey, there remains yet standing one side wall of the west nave, one arch of the north, and about three arches of the south cross, or *transeptum*, and two great pillars of the arch that supports the east side of the great square tower, in the middle of the fabric. Both the walls and the side aisles by the choir remain, each containing eight windows; and the wall at the east end, for above three feet high, is yet seen above the rubbish. A little westward from the great Church stands the chapel of St. Joseph of Arimathæa, which has somewhat better escaped. The fabric being still entire which separated the chapel from the spacious portico that led to it, which are broken down, as well as the pavement, quite into the vaults beneath. It is an oblong, curiously wrought, and painted after the Gothic style. At each angle was a tower, terminating in a lofty pyramid of stone, having a staircase within. One of them is fallen down as far as the roof of the chapel. A little to the north-west of the chapel they shewed me the holy thorn, which, they say, always blossoms on Christmas-eve. What we find left of the monastery is a fair edifice of stone, thought to be the Abbot's house, on the south side of the Church. In it are several rooms entire, and particularly a large parlour, with several ancient coats of arms depicted on

their semicircular summits almost touched the vaulting, their slender weather mouldings assuming the pointed form, and exhibiting at their termination a series of corbel heads, representing the different stages of the age of man. But it was beneath these windows, and on the inside, that the architect lavished his chief labour. Here he covered the whole surface with small semicircular arches, interlacing each other; and here, after having ornamented his arches above and below, with uniform fillets, or mouldings, of the richest and lightest zigzag pattern, he supported the lower ones on polished pillars of blue lias, each having its central band moulding, and surmounted them with finely chiselled capitals, equally diversified and graceful.

Next is the North Portal of St. Joseph's Chapel, than which nothing in free-stone masonry can be more highly sculptured. The whole building is attributed to the abbacy of Hirlewinus, between the years 1102 and 1120. It consists of semicircular arches (four in number), receding gently in succession into the body of the wall, and diminishing in size as they recede, each resting on pillars, and their *fasciæ* thickly covered with a profusion of sculptured representations.

We perceive the whole of this very interesting property is to be disposed of by auction on the 14th inst.; whoever may become its possessor, we trust will respect the venerable and romantic ruins.

PARLIAMENTARY PORTRAITS.

ALEXANDER JAMES EDMUND COCKBURN, LL.B., M.P. FOR SOUTHAMPTON, SOLICITOR-GENERAL FOR ENGLAND.

THE subject of our memoir (son of Alexander Cockburn, formerly in her Majesty's diplomatic service, and nephew of Sir James Cockburn, Bart., one of the Income-tax Commissioners, who was Under Secretary of State in 1806, and afterwards Governor and Commander-in-Chief at Curaçoa and the Bermudas) is the Admiral the Right Hon. Sir George Cockburn, G.C.B., who, in 1815, was commander-in-chief at the Cape, and conveyed Napoleon to St. Helena, was sworn in a Privy Councillor in 1827, and from 1841 to 1846 was a Lord of the Admiralty) was born at London, in 1809; in 1829, took his degree of LL.B. at Trinity Hall, Cambridge, of which he is a fellow, and in the February of the same year was called to the bar at the Middle Temple, and went the Western Circuit. He soon obtained a large practice at the common law bar, and before election and other parliamentary committees. In 1841 was made queen's Counsel, and became a bencher of his inn; and in 1844-45-46, was engaged in most of the leading railway cases.

At the general election in 1847 he was invited to become a candidate for the representation of Southampton, and was returned along with Mr. Wilcox without opposition.

In the adjourned debate upon Mr. Stafford's amendment to the second reading of the Jewish Disabilities Bill, Feb. 11, 1848, the hon. member made his first speech in the House.

The next important speech of the hon. member was in the debate of May 3, 1849, on the second reading of the Bill to permit Marriages with the Sister of a deceased Wife. He contended that in the whole range of Scripture there was no prohibition of such marriages.

In the debate on the second reading of the County Courts Extension Bill, on the 10th of April, in the present session, Mr. Cockburn supported the second reading. The opinion out of doors was unanimous as to the inefficiency of these courts; there was much need of caution in selecting a new system of jurisdiction. It was much the same thing to deal with £20 as with £500. The period of legal reform had been too long delayed, to the infinite suffering and distress of the people, and, it might be added, to no small disgrace of the Legislature. It was a delusion to say we had a simple and well ascertained law; it was a serious expense to subscribe for the reports of the ordinary sittings of the courts. Court differed from court, Judge from Judge. It took the life of a man to make himself thoroughly conversant with the law of England. To the subject the law was a sealed book he could not stir a step in the ordinary concerns of life without the assistance of a lawyer: this was not a state of things for ordinary of the law, by the opponents of this measure, which he believed would be a valuable amelioration of the present much-to-be-deplored condition of the law. There is, therefore, good hope of amendment of the law under the administration of the honourable member. He has the requisite knowledge, has expressed the will, and has himself shown the urgent importance of reform. But, able upon their several topics as these speeches undoubtedly were, they scarce led the House to expect such powerful and eloquent power as the hon. member displayed in his speech, on the 28th June last, in support of Mr. Roebuck's motion of approval of the foreign policy of Lord Palmerston, and which won from the House profound attention for its facts and arguments, laughter and cheering against those of opponents, cheers for its assertion of sound principles of international law and foreign policy, and protection of the rights and liberties of British subjects abroad. He denounced the attack upon Lord Palmerston as the meanest order—as an attempt of the Protectionists to gain a footing by a coalition with the Peel party, and by which they were aiding a conspiracy of continental powers against progress and liberty. To this day the Continental Cromwell was held in reverence, spite of all excesses, because throughout the world he had compelled the voice of Englishmen to be respected a position Lord Palmerston had throughout his long tenure of office ably upheld. The claims upon the Greek Government were distinct and real. Mr. Finlay's land had been taken—Pacifico's house destroyed; before the Greek tribunals there was no remedy no action lay against King Otho for the land—it was in this country alone that a subject could proceed against the Crown. A pauper mob plundered Pacifico's house, and there was not in Greece, as here, a remedy against the locality. Practically there was no remedy, but that the strength of England should be put forth in the protection of her subjects—a principle under which Lord Palmerston had so long and triumphantly Government which afforded that remedy, and proclaimed protection to its subjects, at all times, and in all places, the people of England would rally triumphantly. So much for ourselves: as to foreign countries, Lord Palmerston had but interfered either where invited or where threatened peace would have been non-interference culpable; and, in all cases, he had offered aid to progress, urging upon Absolutism the necessity of granting to its people patience and moderation in the assertion of their rights. But over all rests now so conspicuous, the opposition until now had been silent; their sympathies were not with Italian liberty; their pages of history, nor with brave Hungarians, but with Radetzsky, Haynau, Russia, and all Absolutism in its efforts to crush freedom

This speech so completely established Mr. Cockburn's reputation, not merely as a speaker upon subjects of law and matters of detail, but as a statesman of general knowledge, readiness, and power must be of essential service to a Government, that on the retirement of Lord Cottenham, and the promotions of Wild to the woolsack, Jervis to the Chief Justiceship, and Romilly to the Attorney-General, Mr. Cockburn was at once offered the Solicitor-Generalship, which he accepted, and was then again returned without opposition for Southampton. He again spoke upon the subject of foreign policy at the Reform Club dinner to Lord Palmerston; and immediately on his return from the election at Southampton was taken by special retainer to Stafford as counsel for the plaintiff in the famous Baldridge *v.* Baldridge case. The unrelenting prosecution by the client of the honourable member, whose statement was a strange and varied story of perverted life, which the *Times* has characterised as scarcely inferior in romantic interest and incident to Gerbault's "Caleb Stukeley."

The honourable member is unmarried

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—The Rev. Hugh Jones, Vicar of Holywell, Flintshire, to the canonry of Adam Rekensall, in the Cathedral Church of St. Asaph. The Rev. R. B. Maurice Bonner, Vicar of Rushden, Denbighshire, to the canonry of the portion of Llanferres, Flintshire, in the Cathedral Church of St. Asaph. The Rev. Glanville Martin to the rectory of Otterham, Cornwall. The Rev. Paul Bush to the rectory and vicarage of Duloe, Cornwall. The Rev. Edward Hawkins, Provost of Oriel College, Oxford, with the rectory of St. Nicholas Olave, City of London. The Rev. Robert Williams to the rectory of Llanvillin, Montgomeryshire The Rev. Richard Wilkinson to the vicarage of Pershore, Worcestershire.

TESTIMONIALS.—The following clergymen have lately received testimonials of affection and esteem: The Rev. [illegible] Wace, St. Mary's College, curate of St. Andrew, Pershore, Worcestershire, from the master, mistress, and children of the National School. The Rev. Lewis Fromas Lewis, curate of Aberystwith, Monmouthshire, from a few of his friends in Blaina and Cwm Celyn Iron Works; the Rev S. Ellis, from the parishioners of St. Ives, on his departure; The Rev. H. W. Vincent, late vicar of Marske, Cleveland, from the inhabitants: the Rev. Richard Williamson, late rector of Sutton Coldfield, Warwickshire, from the inhabitants, on his departure; the Rev. Thomas Dix, late curate of Neatishead, Norfolk, from the inhabitants; the Rev. W. W. Curtis Hayward, from the inhabitants of Long Melford, Suffolk.

THE VALUE OF BIRDS IN AMERICA.—The last Legislature enacted that it shall not be lawful in the state of New Jersey for any person to shoot, or in any other manner to kill or destroy, except upon his own premises, any of the following description of birds:—The night or mosquito hawk, chimney swallow, martin or swift, whip-poor-will, cuckoo, king bird or bee martin, woodpecker, clasp or high-holer, catbird wren, thrush, blue bird, mocking bird, robin, fire bird or summer red-bird, hanging bird, ground robin or chewink, bobolink or rice bird, robin, snow or chipping bird, sparrow, Carolina tit, warbler, blackbird, blue-jay, and the small owl. The penalty is five dollars for each offence, or for the destruction of the eggs of such birds.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

Scarcely a fluctuation has marked the price of Consols during the week, which opened on Monday at 98¾ and closed at 97 on Wednesday, receded, in consequence of a sale on behalf of the Court of Chancery, to the previous quotation. Business has been unusually limited, many of the leading jobbers having taken advantage of the quiescence of political affairs to leave town. New Three-and-a-Quarter per Cents quote a fractional advance, this description of Stock becoming a favourite investment, in consequence of its guarantee against reduction, after its transition to Three per Cents Exchequer bills and India Bonds continue in good demand. At the close of business quotations were for Bank Stock, 211½; Reduced, 97¾; Consols, 96¾; New 3½ per Cent. Anns., 99¾; Long Anns. to expire Jan. 1860, 8 5-16; Ditto 30 years, Jan. 6, 1860, 8; India Bonds, £1000, 90 pm.; Ditto under £1000, 90 pm.; Consols for account, 96¾; Exchequer Bills, £1000 June, 69 pm.; Ditto, £500, June, 69 pm.; Ditto, Small, June, 69 pm.

The Spanish Government has given notice that after the first of next month the dividend warrants on the Deferred Bonds of November, 1835, and May, 1836, will be exchanged for *active stock*. It is further announced that a final settlement has been come to with Mr. Ardoin, who has handed over all the securities in his possession, amounting together to £4,627,619 Active, and £1,854,650 Passive Stock. This announcement sounds agreeable to a few of us late, but its fact, only changing one piece of paper for another. No dividends have been paid on the Active Stock since 1840, and all attempts to effect anything approaching a fair compromise have been systematically thrown aside.

The Foreign Market has been active during the past week, and although the fluctuations in prices have not been great, still considerable buoyancy has existed. Buenos Ayres continue to display an upward tendency, and Mexican has been in demand, the price having touched 30, but has slightly receded since. Russian Four-and-a-Half per Cents are in favour, continuing firm at 96¾, with a tendency upwards. Peru Bonds have not been quite so active as of late, but the prices firmly maintained. Danish Five per Cents show a disposition to rest, having been done at 103¾. Equador, from its low price, is a favourite object of speculation, and has quoted 4. At the close of the week, the Market was rather heavy, at the following prices.—Buenos Ayres Bonds, 6 per Cent., Account, 58¾; Equador Bonds, 2¾; Grenada Bonds, 1¾ per Cent., 18½; Ditto, Deferred, 4; Mexican, 6 per Cent., ex Jan. Coupons, 30; Portuguese 5 per Cents, 86¾; Ditto, Converted, 1841, 33¾; Spanish, 5 per Cent., 1840, 17½; Ditto, 1844, 18½; Ditto, 1849, 11¾; Ditto, Passive, 3¾; Ditto, 3 per Cent., 37¾; Venezuela Bonds, 2¾ per Cent., 3¾; Ditto, Deferred, 1¾; Belgian, 4½ per Cent., 99¾; Dutch, 2½ per Cent., 57¾; Ditto, 4 per Cent., 99¾.

The Share Market is flat. Eastern Counties are lower, in consequence of the opening of the Great Northern line, which has also tended to make North-Western stock flatter. Retford, Guildford, and Reading have been quoted lower, and Midlands are lower. The closing prices are—Brighton, 44½ Exeter, 64½; Buckinghamshire, 17½; Chester and Holyhead, 9¾; Eastern Counties, 6¾; Ditto Northern and Eastern, 5¾; Ditto Five per Cents, 99¾; East Lancashire, 7¾; Exeter, Yeovil, and Dorchester, 1½; Great Northern, 8¾; Ditto, One-half A Deferred, 2¾; Do. Five per Cent. Pref., 109; Great Southern and Western (Ireland), 30¾; Great North of England, Five per Cents, 100¾; Ditto, Shares, 45¾; Lancashire and Yorkshire, 87¾; London and Blackwall, 4¾; London, Brighton, and South Coast, 80¾ x. d.; Ditto, New, Guaranteed 6 per Cent., 137 x. d.; London and North-Western, 111¾; Ditto, New Quarters, 79¾; London and South-Western, 60; Ditto, New £50, 22; Ditto, New Preference, 7¾; Manchester, Buxton, and Matlock, 3¾; Midland, 34; Ditto, £50 Shares, 9¾; Ditto, Consolidated Bristol and Birmingham, 6 per Cent., 120¾; Norfolk, 21; North Staffordshire, 6¾; Reading, Guildford, and Reigate, 17¾; Scottish Central, 11¾; South-Eastern, 13¾; York, Newcastle, and Berwick, 14¾; Do., Newcastle Extension, 9¾; Do., G.N.E. Preference, 4¾; York and North Midland, 16¾; Boulogne and Amiens, 7¼; Central France (Orleans and Vierzon), 14¾; Dutch Rhenish, 2¾; Orleans and Bordeaux, 2¾; Paris and Ronen, 24; Paris and Strasbourg, 4¾ x. l.; Rouen and Havre, 9¾; Tours and Nantes, 4.

SATURDAY (Noon).—The Foreign Stock Market was heavy yesterday, at a trifling decline; several large money sales tending to depress prices. The current quotation was 96¾, which was the closing price. In Foreign Stocks there was no material change. Shares were heavy.

THE MARKETS.

CORN EXCHANGE (Friday).—[illegible] the supply of wheat, very little English wheat came to hand either last week or this week, and the [illegible] sales were not extensive. 1260 quarters [illegible] To-day, the show of samples of both red and white was trifling, owing to which, the average quality of the former, and the number of buyers in attendance, the demand for all kinds of wheat of to me produce ruled stea y and, in some instances, quoted parcels commanding a little more money. Upwards of 20,000 quarters of foreign wheat have reached us this week. Fine and prime parcels were all sought after at full rates of currency. In the middling and inferior kinds a moderate business was doing, at Monday's currencies. No English barley was [illegible] but the supply of foreign has been to a fair extent, 14,000 quarters On the whole a good business was doing, at full prices Although the quantity of malt on show was rather large, [illegible] off slowly, at last week's currencies. We were well supplied with fine gu oats, which were in good request, at fully late rates. Beans, peas, and flour were quite at [illegible]

ARRIVALS: [illegible] wheat, 19,000 barley, 1; malt, 700; oats, 60; flour, 1800.
FOREIGN [illegible] wheat, 14,000 barley, —; malt, —; oats, 200 flour, —.
English Wheat [illegible] and Essex white [illegible] 38s to 40s; ditto, red, [illegible] 36s to 38s; Kent and Essex white [illegible] 38s to 40s; ditto, red, [illegible] 36s to 38s; grinding lots, 32s to 34s; Northumberland and Scotch, 32s to 34s; Yorkshire and Lincolnshire, 32s to 34s; Norfolk and Suffolk, 32s to 34s; Chevalier, 42s to 44s; Yorkshire and Lincolnshire feed oats, 17s to 19s; ditto, fine, 19s to 21s; Youghal and Cork, black, 16s to 18s; ditto, white, 16s to 16s; tick beans, new, 32s to 37s.; ditto, old, 36s to 38s; grey peas, 32s to 34s; maple, 34s to 36s; white, 34s to 36s; boilers, 36s to 38s; Lincolnshire and Yorkshire, 32s to 33s per 280lbs — *Foreign*: Danzig wheat, —s to —s; Marianopoli, —s to —s; barley, —s to —s; oats, —s to —s; beans, —s to —s; peas, —s to —s, per quarter. Flour, American, 21s to 22s per barrel; Canadian, —s to —s per cwt.

The Sugar Market Canary sold has given way in value 6s to 6s per quarter, with a very [illegible] other sorts scarcely any business is doing.

Refined, English, 44s to 45s; Dutch, 43s to 44s; Mediterranean and Prussian, 38s to 41s; Bompeed, 35s to 36s per quarter; Coriander, 20s to 21s; Caraway, 26s to 28s; Fennel-seed, 16s to 18s; white pepper, 9s to 10d; black, 5½d to 6d per lb. Linseed, 40s to 41s; Rapeseed, now, £26 to £28 per last of ten quarters. Linseed cakes, English, £8 0s to £9 0s; foreign, £7 10s to £8 0s per ton. Cloves, 7s 3d to 7s 6d per lb. Cassia, 6s to 7s per lb. Canary, 55s to 72s per quarter. English Clover-seed, red, —s to —s; extra, —s to —s; white, —s to —s; extra, —s to —s; new, up to —s. Foreign, red, —s to —s; extra, —s; white, —s to —s; extra, —s per cwt.

Spices.—The prices of wheaten bread in the metropolis are from 6½d to 7d; of household do 6d to 6d per 4lb loaf

Imperial Weekly Average.—Wheat, 42s 1d; barley, 31s 11d; oats, 17s 6d; rye, 22s 11d; beans, 37s 9d; peas, 37s 7d.

The Six Weeks' Average.—Wheat, 42s 1d, barley, 31s 11d; oats, 17s 6d; rye, 22s 11d; beans, 37s 9d.; peas, 37s 7d.

Duties on Foreign Corn.—Wheat, 1s 0d; barley, 1s 0d; oats, 1s 0d; rye, 1s 0d; beans, 1s 0d; peas, 1s 0d

Tea.—At public sale, 4000 packages have been offered this week. 780 sold at full prices. The private trade is firm and common grand congou is held as high as 11d to 1s per lb

Sugar.—Rather an extensive business has been done in the raw sugar since last report. In some instances the quotations have had an upward tendency. Refined goods move off steadily, at from 44s to 45s for standard lumps, and 46s to 47s for good to fine grocery.

Coffee.—About 2070 bags good ordinary native Ceylon have changed hands, at 41s 6d to 41s 6d per cwt. In other kinds very little doing

Rice.—Our market is bare, and dealers refuse to sell except at full prices

Provisions.—We have to report a steady inquiry for Irish bacon, at fully last week's quotations. Carlow, Clonmel, and Kilkenny, firsts, landed, 56s to 60s. Cork, 47s; Limerick, 42s to 45s Waterford, 47s; Sligo, 42s to 45s; Belfast, 42s to 45s; Derry, 42s to 45s. Foreign, 42s to 45s. Of inferior, 36s to 40s per cwt. English qualities are quite as dear as last week. Five weekly 70s to 76s per cwt. Hams, 60s to 70s per cwt. Lard, 40s to 42s per cwt. Butter is firm, and per cwt. more inquiry Prime sparkle Waie ford, 66s to 68s; and heavy, 60s to 62s per cwt Ditto 56s to 58s; Limerick, 60s to 62s; Cork, 60s to 62s; and mouldings, 48s to 52s per cwt.

Tallow.—For the time of year, a steady business is doing in this article, at full prices P. Y. C. on the spot, 44s per cwt. and 36s 9d per cwt. Town tallow 35s 3d to 35s 6d per cwt.

Oils.—Seal oil is in good request, at very full prices; otherwise, the trade is heavy

Spirits.—We have more inquiry for brandy, at full prices. The market for rum and British corn spirits is very inactive.

Hay and Straw.—Last week's hay, £3 10s to £3 10s; new do. £2 5s to £3; old clover, £3 13 to £4 5s, new do, £3 to £3 17s; and straw, £1 1s to £1 8s per load.

Potatoes.—Supplies are moderate, and the demand is dull this morning are very favourable The bes is looking remarkably healthy, both in Essex and Kent. Our market *Cheese.*—Fine, heavy qualities are in steady request. The supply is valued 200,000 cwt.

Mid and East Kent pockets, £6 0s to £16 0s, Weald of Kent ditto, £5 10s to £7 7s; Sussex ditto, £5 5s to £7 7s; Essex ditto, £5 5s to £7 5s; old, 80s. lbs to £3 3s per cwt.

Coals (Friday).—Hewicks and Co., 13; Walker, 13; Hetburn, 13; Stewart's, 16; Kellow, 13; South Kellow, 13; Tees 13s 9d per ton

Smithfield (Friday).—Our market to day was but moderately supplied with beasts for the time of year, the general quality of which was inferior The few prime Scots, Herefords, &c., offering were, in some instances, disposed of at a trifling advance upon last week's rates, but the general top price of 3d per 8 lb; and the value of most other breeds was well supported. The numbers of sheep were not quite so extensive as on Monday last, while the quality of the mutton trade ruled active, at an improvement in value of 2d per 8 lb, the primest old Downs realising that money. Calves are in fair request, but the supply of which was but moderate—moved off slowly, yet their currency's were well maintained. Pigs met with an improved demand for the value of which had an upward tendency In pigs next to nothing doing Milch cows sold heavily, at from £14 to £20 each, and calves at 4s per lb.

Per Sib to stink the offals:—Coarse and inferior beasts, 3s 6d to 3s 8d; second quality ditto, 3s 10d to 4s 0d; prime ditto, 4s 2d to 4s 4d; prime Scots, 4s 6d to 4s 8d; coarse and inferior sheep, 3s 6d to 3s 8d; second quality ditto, 4s 0d to 4s 2d; prime coarse-woolled ditto, 4s 4d to 4s 6d; prime Southdown ditto, 4s 8d to 4s 10d; large coarse calves, 3s 10d to 4s 2d; prime small ditto, 4s 4d to 4s 10d; large hogs, 3s 2d to 3s 4d; neat small porkers, 3s 6d to 3s 8d; suckling calves, 18s to 28s; and quarter old store pigs, 16s to 21s each. Total supplies: Beasts, 680, cows, 120, sheep and lambs, 12,500; calves, 330, pigs, 340. Foreign supplies: Beasts, 120; sheep and lambs, 1650; calves, 104; pigs, 20. Scotch beasts, 70; sheep, 0.

Newgate and Leadenhall (Friday).—These markets were scantily supplied to-day Generally speaking the demand was heavy, at barely Monday's quotations.

Per Sib by the carcass:—Inferior beef, 2s 2d to 2s 4d; middling ditto, 2s 6d to 2s 8d; prime large ditto, 2s 10d to 3s 0d; prime small ditto, 3s 2d to 3s 4d; large pork, 2s 4d to 2s 6d; inferior mutton, 2s 8d to 2s 10d; middling ditto, 3s 0d to 3s 2d; prime ditto 3s 4d to 3s 6d; veal, 3s 8d to 4s 0d; small pork, 3s 6d to 3s 10d; lamb, 5s 6d to 6s 6d. ROBERT HERBERT.

She was daughter of the late Rev Charles Caulfield, rector of Killyman.

LAMBETH ELECTION.

THE nomination of candidates for the representation in Parliament of the borough of Lambeth, in the room of Mr. C. Pearson, took place on Monday morning, on Kennington-common. At about a half hour a considerable number of persons assembled at the hustings, and about ten o'clock, when the proceedings commenced, upwards of 6000 were present.

The Sheriff's precept and the Act against Bribery having been read,

Mr. Grafton, the returning officer, briefly reminded the electors of the importance of the privilege which they were about to exercise, and hoped that they would conduct themselves throughout the whole proceedings with proper decorum, and allow to each of the candidates a fair and impartial hearing

Mr. Locock, of Lambeth-house, then stepped forward, and proposed Mr. Williams as a fit and proper person to succeed Mr. C. Pearson. Mr. Williams's chief recommendation was, that he was a business man, and had carried his business habits into the House of Commons, where he had sat for many years as a friend of the people. During his career, he had voted 2000 times, and on every occasion, with the exception of two, his vote had been for the true interests of the country. (Mr. Harvey's defeat) any one to come forward with a better character than Mr. Williams had.

Mr. Doulton seconded the nomination.

Mr. Knott nominated Mr. Palmer. He had been connected with the borough of Lambeth, and was the son of Mr. Samuel Palmer, who had been foremost in every cause of reform.

Mr. Wills seconded the nomination.

Mr. Charles Evans proposed Sir Charles Napier. His services in the House of Commons and in other places had shown him worthy of that high distinction.

Mr. Miller seconded the nomination

Each of these candidates having addressed the electors,

The returning officer took a show of hands; for Mr. Williams first, for Mr. Palmer next, and lastly for Sir C Napier. After a little deliberation, he pronounced the show of hands to be for Mr. Williams. Although the general impression appeared to be that the majority of hands had been held up for Mr. Williams. Not more than 30 or 40 hands were held up for Mr. Palmer

A poll having been demanded for the choice of Mr. Williams and Mr. Palmer,

The returning officer announced that the voting would commence on Tuesday morning.

On Tuesday, throughout the day, from the opening of the poll, at eight o'clock A.M., until its close, at four o'clock P.M., the greatest interest was excited on behalf of all the candidates to bring their supporters to the poll; but it was quite apparent to all, after the first hour's polling, that Mr. Williams was the most likely candidate to obtain the vacant seat, and at the end of the hour he had a large majority over both his competitors, which increased as the day advanced; and at the close the numbers were announced by Mr. Williams's committee as follows:—For Williams, 5000; Palmer, 1200; Napier, 800. Mr. Williams was present, and addressed a few words of thanks to the electors assembled. Neither of the other candidates was present.

On Wednesday, at noon, Mr. Onslow, the returning officer of the borough, made the official declaration of the poll. The three candidates were present on the occasion. Mr. Williams was received with three cheers; Sir Charles Napier had some slight cheering, mingled with hisses; and Mr. Palmer with faint cheering.

The returning officer said, that all the poll-books had been carefully examined and accurately cast up, from which it appeared that the number of recorded votes for each of the three candidates was as follows:

Mr. Williams	..	..	3834 (cheers)
" C. Napier	..	..	1182 (oh, oh)
Mr. Palmer	..	..	883 (laughter)

He therefore declared that Wil iam Williams, Esq, had been duly and lawfully elected as a fit and proper person to be one of the representatives [illegible] of Lambeth (the Commons of England) in the present Parliament (cheering.)

Mr. Williams said (amid loud cheering), he now stood in the proud position of their representative. He owed it to their energy and enthusiasm in his favour, that he had been elected before he was in Parliament, with an honest character for the last thirteen years. He would fulfil all his promises to the best of his power; and he would do what not one member of the House, perhaps, could do—he would come before them at the end of every session, and give an account of his stewardship. (Cheers.) He would give satisfaction to every honest Reformer. (Cheers.) They had done their duty to their country by electing him. The real honest Reformers would support their strength in that borough. Lord J. Russell (hisses) had twitted the people by saying that they wanted an abler reformer; he told the electors of Lambeth that 40 of them were not worth more than one elector in the rotten boroughs. (Cheers.) The strength of the Whig party was to be found in the 885 votes for Mr. Palmer (laughter), although that gentleman was as honourable a man as could be found. (Bravo.) They had also the gallant admiral (laughter); he was now in the condition of the old commodore, never fit for sea again. (Cheers.) He repeated, he would be for Lambeth. ("Not a bit of it," and "No, no.") The gallant admiral had said that if a Tory had come forward he would have resigned; and he found that the united strength of the Tories and Whigs was 4017. What was the strength of the Reformers? 3834 had voted, and he was told that he might have had double the number if he had wanted them. They had shown what honest Reformers would do at the next election; and he would tell them how to act. They must go to the country, while the nation was prosperous, and then they had done now [illegible] He thanked them for their exertions in behalf of progressive and [illegible] He would go to the House of Commons, opposing every job, and using all his endeavours to keep it out—gatherers' fingers out of their pockets. (Cheers.)

Sir C Napier said he had received a good many candidates (uproar), but he returned thanks to the 1182 electors who had voted for him. He only heard of the nomination on Tuesday, and he came forward only because of the address of his honourable friend and Admiral Berkeley. (Laughter.) He saw an address promising impossibilities of every description (No, no) when he saw that the income-tax was to be taken off, he asked how was the Government to be carried on? If their new representative (Mr. Williams) was paid, you mean) How was the interest of the National Debt to be paid? and, if not paid, what would become of the labouring classes? (Oh, oh.—Remember how the working men got on when Mr. Locock was in power.) Their new representative had a majority in the House of his opinions, the institutions of the country would be destroyed. (Oh, oh.—No, no.) When he heard people so fond of blowing their own trumpet, he much doubted his energy. He would believe him to be honest; but the man who could say what he had, must be weak-headed. (Cheers.) He repeated that his hon. friend had sounded his praise so well, that his trumpeter was [illegible] When a man was so honest, he is bound to believe him, although there might be a vacancy in his head. (Laughter.) He had never made many promises, [illegible] he would tell them one promise he had made at Coventry (laughter [illegible] that special speech he said he was a friend of Free Trade, except in Coventry ribbons. (Oh, oh.) Sometimes a man makes a promise out of 1200 electors he managed only to obtain 3834. (Laughter) The rest of the electors had staid at home, and why? Because they would not support his hon. friend. He did not say that they would not support Mr. Palmer, but he should like to have seen how many supporters he had in the borough. He had done his duty to the present, but returned his sincere thanks to those who had voted for him. He did not promise that he would come forward again. (Do not; you are not wanted.) He returned thanks to Mr. Palmer and his committee for the gentlemanly manner in which they had acted towards him throughout the contest, although he could not say so much for Mr. Williams, the "honest" man, and his committee. (Cheers and "Oh, oh!")

Mr. Palmer said, he stood before them as a candidate not at all disgraced (cheers), although defeated; but, in being defeated, he congratulated himself upon being in the company of the brave Admiral. (Cheers.) He had wished to devote his services in behalf of their local interests. Although not there as a representative—(You shall be so next time) it would be his endeavour to co-operate with them in promoting civil and religious liberty. He owed to the [illegible]

persons who had voted for him a debt of gratitude that he should feel to the latest hour of his life. (Cheers.)

The proceedings terminated with the usual vote of thanks to the returning officer.

A portrait of Mr Williams, M.P., with a Memoir of his Parliamentary life, appeared in No. 220 of the ILLUSTRATED LONDON NEWS.

[It will be remembered that Mr. Williams took the chair at the recent great meeting held in the London Tavern to promote the restoration of uninterrupted postal communication on Sundays. The honourable gentleman also has throughout taken an active part against the pharisaical postal derangement: of this popular course of proceeding on the part of their candidate, his supporters in Lambeth did not fail to make a most advantageous use with the electors, and we see the result in the overwhelming majority—the numbers of which, we are assured, were in no slight degree swelled by this element of the honourable gentleman's well-deserved success.]

MRS. FANNY KEMBLE.

We have already noticed the remarkable Shaksperian readings of Mrs. Fanny Kemble; but they deserve an extended record. Ardent as were the expectations formed of this highly-cultivated lady on her first appearance as an actress, these dramatic readings more than realise her early promise. We have to recollect that the reading of an entire drama presumes the tasteful assumption of many characters. Each must be brought into alternate prominence, and the whole harmonised by the proper distribution of light and shade. Both sexes, too, have to be discriminated, with the different ranks of person and education. Mrs. Kemble's success in these particulars is perfectly marvellous, so much so, that the general impression produced is that rather of wonder than admiration. The perfection attained is nothing short of a miracle, even when we know it to be the result of laborious study and practice.

The *début* of this lady, as we well recollect, was the 5th October, 1829, at Covent Garden, and was hazarded with the view of redeeming the fortunes of the theatre. The play was "Romeo and Juliet," and the heroine was sustained by the *débutante* with unexpected power. Her truly Addonian countenance and expressive eyes were the general theme of admiration; while the tenderness and ardour of her action went to the soul of the spectator, and her well-instructed elocution satisfied the most critical ear. It was then, also, that her father took the part of *Mercutio*, for the first time. It is recorded that he earned by it thirteen rounds of applause. Nor was its merit over-rated. It was then, and continued to be, a wonderful impersonation of the poetic-comic ideal

On the 21st of the same month of October, the performers of Covent Garden presented to Miss Kemble an elegant gold bracelet, manufactured by Mr. Hamlet, as a testimony of the service which she had rendered to the company by her performance of *Juliet*.

It was not until the 9th of December that Miss Kemble had to change her *rôle*. She then performed *Belvidera* in "Venice Preserved," and achieved another triumph. For some time the part was alternated with that of *Juliet*. The latter during the season was performed thirty-six times; the former, twenty-three. The *Grecian daughter*, *Mrs. Beverley*, *Portia* in the "Merchant of Venice," *Isabella*, and *Lady Townley*, succeeded; in all Miss Kemble met with distinguished encouragement. Her season finished on the 28th of May; and she performed during it, altogether, 102 times.

Her reputation, however, proved to be greater in the metropolis than in the provinces. Nevertheless, on her return to London, she was greeted with an enthusiastic reception. The next season was celebrated by the failure of the "Jew of Arragon," and the affair with Mr. Westmacott; however, Miss Kemble added to her *répertoire* the characters of *Mrs. Haller*, *Beatrice*, *Lady Constance*, and *Bianca* in "Fazio."

Beyond this point, it is not necessary to pursue Mrs. Kemble's early career. Her theatrical engagement in America, her marriage with Mr. Butler, her return to the stage in 1847, her fortunes at Manchester and in London at the Princess's Theatre, her retirement again to America, with her subsequent divorce, are all matters of recent and remembrable record.

Suffice it to repeat, that, as a reader, Mrs. Kemble's reputation is likely to be greater than any she can now gain as an actress. Her powers, however, and qualifications, with one exception, are greater than those of any other *tragedienne* at present on the English stage. To her other merits, Mrs. Fann Kemble adds that of being an admirable poet.

MRS. FANNY KEMBLE'S READINGS OF SHAKSPEARE, AT THE ST. JAMES'S THEATRE.

PROTECTIONIST TESTIMONIAL.

On Wednesday a costly Testimonial of plate was presented to Mr. Peter Mathews, of Comb End Farm, Gloucestershire, as a mark of respect from the owners and occupiers of land, for his zealous support of agriculture, and energetic endeavours to expose the fallacies of theorists in the cultivation of the soil. The presentation took place at the Swan Hotel, Cirencester, where a large company assembled at dinner. The Plate, which cost £250, consists of a handsome tea and coffee service, and a tastefully-executed epergne, from the establishment of Messrs. Hunt and Roskell; the design being a massive circular pedestal, bearing a scroll, with an appropriate inscription, surmounted by two graceful figures—Prudence protecting Agriculture—and a shaft, in imitation of a vine branch, supporting the chalice—the whole group elegantly chased, and ornamented with vine foliage.

PLATE PRESENTED TO MR. PETER MATHEWS, AT A PROTECTIONIST DEMONSTRATION, AT CIRENCESTER, ON WEDNESDAY.

After the usual dinner, and loyal and preliminary toasts had been drunk, the chairman, Sir W. Codrington, M.P., highly eulogised the straightforward character of Mr. Mathews, and requested him to accept the Plate as a mark of the esteem and regard in which he was held by those who had the interests of agriculture at heart, and concluded by proposing Mr. Mathews's health, which was warmly responded to, and drunk with enthusiasm. In returning thanks, Mr. Mathews dwelt for some time on the many improvements professed to be now making in agriculture by the aid of science, which he endeavoured to prove to be nearly altogether failures. He then referred to the present state of Cirencester College, which he alleged, after an immense outlay of capital and ostentatious display of scientific experiment, was entirely profitless, and in a worse state of cultivation than when taken to four years ago to be made an example of what high cultivation could attain. Messrs. Huxtable and Mechi also came under Mr. Mathews's censure, both of whom he considered had given premature opinions upon the advantages to be derived from the great agricultural changes lately introduced. He then expressed his belief that Protection must be restored, or that prosperity and the best interests of the country must perish; and concluded by heartily thanking the company for their splendid gift

"The Health of Sir W. Codrington" having been drunk with much applause, he apologised for retiring so early. The chair was then taken by Sir M. H. H. Beach; many excellent speeches were made, and the company did not separate until a late hour.

THE ILLUSTRATED LONDON NEWS.

No. 441.—VOL. XVII.] SATURDAY, AUGUST 17, 1850. [NUMBER AND TWO SUPPLEMENTS, 1s.

THE CEYLON INQUIRY.

It will be remembered that last year certain grave charges were brought in the House of Commons against Lord Torrington, the Governor of Ceylon; charges of fomenting an insurrection in order to crush a disaffected native party more effectually; of cruelty, tyranny, and illegality in the proclamation of martial law; of wanton outrage against the religious feelings of the Cingalese; and of a general course of misgovernment, calculated, if not to emperil our possession of the dependency, to alienate the affections of the people of Ceylon, and to bring the British name into contempt and hatred. Among the particular incidents alleged were, that his Lordship had caused, without trial or proof of guilt, certain persons to be executed—among others, a pretended King of Kandy; that, after execution, he had discovered his mistake, and had then caused a second pretender to be shot, and that this second pretender was also the wrong person. It was also alleged that his Lordship had boasted of having had a priest executed in his "full canonical robes," and that the execution of a priest in this manner was a gratuitous outrage upon the religion of the country. Various other charges, equally serious, were alleged, and an inquiry into the whole matter was prayed for. The Government at first resisted all attempts to let in the light to this painful subject, and threw the shield of their protection over Lord Torrington; not only, it was supposed, because he was a relative—or near connexion of the great Whig and Governmental families of Grey and Russell, but because the conduct and policy of the head of the Colonial-office were implicated in the matter. Ultimately, however, the Government found it more politic to accede to the demand for an inquiry, the late Sir Robert Peel having warned them that to deny it would be dangerous. A select committee was accordingly appointed in 1849, "to inquire into the grievances complained of in Ceylon, in connexion with the administration and government of the colony, and to report its opinion whether any measures can be adopted for the redress of any grievances that might be proved to exist; and for the better administration and government of the dependency." The committee was composed of men of all parties, and included Mr. Baillie, who originally brought the subject before the House, Sir Robert Peel, Mr. Hume, Sir James Weir Hogg, Mr. Disraeli, Mr. C. P. Villiers, Mr. Adderley, Lord Hotham, Mr. Gladstone, Mr. Hawes, Mr. James Wilson, Sir Joshua Walmsley, Major Blackall, and Mr. Stuart Wortley. That committee heard evidence at great length; and, at the close of the Session of 1849, recommended to the House of Commons, that an humble address should be presented to her Majesty, praying that she would be graciously pleased to appoint a Commission to inquire on the spot into the means taken for the repression of the late insurrection in Ceylon. The House of Commons, on the advice of the Ministry, refused to acquiesce in the recommendation. The evidence taken before the committee was published at the commencement of the Session which has now just concluded, and was both voluminous and conflicting. The defenders of Lord Torrington were of opinion that the financial measures which had originally excited the disaffection of the Cingalese were judicious and necessary, and tended to the prosperity and good government of the dependency; and that, in proclaiming martial law for the suppression of the insurrection, Lord Torrington had acted upon the advice of the military officers, and that the apparent severity of the proceeding was real mercy, as it brought the insurrection to a speedier close, and prevented a protracted and sanguinary rebellion. It was alleged, on the other hand, that the insurrection was local and partial, and that the measures taken to repress it were unwise and unjust, accompanied by a cruel destruction of life and unnecessary destruction of property, and calculated rather to alienate than to preserve the good-will and confidence of the Cingalese, and to lessen the prospect of the future good government of the colony by Lord Torrington. At the commencement of the Session of 1850, the committee was re-appointed; and Sir James Emerson Tennent, who is said to have *accidentally* arrived from Ceylon, and other parties were examined at great length. That committee has just published its third report, in which they state their opinion that the serious attention of her Majesty's Government should be called to the evidence taken in the course of the inquiry, and recommend a second time that a Royal Commission should be appointed to proceed to Ceylon, "unless some step should forthwith be taken by the Government which may obviate the necessity of further investigation."

On Monday night, Mr. Hume moved that the whole of the evidence taken during the Session of 1850 should be printed; and reiterated in general terms the charges against Lord Torrington, and against the Colonial-Office for encouraging and protecting him in a course of proceeding alike dangerous, cruel, and unconstitutional. Mr. Hume, however, did not speak on behalf of the whole committee. The committee were not unanimous in their condemnation of Lord Torrington's conduct; for unanimity upon any question affecting the character of the Colonial Office was not to be expected from a committee of which the Under-Secretary for the Colonies was a member. On Monday night, Mr. Hawes, in reply to Mr. Hume, and on behalf of the Government, stated his views of the case, though not so well or so clearly as we find them stated in the draft of a report which had previously been rejected by the committee. This draft, though long, is necessary to a proper comprehension of the whole case; and we, therefore, present its principal heads as we find them in the report of the committee. Mr. Hawes, and, consequently, the Government of which he is a member, are of opinion—

1. That when Lord Torrington assumed the government of Ceylon, in the course of the year 1847, he found it labouring under great financial and commercial embarrassments.
2. That upon his arrival he took immediate measures to investigate both the

SITE OF THE BUILDING FOR THE GREAT EXHIBITION OF 1851.—(SEE NEXT PAGE)

financial and commercial condition of the island, with a view to relieve its trade by the removal of all unnecessary restrictions; to encourage the cultivation of the great staple produce of the island, by the abolition of duties pressing injuriously upon it; and, finally, by a rigorous economy, to bring the income of the government within its expenditure.

3. That the principal financial and commercial measures which Lord Torrington introduced in the course of the year 1847, and finally adopted, were beneficial and successful, and highly creditable to Lord Torrington and the members of the government of Ceylon generally

4. That in the year 1848 an insurrection occurred, which, among other causes of long standing, was mainly attributable to unfounded rumours and misrepresentations which were industriously circulated amongst the people, of numerous vexations and onerous taxes imposed or to be imposed That the people of the Kandian provinces, especially in the districts of Matelle and Kornegalle, rose in large numbers, attacked the towns of Matelle and Kornegalle, destroyed much public and private property, and created universal alarm. That the accounts which reached Lord Torrington of these dis urbances, represented that disaffection prevailed to a great extent amongst the inhabitants of these populous districts, who were known to be generally in the possession of arms, and that the extensive and scattered plantations of coffee were exposed to imminent danger.

5. That at this time the amount of military force at Lord Torrington's disposal, for the maintenance of the public peace in so extensive an island, was, under these circumstances, insufficient, and he therefore immediat ly sent to Madras for reinforcements, and also, on the unanimous advice of his executive council proclaimed martial law on the 20th and 31st of July, in the districts of Matelle and Kornegalle. That the Governor had the full concurrence and support of the highest military authorities, and generally of all classes of the inhabitants, in these and the other measures which he adopted for the suppression of the rebellion, and that they were successful in promptly effecting that object and completely restoring the public peace, which has not since been disturbed.

6. That martial law in the proclaimed districts was continued till October 10, or a period of ten weeks. That the policy and necessity of continuing martial law has been denied by many of the witnesses examined, whose opinion is entitled to consideration. That it appears, however, that Colonel Drought, the commandant at Kandy, in a statement laid before this committee, considered the continuance of martial law necessary; that Major-General Snell, on the 26th of Sept., 1848, addressed a letter to Lord Torrington to that effect, and that on the 2d of October, 1848, the Legislative Council unanimously concurred in an address to the Governor approving of his conduct.

7. That, with these facts before them, the committee think it due to Lord Torrington to express a general approbation of the measures he adopted with a view to the restoration of tranquility; and though as to his conduct in some respects the evidence before them is conflicting, and that of some witnesses strongly inculpates him, they are of opinion that there is not ground whatever for doubting that he acted throughout these proceedings in very difficult circumstances, with the single object of restoring the public peace and maintaining the security of life and property.

8. That, while the committee to this extent approve the public conduct of Lord Torrington, they regret that private communications have been brought under their notice as having passed between him and some of the principal officers of his government, of which they are bound to express their very strong disapprobation. That, as Lord Torrington has had no opportunity of offering any explanation with respect to these communications, the contents of which are described as "private and confidential," and obviously written by him in the expectation that they would be so considered, and as these letters and the evidence connected with them relate entirely to personal matters, not having a direct bearing on the subject of the present inquiry, the committee think it inexpedient to report these letters and this evidence to the House, but, in abstaining from doing so, the committee consider it right to express their opinion that these letters and evidence have brought to light the existence of dissensions amongst the officers of the Ceylon government highly detrimental to the public service; that communications of the character of these letters were calculated to aggravate such dissensions; and that this state of things requires the prompt and decided interference of her Majesty's Government with a view to its correction.

Mr. Hawes and Lord John Russell, holding these opinions, opposed the printing of the evidence; and Mr. Hawes moved an amendment, to the effect that the "evidence taken before the Ceylon Committee be referred to the Secretary of State for the Colonies and the members of her Majesty's Government." In the last week of the Session, it was not likely, however important the matter might have been, that any serious opposition would be offered to a proposal emanating from the Government, and the amendment was accordingly carried. In effect, therefore, Earl Grey —whose administration of his department is as much impugned as Lord Torrington's administration of the affairs of Ceylon—is to be the judge of the whole business, unless, in the next Session of Parliament, the subject shall be re-opened without fear or favour. This has been promised; but, in the meantime, the Government —doubtless with a view to prevent all further enquiry into the subject, and to quash the existing and unpublished evidence - has recalled Lord Torrington, and appointed Sir George Anderson to succeed him.

Such, in a few words, is the history of the Ceylon inquiry. It is evident, however, that the question cannot be allowed to rest as the Government would have it. If no other person in Parliament will call for full publicity and further inquiry into the conduct of Lord Torrington and other individuals, Lord Torrington himself may, perhaps, be induced, on his return to this country, to insist upon an investigation. At present, his Lordship's friends have condemned him more severely than his opponents, and in justice to himself he will doubtless court inquiry. It is better for his Lordship that the whole truth should be known, than that vague rumours should be allowed to circulate against him. One thing certain is, that the proper administration of our vast Colonial empire is a matter of infinitely more importance than the public or private character of any individual, whether that individual be Lord Torrington, Earl Grey, or Lord John Russell. It is equally certain, we think, that Parliament, next session, will thoroughly investigate the whole subject of this Ceylon insurrection.

SITE FOR THE GREAT EXHIBITION OF 1851.

UPON the preceding page is engraved the portion of Hyde Park to be appropriated to the building for the Great Exhibition of 1851. The builders have already commenced the works for the reception of Mr. Paxton's beautiful design, to be executed in Birmingham and the neighbourhood. Messrs. Fox, Henderson, and Co., of the London Works, at Smethwick, have the contract for the iron framework; Messrs. Chance, of Spon-lane, will supply the enormous quantity of glass required; and the tubes are also entrusted to a firm in the district These three materials constitute, in fact, the entire building

At a meeting recently held at Bakewell, in support of the Exhibition, and graced by the presence of the Duke of Devonshire, the Earl of Burlington, Mr. Paxton stated that the building will be 2120 feet long by 200 broad, the nave or principal aisle will be 120 feet broad, or 10 feet wider than the Coliseum at Rome. The columns, glass and its iron supports comprise the whole material of the building, the roof only being throughout the length of the nave and transepts of wood. The area of the whole space which may be afforded in the galleries can be extended to about 30 acres, if necessary The whole will be covered in by the 1st of January. Now if, after the purpose for which it is erected is over, it was thought desirable to take the whole down—and he sincerely hoped it would not be pulled down nor shipped to America—if they chose to let it remain, see to what a purpose it might be applied. There might be made an excellent carriage drive round the interior, as well as a road for equestrians, with ample room laid out and planted, and then there would be many acres of room in the galleries for a promenade for the public. (Cheers.) It is, in short, impossible to desire a more perfect edifice in the way of light and ventilation. Since the contract has been entered into, Messrs. Fox, Henderson (the first-named a Derby gentleman), Mr. Paxton (a Bedfordshire man), and Mr. Robert Stephenson, as by the sides of the columns to support the canvas, and thus the workmen will be enabled to construct the building under shelter.

THE POST-OFFICE OF THE UNITED STATES AND AMERICAN NEWSPAPERS.—By a recent order issued by the Postmaster-General of the United States, all foreign agents for editors and publishers of newspapers printed in the states of the Union are permitted to pass post-bags free through the territory of the United States, provided such correspondence relates exclusively to matter connected with their respective newspapers.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Louis Napoleon has commenced his "progresses" through the provinces; and, on the whole, his reception by the people has been rather of a flattering character. He left the Palace of the Elysée at six o'clock on Monday morning for the Lyons Railroad station, escorted by a detachment of Hussars His suite consisted of three travelling carriages, containing the Ministers of War, Agriculture and Commerce, and Public Works; General Rebillot, Commander of the Gendarmerie; M. Lecomte, a representative of the department of the Yonne; and the President's Aides-de-Camp, Private Secretary, and several other persons belonging to his household. The President was received at the station by M. Baroche, Minister of the Interior; M. Berger, Prefect of the Seine; and M. Carlier, Prefect of Police; and the train started at seven o'clock. The Ministers and the Prefect of Police accompanied him as far as Tonnere. The latest accounts mention his arrival at Dijon, amidst the enthusiastic cheers of the populace. Some doubt was felt as to the reception he would meet with in this town, it being the focus of the most extravagant opinions, both political and religious; but acclamations generally greeted his arrival.

The accounts of his progress are sharply criticised by the Legitimist and Republican journals.

A rumour was spread in Paris on Tuesday, that the President of the Republic had been suddenly seized with indisposition, arising from drinking a glass of cold water while in a state of perspiration. The report, however, was not credited, as it could not be traced to rest upon any good foundation.

M. Bouley de la Meurthe, Vice-President of the Republic, has returned to Paris, and will act as chief of the nation during the absence of Louis Napoleon

The Legitimists, it is said, are much disconcerted by the determination attributed to the Emperor of Russia to resist all attempts to restore either branch of the Bourbon family to the throne.

The conspirators against the public peace, who have hitherto carried on their operations at Paris, have transferred their labours to the provinces. The *Courrier de la Drome* says, that, owing to letters having been intercepted, and arms and ammunition seized, an attempt has been probably prevented, having for design to throw several departments of the south into agitation. The signal was to have been given simultaneously from Paris and Marseilles. The police have got hold of lists of a political association of a secret character.

Several arrests were made in Paris on Tuesday night, among whom was the editor of the *People*

Count Molé was taken ill with fever on Sunday last, but he was considerably better on the following day.

The annual distribution of prizes at the Sorbonne took place. An immense crowd was admitted into the body of the hall by tickets, whilst on the platform were seated the Vice-President of the Republic; M. Dupin, senior; the Minister of Foreign Affairs, the Minister of the Interior, M. Guizot, and other personages of note M. Dupin and M. Guizot were loudly applauded on making their appearance. M. Parieu, the Minister of Public Instruction, pronounced the usual address of encouragement to the students, which was loudly applauded in several parts. The distribution of the prizes then took place amidst the applause of the pupils, and the sound of military music.

On Tuesday the Minister of Foreign Affairs gave audience to the representatives of several German states regarding the war between Denmark and the Duchies of Schleswig-Holstein. The Minister for Prussia refused to be present, having received no instructions from his Court upon the subject. The cause of meeting is believed to be the concentration of troops upon the borders of Holstein by order of Prussia, supposed to be with the view of affording protection to the insurgents in the event of defeat by the Danes.

The Prince of Schwartzenburg has addressed a note to the Great Powers remonstrating against the pretensions of Prussia in directing the movements of troops belonging to the ruling powers of the north of Germany.

DENMARK AND SCHLESWIG-HOLSTEIN.

The accounts from the Duchies are at present of little interest, with the exception of the frightful catastrophe at Rendsburg, noticed in another column.

The close proximity of both armies to each other gives occasion to frequent reconnaissances from time to time, which are attended with smart skirmishes; but, in the main, matters continue in the same state of inactivity with the great body of both forces.

It is the evident desire and policy of each commander to remain as long as possible on the defensive, and to induce his adversary to quit his entrenchments, or strong position, and become the assailant. Were the Danes to be seduced from the defensive, the advantages of position would certainly be in favour of Willisen, who, having withdrawn all his detachments from the right bank of the Treene, and from that of the Elder west of Frederickstadt, has concentrated his whole force in a semicircle, with its left resting upon Rendsburg, its centre in front of Schestedt, and its right leaning upon Frederickstadt—a distance, from one extreme to the other, of more than thirty miles, but reducible to half that distance, if necessary, by the retirement of some of the extremities He has a sort of entrenched camp in front of Rendsburg, to secure his left; Frederickstadt as an *appui* for his right; and, in case of discomfiture in his centre, he can pass the Eider at the latter place, and fall back in security upon the Holstein banks. The position of the Danes also presents great advantages; and Willisen, notwithstanding the desire manifested by the insurgent forces to advance, even to the gates of the city, dare not,

ROYAL COMMISSION

The Royal assent was afterwards given by commission to several public and private bills, 75 in number, amongst which were the Duke of Cambridge's Annuity, the Marlborough House, the County Court Extension, the Navy Pay, the Borough Bridges, the Public Libraries and Museums, the Elections (Ireland), the Parliamentary Voters (Ireland), the Equivalent Company's Annuity Redemption, the Canterbury Settlement Lands, &c.

The Lords Commissioners were Lord CAMPBELL, Lord EDDISBURY, and Lord MONTEAGLE.

Their Lordships having unrobed, Lord CAMPBELL resumed the seat on the Woolsack; and,

On the motion of Lord EDDISBURY, the following bills were read a third time and passed: Spitalfields and Shoreditch New Street Bill, Transfer of Improvement Loans (Ireland) Bill, Law Fund Duties (Ireland) Bill, Savings-Banks (Ireland) Bill, Holyhead Harbour Bill, Lough Corrib Improvement Company Compensation (Ireland) Bill, General Board of Health (No. 3) Bill, and Consolidated Fund Appropriation Bill.

Lord MONTEAGLE presented two petitions, one from Van Diemen's Land, and the other from New South Wales, praying the amendment of the law which regulates the sale and tenure of land in those colonies.

SUNDAY POST-OFFICE REGULATIONS.

Lord CAMPBELL said that, understanding the commissioners appointed to consider the Post-office regulations had presented their report, he begged to express his gratification at the recommendations contained in that report. He believed that they would go a considerable way towards the removal of the evils which had been so sensibly felt for some weeks and months past.

Lord MONTEAGLE quite concurred in the opinion which had been expressed by his noble and learned friend.—Adjourned.

HOUSE OF COMMONS—WEDNESDAY.

The SPEAKER took the chair at one o'clock

METROPOLITAN WATER SUPPLY.

Mr. WILD asked the Secretary of State for the Home Department if it was the intention of her Majesty's Government to take any steps during the recess for the better supply of water to the metropolis?

Sir G. GREY said the report of the Board of Health should receive the serious attention of the Government during the recess, and also the evidence on which it was founded. He could not say what were the intentions of the Government, but parties promoting private bills on the subject would do so with their eyes open.

SUNDAY POST-OFFICE REGULATIONS.

In reply to Mr. LABOUCHERE, who said the report on the subject of postal communication on Sundays had been made, and was on the table of the House. It was not for him to say what course the Government meant to pursue in the matter

NEW METHOD OF REFINING SUGAR.

Further, in reply to the same hon. member, the CHANCELLOR of the EXCHEQUER said the attention of the Government had been called to the subject of refining sugar by acetate of lead; and having directed an analysis by three experienced chemists, a report was made and submitted to several medical officers. By that report it did not appear that any lead remained in the sugar; but that a sufficient amount existed in combination with the treacle to render that substance deleterious. The inventor, however, had denied this in the most strenuous manner, and had offered to eat any quantity the House chose to direct. (Laughter.) The best course, however, was to place the report on the table.

Mr. THORNELY moved that the report be printed.

Agreed to.

The CHANCELLOR of the EXCHEQUER laid on the table the report of the expense of building the New Houses of Parliament

THE CHARTIST LAND SCHEME.—A SCENE PREVENTED.

Mr. F. O'CONNOR, referring to the evidence taken before the Select Committee on the subject of the National Land Company and Snig's-End, and the payment by Mr. Hayter, the chairman of the committee, of Alexander Somerville for collecting testimony on the subject, asked the Speaker whether, when a Minister of the Crown was appointed chairman of a committee, it was any part of his duty to pay for certain private evidence not produced before that committee out of his own pocket?

The SPEAKER said, if any member of a committee thought it useful to obtain certain evidence, there could be no objection to his paying for it out of his own pocket.

Mr HAYTER rose to explain He got so far as to say, "The so-called honourable gentleman," when he was called to order by the Speaker, and stopped short.

Mr. F. O'CONNOR then started to his feet, amidst cries of "Order," and shouted out, "I can prove him to be a juggler and a swindler." Who the "him" was, we cannot pretend to determine.

The SPEAKER again interfered.

Mr HAYTER apologised for having used an unparliamentary expression, and this little fracas ended.

Several returns were ordered

Mr. NEWDEGATE called attention to a report entitled Foreign Tariffs, being a return, No. 570, of the present season, and having pointed out some discrepancies in it, asked the President of the Board of Trade whether he could explain these errors, and whether he would agree to a motion for the production of the foreign tariffs

Mr. LABOUCHERE was not able to explain the discrepancies pointed out, but assured the hon. member that the Government would not lose sight of the subject He did not think it would be desirable to lay the foreign tariffs on the table. Some of them were of considerable length especially, were very hastily and were frequently altered, and he did not think it would be worth while to put the country to the expense of printing them.

THE ROYAL ASSENT.

After a pause of more than half-an-hour, there being no other business before the House,

The Yeoman Usher of the Black Rod appeared at the bar, and having advanced to the table, summoned the House to attend the House of Peers to hear the Royal Assent given by commission to several bills which had passed both Houses.

The Speaker then left the House, followed by the whole of the members who were present.

On his return, he read the titles of the bills to which the Royal assent had been given (for which see Lords' report).

A message was brought up from the Lords, stating that their Lordships had agreed to the Security for Advances (Ireland) Act Amendment Bill and several other bills, without any amendment.

Colonel SIBTHORP gave notice that early next session he would call the attention of the House to the indefinite periods at which the House had commenced its sittings during the present session —Adjourned!

HOUSE OF COMMONS.—THURSDAY.

The SPEAKER, who was dressed in his state robes, entered the New House at half-past one o'clock, at which time there were about fifty or sixty members present

SECURITIES (IRELAND) ACT AMENDMENT BILL

Mr. F. FRENCH moved that this bill be allowed to pass through all its stages at once, and observed that it had received the approbation of the Lord Chancellor.

Sir W SOMERVILLE objected to passing a bill on so important a subject without further consideration.

After a few observations the bill was negatived without a division.

REVERSAL OF THE LATE POSTAL REGULATIONS ON SUNDAY.

In reply to Mr. Pinney,

Mr. LABOUCHERE said all that had taken place with regard to the recent postal regulations was this:—the report of the Committee appointed, in conformity with the address of the House, to consider how far Sunday labour might be diminished in the Post-office without absolutely putting a stop to the transmission and delivery of letters, had made their report, which was now lying on the table of the House. He could not at present enter into any details on the subject, further than to say that the general character of the report was certainly a recommendation that the suspension of the transmission and delivery of letters on Sunday, which had lately been established, should be repealed (Hear) and that we should return to the transmission and delivery of letters on Sunday, accompanied by such alterations and modifications as would ensure employed in the Post-office as much time to themselves on Sunday as was consistent with a due regard to the paramount interests of society at large. That was the general purport of the report which had been presented to the Treasury; but the Treasury had not yet had time to determine on the course to be adopted. He had no doubt, however, that the Treasury would be satisfied with the recommendations contained in that report, and that those recommendations would be carried into effect. (Hear, hear.)

THE PROROGATION

At twenty minutes past two o'clock, Mr. Pulman, the Deputy Usher of the Black Rod, entered the House, and on arriving at the table said: "Mr. Speaker, the Queen commands this Honourable House to attend her Majesty immediately in the House of Lords." The Speaker then left the chair, and, followed by the whole of the members, proceeded through the new lobby and corridor to the House of Lords. On his return, he stated that, in obedience to the Queen's command, he had attended her Majesty in the House of Lords, where her Majesty had been graciously pleased to give her Royal assent to several bills, and had also delivered to her Parliament a most gracious Speech, which the right hon. gentleman read, and which our readers will find in another part of our impression.

The Speaker having shaken hands with Lord John Russell, and the greater portion of the members likewise, the House broke up, and thus ended the labours, if not important, session of 1850.

[For Prorogation, see Lords' Report in Supplement.]

BIRKBECK FEMALE SCHOOLS.—The success which has attended the formation of boys' schools, on Doctor Birkbeck's plan, at the Mechanics' Institution, has induced the committee to extend the benefits by forming a girls' school in Southampton buildings, in connexion with the boys' schools. This system is considered to be well adapted to instill a sound education at a moderate expense.

COUNTRY NEWS.

REPRESENTATION OF CAMBRIDGE UNIVERSITY.—The death of the Hon. Mr. Law will occasion a severe contest in the University of Cambridge, both political parties being determined to assert their opinions, not only upon matters which have been brought or are expected to come before the Legislature, but also upon the great Church questions which have of late been so warmly agitated. The High Church party and the Protestants intend inviting Viscount Fielding to offer himself as a candidate, whilst their opponents have decided on tendering their support to Mr. J. S. Lefevre, the Vice-Chancellor of the University of London. Both gentlemen took honours at the close of their academical career.

SAVINGS IN COUNTY EXPENDITURE.—A long-called-for reform has been effected by Mr. Justice Wightman at the present assizes for Lancashire, holding in Liverpool, having for its object the reduction of expenditure in criminal [illegible] and expenses of witnesses.

ESCAPE AND RECAPTURE OF CONVICTS.—Two convicts, named John Parvis and the other James Blamir, between three and four o'clock on Monday afternoon, succeeded in climbing over the wall of the yard and the wooden fence of Commodore Henry Eden's garden into George-street, Woolwich. Two police constables from the dockyard gate immediately gave chase, and they were both captured near the Marine Barracks, and within 20 minutes were returned on board the *Warrior* convict hulk.

THE TWELFTH OF AUGUST.—The accounts which have reached us as to the state of the moors are not so uniformly good as we could wish to give to sportsmen on or near the 12th of August. Throughout Aberdeenshire, we believe, the prospect is excellent. On Deeside, the birds are more plentiful and stronger than they have been for four years. Such is the report of experienced keepers. In some districts of the Highlands, however, the case is very different. In Inverness-shire and Perthshire, the tape-worm is very destructive among the young grouse; and the same disease made serious havoc on the moors in the early part of the spring. We hear that this year a number of favourite shooting quarters have not been taken, owing to the high rents asked.

The mills of Messrs. Fielding, of Todmorden, Lancashire, which have for a lengthened period been running short time (about forty hours per week), either have or are immediately about to go on full time again.

"TAKE UP THE BED AND WALK."—On Thursday last, a man dressed as a mechanic went to a house in Brighton, walked up-stairs, took a bed from the bedstead, made it up into a bundle, and brought it down into the passage. At that instant he heard somebody coming. Thereupon, with admirable coolness, he gave two or three loud taps on the wainscoating, and when, in due time, one of the inmates made her appearance, he said, "I've brought this bed." "Bed," replied the woman; "there's no bed to come here: you must have made a mistake." "I think not," said the man; "this is No. 15, isn't it?" "Yes, this is 15." Then that is the number master told me to bring it to." "Well," said the woman, "it's wrong, at any rate, so I tell you, so take it away." "If you say I'm to take it," responded the thief, "I had better do so," and with that he took up the bed and walked off. Some time elapsed before it was discovered how completely the bed-owners had been done.—*Brighton Guardian.*

IRELAND.

COMMEMORATION OF THE QUEEN'S VISIT TO IRELAND, AT BELFAST.

Her Majesty's reception at Belfast last year was fully described in our Journal; and we have now to record a commemoration *fête* given by the inhabitants on the 10th instant. The place chosen was the large island formed during the execution of the harbour works, which has been tastefully laid out by the Harbour Commissioners, and forms a promenade of considerable extent. Here were assembled, in honour of the occasion, upwards of 7000 of the most influential [illegible] and their families, [illegible] more than 4000 of the [illegible] were [illegible] to take of the [illegible] towards the support of the General Hospital of the town; and [illegible] that, in the midst of his opponents, this act of charity was aided by his contribution. The sum thus collected is stated at £250.

The proceedings were opened at three o'clock by a Royal salute from the battery on Queen's Island, which was repeated by her Majesty's cutter *Wellington*, lying in the river; the band of the 39th Regiment afterwards playing the National Anthem. Boat-races, rope-dancing, necromantic feats, races, climbing poles, and feats of strength, varied the scene. The Commemoration terminated at dark in a display of fireworks. Flags waved upon the public buildings and the shipping in the harbour

In addition to the guests admitted by tickets, at least ten thousand others were stationed on ships [illegible] along the docks and quays

Prizes were awarded for poems in commemoration of her Majesty's Visit.

TENANT RIGHT.—In Dublin, the council of the Tenant League have commenced daily meetings in committee, and the provincial members have for the most part taken their departure for the purpose of working the movement throughout the country. Quarterly general meetings of the League will, however, be held; but these are not to take place in Dublin, it being the intention to select the principal provincial towns for the purpose; and the first of the meetings will, most probably, be held at Belfast. In this respect, as well as in many others, the present agitation differs very materially from any preceding one, as centralisation of such popular movements in Dublin has been hitherto their characteristic. Local associations will be established; but these will be formed entirely unconnected with the League, except in so far as they may be supposed to work upon the same principles and with the same objects. There is the utmost desire on the part of the Council of the League to avoid every thing like their constitution and in their operations which could be construed into illegality, nor is it likely that they will take any important step without having previously sounded the way before them by good legal advice. The organization thus set on foot is, however, a very formidable one.

BATHS AND WASH-HOUSES FOR DUBLIN.—At a meeting of the Dublin Corporation, held on Tuesday, the Lord Mayor, Mr. Reynolds, M.P., read the following letter:—

[illegible] Chambers, Aug. 10, 1850

My Lord,—I am commanded by the Lords Commissioners of her Majesty's Treasury to acquaint you, with reference to the memorial of the Town Council of Dublin, that they are pleased to approve of the Council borrowing a sum of money not exceeding £13,030 on mortgage of the borough fund, for the purpose of being applied to the erection of baths and wash-houses in that city

I am, my Lord, your Lordship's obedient servant.

The Right Hon. the Lord Mayor of Dublin, &c. G. CORNEWELL L. LEWIS

The Lord Mayor said, he believed there was no difficulty in the way of the proposed baths and wash-houses. The Lords of the Treasury had most liberally and kindly, and with the least possible delay, responded to their memorial, and had permitted them to borrow a sufficient sum to erect those baths and wash-houses. He believed that the plans submitted by the committee had been approved of and acceptable to all parties than the one proposed; and he hoped that the committee would sit from day to day until they carried it out

POOR RELIEF IN IRELAND.—The total number of inmates in the Irish Union houses in the week ended the 27th of July last, was 235,793, as compared with 209,194 in the corresponding week of 1849. The average cost of maintenance per head in July, 1850, was 1½d; and in July, 1849, 1s. 2½d. The number of persons on out-door relief on the 27th of July, 1850, was 104,486, as compared with 733,530 on the 28th of July, 1849 The cost of out-door relief for the week ended the 27th of July, 1850, was £2184; and in the week ended the 28th of July, 1849, £19,810

FINSBURY PARK.—The proposed park will cover an area of about 300 acres, and its estimated cost for the purchase of the freehold would be about £150,000. Surely this is not an outlay to be grudged by the Government to the inhabitants of Finsbury, for an acquisition, which will confer immeasurable benefit on this and succeeding generations, one, moreover, essential to the well-being of a vast and increasing population, and imperatively called for by every consideration of public health and utility. It is, not without reason, stated, that unless advantage be now taken to secure the only available space still open, the opportunity for forming a park in this part of the metropolis will be lost for ever, inasmuch as it has been fully ascertained that the property of the intended site will otherwise, within a short time, be covered with houses The spirit with which the matter has been taken up, however, encourages the hope, that Finsbury, ere long, will enjoy the invaluable boon recently conceded to the Tower Hamlets, and no longer be destitute of what ought to constitute the chief attraction, as well as the most healthful and agreeable resort of its densely crowded population

WILFUL DESTRUCTION OF THE ORDNANCE MAPS OF THE METROPOLITAN COMMISSION OF SEWERS.—A most flagrant act of wilful destruction of a considerable portion of the ordnance map of the metropolis has recently come to the knowledge of the Metropolitan Commissioners of Sewers—a work executed under their superintendence, at a great expense, for drainage purposes. The facts of the case appear to be these:—After the necessary levels and other information had been taken by the officers of the Ordnance, they were regularly deposited at the District Sewers Office, in Hatton-garden, under the superintendence of Mr. Joseph Smith, who had been taken as a sergeant from the corps of Sappers and Miners for that purpose. From the information so furnished Mr. Smith ordered the maps to be drawn, preparatory to their being engraved, and several of them, for the more crowded districts of the metropolis, were completed, and sent to the chief office in Parliament-street. On the day the maps were so removed, several of the officers of the establishment saw them placed in drawers with great care, with the exception of some that were already in large tin cases. There being gentlemen sufficient at their hands to refer to them, on opening the drawers they found the greater part of them completely saturated with some powerful [illegible] so much so, that a good deal of the work that had been beginned upon them was completely illegible. An immediate investigation was then made of those in the tin cases, and these appeared to have been injured in a similar manner. The appointment of Mr. Smith to this situation appeared to have given great offence to one or two parties, which had manifested itself on many occasions by a disinclination to obey his instructions. The commissioners, therefore, with a view to a thorough investigation of the facts, placed the matter in the hands of Mr. Field, the active officer of the detective police, who has for some days past been unwearied in his exertions in collecting information, nearly twenty of the officers having been strictly examined as to the circumstance. An analysation of the Liquid used for this felonious purpose has been made by Mr. Parry, of the Polytechnic Institution, who declared it to be nitrate of silver.

THE SESSION OF PARLIAMENT.

PARLIAMENT was opened this year by commission on January 31st, and was closed on Thursday, August 15, by Her Majesty in person. Though the Session has disappointed the hopes of the public, they may have been as much too large as its deeds have fallen short of its duties. Our brief notice of proceedings which have spread, including the holidays, over six months and a half, can scarcely suffice to enable the reader to strike a correct balance between the just expectations of the people and the performances of Parliament. We can only place before him a [illegible] of the [illegible] accomplished.

The Royal Commissioners promised, in her Majesty's [illegible] for the improvement of the Australian Colonies, [illegible] roving Ireland, by [illegible] chief of party processions, extending the Parliamentary franchise, altering the Grand Jury laws, and regulating the relations of Landlord and Tenant. With the exception of the last, concerning which Ministers have done nothing, all the others have been carried. Opinions differ as to the precise merits of the Australian Bill, but they all agree that it is a great improvement on the old system, and on the measures before submitted to Parliament on the subject. The chief measure for Ireland—that extending the franchise—was mutilated in the House of Lords, and a compromise accepted by the Commons. Neither in its original nor in its mutilated form did it equal the just claims of the Irish; but it will much enlarge the constituency, and protect the electors from being annually worried by the antagonistic exertions to place them on the register of the Roman Catholic priesthood and the Protestant landlords. The other measures for Ireland are too trifling to deserve notice, and as far as they go are as likely to be productive of evil as good.

But, besides Ireland and the Australian Colonies, the two chief subjects on which legislative action was demanded by the Crown, a hope was expressed in the Royal speech that Parliament would be "enabled to make further progress in the removal of evils which affect the health and *well-being* of the people." In compliance with this large and vague intimation, which might suggest the most extravagant hopes, Ministers gave notice, at the beginning of the session, of bills to improve the management of the Woods and Forests, and to improve the Mercantile Marine. Before the close, the former was given up, much to the injury of the reputation of the Chancellor of the Exchequer; and the latter was only partially carried out, after many changes, equally to the injury of the reputation of the President of the Board of Trade, and of the whole Ministry which had placed these measures in the front of the battle. In the course of the Session Ministers introduced and passed a measure to prevent unnatural interments in the metropolis. Nothing more was done concerning the health of the people, of which so much had been said and written. They introduced this, but did not carry through, a bill to enable the Jews to sit in Parliament, by altering the oath of abjuration. Measures particularly bearing on the well-being of the people, such as those regulating loan societies and reforming savings-banks, giving the depositors greater security than they now enjoy, were brought in, but were withdrawn or indefinitely put off. A political measure for abolishing the Lord-Lieutenancy of Ireland, which obtained the reluctant acquiescence of the late Sir Robert Peel, was given up, though generally approved of by the public, in deference to the Duke of Wellington. The Government brought in no less than ninety-five bills for "the removal of evils which affect the well-being of the people," and carried the greater part of them. Nevertheless, at least, were given up or defeated; but, by their instrumentality, upwards of seventy new laws were enacted. Amongst them are many unimportant acts, mere renewals of expiring laws or mere technical changes, but, amongst more important, is included the Act for Abolishing the Duty on Bricks—the only substantial benefit conferred on the people by the removal of a tax.

Beyond what the Royal Speech referred to and the Ministers proposed, the people had, as usual on the meeting of Parliament, great expectations. The revenue was prosperous, the country was at peace; the agriculturists were suffering and complaining, and further reductions of expenditure and taxation, to relieve them and the public, were anticipated In the course of the Session numerous attempts—such as Mr. Colden's motion in return to the estimates of 1835, and Mr. Henley's motion to reduce all salaries, and several motions by Mr. Hume and others to reduce particular estimates—were made to curtail the public expenditure, but they were all unsuccessful. A committee, indeed, was appointed to inquire into the salaries of public officers, which has recommended reductions.

Under the pressure of the reiterated demands of the public, Ministers have lessened the expenditure—it was, altogether, £2,388,650 less in the year ending July 5 than [illegible] and of this reduction, the Navy alone comes in for £1,189,573, an abatement in the miscellaneous expenses and the expenses under various acts of Parliament making up the remainder. But every attempt at a sweeping reduction was resisted by Ministers, who, at the very close of the session, in spite of much proper opposition, gave £12,000 to the Duke of Cambridge, and suspended about £6000 for stables for the Prince of Wales. Their reductions have not satisfied the public, while these additions to the expenditure are painful proofs that they are not duly impressed with the idea that the property of the people ought, above all things, to be respected

The only attempt made to give relief to the complaining agriculturists was Mr. Darnell's motion for a committee to consider a revision of the Poor-laws with a view to relieve the owners of property from the "cash-element" charges and some others on the rental taxation of the country. That such a measure could give them relief is doubtful; but so strong was the disposition to try it, that in a House of 525 members, hitherto held only by the small majority of 8. The Royal Speech expressed regret at the complaints made by the owners and occupiers of land; but, with the exception of abolishing the duty on bricks, and the general reduction of expenditure, by the ending taxation it rather, no effort was made to lessen the distress of the farmers, no inquiry even was instituted, whether it was the result of legislation, or fell on them in the course of nature.

Motions to enlarge the franchise and reform the electoral system met with the same fate as motions to abate the expenditure, and the Session close, without the gratification of any popular wish, or the enactment of any large and beneficial measure to bestow a name and honour on the Parliament of 1850

It will be more notorious for the injury it has inflicted on social and trading communication, helping to blight affection and to check prosperity, by its address concerning the Post-Office, than memorable for all its other labours. Under the baneful influence of a zeal that will listen to no reason, the House of Commons carried an address to the Crown to suspend on Sunday the collection and delivery of letters. Without asking the concurrence of the Lords in that address, though was the duty of the mover, the Ministers gave effect to it. By the authority of a small majority of one House of Parliament, amounting to no more than 28 in a small House of only 161 members, a large trespass was made on the religious feelings of one portion of the people, and the trade and communication of all were interfered with. It is the more remarkable, because our ancestors jealously to guard against any innovations on these particular subjects, passed standing orders in the House of Commons, which remain on its books to this day, and are continually in force, that no motion affecting trade or religion shall be entertained unless first submitted to a committee of the whole House. In total violation of the spirit of these standing orders—in total forgetfulness of the usual observance towards the House of Lords—and in contemptuous opposition to any part of the constitution, the Ministers, in compliance with the vote of a small majority of the House of Commons, made a great change in the Post-Office, which affected not only religion and the trade of the people. It has, as might have been expected, caused far more commotion than any other measure of the Session, and would have caused great disturbance were the public not thoroughly convinced that a measure [illegible] so illegal, and so cruelly mischievous in its effects, was thoroughly impracticable, and could not be continued. The very last day before the Parliament closed, it was accordingly settled, by a report made to both Houses, that it should be rescinded, by the same imperfect authority which gave it effect; but it has been long enough in existence, and has been too injurious not to give its own name to the Session conspicuous for nothing good which attempted to stop all postal communication on Sunday.

With the hopes of the people disappointed—with little good done, and that little much overbalanced by a great evil—the reputation of our statesmen this Session has much declined. Ministers have been unable to carry out their projects, and have convicted of weakness and vacillation approaching to imbecility. The projects of the Reformers have all come to nothing, and they have added neither to their power nor to their reputation. The Tories, or Protectionists, have had no projects—have done nothing, have proposed nothing of the least importance; and, from a great and influential party at the beginning of the Session, have crumbled into powerless fragments at its close without a leader and without a principle. [illegible] a party of opposition [illegible] to aim at [illegible] with every [illegible] and [illegible] [illegible] and [illegible] which have [illegible] the [illegible] [illegible] and [illegible] [illegible] and [illegible] [illegible] and

THE NORTHERNMOST CHINCHA (GUANO) ISLAND.

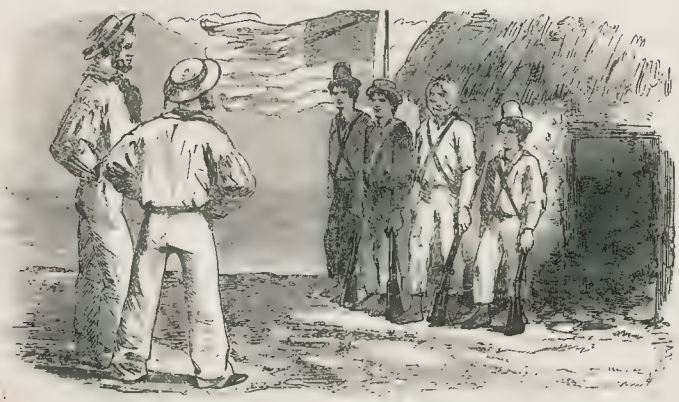
TIGRE ISLAND.

TIGRE ISLAND.

We have been favoured by "a Traveller in Central America" with the accompanying Sketches of the Island of Tigré, in the Gulph of Fonseca, lately taken possession of by Captain Paynter, of her Majesty's steam-vessel *Gorgon*, and since ceded to the United States by the Government of Honduras. This was a formidable point of the Nicaragua dispute, when the "Britishers" promptitude gave considerable annoyance to the United States; though the matter was afterwards amicably adjusted by Sir Henry Bulwer.

The first of these Sketches shows the interior of the island, with the stockade erected by the officers and crew of the *Gorgon*, and a signal-post, or look-out house, upon one of the hills.

The second Sketch is by no means a *caricature* picture of the United States garrison upon the Island, with the official stripes and stars fluttering in the breeze; and the "Britishers" regarding the force with real delight.



TIGRE ISLAND.—THE UNITED STATES GARRISON

THE CHINCHA GUANO ISLANDS.

The Chincha Islands are situated between the 13th and 14th degrees of south latitude, some 190 miles from Callao, the port of Lima, and 12 miles from the port of Pasco, whence labourers are procured for the operations of digging and shipping the guano with which these islands are covered. Guano has been taken from the northernmost island by the native Peruvians, from time immemorial; or, at any rate, it had been taken by them for an indefinite period previous to the discovery of the country by the Spaniards, now more than three centuries ago, and it has continued to be taken by them ever since. Indeed, without guano, the valleys on the coast of Peru could never have arrived at the highly productive state in which they now are. The quantity, however, required for that strip of coast is a mere bagatelle, which is shown by the slight impression made on the deposit by an abstraction of the article during, perhaps, a period of half a century. Matters on the islands of Chincha now present an altered appearance. In 1840 attention was first drawn to guano for the purposes of agriculture in Europe, and every year since shipments have increased. For the consumption of England, during the present season, 100,000 tons of guano will be taken from the island, and sold at prices varying from £9 8s. to £11 per ton, leaving, we believe, a net product in favour of the Government of Peru of about half a million sterling. The Government, however, do not receive the whole of this amount, one-half of it being mortgaged for the payment of the dividends on the debt owing to this country, and for the gradual redemption of the debt itself. Until last year, the northernmost island only had been touched. For the facility, however, of more rapid shipment, to meet the increasing demand for the article, *shoots* were arranged on the Middle Island, where vessels are now also loaded. The waters are so quiet around these islands, that vessels are enabled, without danger, to haul close to the cliff, and receive their cargoes through wooden or canvas shoots. In this way, a vessel of 500 tons may be loaded in a couple of days.

As to the quantity of guano existing on these islands, it would seem that it will not be easily exhausted; notwithstanding the increased demand in Europe, and notwithstanding the fact that no addition is now being made to it, since the Spaniards first entered the Valley of the Rimac. The exposure of a perpendicular surface from the top to the bottom of the deposit, which in some places reaches a depth of 150 feet, shows a uniform appearance of such a character as proves beyond a doubt the antiquity of the deposit. It must have been the work of many thousands of years. It is rather a curious fact, that although there are many islets in the neighbourhood, not one of them have any deposit of guano.

When application was first made to the Peruvian Government, for permission to ship guano to Europe, Captain Peacock, a highly intelligent person, at that time Superintendent of the Pacific Steam Navigation Company on the coast, was requested to state what quantity of guano he thought existed on the three islands: and, after a cursory examination (his other duties not allowing time for anything more), the Captain stated that the quantity might possibly not be far short of 100,000,000 tons. A subsequent minute examination, however, practised by Don Francesco de Rivero (we believe, at present, Peruvian Consul-General in this city), has proved that the quantity may not reach very much over 25,000,000 tons; so that if this country should continue to take 100,000 tons annually, and all other countries, including the coast of Peru, 20,000 tons more together 120,000 tons—the Chincha Islands will probably be cleared of guano by the year 2[illegible]. The middle island, we believe, is the largest, though there is not much difference in the size—varying from four to eight miles in circumference.

These islands partake of the advantage (if it be an advantage) enjoyed only on the coast of Peru and Bolivia, that they are free from rain. Hence this enormous deposit of guano, and hence the superiority in quality which it possesses, as a dressing for the land, over the guano brought from the coast of Africa and Patagonia.

Another enormous deposit of guano has within the last two years been discovered on the coast of Peru, near Casma, which may serve for [illegible]

A fire, very destructive in its consequences, broke out in Dublin on Monday morning. It was first discovered in the shop of Mr. Donnelly, the extensive hosier, in Westmoreland street; and, as it burned with great violence, the inmates were rescued with great difficulty, and the flames having extended to the adjoining premises of the Royal Exchange Insurance Company of London, they were not effectually subdued until the two large houses were completely consumed, and some of the adjoining ones slightly injured. The papers of the Insurance Company were saved, and Mr. Donnelly's concerns were, it is said, amply insured.

THE VILLAGE OF SCHESTEDT, ON THE ROAD FROM SCHLESWIG TO OSTERADE

GENERAL SCHLEPPEGRELL.

This gallant soldier, who fell in the late battle of Idstadt, on the 25th ult., was the favourite of the Danish army, and contributed chiefly to the total defeat of the Schleswig-Holsteiners in the storming their entrenchments at Fredericia. He was a truly brave man, and met with the death of a hero whilst leading on his gallant soldiers to victory.

GENERAL SCHLEPPEGRELL, KILLED IN THE BATTLE OF IDSTADT.

The accompanying Portrait is from a drawing by M. Baugniet.

EXPLOSION OF THE AMMUNITION MANUFACTORY, AT RENDSBURG

The fate that turned the battle of Idstadt against the Holsteiners seems to have pursued them with other and minor calamities. On the morning of the 7th inst., at Rendsburg in the laboratory, in which the ammunition, shells, shrapnels, &c. are prepared, an explosion took place, which destroyed the whole building, shattered the surrounding houses, and caused the loss of several lives.

The Laboratory is situate on the island, in the centre of the town, formed by the two branches of the Eyder, the island itself being a kind of fortress within the main fortifications. The ammunition is always removed, as it is prepared, to the more distant magazines, which are of course fire and shell-proof; and, at the time of the accident, there was no greater quantity of explosive matter in the building than the men were engaged on for the day, otherwise the catastrophe would have been frightful. It is singular that the workmen in the Laboratory itself have escaped uninjured, and the persons killed and wounded were all on the outside. The following details are taken from an official source:

About noon yesterday a terrific report was heard, that shook the walls of the houses, broke all the glass in the windows throughout the part of the town in the vicinity of the building, and shattered the tiling and slates of the roofs. For some minutes all was consternation, and many imagined that a bombardment of the town had begun, and that a Danish shell must have fallen into their dwellings. Every one rushed from the upper rooms to the ground-floor or into the streets. It was soon ascertained, however, that the laboratory on the Eyder Island had exploded, and that some of the houses nearest to it had been partially destroyed or set on fire. The building in which the Danish prisoners are quartered is close to the Laboratory, and the inmates and their guard rushed into the street at the first alarm; some of them were wounded by falling splinters. Two horses in a waggon standing on the Parade fell to the ground, after plunging violently when the explosion took place, and were found dead. General Wilhelm immediately took every measure to remove the alarm of the inhabitants. The whole garrison was under arms in five minutes after the accident, and the fire-engines, which have recently been put in good order and exercised, were in readiness.

The above account of the catastrophe is by the *Times* Correspondent, who has examined the ruins, and in a subsequent letter states:—"A small bridge connected the buildings of the Laboratory with the offices of the artillery establishment, or what may be called the Ordnance-office. The one unfortunately used as the school for the cadets was in the island and immediately joining the Laboratory, an arrangement rather convenient than safe, and to it the killing and maiming 20 of the cadets is to be attributed. The side-walk of the causeway is a large avenue of trees, and they sheltered the houses on the parade considerably, though even there the balls and shots fell from the air in showers, while fragments of shells were driven laterally through the windows. On the island not one stone of any of the buildings is left on another—whole blocks of masonry have been wrenched from the foundations and blown in all directions. The trees of the south embankment, towards the parade, are levelled as by a great hurricane, and lie all one way over the river, the trunks split in pieces and the leaves seared by flame. The whole of the ground within the enclosure is a scene of destruction; brick-work, beams, heaps of cannon-balls, shells, and grenades—all the solid parts of every variety of ammunition are mixed up with and buried in the fragments of the walls and roofs. It is supposed that more bodies are still among the ruins, and some have certainly been blown into the river: pieces of clothing, caps, and shoes are turned up frequently, and other shapeless fragments that are hurried away and covered over from sight; nor does the eye willingly rest on them, it is but too evident what they are.

"Though the roofs of the Artillery offices, the Government House on the Parade, and the church have all sustained damage, the houses in the Alt-Stadt have suffered the most—far more than the dwellings in Dresden and Prague by an artillery fire of some days. There, a few isolated points alone were really much injured; here, every house is more or less shattered; the stoutest, and those that stood in a line with the course the shock appears to have taken, show the least traces of its violence; but some of the older and weaker structures are literally almost shaken to pieces. Hamburg itself can scarcely supply glass and tiles enough for the repairs. Ninety-one bodies had been buried."

SCHESTEDT, FROM THE ROAD TO RENDSBURG.

The Sketch above shows German troops on their retreat from the battle of Idstadt, entering Schestedt.

Schestedt is a large village, beautifully situated on the road from Schleswig to Osterade, where a bridge and sluice over the Eyder Canal leads into Holstein. The country here is hilly, and intercepted with fine beech woods, and well adapted for a military stronghold: the Eyder, to the south; Wittensee (a large lake), to the north; and the fortress of Rendsburg, to the west, allows great advantages to a skilful general.

Schestedt has been from the oldest history a place destined for battles: the last was fought on Dec. 10, 1813, when the Danes, driven back from Holstein, gave battle to the combined forces of the allies under Generals Wallmoden and Tettenborn, with great success; in memory of which the Danes erected a monument of granite, surrounded by cannons taken from the enemy at that time, in the village of Schestedt.

Sword for the President of Hayti.—Mr. Mole, sword-maker, of Broad-street, Birmingham, has just executed a commission for the Grand Masonic Order of Hayti. It is a magnificent sword, intended to be presented to the President, on his installation to the mysteries of the order of that country. The sword is slightly scimitar-shaped, and is thirty-two inches in length. The blade, which is of the finest steel, is richly ornamented along its whole length with devices in blue and gold, bearing the inscription in French on one side, "To the illustrious F. Faustin Soulouque, President of Hayti," and on the other, "Homage of the Grand Order of Hayti." The hilt is of the most ornate and exquisite workmanship, surmounted by an Imperial crown, and adorned with various Masonic emblems. On the shield are richly chased the arms of Hayti, with the motto, "God, my country, and my sword," "Liberty and Independence." The scabbard is of the richest crimson velvet, most elaborately embroidered with gold, in open-work; and with various devices in most excellent taste. The "lockets" are beautiful specimens of artistic skill, in design as well as execution; and altogether a finer piece of workmanship in this particular branch of Birmingham manufacture has rarely been turned out. The cost of the sword is a hundred guineas.

Illustrations of American "Freedom."—A gentleman lately from Missouri relates to us the following incident:—A slave-holder in the southern part of Missouri started for California, taking with him a slave whom he had promised should accompany him to the mines, and then have an opportunity of earning enough to purchase his liberty and that of his wife and children. The master proceeded as far as St. Louis, and there placed him in a slave-pen and sold him for 750 dollars. The agreement between the master and slave was, as the latter related to our informant, that he should accompany him to the mines and work for him eight hours every day, and have the remainder of his time to dig on his own "hook." He was to pay his master 800 dollars for his liberty, 600 for his wife's, and 400 each for his children. "My heart was high," said the negro, as he related his story, "as I thought of the prospect of becoming free and having my wife and children; but think how I felt," and the tears rolled down his cheeks, "when massa sell me to get money to carry him to the gold-mines. Oh! dare 'er no God for my massa; he no go to hebben when he die."—"The story was heartrending," says our friend; but he adds, "It is a scene of everyday life among slave-traders." *Daily Wisconsin.*

EXPLOSION OF THE LABORATORY, AT RENDSBURG.

CALENDAR FOR THE WEEK.

SUNDAY, August 18.—Twelfth Sunday after Trinity.
MONDAY, 19, Royal George sunk, 1782.
TUESDAY, 20. Sun rises 4h. 53m., sets 7h. 11m.
WEDNESDAY, 21.—Blackcock shooting begins.
THURSDAY, 22.—Battle of Bosworth Field, 1485.
FRIDAY, 23.—Wallace executed, 1305.
SATURDAY, 24.—St. Bartholomew.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING AUGUST 24 1850.

THE SIXTEENTH VOLUME OF

THE ILLUSTRATED LONDON NEWS

IS NOW READY, elegantly bound in cloth, gilt edges, price 18s.; or, stitched in an ornamental wrapper, price 13s.

The whole of the Volumes, from the commencement, may be had, stitched in an elegant wrapper, price 13s. each; except the First Volume, which is 16s.

A new and beautiful design has been prepared for the Covers for Vol. XVI., which may be had, by order, of any Bookseller or News Agent, price 2s. 6d. each.

Portfolios for keeping the Numbers clean during the six months, price 4s.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager Mr. W. BATTY. On MONDAY, AUGUST 19, 1850, MAZEPPA and the WILD HORSE produced with all its original and powerful effects. Mazeppa, Mr. W. F. Rinks. To be followed by an unexampled routine of Batty's fearless Feats of Equestrianism in the SCENES of the ARENA. To conclude with a favourite afterpiece of JACK JUNE. Box-office open from 11 till 4. Stage Manager, Mr. W. Wast.

ROYAL SURREY ZOOLOGICAL GARDENS.—On MONDAY AUG. 19th, and Three following Days. Danson's PANORAMIC VIEW of the Alps.—Superb NEW AIR and recent additions: another splendid Tableau.—Pyrotechnic Concert and Ballet.—Mr. Godfrey's Entirely new series of music, by his best Military Band in the Arena.—Brilliant display of Fireworks, by Southby, concluding with a colossal Tableau of Napoleon on Horseback, from David's well-known picture.—Doors open from 9 A.M., Feeding the Animals at 3, Concert at 5. Passage of the Alps at 8, Fireworks at 9. Admission, 1s.

MR. JOHN PARRY'S NEW ENTERTAINMENT.—LAST NIGHT BUT ONE OF THE SEASON.—Mr. JOHN PARRY has the honour of giving his New Entertainment at the MUSIC HALL, Store-street, for the Last Time this season, on MONDAY EVENING next, AUGUST 19, commencing at Half-past Eight.—Tickets to be had of the principal Music-sellers. Stalls and Private Boxes to be had only of Messrs. OLLIVIER, 41 and 48, New Bond-street, and at the Hall.

THE HIPPOPOTAMUS, presented by H.H. the Viceroy of Egypt to the Zoological Society of London, established daily from One to Six o'clock, at their GARDENS in the REGENT'S PARK. The Band of the 1st Life Guards will perform, by permission of Colonel Hall, every Saturday, at four o'clock. Admission, ONE SHILLING; on Mondays, SIXPENCE.

INDIA OVERLAND MAIL.—DIORAMA GALLERY of ILLUSTRATION, 14 REGENT-STREET.—Additional Picture, MADRAS.—A Gigantic MOVING DIORAMA ILLUSTRATING THE ROUTE of the OVERLAND MAIL to INDIA, from Southampton to Madras and Calcutta, is now OPEN DAILY.—Morning, Twelve. Afternoon, Three. Evening, Eight.—Admission, 1s.; Stalls, 2s 6d; Reserved Seats, 3s. Doors open half-an-hour before each representation.

THE NILE.—IMPORTANT ADDITIONS to this Panorama. The Nubian Desert from the second Cataract to Dongola. War Dance by Fire-Light. March of a Caravan by Moonlight. Morning Prayer. The Mummy of a High-Priest is added to the Curiosities. Both banks of the River are shown in the Painting.—EGYPTIAN HALL, Piccadilly, Daily, at Three and Eight.—Admission, 1s; Pit, 2s; Stalls, 3s. Children and Schools, half-price.

ROYAL POLYTECHNIC INSTITUTION.—During this Week the ALPINE SINGERS from Styria will perform daily at Four, and in the Evening at Half-past Eight. LECTURE on CHEMISTRY, by J. H. Pepper, Esq. LECTURES by Mr. Buckingham on VOLTAIC ELECTRICITY. NEW SERIES of DISSOLVING VIEWS daily at mid-past Four, and at the Evening at a Quarter to Ten. Also a Series, exhibiting SCENES in the ARCTIC REGIONS, and the DISCOVERY of SIR JOHN FRANKLIN. Open at One o'Clock. DIVER and DIVING Bell, &c.—Admission, 1s; Schools Half-price.

TO CORRESPONDENTS.

C. A. C.—SAINT HILDA.—A work on most of the subjects you name will not, we fear, find a sufficient sale to induce any publisher to undertake it.

ANNUAL READER.—Mr. Ramsay, of Mr. Morris, Farnham & Co.'s photographic establishment, Regent-street.

PLAY MAKER.—The Life of Garrick, a portrait of Madame Vestris, and a portrait of the United States' Seal, appeared in our Journal for

IGNORAMUS.—Your letter is not in English. Perhaps by original edition he means a book printed in the fifteenth century. If so, he will find it very valuable.

DRAWING.—Any of the numbers of the Illustrated London News, published by Mr. Murray, Albemarle-street, will be a very useful guide to you.

RECTOR.—His letter is accepted with the first thanks.

A MUSICAL STUDENT.—We do not know where to procure a ticket for the reading-room of the British Museum. See the Statutes.

AS YOU SAY.—We think it unfair in a paper that we profess to answer all questions addressed to it, and which are of a respectable character, to refuse to reply to those which are addressed to us.

A YOUNG LADY.—We shall be happy to receive Mr. Hamilton's Reforma.

J. S.—The Apostles' Creed.—See "Brady's Beginners."

D. A. S.—Your letter is received.—See "Blackwood's Magazine," Book II. ch. 29. There is no precise rule known to us for the wrongful assumption of a military uniform.

A CONSTANT READER.—There seems to be no objection attached to Prince Albert's family file assuming arms, a knight's pedigree, and a crest.

B. B.—We do not recommend any of the publications you name.

A SCOTCH SUBSCRIBER.—We cannot answer you on the particulars stated at by our Correspondent in Perth, but we believe he is correct.

G. G. S.—Any gentleman of coat armour is entitled to use her family crest.

W. W.—Inquire at the Office of Arms, in "A griffin's head erased arg., holding in the beak a spear or."

A B.—A letter granted, 10th Feb., 1684, to a family named London, then settled at Albyn, county Norfolk.

A CONSTANT READER.—Some of the Stow informs us that there are no direct descendants of Warren Hastings in existence. Mr. Hastings never had a child, and his estates passed, by his wife's sister's family, and are now held principally by Sir C. Imhoff, who resides at Lachsford House, near Stow-on-the-Wold. That mansion has much of interest attached to it. The whole furniture of one room is composed of solid ivory, of the most exquisite workmanship.

A CONSTANT READER.—The coat of arms of an eldest son, during the lifetime of his father and mother, should be simply his paternal ensigns, differenced by a label. If his mother was an heiress or co-heiress, he is entitled to quarter her arms after her decease.

A. M. C.—The pay of an Ensign in the Line is five shillings and that per diem is a sum inadequate to support his position. It is no easy matter to obtain a commission in the army. An applicant's name must be, almost in all cases, for a year or two on the Commanders-in-Chief's list. It is necessary, too, for the candidate to be able to pass the necessary examination at the Military Board. Apply at the Horse Guards.

CUTHBERT.—The arms of the family in question are, "Sa. a cross sarg. within a bordure or. *Crest.* A greyhound's head erased at the neck, arg., collared, colared and ringed or."

J. STICK, Hereford.—4750
J. W. Whitby.—Received
J. H. will require a Plate I cense
H. D.—We have not room for the lines
J. Manchester, is thanked
J. R. S., Burningham.—We cannot inform you
J. in the *Army List* for the present month

BOOKS, &c. RECEIVED DURING THE WEEK.

Songs for Children.—Our Country 3 vols.—The Churchman's Pulpit.—Life of Sir Robert Peel.—Irving's Astoria.
MUSIC.—The Lady Alice.—Ethereal Voices speak to Me.

THIS WEEK'S

CONSISTS OF

FORTY PAGES OF LETTERPRESS

AND

FIFTY ENGRAVINGS,

PRINTED ON THREE SHEETS OF PAPER, FOR ONE SHILLING.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, AUGUST 17, 1850.

THE Commission appointed to inquire into the working of the recent Sabbatarian innovation upon the business of the Post-Office has presented its report to Parliament. After hearing evidence, and going fully into the subject, it has decided in the manner anticipated, and recommended a return to the system so injudiciously interfered with. Whilst rejoicing that common sense, common justice, and Christian charity have again been allowed to regulate this branch of the public service, we cannot avoid expressing a hope that the too easy and *nonchalant* Ministry has learned a lesson from all the circumstances of the case, and that it will not attempt, in any future difficulty that may arise on a point of public duty, to shirk its own responsibility, or play mischievous experiments with the public patience. All the animosities and all the bitter warfare on points of faith and practice that have been excited by the Sabbatarian discussions of the last few weeks, as well as all the inconvenience, hardship, and loss caused by the stoppage of the post on Sundays, have been gratuitously caused by Lord John Russell, in yielding, against his own convictions, to the clamour of a small party. While it is to be hoped that public men of all parties will learn a lesson by the progress and result of the changes attempted by the Judaical enthusiasts who wish to legislate for other people's consciences, and to coerce all dissentients by the strong arm of power, it is also to be hoped that those who entertain strong opinions on the Sabbath question will, for the future, be contented with their own freedom, and not seek to make aggressions upon the freedom of other people. No one will compel them to receive a letter on the Sunday, although the old and convenient arrangement has been restored. Their Sabbath liberty, to do exactly as they please, even to the legitimate extent of allowing no beds to be made, nor boots to be cleaned, nor food to be prepared in their houses, remains to them as before; and neither the Legislature nor the people seek to interfere with their conscientious observance, whatever form it may assume. Let them show towards others the same respect and toleration as are shown to them, and there will be a great deal more of practical Christianity in the land than the recent unhappy discussions would seem to show the existence of. It is not wise in them at this period of the world's history to continue their aggressive warfare against the poor, for against the poor, and the poor only, their Sabbath legislation inevitably applies. All their efforts against the rich would fail, though backed by a thousand Parliaments; and the rich man's carriage would be run on the Sunday in spite of the Legislature, though omnibuses, steam-boats, and railway trains were prohibited, just as the rich man would send special messengers with his Sunday letters, though the poor man were deprived of all chance of receiving or sending them, whatever the necessity, and whatever the mercy. We trust that there is now an end of the question, and deprecate most sincerely any further agitation of it.

We have elsewhere passed in review the proceedings of the Session which was closed on Thursday by her Majesty in person. The Speech from the Throne gives, of course, the most favourable version of the Ministerial proceedings, and depicts the Session *en couleur de rose*. When Ministers are their own critics—as in a Royal Speech they always are—what has been done is always well done; and what has been left undone is prudently left unmentioned. No innovation upon this time-honoured practice need ever be expected, and the Royal Speech at the close of the parliamentary year of 1850 is as neat and satisfactory as such a document can be. In a few days London will be emptied of Royalty, the Ministry, and the Legislature. Her Majesty and her Royal Consort will repair to the beautiful seclusion of the Highlands (where may all health and happiness attend them!); the Ministry will forget their hard work and the annoyances of the Session, and seek the fresh air and the rural scenery of the provinces; and members of Parliament will be found in every part of the civilised world but in London and its neighbourhood—on the moors and mountains of the Highlands—at their country seats—in Killarney or Glengariff—at the salmon-fishings of Norway—in Germany, France, Italy, Egypt, India, the United States—"anywhere, everywhere, out of the place" which, for the last few months, has been their sole and narrow world of thought and action. It is comfortable for them, and for all the dwellers in these islands, that they can enjoy their freedom without fear of being recalled to their posts before the customary time, and that, unlike the unhappy legislators of France, they can depart in peace, without the fear of a *coup d'état* or a revolution in their absence!

THE state of France at the present moment is singular. The last vestiges of public freedom have been destroyed, and Frenchmen can neither speak nor write nor print their thoughts. The liberty of the press is at an end; universal suffrage is a vision of the past; and every public functionary or mayor of a town, who either encouraged others to sign, or who himself signed, a petition against the Electoral Law, has been dismissed from his office. The Legislative Assembly has adjourned, leaving a committee of its members to watch over the safety of the capital. Another committee of the Assembly, backed by the public opinion of the provinces, recommends a plan for the transference of the seat of Government from Paris, in case of emergency, so that the whole system of the country shall not be hereafter at the mercy of any knot of desperate adventurers, who may carry the Government offices by a *coup de main*. Their report recommends, in case, at any future time, the Executive Power should be unable, from the operation of a coercive force of revolution in the capital, to exercise its legal action, that the Councils General of the departments should immediately assemble, and name from their own members two commissions to act for the public safety. The first, a military commission, should, in their opinion, meet at the chief town of the military division; and any general of division should have the right to declare a state of siege in the event of revolutionary disturbances. The second or civil commission should assist the first-named in carrying out measures of public safety, and in neutralising the powers usurped by the populace of the capital. "The object of the law," says the report, in conclusion, "is to remove all hope of success from the minds of the agitators." Throughout all France the public mind is returning by degrees to the course calculated to give assurance to those who wish to see the country resume its march towards progress. Those who were at first led astray begin to be tired of the high-sounding phrases of those who worked on their ignorance. Error will pass away; truth will again shine forth; and for nations, as for men, truth is happiness."

While these opinions are circulating throughout France, and while all the liberties ever acquired by the country through long years of toil and struggle have been one by one removed, two manifestations have been got up to influence public opinion in different ways—the one beyond the limits of France, the other within them. The chiefs and leaders of the Legitimists have gone to Wiesbaden, to pay their court to the Count de Chambord—the hope of their party, and the head of the House of Bourbon, and to debate, as is not concealed, the policy to be pursued to bring about a restoration. Louis Napoleon, who plays as great a game, and for as high a stake, has gone on a tour through the provinces, to try the sentiment of the country, to feel the pulse of the labouring classes, and of the voters who returned him to the Presidential chair by so significant and decisive a majority. Hitherto, his progress has been a triumphant one; and it would seem that the old enthusiasm for the name of Bonaparte is not dead, but as living and warm as ever. The President has, according to all present accounts of his progress, revived it where it slept, and increased it where it existed. All parties agree in attaching the utmost importance to the result; and nothing but a *coup d'état* is spoken of. It is evident, from the temper of the public mind, that the time is ripe for a change of some kind. Whatever the change may be, it does not seem likely that it will be a return to Legitimacy or the restoration of the House of Orleans. For awhile the star of the House of Bonaparte seems to be in the ascendant; and Europe looks forward with intense interest to the culmination which is probable;—or to the sudden fall, which seems equally so.

COURT AND HAUT TON.

THE COURT AT BUCKINGHAM PALACE.

The Queen and Prince Albert, with the Princess Helena, accompanied by Count de Mensdorff-Pouilly and Count Alphonse de Mensdorff-Pouilly, and attended by the Viscountess Jocelyn, Hon. Flora Macdonald, Lieutenant-Colonel the Hon. C. B. Phipps, Major-General Bowles, General Wemyss, and Colonel Bouverie, left Osborne, Isle of Wight, at ten o'clock on Wednesday morning, and embarked at Cowes in the *Fairy* Royal yacht, which conveyed the august party to Gosport. Her Majesty, the Prince, and suite, travelled by a special train on the South-Western Railway to the Nine Elms station, and from thence proceeded in three of the Royal carriages, escorted by a party of Light Dragoons, to Buckingham Palace, where they arrived at twelve minutes before two o'clock.

The Queen held a Court and Privy Council at three o'clock on Wednesday afternoon, at Buckingham Palace.

The Solicitor-General (Mr. Cockburn) was presented to the Queen, at an audience, by Sir G. Grey, her Majesty's Principal Secretary of State for the Home Department, when her Majesty was graciously pleased to confer the honour of knighthood upon him.

Mr. Robert Stanford (from the Cape) was presented to her Majesty, at an audience, by Earl Grey, her Majesty's Principal Secretary of State for the Colonies, and had the honour of receiving knighthood from the Queen.

At the Privy Council, the Queen was attended by his Royal Highness the Prince Albert, the Lord President, the Lord Chancellor, the Lord Privy Seal, the First Lord of the Treasury, the Secretaries of State for the Home, Foreign, and Colonial Departments, the Chancellor of the Exchequer, the First Lord of the Admiralty, the Chancellor of the Duchy of Lancaster, the President of the Board of Control, the Lord Steward, the Master of the Horse, and the Groom of the Stole to the Prince.

The Right Hon. Thomas Lord Chief Justice of the Court of Common Pleas, was, by command of the Queen, sworn of her Majesty's most honourable Privy Council, and took his seat at the Board.

The Queen's Speech, on closing the session of Parliament, this day was arranged and agreed upon.

At the Court, General Jung Bahadoor, on a special mission from his Highness the Rajah of Nepaul, had an audience of the Queen, to take leave of her Majesty. The Envoy was accompanied by his brothers, Colonel Juggut Shumshere Jung and Colonel Dhere Shumshere Jung.

The Earl of Westmorland was presented to the Queen, at an audience, by Viscount Canning, G.C.B., her Majesty's Principal Secretary of State for Foreign Affairs.

The Bishop of Montreal was presented to her Majesty, at an audience, by Earl Grey, the Queen's Principal Secretary of State for the Colonies.

The Duke of Wellington had an audience of the Queen on Thursday.

Lord John Russell and the Marquis of Lansdowne had also audiences of her Majesty on Thursday.

The Queen and Prince Albert, accompanied by Count de Mensdorff-Pouilly and Count Alphonse de Mensdorff-Pouilly, honoured the Haymarket Theatre with their presence on Thursday evening.

Their Majesties and the Prince Consort, accompanied by Count Adolphe Mensdorff, honoured the Royal Italian Opera with their presence on Thursday evening.

Yesterday (Friday) morning, the Court left Buckingham Palace for Osborne.

NATIONAL SPORTS.

The Racing community have plenty of work cut out for them next week, the "Calendar" enumerating no less than seven meetings of various degrees of importance; York, with its broad sheet and rich engagements, standing A 1. The order of running will be as follows:—Tuesday, Great Yarmouth and Ilsley; Wednesday, York, Plymouth, Barnet, and Tunbridge Wells; and Thursday, Stirling. The grand feature of the York Meeting will be the race in which Pirate is engaged on Friday: the result will materially affect his position in the St. Leger betting.

In the course of the week, the following Cricket matches will be played:—*Monday:* At Brighton, the M. C. C. and Ground against County of Sussex; at Wisbech Common, Cambridgeshire against the Gentlemen of Warwickshire; and an All England match at Bridport; at the Oval, Surrey against Mr. Lillywhite's Sussex Eleven. *Tuesday:* At Downs, St. James's, Westminster, *v.* North Hants; at Shrewsbury, Liverpool *v.* Shrewsbury. York, Plymouth, Barnet, and Tunbridge Wells; and Thursday, Stirling. The grand feature of the York Meeting will be the race in which Pirate is engaged on Friday: the result will materially affect his position in the St. League betting.

The grand feature of the York Meeting will be the race in which Pirate is engaged on Friday: the result will materially affect his position in the St. League betting. *Tuesday:* At Sevenoaks, M. C. C. and Ground against Sevenoaks and Knowle; at Southampton, Eleven of England *v.* 16 of Hampshire.

The Aquatic engagements are seven in number; viz. Rotherwitha, Lynne Regis, and Norwich Regattas, on Monday; Teignmouth and Hammersmith and Chiswick Amateur, on Tuesday; Weymouth, and Torbay, on Friday.

TATTERSALL'S.

THURSDAY.—A very small amount was laid out at the following prices:—

LEGER.

5 to 2 agst Canezou	6 to 1 agst Collis grood	8 to 1 agst Mark Tapley
6 to 1 — Cantab (t)		8 to 1 — any other

GREAT YORKSHIRE STAKES

6 to 4 on Pitsford	3 to 1 agst Captain Grant

ST. LEGER.

6 to 5 agst Voltigeur	6 to 1 agst Windlestraws
	10 to 1 agst Cilnebar

DERBY.

8 to 1 agst Grecian (t)

WOLVERHAMPTON RACES.—MONDAY.

The PRODUCE STAKES of 10 sovs each, and 20 added. Mr. F. Marshall ns Alonzo, 1. Mr. Cope and's Lass of Undersley, 2.

The WOLVERHAMPTON STAKES of 5 sovs each, with 100 added.—Mr. Melkham's Roland, 1. Mr. Nicoll's John of Berwick, 2.

TUESDAY

The CLEVELAND CUP of 100 sovs, with 50 added. Mr. Clark's Madesafe, 1. Mr. J. B Minor's Modestina, 2.

The PATSKULL HANDICAP of 15 sovs each, and 30 added.—Mr. Melkham's Inheritress, 1. Mr. Copeland's Candlewick, 2.

The BILSTON PLATE of £50, added to a free handica p of 5 sovs each. -Mr. Herbert's Spot, 1. Mr. Farr's Clothworker, 2.

The BOROUGH MEMBERS' PLATE of 60 sovs.—Mr. Baylis's Colocynthis (Chesnas), 1; Mr. Fowler's Coachia, 2.

WEDNESDAY.

The WROTTESLEY STAKES of 10 sovs each, and 30 added.—Captain Liddle's Truth, 1: Mr. Jamieson's Area, 2.

The TOSE STAKES of 10 sovs. each, and 20 added.—Mr. Marshall's Alonzo walked over

The CONSOLATION STAKES.—Mr. Farr's Clothworker, 1. Mr. Jones's Flirt, 2

EGLINTON PARK RACES—TUESDAY.

The TRIAL STAKES of 10 sovs each. Lord Eglinton's Elthiron (Captain Pettat), 1; Mr. W. S. Crawford's Iron Rail, 2.

The STAND PLATE by subs. of 20 sovs each.—Lord Eglinton's Elthiron, walked over.

The HUNTERS' STAKES of 5 sovs each.—Lord Waterford's Duc-an-Durras (Colonel Campbell), 1; Mr. Rochford's Smuggler Bill, 2.

The IRVINE CUP of 150 sovs.—Lord Eglinton's Testator (Captain Pettat), 1; Mr. Merry's Brennus, 2.

THAMES BOAT-RACES.

The series of races under this title, as a substitute for the Thames Grand Regatta, were closed on Tuesday. The prizes for competition were a pair of silver cups for Tandem, and a purse of sovereigns for watermen. Of the former there were four pairs entered, while of the latter eight scullers had been selected by the committee, who had established for themselves great repute as crack scullers.

TRADESMAN'S MATCH.—John Wilcox and Frederick Cox, Putney (White), 1.

GREAT SCULLERS' RACE.—Third and final heat.—Thomas Mackinney (Pink), 1. R. Doubledee (Black and White), 0.

Both races were rowed from Putney bridge to Hammersmith.

THE WESTMINSTER SCHOOL SILVER CHALLENGE SCULLS.

The very interesting aquatic contest for the possession of the Westminster scholars' silver challenge sculls, took place on Monday evening, from Putney to Vauxhall-bridge: Mr. Wright, the holder of the skulls, defeating Mr. Barnes, who, however, suffered under the disadvantage of rowing in a boat to which he was unaccustomed, owing to some accident having befallen his own. Mr. Wright rowed the distance in 31 minutes, which, considering the state of the weather, was capital work.

BLACKWALL REGATTA.

Notwithstanding the very unfavourable state of the weather on Monday, there was a vast assemblage of spectators to witness the announced contest at this place. After a very severe hailstorm of considerable duration, the weather cleared up, and the close of the evening was very fine. The regatta, which included All Saints, Poplar, as well as Blackwall, was in commemoration of the first meeting at Blackwall for the establishment of that invaluable institution, the Waterman's and Lighterman's Asylum; and the awards of victory were a new boat for the first man, and about £15 to be divided in fair proportions amongst the others, commencing with £5 for the second man. The race was with six scullers, in five heats; and the parties contending were H. Cory (Green), George Atkins (Yellow), R. Dent (Light Blue), J. Waland (Red), Charles Pressman (Pink), R. Nowland (Dark Blue).

HUNGERFORD-MARKET REGATTA.—The twenty-eighth annual regatta, for a purse of sovereigns subscribed by the residents of St. Martin's-street-fields, took place on Wednesday, and collected a large crowd of spectators, who appeared to enjoy the sport. The race was in two heats, with four scullers. First Heat: Alexander Tough (light blue), 1; George Bancroft (red), 2; Thomas Wortley (pink), 3; Edward M'Evoy (green), 0. The distance was from Hungerford-bridge up round a pier-head at Westminster Bridge, down to Waterloo-bridge, and finish at Hungerford. Tough went away with a lead, and kept it: the others made a good race for a long distance. Final Heat: George Bancroft (red), 1; Alexander Tough (light blue), 2; Thomas Wortley (pink), 0. For a short distance it was a smart race, then the winner went away and won easily.

POSTSCRIPT.

PROMOTIONS IN THE ARMY.—The following appointments have been approved of: Prince Albert to be Colonel-in-Chief of the 60th Rifles. Gen. Lord Strafford, from 29th Regt. to Coldstream Guards. Lieut.-General Lord Downes, from 4th to 29th. Major-General Lord Compton to 54th. Major-General Thompson to 74th.

BOARD OF TRADE.—The officers to be attached to the Board of Trade, as assistants for carrying out the provisions of the Mercantile Marine Bill, are Capt. F. W. Beechey, R.N., F.R.S., and Capt. Walker. Capt. Beechey distinguished himself in the expeditions to the North Pole in 1818 and 1819, of which he published an interesting account; and he has since raised his name high as a navigator and an author by his survey of the coast of Africa and his voyages in the Pacific and Arctic Oceans. Captain Walker was formerly an officer in the East India Company's Marine, and, since the expiration of their charter, has for many years been in the command of some of the largest of the ships belonging to Messrs Green of Blackwall.

Mr. Northcote has resigned his appointment of Legal Assistant to the Board of Trade. The place will not be filled up.

TRANSMISSION OF THE QUEEN'S SPEECH BY TELEGRAPH.—On Thursday, the Queen's Speech, delivered shortly after two o'clock, was distributed by electric telegraph from the Central Station, Lothbury, at Liverpool, Manchester, Leeds, Hull, Birmingham, Derby, York, Newcastle, Edinburgh, and Glasgow, by shortly after three o'clock. The Speech, consisting of 502 words, was streamed off by the best manipulators, who now throw off at the rate of 45 and 50 words a minute. As the Speech contained the Queen's "cordial assent to the Act for the Extension of the Elective Franchise in Ireland," it was taken on from Crewe, beyond which point the telegraph does not at present extend, by special train to Holyhead, and thence by the express boat, leaving at six o'clock, which delivered it in Dublin at about ten o'clock the same evening. On Friday the Electric Telegraph Company adopted a new system, which in mercantile, domestic, and other ways, is expected to prove of public utility. It consists in the transmission of messages between their principal metropolitan stations, north, south, east, and west, at a charge of 1s. for communications not exceeding twenty words.

LONDON AND NORTH-WESTERN RAILWAY.—Yesterday the half-yearly meeting of this company was held at the Euston Station, George Carr Glyn, Esq., M.P., in the chair, when, after a very long discussion, a dividend at the rate of 5 per cent. per annum was declared as recommended by the Directors, an amendment that the dividend should be 5½ per cent. being negatived by a majority of 90 to 68, and one that it should be at the rate of 6 per cent. being rejected by a majority of 113 against 36. Several formal resolutions having been passed the meeting separated.

The Government contract for 100,000 gallons of rum for the navy was taken on Thursday by Messrs. Lemon, Hart, and Son, of 59, Fenchurch-street.

SEIZURE OF ILLICIT SPIRITS.—An important seizure was made on Thursday by Mr. Brain, Import Inspector of Inland Revenue, and Mr. Dobson, Surveying Examiner-General of that department, of 32 puncheons of Scotch whisky, amounting in the gross to nearly 4000 gallons. The spirits were brought over a few days since to the St. Katharine's wharf by one of the trading steamers plying between London and Leith, consigned from a large house in Edinburgh; but had not been shipped in accordance with the laws laid down for the export of whisky, but in opposition to the regulations of the Board of Inland Revenue.

LATEST FOREIGN NEWS.

FRANCE.

The President of the Republic arrived at Chalons on Thursday morning, where, as well as along the road, he was very well received. After a review and a reception, the President left Chalons by steamer for Macon. The papers describe attempts that were made at Mouhar, and at the entrance of Dijon, to get up Republican demonstrations, which they colour more or less vividly according to their own sentiments. A telegraphic message reached the Minister of the Interior on Thursday morning, intimating the President's arrival at Macon, where he also met with a cordial reception. He was to leave Macon the same day for Lyons.

The persons arrested on Tuesday night are described as members of a standing committee of action, who had been deputed by the Socialist conclave which directed the last elections for Paris to remain *en permanence*.

Count Molé, who was prevented from attending the sitting of the permanent commission on Monday, by a sudden attack of indisposition, is now in such a state of convalescence as to be able very shortly to resume his political labours.

METROPOLITAN NEWS.

PUBLIC MEETINGS.

ROYAL BOTANIC SOCIETY.—On Saturday last, the yearly meeting of the members of this society was held in the gardens in the Regent's-park, when the chair was taken by Masterton Ure, Esq., in the absence of the Duke of Norfolk, E.M., the President. The different reports of the council, the auditors, and the curator, afforded material evidences of the advance made during the season, and of the increasing prosperity of the institution. The following passed a resolution recommending to the council the immediate erection of a building for museum, lecture room, &c., and a considerable amount of subscriptions was reported during the meeting to have been received for this express object. The following eight fellows were elected members of the council for the ensuing year, in the place of those going out by rotation:—The Duke of Buccleuch, Sir E. Kerrison, J. Oliver, Esq., J. Heywood, Esq., M.P.; the Bishop of Durham, Lord Sondes, and Viscount Hardinge; and the Duke of Norfolk and Edward Marjoribanks, Esq., were re-elected president and treasurer. The financial statement of the year contained detailed accounts of the increased receipts from the subscriptions of members and the exhibitions of plants and flowers. The total income of the society, from all sources, during the year ending the 15th ultimo, had amounted to the large sum of £14,180 16s.; and the expenditure to £10,480 6s 10d.; leaving a balance of £3700 9s. 2d. cash in hand.

THE METROPOLITAN INTERMENTS ACT.—This act, under which Dr. Southwood Smith has been appointed an additional paid member of the Board of Health, will be speedily enforced in "the Metropolitan Burial District," which comprises the city of London, Westminster, Southwark, and numerous parishes set forth in one of the schedules annexed. There are 77 sections in the act, which act is to be executed by the Board of Health. The board may provide new burial-grounds, and her Majesty, on a report of the board in council, may order the discontinuance of interments in churchyards and other places. Regarding the reception of poor persons in metropolitan-houses to be provided, it is enacted, by the 30th section, that the board may at any time, after the passing of the act, appoint medical or other officers who, in the case of deaths within the district, may "where the persons having the direction of the funeral of the deceased may so desire," cause the body to be decently removed to one of the houses for the reception of the dead. Among the provisions is one under which the Board of Health may "contract" for funerals at fixed charges, so that there are likely to be "three classes" of funerals, according to the means of the parties. The salary of the additional paid member of the Board of Health is not to exceed £1000 a year.

ST. STEPHEN'S SOUTHWARK RAGGED INDUSTRIAL SCHOOL—FANCY BAZAAR.—On Tuesday and Wednesday, a grand sale of ladies' fancy work, or bazaar, took place in the National School rooms attached to the recently-consecrated church situate in that densely-crowded locality, St. Stephen's-green, which act is to be executed by the Board of Health. The bazaar was opened on Tuesday, the 13th August, by the Lord Bishop of Winchester as President, and, as patrons, the Marquis of Blandford, Lord Ashley, and W. Prichard, Esq. These schools have produced great results on the moral and religious conduct of the people; and the operations being now extended, the usefulness will thereby be considerably increased. A very convenient room has been fitted up for the accommodation and comfort of the children, but the premises, too few for the requisite purpose in a parish where the population is upwards of 5000, mostly poor and unable to provide means for instructing their poorer brethren. On this occasion several of the ladies, supported by the institution, had contributed various articles of elegant fancy work, and many of a useful character, which were tastefully displayed on the prettily-decorated stalls, which were arranged round the rooms, and were surmounted by festoons of coloured drapery, with floral ornaments. At these miniature shops attended the first patroness of the institution, who, throughout the day, plied their assumed avocation with untiring energy and zeal, and were rewarded with considerable success by the numerous assemblage who attended.

GREAT CENTRAL GAS CONSUMERS' COMPANY.—On Wednesday, an extraordinary meeting of this company took place at the London Tavern, Bishopsgate-street, for the purpose of taking into consideration the propriety of authorising the board of directors, under the 40th section of the company's deed of incorporation, to borrow a sum of money not exceeding £250,000 upon mortgage of the company's works, mains, and pipes, at a rate of interest not exceeding five per cent. Mr. Francis Bennoch occupied the chair. In opening the proceedings, the chairman stated that the opposition which the company had to encounter was of a most formidable character; but he was happy to state that they had hitherto surmounted every obstacle, and they now considered the company in perfectly smooth water. He might further state, that they should be in a position by the time mentioned in the contract to supply the public with gas at the rate specified in the deed. Mr. Charles Pearson then read the report of the directors. This report, upon the motion of Mr. Henry Mussett, seconded by Mr. Charles Barthew, was received and adopted, Mr. Hall moved a resolution to the effect that the sum of £250,000 in one or more sums, be raised by way of loan (if the directors should deem it necessary) for the purposes of the company, upon the security of the premises on which the business is intended to be carried on, or of any other real estate which it belongs to the company, and the gas-pipes, machinery, and works thereof; and that, upon the effectual of such security, the particular property to be comprised therein, and the terms and provisions of the deed by which the money shall be raised on, shall be settled and determined by the board of directors. Mr. Larby, a shareholder, seconded the motion, and stated that he thought it was incumbent upon them to do all they could to support the directors. The resolution having been carried unanimously, the proceedings terminated with a vote of thanks to the directors, and to Mr. Charles Pearson, the late chairman.

NEWSVENDERS' PROVIDENT INSTITUTION.—On Tuesday the eighth annual excursion, on behalf of the funds of this society, took place. The boat engaged by the committee for the occasion was the *Sylvia Field*, Captain Sayles, and at the appointed time a numerous assemblage of persons went on board, on their way to Rose Cottage, Richmond, where dinner, tea, &c., were provided at a moderate charge; and for those who provided themselves with refreshments, accommodation was afforded gratis. An efficient band was engaged for the occasion, and dancing was kept up with great spirit throughout the day. The company separated highly delighted with their excursion, and the arrangements of the committee appeared to give satisfaction to all present. On Wednesday, the annual dinner provided by the proprietors of the London newspaper press, for the newsmen and agents of those persons employed in the sale and distribution of London newspapers, took place at Mr. Hutton's, Highbury Barn Tavern. The boys' dinner took place at two o'clock, and that of the adults and their wives at seven o'clock. The festivities concluded, as usual, by old English games in the extensive grounds, succeeded by a ball and supper.

MEMOIRS OF SIR ROBERT PEEL.—The late Sir Robert Peel has, we understand, left full and specific directions in his will for the early publication of his political memoirs, and has ordered that the profits arising from the publication shall be given to some public institution for the education of the working classes. As already stated, he has confided the task of preparing these memoirs to Lord Mahon and Mr. Cardwell. Their duty will, however, be comparatively light, though delicate, from the admirable and orderly state in which Sir Robert has left all his papers.

FUNERAL OF THE VICE-CHANCELLOR OF ENGLAND.—On Thursday morning the mortal remains of the late Vice-Chancellor of England, Sir Lancelot Shadwell, were removed from his late residence, at Barnes Elms Park, Putney, to his final resting-place, Barnes Church, where he was interred in the family vault by the side of his favourite son, whose melancholy death a few months since will be remembered. The funeral was as private as possible, according to the wish of the deceased, the principal mourners being Mr. Shadwell, Mr. Willis, of Barnes, Dr. Scott, and Dr. Paris, his medical attendants, followed, and the carriages of several of the nobility and gentry. The funeral service was performed by the rector of Barnes. The numerous poor in the village, where the lamented deceased had resided for 18 years, will deeply feel his loss, as his benevolence was great.

RETIREMENT OF DR. WISEMAN (CARDINAL DESIGNATE).—On Sunday morning last, a crowded congregation, including a large number of the Roman Catholic nobility and gentry, assembled at the cathedral of St. George, Westminster Bridge-road, to hear a farewell address from the Right Rev. Nicholas Wiseman, D.D., Vicar Apostolic of the London District, and Bishop of *Melypotamus in Partibus*, previous to his departure for Rome, whither he has been summoned by the Pope, in order that he may receive from his Holiness the dignity of the Cardinalate. Amongst those present were the Earl of Shrewsbury, the Earl of Kenmure, Lords Camoys, Beaumont, Clifford, Petre, and Stafford, Stourton, Arundel and Surrey, M.P., and Dormer; the Right Hon. R. L. Shell, M.P., Mr. C. Anstey, M.P., Mr. M. J. O'Connell, M.P., and other persons of distinction, accompanied, in most cases, by members of their families. High Mass was celebrated, and after the gospel Dr. Wiseman delivered a discourse, in which he adverted to the progress which Roman Catholicism was making throughout the world, and spoke in high terms of the zealous labours of the clergy in the district with the ecclesiastical supervision of which he had been entrusted. In the evening Dr. Wiseman again preached to a large congregation, amongst whom were several clergymen of the Church of England, who were prevented by professional duties from being present in the morning. Indeed, at both services great interest was excited, the elevation of an Englishman to the high dignity of the Holy Office being a circumstance of such extremely rare occurrence. Dr. Wiseman proceeds immediately to the "eternal city," where it is probable he will remain permanently. The Rev. Dr. Doyle, the senior priest of St. George's Cathedral, and the Rev. Dr. J. H. Newman, priest of the oratory of St. Philip Neri, Kent, Edgbaston, formerly vicar of Great St. Mary's, Oxford, are spoken of as the probable successors of Dr. Wiseman in the London See.

ON Monday a private meeting of the Roman Catholic laity of the London district, convened by the Earl of Arundel and Surrey, was held at the Thatched House Tavern, when an address of congratulation to the Right Rev. Dr. Wiseman on his intended elevation to the rank of Cardinal, was agreed to, and was numerously signed. A resolution was also passed for raising, by subscription, the expenditure which will be occasioned to the Bishop by his elevation, and a considerable amount was subscribed at the meeting. In the evening, Dr. Wiseman held a levee, at his residence in Golden-square. Bishop Wareing, Morris, and Naker, the Earl of Fingall, the Right Hon. Richard Lalor Shiel, M.P.; R. M. Bellew, Esq., M.P.; Clarkson Stanfield, Esq., R.A.; C. P. Cooper, Esq., Q.C., and a very numerous body of the Roman Catholic clergy and laity, attended. The Earl of Arundel and Surrey was absent on account of illness; and, in the course of the evening, Thomas Barnewell, Esq. (the chairman), accompanied by a numerous deputation, presented to Dr. Wiseman, to which the Right Rev. Prelate, who was deeply affected, made a very eloquent reply. The Bishop will arrive in Rome in time to attend the Consistory which is expected to be held about the 10th of September.

ALMSHOUSES FOR ST. PANCRAS PARISH.—Following the example set a few years back by the ratepayers of St. Marylebone in the erection of almshouses for decayed house-holders of good character, a movement has been set on foot for the establishment of a similar institution for the use of St. Pancras. A committee has been formed, at the head of which is the vicar, the Rev. Thos. Dale, and the churchwardens, Donald Fraser, and Thomas Eld Baker, Esqrs. Miss Burdett Coutts has manifested elevation to rank of Cardinal, was agreed to, her usual liberality in the matter, by offering to give the land formerly the property of Samuel Carnden, K.G., Lord Dudley Coutts Stuart, M.P., Sir Benjamin Hall, Bart., M.P., the vice-presidents. Several hundred pounds have already been subscribed, among which appears the name of Mr. Thomas Sergeant, Esq., an old and highly-respected member of the vestry, upwards of eighty years of age, who has promised that so soon as £3000 shall be collected he will give an additional £1000.

FATAL ACCIDENT ON THE RIVER.—On Tuesday evening, between six and seven o'clock, the *Gabel*, a sailing boat of six tons, belonging to Robert Owen, Esq., of Maida House, New Cross, Greenwich, was beating up the reach from Woolwich, having a party of six gentlemen on board, when, as they passed from the north to the south shores, a sudden gust laid the vessel on her beam ends, and the water poured into the main hatch, almost instantly turning the boat keel upwards, and immersing the entire party. The accident was witnessed on board the *Catherine Jane* sailing barge, of Rotherhithe, and the captain bore down and succeeded in rescuing those who were clinging to the bowsprit and rigging on the keel. Unhappily, two of the party, fine young men, aged respectively 19 and 17, sons of Mr. Rodger Greenway, of Kennington-road, were found to be drowned. The bodies were not recovered.

BIRTHS AND DEATHS.—Births registered in the week ending August 17 (Males, 1,019; females, 984—total, 2003). Deaths during the same period: Males, 497; females, 500—total, 997. The deaths registered in the four weeks preceding were 781, 853, 898, 917. The increase in the time exceeds 200 a week. The deaths are 100 below the average of the corresponding weeks of 1840-9; after correcting for population, and excluding the corresponding fatal week of 1849, when the deaths were 1909, and 823 persons died of cholera. The corrected average is 1019, while the actual deaths were 997. Small-pox was fatal last week to 19 persons, measles to 13, scarlet fever to 21, whooping-cough to 25, typhus to 35, and erysipelas to 4. Nine deaths from childbirth were registered. The deaths from diarrhœa were 152; namely, 124 children under the age of 5, 9 adults between the ages of 15 and 60, and 19 persons of ages over 60. Of cholera, 12 children and three adults died. The number exceeds the deaths from cholera in the corresponding weeks of 1840-5, but is less than those in the corresponding weeks of 1846-8, when 1,000, 1,200, and 823 deaths were ascribed to that malady. There is nothing to indicate the presence of an epidemic either in the number of deaths from cholera or in the character of cases recorded below in several fatal instances of diarrhœa. Diarrhœa is an untoward symptom, which deserves the attention of those who have the power to adopt precautionary measures. Of the 15 fatal cases of cholera recorded, 11 occurred amongst young children 5 years of age, and 4 at more advanced ages. The particulars of such cases are as follow:—On the 8th August, at 21, Catherine-street, Limehouse, the son of a beer-shop keeper, "infantine cholera." In Kennington-lane at 5, Russell-terrace, the 4th August, a gentleman, aged 59 years, of temperate habits, "English cholera (36 hours)." On the 5th August, at 3, Elder-street, Nortonfolgate, the daughter of a weaver, aged 6 months, "cholera Anglica (1 week)." At 17, Grundy-street, Poplar, the 5th August, widow of a lodging-house keeper, aged 61 years, "English cholera (6 days)." At 107, Long-lane, St. Mary Magdalen, Bermondsey, the 7th August, a daughter of a journeyman hearth-rug maker, aged 4 years, died of "cholera (10 hours);" the mother states that the child was in perfect health up to the time of the attack. In St. Mary, Newington, the 7th August, at 53, Paragon-row, the daughter of a labourer, aged 7 years, "English cholera (20 hours)." In the same neighbourhood, at 4, York-buildings, the 8th August, the daughter of a labourer, 9 months, "English cholera (18 hours)." At Clark's-buildings, Greenwich, the 3d August, the daughter of a labourer, aged 6 months, "English cholera (6 days)." At 6, Bloomfield-terrace, Islington, the 3d August, the son of a commercial traveller, aged 5 months, "infantile cholera (3 days), convulsions 6 hours." On the 8th August, at 3, Hutchesen's Avenue, Aldgate, the son of a labourer, aged 3 months, "simple diarrhœa (7 days), choleraic diarrhœa." At 1, Street, Fleshy-market, Shoreditch, the son of a labourer, aged 4 years, "cholera malignus (12 hours)." Mr. Earles, the registrar, states that "the child was previously ill for seven weeks from intermittent fever; the neighbourhood is well drained and healthy." On the 9th August, at 97, Old-street-road, Finsbury, a ditch, the son of a greengrocer, aged 4 months, "sporadic cholera (4 days), contracted in this house is imperfectly drained. On the 9th August, at [illegible] daughter of a tailor, aged 2 years, [illegible] street, St. George in the East, 5th August, aged 11 months. "English cholera with [illegible]." On the 3rd July, at High-street, Bromley, grocer, aged 54 years, "broken constitution, English cholera (4 days)."

METEOROLOGICAL OBSERVATIONS.—The barometer at the Royal Observatory, Greenwich, was low during the week; the corrected reading was 29·694 inches. The mean temperature of the air in the shade was 64·2 degrees; or 2·7 degrees above the average temperature of the week. The temperature of the Thames ranged from 63 degrees to 68 degrees. The air was dry, showed a little electricity, and passed over the Observatory at the average rate of 120 miles a day.

MURDER IN GRAVESEND.

The excitement caused in Gravesend by the terrible fire of Sunday last had scarcely subsided, when the whole district has again been excited by the perpetration of a horrible murder.

The following evidence was taken on Wednesday evening at the Town-hall, where the wretched murderess was brought up for examination. Her name is Amelia Georgiana Snorswell, aged twenty years, and she resided with her mother, in Parrock-street, Gravesend

The facts will be gathered from the following evidence:—

Sarah Cooper, who stated that she was the wife of George Cooper, and resided in Eden-court, Gravesend, said, the prisoner at the bar was her sis er. On Tuesday night she was on a visit at her house. At that time she had a child, aged thirteen months, named Alice, alive. About ten minutes before seven o'clock the child was put to bed, and shortly afterwards the prisoner went into the bedroom, but came out again. She then laid the cloth for supper, and went out again for three or four minutes, and when she came back witness saw her with a knife covered with blood in her hand. She held the knife forward, and cried out, "See, I have killed her now." Witness at once became afraid that she had killed one of the two children that were sleeping in the bed-room. She, therefore, took a candle into the room, and found the infant on the bed, with its throat cut, and quite dead. She immediately called up Mrs. Mills, her landlady, who, on seeing what her sister had done, ran to fetch her mother, and also Mr. Ridge, a surgeon. Her mother arrived in a few minutes' time, and she held the prisoner's hands, lest she should do any further mischief. She cried out, "I have killed my child, and made it happy." After that she said, "Give me my child." During the last few days the prisoner has complained of pains in her head, and has appeared very low-spirited. About five or six weeks since, the prisoner, without the least provocation whatever, struck her mother a blow on the head with a poker; notwithstanding, she had no apprehension that the prisoner intended to do any harm to the children. She was very fond of the deceased, and used to nurse it and play with it. The prisoner was very religiously inclined, and used to go regularly to a place of worship. Mrs. Mills had once told her that she did not think the prisoner was in her right senses

When the prisoner was asked whether she had any questions to put to the last witness, and merely shook her head.

Mr. Ridge, surgeon, said that on Tuesday night he was called to see the deceased, and found life extinct. There was a wound in the throat, which was the cause of death. He believed that the prisoner, at the time she killed the child, was labouring under temporary mental aberration

The prisoner was duly cautioned by the bench, and then asked if she had any thing to say, when she replied, "Not unless you wish it;" but she afterwards said, "I acknowledge that I have killed Alice."

The prisoner was then fully committed to take her trial at the next assizes for wilful murder.

CONFLAGRATION AT GRAVESEND.

A most extensive and destructive fire occurred in Gravesend on Sunday morning last, at about two o'clock. The fire was first observed in the house of Mr. J. Adlington, a grocer and tea-dealer, No. 68, in the High-street, nearly facing the Town Hall, and it was at that time very inconsiderable; but in the absence of a supply of water it made rapid progress, and before the residents became aware of its existence the back of their dwellings in Church-alley, High-street, and Prince-street were cracking with the intense heat.

The High-street is, considering it is the principal place of business in the town, an exceedingly narrow thoroughfare, not sufficiently wide in any part for two vehicles to pass without inconvenience. At the back of this street was Princes-street, whilst West-street bounded the northern end, and Church-alley ran at the southern extremity of the White Harn Inn. The whole clump of buildings standing within these boundaries was about 50 or 60, and covered probably a couple of acres of ground. Many of these, notwithstanding that they were three or four stories high, and contained goods of some thousand pounds value, were constructed principally of timber, so that the officers of police became aware that, unless strenuous exertions were made, some of the inhabitants must lose their lives. They therefore aroused the whole of the occupants of those premises. In a very short space of time the town engines, together with those of the Custom House, and of Mr Plane's (the Mayor) brewery, were on the spot; and a supply of water from the river Thames was obtained, which having been promptly got, every effort was made to subdue the fire, which by this time had extended itself to the house adjoining Mr. Adlington's. The wind blew rather fresh from the south-west, sweeping the flames from the houses down the High-street towards the Town-pier. The engines, though well worked and abundantly supplied with water, afforded no influence over the fire, which had at about three o'clock extended to seven houses on that (the western) side of the street. The engine from Tilbury Fort, accompanied by a body of troops, having now arrived, more vigorous, but equally unavailing efforts were made to stay the further progress of the fire, which had, at soon after three o'clock, crossed the street, setting first upon the extensive premises of Mr. Jarvis, the butcher. From that point it continued to burn almost all down the eastern side of the street, including the County Bank, the Savings Bank, the Kent Tavern, Brinchley's Distillery, &c. The High-street, on the Town Pier, was at four o'clock completely enveloped in flames, which, when they involved the premises of Mr. Troughton, tallow-chandler, and an oilshop and chemist's shop contiguous to it, presented a most magnificent sight. At this time, all hope of preserving a single house between the Town-hall and the pier was abandoned by all parties, notwithstanding that the Dartford and Rochester engines were arriving, and a prodigious volume of water was discharged on the whole line of burning houses on both sides of the street. There was, fortunately, sufficient time to save the cash-boxes and the securities and other documents of the County and Savings Banks, which were taken to the Custom-house, a body of officers of which were actively engaged, with the military, police, and townspeople, in working the engines. Comparatively little property was saved from the fire, which, between five and six o'clock, had completely destroyed twenty-four houses (as the annexed list will show) on both sides of High-street, independently of several houses in Princes-street and the courts leading out of High-street, between the Town-hall and the Pier. A telegraphic communication went from the residence of the mayor (Mr. Plane) to Mr. Plane), having been made to the London-bridge station, a body of the Fire Brigade and two engines were as soon as possible despatched from London, and arrived at Gravesend at about twenty minutes to seven o'clock. The work of destruction was then done, the fire having been providentially stayed in its progress down the High-street, and extending backwards to Princes-street, by a change of wind to the north and westward at six o'clock. The assistance of the Brigade, with their powerful engines and practised skill, was, however, effectual in suppressing the fire still bursting forth from the mighty mass of ruins—all that remained of the property destroyed.

There is no doubt that the unwearied exertions of the inhabitants of the town are lond in their complaints against the corporation fit not having an efficient corps of firemen and engines established, after the warning they received by the two previous fires, which, in all, would be recollected consumed the greater part of the lower portion of Gravesend.

The largest sufferer among the premises burnt down was used as the London and Country Bank. It occupied much ground on the east side of High-street, [illegible] Town-hall, and with its contents was insured for £10,000. The [illegible] aided in saving the whole of the books, cash, and papers belonging to the bank.

It was supposed that a man named Vallance had lost his life during the raging of the fire by the floors of one of the houses in High-street falling on him. We are happy to say it is not so; the police have ascertained that he escaped.

It is the general opinion of the inhabitants in the town, that had the corporation telegraphed for the London engines when the fire was crossing High-street, instead of waiting three hours, a very large portion of the property would have been preserved.

The loss, as estimated by the surveyors of the various London insurance companies, is £80,000. The offices that will principally suffer are the following, and the amounts are reported thus:—Kent Fire-office, £10,000; Globe, £8000; Imperial Exchange, £5000; Alliance, £3000; Norwich Union, £7000; Atlas, £[illegible]; Mutual, £2000; West of England, £2000; Star, £3000; Commercial, [illegible] Royal, £[illegible].

Subjoined is a list of the houses burnt down:—

[illegible] Mr Brandwood's official report of the damage done:—

[illegible] 0.—Called by an electric telegraph message to a fire in [illegible] Gravesend, which did the following damage. No. 65, High-street, J. Adlington, grocer, burned down. No. 66, M. Reed, tobacconist, burned down. No. 67, I. C. Barber, currier, totally destroyed. No. 68, burned down. No. 69, E. and M. Gregory, drapers, totally consumed. No. 70, unoccupied, burned down. No. 71 and 72, J. C. Barwell, dwelling-house, burned down. No. 73, C. Day, surgeon, premises partially destroyed. No. 74, W. Saunders, [illegible]n, seriously damaged. No. 84, Messrs. Troughton and Co., tallow-chandlers, premises destroyed. No. 85, Mr. Henry Creed, v. chandler (Parr's Head), burned down. No. 82, J. H. Hatton, draper, &c., totally consumed. No. 61, W. Newman, stationer, burned down. No. 60, R. Jerray, eating-house keeper, [illegible]. No. 57, R. Culley, refreshment rooms, damaged.

[illegible]ist, burned down. No. 3, [illegible] tenants, [illegible] destroyed. No. 16, C. Lipscombe, perfumer, burned down. [illegible] Young, butcher, burned down. No. 17, the London [illegible] Bank, totally consumed. High-street Distillery, J. Brinchley, dwelling-house, burned down, roof of distillery broken, and considerable damage by water and removal. No. 16, J. R. May, bootmaker, burned down. No. 15, Thomas Butcher, confectioner, burned down. No. 14, Mr. H. Newman, stationer, burned down. No. 13, unoccupied, destroyed. No. 12, W. Croft, grocer, seriously damaged. No. 1, Church-alley, let out in tenements burned down. Nos. 2, 3, 4, and 5, similar damage. No. 1, Prince's-street, C. Vernon, pipe-maker, great damage by removal, &c. No. 2, ditto, H. Stocks, bricklayer, similar damage. Nos. 4 and 44, ditto, Mr. Bell, roof destroyed; rest of building sad cont

[illegible] damage to premises by fire and wat

On Wednesday, an inquest of some hours' duration was held at the Town Hall, for the purpose of ascertaining how the fire originated. The following

RUINS OF THE GREAT FIRE AT GRAVESEND.—HIGH-STREET,—LOOKING NORTH.

magistrates conducted the investigation; namely, Mr. Plane (the mayor), and Messrs. Oakes, Spencer, Ridge, Tickner, Troughton, and Ditchburn. After hearing a good deal of evidence as to the origin of the fire, the Bench decided that the present inquiry would prevent the expense of a coroner's inquest, and the proceedings terminated, no conclusion being formed as to the origin of the fire

PICTURE GALLERY OF THE LATE KING OF HOLLAND, IN THE PALACE OF THE HAGUE.

SALE OF THE LATE KING OF HOLLAND'S PICTURES, &c., AT THE HAGUE.

The long-announced sale of the rich Gallery of the late King William II. commenced on Monday last, and has excited an unprecedented interest throughout Europe; and since it has been open for inspection, the Hague has had a succession of visitors from almost every country. Many transatlantic amateurs have also visited Holland on purpose to see the King's collections, and make purchases, and carry away some of the Royal treasures to New York, Boston, and other parts of the Western hemisphere.

The late King of Holland, William II., was a man of refined taste, and of considerable judgment in works of art. He purchased liberally, whenever opportunities offered of acquiring fine works of the old masters, whether of the Italian, Flemish, or Dutch schools; and he was a generous patron of living artists, as he has abundantly manifested by the large number of their works which now appear in his collection to be sold. While he was Prince of Orange, and before his Court was removed from Brussels, he had formed a gallery of the higher order of paintings, among which were many of the rarest and finest works of the early Flemish and Dutch masters, and some fine pictures of the Italian schools also. These were all brought to the Hague, and he was constantly making additions up to the period of his death.

The catalogue of the King's Gallery of Paintings is divided into two classes—Ancient and Modern. The former consists of 192 pictures, and the latter of 160, making together 352 paintings. Besides these, the Royal Gallery contains 26 fine objects in sculpture, principally statues and busts, by artists of his own country; and, though but small, a very rich and valuable collection of cartoons and drawings. These, also, are divided into two classes—Ancient and Modern; the Ancient comprising 342 lots, and the Modern 28; in all, 370. The ancient drawings are, for the most part, of the Italian schools, and the rest are chiefly by Rubens, Vandyke, and their followers. Almost all of the most rare and valuable of these works were collected, at a vast expense, by the late Sir Thomas Lawrence; and on an occasion of the late King's visiting England, he purchased them of Sir Thomas's representatives. It was deeply to be regretted that these beautiful and rare specimens of art were ever allowed to leave England; for among them are a great many studies and designs of Raphael, Correggio, Michael Angelo, Leonardo da Vinci, Luini, del Sarto, Fraier Bartolomeo del Vaga, Giulio Romano, Sebastian del Piombo, Guido, Domenichini, Tintoretto, Carravagio, Guercino, &c., some of their finest works. As the opportunity once more offers, by their being so unexpectedly again to be sold, it is to be hoped that the English Government will not neglect it, and that they will secure at least all the most valuable of these drawings, to place in the National Gallery.

The view of these Royal collections was closed on Friday, preparatory to the sale, which commenced on Monday for the paintings, to occupy five clear days, concluding on Friday, the 16th; and on Monday, the 19th, the sale will be continued, for the Drawings and sculpture, until they are all sold.

The ancient paintings are classed in the catalogue, according to their several schools, in the following order:—

1. The ancient Flemish school, consisting of fifty-four pictures, many of which are most rare and curious works, beautifully preserved.

2. The school of Bruges, extending from lot 55 to 81, among which are several very fine pictures by Rubens, Vandyke, Teniers, &c., which will be sold on Friday next.

3. The school of Holland contains twenty-five works, commencing at No 82 and ending with 107. These comprise several splendid works by Rembrandt, Wouvermans, Ruysdael, Hobbima, Van de Velde, Both, Bakhuysen, Jan Steen, Wenix, Huyanm, &c. They are comprised in Monday's sale.

4. The German school, which contains only one picture—an extremely beautiful composition, by Albert Durer

5. The French school contains seven, by Claude, Gaspar Poussin, Armand, &c., which also were sold the first day's sale

6. The Spanish School, consisting of twenty-four pictures, several of them of high quality, by Murillo, Velasquez, Navarrette, and Ribeira.

7. The schools of Italy, extending from No. 140 to 192, thus comprising fifty-two works of the principal masters of that country; among which may be particularly noted compositions by Raphael, Perugino, Leonardo da Vinci, Titian, S. del Piombo, del Sarto, Giulio Romano, Luini, Saint Marco, Canaletti, Carracci, Guido, Domenichino, Palma, Moroni, Guercino, Carlo Dolci, &c. These will conclude the sale of the pictures on Friday.

The modern pictures were to be sold on Tuesday and on Thursday, and entirely to occupy both of these days.

The first day's sale was attended by a vast concourse of the most distinguished amateurs from all countries, and also by the most respectable chasers of dealers. The large hall in the palace was most conveniently fitted up on Saturday. No one being admitted without paying for a ticket, had a good effect and the room was not uncomfortably full.

Among the lots were:—

DUTCH SCHOOL.

No. 82. Van der Helst.—A family of distinction elegantly disposed in a garden with mountainous scenery in background. A very fine gallery picture. 11,900 florins

No. 83 Van der Helst.—The painter himself, who is taking the portrait of his brother, who sits with a violoncello between his knees Two other artists sit at a table. One of his finest productions. 800 florins.

No. 90. Rembrandt. "Owner of the Vineyard paying his Labourers" A very grand composition, signed "Rembrandt fecit, 1630." 3500 florins. M. Van Cleef, a distinguished collector.

No. 92. Wouvermans. "St. Hubert."—He is descending from a grey horse in a forest scene. A stag with a cross fixed between his horns miraculously appears before him. Five dogs repose near, and huntsmen in the distance. Very splendid composition.

No. 93. J. and A. Both.—A warm and brilliant Italian landscape, with figures, cascade, &c. 10,400 florins; for the Brussels Gallery.

No. 94. J. Ruysdael and A. Van de Velde.—A grand mountainous landscape, through which winds a stream. In foreground to the left a wooden bridge conducts to a road along the river side. A herdsman driving cattle and sheep is travelling two cavaliers on their route. A magnificent picture. Figures by Van de Velde. 12,900 florins; for the Brussels Gallery

No. 98. Hobbima "The Water-Mill."—This celebrated landscape has long been esteemed as the *chef-d'œuvre* of the artist. The scene is charming. Shaded by magnificent trees stands the lonely mill, as a central object. Towards the left is a prairie, with a road conducting to it over a wooden bridge. Some well-placed figures give it life, and the effect of the sunshine on the horizon produces a union of natural beauties. Not put up.

FLEMISH SCHOOL.

No. 49. Lambert Lombard. "A Vision."—An allegorical subject, in an agreeable landscape. Rose: 1900 florins.

No. 51. Lambert Lombard.—A very extraordinary picture divided into two parts. On the left, a shipwreck; on the right, a town afflicted with the plague. A procession and the appearance of two angels seem to indicate that the wrath of Heaven is appeased. These two are curious specimens of art in the middle age. 1850 florins.

No. 52. Martin Schoen. "Death of the Virgin."—Represented as about expire. The twelve Apostles surround the bed, and administer the last consolation of religion. Colouring extremely brilliant. 2950 florins.

SCHOOL OF BRUGES.

No. 109. Albert Durer. "Saint Hubert."—A most exquisitely finished little picture, in beautiful preservation. 3800 florins.

FRENCH SCHOOL.

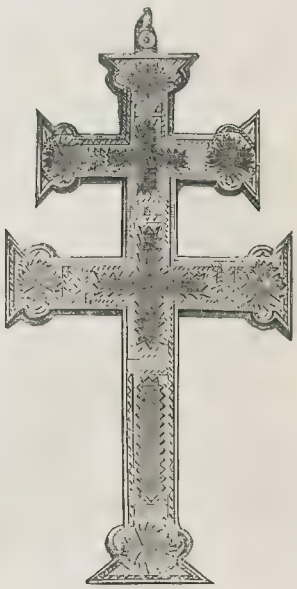
No. 111. Claude Gelée. "A Sea-Port" A classic scene on the coast of the Mediterranean, adorned with architecture, figures, vessels, &c. 8600 florins.

No. 114. Attributed to Claude Gelée. "The Departure of the Queen of Saba."—A magnificent display of classic architecture, extending to a port with majestic ships, wholly illuminated by the setting sun. A noble composition. 2500 florins

THE LATE SIR LANCELOT SHADWELL, VICE-CHANCELLOR OF ENGLAND.—(SEE NEXT PAGE.)

ANCIENT CROSS.

The accompanying Illustration represents the reverse of an ancient Cross or reliquary found in Ireland. This curious specimen of ancient art was discovered



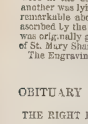
REVERSE OF AN ANCIENT CROSS FOUND AT CORK.

In a highly sculptured stone coffin in a churchyard near Cork, containing also the usual reliques. The obverse of the Cross gives a representation of the Crucifixion, with "I NRI" over the head of the Saviour; on the limbs of the Cross are the first words of the penitent thief, "DOMINE MEMENTO MEI." Three skeletons were in the coffin: the Cross was lying on the breast of one; the head of another was lying at the feet, as if decapitated during life. There was nothing remarkable about the third skeleton. The Cross is archæological, and has been described by the antiquaries of Cork to a very early period: it is of bronze, and was originally gilt. It is now in the possession of the Rev. Dr. Neligan, Rector of St. Mary Shandon.

The Engraving is from a nicely-pencilled drawing by a lady.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

THE RIGHT HON SIR LANCELOT SHADWELL, VICE-CHANCELLOR OF ENGLAND.



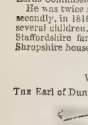
SIR LANCELOT SHADWELL died on the 10th inst., at his residence, Barn Elms, Putney. The death of so good and so able a man will be severely felt. For nearly a quarter of a century he presided over a branch of the Court of Chancery, and, throughout an extended period, secured the high respect of the profession by the soundness and impartiality of his judgment, the rectitude of his intentions, and his untiring assiduity and zeal.

Sir Lancelot was born in 1779, the son of Lancelot Shadwell, Esq., an eminent barrister of his day, by Elizabeth Whitmore, late wife, and sister of William Whitmore, Esq., of Dudmaston, late M.P. for Wolverhampton. He received his education at St John's College, Cambridge, where he graduated as 7th Wrangler; was called to the Bar, by the Hon. Society of Lincoln's Inn, in 1803; and became in King's Counsel in 1821. In 1826 he obtained a seat in Parliament for Mrs Lawrence's borough of Ripon, and in 1827 was made Vice Chancellor of England. On occasions Sir Lancelot acted as one of the Lords Commissioners of the Great Seal

He was twice married: first, in 1805, to a sister of Sir John Richardson; and secondly, in 1816, to the daughter and co-heir of Captain Locke, and leaves several children. Paternally, the deceased gentleman descended from an old Staffordshire family; and, maternally, from the very ancient and eminent Shropshire house of Whitmore of Apley.

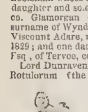
WINDHAM-HENRY, EARL OF DUNRAVEN.

THE Earl of Dunraven died on the 6th inst., at Adare Manor, county Limerick, aged 67. He was created Baron Adare, of Adare, in the county of Limerick, and were raised to the Peerage in 1800, when Sir Windham Richard Quin, Bart., was created Baron Adare. He subsequently became Viscount Mountearl; and finally, in 1822, Earl of Dunraven. His Lordship was twice married, by Margaret-Guy, his second wife, sister of the late Colonel Edmund Coghlan, Governor of Chester, and widow of Colonel Arthur Blennerhassett, of Blennerville, he had no child; but by Frances, his first wife, daughter of Thomas, first Earl of Normanton, he had father and the children, of whom the eldest son, Windham Henry Earl of Dunraven, was the nobleman whose death we record. He married, 21th December, 1810, Caroline, daughter and sole heir of the late Thomas Wyndham, Esq., of Dunraven Castle, co. Glamorgan (in consequence of which marriage he took the additional surname of Wyndham), and has left by her two sons—Edwin Richard Wyndham Viscount Adare, now titul Earl of Dunraven; Windham Henry, born 3d Nov., 1823; and one daughter, Anna-Maria-Charlotte Wyndham, wife of W. J. Monsell, Esq., of Tervoe, co. Limerick, M.P.



Lord Dunraven was one of the Irish representative Peers, and a [illegible] Rotuliorum (the county of Limerick.

JOB WALDEN HANMER, ESQ.



THIS respected gentleman, a member of the English bar, died on the 2nd inst., at his chambers, Lincoln's-inn, aged sixty-eight. He was second son of the late Sir Thomas Hanmer, Bart., of Hanmer, co. Flint, by Margaret his wife, eldest daughter and co-heir of George Kenyon, Esq., of Peel, co. Lancaster. Among the family's collateral ancestors was the famous Sir Thomas Hanmer, Speaker of the House of Commons of the 13th year of Queen Anne, 1712, who was a politician and a man of letters, of which latter character his well-known edition of "Shakspeare" remains the best memorial.

THE HON. CHARLES EWAN LAW, M.P., RECORDER OF LONDON.

THE death of the learned and estimable Recorder occurred somewhat suddenly, in the morning of the 13th inst., at his residence in Bedford-square, after a short illness, ailing for a few days previously, but his illness had not excited alarm in his family.

Mr Law was born June 14, 1792, the second son of Edward Lord Ellenborough, the celebrated Lord Chief Justice of the Court of King's Bench, and had, consequently, completed his 58th year. Early destined for the profession of the law, he was called to the Bar as soon as his age permitted, and joined the Oxford Circuit, on which he gained a fair degree of practice, and obtained eventually, in 1841, a silk gown. In 1830 he was chosen Common-Serjeant, and continued to perform the duties of that office until 1833, when he was elected to the more dignified position of Recorder of the City of London. In 1835, Mr. Law succeeded Sir Charles Manners Sutton (then created Viscount Canterbury) in the representation of the University of Cambridge, and was returned by the same constituency at all the elections since.

The deceased Recorder married, May 22, 1811, Elizabeth Sophia, daughter of [illegible] Nightingale, Bart., of Kneesworth, county Cambridge, and had three sons and seven daughters. Of the former, the eldest died in 1838, aged 19; and of the latter, four died in youth. Charles-Edward, who is married to Lady Eleanor Cecil Howard, eldest daughter of the Earl of Wicklow; Henry Tewry, born in 1830, Mary, wife of John, present Lord Kilmaine, Elizabeth-Sophia; and Augusta-Caroline Law, Esq.

As a member of the House of Commons, Mr. Law was remarkable for his unswerving adherence to the High Tory party, and his zeal procured for him a degree of respect, even from those against whom it was directed. On occasions only when some vital principle was at stake, and the necessity for action was imperative, and then his warm and determined advocacy was sure to produce effect. In legal reputation and intellectual position inferior to his father, Mr. Law achieved for himself a high reputation by the vigour of his capacity, the exactitude of his mind, the independence of his character, and the strict impartiality and acute discernment that distinguished him on the Bench. As a representative for the University of Cambridge, he possessed a certain amount of parliamentary importance, and his sentiments on Church questions bore, consequently, with them a considerable degree of authority. His sudden death will create a general feeling of surprise and deep regret. The hon. gentleman was a Bencher of the Inner Temple.

TOWN TALK AND TABLE TALK.

PARLIAMENT, which is no more able to survive the beginning of grouse shooting than a mouse is to live under an exhausted receiver, has in the course died tranquilly away; the moribund stage, including the period of the transition from good hard regular work to nonentity, having been upon the whole shorter than usual. The session just over has been especially since Whitsuntide—laborious, and the debates frequently protracted until wearisome hours of the summer mornings. And yet the campaign has been by no means an oratorical one. A single great debate—the Palmerstonian passage of arms—comprehends much, if not all, of its prepared eloquence. The palaver in question lasted four days. In that period the House was nearly twelve hours per day, and yet the number of speakers who took part in the debate was comparatively small. The subject was too comprehensive to be treated in few words; and Lord Palmerston himself set the example by going resolutely through every topic of diplomatic interest. Those who heard it will not readily forget the noble Lord's great mental effort, extending, as Mr. Gladstone phrased it, from "the dusk of a summer night to the dawn of a summer morning." The average length of each evening sitting during the entire session has been ten hours and a half. The total number of hours passed by the Speaker in the chair will be something for the time subsequent to Sir Benjamin Hall's return—about 1100; and during so much of that period as is included up to the 1st of August, fifty-eight public bills have been passed by the Legislature. The number was greater last Session by thirty-one. It would appear, then, that the just concluded Session—which has not been particularly prolific either in legislation or in set oratorical speeches. The inference is that the House is now becoming more and more occupied with plain, practical discussion on the details of bills. The reign of yearly extending of that class of politicians, "quarter-session men," as they have been aptly denominated, described in "Coningsby" as wearing "high-lows and shocking bad hats, and speaking in committees, and thinking that they are men of business, d——n them!" The fact that a large proportion of the bills with which we have been under discussion are sober, practical measures, trenching upon very few principles, but embracing vast codes of clauses, and setting in motion long trains of complicated machinery to work them, such, for example, as sanitary bills, stamp bills, and the like makes it quite evident that the qualities of the "quarter-session" style of legislators, despite the bad hats and high-lows, are by no means to be sneezed at, and that the steady-going men of business, perfectly *au fait* to the working of social and official machinery, are destined to play no inconsiderable or unimportant part in the House: at all events, until some great agitation touching principles breezes up, and we have the country in a ferment rather about abstract ideas than substantial grievances. Do the signs of the times denote the advent of any such epoch? Folks who are clever at looking into millstones profess to see the straw moving which betokens the coming of a great political agitation, and a "new broom" is significantly whispered from mouth to mouth. Well, the Session has come and gone. A very pretty piece of fast-like session it has been. It found aristocracy and democracy very quiet, and it has left them still smoothing together, with no particular symptoms of either being likely to wake with a start and jump up in wrath.

"——and, in the matter of combustibility, is becoming quite an English Peru. Half-a-dozen great fires—two of them, at least, monster conflagrations—form a pretty fair allowance for a small town during half-a-dozen years. I visited the scene of the last catastrophe the day after it occurred; and a more sweeping destruction of a large-sized square of houses never was effected by fire. In the centre of the High-street, you stood amid a desert of calcined bricks, and smoking heaps of tiles, and scorched and blackened rubbish. Shortly I got into talk with one of the London firemen upon duty. There were fine points of character about this seafaring party of the brigade. The lofty contempt with which he spoke of the local firemen, was somewhat quite magnificent. A first violin in the orchestra of the Philharmonic could not have looked down from a more magnificent height upon a fiddler artist in the Stoke Poges teetotal band, or the Little Pedlington amateur Sons of Sons of Italy in the last dress circle. Evidently was, that the damage had not been so much caused by the fire, as by the stupidity of the firemen in not having put it out. I asked whether there had been plenty of water? "Water! to be sure: lots o' water—no end o' water; but what do them dogs know what they're to do with water when they get it?" The local functionaries, in the opinion of the London fireman, were all scorn, to be "mere amateurs—regular know-nothings." And the hose and plant with which the place is supplied, this supreme metropolitan authority [illegible] will be tremendous things, for a small town during the last thousand years

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

Sir George Anderson is appointed governor of Ceylon, and is to be succeeded in the government of Mauritius by Mr. Higginson, now Governor-in-Chief of the Leeward Islands. Sir George Anderson has earned his promotion by the ability with which he has conducted the government of Mauritius, where he has effected a considerable reduction in the expenditure, and introduced many useful practical reforms. Mr. Higginson was introduced into the public service by Lord Metcalfe, and has proved himself worthy of his friendship and patronage.

At the weekly meeting of the Manchester Peel Monument Committee, held on Friday week, in the Town-hall, the mayor, in the chair, it was announced that the total amount of subscriptions has reached £4878. The questions of site, form, and material were then taken into consideration, and it was resolved that the monument should consist of a colossal erect figure, in bronze, of the deceased statesman, to be erected in the open air, within the area before the Royal Infirmary.

On Saturday, the East India Company gave a grand dinner, at the London Tavern, to Sir William Gomm, prior to his leaving England for the Bombay Presidency, of which he has been lately appointed Commander-in-Chief. Covers were laid for 130 guests. The chair was taken by Mr. Shepherd, chairman of the company, who was supported by Viscount Hardinge, Lieutenant-General Sir T. M'Mahon, K.C.B., &c.

The editor of the *Morning Herald* states that he has lately examined a large lump of auriferous rock or stone, just arrived from the neighbourhood of Annatto Bay, Jamaica. Split open, it appears almost one compact mass of gold and silver, the pure silver ore lying in small lumps thickly interspersed with gold particles. This lump will yield about 70 per cent. of the precious metals. This is considerably richer than many of the Californian specimens.

In consequence of the vacancy created in the representative peerage of Ireland by the demise of the Earl of Dunraven, Lord Dunsany, who gave way upon the last occasion to the Earl of Lanesborough, has commenced his canvass with every prospect of being returned without any opposition

The Rev. John Hunter, M.A., formerly vice-principal, has been appointed principal of the National Society's Training College, Battersea, as successor to the Rev. Thomas Jackson, the Bishop Designate of Lyttleton, Canterbury Settlement, New Zealand. Mr. Jackson, on his consecration, will leave England with the bishops of Colombia.

Today, during the visit of the Queen, is one of a batch of convicts who were despatched for Van Diemen's Land on Monday, by the ships *William Jardine* and *Rodney*.

The Right Hon. Thomas Francis Kennedy, paymaster of civil service in Ireland, has been appointed one of the Commissioners of Woods and Forests and Land Revenues, in the room of Alexander Milne, Esq., retired.

Dr. T. Southwood Smith, who was the medical member of the General Board of Health during the period of the Orders in Council (as authorised by the Diseases Prevention Act), has been appointed the second paid member of the board, provided by the Metropolitan Interments Act.

From 1801 to 1850 there were 4,703 explosions on the North American lakes, by which 111 lives were lost during the period; between 1816 and 1850 11 steamboats were destroyed by fire, causing a loss of 81 lives; from 1811 to 1850, a period of 40 years, there were 26 collisions on the lakes, by which 82 persons were killed. The number on the lakes during the last 10 years, from explosions, fires, and collisions, also united to 877

We are happy to learn that the present season bids fair to be an excellent one for country in Scotland. The produce in Borgue is expected to be twice as large as last year, and of exceeding quality

The Archbishop of Dublin, and the Bishops of Ferns, Cloyne, and Killaloe are according to rotation, the representative bishops in the next session of Parliament

The Very Rev. Usher Lee, Dean of Waterford, died on Sunday morning, in the 86th year of his age.

Four or five months ago, Mrs. Juggings, landlady of the Wheat Sheaf, Sans-street, Sunderland, was bitten in the hand by a cat; but no importance was attached to the wound. She was subsequently confined, and was recovering very favourably, but on Saturday last, which completed the "thirdfortnight" set in, and on Tuesday she died.

The New Factory Act has come into operation. The factory hours of labour now are from six in the morning to six in the evening, including meal times; the factories closing every saturday at two o'clock.

On Thursday week, the servant woman of Griffith Thomas, farmer, Pantglas (Wales), having occasion to pass through a field in which there was a bull, was instantly attacked by the animal, and so seriously injured, being gored in many places, besides having her spine broken, that she died on Saturday last in great agony.

The cholera has appeared in Chatham, and two deaths have taken place. One of the patients died on the Brook, and the other at the lower part of the High street, and near to the Medway Bridge. Considerable alarm prevailed in which these deaths have occurred is not only dirty, but there are foul ditches which ought to be purified, especially at this season of the year

On Monday afternoon a singular accident occurred at the iron foundry of Messrs. Knight and Cumming, Maidstone. A bombanell had been purchased amongst the old iron, which exploded in one of the furnaces, blowing down about ten feet of the brick work of the blast pipe. The explosion appears to have resulted from the expansion of the inclosed air, the bomb being plugged. Had it been loaded with the usual explosive material, it would probably have destroyed the building.

William Chadwick, convicted capitally as an accessory before the fact for the murder by poison of his wife's uncle at the Stafford assizes before Mr. Justice Wilde, has been respited, during pleasure, as one of proceeding with the capital sentence, and is sentenced to a commutation of the extreme punishment into transportation for life.

A young man, a tailor, who was in the habit of bathing at the Westminster Swimming Baths, went there on Sunday afternoon for that purpose. Just before he went into the water he was heard to remark that he had drunk water a little, as he had just dined. Scarcely, however, had he uttered these words, when he fell in with a loud splash. Assistance was immediately rendered, but life was quite extinct. A surgeon was called in, who pronounced the death to have been caused by apoplexy.

The students of the Central School of Design have contributed the sum of £31 3s. to the funds now raising for the Exhibition of 1851. This amount has been contributed in sums of 1s. and 2s. 6d.

On Thursday week, a large sculptured statue, weighing several hundredweight, in front of the cathedral at Wells, fell to the ground with a tremendous crash. The sheriff's coach had been standing on an adjoining spot, waiting for the judges and sheriff for some time, and had only moved off a short time before the accident occurred.

The will of the late Sir Robert Peel was proved on Saturday, and probate granted for assets under £90,000.

The Bishop of Winchester has licensed the Rev. Thomas Davis, of St. Bees College, Cumberland, to the curacy of Christ Church, Blackfriars-road.

Simultaneously with the opening of the great Northern Railway, the Eastern Counties reduced their fares between London and St. Ives and Peterborough; and the London and North-Western, by day ticket, on their Northampton and Peterborough line. The Midland Company also assimilated their fares to those of the Great Northern

The late Mr. William Meller, an old and respected inhabitant of Wolverhampton, has made bequests, free of legacy duty, to the following charitable institutions, Dudley and Staffordshire Infirmary, £2000; the Blue Coat School, Wolverhampton, £1000, St. George's Sunday School, £200; St. James's Sunday School, £200; and the Aberystwith Dispensary, £200.

On Saturday morning, a vast number of crows alighted on the trees of the Tuileries gardens and the roof of the Palace (Paris). It was found necessary to call out a number of men belonging to the chasseurs of Vincennes, who killed 500 of them.

The Minister of the Interior in Prussia has just interdicted in the whole kingdom several periodical writings, and amongst the rest the *Proszrl* published at London and Paris.

Eleven convicts under sentences of transportation effected their escape from the gaol of Maryborough (Queen's County), last week, and none of them have yet been arrested.

The parishioners of Sproughton have lately subscribed a fund for a new organ. This instrument, which was built by Davison, of London, was erected on Tuesday last, and on Wednesday evening the church was opened to commemorate the event. Prayers were read by the Rev. H. J. Hasted (the rector), and a very appropriate and appropriate sermon was preached by the Rev. J. Hunnington, from Psalm cl. 6, "Let everything that hath breath praise the Lord."

The population of Prussia, on the 30th ult., amounted to 16,330,186, of whom 1,001,393 resided in Berlin, 2,811,196 in Posen, 1,461,580 in Western Prussia, 1,025,712 in Eastern Prussia, 2 120,022 in the province of Brandenburg, 1,781,287 in the Saxon province, 1,464,231 in Westphalia, 1,359,014 in the Grand Duchy of Posen, 1,197,201 in Pomerania, and 43,173 soldiers without a fixed residence

A vessel just arrived from Bombay has brought the large number of 371 bales of silk, 24 half bales of cotton, as part of her cargo, of East India produce, and another vessel arrived on the same day from Genoa, via, a port of St. Domingo, has brought 69 bales of cotton, the growth of that island

An importation of 4749 bags of wheat has taken place by a vessel arrived from Port Adelaide, the produce of South Australia.

Colonel Beauchamp, an officer of long and distinguished service in the Peninsula, but for some years retired from the army, committed suicide at an hotel in Dawson-street, Dublin, on Sunday last, in a fit of temporary insanity, produced by a severe attack of erratic gout.

An explosion took place on the 30th ult. in a gunpowder manufactory at Elsterstad, a village from Christiana, in Norway. Ten men were at work at the time; six were killed on the spot, two were seriously injured, and the other two could not be found. The violence of the explosion was such, that the windows of several houses at Christiana were broken. The manufactory had only been open six weeks, and belonged to Messrs. Hammann and Olsen.

CHESS.

TO CORRESPONDENTS.

HENRICUS.—If a player, in moving his King out of check from one place, goes into check of another, he must again move out of check altogether. 2. We do not reply to questions regarding games at cards

CHESS FANCIER AND CORRECTOR must send a diagram of the present position of the EVANS gambit in question: his description of it is quite unintelligible. 2. We shall shortly give the moves of the moves played up to this time in the Amsterdam match

CLERICUS, Anerop.—The Rev Mr Bolton, to whom the lovers of Chess are indebted for many of the most admirable examples of Chess strategy ever published, has, we regret to say, taken his final leave of the chess field. His "Farewell Problem," which he has deliberately, to Mr Staunton, by his desire, appears in the current number of the *Chess-Player's Chronicle*, accompanied by the following note:—"My dear Mr S.—It was at your request that I first became a contributor to the *Chess-Player's Chronicle*—a connexion which has for many years afforded me great delight. If, by any of my Problems, I have added to its interest, to you belongs the praise: and now that I would withdraw from the chequered field, and leave the bloodless contest to more youthful aspirants, I would beg the favour of you to permit me to dedicate my last effort to you, as a mark of my sincere esteem and confidence. By this connexion with your name, it is truly gratifying to me to reflect that I shall be remembered in the *Chronicle*, not only as a contributor to its pages, but as one friend of the Champion of England.

"Otley Rectory" H. BOLTON

A SHEFFIELD GRINDER.—It shall be examined. In the meantime, as our Correspondent has an objection to his communications being publicly commented on, he will perhaps oblige us with his address

ST EDMUND.—The best are marked for insertion among our Enigmas

J B T, Maidstone.—In a Match, it is generally understood, unless the contrary is specified, that drawn games do not count, you have therefore only played 18 games

ONE KG.—We do not think the alteration you suggest would at all improve the Indian Problem

T P B.—The error in the "Sphynx" was discovered at the time the book was published, and has been repeatedly acknowledged since

J A W.—No. 2 is merely quaint. Of No. 3 we can offer no opinion, as one of the Knights has forgotten his *address*, and cannot find the field

W G, Beverley.—Upon re-examining your last problem, you will discover another very obvious method of mate, in four moves, by first playing Rook to K 8th

A Lover.—The price of Lonsdale's elegant folding-board, adapted for the new Chessmen, we believe, is £1 15s

PHILIDOR.—1. The books mentioned will be quite sufficient for your New Club during the first year 2. Before purchasing the Chess-boards, we should strongly recommend you to peep at those just brought out by MECHI, which in point of beauty and solidity go far beyond the old patterns

AN EDINBURGH CHESSITE.—The games and position came safe to hand, and are very acceptable. Through the same medium, the required number shall be immediately forwarded

B W P, L.—Mr. Bolton's "Farewell Problem" is in twenty-four moves, and far too profound and difficult to be solved without the aid of the Chess-board 2 Your problems are now under consideration

G M E.—The position referred to is the inimitable "Indian Problem." Mate can certainly be forced in the stipulated number of moves

G D S, South Shields.—How do you propose to mate if Black for his second move should take the bishop?

ONE OF MANY WHO, &c.—We have received a number of communications respecting a proposed congress of Chess-players in metropolis during the "Exposition" next year. As an assemblage of the kind is calculated to give an immense impulse to the game, and the period for it appears to be particularly appropriate, we trust the subject will meet with due consideration from the leading amateurs

CHORISTER.—There is an English Translation of Jaenisch's "Analyses Nouvelle," by G Walker, published by Longman and Co, 1847

CHESS.—Too simple

SOLUTIONS OF PROBLEM NO 342, by MARY JANE, JUDY, H M H, Q R, M E R, W F J M, DORIA, B F, ROSEBARDINE, CAPE TOWN, ST EDMUNDS, M A R, BELLAH, DE DUNS, DOLLINGTONIA, R, Yarmouth Chess-Club; JUVENTUS, M P, Rev T A M, Rev R S L, MIFER, P R S, L D, MARCUS, CROMER, SELIM CURLY, R P J, T A W, HENRIUS, B A Q, TOM TUM, JOSHUA WAGSTAFF, P G R, A R G, OMEGA, P Q R, SENATOR, SUNSCHEIN, AMATEUR, TYRO, KIT, W S T, DE FIELD.—are correct. All others are wrong.

*** Want of space compels us to defer the answers to numerous correspondents until next week

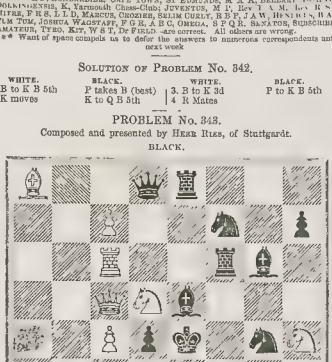
SOLUTION OF PROBLEM NO. 342.

WHITE.	BLACK.	WHITE.	BLACK.
1. B to K B 5th	P takes B (best)	3. B to Q 3d	P to K B 5th
2. K moves	K to Q B 5th	4 K Mates	

PROBLEM NO. 343.

Composed and presented by HERR RIES, of Stuttgardt.

BLACK.



WHITE.

White to play, and mates in five moves.

CHESS IN GERMANY.

The following highly interesting game is one of two recently played by Correspondence between M. Harnisch, one of the finest players of the Berlin Club, and M. Lange, a promising young amateur, of Magdeburg; the former giving the odds of the Pawn and two moves

(Remove Black's K Bishop's Pawn from the board.)

WHITE (M. Lange).	BLACK (M. Harnisch).	WHITE (M. Lange).	BLACK (M. Harnisch).
1. P to Q 4th		22. B to K 5th (e)	Castles
2. P to K 4th	Q Kt to B 3d	23. Q to her R 6th (ch)	K to Kt sq
3. K B to Q 3d	P to K 4th	24. K R to K 4th	Kt to Q B sq (f)
4. P takes P	Q Kt takes P	25. Q B to his 5th	Kt to Q Kt 3d
5. Q to K R 5th (ch)	Q Kt to K B 2d	26. K R to K 6th (g)	Q B to K sq
6. K B to Q B 4th	Q to h 3d	27. K B to Q Kt 3d	P to Q 4th
7. Q Kt to B 3d	K Kt to B 3d	28. K R to K 3d	K B to Q 3d
8. Q to K 2d	P to Q 3d	29. K R to K 6th	K B to Q B sq
9. Q B to B 4th	Q B to K Kt 5th	30. P to K B 5th	K B to K 2d
10. K Kt to B 3d	P to Q B 3d	31 P to Q Kt 4th	Kt to Q B sq
11. Q B to K 3d (a)	Q to her B 3d (b)	32. Q R to Q Kt 4th	Q R to Q 2d
12. Castles on Q side	K R to B 3d	33. Q B to Q B 6th	Q R to Q 3d
13. K R to K sq	Q B to K R 4th	34. Q to her 3d	Q to her Kt 2d
14. Q B to Q 4th	K to his sq	35. Q B to Q 3d	K to Q R sq
15. P to K R 3d	Q Kt to Q sq	36. P to Q B 4th	K to Q B 3d
16. P to K Kt 4th	Q B to K B 2d	36. B to K B 4th	Q R to Q sq
17. Q Kt to Q 5th (c)	P takes Kt	37. K R to Q B 2d	Kt to Q R 2d
18. K B to Q Kt 6th	Q Kt to B 3d	38. P takes Q P	Q R takes P
		39. Q to K B 3d	Q R takes Q R P
19. P takes P (dis ch)	K Kt to K 2d	41. K B takes Q B P	Q Kt to his 8th (ch)
20. P takes Q Kt	P takes P	41. K to Q 2d	Q B takes B
21. K B to Q R 4th (d)	Kt to K Kt sq		

And M. Harnisch won the *partie*

(a) Well conceived; foreseeing that if Black ventured to seize the tempting Pawn, it would cost him a piece

(b) Let us suppose him to capture the K Pawn instead—

WHITE.	BLACK.
11.	K Kt takes P
12 K takes Kt	Q takes Kt
13 B takes Kt (ch)	

and Black does not escape it, from apprehension of—14 Kt to K Kt 5th (ch), &c

(c) Ingenious, and quite sound

(d) We should have preferred taking the K Kt Pawn with the other Bishop, in which case the game would probably have proceeded thus:—

WHITE	BLACK	WHITE	BLACK.
21. Q B takes K Kt P	R takes B or R	23. B takes Q R	With a winning game.
22 B takes Q B P (ch)	K to B sq		

(e) Finely played. It is much as Black's game is worth to take it

(f) Black would obviously have lost by taking the Bishop.

(g) This may be done securely, since Black dare not open his Queen's file.

CHESS ENIGMAS.

No. 1.—By M. Mayet, of Paynger

White: K at Q B 3d, B at K B 3d, Ps at K B 3d and 4th, K Kt 4th and Q 4th. Black: K at K B 8th; Ps at K 4th 3d, Q 4th, Q B 3d and 5th.

White to play, and mate in five moves.

No. 2.—By Mr. Mayet

White: K at Q B 2d, Q at K B 5th, R at Q 4th, Bs at K B 7th and Q R 7th, Kt at K 8th, P at K B 4th.

Black: K at K R sq, Q at K Kt 2d, Kt at K R 3d, P at K Kt 7th.

White to play, and mate in four moves.

CHURCH, UNIVERSITIES, &c.

Lloyd to Oversby, with Kirkby and Osgarby annexed.

TESTIMONIALS.—The following clergymen have lately received testimonials of affection and esteem:—The Rev. N. S. Godfrey, from the parishioners of Biddenham, Bedfordshire; the Rev. G. W. Chamberlain, incumbent of St. Michael's, from the teachers of the Sunday-schools; the Rev. A. Brereton, curate of Hickling, Norfolk, from the parishioners; the Rev. S. Adcock, Ellis, Perpetual Curate of St. Ives, Cornwall, by the parishioners; the Rev. J. B. Owen, Chairman of the Wolverhampton Guardians, from the board.

THE GORHAM CASE.

On Sunday, August 11th, the Rev. G. C. Gorham was inducted into the living of Brampford Speke. The Rev. Mr. Howard, of St Thomas, near Exeter, officiated, in the place of Archdeacon Moore Stevens, and preached an excellent sermon on the occasion to a numerous congregation.

A correspondence has been published in the morning papers between the secretaries of the Metropolitan Church Union, Messrs. T. T. Bazely, G. E. Biber, G. Roberts, and G. J. Ottaway, and the Archbishop of Canterbury, connected with this case. The secretaries, under date July 24, informed the most reverend prelate that a committee of the Metropolitan Church Union has been charged with the presentation of an address to him, most numerously signed (37,000 signatures), begging him not to proceed with the institution of Mr. Gorham. They forwarded a copy of the address, and begged to know when the deputation might wait on his Grace. The Archbishop sent the following reply

"Addington, July 26.

"Gentlemen,—I beg to acknowledge the receipt of your letter, in which you desire me to receive an address from a society of which you are secretaries, praying that I will, neither myself take any step, nor suffer any step to be taken by any authority, for the institution of the Rev. G. C. Gorham to the living of Brampford Speke.

"Mr. Gorham's case having been brought before the legitimate tribunals, and solemnly deliberated upon, the sentence of the Court was pronounced, to the effect that there was no just impediment to his institution

"Your address proposes that I should assume to myself the authority of reversing this sentence of the Court should refuse to do what the law requires of me, and should deny to Mr. Gorham a right to which, after a legal trial and examination, he is declared to be entitled.

"I submit to your committee, with all due deference, that I cannot consistently receive an address of which it is the purport; and I must, therefore, respectfully decline to make a time for its presentation to me.

"I remain, Gentlemen, your obedient and humble servant,

"To the Secretaries of the Metropolitan Church Union" "J. B. CANTUAR.

The Secretaries sent a long rejoinder, dated August 3, in which they say, amongst other things, that His Grace will nowhere find it proposed in the address that he should assume to himself the authority of reversing the judgment of the Judicial Committee of the Privy Council. Its prayer is that your Grace will not make the high authority committed to you by Christ, in this branch of his holy Catholic Church, subservient to the carrying into effect of that judgment, proceeding, as it does, from a court which, however worthy of respect and deference in its political province, is, as a secular court, destitute of authority in controversies of faith, and incompetent to pronounce on the fitness of any man to take the cure and charge of souls in any portion of Christ's Church. * * * They venture most respectfully to submit, that, if her Majesty were more fully acquainted with the bearings of the case—if her attention were drawn to the invasion, by a temporal court, of the Church's inalienable right to judge in spiritual matters, and to the extent of the heretical opinions of Mr. Gorham, which in the report of the Judicial Committee are concealed from view, as well as to the inconsistency with Catholic doctrine even of the modified opinions attributed to Mr. Gorham by the Judicial Committee—her most gracious Majesty would be aware that the question at issue is one which involves the virtual denial of an article of the faith, and therefore admits of no compromise—that the very life of the Church is seriously imperilled by the attempt to rob her of her distinctive teaching on the sacrament of baptism, &c., they cannot but cherish a hope that, out of her princely care for the Church, as well as in conformity with the solemn engagements entered into at her coronation, her Majesty would give license for the Church in Convocation to deliberate and to do all things which concern the settled continuance of her doctrines and discipline, and would also take counsel for the enactment of such legislative provisions as may be needful for indemnifying your Grace against any legal consequences incidental to your maintenance of the integrity of the faith.'

They further say, "We cannot so wrong your Grace as to suppose it could ever be your intention to disobey the higher obligation of Christ's law, by which his ministers of all orders and degrees are bound to preserve, at all hazards, the sacred deposit of the faith 'whole and undefiled;' yet we feel that the law which would compel you to institute to a benefice, with cure of souls, a man holding and teaching heretical doctrines on a fundamental article of the faith, is but too surely opposed to the Divine command, 'to reject a man that is a heretic.'

"Lastly, we cannot permit ourselves to doubt that your Grace would decorate the idea of any abstract right in Mr. Gorham, or any other clergyman, to the spiritual mission of cure of souls, irrespectively of the concordance of his doctrine with the teaching of the Church, the cure of souls being a sacred trust to be committed to no man alone who in the declared duly qualified by the proper spiritual authority. The judgment of your Grace's own provincial court, that Mr. Gorham's doctrine is not in accordance with the teaching of the Church, has not been reversed by any spiritual authority, and, as we humbly submit, has not been, and cannot be, proved to be erroneous."

They indulge the hope that, after duly weighing these explanations, his Grace may take a different view of the address, and no longer hesitate to listen to the urgent entreaties of a large body of Church laymen, who themselves constitute but a feeble representation of the widely-extended feeling which prevails in the Church upon this painful subject.

The Archbishop, in his second reply, dated Addington, August 8, after recapitulating the recommendation of the the secretaries, says:

"You suggest that I should represent to her Majesty the view taken by the Metropolitan Church Union of so many points connected with that judgment, in the hope that her Majesty may license the assembling of a Convocation, and that thus the whole question may again be brought under deliberation, and, as you suggest, authoritatively determined. But simply it would be an unprecedented and arbitrary measure, by any retrospective decree, to annul a right of which an individual is already legally in possession. And whilst you assume as undeniable a variety of principles, and make many positive assertions, in order to invalidate the respect due to the decision of the judicial tribunal, I must remind you that your opinions are directly opposed to those of a numerous body of unimpeached and unstained members of our Church, both clergymen and laymen, who, although they have hitherto observed a judicial respectful silence, are yet deliberately convinced that no other determination of the question at issue would have been in accordance with the articles of our Church and the known principles of law by which we are governed, and that it would also have been opposed by all Churchmen from the Reformation to the present day, in the exposition of subjects of such deep mystery, should by all means be continued to them within the limits prescribed by the revealed Word of God.

"Assuredly, there are occasions, as you remind me, when it becomes a duty to obey God rather than man. But I beg to observe, that, before any one takes upon himself the responsibility of contravening the law of man, he ought to be very certain that, in so doing, he would be obeying God. Now, nothing which I find in the law of God gives me reason to believe that I should be acting in conformity with it if I refused Mr. Gorham admission to the cure of souls, on the ground of his hesitating to affirm the spiritual regeneration of every baptized child. And the will of God in this matter had need to be very plainly declared before I could think myself justified in accusing Mr. Gorham of heresy; much more, before I could assume the right of individually condemning him, after the decision of the legitimate tribunal in his favour.

"In conclusion, I beg to assure your committee that I feel great regret in the necessity and importance of professing a wide difference of opinion from the numerous subscribers to your address—a difference, however, which in no way diminishes the respect with which I remain, Gentlemen, your faithful servant,

"To the Secretaries of the Metropolitan Church Union." "J. B. CANTUAR.

LAYING THE FOUNDATION-STONE OF THE NEW FREE GRAMMAR AND COMMERCIAL SCHOOLS AT LOUGHBOROUGH.

[illegible] was observed as a general holiday at Loughboro', and a [illegible] in honour of the ceremony of laying the corner-stone of the extensive Schools about to be erected, on the premises appropriated by the Court of Chancery, from the funds left for charitable uses, in 1488, by Thomas Burton, a merchant of the staple, a resident, and, it is believed, a native of the town. The Lord Bishop of Peterborough, who is not only a native of Loughboro', but was also a distinguished pupil of the former school, [illegible] funded from the estates of the same benefactor, most kindly consented to lay the stone

The occasion was one of [illegible] interest. The arrangements determined not only to do honour to the memory of Thomas Burton, but to testify their esteem to the venerable and excellent prelate of whom Loughborough has such just reason to be proud. At an early hour, the [illegible] ringing, on the fine tower of All Saints, announced that the festival had begun. The clergy and gentry of the town and neighbourhood met the Bishop at the rectory, whence they proceeded to the church. Here prayers were read by the Rev. Robert Bunch, Rector of Emanuel Church, and a most appropriate sermon was delivered by the Rev. Henry Fearon, Rector of All Saints.

THE NEW FREE GRAMMAR AND COMMERCIAL SCHOOL AT LOUGHBOROUGH.

A procession was then formed to the School grounds. Probably at no period in the town's history was such a heart-stirring sight as this ever beheld. The fine band of the 1st Royal Dragoons preceded, followed by the

High Constable—E. P. Jackson, Esq.
Chief Bailiff—Mr. Fowkes.
Builders—Mr. Freeman, Mr. Walpole, Mr. Freeman.
Architects—Mr. Robson, bearing Drawings and Plans. Mr. Morris (Silver Trowel).
Masters of the Low School—Mr. Towle, Mr. Carvile
Scholars, four abreast.
Mistresses of the Low School—Mrs. Russell, Miss Russell.
Master of the High School—Mr. C. E. Warner
Mistresses of the High School—Miss Charnock, Miss Donaldson.
Solicitors to the Trustees—J. W. Wooley, Thomas Cradock
Receiver—Mr North
Trustees—John Cartwright, John Smith, John Watson, Thomas Woodcock, John Barron, Edward Hartley, Edward C. Middleton, J. H. Eddowes, John White, William Clifford.

THE LORD BISHOP OF LINCOLN.

THE LORD BISHOP OF PETERBOROUGH

The Rev Robe Bunch. The Rev Henry Fearon.

Clergy, two abreast.
Dissenting Ministers, two abreast.
Gentry of the town and county, three abreast.
County Police.

In this order the procession reached the School grounds, the entrance to which was decorated by a very tasteful arch of evergreen, having inscribed in dahlias the words "Burton's Charity."

The site of the new Schools is judiciously chosen. Round the foundation-stone were erected spacious platforms and galleries, filled by numbers of "fair women and brave men." The Bishop ascended an elevated throne, or chair, covered with crimson; around him, the clergy and the trustees (the latter a body of remarkably fine men) formed altogether a group of uncommon interest. And now John Cartwright, Esq., the senior trustee, effectively read an address to the Bishop, which gave a succinct history of the Charity; and concluded with some graceful allusions to its great founder, to the Prelate's connexion with the town, and to the honour conferred upon it by his Lordship's distinguished and useful career. Nothing could be in better taste than this well-written address and the Bishop's admirable reply. Their length alone prevents our transferring them to these columns.

The beautifully-wrought silver trowel, appropriately inscribed, was now, in suitable terms, presented to his Lordship by Edward Chatterton Middleton, Esq.; and the Bishop performed all the work of laying and inaugurating the stone with true masonic skill and with great adroitness. The ceremony was concluded, as it had occasionally been relieved, by psalms and hymns, sung by the church choir, and joined in by a thousand youthful voices.

The party now retired to an elegant pavilion, where a cold collation had been provided. John Cartwright, Esq., presided, supported by the Bishops of Peterborough and Lincoln, C. W. Packe, Esq., M.P., William Herrick, Esq., and Sir Frederick Heygate, Bart. The banquet was *recherché*, and the presence of the gentler sex gave an additional grace to it. The Dowager Lady Sitwell, Lady Heygate, Mrs. Packe Reading, Miss Herrick, Mrs. G. Warner, Mrs. Middleton, Mrs. Byng Paget, &c., were amongst the number. The company were ably addressed by the chairman, the two Bishops, E. C. Middleton, Esq., J. H. Eddowes, Esq., William Herrick, Esq., the Revs. Henry Fearon and Robert Bunch, and other gentlemen. Mr. Middleton's speech elicited great and deserved applause.

At three o'clock, 2500 Sunday scholars assembled in the Market-place, and, having been marshalled four abreast, proceeded—headed by Beauvoir Brock, Esq., and their teachers—to Elms Park, the beautiful seat of Henry Warner, Esq. Each school had its appropriate flag or banner. The entrance lodge was surmounted by an arch of evergreens, bearing, in floral mosaic, the word "Welcome." This was, indeed, no unmeaning word here; for not only were the hosts of juveniles regaled with tea and cake on the lawn, but the public, calculated at fifteen thousand, freely admitted and *welcomed* with an old English hospitality rarely surpassed. One hundred and four tables, each holding twenty-four, were set out for the children in front of the mansion; and, whether this large and happy group was viewed from the terrace, with the blue hills of Charnwood in the distance, or from the road, with the mansion in the background, the scene was one that the spectators will never forget. It was full of beauty to the most careless observer—full of deep and soul-stirring interest to contemplative minds.

After tea, rural games, and music, and a dance on the green, in which Sir Frederick Heygate and others of the gentry good-naturedly joined, agreeably filled up the time till night threw her sombre curtain o'er the scene, when a display of superb fireworks, by Mortram, of London, formed the *finale* of the most memorable day in the annals of Loughborough.

To the good Bishop, to the Rev. H. Fearon, to the Rev. Robert Bunch, to J. C. Middleton, Esq., to John Cartwright, Esq., to Beauvoir Brock, Esq., and to the trustees of the noble charity the thanks of thousands are justly due.

The generous owner of Elm Park will have his reward in the reflection that he has used the rare combination of the power, will, and opportunity to do good in a manner that delighted some thousand hearts. The great exertions of the inhabitants of the whole town to give *éclat* to the inauguration deserve a county's thanks. All may indulge the reasonable hope that the day will prove the dawn of a brighter and better era for Loughborough; and that not only was laid the foundation-stone of a noble charity, but that the charities and amenities of life have been greatly promoted and placed on a better foundation.

We have engraved a view of the School Buildings, as they will appear when completed. The architects are Messrs. Morris and Hebson. The style is old English, with ornamented gables, bay windows, and other picturesque features. The edifice, backed by the lovely, forest hills of Charnwood, will be a very effective scene.

The second Illustration shows one of the most interesting stages of the procession.

The trowel used upon the occasion was designed by Messrs. Morris and Hebson, and executed by Toms and Co., of Ludgate-hill. The handle is of ivory, beautifully carved; at the hilt is the figure of a merchant, *temp.* Hen. VIII., beneath an architectural canopy, in silver; and the blade, fourteen inches in length, has a Tudor border, and bears the following inscription:—

Presented by the Trustees of Burton's Charity, Loughborough, to the Right Rev George Davys, D.D., Lord Bishop of Peterborough, on the occasion of his laying the Corner-stone of the Free Grammar School Building, August 9th, 1850.

LOUGHBOROUGH.—THE NEW SCHOOL AT LOUGHBOROUGH.—THE PROCESSION.

HER MAJESTY'S THEATRE.

The tragic opera of "Norma" was performed on Tuesday for the occasion of the *début* of Claudina Fiorentini. The young *prima donna* is a native of Seville, and received her vocal education under the auspices of Signor Crivelli. We believe she made her first appearance in public last year, at Berlin, as *Norma*, and achieved a striking success, where she remained fulfilling an extensive repertory, consisting of the chief heroines in the lyric drama. She acted *Donna Anna* in "Don Giovanni," *Agathe* "Der Freischütz," *Carolina* in "Il Matrimonio Segreto," *Desdemona* in "Otello," *Amina* in "Sonnambula," *Lucrezia* in "Lucrezia Borgia," *Leonora* in "La Favorita," and *Ninetta* in "La gazza

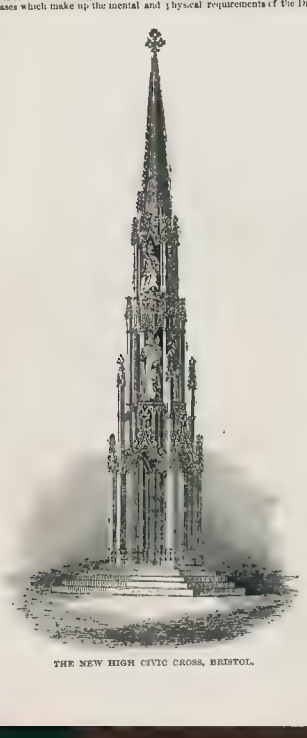
MADAME FIORENTINI, AS "NORMA."

Ladra"—a range of impersonations which argues, at all events, great industry and satisfactory proofs of her power of sustentation. At the expiration of the season, she joined the Italian *troupe* at Dresden, and subsequently created a sensation at Hamburgh, whence she came to London to essay her qualifications at Her Majesty's Theatre.

The part of *Norma* requires the loftiest powers for its due embodiment; for the actress must not only possess the grand elements of the tragedian, but all the vocal attributes in order to sustain the [illegible] of facile variety of expression, picturesque action, brilliant voice, and marked accentuation, must be united to form a perfect whole. Great *artistes*, who have illustrated the ruling creations of the lyric stage, have failed in illustrating the various and conflicting phases which make up the mental and physical requirements of the Druid priestess; for it necessitates Sidonian nobility of demeanour, the fiery energy of Rachel, and the womanly tenderness of Mrs. Charles Kean. And yet, despite these opposing elements, the *débutante*, we are bound to say, achieved a remarkable triumph. The person of Signora Fiorentini is well formed, and her face is handsome and expressive, but her action, though frequently large and striking, wants spontaneity and variety. Her voice is a high soprano, fresh and brilliant in the upper part of the register, but lacking strength and *timbre* in the medium and lower range, it is, however, sympathetic, and naturally produced; and, what is most grateful to the listener, bears no symptoms of fatigue from exertion. Thus, on Tuesday night, the difficult finale to the last act, with its deep pathos and tragic emotion, was sung with a voice as fresh and brilliant as that which interpreted the opening recitative "Sediziose voci di guerra." Her impersonation of "Norma" differs materially in conception to the received models, for there is little of the *Queen*, and none of the violences of the outraged prophetess, the jealous boundings of the insulted woman, the mighty struggles of the crushed heart, rocked to and fro on the billows of her despair. Madame Fiorentini's *Norma* is rather the gentle woman whose deep love for her Roman seducer swallows up all other feelings. Her instincts are full of love and kindliness. She has no vengeance for *Pollione*, no animosity for *Adalgisa*; all her emotions are full of womanhood; she is feminine, and plastic, and passionate; the outraged Queen and priestess is transformed into the weeping mother, the sympathising friend, and the bereaved woman. The rendering of the famous scena, "Casta Diva," was satisfactory in all respects, and was deservedly applauded; and Signora Fiorentini was called for at the conclusion. The duet with *Adelgisa*, "Alma cortanna," was delightfully sung, and Madame Giuliani gave full effect to the part, and the dramatic trio with which the act concludes was striking y interpreted. The *débutante* was thrice called before the curtain, amidst the acclamation of the house. The popular duet in the second act, "Deh! con te li prendi," was rapturously re-demanded; and the beautiful air from "Norma," "Qual cor tradisti," was given with a truthful pathos and touching tenderness. Indeed, her entire rendering of the *finale* was perfect, and fully merited the enthusiasm it excited. The *Oroveso* of Labiache may be quoted as one of the grandest portraitures the present stage can boast. It is the very incarnation of the Druidical priesthood—sublime in its massive proportions, severe in its calmness, and imposing from its apparent absence of human passions; and how fearful is the momentary outbreak of the paternal nature, when listening to the unhallowed confession of his priestess-child. It possesses all the grandest characteristics of the old Greek tragedies of Æschylus. Gardoni gave admirable effect to the Roman patrician, *Pollione*; and Mdme. Giuliano is by far the best *Adelgisa* we have seen. The chorus was magnificent, and the orchestra gave full efficiency to the noble inspirations of Bellini. The recalls before the curtain were frequent, and the *débutante* was rewarded with cheers, bouquets, and every species of popular ovation.

On Thursday night, Signora Fiorentini made her second appearance in *Donna Anna*, in the opera of "Don Giovanni," in which she fully sustained the effect produced upon the occasion of her [illegible]. The house was crowded [illegible]

MRS. GRAHAM'S BALLOON ON FIRE.—(SEE NEXT PAGE.)



THE NEW HIGH CIVIC CROSS, BRISTOL.

LARGE CAT.

This noble specimen of the Cat is domesticated at No. 175, Oxford-street. He is a beautiful y-marked Tabby, and is very docile, though his unusual large size conveys to the beholder, at first sight, a contrary impression. He weighs 22½ lb.; and measures 27 inches round the body, and 36½ inches from the tip of the tail to the end of the nose; height, 11½ inches to the top of the shoulders. The Cat has gained 7 lb. in weight within the last two years; he does not eat so much as an ordinary cat, and is extremely active, and rarely appears to be inconvenienced by his great bulk. He is seven years old, and was born in a building known as "the old Palace at Chelsea."

RESTORATION OF THE HIGH CROSS AT BRISTOL.

The foundation-stone of the new High Cross, for the city of Bristol, was laid with due ceremony on Thursday, the 8th inst. The site chosen is the place formerly occupied by the original structure, in College-green. At noon, the Right Worshipful the Mayor, J. K. Haberfield, Esq., accompanied by the Sword-bearer and other officers, the magistrates, the members of the town council, the Charity trustees of the various city institutions, the society of merchants, the committee and subscribers to the High Cross fund, and the members of the provincial, grand, and other lodges of Freemasons, attired in their appropriate costume, and wearing their customary insignia, &c., formed themselves into a procession at the council-house, and, headed by the band of the 72d Highlanders, now stationed in Bristol, passed in procession down Corn-street, Clare-street, St. Augustine's Parade, &c., to College-green, where, on the site of the old Cross, it had been determined that the new structure should be raised.

On their arrival, the Mayor officiated at the ceremony of the deposition of the first stone, which was laid amidst the acclamations of the thousands who filled every portion of the area of the green.

In the evening the Freemasons dined together, when the Mayor, the officers of the 72nd Highlanders, the principal and leading gentlemen who had taken part in the proceedings of the day, & [illegible] were entertained at a *fête*, likewise, took place at the Zoological Gardens, in honour of the event.

The noble area of the College Green was formerly adorned with a magnificent structure, ornamented by statues, and the pinnacles crowned with eight statues of the monarchs of England, viz. Henry III., John, Edward III., Henry VI., Edward IV., Elizabeth, James I., and Charles I. This erection was forty feet in height, and must have presented a very handsome and imposing appearance, standing in the middle of the large space adjoining the cathedral. The original one was erected in the year 1373, by the Corporation of the City, as a memoria of their gratitude to the reigning monarch, Edward III., for his liberality in granting a charter and privileges to the city. The Bristol High Cross for centuries was the spot at which every event of importance, whether of a national or local character, was celebrated. In consequence of the inconvenience experienced by its being placed in the centre of the city, this beautiful structure was removed in 1736 to College Green; where, after remaining a few years, it was again taken down, and presented to that venerable antiquary, Sir Richard Colt Hoare, Bart., of Stourhead, Wiltshire, who placed it in his park, where it still remains. It was to replace this interesting relic of ancient times that a number of gentlemen interested themselves in the subject, and after considerable exertion succeeded in raising a sum of money sufficient to warrant the laying of the foundation-stone

When completed, the New Cross, which will be an exact copy of the original

LARGE CAT.

and of which the above is an accurate Sketch from the model, will be an object of great interest, and present a very imposing appearance.

DESTRUCTION OF MRS. GRAHAM'S BALLOON.

On the evening of Wednesday week Mrs. Graham ascended in her balloon from Cremorne Gardens; and, after a short but tempestuous voyage, alighted in Bookers Fields, near Edmonton, where the destruction of the balloon by fire took place. The following is Mrs. Graham's own narrative of the melancholy *dénouement* of her voyage:

"I entered the car just after ten o'clock, at which time the wind had increased, and the gas, which during the period of inflation had been considerably expanded under the sun's rays, had by this time greatly condensed, in consequence of the heavy rain, which, caused an augmentation in the weight of the netting and apparatus. The consequence was, that the balloon, which, on the 29th of July, carried up five persons, would now only take myself, allowing for the weight of fireworks (75 lb.), the tackle of which was not attached by the advice of Mr. Simpson, the proprietor, he fearing that if fireworks came in contact with the trees they might become deranged, and cause some accident to myself. The result proved the correctness of his determination, as, with an ascending power of 800lb., I still scarcely cleared the trees. Continuing to ascend, I speedily lost trace of the metropolis, although I could distinctly hear the rolling of carriages beneath me, which continued about a quarter of an hour, when the sound seemed lost in distance. I now commenced descending, which I gradually did until I heard the signal of a railway train and saw the steam. But the night being extremely dark, it was impossible to form any conjecture as to my whereabouts. In a length touched the ground, and the wind still increasing, was carried over several fields, where the ground took a firm hold in a ditch; and for half an hour I continued shouting as loud as I could for help, but to purpose. Meanwhile, I kept the valve open to its full extent, rolling about all the while, the car at times completely turning over, and giving me plenty of trouble to retain my hold. At length, police constable 300 came over the fields to my assistance, and held on to the car. For at least twenty minutes I had no other help; but, at length additional assistance arrived, and I continued emptying the balloon. Upon walking from it, if the valve was open, a man undiscreetly came behind me with a light, which coming in contact with the escaping gas, instantaneously ignited, giving forth a volume of flame which resembled the come of St. Paul's on fire: the effect of the sudden combustion of from 8000 to 10,000 cubic feet of gas was terrific."

Mrs. Graham was severely scorched on the face and hands, and part of her clothing was destroyed. The balloon was a new and beautiful one, and had been fitted up at a great cost.

We learn that a subscription has been commenced with the object of indemnifying Mrs. Graham for her loss, and books for this purpose have been opened at Messrs Drummond's bank, Charing-cross; and Messrs. Roberts and Co., Lombard-street

THE THEATRES.

ROYAL ITALIAN OPERA

Halévy's grand lyric work, "La Juive," has gained immensely on the musical public since its first representation. The fifth performance, last Saturday night, created the greatest enthusiasm, and the anticipation of those numbers acquainted with the great success of this opera in France, Germany, Belgium, Holland, Italy, Russia, &c., that the school of Halévy only required to be known to insure its popularity, bids fair to be realised. It could not be presented into this country, in which art is making such rapid strides, would differ from the verdict of every other nation where the lyric drama flourishes. Eventually, the continued triumph of "La Juive," for the last fifteen years, in every part of the Continent, will be fully confirmed here. Nothing but sheer prejudice and national antipathy can account for the condemnation and under-rating of such a truly great production, in which the individuality of the composer is so strongly marked, and the characterisation of the age in which the incidents of the poem occur are so skilfully developed and depicted. The local coloring of Halévy is the remarkable peculiarity of the music he has selected the very spirit of the middle ages is echoed by the sound the varied phrases of Scribe's intensely interesting drama. The finale of the first act is strikingly original; whilst the pomp and parade of the gorgeous spectacle passes before the eye, the ear is enchanted by the most grand theme, taken up in turn by the soprano (*Rachel*) and tenor (*Lazaro*), with soul-stirring effect As sung by Viardot and Mario on Saturday, the house rang with the *furore* of the audience. The same excitement of the whole house is succeeded by the expression of Passover scene, opening the second act, another instance of the judicious imagery of Halévy. The *Cardinal's* cavatina, so finely sung by Formes, is a delicious melody, the orchestral and choral accompaniments being most masterly and clear-haunting. The lovely romances in three flats, common time, "Rachel, quand je vous vis," (in a vault), is European in popularity, and the slow movement of the grand scena "Rachel, ah quande a ce jour," is exquisitely sung by Mario, is a poetic creation worthy of any composer. The excommunicating song by Mario, is a poetic *Cardinal* in the third act was imitated by Donizetti in the "Favorita," but the awfulness of the situation is painted by Halévy in much more terrible accents. Contrast the funeral march in the last scene of "La Juive" with that of Rossini in "La Gazza Ladra," and the genius of the French composer will be at once recognized. The trio finale of the second act always provokes a storm of applause, a compliment due equally to the composition and the execution. It is but rarely in one's musical experience we hear three such artists as Viardot, Tamberlik, and Mario in such a dramatic trio. The part of *Leopoldo* certainly comes under the denomination of "cat the audience" music, but the musicianlike art, and taste of Tamberlik carry him through the disagreeable situations triumphantly. As yet, Mario's *Lazaro* rests mainly on his rich vocalisation; if he will "make up" his head differently, and give his mind to the *artistic attributes*, it may still be rendered his finest creation. Every true amateur, free from bigotry and intolerance, who aspires to be a cosmopolite in musical art, as well as in painting, ought to hear "La Juive" again and again, and on every hearing, as we have heard many of the subscribers to the theatre, justly remark, the opera will gain in estimation

The ninth representation of Meyerbeer's "Prophète" took place on Tuesday night; and for the extra night, on Thursday, this magnificent lyric work was repeated, for the tenth time; the performance having been commanded by her Majesty, who, with Prince Albert, honoured the theatre with their presence. Notwithstanding the absence of the season, Meyerbeer's masterpiece always proves [illegible] Huguenots" will be given, for the eleventh time, [illegible]

HAYMARKET.

"The Hippopotamus" is the title of a new farce produced on Monday, and acted by the Adelphi company. The humour of the piece rests almost entirely on Mr. Wright, who, as a *Mr. Tubbyneck*, a bum-and-beef shop proprietor, [illegible] which, she goes so often to see [illegible] turn out to be some huge disturber [illegible] Mr. Paul Bedford, as a colossal sergeant, *Bulbus*, indeed stands awhile for this character; but it happens that the female on the arm, though in dress very like *Mrs. Tubbyneck*, is a nurse-maid out for the day. The long, however, *Mrs. Tubbyneck* herself, in order to punish her husband for his suspicions, gets up a fracas with the sergeant, which ensues in scenes is amusing The scene concludes with a queer sort of allegorical contest between the hippopotamus and a lion, not very effective in representation. This "zoological extravaganza" was moderately successful.

NEW STRAND.

A new piece, called an "Original Originality," and entitled "Tricks and Trials, or Life as we find it in 1850," was produced on Monday, and pretends to instruct the audiences in the "designs" by which the adventurous portion of our population get on in the world. One *Bob Shuffle* (Mr. Widdicombe) begins with selling penny rings, becomes the director of a company for the supply of [illegible] milk to ships on their way to America, and concludes with an advantageous marriage. Similar fortunes attend his friends *Musgrave* (Mr. Bruce Norton), and *Tim Brickz* (Mr. W. Collier). The piece is placed on the stage with much attention to scenery and costume The curtain fall on a scene in Vauxhall Gardens, with a *bal masqué*, and a [illegible] sending balloon, containing a small ass, which excited considerable applause.

MUSIC.

SURREY.

Auber's "Marcanello" and Wallace's "Maritana" have been represented with great success. If the orchestral and choral resources of the establishment were not sufficiently strong to do justice to the above operas, the respective casts were generally efficient. Both pieces have undergone the usual pruning and clipping; and, despite of the fatigue of singing every evening in a long opera, he never scares himself, in order to do justice to the composer. Mdlle. Nau was the *Elvira* in Auber's opera—a character peculiar to her, as she has sustained it at the Grand Opera in Paris. She is a most accomplished vocalist, and is heard to the best advantage in the French school. Miss Anne Romer's *Maritana* is both charmingly acted and sung. Vincent Wallace's opera is ever fresh and attractive, [illegible] filled with melodious gems. Such compositions as "Alas! these [illegible] "Turn on, old Time," "Scenes that are brightest," "Pretty Gipsy," "Tis the harp in lonely," "There is a flower that bloometh," "It was [illegible] Knight," &c [illegible] not ephemeral productions, but are the inspirations of the [illegible] school, entitling Mr. Wallace to a place in the first rank of living lyric composers.

MUSICAL EVENTS.

—An evening concert, with Signor Pilotti and Mr. F. O. Williams as conductors, took place last Monday, at Sadler's Wells Theatre: the vocalists were Mrs. Catherine Hayes, Miss Poole, Madame Mortier, Miss Allen, Signor Bottesini, Mr. [illegible] Mr. T. Williams, and Herr Formes. Mr. T. Blagrove, concertina. Signor Piatti, violoncello; and Miss [illegible] by Mr. W. G. Rose, [illegible] their third Caledonian entertainment at Crosby Hall last Monday night. Mr. Allan Percy will give his next entertainment, for the last time this season, next Monday, at the Music Hall. [illegible] night (Friday) Mdlle. Lind was to have sung at the Liverpool Philharmonic Hall: on Monday she will sing at the same place, in Handel's "Messiah," and on Wednesday she will embark, with Benedict and Signor Belletti, for Hamburg. The concert of M. Vivier, given in the Salle de Conversation, Baden-Baden, on the 31st instant, was brilliantly attended. The Grand Duke of Baden and the principal members of his family were present, as also the King of Wurtemburg, the Duke of Nassau, and a long list of Russian, French, German, and [illegible] fashionables. The receipts, at 30f. per ticket, amounted to £1000. Mdlle. Lind was the magnet of attraction; she was in excellent voice and spirits, and sang the cavatina, "Qui la voce," from Bellini's "Puritani;" the romance, "Depuis le jour," in Normandie," from Meyerbeer's "Robert le Diable;" German melodies, by Mendelssohn and Taubert; and a cavatina from Weber's "Der Freyschütz." [illegible] was assisted by Mr. Benedict, who accompanied Mdlle. Lind, arrived specially from Stuttgardt, his native town, to perform at Vivier's concert. Mdlle. Lind sang "Idylle" and "Galop," and was much applauded. Herr [illegible] performed a long violoncello solo on themes from Rossini's "William Tell." M. Vivier played an adagio in E minor, and Benedict's fantasia on "The Gipsy's Warning," "Scenes of my Youth," besides a hunting subject in four parts, simultaneously. He was encored by the amateur for his wonderful playing.—Mdlle. Lind arrived in London, via Ostend and Dunquerque, on Monday last, and on Wednesday left town for Liverpool, accompanied by Benedict and Vivier.—Edward Loder, the composer, is writing a new opera for the Grand Ducal Theatre in Brunswick, where the work of Mr. Mitchell, the Irish musician, was so successfully produced, through the kind instrumentality of Herr Litolff. It is said that Loder's opera will be ready to commence the provincial tours of the artists will commence. Mr. Beale has [illegible] for the first week in September, Mdlle. Parodi, Mdlle. de Meric, and Signor Coletti, with which a tenor and a basso are engaged. Mdlle. Parodi will be the [illegible] Manchester, Liverpool, &c. M. Vivier will be included in this trip. In October and November, Mr. Beale is in negotiation with Miss Catherine Hayes, Herr Formes, and other artists, for a tour in Scotland and Ireland, prior to the departure of Miss Hayes for her engagement as *prima donna* at Rome.—For the concerts at Her Majesty's Theatre will commence on the [illegible] October, and [illegible] Lucca. The vocalists are [illegible] Grisi, it is stated, for the rest to Mr. Lumley for that period. Balfe is to conduct the classical music, and Musard is [illegible] the dance music. [illegible] selections will be included in the programmes.—The *Morning Post* announces that Herr Pischek has renewed his engagement at Her Majesty's Theatre for three years.—M. Jullien is organising his Promenade Concerts for next October, at Drury-Lane Theatre, on a large scale.—Mr. Edward Loder, the composer, is engaged on a new opera for the Grand Ducal Theatre at Brunswick, where the work of Mr. Mitchell, the blind musician, was so produced, owing to the kind recommendation of Herr Formes.

FOREIGN MUSICAL ITEMS.—Letters from Weimar state that the inauguration of the statue of the celebrated poet Herder will take place on the 25th inst., on which occasion there will be a musical festival, as well as in commemoration of Goethe's birthday, which falls on the 28th inst. Liszt will conduct the performances. On the 24th, Herder's "Prometheus Delivered" will be declaimed at the theatre; Liszt having composed a new overture and choruses for that piece. On the afternoon of the inauguration of the statue, Handel's "Messiah" will be performed at the cathedral church in which Herder preached, with a post-ecclesiastic was the translator of the English text of the "Messiah." Im beautiful German verse, this performance will be doubly interesting.—On the 28th, Richard Wagner's new opera "Lohengrin" will be produced, for which Dingelstadt, the famed poet of Schamyl, has written a prologue. Last members of the Goethe Committee of Berlin will attend this festival.—We learn from the Cologne correspondent of the *Athenæum* that town proposes to visit London in a body during the Exposition of Industry, and to give three concerts, the proceeds of which are to be devoted to our hospitals, and to the completion of the Cologne Cathedral. The large opera-house is to be built in Vienna, on the model of the Fenice at Venice. Herr Pokorny, Jun., has returned from the direction of the Archduke Stephen's [illegible] Pesth, and is singing at the Imperial Theatre, and proposes to pay a brief visit to London next year.—Lortzing's opera, "The Master Builders," was to be produced at Leipsic, at the same time that Lortzing's immediately after the London season, leaves for Berlin, to produce a new work at the Royal Opera Theatre.—The Grand Opera in Paris will be reopened on the 2nd of September, it is said, with Halévy's "La Juive." "Le Prophète" is [illegible] but, if the work should not be ready, with Halévy's "La Juive" for the French in *Rachel*, which [illegible] Meyerbeer's "Prophète" will be given in Italian at London.—Mdlle. Tacconi, who left the Italian stage after her marriage with Count Tasca, a distinguished poet of Italy, has been compelled, by revolutionary events in Sicily, to resume her professional career. Miss Catherine Hayes has been accepted an engagement at Naples, and Mr. Lucas Payne will be the pianist at the Italian Opera in Vienna: Miss Miran, the contralto, is singing with success at Trieste. Herr Staudigl is engaged at Frankfort. On the Continent, Jenny Lind is the most remote chance of an English opera-house in London.—Grisi and Mario are still engaged for other purposes, and our tried composers, Wallace and Edward Loder, Balfe, &c., are forced to try their fortunes abroad or starve at home.

THE ITALIAN REFUGEE FUND.—A benefit is announced for next Monday morning at Mr. Mitchell's, when Mdlle. Ilma de Murska, [illegible] Mr. Sims Reeves, Signor Belletti, Signor Piatti, Mr. Howard Glover, Mr. Benedict, Mr. Leonard Ellis, Mr. Edward Loder, Balfe, &c., are forced to try their fortunes abroad or starve at home.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

Within the last few days an improvement has been evident in the Money Market, arising from a growing demand for advances. At present, however, the discount brokers are too well supplied to make [illegible] call" probable, although the current rate of discount may be quoted at least [illegible] next hundred.

The British Market has been heavy during the week, marking a decline of about [illegible] per cent. Wednesday being settling day in Consols [illegible] dually dropped as the close of the Account approached, which, having been [illegible] to the necessity of selling to close [illegible] The Account Consols have declined about [illegible] cent., the unfavourable weather, and the German war, both operating [illegible] Consols opened at 95¾, and afterwards receded to 96¼ in consequence of [illegible] The supply of stock added to the stock of Her Majesty's Government during the week is further [illegible] per cent. on Tuesday, without any favourable reaction succeeding on Wednesday [illegible] Saturday, and things passed off quietly. [illegible] without any improvements in the quotations, the close [illegible] The following is a list of the following [illegible] Bank Stock, 212; Three per Cent. Reduced Annu., 97; [illegible] Consols Ann. [illegible] Annuities, 1859, 96¼; New 3 per Cent. Ann., 96¼; Long Ans. to expire Jan. 18 5, 8 5-16; India Bonds, £1000, 89 p. [illegible] Ann., £1000, 89 p. Consols for Account, 96¼; Exchequer Bills, £1000, June, 68 p.; £500, June, 68 p.; Small ditto.

Business has been very limited in the Foreign market during the week. Mexican showing the greatest fluctuation. Spanish by the 7th inst. [illegible] considered favourable, and the amount forwarded towards a dividend is [illegible] 30,052 52 dollars, does not promise an immediate probability of payment. Russian [illegible] Brazilian Bonds, 92¼; Danish Bonds, 82; Five per Cents., 101½; Chilian Bonds, 101; Dutch 2½ per Cent., 64; Ditto 5 per Cents., 99; Portuguese Five per Cents., 8½; Ditto, Converted, 1841, 33., Ditto, Four per Cents., 19; Russian Bonds, [illegible] and-a-Half per Cents., [illegible] panish, Five per Cents., 18½; Ditto, Three per Cents., 29¼; Spanish Bonds, Two-and-a-Quarter per Cent., 35; Dutch, Two-and-a-Half per Cents., 64; Portuguese, Four per Cent. Certificates, 89¾.

The railway market is rather [illegible] The statement of the London and North-Western Company has not improved the force of the Stock, it being [illegible] received the large balance will be required to meet the reduction in traffic and fares caused by the opening of the Great Northern line. The latter Stock remains nearly [illegible] stationary, and is not likely to improve [illegible] the returns show [illegible] extraordinary results. Prices at the close of the week were [illegible] Eastern and Oxford Junction, call- duty paid, or with a Guarantee, 27¾; Great [illegible] Wes. Valley, 6 per Cents., 164; West Somerset, and Weymouth, 42; York, Newcastle, and Berwick (Newcastle Extension), ½; Ditto, G.N.E., Preference, ½; York and North Midland, 16¾; Boulogne and Amiens, 7¾; Central of France (Orléans and Vierzon), 4¼; Luxembourg, 1¾; Namur and Liege, 4¾; Northern of France, 14¾; Rouen and Havre, 9¾.

SATURDAY MORNING.—The English market was rather more animated yesterday, Consols advancing to, and closing at 96¾ for Money, and 96¾ for Account, but there was no material alteration on the Foreign Funds. Shares were a point better

THE MARKETS.

CORN EXCHANGE (Friday). The quantity of English wheat received up to this day's market has been [illegible] the previous [illegible] and [illegible] to nearly 3000 quarters [illegible] and [illegible] the receipts of last grain from [illegible] In the middling and [illegible] qualities of [illegible] all kinds [illegible] In the middling and inferior [illegible] quarters [illegible] and a few parcels of new [illegible] condition. Upwards of 13,000 quarters of foreign wheat has [illegible] from the ports. Fine [illegible] held at full rates of currency, the amount of business doing was not large. Scarcely any English barley was brought forward, and the supply of foreign was under 6000 quarters. All descriptions were in steady request, and prices were well supported in every instance. There was rather more inquiry for malt. In the quotations, however, we have no change to notice. The aggregate supply of oats was small. Most kinds sold freely, at currencies quite equal to those of Monday. Beans, peas, and flour were quite as dear, but Indian corn was nominal

ARRIVALS.—English, wheat, 2960 qrs.; barley, 32 ...sacks, 3733; oats, 1190; flour, 2700. Foreign: wheat, 13,950 barley, 4960; oats, 8200; flour, 1600.

English.—Wheat, Essex and Kent red, 42s to 45s; ditto, white, 43s to 45s; Norfolk and Suffolk, red, 41s to 44s; ditto, white, 43s to 45s; rye, 34s to 35s; grinding barley, 19s to 21s; distilling ditto, 22s to 23s; malting ditto, 26s to 27s; Norfolk and Lincoln malt, 44s to 48s; Ware ditto, 50s to 54s; Kingston and Ware, 48s to 52s; Chevalier, 52s to 56s; Yorkshire and Lincolnshire feed oats, 16s to 17s; potato ditto, 18s to 21s; Youghal and Cork, [illegible] per [illegible] ditto, potato, 14s to 16s; tick beans, new, [illegible] per [illegible] ditto, old, 32s to 34s; maple, [illegible] per [illegible] white peas, new, [illegible] per [illegible] boilers, 36s to 40s; Suffolk, 36s to 38s; Scotch and [illegible] per [illegible] *Foreign:* Dantzig red wheat, [illegible] per [illegible] white, [illegible] per [illegible] barley, [illegible] per [illegible] Canada, [illegible] per [illegible] rye quarter. Flour, American, 21s to 22s per barrel; Canada, [illegible] per barrel.

The Seed Market.—Canary seed is still heavy, at barely last week's decline in value. All other seeds remain [illegible] New winter tares have changed hands at 5s 6d to 6s 6d per bushel. Linseed, English, sowing, 54s to 56s; Baltic, crushing, 40s to 42s; Mediterranean and Odessa, 42s. Rapeseed, 38s to 39s per quarter. Coriander, 5s to 5s per cwt. Brown mustard, 9s to 12s, white ditto, 6s to 8s. Tares, 5s to 6s per bushel. English rape-seed, new, 24l to 25l per last of 10 quarters. Linseed cakes, English, 6l to 6l 5s; ditto, foreign, £5 15s to £5 17s 6d per ton. Rapeseed cakes, 4l 5s to 4l 10s per ton. Canary, 58s to 60s per quarter. English clover-seed, red, [illegible] to [illegible] extra, [illegible] to [illegible] white, [illegible] to [illegible] extra, [illegible] to [illegible] trefoil, [illegible] to [illegible] extra, [illegible] to [illegible] per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 6½d to 7½d of household ditto, 5d to 6d per 4lb loaf

Imported Grain and Flour.—Wheat, 44s 1d; barley, 22s 8d; oats, 17s 11d; rye, 32s 8d; beans, 32s 9d; peas, 36s 10d

Average Prices of Corn.—Wheat, 42s 7d; barley, 22s 1d; oats, 17s 7d, rye, 32s 3d; beans, 27s 6d; peas, 27s 6d

Duties Payable.—Wheat, 1s; barley, 1s; oats, 1s; rye, 1s; beans, 1s; peas, 1s.

Tea.—For all kinds of tea, our market continues heavy, and prices are well supported in every instance. Common sound Congou is selling at 11½d to 1s per lb. The show of samples is extensively large.

Sugar.—Most qualities of raw sugar have met a less active inquiry this week: but we have no change to report in the general quotations. Grocers' refined lumps are steady. Brown lumps are [illegible] per cwt. crushed parcels are steady

Coffee.—The public sale of 4000 bags of native Ceylon have changed hands, at 4s per cwt. In all other kinds of coffee, only a limited business is doing

Rice.—The dealers have succeeded in advancing the quotations quite 3d per cwt: but the demand is by no means active

Provisions.—Dutch butter, the supply of which was small, is in good request, and rather dearer. Irish, [illegible] to 76s; and [illegible] to 68s per cwt. The best Irish butter moves off steadily, at very full prices, and we have more inquiry for forward shipment [illegible] Carlow, 74s to 76s; Limerick, [illegible] to [illegible] Waterford, [illegible] to [illegible] per cwt. more [illegible] Cork, [illegible] to [illegible] per cwt. Waterford [illegible] has advanced 3s per cwt., prime at 84s. Waterford landed, 80s to 82s; Limerick, 78s to 80s; Cork, 76s to 78s; Carlow, 68s to 70s per cwt.; [illegible] per cwt. Waterford blackberry

SUNDAY POSTAL COMMUNICATION.—REPORT OF THE COMMISSION.

The following is the report of the Commission on the recent Sunday postal arrangements, which was laid before the House of Commons on Tuesday last:—

TO THE LORDS COMMISSIONERS OF HER MAJESTY'S TREASURY.

My Lords,—In compliance with the instructions contained in your Lordship's letter of the 18th ult., we have carefully investigated the question referred to us, viz. "whether the amount of Sunday labour in the Post-Office might not be reduced, without completely putting an end to the collection and delivery of letters, &c., on Sundays," and we have the honour to report as follows:—

Your Lordships are aware that this question has arisen out of a change in the Post-Office arrangements, which was made by the Postmaster-General on the 23rd June last, in consequence of an assurance given by her Majesty, in answer to an address of the House of Commons, agreed to on the 30th of May last, representing the great desire which exists in all parts of the United Kingdom, for an extension of that rest on the Lord's-day which is afforded in the London Post-Office to the post-offices of the provincial towns, and praying her Majesty to direct that the collection and delivery of letters shall in future entirely cease on Sunday in all parts of the kingdom. The nature and extent of this change will be best seen by referring to the "Notice" issued by the Postmaster-General for carrying it into effect; but we may state briefly that it involved the suspension of the delivery, collection, and dispatch of letters on the Sunday, throughout the United Kingdom.

We understand that, by the reduction of Sunday labour referred to in your Lordships' instructions, is meant a reduction in the Sunday labour as it existed before the 23d of June.

Prior to that date the state of the Post-Office, as regards Sunday labour, was as follows:—During the previous two years and a half, the Postmaster-General had been engaged in carrying into effect a series of carefully considered measures, with the view "of affording to all connected with the Post-Office the utmost amount of rest on the Sunday," which, in the opinion of his Lordship, "is consistent with a due regard to public convenience."

These measures are fully described in a report to the Postmaster-General, on the 28th of Jan. last, by Mr. Rowland Hill, which has been laid before Parliament; and a statement is there given of the amount of Sunday relief which had at that time been afforded.

At the date of this report, the relief was, for the most part, confined to England and Wales; but before the address of the 30th of May, it had been extended to Ireland and Scotland, and some other important improvements, described in the same report as then in progress, had been completed.

We find that by these several measures, 8424 persons had been relieved on Sunday to an average extent of nearly six hours each; that the Sunday transmission of numerous mails had been altogether stopped; that the ordinary rule in the provincial offices was for the office to close finally (except for the receipt of despatches of certain mails) at 10 o'clock A.M.; and that the Sunday deliveries had in all cases been reduced to one; while in the London office, by a transfer of duty to two travelling corps of live clerks each, working in the railway carriages, one during Saturday night, and the other during Sunday night—the ordinary Sunday force, which was originally 27 men, and which in October last was temporarily increased to 52, had been reduced to 4, viz. 1 clerk and 3 messengers. These arrangements, we may add, tend, according to a *minimum* of letters for London itself brought in on the Sunday, are wholly inconsistent with the possibility of a Sunday delivery in London; a measure, indeed, which, as your Lordships are aware, was never contemplated.

With the view of ascertaining the effects of the late change, which first came into operation on the 23rd of June, the Postmaster-General, at our request, called for certain information from the Superintendent President of the Inland Office, and issued certain queries to the surveyors for England and Wales. These documents are given in the appendix.

While the surveyors concur generally in regarding the recent change as objectionable, they show considerable diversity of opinion on minor points, as might naturally be expected from a number of gentlemen pursuing independent inquiries, and guided by the varying circumstances and opinions of their respective districts. From this very diversity one conclusion seems obvious—viz. that it is hazardous to make a general change, such as that recently introduced, without previous inquiry into the effects which it is likely to produce in the various districts over which its operation may extend, and such modifications as the requirements of different localities may demand.

As regards the chief office in London, and the minor metropolitan offices within a radius of six miles, the change in question has left everything untouched.

As regards the provincial offices, we are enabled to state that the principal relief afforded is to the letter-carriers, more especially those serving the rural districts.

But whatever may be the amount of relief afforded to the servants of the Post-Office, there can be no doubt that it has been obtained at a great sacrifice of convenience to the public; for though, amidst the numerous communications we have received on the subject, there are many urging the continuance of the arrangement, yet, having regard to the general tenor and to the serious specific inconveniences complained of in many of them, as also to the results of our own inquiries, we have come to the conclusion that the evils attaching to the change press heavily upon a large portion of the public (not excepting the poorer classes, who cannot bear the expense of secondary communication), and have excited in many quarters a strong feeling of dissatisfaction.

Among the evils adverted to above, the following may be specified, viz. delay and inconvenience in the correspondence, arising out of the transactions of the country markets, when they fall, as they frequently do, on the Saturday; increased risk of theft or loss arising from the detention during Sunday, of money letters (many of which contain large remittances); obstacles to the insurance of vessels, with delay in the announcement of their arrivals and departures; hindrance to the detection of crime, and to the general administration of the law; delay in the transmission of information and directions respecting legal and other sorts of business; inconvenience to travellers, and delay in procuring medical aid, and in summoning friends and relatives in case of sudden illness or approaching death.

In confirmation of these views we may refer to numerous petitions to Parliament complaining of the recent change.

With respect to the extent to which these evils must exist as afforded by the following facts:—1. The number of letters arriving on the Monday morning in London has been reduced by the recent change from about 212,000 to 127,000, being a reduction of about 85,000, or 40 per cent., so that, in London alone, at least that number of letters must be delayed every week, while the number is made up by an increase on Tuesday and the following days, though probably not to the full extent. 2. The number of letters leaving London on the Saturday night is about 140,000, the greater part of which reaching their destination on the Sunday, are not delivered till Monday. Moreover, the number of letters despatched from London on Saturday night has, as was natural, been reduced by their non-delivery on Sunday. The extent of this reduction appears hitherto to have averaged nearly 15,000. 3. Whereas, previous to the recent change, the correspondence between one provincial town and another was not interrupted at all; now all the letters posted on the Sunday, the greater part of those posted on the Saturday, many posted on the Friday and even earlier, are delayed (either in despatch or delivery) throughout the United Kingdom. Taking these circumstances into account, we are of opinion that probably one-seventh of all the general post letters distributed by the Post-Office, or more than 700,000 a week, are now delayed, or altogether suppressed, in consequence of the recent change. This is exclusive of a very large number of newspapers.

The loss of these delays, and the manner in which they arise, are fully explained in an able report by Mr. William Johnson, the surveyor of the home district.

The reasons which render a complete suspension of dispatch and delivery on the Sunday expedient in London do not apply to the provinces, measure when extended to other parts of the country. Residents in London can no longer dispatch letters on Saturday night with the expectation of receiving answers on the Monday morning; while residents in the provincial towns, who previously suffered the same interruption in their correspondence with London on one day of the week, are now subjected to the additional inconvenience on the second day.

The truth, therefore, appears to be, that, unless the suspension of Post-office action on the Sunday be limited to the metropolis, it must be productive of very serious inconvenience.

It must also be remembered, that, under the old arrangement, it was possible for a resident in London to provide for the receipt or dispatch of a letter on the Sunday, by walking to the next town beyond the twelve-mile circle. This expedient, so frequently resorted to in cases of emergency, prevented the people of London from ever before feeling, in all its force, the inconveniences arising from a total suspension of dispatch.

Where the legitimate modes of conveyance are thus interrupted on every side, it is natural that other modes should be devised; and thus have arisen (as there is reason to apprehend) evasions of the law, at all events substitutional modes of conveyance, involving not only loss of revenue, but also Sunday labour in a new form. Looking further to the extensive arrangements now made for the Sunday distribution of newspapers, and to others awaiting the decision of this question, as also to the recourse now had to special messengers, and to the economy of labour in the organised arrangements of the Post-Office, we are not satisfied that the general effect of the measure would be to diminish Sunday labour.

The Sunday distribution of newspapers, referred to above, arises of course from the fact that so many of the weekly papers, whether in London or the country, are published on the Saturday. And the refusal of the Post-Office to deliver these journals as usual has been felt by both proprietors and readers as a great hardship.

For further information as to the effects of the late change, we must recur to the reports of the surveyors.

Having regard to these various reasons, we consider the concession established by the recent order not fully adequate, and therefore not to be demanded by reasons of the most cogent nature. We need not point out that the Post-Office is not the only branch of the public service in which a certain amount of Sunday labour is required; and it may be added, that the practice of delivering and dispatching letters on the Sunday in all parts of the United Kingdom except London (including Edinburgh), dates back, so far as we are aware, from the first regular establishment of a Post-Office in this kingdom; while the non-delivery of letters in London on the same day appears to have an equally early origin.

With a view, therefore, of making a reduction in the amount of Sunday labour in the Post-Office, as it existed immediately before the 23rd of June last, without completely putting an end to the collection and delivery of letters and other Post-Office packets on Sundays, we recommend the adoption of the following arrangement:—

With regard to the London Post-Office, we think that the system which was in force at the time specified, and which has not been affected by the recent order, should be continued.

With regard to the provincial Post-Offices, we recommend that a delivery of letters on the Sunday should be resumed, subject to the following restrictions, many of which have been sanctioned by the previous practice of the department:—

1. That there be only one delivery and one collection.

2. That the delivery be made at such a time as shall not interfere with the hours of Divine service, especially of morning service.

3. That this delivery be made either by letter-carriers or at the window of the Post-Office, according to the practice previously pursued on Sundays in each place. In Edinburgh, Glasgow, and most other towns of Scotland, it has been the practice to deliver letters only at the window on Sunday. The inhabitants of these towns have become habituated to the arrangement, and we do not therefore advise the discontinuance; but we do not propose the extension to other towns, where such a usage has never been introduced, because it affords less convenience and security to the public, while it affords no diminution of Sunday labour.

4. That, so far as possible, every Post-Office be closed on a Sunday at 10 A.M. for the remainder of the day, with the necessary exceptions arising from the late arrival of mails, which have heretofore existed.

5. That no money payments for inland letters be received at the Post-Office on a Sunday; and that no such letters be received except such as are stamped or unpaid.

6. That inland letters which were delivered on the Sunday morning reach their destination by 8 o'clock on Saturday night (which is the case in some of the more remote parts of the kingdom), the delivery be made the same night, instead of on the Sunday morning.

7. That where the duties are such as to prevent the rural letter-carrier from attending Divine service, an arrangement be made for performing an equivalent service on alternate Sundays. We apprehend that the additional cost incurred by this arrangement would be justified by the importance of its object.

8. That, in retaining a Sunday delivery of letters in a rural district, the Postmaster-General be guided by the prevalent feeling in the locality; and that where the prevalent feeling of the district is opposed to such delivery, the Postmaster-General, after satisfying himself of the fact, take the requisite steps for suspending it. This principle has already been acted on to a considerable extent by the department. The Postmaster-General, in the years 1848 and 1849, withdrew no less than 494 Sunday rural posts—320 wholly, and the rest partially, in consequence of the inhabitants, finding the withdrawal more inconvenient than they anticipated, subsequently requested that the post might be restored, which was accordingly done.

9. That an option be afforded to every householder to suspend the Sunday delivery of letters at his house, on his written application to the local post-office. But it will be necessary that this permission should be guarded by proper regulations of the department, in order to prevent the inconvenience which would arise from frequent changes.

10. That the arrangements already made by the Postmaster-General for the withdrawal on the Sunday of comparatively useless mails be continued upon the same principles which have been already adopted, and that they be rendered as complete as possible.

We would also recommend to the attention of the Postmaster-General the suggestions made by the surveyors, with a view to his considering hereafter how far it may be practicable to carry any of them into effect.

(Signed) CLANCARTY
H. LABOUCHERE.
G. COORNWALL LEWIS.

ADVERTISEMENTS.

MORNING READING.—ST. JAMES'S THEATRE.—Mrs. FANNY KEMBLE will, in compliance with numerous requests, give her Morning Readings from SHAKSPEARE, commencing at HALF past Two, on Thursday next, with the play of KING LEAR. Boxes and Stalls can be secured at Mr. Mitchell's, Royal Library, 33, Old Bond-street, and at the Theatre.

MR. WRIGHT'S BENEFIT.—THEATRE-ROYAL, HAYMARKET. Under the Immediate Patronage of the Right Hon. the LORD MAYOR and Mr. SHERIFF NICOLL.—Mr. WRIGHT has the honour to announce, that on the BENEFIT will take place on THURSDAY, AUGUST 22, when will be presented the last Italian Opera, for the season, IL FURIOSO, with MADAME GRISI and SIGNOR MARIO. With a variety of other Entertainments.—Private Boxes and Tickets may be had at the Box-Office, and of Mr. WRIGHT, Merton Villa, King's Parade, Chelsea.

THE ARCHITECTURAL EXHIBITION, 9, Conduit-street, 33, Pall-Mall, is now OPEN to the Public from Ten o'clock till Seven.—Admission, One Shilling.—Sec., GEORGE TRUEFITT. [illegible] JAMES K. COLLING.

N. Y. Y. Received yours GLADLY.—I am surprised again. Write again in pecuniam obedientem.

MEDICAL, INVALID, and GENERAL LIFE ASSURANCE SOCIETY, 26, Essex-street, Strand, LONDON.

ASSURED at the Lowest Premiums consistent with safety. A Bonus of Two Per cent. per Annum was added to the Premiums at the last Division of Profits. F. P. MORRIS, Actuary.

CLERICAL, MEDICAL, and GENERAL LIFE ASSURANCE SOCIETY, 3, Parliament-street, Established 1824.

NOTICE is hereby given, that the USUAL DIVIDEND of FIVE PER CENT. (less INCOME-TAX) on the paid-up Capital on the Shares of the SOCIETY, will be paid on and after Tuesday, the 20th day of August instant.

AN ACT of PARLIAMENT just obtained, enables this Society to give INTEREST to POLICIES for LIMITED LIVES: for particulars of which see the last REPORT, which can be obtained of any of the Society's Agents.

By order of the Board of Directors, J. H. PARKES, Secretary.

THE GREAT EXHIBITION OF 1851. [illegible] ILLUSTRATED LONDON NEWS IN THREE LANGUAGES.

The Proprietors of the ILLUSTRATED LONDON NEWS have the honour to announce to their readers and the public generally, that they have made arrangements for the publication of a complete, careful, and original pictorial history and Description of the GREAT EXHIBITION of the INDUSTRY of ALL NATIONS, to be held in London in 1851. During the whole period of the Exhibition, they will issue a Series of SUPPLEMENTS of THE ILLUSTRATED LONDON NEWS, containing the latest and most authentic Reports of the Proceedings and Descriptions of the various Objects of Art and Manufacture, with Illustrations designed by the most competent Artists and executed in the highest style of Wood-Engraving.

No expense will be spared to make the Pictorial Edition, in all respects worthy of the great undertaking of which it will form the Permanent Record, and to render it, as far as practicable, will be such as will at once satisfy the scientific inquirer, but place it within the reach of all classes of the room many.

[illegible] ILLUSTRATED LONDON NEWS will be bound in the ENGLISH, FRENCH, and GERMAN LANGUAGES as well as in ENGLISH.

GRANDE EXPOSITION DE 1851. [illegible] ILLUSTRATED LONDON NEWS EN TROIS LANGAGES.

Les Propriétaires de l'ILLUSTRATED LONDON NEWS ont l'honneur d'annoncer aux [illegible] qu'ils ont chargé de faire un texte complet, exact, et original, une Description et Histoire et Description de la GRANDE EXPOSITION de l'INDUSTRIE de TOUTES les NATIONS, qui se tiendra à Londres en 1851. Pendant tout le durée de l'Exposition ils publieront une série de SUPPLÉMENTS de L'ILLUSTRATED LONDON NEWS, contenant les plus complets et plus authentiques rapports des Procédés et Description des Objets de variés d'Art et de Manufacture, avec des Illustrations exécutées par les plus célèbres Artistes, et gravées avec la plus grande perfection en Gravure sur Bois.

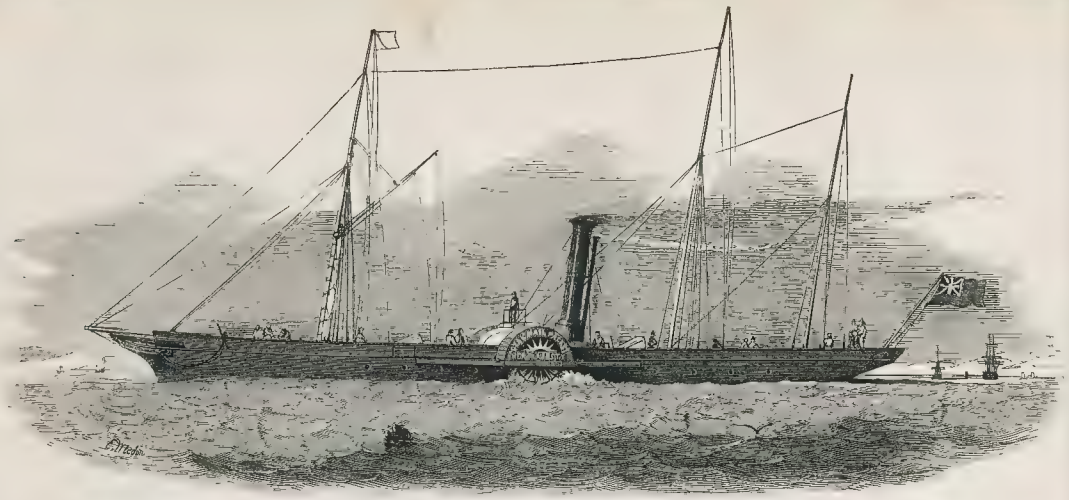
Aucune dépense ne sera épargnée pour rendre la Publication en tous points digne de la grande Exposition du Monde Entier, en la quelle elle formera un Record Permanent, et pour la mettre, autant que possible, à la portée de toutes les classes de la société.

L'ILLUSTRATED LONDON NEWS sera publié en ANGLAIS, en FRANÇAIS, et en ALLEMAND.

DIE GROSSE KUNST- und GEWERB-AUSSTELLUNG ALLER NATIONEN, in DREI SPRACHEN.

Die Eigenthümer der ILLUSTRATED LONDON NEWS haben sich entschlossen, eine [illegible] Beschreibung und Geschichte der GROSSEN KUNST- und GEWERB-AUSSTELLUNG ALLER NATIONEN, welche im Jahre 1851 in London eröffnet werden wird, zu geben. Während der ganzen Dauer dieser Ausstellung wird die ILLUSTRATED LONDON NEWS mit einer sehr von GROSSEN [illegible] Ausgaben erscheinen, welche die [illegible] Berichte und Beschreibungen der Gegenstände der Kunst und Manufactur, mit [illegible] ILLUSTRATIONEN, gezeichnet von [illegible] Künstlern und ausgeführt in [illegible] der ersten Classe, enthalten werden.

Die [illegible] der ILLUSTRATED LONDON NEWS sollen [illegible] Werk dem [illegible] Publicum, in jeder Beziehung, würdig zu machen, und [illegible] Sorgfalt und Aufmerksamkeit [illegible] Publicum [illegible] gewidmet werden



THE NEW STEAM-PACKET, "HER MAJESTY."

CHRIST CHURCH, PITSMOOR, SHEFFIELD.

THIS church has just been erected by private subscription, aided by grants from the incorporated society, and the church commissioners, to supply the spiritual wants of one of the new districts into which the parish of Sheffield has lately been divided. The building is, throughout, of the early decorated period of Gothic architecture; and, although the limited funds at the disposal of the architects did not allow of any attempt at ornamental display, great care has been taken, by judiciously disposing the masses of the building, to secure a pleasing outline, as well as a complete ecclesiastical character. It is built of dressed wall-stone, with ashlar jambs to the windows, and cleansed stone pillars between the nave and aisles. It consists of nave, north and south aisle, porch, transepts, chancel, and western tower. There are no galleries except small ones for children in the transepts and tower. The church will seat 618 adults and 224 children. Of these, all except 266 are free. The cost of the building is within a few pounds of the architects' estimate of £2000. The consecration took place on Thursday last, on which occasion the sermon was preached by His Grace the Archbishop of York. The architects are Messrs. Fockton and Son, of Sheffield.

CHRIST CHURCH, PITSMOOR, SHEFFIELD.

THE "CITY OF PARIS," STEAMER.

THIS beautiful vessel, the first sea-going steamer built at Greenwich, was launched from the premises of Messrs. W. Joyce and Co., of the Greenwich Iron-Works, on Saturday last. The *City of Paris* is an iron steam-ship, built for the Commercial Steam Navigation Company, and intended to ply with passengers and goods between London and Boulogne.

She is constructed from the design of Oliver W. Lang, Esq., and is considered an admirable specimen of the skill of that eminent naval architect.

The principal dimensions are:—

Length between the perpendiculars	165 feet
Breadth of beam	23 feet
Depth of hold	14 feet
Draught of water	6 feet 6 inches
Burthen 425 tons	

The vessel and engines are constructed by Messrs W. Joyce and Co.

The engines are of the collective power of 120 horses, and are of the direct action kind. Each piston has two rods, between which there is a recess in the piston which allows of a corresponding recess in the cylinder covers, and thereby permits the connecting rods to descend considerably lower than is practicable in the *single rod* direct action engine. The arrangement is compact and simple; and, by the cylinders being fixed, an important advantage is secured. These engines occupy less space than any other description of marine condensing engines yet known; and both engines and boilers may be taken as a fair specimen of the great reduction of space and weight effected by modern arrangements over the earlier examples of steam machinery as applied to naval purposes.

The launch took place at half-past three o'clock, when Mrs. Hopkinson, the lady of one of the proprietors, went through the usual formalities of breaking a bottle of wine against the steamer's bows, and bestowing on her the name of the *City of Paris*; the dog-shore was knocked away, and the vessel glided beautifully into the river under a salute of twenty-one guns, accompanied by the enlivening strains of a band playing the old country-dance tune, "Off she goes," and the reiterated cheers of the spectators afloat and ashore.

After the launch an excellent collation was given by Mr. Joyce to a select party.

PORTSMOUTH AND RYDE ROYAL MAIL PACKET "HER MAJESTY."

THIS beautiful little craft, built for the mail service between Portsmouth and the Isle of Wight, has just been launched from the building-yard of Messrs. Robinson and Russell, the eminent engineer of Mill Wall, Poplar. The expedition with which she has been constructed is the greatest feat in ship-building that has hitherto been accomplished; she having been laid and entirely finished in the short space of two months and seven days. The vessel is built on the wave-line principle of Mr. Scott Russell, and on Saturday week was tried in the river, in the "Long Reach," and attained, at the measured distance, a speed of nearly fifteen knots an hour, the wheels making sixty revolutions per minute, and beating with ease many of the fastest boats on the river. Her principal dimensions are as follows:—

Length between perpendiculars	193 feet
Breadth of beam	14 feet
Depth of hold	7 feet 6 inches
Draught	3 feet 9 inches
Power	40 horses
Diameter of cylinders	2 inches
Stroke	2 feet 6 inches

Report gives the command-in-chief of the Pacific to Rear Admiral the Honourable Sir Fleetwood Pellew, C.B. But this, like all previous statements on the matter, is mere report. It is a fact, however, that Rear-Admiral Prescott, C.B., superintendent of Portsmouth Dockyard, is a candidate for this command. The gallant admiral was commodore on that station for some time; and we believe that Sir Fleetwood Pellew, Rear-Admiral Moresby, C.B., and Rear-Admiral Peter John Douglas, are amongst the candidates for this lucrative appointment.

The President of Peru has issued a decree appointing the Minister of the Home Department (Don Lucas Fonseca), Don Nicolas Pierola, and Don Nicolas Rodrigo, a commission to select and take charge of articles intended to be sent to England for exhibition next year.

THE GRAND INDUSTRIAL EXHIBITION FOR 1851.

The year Eighteen hundred and Fifty will ever be memorable in the annals of civilization, as having given birth to the great idea of an industrial congress of all the nations of the world. It evidences the glorious advance of mankind in the noble paths of civilization, that this great festival of the arts of peace should have aroused an enthusiasm which, in former ages, has only followed the great triumphs of war. To his Royal Highness Prince Albert is due the truly princely merit of having taken up this noble idea, and of having worked it out, not merely by lending to it the countenance of Royalty, but also by his having devoted to it a considerable amount of personal attention. During the Season, the public attention, from the highest in the land down to the ranks of the humblest artisan, has in this country been excited, and still more signally abroad, upon the practical working of this great scheme. As it had been taken up with enthusiasm by the great commercial and manufacturing bodies, by the trades, the artisans, and especially by the public press, of course a lively animation pervaded the public on the subject. Meetings were held throughout the country. Every day brought its addition to the sum of warm approval and tangible support. The subscriptions entered into, if not sufficient to guarantee all the expenses, were far more than enough as an earnest of the public enthusiasm, and of a steady and effectual future support. All that could be done, by the spontaneous accord of a nation encouraged by the sympathy and admiration of foreign governments and communities, was done effectively. The practical arrangements were necessarily left to committees, composed of comparatively few persons. Perhaps, if there had been still fewer, the work might have been done more quickly, and with less seeming hesitation. Still, it was remarkable that all the ramifications of a great plan, to be circulated to all parts of the world, as regulations for intending contributors should have been defined and agreed upon with so much precision and so little delay. The great question of the choice of a site gave rise, we need scarcely say, to much bitter controversy. Indeed, at the time, there were those who suspected that the difficulty about the site was exaggerated, as a pretext for a future postponement, if not abandonment, of the plan. Those who calculated on such a result little understood the British character. Without entering into the merits of that controversy, we may observe that its importance became dwarfed as the real motives of the malcontents became apparent. Ultimately the Government determined on adhering to the original site in Hyde-park. In the meanwhile the building committee had advertised for plans of an appropriate structure. Artists in various countries immediately set to work; and, misled by the announcement of the committee that they contemplated a brick or stone building of a permanent character, an immense amount of ingenuity, invention, and hard labour was utterly thrown away. When the designs were publicly exhibited, it was known that the designers had worked on an erroneous basis; and although many of them combined magnificence and beauty with usefulness, and although the architects who had designed them received fair proportions of praise, all were set aside in favour of Mr. Paxton's elegant structure of iron and glass, of which we gave an Illustration a short time since. The choice of a building, the acceptance of a contract, and the actual commencement of the work, is one great fact in connexion with this undertaking, that will give additional confidence to the multitudes, in different parts of the world, who are organising their industrial armies for this great peaceful strife. Another fact, not so great, but quite as interesting to the intending exhibitors, was the choice of the prize medals. Of these, we gave Illustrations of the three principal; we now subjoin the three £50 prize medals. Mr. Hancock's design represents Britannia between Wisdom and Justice, holding a wreath over Painting, Sculpture, and Science. M. Wiener's embodies the great idea of the Exposition, in so far as Britannia is seen receiving the produce of various nations. M. Gayrard's (to our taste, by far the most poetical, as it is the simplest, of the three) consists of a single figure of Britannia holding, with half-supplicating gesture, the olive and the palm in her right hand, while her left rests on a shield. Illustrated with the combat of St. George and the Dragon.

The forthcoming Exposition has certainly been the all-engrossing topic of "the Season." But its practical interest was prospective, and did not deter the public from seeing on those other enjoyments which were spread before them with a profusion that attests the growing passion of the English for art. We begin our retrospective review with

HER MAJESTY'S THEATRE.

The reader need scarcely be reminded of the spirit of partisanship which unfortunately finds its way, in every country, into matters musical, and, more especially, the operatic. Looking back to the month prior to the commencement of the season of 1850, we can remember sinister predictions, that Mr. Lumley, no longer supported by the transcendent attraction of Jenny Lind, would be unable to open his theatre. However, these gloomy forebodings were early dissipated by the appearance of a sort of semi-official programme for the coming season, which shewed that the indefatigable *impresario* had not forgotten his old power of creating resources. A company was promised of extreme excellence in the vocal department, including Sontag, Catherine Hayes, Parodi, Lablache, Coletti, Gardoni, Calzolari, Sims Reeves, Bancardé (an untried tenor), besides expectations of the advent of Frezzolini, and a new contralto, Ida Bertrand. The instrumental department was, as usual, to be under the direction of Mr. Balfe; and the selection of operas announced indicated that a superior musical taste was to be employed in the musical direction. Above all, the subscribers and patrons of the theatre were promised a new opera, the libretto by Scribe, and the music by Halévy, the theme to be taken from Shakspeare's "Tempest." This programme, while it stimulated further curiosity, satisfied the subscribers that the lessee had not, during the recess, been inattentive to their interests.

The season opened on the 12th of March, with Mayer's "Medea," for the purpose of introducing Mdlle. Parodi in the character of which Madame Pasta, her patron, near relative, and instructress, had been so famous a representative. Parodi, by her impassioned yet classical embodiment of this very difficult part, proved that she possesses a high tragic genius, which only requires time to develop into artistic excellence and perfection. On the same evening, a new ballet—one of those poetical choregraphic creations which are due to the inventive talents of M. Paul Taglioni—entitled "Les Metamorphoses," was produced. The object of the designer was to exhibit Carlotta Grisi, the peerless and poetical queen of the dance, in a variety of different characters. He succeeded to perfection; and the extraordinary versatility of the artist as a pantomimist, and her unrivalled grace and spirituality as a dancer, aided by some splendid scenery and very beautiful, picturesque, and harmonious groupings and dances, secured for the new ballet a success which endured until the final close of the season. After the first night, Marie Taglioni added her attraction to the ballet.

After a revival of "Nino," in which Parodi exhibited her tragic powers, and a Signor Lorenzo proved himself a striking actor, and, for an amateur, a good singer, Verdi's "Ernani" was produced, to introduce Mr. Sims Reeves in the tenor part, and Parodi as the heroine. The accomplished English tenor received a welcome which effectually contradicted all the rumours that there had been a cabal to crush him, and that no English artist has any chance of success on an Italian theatre.

On the 23rd of March an agreeable surprise awaited the audience; a new dancer, of the first order as an executive artist, emerged from the horizon, and at once took her place as a "star." Mdlle. Amalia Ferraris had been a favourite in Italy and at Vienna, but here she was a stranger. In an occasional *pas* she developed such extraordinary *aplomb* and precision of movement as raised her at once to the first rank, although it is still uncertain, whether as a pantomimist and as an artist in the sense of the term as applied to so peerless a creature as Carlotta, she will assert an equal superiority. At present it would seem that this young lady's merit consists more in a supreme excellence in the more mechanical part of the choregraphic art.

The 2nd of April was signalized by the *début* of Catherine Hayes as *Lucia*, to the *Edgardo* of Reeves. Miss Hayes gave a highly intelligent and touching impersonation, and her advance in vocal power as well as finish astonished even her admirers. Reeves was already known as an impassioned and tender *Edgardo*.

For the *rentrée* of Madame Sontag, on the 4th of April, "Don Pasquale" was selected; the accomplished and fascinating vocalist achieving a renewed triumph in the part of *Norina*, while Lablache was welcomed as a friend on his *rentrée* as the old *Don*. After revivals of the "Barbiere" and "Giovanni," which exhibited triumphantly the vocal force of the company, Verdi's "I Lombardi" was produced, for the

GREAT EXHIBITION OF 1851.—PRIZE MEDALS (£50 EACH.)

purpose of introducing Bancardé, the new tenor, who came to us heralded by puffs or praises. In ten minutes from his entrance on the stage the richness, sweetness, power, tenderness, and compass of his voice, and the purity of his style as a vocalist, were recognised, and his reception was most brilliant. In other parts, in which he subsequently appeared, Signor Bancardé advanced in favour; but, as the season advanced, it became evident that he was falling into an indolence and apathy that must be fatal to his reputation. His performance was so unequal, that the *habitués* always went to the theatre in fear, lest their anticipated enjoyment should be spoiled by a *fiasco*. This was the more provoking, because, in some selections given from "Guglielmo Tell," Bancardé sang in a style to lead to the very highest expectations.

Madame Sontag appeared from time to time, and always with increasing *éclat*, in the "Nozze di Figaro," the "Sonnambula," "Linda di Chamouni," and "I Puritani." In the "Linda," the part of *Pierotto* was sustained by Mdlle. Ida Bertrand, a mezzo-soprano singer with some good contralto notes, who developed great cultivation and finish as a singer, with much originality and ability as an actress. She promised to prove an acquisition; and this expectation was justified by her *Orsini* in "Lucrezia Borgia," which produced a powerful effect. In the drinking song she obtained a double encore. This opera introduced Madame Frezzolini, after an absence of some years. Her impersonation of *Lucrezia* was original and highly artistic. She at once took her position here in the

first rank, as she had long done elsewhere. Her next character, *Adina* in the "Elisir d'Amore," attested her versatility, and exhibited as much comic, as in her *Lucrezia* had shown tragic, power. In the part of *Lucia*, assumed suddenly on the illness of Miss Hayes, she made quite a "hit."

We now come to the great and distinguishing event of the season—the production of "La Tempesta." To have broken down the custom, by bringing out a new opera first in England, was a great merit in Mr Lumley. As he had been disappointed in his expectation of obtaining the music for this opera from Meudelssohn, he turned to Halévy, and the town witnessed, early in June, the spectacle of the most fertile and popular composer, alike in serious and comic opera, and the most distinguished dramatist of the age employed together on the production of an opera for an English audience, and founded on one of the masterpieces of the great English dramatist and poet. No expense had been spared by Mr. Lumley. The opera was "got up" in a style of extraordinary magnificence. The cast included Grisi, Lablache, Coletti, Bosworth, Charlotte Grisi, Perozzi, Lucia Vestris, and Giubilei. The success of this opera, on the first night, was triumphant. We need not here analyse either the plot or the music which was both are too fresh in the reader's mind to require it. It may be to record alone—and, by so recording it, to do it honour, such Overture of Lablache, as one of the finest, if not the most perfect characters in the whole range of the lyrical drama. The success of this work carried on the theatre to the close of the season. Mr. Lumley yet achieved one more success, in the original and piquant performance of Madame Sontag in the "Figlia del Reggimento," which (we can say it without exaggeration) rivalled that of Jenny Lind. Before the season finally closed, however, the indefatigable lessee engaged Madame Fiorentini, the celebrated singer, for two representations.

We should not omit to mention, that a ballet-divertissement, entitled "Les Graces," introduced Carlotta Grisi, Ferraris, and Marie Taglioni—all unrivalled in brilliancy the far-famed "Pas de Quatre."

One event which will render the past season ever memorable in operatic annals, was the re-appearance, for one night only, of the venerable Madame Pasta, who, at the risk of provoking short-sighted critics from superficial observation to say, to use a musical phrase, of the present day such idea as her decay of powers would allow, of an unapproachable grandeur of style in lyric tragedy, and a method of vocalisation of which now, unhappily—except, perhaps, in Viardot—we have no example. Madame Pasta was greeted with a passionate and respectful enthusiasm.

ROYAL ITALIAN OPERA.

The disastrous termination of Mr. Delafield's connexion with the Royal Italian Opera had led to a very general impression that that establishment would not again be opened. It was soon manifest that, after such losses had been experienced by more than one speculator, there was no probability that any monied man would be induced to undertake the sole responsibility of becoming Director. The performances, however, had been of so satisfactory a character, and so high a character of musical illustration had been attained, that the possible closing of the theatre was regarded not merely as a severe deprivation to the artists, but also as a calamity to art. An immense sum of money, too, had been expended, of which the benefit would have been lost had the theatre closed. To avoid all risk, nothing of the original outlay which had converted the old Covent-Garden Theatre into so magnificent a temple of the lyric drama, there had also been a large expenditure in the purchase of the scores of no fewer than 28 operas, and in the scenery, costumes, and decorations necessary for their perfect production. Under these circumstances, it was resolved to attempt to carry the season through, on what is called the sharing principle. An arrangement was made by which, out of the nightly receipts, all salaries under a given amount were to be paid, and all above that amount as of the theatre. The surplus, if any, was to be equally among the principals and contracting parties, in proportion to the salaries nominally allotted to them. In pursuance of this plan, the programme of the season was prepared; and it was a remarkable fact, as contradicting adverse rumours, that this theatre, supposed to be *in extremis*, anticipated Her Majesty's Theatre in the splendid and detailed announcement of its plan of campaign. Besides the 28 operas that had already found favour, a Royal Ballet, played, the directors added a list of eight operas, new to the English stage, of which [illegible] was the most [illegible]. Another feature, too, in the programme was the promised repetition of Meyerbeer's "Prophète," of which the performances, at the close of the previous season, might be termed but strength, so much had the public engaged was enormous, not merely in the array of great names, but also in the high artistic merits of the singers. Among the *soprani* announced were Grisi, Viardot, Castellan, and Vera, *contralti*, De Meric and D'Orolski; tenors, Mario, Maralti (a new-comer), and Tamberlik (also a new-comer); baritones, Lablache, Ronconi, and Polonini; basses, Formes, Zelger, Tagliafico. The orchestra remained substantially as before; the musical arrangements were to be under the direction of Signor Costa, and the general management was confided to M. Jullien.

The opening of the season, on Saturday, the 16th March, was rendered auspicious by the presence of her Majesty, with Prince Albert, the Prince of Wales, and the Princess Royal. Weber's "Der Freyschütz, with Italian recitative, ascribed to Berlioz, but really written by Costa, was the opening opera. Familiar as the public were with the music, in one shape or other, no more beautiful or often the first perfect performance of the opera in London, and the utmost interest was felt. The result was a decided success. The fine romantic music was rendered by the orchestra with a delicacy, purity, and elastic spirit such as it had perhaps never received before. The vocal cast was very good. First and foremost, in every respect was the Caspar of Formes, the German bass, who, at some performances of a German *troupe* in London, had proved himself a fine impressive actor, with both comic and tragic powers of a high order, and a singer with a voice unrivalled for massiveness and depth, if wanting some of the rich mellowness of his great predecessor, Staudigl. Formes took his position at once; and, in spite of some intrigues and harsh adverse hyper criticism, he retained it triumphantly to the close of the season, in every variety of part he was cast on to play. Madame Castellan made her first appearance in this opera in the character of the heroine, singing the music with much force and execution, but occasionally forgetting the simplicity of the German style in sundry Italianized cadences and variations. The new tenor, Maralti, made a most favourable *début* in the tenor part. The opera was, as a whole, well got up; but there was a little too much of the more vulgar and commonplace stage effect in the Incantation scene. Her Majesty marked her evident satisfaction by visiting the theatre two nights in succession to witness this *chef d'œuvre*.

After Easter, Auber's "Masaniello," which, on account of its magnificent embodiment in every feature that marks the speciality of the Grand Opera, had proved one of the most successful hits of the previous season, was revived, with a sufficient alteration in the cast to impart to it novelty. The great feature of the revival was the highly successful *début* of the new tenor, Signor Tamberlik, who proved himself an artist of the first order, both as a singer and as an actor. His voice is of that rich and manly character which attains great power without detriment to sweetness and purity of tone. It was at first supposed that an inveterate habit of falling into the *tremolo* would permanently detract from the great qualities of this singer. A few performances served to abate, if not entirely to remove, this unfortunate habit. Madame Castellan replaced Doras Grisi as *Elvira*, and Madame Cotti, from the St. James's, took the part of Madame Bellon. Madame Vestris as *Mathieu* [illegible] Leroux, showed much pathos and grace in her pantomime as *Fenella*.

The *reprise* of Grisi and Mario took place on the 9th or April, in "La reine Borgia." They received a tremendous ovation. Madame D'Orolski failed in the part of *Orsini*. On the following Thursday her Majesty and Prince Albert witnessed "Norma," in which Tamberlik raised the part of *Polito* once more to the first rank. The *Oroveso* of Formes was also a hit. Like most of this artist's assumptions, it was at once a new and a strikingly true conception, investing the character with a more defined poetry than if had yet received.

Mdlle. de Meric, a young lady who had been engaged as the principal contralto, made her first appearance for the season on Saturday, the 13th of April. This artist has an organ soft, sweet, and sympathetic, rather than powerful. Her performances are rather a promise of future excellence than in themselves sufficient to replace those of Alboni, or even of Angri. Still, she made great way during the season.

The *Leporello* of Formes, a conception true to the Spanish character of Mozart's "Don Giovanni," completed most satisfactorily the great cast of that opera on this stage, comprising Grisi, Mario, Castellan, and Tamburini, as well as Mdlle Vera, Tagliafico, and Polonini. This proved one of the most attractive performances of the season.

Rossini's "Mosè in Egitto" had never been performed in its original form in this country. In 1822, a dramatic version, under the title of "Pietro l'Eremita," had been played at Her Majesty's Theatre, and one or two attempts made to introduce the music at oratorios. The religious feeling of the public, or, at all events, of the authorities, stood in the way of a full dramatic performance; and the conductors of the Royal Italian Opera, in their desire to avoid all offence, were compelled to have recourse to the subterfuge of changing the scene of the opera, changing the names of the characters, turning the Israelites into Bactrians, and thus avoiding the direct religious application of the incidents. The new name given to the piece was "Zora." The cast included Tamburini, Tamberlik, Zelger, Tagliafico, Castellan, and Vera. The revival presented a double attraction, in the magnificent dramatic music and in the splendid mounting. The *finale* to the third act was next in interest, if not equal, to the great acts of Meyerbeer's most popular operas. The scenes throughout, were powerful, including the quintet and chorus "Nume possente," the duo "Parlar spiegar," and the rondo "Mi manca la voce," and the *finale* of the third act, already mentioned. In thus producing, even by the aid of a pious fraud, Rossini's *chef d'œuvre* with such unprecedented excellence, the conductors of this theatre have added to the great services to the cause of lyrical tragedy.

The revival of the "Huguenots," with Grisi in place of Viardot as *Valentine*, and De Meric in the contralto part, aided materially in the peculiary prosperity of the season; as did also the reproduction of "Roberto il Diavolo" (with Tamberlik as *Roberto*, and Formes as *Bertram*), and, finally, the revival of the "Prophète."

Ronconi's new and original version of the *Fedesta* in the "Gazza Ladra" gave an additional interest to the revival of that opera, which took place on the 18th June, Grisi sustaining the part of *Ninetta*, in which, seventeen years before, she made her *début* in England. Mdlle. De Meric made a very interesting *Pippo*.

After the revival of the "Sonnambula," what had been calculated upon as the event of the season, the production of "La Juive," took place. We have so very recently given an elaborate description of this performance, that we need not now repeat our remarks. The object of the management appeared to be, to produce a spectacle of unrivalled magnificence. In this they succeeded beyond all question. The experiment was interesting, inasmuch as it afforded a test of the state of musical taste in this country. The opera does not appear to have "drawn" in proportion to the effort made, by which we infer that the London musical public are already too far advanced for such tactics.

THE FRENCH OPERA COMIQUE.

Mr. Mitchell, the enterprising manager of the St. James's Theatre, renewed, at the commencement of the past season, his effort to naturalise in this country the French comic opera. Such an undertaking implied much hazard, and it could only succeed under a management of judgment, spirit, and liberality. Mr. Mitchell's arrangements were, on the whole, characterised by all these requisites. The season commenced on Monday the 7th of January, auspiciously, with Halévy's "Val d'Andorre," its first production in this country. The opera had a run of one hundred nights when produced in Paris. Of course, we could not expect here all the completeness, in every detail, of the French Opéra Comique; but the piece was produced in a very satisfactory manner, entering into the details of the plot, it is sufficient to remind our readers of its resemblance to that of "La Gazza Ladra," and our own "Maid and the Magpie." Mdlle. Charton—a very pretty woman, a fascinating actress, and a singer of more than ordinary accomplishment—had, during the previous season, established herself as a prime favourite with the audience attending the French Opera. Her invaluable services were retained by Mr. Mitchell, and she made her *entrée* as *Rose de Mai* in the new opera. It was part of Mr. Mitchell's plan to bring over, from time to time, such distinguished singers as could be spared from the French Opera Comique, who for one season had held the first place in Paris, now made his bow before an English audience. No longer in point of *physique* so charming a singer as he once had been, time could not touch his merit as an artist; and his execution of the music (especially the *chanson militaire* in the third act) was a triumph of vocal skill over failing powers. His acting, too, was in the highest style of finished comedy. Mdlle. Guichard, an established favourite here, resumed her position. Mdlle. Cotti, a new-comer, exhibited vocal powers which led to her subsequent engagement at the Royal Italian Opera. Other new-comers—Messrs. Nathan, Lack, and Leroy were only moderately successful. The chorus, it was noticed, was not so good as it might easily have been made; but, on the other hand, the orchestra, under the experienced direction of Hanssens, was fully adequate to rendering the music.

The "Val d'Andorre" was speedily followed by the production of Hérold's "Zampa," in which Caolet played his original character. Mdlle. Charton was the heroine; and two excellent comedians, Chateaufort and Soyer, helped, by their drollery, to the success of the opera.

The next novelty was the "Caid," of Ambroise Thomas, a clever musical satire, or caricature. It belongs to a class of compositions of which we have had no example in the operatic form. The plot is artfully put together, to afford scope for situations which burlesque those in serious and comic opera; and the music is a kind of satirical caricature on Gretry, Auber, Halévy, of the French school, and Cimarosa, Rossini, and Verdi, of the Italian. The retinued audience of this theatre soon perceived the true character of the entertainment, and relished it accordingly. The opera became one of the most popular of the series.

The next novelty was Adolphe Adam's comic opera, "Le Roi d'Yvetot," of which the plot is founded on Beranger's capital song. Chollet's racy humour, in the old part of the King of Yvetot, of which he was the original representative, was well supported by the other characters; and the light, sparkling music of Adam helped to make this pleasant little piece an attraction, as long as the arrangements of the programme allowed of its being performed.

Adolphe Adam's "Postillon de Longjumeau" was one of the most successful productions of the series.

The [illegible] "Le Lac de Constance," said to be the music by Vonderdoes, but believed to be the work of the King of Holland, was produced with success, Mdlle. Charton adding to her triumphs by her touching and delicate impersonation of the slave. On the same evening Auber's comic opera of "Le Magon" was produced, for the first time. It contains some of this charming composer's light music, and, although a slight affair, it served most agreeably to diversify the series. The season terminated at the close of the same week, with the "Crown Diamonds." Mr. Mitchell deserved and obtained much praise for the spirit and energy displayed in his arrangements. It is at all times difficult to collect together in London Parisian artists of a superior order, who are necessarily engaged at the Paris theatres, or elsewhere. In his engagements Mr. Mitchell was sufficiently fortunate, although, with the exception of Charton, he was unfortunate with his tenors. The most prominent part of his arrangements was the chorus. Here there could be no excuse for inferiority, because there are so many competent singers employed by the different Royal and [illegible] Mr. Mitchell deserves credit. We are not able to say whether the speculation was successful in a pecuniary point of view. The theatre is to be reopened for dramatic performances, and continued open until August. A notice of these performances will be found under the head of "The Drama."

PRINCESS'.

Scarcely had Halévy's "Val d'Andorre" been produced at the St. James's, when the lessee of this theatre brought out an English adaptation. The piece was fortunately entrusted to the company, and the result was successful. Miss Louisa Pyne, a young vocalist, who had recently made a most successful *début*, undertook the part played at the other theatre by Mdlle. Charton, to which she was quite equal. The other characters were filled by Messrs. Harrison, Allen, Weiss, G. Barker, Mdlle. Nau, and Mrs. Weiss. The opera was well mounted, and the instrumental execution reflected credit on the band, under Mr. E. J. Loder.

A version of Auber's "Gustavus the Third," brought out at this theatre early in April, attested the ambition of the manager, and exposed the poverty of his resources. The performance had the merit of giving the music as nearly as possible in its complete shape; but the instrumental and choral strength of the theatre were wholly inadequate to even a decent rendering. The scenery was sufficiently splendid. In the ball scene, an innovation, which ought not to be made a precedent, allowed visitors who paid certain prices to enter on the stage.

Signor Schira, about the merits of whose opera, "Mina," there had been considerable controversy, offered a new specimen of his talent at this theatre, at the end of April, in the shape of an opera founded upon the popular old drama "Therese; or, the Orphan of Geneva." A tolerably good libretto, somewhat overlaid with incidents, assisted the appreciation of the music, which was essentially dramatic, and more interfused with melody than is usual with modern composers. If not original, the music was essentially pleasing, and it had the merit of being without pretension. Enough ability was shown by the composer, to prove, that, with a more efficient operatic force, he is capable of affording the public much entertainment. Mr. Allen sustained the tenor part; and Miss Louisa Pyne that of the heroine. These two vocalists, the only members of Mr. Maddox's operatic company, if we except Mr. Weiss, having the slightest pretensions as artists, contributed mainly to the success of the opera.

CONCERTS.

THE PHILHARMONIC CONCERTS.

The concerts given by the Philharmonic Society excite much interest among musical amateurs, but afford little scope for a review or summary of the kind we are presenting to our readers. It is in the performance of great orchestral works that this society is pre eminent; and there can be no doubt that, since Mr. Costa has had the direction of the band, it has arrived at an unprecedented excellence. During the past season the programme included almost all the great symphonies and overtures, which were executed to admiration. The vocal part of the concert was not, as usual, so successful; but some of our engagements were satisfactory. The instrumental solos, also, were not always confided to artists of the first water. Still, as a whole, the society maintained its reputation as an exclusive body for the performance of first-class instrumental music at the highest possible prices. From time to time detailed notices of the concerts have been given in this Journal.

GRAND CONCERTS AT HER MAJESTY'S THEATRE.

One of the marked features of the season was the giving of a series of grand classical musical entertainments in the *salle* of Her Majesty's Theatre, supported by the whole vocal and instrumental resources of the theatre, with additional aid, from time to time, from without as, for instance, in the persons of Thalberg, Ernst, Mdlle. Charton, and others. We cannot go into any analysis of these concerts. It is enough to say that the musical taste and the good taste of Mr. Balfe were pre-eminently shown in the selections made, which combined a vast number of works not too familiar, and which were calculated to conduce to the instruction of the public by producing examples of composition not often heard. In the performance of the vocal and instrumental works, symphonies, &c., the band gave promise of a high excellence should they be hereafter sufficiently drilled and exercised. As we have already said, the whole vocal and instrumental resources of the theatre were engaged in this series of concerts, which proved remarkably successful, and went far to uphold the prestige of the theatre.

The annual concert of Benedict, the composer and pianist, was this year given in the *salle* of Her Majesty's Theatre, and we therefore include it in the series of the morning concerts. Benedict's personal merits and popularity always secure him a large audience at his concerts; on this occasion, Lablache, Mdlle. Lucy Escott

tunity to the musical amateur of hearing some of the finest compositions in chamber music executed by the most accomplished and distinguished artists. One of the features of the season was the production of Mendelssohn's posthumous Quartet, a composition of wild and touching beauty, in which the genius of the composer, stimulated by deep sorrow and retrospective affection, poured out the treasures of his art and feeling. The instrumental character of these meetings may be inferred from the list of performers engaged. It is headed by Ernst, the prince of violinists: after him come Sainton, Alard, Deloffre, Goffrie, and Watson. On the viola we had Hill, Mellon, and Gotrie; on the violoncello, Piatti—also a prince—Pilet, Hekking; on the contra-basso, Howell; clarionet, Lazarus; bassoon, Baumann; horn, Jarrett; and piano, Miss Loder, Sterndale Bennett, Silas (of whom more must be heard); and last, though by no means least in this list of distinguished executants, Hallé and Hallé. The next year will collect in London amateurs from all parts of the world; and it may safely be predicted, that no musical performance in this metropolis will prove more interesting or more satisfactory than that afforded by the Musical Union.

SACRED HARMONIC SOCIETY.

Although not signalised by the introduction of much novelty, the past season of this society witnessed the revival of several works, which, either from the length of time that had elapsed since their previous performance, or the different circumstances under which they were now presented, had acquired all the freshness of new productions. The season commenced in November, with the revival of Handel's "Solomon." This was followed by the customary Christmas performance of the "Messiah." The new year opened with Mendelssohn's "Hymn," which introduced Miss Catherine Hayes and Herr Reichardt to the concerts of the Society. The first and second performances attended by Mendelssohn's brother, who expressed himself highly gratified at the manner in which the work was performed. Haydn's "Stabat Mater"—a work long neglected by the Society—was the next revival, and turned out to be one of the most dramatic and effective in the society's *repertoire*. It was performed from Handel's score, without extra accompaniment. Haydn's "Creation" was the next performance; and this was followed, by a concert containing three works of modern composers, viz. Haydn's Third or Imperial Mass, Mendelssohn's "Lauda Sion," and Spohr's "Last Judgment." This concert proved one of the most brilliant meeting of the season. Following up these performances came the "Messiah" and "Israel in Egypt." The season was an unusually successful one.

LONDON SACRED HARMONIC SOCIETY.

This offshoot of the Sacred Harmonic Society, and under the superintendence of Mr. Surman, has given a series of grand choral and instrumental performances during the Season. The oratorios selected have been generally the same as those of the rival undertaking, and the same singers and members of the same chorus were often employed at either society. The question of superiority lay in the relative merits of the *ensemble*.

ST. MARTIN'S HALL.

We have elsewhere mentioned the concerts given by Mr. Willy, the Society of British Musicians, and others at St. Martin's Hall. The past season, however, saw also the inauguration of the building for the sacred purposes to which it is destined. The grand hall professes to rival Exeter Hall as a place for the giving of concerts on a grand scale, the holding of meetings, &c.; and, under the management of Mr. Hullah, to whom the erection of the building is due, several grand performances of sacred and general choral music were given during the season; one of which was signalized by the production of Mr. Leslie's "Festival Anthem," a composition of singular merit, from which much future excellence is predicted for the young composer.

LONDON WEDNESDAY CONCERTS.

One of the most popular, if not the most excellent, among the musical performances of the season, was the series known as the London Wednesday Concerts. Accepted with favour by the press and the public when first started, these concerts soon disappointed a reasonable expectation, that they might be made subservient to the highest cultivation, as well as the amusement, of the pleasure seeking public. The programmes, however, were too often arranged on the mere *ad captandum* principle; and the conductors appeared to be satisfied if they could draw a crowded audience by attractions of a temporary kind, forgetting that, for permanent success, a musical character was essential. The consequence of this system of management was, that the *prestige* of the undertaking gradually died away; and, although high-spirited efforts were made—for instance, by the engagement of Ernst, Piatti, and other celebrities—these concerts suddenly came to an end, at the time to which, in the ordinary course and under a more discriminating management, they might have been protracted.

SERIAL CONCERTS.

Mr Willy's Classical Chamber Concerts.—One of the most interesting events of the musical season was the attempt of Mr. Willy to popularise Classical Chamber Music. The experiment was hazardous; because, although audiences of the wealthier classes regularly attended Classical Chamber Concerts when given on the "select" principle, and at high prices, it was doubtful whether the refined kind of music would attract a more general audience. The result proved that the musical taste of the multitude had been much ameliorated by Mr. Willy's undertaking, which proved a decided success. Mr. Willy's concerts were given in St. Martin's Hall, Long-acre. He commenced with a series of six, given on the Monday evenings. The programmes combined selections from the best chamber music of Haydn, Mozart, Beethoven, Mendelssohn, and other composers. The executants were Mr. Willy himself, Piatti (the great violoncello player), Messrs. Hill, Zerbini, Wesiake, Morf, Bradley, Webb, Wrade, Day, Reed, Gardner, Calken, Pratten, Mount, and Giles. Mr. Sterndale Bennett lent his powerful aid at the pianoforte, and the result was a series of performances of chamber music which would have shed lustre on any concert-room. The prices were such as to afford facility to every class of musical amateurs. We should not omit to mention that the vocalists were varied by vocal music, executed by Miss Dolby, Miss Ellen Lyon, Mr. W. H. Seguin, &c. Mr. Land presided at the pianoforte. The success of this undertaking, on a comparatively small scale, emboldened Mr. Willy to attempt a series of vocal and instrumental concerts. He proposed to give them at the Philharmonic Society's concerts. He engaged Miss Dolby, and several vocalists. The Misses Williams, Miss Dolby, and Miss Lucombe. This undertaking was not so successful. In the former one Mr. Willy had his means under his control; but, in order to fill a larger area by the attraction of more ambitious performances, it was necessary that the music, more especially the instrumental, should be of the first order of excellence. This was not the case with the symphonies and other orchestral works attempted by Mr. Willy; and the undertaking fell to the ground without having decided the question whether the general public are ready for a Philharmonic Society giving first-class entertainments at low prices.

Society of British Musicians.—The desire to popularise good chamber music led the Society of British Musicians into the field with a series of six Chamber Concerts, given in St. Martin's Hall on the 20th January and the succeeding Saturdays. The plan comprised the performance of quartets, quintets, and other instrumental pieces fit for the concert-room. The principal executants were the Blagroves, Mr. W. L. Phillips, Messrs. Severn, Watson, W. Dorrell, Churton, Nicholson, Lazarus, Larkin, and C. Harper, and Miss Rose Loder. There were vocal selections, sustained, from time to time, by Mr. Lockey, Miss Thornton, and other singers. Mr. C. E. Horsley was the director, and Mr. C. Cooke the pianoforte accompanyist. These concerts proved sufficiently successful.

Classical Pianoforte Music.—Among the features of novelty in the past musical season, may be mentioned, as being of some value and importance, an undertaking by M. Alexandre Billet, a pianoforte [illegible], from Russia. Pianoforte music is, of course, in[illegible]ss in all concerts of any pretension to the term "classical;" and of late years the executive skill of performers of eminence, Liszt, Thalberg, Dreyschock, and others, has attracted crowds. But the musical public had not been afforded the means, in any collective form, of judging of the merits of the different composers for this peculiar instrument. M. Billet saw that there was an opening for such an entertainment, more especially in London, where a degree of skill on the pianoforte is attained by the female members of almost every family of respectability; and he projected a series of concerts, to consist of selections from the works of all the great composers for the pianoforte. These, arranged in the order of time, constituted a sort of history of that class of composition, illustrated by examples. M. Billet, as a player of the classical school, was quite at home in most of the selections. He avoided the romantic and more extravagant class of *fantasias*, which can only receive justice from players of an extraordinary description of talent. He was assisted from time to time by W. Blagrove, Rousselot, Deloffre, and other instrumentalists. The original announcement projected a series of three concerts; but they obtained so striking a success, that they were afterwards extended.

Mr. Lucas's Musical Evenings.—Mr. Lucas, the violoncello player, gave his usual series of musical evenings for classical chamber music. He was assisted by Sainton, Blagrove, Hill, and Dorrell.

Heir Molique, the violinist and composer, gave, during the season, a series of concerts, at the Hanover-square Rooms, commencing early in March. The programmes comprised instrumental chamber music, inclusive of Molique's own compositions, and vocal music. The executants were Sterndale Bennett, Piatti, Molique, Hausman, Mellon, and Carodus, as instrumentalists; and the Misses Williams, Dolby, Molique, and Schloss, as vocalists.

Mr. Sterndale Bennett's Pianoforte Concerts commenced on the 11th February, and the series proved as successful as usual. Unlike the more comprehensive scheme of M. Billet, the plan of Mr. Sterndale Bennett is confined to selections of the most choice works of the eminently classical masters; and his essential classical style of playing, so pure, so delicate, yet firm in touch, and so faultless in expression, peculiarly fits him to be the interpreter of such works. We need scarcely remind our readers that Mr. Sterndale Bennett is also a composer for the pianoforte, of rare merit—one whose works are already recognised as "standard" by musical amateurs, wherever music is cultivated as a science. In his opening concert, Mr. Bennett received the powerful aid of Ernst; and the junction of two men of such excellence afforded a rare enjoyment to the lovers of classical music. Mr. Bennett also played, with his pupil, Mr. Cusins, some of his own pianoforte pieces. The other concerts of the series were equally interesting and successful.

Mr. G. A. Osborne's Matinées.—This gentleman, able as a composer for the pianoforte, and an executant of admitted pretensions, gave a series of *matinées* during the season, at the Beethoven Rooms, in Harley-street. The programmes presented good selections of the best instrumental chamber music, to which were added some of Mr. Osborne's own most popular compositions. In the execution of these pieces, Mr. Osborne received the powerful aid of Ernst and Piatti. Vocal music relieved the programme. It was executed by competent artists, among whom Miss Catherine Hayes was prominent. A sister of Mr. Osborne, Mrs. Hampton, produced a favourable impression, especially in Lover's Irish songs.

Mr. Henry Wylde, the pianist, gave a series of *matinées musicales*, at Willis's Rooms. Some of Mr. Wylde's own pleasing compositions were played by himself and Ernst.

The Meetings of the Beethoven Quartett Society for the present season were rendered unusually interesting from the fact of Ernst having, in order to revive the *prestige* of these entertainments, become the permanent leader in the quartetts. The other artists were Cooper, Hill, and Rousselot; and an additional interest was lent to the first concert by the participation of Stephen Heller, the composer and pianoforte-player, so highly esteemed in the musical world, and too little known to the public. Without following the Society through the series of performances, we may mention that the selections were invariably excellent, and that, during the whole musical season, there were no performances that gave more unqualified pleasure.

THE DRAMA.

DRURY-LANE THEATRE.

The announcement that Mr. James Anderson, formerly a favourite actor in the romantic line of the first-rate drama, had taken Drury-lane Theatre for three years, with a view to making one more effort to restore the legitimate drama, had attracted more than ordinary interest. Although Mr. Anderson had not engaged any first-rate tragic actor, he had given it out as his intention to encourage dramatic talent wherever it could be found. His list of performers included Mr. and Miss Vandenhoff, Mrs. Glover, Mrs. Nisbett, Miss Laura Addison, and Mr. Vining, among established London actors; together with several provincial artists hitherto unknown in London. Amongst these the most prominent was Mr. Basil Baker, who, for many years, had been the chief comedian of the Liverpool and Manchester theatres.

Considering the peculiar circumstances under which Mr. Anderson had entered on his undertaking, the public were prepared to give him credit for the best intentions, and not to be too critical as to the quality of the entertainments until he should have had the opportunity of making selections of artists as their engagements fell out elsewhere. For this reason the opening performance of the "Merchant of Venice" was dealt with very tenderly. The Christmas pantomime, produced, according to custom, on Boxing Night, proved a decided hit. As it was known to have been got up in extreme haste, its excellence and completeness were the more remarkable. In obedience to the mocking spirit of the time, Mr. Rodwell, the writer of the pantomime, took the salient points of Queen Elizabeth's history for his theme, inclusive of the love of Leicester for Amy Robsart. The introductory part was a burlesque, full of broad and extravagant humour, but all sustained by a good-humoured humour. The vixenish vagaries of the maiden Queen with her various lovers, and her amorous preference for Leicester, were hit off with irresistible comicality, and a provoking truthfulness to the secret history and court gossip of the day. The audience, by the keen relish of their enjoyment, seemed conscious that there was amid all this foolling a little more than the mere desire to raise a broad laugh; and it was the cleverness with which the historical points were hit off that made this pantomime so successful, and ensured for it a run that covered for a long time the utter failure of Mr. Anderson in his more "legitimate" undertaking. Mr. Anderson had engaged, in one batch, a set of pantomimists from Cremorne Gardens. Mr. Poulin, the principal of these, sustained the character of *Leicester* with a force of burlesque humour and pantomimic agility that recalled the former performances of Mr. W. H. Payne. The harlequinade was of average merit. These portions of pantomime have for many years degenerated into the broad humour of the days of Grimaldi into mere posture making and athletic display. Mr. Anderson's pantomime was no exception to the rule.

After a series of performances of standard dramatic works, in which his mediocrity of Mr. Anderson's general company was made painfully manifest—as well as his own unwise determination to assume the principal parts—he made an effort at novelty on a grand scale, by producing "Faso," of Schiller—a drama on [illegible] accounts, [illegible] to attract an English audience. The original had been [illegible] greatly compressed and adapted by Mr. Planché; and [illegible] that material—scenery, costumes, and general mounting—could contribute towards it [illegible], was provided by Mr. Anderson. The cast of the play included the strength such as it was—of the company. Mr. Anderson undertook the part of the hero, though his physical and mental qualifications did not favour the assumption; Mr. Vandenhoff was the stern old Republican, *Verina*, a part which he made the most true and prominent in the play; and Miss Laura Addison and Miss Vandenhoff sustained the principal female characters. The play took quite flat on the first night; but the care with which the critics of the morning papers pointed out the merits that had escaped the first audience led to a more favourable reception when the play was repeated; and it afterwards had a brief run. It served, however, as a final proof of Mr. Anderson's unfitness for the responsible and difficult position he had assumed. The run of the pantomime had by this time subsided, and the theatre was left to depend upon its purely histrionic resources. These proved utterly inadequate to attract audiences. At Easter, one of the old-fashioned spectacle pieces, got up with much [illegible], failed to restore matters as regarded the treasury; and very shortly after, in spite of some spasmodic attempts to stimulate public patronage, the theatre closed. Mr. Anderson, in a farewell address, sought to attribute his failure to almost every cause but the real one. He complained of neglect on the part of the public, as though it were a moral duty in them to flock to one particular theatre, and be wearied by the performances of second and third-rate actors; he accused the press of unkowarmness, when the writers had commenced by giving him credit for the best intentions, and had continued their prospective favour long after it had become apparent to the public in general that it was misplaced. Mr. Anderson had forgotten the great strides made of late years by the public taste. He had engaged a company composed (with one or two exceptions) of actors and actresses who had passed away from the scene, or of provincials of inadequate talent. He persisted in playing himself the principal tragic, and some of the principal comedy parts; and the public, with every desire actively to patronize the drama, soon saw the necessity of awaiting some more meritorious embodiment of its great attraction than was presented by this unfortunate undertaking. The feeling in favour of such an enterprise remains as strong as ever; and if Mr. Anderson, who is understood to be the lessee of the theatre, should resolve to renew his attempt, it is to be hoped that he will profit by the experience he has so dearly purchased.

HAYMARKET.

One of the chief attractions of this theatre during the season was the performance of Mr. and Mrs. C. Kean. They made their first appearance on Monday the 10th of December, in the "Wife" secret.

The first novelty in which they appeared was an original drama in three acts, by Mr. Mark Lemon. It was entitled "The Loving Woman," and was extremely well adapted for the display of Mrs. Kean's power of portraying the nobler sentiments of the female heart. The plot was somewhat far fetched, but not untrue to nature. The scene was laid in Prague, where *Otillia* (the "loving woman") had been reared as the ward of *Wildfort*, a miser. She is enamoured of *Rosen* (Mr. C. Kean), whom she is about to marry. *Wildfort* insists on her fortune being settled on herself. *Rosen* is deeply in debt, and *Wildfort* buys up all the claims, in order that he may, at the moment of the bridal ceremony, seize on all his possessions, and disgrace him before his bride. He brings with him a ragged beggar (Mr. Wallack), whom he installs as master. The effect upon the "loving woman" defeats the miser's calculations. Her love augments with her lover's suffering, and the use she makes of the settlement on herself is to offer all her means to her husband, with whom she returns into comparative poverty. *Rosen*, however, soon chafes under this position of dependance; he becomes morose, and finally jealous. It is agreed that they shall be divorced; but the marriage settlement is no sooner cancelled than the "loving woman" again offers herself to her husband. This devotion conquers him, and the piece terminates with the discovery that the beggar is, in fact, the father of *Rosen*, who had been persecuted to utter destitution by the artifices of *Wildfort*. The exaggerated sentiment and improbable incidents of this piece would have rendered it a failure, but for the beautiful acting of Mrs. Kean as the "loving woman," and Mr. Wallack's grand Salvator-like impersonation of the part of the beggar.

On the following evening, the Keans appeared in the Hon. Edmund Phipps's adaptation of Henrick Herz's dramatic poem, "King René's Daughter." A short time before, another version of the same piece, made by "Bon Gaultier," had been produced at the Strand Theatre, Mrs. Stirling in the part of *Iolanthe*. Much interest was excited among play-goers to compare these two artists.

The Christmas novelty at this theatre was a grand extravaganza, by the Messrs. Brough, entitled "The Ninth Statue; or, the Jewels and the Gem." It was founded on one of the "Arabian Nights" tales. The jokes—sometimes too broad, but always humorous, in which these writers are so fertile—formed, of course, the staple of the [illegible], which was sustained by the Imperial Bland, Miss Kathleen Wi[illegible]lliam (a young lady who is rapidly improving both as a vocalist and actress), Miss C. Horton, Mr. Maynard (a clever low comedian, now deceased), and the general staff of the theatre. The extravaganza, which was well put on the stage, was received, and has subsequently had a fair average run.

A farce, in three acts, called a comedy, written by Mr. Buckstone the actor, was produced on the 15th January. It was called "Leap Year," and its humour turned on the traditional right of ladies to propose to the gentlemen in that year. Without noticing in detail the humours of the subordinate characters, it is sufficient to say that the main interest of the piece turned upon the very hazardous device of making a lady fall in love with her footman, who is only discovered to be a gentleman in disguise after his mistress has abandoned to break through all restraint, even that imposed by his own parental respect, and propose marriage to him. This dangerous incident was rendered harmless in its effect on the spectators' mind, only by the admirable delicacy and tact with which Mr. and Mrs. Kean acted their several parts. The piece was successful, and had a run.

A tribute was paid, during the season, to the merits of Mr. Douglas Jerrold as a dramatist, by the revival of some of his most successful pieces. The vitality of true dramatic talent was exhibited in the renewed favour with which these pieces were received, coming, as they did, upon audiences with all the freshness of novelty.

The Easter piece was by the Brothers Brough. It was a burlesque of Sir Walter Scott's "Ivanhoe," treated with the breadth and humour that have characterised the comic writings of these gentlemen. This piece had the merit of not being a mere travestie, the burlesque characters being twisted into relation with some social peculiarities of the present time, and made the vehicle for some smart allusions to passing events. The Keeleys, Bland, Selby, Mrs. Fitzwilliam, and Miss P. Horton contributed their several specialities of comicality; and the piece, besides being received with roars of laughter on Easter Monday, continued for a long time to amuse audiences not so easily pleased.

The announcement of a new comedy by Mr. Douglas Jerrold was an event sure to command attention. In fact, the most lively expectations had been formed of the result. Those expectations were only partially realised. In all Mr. Jerrold's dramatic works there had been manifested a tendency to make construction, and occasionally even the development of character, subordinate to that gentleman's unrivalled powers of writing brilliant dialogue and biting sarcasm. In this new work [illegible] to an extent [illegible] that the [illegible] the title, "The Catspaw," suggested expectations that another character would be hewn out, and placed in the dramatic sculpture gallery. This expectation was not realised; *Mr. Snowball*, the so-called "Catspaw," having been only the temporary dupe of a number of aimless and commonplace intrigues, resulting not in his being made a "catspaw," but in his own emancipation from his fictitious troubles. The dialogue made up, however, for the want of artistic plot and probable character. Although not of so high an order as some that have come from the pen of this accomplished writer, it exhibited a series of sprightly sallies and *ad captandum* jokes, which kept the audience alive with merriment, even after what little interest there was in the action of the piece had ceased, at the close of the third act. The comedy was played for a considerable time during the season.

LYCEUM.

Our task in noticing the "season" at this theatre will be agreeable enough, from the unusual fact of one successful piece having been produced at the theatre from its first production, at Christmas, until the theatre long after midsummer. What made this success the more remarkable was its having been due not merely to one piece, but to one of that piece; a proof that the playgoing public can appreciate beautiful with cordiality, when it is put before them. The piece was called the "Island of Jewels." It was constructed by Mr. Planché, with something less than his usual tact, but it was still sufficiently amusing. There were parts in it for Madame Vestris, Miss Julia St. George (a sprightly dashing actress, who will one day be a favourite), Mr. Frank Matthews, &c. A little incidental ballet, recalling the stage dancing of a century ago, and entitled "Cupid and Psyche," was very beautifully arranged, but the great [illegible] piece was the last [illegible] of the artist, Mr. Beverley, [illegible] failed for its combination of construction [illegible] ing pain

"AMOLLIAH."—PAINTED BY E. ARMITAGE.

for the [illegible] struck out in a new field [illegible] producing a revival [illegible], to invest with a [illegible] burlesque and modern [illegible] plication, of the [illegible] *Cymon*, [illegible] Mr. [illegible] Mr. [illegible] Mr. [illegible] [illegible] [illegible]

and singing his *patter* songs with incredible volubility. The characters in the drama proper were all habited in the formal and antiquated costume of the last century, and Mr. Planché, who has an eye for the poetical and the beautiful, even when trifling with the spirit of burlesque, seized the opportunity to introduce some pretty dances and groupings that were like living embodiments of Watteau's pictures. This burlesque was successful, but the "Island of Jewels" still continued the chief attraction, even until the final close of the season, with the exception of a piece produced at Whitsuntide, intended as a *revue* on the French model, and satirizing, by anticipation, the great Exposition of 1851. It was written by Mr. Tom Taylor and Mr Albert Smith.

MISS FREDERIKA BREMER

OLYMPIC.

Contemporaneously with the experiment of Mr Anderson, at Drury Lane, a similar attempt was made in the new Olympic Theatre, which had been very rapidly rebuilt on the site of the old one, destroyed by fire. The lessee of the Marylebone Theatre, had taken the new structure, for which he had created a company, including some of the best performers then available. In addition to an American lady, Mrs Mowatt, whose personal beauty and general ability as an actress had attracted attention at the Marylebone Theatre, there were on the list Mr. Compton, the original and truly comedian; Mr. G. V. Brooke, the tragedian; Mr. Wigan, an able actor in small parts requiring finish of detail; Mr. Ryder, Mr. John Herbert, Mr. Holl, Miss F. Vining, Mrs. H. Marston, &c. The theatre had been decorated with much elegance, and the season commenced, under favourable auspices, with Shakspeare's "Two Gentlemen of Verona," preceded by an opening address, which was spoken by Mrs. Mowatt. A pantomime was produced, entitled "Laugh and Grow Fat, or Harlequin Nutcrackers." It was concocted *apropos* the festivities of the Christmas season; but, although the talents of Mr. T. Matthews were engaged as *Clown*, the piece was not very successful. In effect, it proved an inauspicious commencement of an unfortunate season.

Mrs. Mowatt, the American actress above mentioned, had already solicited the suffrages of the public at the Marylebone Theatre, as an authoress as well as actress, soon after the opening of the Olympic Theatre, her comedy entitled "Fashion, or Life in New York," which had been played with success in the different cities of the Union, was brought out with a very effective cast and with good mounting. This play was professedly a satire on American manners, and was, therefore, to be criticised not with the severity due in the case of an original comedy written for the English stage. Its merits as a drama were very slight, the characters being, for the most part, coarse exaggerations of familiar English dramatic types, and the dialogue deficient in point or refinement. It had accorded to it a brief success, more because it was a curiosity, than on account of any intrinsic merit.

A version of Corneille's "Ariane," poetically turned by Mr. John Oxenford, was the next novelty at this theatre. It introduced Mrs. Mowatt in a character which was decidedly her best, developing a facility for declamation and the expression of pathos in which she is not excelled by any British actress. Miss F. Vining, also, in the character of *Phædra*, displayed a passionate earnestness in the only opening afforded by the part. The tragedy was beautifully mounted, and proved decidedly successful.

Two farces were produced during the same week, the first, by Mr. Holl, unsuccessful; the second, by Mr. A. Wigan, entitled "A Dead Take-in" with

On the 4th of February Mr. Gustavus Brooke re-appeared in London, in the character of *Othello*, in which his *début* at the old Olympic Theatre had created so great a sensation. A crowded audience, including most of the literary and critical celebrities of the day, awarded him a warm and encouraging welcome. Want of novelty was not among the errors of the management of this theatre. The engagement of Mr. Brooke afforded occasion, not merely for his appearance in Shakspearian characters, but in a tragedy written by Mr. G. H. Lewes, a novelist and general *litterateur* of eminence, which was produced on the 18th February. The title, "The Noble Heart," was a key to an index to the plot, which turns on the unconscious love of a Castilian noble for the betrothed of his son, ending with a discovery and recognition of his son's rights. The play was deficient in dramatic force and constructive skill; but these shortcomings were compensated for by a highly poetical dialogue. The acting served to prove that Mr. Brooke could grasp a masterly conception of a new character; and Mrs. Mowatt, by her performance of the heroine, augmented the repute she had gained by her *Ariane*

ILLUMINATION SATURDAY AT ETON.—REGATTA AND FIREWORKS.

The theatre soon after suddenly closed, in consequence of defalcations by the manager.

ST. JAMES'S.—THE DRAMATIC SEASON.

After Easter, Mr. Mitchell commenced his ordinary season of French plays, opening in splendid style with Scribe's *chef d'œuvre*, "Bertrand et Raton." We can do little more than mention the names of the various works produced, and of the distinguished artists whom Mr Mitchell collected together in this brilliant series of performances. To do more would call for a description and analysis which would exceed the limits of this cursory review. The chief attraction of the opening play was the *Bertrand* of Monsieur Samson, by whom the part was originally performed when the play was produced, in 1833. The next pieces were "L'Ecole des Vieillards" and "Les Projets de Mariage," in which Mdlle. Denain added her attraction to that of M. Samson.

The comedy "Un Veuvage" presented M. Samson in his double character of author and actor. Written in verse, this comedy, with a certain classicality of style, nevertheless admits of much character. M. Samson's impersonation of the unfortunate widower, who strives in vain to escape from his female pursuers, was the perfection of polished humour.

The production of Emile Augier's comedy, "Gabrielle," proved a great attraction. A singular evidence of the abnormal state of manners in this country and in France was afforded by the fact, that this play, written professedly with a moral and didactic intention for France, should exhibit such a machinery and such arguments for the purpose as could not be accepted by an English audience, except with a knowledge that such had been the author's intention. Not that there was anything objectionable in either—but that a state of morals and manners is assumed as the basis of operations of which we, in England, have no conception. The moral turns on the rescue of a young wife, by the forbearance and magnanimity of her husband, from an impending infidelity. Regnier, who had been added to the company, exhibited his accomplished art in the part of the husband; and Mdlle. Nathalie displayed much truthful feeling as the wife.

Following the performance of his "Louison," came M. de Musset's *proverbe* "Il faut qu'une Porte soit Ouverte ou Fermée," in which the exquisite acting of M. Lafont in *Le Comte*, and Mdlle. Nathalie in *La Marquise*, was conspicuous.

The French season, which had congregated a brilliant galaxy of histrionic talent, was brought to a close towards the end of June.

The next month opened with a great treat for those who sympathise with genius of the highest order. Rachel, the *tragédienne par excellence*, had been engaged by Mr. Mitchell for a series of twelve performances, the first of which took place on the 1st of July. If we had not already, in the course of those performances, expressed in detail our profound admiration of the genius of this great artist, we could here renew the impressions of delight which, night after night, rewarded us for the toilsome task of the critic in recording the surfeiting pleasures of a long season of amusements. Time, it is true, has somewhat touched, though slightly, the personal charms, and attenuated the *physique* of Rachel, but her marvellous inspiration remains as ever; and, perhaps, in the whole course of her career, she has not more triumphantly asserted her tragic power than in some of the characters which were revived on her reappearance, as "Phèdre," "Roxane," "Camille," and in the last scene of the "Polyeucte" (in which she had not hitherto played in England) all her transcendant powers were exerted in embodying her unique and perfect conceptions. She also appeared in her last new character *Adrienne Lecouvreur*, in the five act play of that name. We need not renew impressions of a performance so recent.

After the departure of Rachel, Mrs. Fanny Kemble (Mrs. Butler) commenced a series of Shakspearean readings, which proved highly successful.

THE ADELPHI.

The Christmas piece here was "Frankenstein; or, the Model Man," one of those "extravaganzas" conceived in that spirit of mockery and burlesque, of all things, however awful or beautiful, which we regret to see becoming the fashion with playwrights and playgoers. The character of the piece may be inferred from the cast of the two principal persons; Mr. Wright being the *Frankenstein*, and Mr. Paul Bedford the *Monster*. This burlesque, which was boldly carried at the capacity of an Adelphi audience, had the usual run of success.

A farce, of the regular Adelphi species, was produced here on the 18th February, which ran for a considerable time, and much helped towards the sum of hilarity during the season. It was called "My Precious Betsy," a title alone enough to tickle an Adelphi audience, especially when the names of Wright and Paul Bedford were in the cast. The humours of the former, as a tradesman suddenly made rich, and afterwards as a husband tormented by causeless jealousy, formed the staple attraction of this piece.

The management of this theatre did not exhibit, during the past season, so much activity as usual; perhaps because the pieces produced proved sufficiently attractive. About the middle of March a two-act drama, by Mr. Douglas Jerrold, originally played at the Haymarket as "The Mother," was revived. The piece afforded scope for Mdme Celeste, and it was temporarily successful.

The ever fertile invention of the French dramatists furnished the groundwork of the Easter piece at this theatre, which was entitled, "Playing First Fiddle, or Follow my Leader." Mdme. Celeste, as a quick-witted young French scullion, who, having a musical gift, exercises all sorts of influence by means of his clever violin playing, succeeded with her accustomed tact the chief weight of the piece, in which also was well supported by Miss Woolgar, a kindred spirit who made had made a baker's boy. A part was also found for Miss Kathleen Fitzwilliam, whose charming singing contributed, in no slight measure, to the success of the piece.

"The White Sergeants; or, the Buttermilk Volunteers," is a title which may suggest to those of those regular Adelphi pieces, in which a coterie of young ladies, with very small waists, tremendous hips, and an instinctive horror of powder and shot, are permitted to assume the military attire, for the purpose first of annoying, and then of making up with their respective swains or husbands. The young ladies succeeded, as did the piece.

The next novelty was a characteristic Adelphi farce, called "Jack-in-the-Green." The fun mainly centres in Mr. Wright, who, as *Bob Bryanstone*, an individual, in the "coal and tater line," has visions of his supposed high birth thrust before him; tries, with confign ill-success, his hand at fashion and good-breeding; and, in the end, repentantly seeks re-admission to those ranks in which fate and the Heralds' College had evidently cast his lot.

A species of burlesque of the ballet of "Esmeralda," from the pen of Mr. Albert Smith, was shortly after produced with success. A melodrama, entitled "The Emigré's Daughter," by Mr. Bayle Bernard, embodying a story of domestic suffering during the French Revolution, was not successful in proportion to the amount of talent and care bestowed by the author. Pieces of this class require to be dashed off with breadth and force. Delicacy and *finesse* are utterly thrown away on audiences who go to the theatre for excitement, and would not be content if they could. Shortly after the production of this piece the theatre closed for the season; but the company played for a brief period at the Haymarket Theatre, whilst the Adelphi was being renovated.

STRAND THEATRE.

Mr. William Farren's management of this theatre received an accession of strength by the engagement of Mrs. Glover, who, on Monday, the 12th November, made her first appearance in the part of *Mrs. Heidelberg*, in the "Clandestine Marriage." She met with a most enthusiastic reception, during a series of performances with which, by her talent and reputation, she filled this little theatre until her final retirement. Mr. Farren, whose *Lord Ogleby* has lost but little of its artistic finish, made a brief address to the audience at the close of the performances, in which he feelingly alluded to the return of Mrs. Glover. It is not often that so accomplished and a dramatist as Mr. Oxenford commits himself to a failure; but his new farce, produced the same evening, called "A Family Party," was decidedly unsuccessful. Mrs. Glover's next character was *Mrs. Candour*, to the *Sir Peter Teazle* of Mr. Farren; and she afterwards played in "She Stoops to Conquer," "The Poor Gentleman," &c.

A successful attempt at a higher style of burlesque than that lately popular at theatres of more pretension, was rewarded with deserved success when produced at this little band-box of a theatre at Christmas. Mr. Tom Taylor had dished up a series of what may, by contrast, be termed witticisms, intermingled with no small amount of poetry and character in a piece which he entitled "Diogenes and his Lantern." The search of the cynic for an honest man gave scope for much good-natured yet pungent satire, and the dialogue was written in a style far superior to the average productions of the hour. The *strength* of this choice and well-compacted little company was employed in the acting.

A dramatic version of the "Vicar of Wakefield," with the principal characters sustained by Mr. Farren and Mrs. Glover, had proved a great attraction at this theatre, so much so, that at Easter the manager only found it necessary to revive a comedietta, by Mr. Mark Lemon, entitled "His First Champagne."

Novelties succeeded each other rapidly at this little theatre. Among them was a one-act piece, embodying a tale of domestic life, entitled "Poor Cousin Walter." It was from the pen of Mr. Palgrave Simpson, and showed constructive talent both in dialogue.

Close upon the heels of this last came another little piece—a capital farce—by Mr. J. M. Morton. *Friend Waggles*, personated by Mr. Compton, sufficiently [illegible] the comedy [illegible].

Shortly after was brought out a [illegible] called "Not to be Done," in which Mr. Leigh Murray was the principal performer—appearing in the double character of a drunken cobbler and snuffy old woman—two metamorphoses with which it is intended to "do" one *Jonas Downright* (Mr. H. Farren), who, however, sees through the disguises, and is "Not to be Done."

The success of "Diogenes" prompted Mr. Tom Taylor to produce "Whitsun Morality," conceived in a similar spirit, and called the "Philosopher's Stone." It takes the notorious quack physician Paracelsus as the agent of all sorts of satire on modern mammonism, and paints a moral somewhat similar to that in the concluding scenes of Faust, by showing that too much wealth leads to much misery.

On the 10th, a successful adaptation from Schiller's "Kabal und Liebe," from the pen of Mr. Morris Barnett, was produced. Nothing could be more unpresentable or unacceptable than the drama as written by Schiller. Mr. Morris Barnett did not so much adapt it, as that he founded a new work upon it; in this successfully following up a method, which, because it implies a considerable amount of invention, will, if continued, relieve our contemporary playwrights from a great portion of the odium and contempt justly visited on their wholesale robberies from the French.

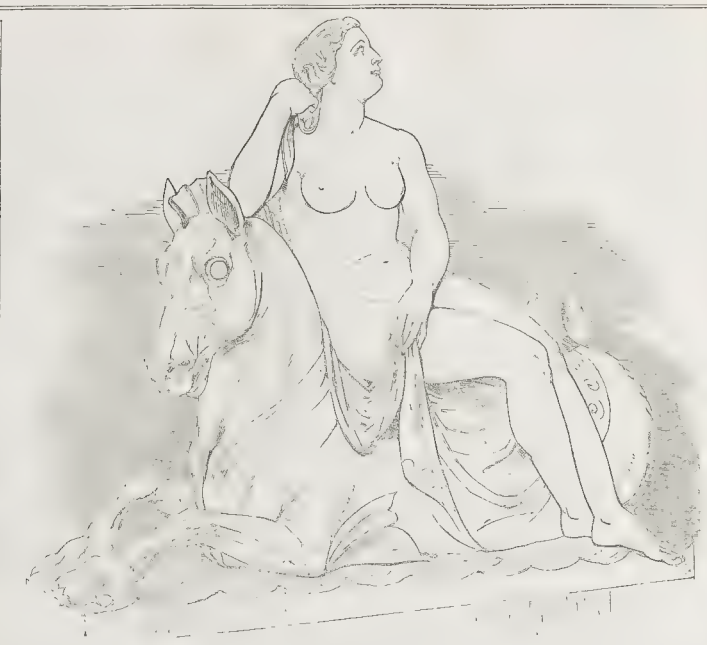
One event of the season was of a peculiarly painful character. Mrs. Glover, after upwards of fifty years spent upon the stage, during the greater part of which she had been one of its chief ornaments and supports, at last retired. Mrs. Glover took leave of the stage, on the 8th of June, in the character of *Mrs. Malaprop*, at this theatre. Her farewell benefit took place on the 12th of July, when the universal respect in which she was held was best attested by the presence, in Drury-Lane Theatre, of the most crowded audience its walls had contained during many years. The most distinguished members of the dramatic profession volunteered their services on the occasion; and an entertainment was given, full of the best talent the country could afford. Still, all interest—and it proved a melancholy one—centred in the aged lady who was about to retire. Mrs. Glover had been confined to her bed for many days by a wasting illness. She was earnestly entreated not to appear on the occasion of her benefit; but her desire not to disappoint the public overruled all prudential considerations. She came upon the stage, and, as a matter of form, went through her part; but, at the close, she was so utterly exhausted as to be unable to deliver the farewell address which had been prepared. Four days after, the public were deeply grieved to hear that this accomplished *artiste* was no more.

SADLER'S WELLS.

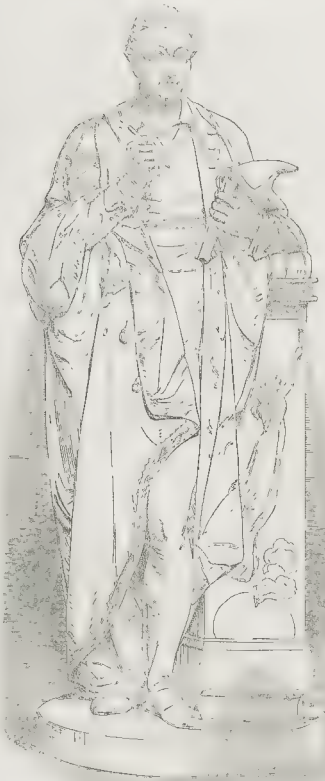
After a series of those excellent performances of the legitimate drama which have procured for this theatre a special reputation, the management produced, on the 11th of February, a five act play, of which the author was Mr. George Bennett, the popular actor. The plot and incidents of this play are certainly melodramatic, to use the common term applied to what is, more strictly speaking, the romantic drama. The scene is laid in the time of the Civil War, and a deep domestic interest in the underplot is skilfully interwoven with the usual struggle between rival partizans, and heightened by the villainy of the principal characters. These were sustained with great vigour and strong colouring by Mr. Bennett himself, and Mr. Phelps, the manager. As a literary work, this play is highly creditable to Mr. George Bennett, manifesting as it does considerable constructive skill, knowledge of stage effect, and a respectable amount of good poetical writing in the dialogue. Dramas of this class are better suited to the visitors of the minor theatres than more classical works, and we hope to find Mr. George Bennett again employing his ability and professional knowledge in the same direction.

DRAMATIC AND MUSICAL MONOLOGUES.

Mr. Bunn, the veteran manager, who knows, perhaps, more about things theatrical than any other man of his own time, gave at the St. James's, at the close of February, and several evenings in March, a lecture or monologue, entitled "Mr. Bunn on the Stage." Public curiosity was piqued, in the expectation of piquant anecdotes of actors, actresses, and matters dramatic. Mr. Bunn's lecture proved to be something different, but withal very amusing. The first part was devoted to the vindication of Shakspeare from the commentators, actors, and critics—a task performed by Mr. Bunn with great vivacity and humour, setting off no slight amount of reading and knowledge. The second part, which treated of a history of the stage, from the "revival" to the present time, was interspersed with matters of more personal and less historical interest. Mr. Bunn proved himself



MODEL OF AMPHITRITE.—BY J. THOMAS.



MARBLE STATUE OF THE POET CAMPBELL, BY W. C. M. MARSHALL, A.R.A., TO BE PLACED IN WESTMINSTER ABBEY.

an accomplished elocutionist in his delivery of quoted passages, and in his "story-telling" fully sustained his reputation as a humorous *raconteur*. The attempt was successful; and Mr. Bunn, besides "running" the entertainment a sufficient number of nights here, obtained various provincial engagements for its repetition.

Mr. Albert Smith's "Overland Mail."—Under this title Mr. Albert Smith gave a narrative reminiscence of his recent journey to the East. Such of his experiences as he had not exhausted in his very interesting book upon the subject of his flying visit to the East, he threw into the form of a musical and dramatic monologue, and the result was a highly amusing and not uninstructive entertainment, illustrated by some very beautiful panoramic views, and interspersed with some singing, in the style which makes Mr. Albert Smith so popular in private society.

Mr. John Parry commenced, on the 24th June, at the Music-hall, in Store-street, our entertainment in the same strain as those which have already made him so popular as the most original and versatile successor of Matthews. As in his former monologues, music furnished a large share in the amusement derived from this entertainment; but its peculiar characteristic was, that it satirised, in very happy vein, some of the social absurdities generated in the growing taste for music.

THE WINDSOR THEATRICALS.

Her Majesty, following the example of some of her predecessors having desired to give an impulse to the drama by a decided manifestation of her sanction and interest, a plan was projected of a series of dramatic performances at Windsor Castle; and the general arrangement had been confided to Mr. Charles Kean, as an actor holding a prominent position, and having an hereditary claim, as well as a gentleman likely to conduct the arrangements with judgment and amenity. As soon as the plan was made public, a very strong desire manifested itself in individual actors to obtain the privilege of playing before Royalty; and the difficulties the new director had to contend with, in settling rival claims to precedence, must have fully counterbalanced any satisfaction he derived from finding himself placed, by the favour of his Sovereign, in so honourable a position. Mr. Kean acquitted himself on the whole with great tact; and the first series of these representations went off with great *eclat*. Early in February a second series of these representations was commenced; and this brings them within our "season."

The first performance took place on the 1st of February, when "Julius Cæsar" was played. The performance was memorable for the appearance together, of Mr. Macready and Mr. Charles Kean, two rival stars. Among the other principal performers were Mr. James Wallack, Mr. Leigh Murray, Mr. Cooper, and Mrs. Warner. The subordinate parts were, generally speaking, well filled. A very select circle had been invited, and the performances went off with *eclat*. Her Majesty expressed herself much pleased.

The second performances consisted of the Haymarket version of "King René's Daughter," and Mr. Planché's favourite drama of "Charles XII."

FINE ARTS.

EXHIBITION OF THE ROYAL ACADEMY.

The opening of the Academy Exhibition is always a great event in every season. The Exhibition for the present year was, as usual, looked for with very great interest, because there had been, for a long time previously, a violent warfare carried on in the public press against the management of the Institution, from which some fruits were expected. One proof that these expectations were not wholly unfounded was, that the managers of the Academy, for the first time, sent cards of invitation to the press; one or two favoured newspapers having previously obtained admission to the private view, but only *sub rosâ*. Upon the same principle that has guided us throughout this review, we, of course, abstain from entering into any minute analysis of the pictures; because those works (in number nearly 1500) were carefully examined and described in this Journal at the time. We will only point to a few of the chief features.

In spite of the acknowledged faults of this institution, there must manifestly be some benefit, when we find that the exhibitors not [illegible] the Academy are unwilling to [illegible] one of their more fortunate rivals. I was [illegible] certain impartial person that the old monopoly and injustice that [illegible] manifested in the "hanging" was much departed from another proof that the conductors of the Academy acknowledge responsibility to public opinion. It was noticed that all the privileged persons did not avail themselves of their right. Among these were Mulready, Herbert, Shee, Cook, Foley, Gibson, Wyon, Sir R. Westmacott, Lucas, Cockerell, Hardwicke, and the two Smirkes. On the other hand, many of the Academicians and Associates exerted themselves to keep the lead given them by their position. In the higher walks of art there were some bold attempts; for instance, Mr. Dyce's "Meeting of Jacob and Rachel;" Mr. Eastlake's "Good Samaritan," Mr. J. Martin's "Last Man;" and Mr. Maclise's oil picture, a copy of his fresco in the House of Lords. Most of the best pictures in the Exhibition we engraved and published at the time; but there was one picture, of considerable pretensions, and which attracted much notice. We allude to Mr. Armitage's "Aholibah," of which we spoke at the time as a work of merit, full of character and truth. We now give an Illustration of this picture.

Still, the strength of the Exhibition lay in the subject pictures and in the landscapes. Mr. Elmore proved that he had made great strides; and Mr. Ward's picture of "James the Second" was worthy of his old reputation. Mr. Eastlake's "Escape of Francisco Carrara" is now in the Vernon Gallery. Among other pictures which commanded attention were Mr. Cope's "Cordelia," Mr. Frost's "Disarming of Cupid," and his "Andromeda." A little sketch of Coy de Caux's in the House of Lords furnishes us with the subject for an Illustration.

Among the landscape-painters, Stanfield stood pre-eminent. His "View of Dort" was one of the finest things we have had from his pencil. Four other works of the same artist also sustained his reputation. Lee and Cooper contributed several of their favourite marine landscapes, and Mr. Creswick kept his high position, more especially in his picture "The First Glimpse of the Sea." Linnell, young Danby, and Boddington, also kept their position. The elder Danby asserted his high rank as an imaginative landscape painter. Of course there was a host of portraits, the most remarkable of which we allude to at the period of the Exhibition.

The Sculpture-Room of the Royal Academy is, unfortunately, too often passed over. We noticed at the time some of the more striking works. We now add an Illustration of a work which attracted attention. Mr. Thomas's "Amphitrite" is a conception which irresistibly recals the "Undine" of Danneker. But if the idea of Mr. Thomas's figure be not original, its execution compensates for the want of novelty. We also give an illustration of Mr. Calder Marshall's "Statue of Campbell," which, although not in this year's Exhibition, is a work in which the poetic character of the man is sustained. The figure is dignified, and the arrangement of the drapery graceful. It is intended for Poet's Corner, in Westminster Abbey.

Upon the whole, the Academy Exhibition was not unworthy of the growing pretensions of contemporary British art. In that branch which we may specially claim as national—landscape-painting—it could challenge competition with any of its predecessors, more especially in the numbers of talent exhibited by young and comparatively unknown artists.

BRITISH INSTITUTION.

This Exhibition fully sustained the character of the Society without advancing it. It was to us satisfactory to find that the Royal Academicians, who enjoy such a monopoly on their own ground, had abstained from competing with their self-associated brethren. Mr. George Jones is the only Royal Academician who exhibited. Among the Associates, six contributed pictures, and they were all men whom we could not spare: Mr. Sidney Cooper, Mr. Creswick, Mr. Redgrave, Mr. Frost, whose "Musidora" was the most perfect thing we remember even from his graceful pencil; Mr. Danby, and Mr. Marshall, the sculptor. This exhibition strongly points out to English artists in what their strength lies. To those who affect "high art" without having the knowledge or the powers necessary for its production, it speaks plainly that they should drop their pretensions. If there were any unfavourable impression left by a cursory view of this exhibition, it would certainly have arisen from the failure of these ambitious attempts. It is agreeable to turn from the efforts of Sir George Hayter, Mr. Newenham, and Mr. Salter, to the more successful artists, who modestly work out their simple ideas, and produce works [illegible] Mr. Cooper's cattle landscapes; Mr. [illegible] pieces; Mr. Creswick's rich and chaste landscapes; Mr. Lance's marvellous fruit pieces; Mr. Ansdell's fox-sporting pictures; Mr. Sant's clever and various pictures, so extraordinary for colour; Mr. F. Goodall's "Post-office;" Mr. Jutsum's landscapes; Copley Fielding's unapproachable mountain and moorland scenes, and, let us add one marine sketch, a perfect gem; Mr. Linnell's rich warm landscapes; Mr. Frank Stone's domestic pieces, besides those we have specially mentioned, and others of less reputation, whom we would fain particularise if our space allowed—asserted in this exhibition the elastic vigour of British art in those branches where its distinctive and national character has been most powerfully exhibited.

THE NATIONAL INSTITUTION.

Our readers will remember that last year, at the Chinese Gallery, was the second anniversary of what was called the Free Exhibition of Modern British Art; that is to say, an exhibition of pictures by artists associated together to protect themselves against the monopoly of the Royal Academy. This year the Society had taken a large room built for the purpose in Regent street, and the exhibition was highly creditable to the associated artists. Mr. R. S. Lauder, the president, produced the best picture in the whole art line. Another hand, same Mr. Armitage, Mr. Desanges, and Mr. Claxton. Mr. Mclan contributed some of his striking Scotch pieces; and the exhibition was rich in landscapes, among which the [illegible] of the prolific families of Percy and Williams were the most numerous.

SUFFOLK-STREET GALLERY.

This Exhibition was even worse than usual. Mr. Anthony's extraordinary landscapes, however, Mr. Herring's cattle pictures, Mr. Pyne's landscape views, Mr. Hurlstone's composition pictures, and Mr. Baxter's portraits, contributed, with some other minor evidences of ability, to redeem its general inferiority.

THE OLD WATER-COLOUR SOCIETY.

A character of permanence and sustentation always attaches to exhibitions of this Society. If the artists do not advance they do not retrograde, and all the more prominent men are distinguished by acknowledged and accredited talent. As we have already given an analysis of the exhibition, we need only mention the names of Copley, Fielding, Cattermole, Prout, Cox, Topham, Hunt, Alfred Fripp, and J. Jenkins—not as being the only meritorious, but the most meritorious. Yet we should be unjust in omitting the name of Mr. John F. Lewis, who, after a prolonged absence, returned to the Society with a picture which was one of the subjects of town talk during the season. It represented the interior of a harem in Egypt; and whether in Oriental luxuriance of design, or in the singular mechanism of the execution, it was certainly the most remarkable production exhibited during the year. A shadow was thrown over the exhibition by the absence of the well known landscape-scenes of De Wint.

NEW WATER-COLOUR SOCIETY.

This Exhibition for the present year was very good; presenting a greater variety and individual excellence, all things considered, than we remember. We are accustomed here to look to the names of Warren, Corbould, Haghe, Wehnert, and Vacher among the more ambitious artists; and, on this occasion, they sustained their high character. Mr. Wehnert's "Caxton" is one of the finest things he has yet done. Mr. Vacher quitted Venice, and took to the East, presenting us with some wonderfully true pictures, in which we could almost feel the atmosphere. Mr. Corbould had two striking pictures: the one, "Louisa," beautiful; the other, "Egrize," powerfully drawn, but painful in subject. Mr. Haghe's three works, "The Miseries of War," a "Guard-Room," and a "Khebeel," were among the most remarkable pictures in the gallery. Of the second of these we present our readers with a Sketch. To the "Miseries of War" the artist has appended the following lines:—

> O War! thou son of Hell,
> Whom angry heavens do make their minister,
> Throw in the [illegible] bosoms of our part
> Hot rage and [illegible]!

It would have been difficult for Mr. Haghe to have discovered a quotation less applicable than this to the picture he has painted. His so-called "Miseries of War" is a sort of a guard-room of a castle, with a party of prisoners (not very unhappy), and a party of victors (if such they be) sitting good-humouredly down—one to write a letter, and others, as it were, to kill time. Such is the sentiment of this picture; but, when we pass to its execution, nothing can be more wonderful—the truth of effect and detail, the De Hooghe-like light which pervades the whole interior, are all in Mr. Haghe's unrivalled manner.

In every Water-Colour Exhibition the ladies are eminent. There is something in the delicacy of the medium which seems to tempt their minds. Among the contributors we are bound to mention Miss F. Corbaux, Miss Setchell, and last, though not least, Mrs. Margetts, whose fruit and flower pieces are, as usual, perfect. Mr. Fahey, the secretary, had an excellent Kentish landscape; and Mr. Davidson, still now one of the notabilities of the Society in respect to his fresh green landscapes and woodland scenes, found a powerful rival in Mr. Bennett, a comparatively new contributor.

MISCELLANEOUS EXHIBITIONS.

One of the earliest exhibitions to which public attention was called was Mr. John Henning's (junior) "Homeric Table" (the shield of Achilles, executed by him for Lord Northwick.) The designer's object was to illustrate Homer's description of the shield of Achilles, and in the execution of that design he exhibited a fine classical taste, as well in the groupings as in the single figures.

Mr. R. Gordon Cumming, a Scottish gentleman of family, contributed one of the most extraordinary and interesting exhibitions, not merely of the past season, but that had ever been presented in England. Among sportsmen, this gentleman, we apprehend, must take the foremost rank. Holding a commission in the army at the Cape, he conceived an extraordinary desire to gratify his passion for sporting to an extent probably never exceeded by any predecessor, savage or civilised. In his youth he had been a famous deer-stalker, and his keen love of sport had carried him on from difficulty to difficulty in various quarters of the world, from species to species of the various animals marked out for the chase, until nothing would satisfy him short of a three years' campaign in the wilds of Southern Africa, where he might bring himself face to face with the most savage monsters of the brute creation. He converted his worldly goods into money, with which he purchased waggons, teams of oxen, horses, and all kinds of stores necessary at once for trade with the Boers and natives, and set forth boldly on his career. The narrative of his adventures, as subsequently published in two volumes, proved one of the most interesting and successful publications of the season, running, in a very short space of time, through three editions. Prior to its publication he opened the Exhibition to which we refer, in the building which had been occupied as the Chinese Gallery. It consisted of innumerable trophies won by him in his arduous sporting adventures in pursuit of the elephant, the hippopotamus, the lion, and the various other natives of the wild regions which witnessed his adventures.

Mdlle. Vandermiersch, a young French lady, arrived somewhat late in the Season, with a very remarkable exhibition of "Learned Birds," which at once attracted the attention of the aristocracy, to whose *soirées* she was very extensively called. The Duchess of Sutherland, the Marchioness of Londonderry, and other distinguished ladies were among her chief patrons.

Exhibition of Mediæval Art. One of the most important events of the season was the opening, at the rooms of the Society of Arts, at the Adelphi, of an exhibition of numberless relics of mediæval art, contributed for the purpose by their various owners. In our Number of the 23rd of March we gave a lengthened analysis of the contents of this exhibition, together with copious illustrations of the more remarkable and beautiful specimens. It is, therefore, unnecessary for us now to do more than take cognizance of the fact of this Exposition having proved one of the great and distinctive features of the last season.

A fine piece of mosaic pavement, discovered by Monsieur Jovet, in Burgundy, attracted the attention of the higher class of amateurs of the arts during the season. It represents the combat of Bellerophon with Chimæra; and the effect, although the design is worked out by the use of so unpliant a material, reminds one of the gigantic vigour and freedom of some great work of Michael Angelo.

DAY EXHIBITIONS AND OUT-DOOR AMUSEMENTS

These are among the permanent attractions of London, and, therefore, only call for a most cursory mention in a review of the Season. Among the first, are the Colosseum, with its gigantic views and other attractions; the Cyclorama, with its picturesque and terrible portrayal of the Earthquake at Lisbon; the Cosmorama, a sort of general exhibition-room for peripatetic attractions; and the Polytechnic Institution, which, as combining a vast amount of instruction with continual amusement, is the most valuable of them all.

Among the out-door amusements, there were—the Scottish Fête in Holland-park, which may now be regarded as an annual *ré-union*; Vauxhall Gardens, Cremorne Gardens, the Zoological Gardens (where the hippopotamus has been the cynosure of all eyes), the Surrey Zoological Gardens, and, though they deserve a more prominent notice, the splendid floral *Fêtes* of the Horticultural Society and the Botanic Society. During the Season, too, the Chinese Junk was brought up from its old station at Blackwall to a mooring above Blackfriars-bridge. It was visited during the season by thousands of persons.

THE PANORAMAS.

One of the distinctive characteristics of the past season has been the extraordinary increase in the number and variety of pictorial exhibitions illustrative of scenery in various parts of the world. The patronage so universally bestowed on these exhibitions—too often upon trust, as regards the accuracy of the representations—attests the anxiety for information when conveyed through this most effectual and impressive medium. We shall give a notice of these different exhibitions, taking them in the order of time.

The Arctic Expeditions.—The deep interest felt by the public in the fate of Sir John Franklin's expedition suggested the exhibition of a panorama of the Arctic regions. This was opened in an exhibition-room in the Haymarket, and it proved successful. The views were painted from drawings by Sir James Ross, Captain Lyon, and Captain Beechy.

Mr. Banvard's Panorama of the Ohio was a natural pendant to his monster panorama of the Mississippi. There was much controversy as to whether these gigantic views by Mr. Banvard were to be depended upon for accuracy. Although somewhat coarsely executed, they were marked by much vigour and local character; and, in the absence of any authentic evidence of imposition, the public flocked in crowds to see them, not only in London but in the provinces.

Mr. Brees' Panorama of New Zealand was one of the most interesting and most authentic of the various panoramas of the season. At a time when the question of emigration occupied so much of the attention of all classes, this exhibition, respectably attested as it was, became useful and instructive in proportion as it was amusing. The views were chiefly in the neighbourhood of Port Nicholson, but they were subsequently augmented, so as to make them more complete as a whole. They included not merely pictures of places, but also clever illustrations of colonial life. An additional value was given to them by the personal explanations of Mr. Brees himself, who delivered regularly a descriptive lecture.

The Picturesque Exhibition.—At the end of February there was opened, in a new gallery or theatre adjoining the Polytechnic Institution, a pictorial novelty equally amusing and instructive. It was, apparently, an attempt to ascertain whether the public would take as much interest in views of their own country as in those which represent the wonders of foreign parts. Mr. J. W. Allen, the artist of this panorama, had chosen for his theme the course of the North-Western Railway, from Primrose-hill to the new Britannia Bridge, at Bo'ness; and he presented a series of highly interesting views (some familiar, but not the less amusing in their new shape) of all the more remarkable features of the route. The views were boldly painted and well received.

The Diorama.—An old friend with a new face, this favourite and popular exhibition re-opened for the season on the 8th of March, with a very fine view of the Rhine from the Castle of Stolzenfels, and a picture of "The Shrine of the Nativity." As a property, the Diorama has often changed hands, and, at the close of the season, it was once more sold.

Phillips's Irish Panorama.—The memorable visit of her Majesty to her Irish dominion furnished Mr. Phillips, the artist, with a subject for a diorama, which was exhibited during great part of the season. Commencing at Cove, and terminating at Belfast, this diorama included some of the most beautiful views in the Sister Island; the artist having availed himself of occasional visits of the her Majesty and Prince to the interior, in order to add some gems of mountain and river scenery. This production was honourably distinguished from some of the panoramas of the season, by its being a faithful representation.

Fahey's Panorama of Australia.—Mr. J. S. Prout, a relative of the well-known artist, produced at the Western Institution, in Leicester-square, a panorama consisting of illustrations of nature and life in Australia. From some cause or other it did not prove quite so successful as the interest attaching to its subject might fairly have led its projectors to anticipate.

Fahey's Diorama of the Overland Route to Oregon, &c.—This painting, executed, it is said, by Colonel Fremont, for the Government of the United States, exhibited in four parts or sections the overland route to Oregon, Texas, and California, across the Rocky Mountains. The treatment of his subject by Colonel Fremont was graphic in the extreme, and the specialities of a region so recently claiming an historical importance were represented with a careful hand.

Burford's Panorama of Killarney.—We almost owe Mr. Burford an apology for lumping him together with the more fugitive panoramic exhibitions. His pictures have pretensions as works of panoramic exhibitions. His pictures have pretensions as works of art which entitle them to so high a rank that one can only regret they are not more permanent. The turn of fashion in touring towards Killarney, coupled with the Queen's visit to Ireland, gave Mr. Burford a good opportunity for painting the exquisite scenery of the Irish lakes. As a work of art, this picture was in some respects superior even to previous ones.

Beyond all question, the most important and successful of the movable panoramas provided during the past season for the sight-seeing public, was that which represented the Overland Journey to India. Unlike many of the others, this work combined great fidelity of detail, with superior merits in an artistic point of view. Stanfield, Herring, Absolon, and others were engaged upon it, and they produced a series of views, each of which was a picture, designed and executed in a superior style of art. This panorama proved a "hit." The large room in Regent-street, called the Gallery of Illustration, was crowded by every representation, and numbers failed to obtain admission. Ultimately, the projectors were compelled to give an additional representation, making three every day.

We could scarcely omit, in our notice of "the Season," to advert to the temporary residence among us of the Nepaulese Princes, who were quite "the rage" during the period of their stay, visiting all the places of amusement, and taking part in things so strange to them with a gusto that implied a considerable amount of intuitive knowledge of the world. During the Season, also, London was visited by the distinguished Swedish novelist Frederika Bremer, who passed by England on her way to the United States. She arrived from Sweden on the 14th of June, spent a week with Mrs. Howitt, and then departed on her journey to America, where, it is to be supposed, she will collect materials for more of those delightful works of fiction with which she has charmed and instructed the world. The Illustration we give is from a picture painted in Sweden, the only one she ever sat for.

The Illustration upon page 145 shows the brilliant *finale* to the Election Saturday Regatta at Eton, on July 27. The *fête* was circumstantially described in our Journal of August 3, page [illegible].

SWEET SUMMER TIME

BY THOMAS MILLER.

SUMMER is again seated in her trellised arbour, amid the long green leaves which ever wave and flicker, and throw a shadow of golden net-work on the rounded whiteness of her arms, and break into beautiful lines the snowy ivory of her forehead, and the peach-like bloom of her warm sun-dyed cheeks. Around and above her, the band of birds burst into music, making every hill and valley echo again beneath their silver melody; while the flowers wave as if they vibrated to the woodland notes—sounds that the bees murmur over, and try to hum, as they linger amongst the blossoms, and which the butterfly seems listening to as it swings with folded wings on the pea-bloom, from which it can scarcely be distinguished. Over all comes the clear call of the cuckoo—a voice from a strange land—as he darts from tree to tree like an apparition, startling the summer sunbeams as they sleep lightly on the long grass, and sweeping between the slumbering shadows of the trees, for so everything seems to shiver beneath that penetrating voice, which pierces into the remotest haunts of silence. A drowsy perfume floats on the air from the distant hay-field, as if the flowers of Summer had come to offer up all their odours at the great sacrifice of the bladed grasses which had so long sheltered them; while the whole landscape is tinged with that rich colouring which Thomson has so beautifully described in one line as

Half prank'd with spring, with Summer half embrown'd.

But beautiful as the landscape is, it lacks a charm unless woman is there to adorn it; it seems like the Garden of Eden without Eve, if she, the "fairest flower" is absent. Whether she breaks the green of the scenery in a dress of spotless white, or of shot-silk in which are blended all the indescribable tints of the dove's neck, or wears a provoking little bonnet of pink or lavender, blue, or the pale sunlight of the primrose, or screens her silky ringlets as our Artist has here pictured her, she seems in keeping with the scenery—

Each give each a double charm,
Like pearls upon an Ethiop's arm.—DYER.

A richly-illustrated book of flowers never seems in its right place on a table so much as when in a fair lady's hand; then it is flower-gazing on flower, for "roses reigning in the pride of June" appear not more lovely than a sweet womanly face. Look what repose there is in the two exquisite figures in our Engraving; the flowers beside them are not more wrapt up in the contemplation of their own shadows in the water beneath, than they are in admiration of the work of art which has stolen the look of Nature.

Shakspeare has compared the beauty of a woman that perishes in the bloom of life to a rose that dies when it has reached perfection; and he has made *Laertes* hope that after death violets would spring from the fair and unpolluted form of *Ophelia*. It was a dream of the old poets that flowers rose from the remains of beautiful woman, that she lived again in the bells and blossoms which almost overpower us by their surpassing sweetness; that, although she knows it not, her love for flowers arises because she is akin to the sweet spirits from whom they spring. Men have not half the taste for flowers which ladies possess, nor acquire the skill in arranging a posy (we prefer the old English word before bouquet). What chasteness they display in arranging the commonest wild-flowers, making the hedge-rose harmonise with the woodbine, and throwing a yellow light over both by the graceful sprays of golden-broom, which hang like pendants above the rosy pearl of the centuary or the pale pink of the perfumed convolvulus—which latter must not be sought for trailing in the hedgerows, as it loves to nestle in the open field, at the foot of corn or clover. What a play of light and beauty breaks over the sweet face of a pretty lady, when she discovers a new flower: she seems herself to change while she admires it, to "become a bud again," to catch up and give back the hue of the flower, as a rose reflects the crimson sunset that falls on its petals; or, when she holds up that queen of flowers, to inhale its sweetness; as it rests upon her lips, you can scarcely distinguish the rose from the parted crimson of the beautiful mouth, or tell the rose-leaf from the lip it reposes upon, each "stealing and giving odour," as her breath comes and goes so gently that it awakes not the rose from its sleep. Who that has read Milton, can forget the picture of Eve, where she stands "half-spied, so thick the clustering roses round about her blow," until you can scarcely discern her soft cheek, and the pearly pinkness of her rounded shoulders from the blossoms that overshadow her? We once suggested the subject to that great master of colour, Etty, and regret that he never painted it. Alas! the hand is now cold that could have made perfect so rich a picture.

Shakspeare, speaking of a dimple in the cheek, calls it a tomb made by Love himself, to be buried in when he died. We have often wondered what departed beauty he had looked upon, to suggest so exquisite a thought; could it have been the same lady whose hand he took, and compared to

A lily prison'd in a gaol of snow?

We never remember seeing, amongst the flowers which the ladies wear around their flower-like faces, that little roadside ruby, the pimpernel—the richest-coloured wild-flower that grows. Surely it might be imitated: and many a sweet face would it become—a thousand times better than the large staring sprays now worn. We mean to read our English beauties a lecture some day on this subject; for we dislike seeing poppies, and great bunches of green grapes,

"SWEET SUMMER TIME."—DRAWN BY GAVARNI.

and bearded ears of barley, throwing their shadows on the angelic countenances of our pretty countrywomen. Better a thousand times would be that fairy flower, the pale purple wild thyme, or the wild pencilled geranium, the crimson Adonis or rose-a-ruby, as the country ladies call it; or the [illegible] the pretty bramble-flower; or—but we should be wandering back to Spring, and from thence to the verge of Winter, or forward to brown Autumn, instead of adhering to our title of Sweet Summer Time. Ladies, Love, and Flowers! The very title suggests matter enough to fill the whole pages of the ILLUSTRATED LONDON NEWS; and feeling this, we must rein in our imagination, and descend again to the spot "which men call earth."

Dear woman!
I see the likeness of thy face
In every flower; I can it trace
In bird or bell and [illegible]
Home with the sky
For thou dost spring from that sweet race.

Change of climate is not more cheering to the pale-faced invalid than a brief sojourn in the country is to the brick-baked citizen at this season of the year, when the very pavement burns his feet, and the gutters, instead of flowing, reek again with their rank exhalations. Nature, in our city squares, seems to work reluctantly. She feels that she has not the nourishment she requires; the air she breathes is poisoned with the stench from a thousand sewers; the flowers she inhales impregnated with the smoke and soot from the surrounding chimneys and eaves. She knows that the leaves and flowers she puts forth will die before their time, so she cares not to decorate herself, but sits down ill-attired, and breathing heavily in the open, burning spaces, or crawls for a little shelter from the heat, beneath the shadow of the high dead-walls. In the country only is she happy, for in any of the green solitudes she can there find a home, and reign sole Queen, coveting neither praise nor admiration, but content to gaze upon her own attire—the flowery garments she weaves and wears. The rosy morning has thrown its colour on her cheeks, and the rounded dews of evening are the pearls that gem her flowing hair. The green skirts of her graceful garments fly out unfastened, and rustle like the long leaves when they talk to one another. She lies down, and breathes gently upon the folded buds when they close at night, and, as she turns her bright eyes to the stars above, thinks that her own stars on earth are scarcely less beautiful.

Summer has brought before our eye a beautiful village beside a river, on the banks of which a long row of tall elms stand ever looking at their shadows in the ripples below. Beyond rises a range of hills, round the base of which the river sweeps like a belt of silver; far away a wood rises in the distance—its trees are "musical with bees." On the opposite bank we hear the lowing of oxen and the jangle of sheep-bells, and these sounds blend with the lapping made by the water below the willows. At a bend of the current an angler takes his patient stand in a dark picturesque dress; his figure rests upon a grey background, an old stone jetty, from the interstices of which many a green creeper hangs waving in the breeze. A long trail of golden light runs rippling along the water as far as the eye can reach, and seems at last to unite with a flood of glory that comes streaming from the sky. The swallows skim to and fro, and are ever laving their white breasts in the river. Somewhere out of sight there is a noise of rooks, yet so far off as not to drown the cooing of the ringdove in the neighbouring copse.

That is the world of Nature—the God-created country. We will now glance at Summer Time in London.

Piles of withered pea-pods, and bunches of shrivelled cabbages, are scattered and heaped about the greengrocer's shop; the few flowers he has for sale seem dying for want of water: a shower comes from the passing water-cart, and covers them with dust. There is a smell as of stale red herrings in the streets; the shop-fronts on which the sun shines seem as if on fire; from the open doors of the eating houses you catch a smell of dying dinners, as if a slow decay was taking place amongst the joints, while hundreds of flies buzz about the remains. The cur, that, on other occasions, yelps at your heels, is now too hot to bark. You pity the poor cab-horses, that stand like patient martyrs, burning in the sun, although they seem to prefer being offered up as a slow sacrifice, to being driven steaming through the fiery streets. You believe that what is shown for Wenham Ice in some window is a huge lump of crystallized matter, which they have watered; for anything so cold as ice to be found in such an atmosphere, you think an impossibility. You see little pleasure-parties of boys gathered about the plug-holes, as the only cool places that can be found; and you cannot help thinking what a benefit it would be to the inhabitants

WATERING-PLACES OF ENGLAND.—DOVER: THE TOWN AND HEIGHTS.

if the water was allowed to run for an hour or two every day in all the streets of London. What little air you used to find in the City seems to have gone into the country for a change, or to be out for the day somewhere on the river. The drivers of the omnibuses become desperate if they have to pull up out of the little slip of shadow which the high houses throw down on one side of the street. The great lion-heads which belong to the knockers look more savage and angry than they do in winter, and seem to threaten to bite you when you raise your hand, as they stand in the full glare of the sunshine on the heated doors.

You feel as if you were slowly turning to crackling, and when you fall asleep dream of men and streets, and great moving joints of roast pork; for such are your visions of Sweet Summer Time, singeing and browning you in London.

Happy seem those houses, which on holidays we get a peep at, through the embowering trees, at whose doors the roses and woodbines stand sentinels throughout all the summer nights, dreaming in the silvery moonbeams, or seeming to hang their flowery heads while listening to the song of the nightingale or the low murmur of the adjoining brook. Such places we do at times visit, and return to our city home again, laden with pleasant memories—dreams which strew our pillows with the roses of summer, even while in our sleep we are inhaling the poisonous atmosphere of the adjacent sewer, where gas is ever escaping, and drain-pipes getting choaked up, and blacks falling from the chimnies in thousands; for such is our Sweet Summer Time in London.

THE WATERING-PLACES OF ENGLAND.

DOVER.

Owing to the clearness of the water, and the gradual declivity of the shore, the sea-bathing at Dover is considered to be equal to any in the kingdom. Anciently, Dover is supposed to have derived its name from *Dwfyrrha*, signifying a steep place; or it may have taken its name from the river *Dour*, which has its source from two heads, four miles west of the town, and forms the back-water to the harbour, then discharges itself into the sea. *Dour* appears to have been latinized into *Dubris*, and changed by the Saxons into *Dover*, which is recorded to have been a place of considerable size and opulence in the reign of Edward the Confessor. As a watering-place, Dover is resorted to rather by those who seek the enjoyment and benefit of sea-bathing, together with more retirement and less excitement than attends a residence at Brighton or Margate. The castle is a grand object of interest.

CLIFTON.

Clifton, near Bristol, differs from the other watering-places in being far distant from the sea. It is resorted to partly on account of its hot springs, and partly from the extreme picturesqueness and beauty of its scenery. The point of view taken in the accompanying Illustration gives perhaps the most striking and distinct aspect; but in the neighbourhood, among the rocks which overhang the cliffs, and along the shores of the Avon, which flows at their base, there are innumerable beautiful walks. The river is very beautiful at high water; and then a fine bend in this pleasant place is made more interesting by the constant passing and repassing of steam-boats and other vessels which ply between Bristol and various ports in the Bristol Channel, in Ireland, &c. At low water the stream degenerates into a gigantic ditch. Clifton is a very delightful place for those who desire retirement, and can take delight in rural and picturesque beauty. There are many excellent hotels; and, as a general rule, the lodging-houses are convenient, and not too expensive.

WATERING-PLACES OF ENGLAND.—CLIFTON, FROM LEIGH WOOD.

LITERATURE.

The PRELUDE; or, GROWTH of a POET'S MIND. An Autobiographical Poem, by WILLIAM WORDSWORTH. Moxon.

A posthumous poem by William Wordsworth cannot fail of exciting great interest amongst the large circle of the poet's admirers. That he always looked upon himself as a consecrated person, to whom the cultivation of his mind and of the art of poetry was not only a joy, but a duty, has been long known. The poem before us bears witness that he cherished this sentiment from boyhood, and had the truthful love of genius. In conscious manifestation, from his early years. Later in life, he met with Mr. Coleridge, whose gorgeous mind seems to have acted on Mr. Wordsworth's in a commanding manner. Every where, in the poem before us, Mr. Wordsworth memorialises Mr. Coleridge as a great and superior intellect, as his master and his friend.

To Mr. Coleridge the poem throughout is dedicated, and the metaphysic analysis of the poetic faculties which it contributes is specifically addressed to the transcendental sage. Wordsworth's admiration of Coleridge was full and fervent, and his appreciation large and liberal. Indeed, everywhere he seems to stand in awe and wonder of that marvellous speaker. The poem is divided into fourteen books, and is nearly as long as Milton's "Paradise Lost." It was commenced, we find by the preface, in 1799, and completed in 1805. It may be fairly considered a new kind of poem, since up to the period of its writing it contains its author's biography. Mr. Wordsworth's later life presents but little variety—a life of solitude among the mountains of Westmoreland. But his younger days were more actively spent. He passed much of his time in Cambridge, London, Switzerland, and France. He was in Paris during the revolutionary mania, and shared in it to a considerable extent. The account that he gives of it, indeed, amounts to a justification; and in this, perhaps, we may perceive the reason for the suppression of the poem for nearly half a century. The poet did not wish to be called upon to defend or to explain away the opinions, both strongly impulsed and eloquently expressed in his maternal biography.

Having returned from his continental tour, and seated himself in his native vales, Wordsworth began to make experiment of his poetical powers, to the development of which he had determined to devote his future life. The workings of his mind under these circumstances he thus states:—

> "As becomes a man who would prepare
> For such an arduous work, I through myself
> Make vigorous inquisition; the report
> Is often cheering; for I neither seem
> To task that first great gift, the vital soul,
> Nor general truths, which are themselves a sort
> Of elements and spirit, potent powers,
> Subordinate helpers of the living mind:
> Nor am I naked of external things,
> Forms, images, nor numerous other aids
> Of less regard, though war perhaps with toil
> And needful to build up a poet's praise,
> Time, place, and manners: do I seek, and these
> Are found in plenteous store, but nowhere such
> As may be singled out with steady choice."

His own personal experience, as we now know, proved ultimately to be the burthen of his song; and every one of his poems is, indeed, entitled to be considered as a portion of his autobiography. Wordsworth's life has been emphatically written in his works. Of what vigour was in him at the period of commencing the present, the following description may serve as an example:—

> "Wisdom and spirit of the universe,
> Thou soul that art the eternity of thought,
> That giv'st to forms and images a breath
> And everlasting motion. Not in vain
> By day or starlight thus from my first dawn
> Of childhood did'st thou intertwine for me
> The passions that build up our human soul;
> Not with the mean and vulgar works of man,
> But with high objects, with enduring things,
> With life and nature, purifying thus
> The elements of feeling and of thought,
> And sanctifying, by such discipline,
> Both pain and fear, until we recognise
> A grandeur in the beatings of the heart.
> Nor was this fellowship vouchsafed to me
> With stinted kindness. In November days,
> When vapours rolling down the valley made
> A lonely scene more lonesome, among woods,
> At noon and mid the calm of summer nights,
> When, by the margin of the trembling lake,
> Beneath the gloomy hills, homeward I went
> In solitude, such intercourse was mine:
> Mine was it in the fields both day and night,
> And by the waters all the summer long.
> And in the frosty season, when the sun
> Was set, and, visible for many a mile,
> The cottage windows blazed through twilight gloom,
> I heeded not their summons: happy time
> It was indeed for all of us—for me
> It was a time of rapture! Clear and loud
> The village clock struck six;—I wheel'd about
> Proud and exulting, like an untired horse
> That cares not for his home. All shod with steel
> We hiss'd along the polish'd ice in games
> Confederate, imitative of the chase
> And woodland pleasures, the resounding horn
> The pack loud chiming, and the hunted hare.
> So through the darkness and the cold we flew,
> And not a voice was idle: with the din
> Smitten, the precipices rang aloud;
> The leafless trees and every icy crag
> Tinkled like iron; while the distant hills
> Into the tumult sent an alien sound
> Of melancholy not unpleasing, while the stars
> Eastward were sparkling clear, and in the west
> The orange sky of evening died away.
> Not seldom from the uproar I retired
> Into a silent bay, or sportively
> Glanced sideways, leaving the tumultuous throng
> To cut across the reflex of a star
> That fled, and, flying still before me, gleam'd
> Upon the glassy plain; and oftentimes,
> When we had given our bodies to the wind,
> And all the shadowy banks on either side
> Came sweeping through the darkness, spinning still
> The rapid line of motion, then at once
> Have I, reclining back upon my heels,
> Stopp'd short; yet still the solitary cliffs
> Wheel'd by me—even as if the earth had roll'd
> With visible motion her diurnal round!
> Behind me did they stretch in solemn train,
> Feeble and feebler, and I stood and watched
> Till all was tranquil as a dreamless sleep."

The record of Wordsworth's "childhood and school-time" will be read with pleasure, for the images and feelings in which it is embedded. There are beautiful snatches of poetry—lines term ng with mind—and extended descriptions which are pictures in words. Wordsworth lost his parents in early life; but the maternal influence, nevertheless, had operated strongly on his mental development.

> "Blest babe,
> Nursed in his mother's arms, who sinks to sleep
> Rocked on his mother's breast; who with his soul
> Drinks in the feelings of his mother's eye.
> For him, in one dear presence there exists
> A virtue which irradiates and exalts
> Objects through widest intervals of sense,
> No outcast he, bewilder'd and depress'd,
> Along his infant veins are interfused
> The gravitation and the filial bond
> Of nature that connect him with the world.
> Is there a flower, to which he points with hand
> Too weak to gather it, already love
> Drawn from love's purest springs insensibly forms for him
> Lath beautified that flower; already shades
> Of pity cast from infant tenderness
> Do fall around him upon aught that bears
> Unsightly marks of violence or harm.
> Emotions wholly such a being lives,
> Frail creature as he is, helpless as frail,
> An inmate of this active universe;
> For feeling has to him imparted power
> That through the growing faculties of sense
> Doth like an agent of the one great mind
> Create—creator and receiver both,
> Working but in alliance with the works
> That it beholds."

Wordsworth's experiences of Cambridge were not satisfactory. The routine of University studies disgusted him. He was a veritable child of nature, not of the schools, and preferred the open air exercises of the place to its cloistral mechanisms.

> "For I, bred up 'mid nature's luxuries,
> Was a spoiled child, and roaming like the wind,
> As I had done in daily intercourse
> With those crystalline rivers, solemn heights,
> And mountains, ranging like a fowl of the air,
> I was ill tutor'd for captivity;
> To quit my pleasures, and, from month to month,
> Take up a station calmly on the perch
> Of sedentary peace. Those lovely forms
> Had also left less space within my mind,
> Which, wrought upon instinctively, had found
> A freshness in those objects of her love—
> A winning power beyond all other power."

Glad was Wordsworth when the summer vacation came, and he was again restored to his native hills. Glad were the inhabitants to receive him once more amongst them. It seems it was only by a very gradual process, that Wordsworth came to appreciate the value of books; that mastered, however, his reverence was extreme.

> "A precious spirit o'er this earth presides,
> And o'er the heart of man: invisible
> It comes, to works of unpurposed delight,
> And tendency benign, directing the eye
> Who care not, know not, think not what they do.
> The tales that charm away the wakeful night
> In Araby romances; legends pen'd
> For solace by dim light of monkish lamps;
> Fictions, for tales of their love devised
> By youthful squires; adventure endless, spun
> By the damnatied warrior in old age,
> Out of the perils of his youthful days,
> In which his youth did first contemplate;
> These spread like day, and something in the shape
> Of these will live till man shall be no more."

We must give a specimen or two of the poet's continental experiences:—

> "When from the Vallais we had turned and climb'd
> Along the Simplon's steep and rugged road,
> Following a band of muleteers, we reach'd
> A halting place, where a long torrent hoarse
> Thwarted our passage. Hastily rose our guide,
> Leaving us at the board; awhile we lingered,
> Then raced the beaten downward way that led
> Right to a rough stream's edge, and there broke off.
> The only track now visible was one
> That from the torrent's further brink held forth
> Conspicuous invitation to ascend
> A lofty mountain. After brief delay
> Cross'ng the unbridged stream, that road we took,
> And clomb with easy steps, till sudden fears
> Intruded, for we failed to overtake
> Our comrades some before. By fortunate chance,
> While every moment added doubt to doubt,
> A peasant met us, from whose mouth we learned
> That to the spot which had perplexed us first
> We must descend, and there should find the road,
> Which in the stony channel of the stream
> Lay a few steps, and then along its bottom;
> And that our future course was plain and straight.
> Was downwards with the current of that stream.
> Loth to believe what we so grieved to hear,
> For still we had hopes which pointed to the clouds,
> We questioned him again, and yet again,
> But every word that from the peasant's lips
> Came in reply, translated by our feelings,
> Ended in this—*that we had crossed the Alps.*"

One Parisian picture, and we have done:—

> "Hatred of absolute rule, where will of one
> Is law for all, and of that barren pride
> In them who, by immunities unjust,
> Between the sovereign and the people stand,
> His helper and not theirs, laid stronger hold
> Daily upon me, mixed with pity too
> And love; for where hope is, there love will be
> For the abject multitude. And when we chanced
> One day to meet a hunger-bitten girl,
> Who crept along, fitting her languid gait
> Unto a beggar's motion, by a cord
> Tied to her lean arm, and picking thus from the lane
> Its subsistence, while the girl with folded hands
> Was busy knitting in a heartless mood
> Of solitude, and at the sight, my friend
> In agitation said, 'Now, surely now
> That we are fighting,' I with him believed
> That a benignant spirit was abroad
> Which might not fail to put an end to that poverty
> At least as this would in a little time
> Be found no more, that we should see the earth
> Unburthened in her wish to recompense
> The meek, the lowly, patient child of toil,
> All institutes for ever blotted out
> That legalized exclusion."

Such is this posthumous publication of our greatest modern poet. It is, in all respects, of the most extraordinary character, full of the profoundest interest. It is, in some parts, highly picturesque; in others powerfully eloquent:—every where, it bears evidence to its being the work of a master mind.

NOTES from NINEVEH, and TRAVELS in MESOPOTAMIA, ASSYRIA, and SYRIA. By the Rev. J. P. FLETCHER. 2 vols. Henry Colburn, Great Marlborough-street.

Between the years 1842 and 1844, Mr. Fletcher (at that time, apparently, not the Reverend) resided at and about Mosul, on the Tigris, as the lay associate of a clergyman engaged in a literary mission to the Nestorians. His religion and literature amongst the ancient Christian Churches of the East. He proceeded thither by Paris, Marseilles, Malta, Smyrna, Constantinople, Ladik, Aracala, Tocat, Erzeroheh, Mosul, Beymoonjuk, Sawrek, Urfah, Aleppo, Beyrout, England. Mr. Fletcher does not conceal that he has been induced to "collect" his notes, as if part of them had been published before by the great interest lately excited respecting Nineveh. At the same time the great discoveries of Mr. Layard, which have excited that interest, have also gratified it in a much greater degree than Mr. Fletcher's power, who had left the country before any of those discoveries had been made. Nor does he conceal that the discoveries of Mr. Layard have much abridged the remarks on antiquities to the improvement, perhaps, of the book for the general reader.

The "Notes from Nineveh" do not enlarge our knowledge of the ancient subjects which just now have diverted so much attention to that spot; but Mr. Fletcher's travels in Mesopotamia, Assyria, and Syria, with his account of his residence in Mosul, and his visits to the villages in the neighbourhood, are full of pleasant information narrated in a lively manner. In addition, he tells us much about the Eastern Christians, about the Kurds, and the massacres of the Nestorians by the Turks, the Yezidees, or so-called Devil-worshippers, who deservedly engaged the attention of Mr. Layard; and both authors, by their descriptions, release them from the reproaches implied in the wholesale gives them of the Arabs. As a picture of manners, we have not for a long time met more agreeable writing than fills a great part of Mr. Fletcher's work. Passing by the antiquarian subjects, his discourses about the Sabbath of Mount Alphonso, and the early history of the country, and leaving, too his notices of the Eastern Christians and their theology—which are, however, by no means tiresome or overdone—we must make an extract or two to show the materials of which the book is made, and by way of spirit they are animated. Following a good description of the site and houses of Mosul, the "Modern Nineveh," he thus continues:—

> "After a short stay at the Consulate, I hired a house in the neighbourhood for nine pounds a year. It contained six rooms, a kitchen, and a court, where the sun never penetrated even during the hottest season of the year. I also engaged a servant, a Papal Chaldean by religion, who was a native of one of the neighbouring villages. He spoke only Arabic, Chaldee, and Kurdish, and I trusted by his aid, and that of necessity, soon to master the former. A day or two after his engagement, Tems, for so the fellow was called, came and (to betray mind not to wait for him, but to install myself in the house before his arrival. For this purpose I demanded and obtained the key, notwithstanding the remonstrances of my Mussulman friends, who deemed the act of sleeping alone in an empty house an act of great moral courage. The key was not one of those convenient media of obtaining an entrance which may be carried commodiously in the waistcoat pocket; it was a long bar of wood, with two projections towards the end, more than a foot in length, and well qualified, not only to open a door, but to knock down any one who might attempt to enter it without permission. Armed with this implement of offence and defence, I went to and fro between my own dwelling and the Consulate, generally taking my meals and spending my evenings at the latter.
>
> "I now commenced housekeeping in the Oriental style, and rarely found my expenses exceed sixpence per diem."

The following extract sets forth very distinctly the difference between the slavery the European and the American negro:—

SLAVERY IN THE EAST.

"Two hours' ride from Kar Kooshuk brought us to Kal Mert, a small mound, at the base of which was flowing a small rivulet, around which were grouped the different members of our caravan, that had started from Dardekh before us. As they were sitting down to their evening meal, I noticed with pleasure the cordial relations of liberty and equality were more truly practised than our own. The master and his servant sat down together on the grass to partake of the pilaw which the latter had cooked, while a black negro, whose society would have been universally shunned in the free and enlightened country of America, was here in despotic Turkey seated next to a free white merchant of Mosul. The black was indeed a slave, and had always been one from his earliest boyhood, but he had been treated by his owner like a member of the family, and now filling a post similar to that of a confidential clerk. He had been dispatched to Aleppo on a family mission of some delicacy regarding his master's younger brother, over whom for the time being he was to exercise full authority. Our subtle friend was well mounted on a fine stout hack, his dress was of good materials, nor did he seem a whit inferior to any one in the caravan.

"A citizen of the American slave states would be astonished, if not scandalized, to hear that the Turkish bondman, be he black or white, possesses frequently greater facilities for rising in the world than those enjoyed by his free neighbour. He may become the friend, the counsellor, and confidant of his master, and sometimes ends by being appointed his heir. The white slaves not unfrequently obtain their freedom, and a wife from their master's family, though I never heard that the latter was ever been the case with the blacks. But the latter enjoy great personal freedom, are treated with kindness, and often amass property in their state of servitude. The master of the household is not, all things considered, more rigorous to his slave than towards his own sons. The latter are obliged equally to wait upon the family, to perform domestic tasks, and may not, without permission, absent themselves from their father's presence. When they do amiss, their chastisement is severe, whether than that inflicted on the slave. In short, if we could admit that loss of personal freedom can be compensated by comfort and ease, we might consider the bondman of a wealthy Turkish merchant, or of an opulent Bey, as occupying a station more likely to be productive of happiness than that of the free peasant or labourer, who scrabbled of the just gains by the tyrannical exactions of an avaricious Mutsellim or grasping Pasha."

There is one curious subject mentioned by Mr Fletcher, into which we cannot enter, viz. the propriety of direct ng a stream of emigration, with the approbation of the Sultan, into his territories from Western Europe; nor can we possibly enter into his feelings of jealousy of the influence which he says France is securing in the East, as the great protector of Roman Catholics, and from the presence of the members of the Church. The men to the West will regard the greater security that they can obtain under the Turkish government to colonize Mesopotamia; and the French have succeeded so in Algeria, that there is no good reason for other nations leaving their colonizing exertions, to whatever point they may direct them, to be almost exclusively French. We find there are several Eastern tales incorporated with the text, as historical stories illustrative of manners which did not fall under Mr. Fletcher's observation, that incense Lee values more than the bulk of the book. Not must we forget to mention that the oppression of the Turkish governors is justly reprehended, with its effects in converting the people into robbers, and the country into a wilderness, and eloquently painted out.

SCENES and INCIDENTS in ITALY, from 1847 to 1848; including Siege of Venice. By LIEUTENANT GENERAL PEPE. Translated from the Original Italian MS. 2 vols. Longman and Co.

These volumes were needed for justifying the Calabrese insurrection and the cause of Italian independence. The latter fierce of the Calabrese in the cause of liberty dates as early as 1799, when Cardinal Ruffo arrested from Calabria to drive out the French. In 1808 the Carbonari sect first established in Calabria. In the "latter days," also, "the Calabrese were the first to shed their blood that the stranger might be driven beyond the Isonzo."

The King of Naples having been compelled to grant a constitution to his people, who had suffered under what Lieutenant-General Pepe calls a Vandal government, the political position, not only of Sicily, but of the whole peninsula, was changed. The matters stood on the French model of 1848; but by the toil of Naples was not altered. Our author found that "it is an error difficult to uproot, a new human form."

The French revolution of February was, in Pepe's opinion, unprepared for. Neither Lamartine nor Lamennais foresaw it, even a few days before it happened. The latter said to our author, that "the political events were marching rapidly, he could not foresee the final result of them." That is, whether it would precede or follow the death of the King." To this Pepe adds, that "revolutions are prepared by a certain invisible process in the secret depths of men's minds, and cannot depend on any human calculation." It is, whether it would precede or follow the death of the King." To this Pepe adds, that "revolutions are prepared by a certain invisible process in the secret depths of men's minds, and cannot depend on any human calculation." It is the spontaneous combination of will and power, the production of which is ever determined by unforeseen circumstances, and escapes all forecast respecting the precise moment in which it will be effected."

If this may be, Lieutenant-General Pepe has here recorded, from subsequent experience, the keenness and sagacity of the King of Naples displayed in Parliament. It is seen in these pages in his native colours. Pepe describes a "distinct which Heaven seemed to have created in a moment of anger" in him.

"I said to him, 'Sire, having many times [illegible] that you should be among the number of those who [illegible] without hesitation.' You are mistaken, I have always been Austrian.'

"In that case,' I continued, 'I am rejoiced to hear your Majesty's sentiments, and shall propose, with greater confidence, what would be most useful to your Majesty, to the Kingdom, and to all Italy. Instead of confiding to me the command of the army, which amounts to 70,000 picked men, let your Majesty in person take the command of them. You are at the head of your staff. The liberation of Italy from a foreign yoke will then be the only subject; you will be the soul of all the Italians, especially of the Neapolitans. The Sicilians will return to your allegiance, and if that should not be the case, following the example of my mother in 1820, I will go there myself, and I feel certain of compelling them to return to their allegiance without shedding a drop of blood. With [illegible] in the extension of your territory, you will obtain whatever you may [illegible]

"I added many other arguments. I counselled, generosity, and the synchronism of the Constitution of Messina. 'The Sicilians are grateful. Since you are not ignorant of the attachment I have ever manifested for [illegible] simple general, who became by old fidelity, and discovered by [illegible] nevertheless [illegible] society of Venice, of which city he arrived on the 13th of June. [illegible] considered Venice the most important military position in Italy, since it is from thence that the Austrian empire must be [illegible]

"On the 30th of May, Pepe gives a full account. The treachery of the Neapolitan [illegible] sent to the French frontier, but I always abstained from going to the Italian theatre in Paris, where all the applause showered on the performers seemed, to me to mean, 'You can always sing, but never fight.' [illegible] was given for the benefit of the Treasury, and in [illegible] many young ladies sang in Italian. I said to [illegible] can fight with more valour than our enemies.' [illegible] made me, for the first time since my [illegible] appear in an Italian theatre, and seeing my countrymen [illegible]

"The Calabrese, and campaigns were greater than those of Lisfranc. But, notwithstanding [illegible] is convinced, from the insurrection of Naples, that [illegible] to the Constitution of Messina. The national [illegible] says, 'was almost like a festival long desired and promised, so great was the popular fury and faith in their country's deliverance.' The whole description of the [illegible] exciting—but too long for quotation. The atrocities committed by the Imperialists were horrible. In a great measure, we owe in the hope and sentiment of General Pepe. The existence of his own book is sufficient to inspire the liberal mind with faith in the ultimate success of the Italian cause.

The ILLUSTRATED BOOK OF SONGS for CHILDREN. Orr and Co.

The majority of these songs have been translated from the German. The subjects are sweet and homely, now revelling in the dulcet notes of "the minstrels of the woods," caroling with the lark, or soaring with the eagle, now [illegible] to sources of every-day domestic joy and [illegible] in their songs allusions, and such as must impress the tender mind with the beauty of truth in the little lessons to its holy influences. The book is illustrated with a series of charming vignettes, and tasteful landscapes, and letters, by Birket Foster; they are full of picturesque reality and artistic delicacy, in landscape and figure, and the little incidents that render the impressions of childhood so truly delightful. The work is [illegible]

To the Editor of the ILLUSTRATED LONDON NEWS.

SIR,—In the Number several inaccuracies occur in a short paragraph respecting the consecration of St. Thomas's Church, Bethnal green, which I take the liberty of correcting. First, the Church was commenced in February, 1846, not 1839; the incumbent's name is Kerry, not Kerr. There was no clerical address on the occasion, consequently the delivery of Communion Address and Service by the Bishop could not also assist at it. The text was not delivered by the Rev. Mr. Cotton, but by an anonymous individual, supposed, however, to be Cotton, Esq., late Governor of the Bank of England. There was a choir, the last Sunday evening. The Bishop's procession was ably performed by the Rev. W. L. Neville, curate of St. Matthew's, Bethnal-green. The choir (a very efficient one) consisted of the young gentlemen from the Temple, the choir of St. George's-in-the-East, assisted by some Cambridge men of the Society. Harmonium by Mr. Lonsdale. The services consisted of Tallis's Responses and Versicles, Gibbon's "Magnificat" and "Nunc Dimittis," and decimal Clarke's anthem, "Praise the Lord, O Jerusalem." A very suitable sermon was preached by the Rev. Roberts, of Lincoln's-inn, from the Temple. Trusting you will excuse the liberty I have taken, I remain, Sir, Your obedient servant, J. MULL, organist of the said Church.

* Copied from a daily paper.

BRITISH AGRICULTURE.

BY THOMAS ROWLANDSON.

AGRICULTURE has ever formed an important subject of study and enquiry with most distinguished statesmen of ancient and modern times.

The period in the history of Great Britain has the necessity of a thorough knowledge of this important science been felt so intensely by all classes, as at the present moment. An earnest desire to assist in promoting the development of agricultural resources pervades society from the Prince to the Peasant. That is not a figurative but a literal truism, is evidence din the interest displayed by that illustrious Patriot in all that relates to the cultivation of the soil, the feeding and rearing improved stock, and the interesting experimental researches of H.R.H. with respect to the economical of town sewage to agricultural purposes, which is now worse than wasted, being the fertile source of disease and death. These are circumstances which with posterity will elevate the character of H.R.H. above that of conqueror, who have been the destroyers of so large a part of the world's happiness, but who heretofore unfortunately have obtained such a miserable portion of its applause. It is hoped similar tastes and virtues will extend through a posterity whose consecutive reigns will only be remarkable as being a great people to his successor in a higher state of happiness and prosperity than that in which he found it. Amongst the noblest and wealthiest of our country the late Duke of Bedford to erect on his various estates 300 improved cottages for labourers; and not less remarkable the circumstance of the Marquis of Westminster, perhaps the richest nobleman in the world, unbending so far as to take an interest in the sadness of a draimer's dress, in order that efficient and comfortable dress of his labourers employed in the occupation of draining might be duly provided for.

Having noticed the above special instances of the interest felt on this subject in the minds of the highest class of the community, it must not be supposed that are unmindful of the services of the numerous body of nobility and gentry opposing the Royal Agricultural, Highland, and other societies, whose services late years have been so instrumental in rapidly promoting the onward movement of British Agriculture.

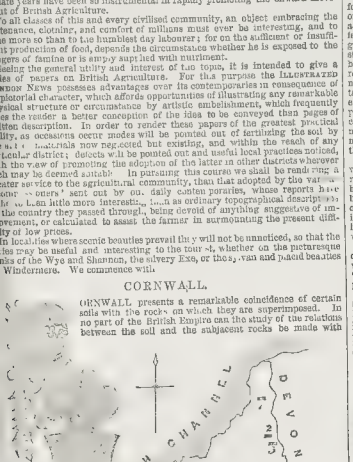
To all classes of this and every civilised community, an object embracing the sustenance, clothing, and comfort of millions must ever be interesting, and to none more so than to the humblest day labourer; for on the sufficient or insufficient production of food, depends the circumstances whether he is exposed to the pangs of famine or is amply supplied with nutriment.

From general utility and interest of the topic, it is intended to give a series of papers on British Agriculture. For this purpose the ILLUSTRATED LONDON NEWS possesses advantages over its contemporaries in consequence of its general character, which affords opportunities of illustrating any remarkable physical structure or circumstance by artistic embellishment, which frequently saves the reader a better conception of the idea to be conveyed than pages of descriptive matter. In order to render these papers of the greatest practical utility, as occasions occur modes will be pointed out of fertilising the soil by artificial materials now neglected but existing, and within the reach of any agriculturist; defects will be pointed out and useful local practices noticed, with the view of promoting the adoption of the latter in other districts wherever such may be deemed advisable. In pursuing this course we shall be enabled to render a better service to the agricultural community, than that adopted by the various "tours" sent out by our daily conten poraries, whose reports have often been little more interesting, than an ordinary topographical description of the country they passed through, without the slightest allusion of anything suggestive of improvement, or calculated to assist the farmer in surmounting the present difficulty of low prices.

In localities where scenic beauties prevail the pen will not be unnoticed, so that the tour may be useful and interesting to the tourist, whether on the picturesque banks of the Wye and Shannon, the silvery Exe, or those van and placid beauties of Windermere. We commence with

CORNWALL.

CORNWALL presents a remarkable coincidence of certain soils with the rocks on which they are superimposed. In no part of the British Empire can the study of the relations between the soil and the subjacent rocks be made with



greater facility than in the West of England, and nowhere can the information which such an enquiry affords be turned to a more practical account than in the district under notice. This remark equally applies whether it repeats the improvement of lands already under cultivation, the reclamation of wastes, or as tending to the general advancement of agricultural science. As we advance from a primitive to newer and frequently alluvial formations, the relations between the subjacent rocks and the cultivated soil become gradually less distinct and apparent, and frequently lost in the complication of the soil itself, which is not unfrequently formed of materials derived from nearly all the known rocks. A patient investigation, therefore, of the soils of a primitive country like Cornwall as the better to study those districts whose soils may have had a more complex origin.

The soils of the county of Cornwall are principally derived from four different species of rocks—granite, slate, hornblende, and serpentine; a fifth may be added, viz., the carbonaceous group: the last, however, was originally formed from the disintegration of the first. The general character of any district is occasionally modified by erupted plutonic rocks, as felstone, porphyry, &c., and, occasionally, up-turned beds of limestone. The soil to which the disintegration of granite gives rise, is provisionally termed "*granan soil*." It occupies a very extensive area. Four considerable bosses of granite in Cornwall, besides a few minor outbursts, exclusive of the granite found in the Scilly Islands. Commencing the enumeration of the granite soils near the borders of Devonshire, we find the Roughtor district occupying a surface of 10 miles in length, by 6 or 7 in breadth, being the largest area of any single crown district. Proceeding westward, and at a short distance, we arrive at the Hensborough district, occupying not much more than one-third the superficial extent of the former, at some distance from Hensborough, a third district of granite is found of like character, in the neighbourhood of Penryn, Helston, Redruth, and Camborne. The last mass of granite of any considerable extent includes the Land's End district, extending from Mounts Bay to St. Ives. The granite districts of Cornwall occupy an area of probably something more than 200,000 acres, a considerable moiety in a county containing 881,200 acres. A large portion of these 200,000 acres of waste lands, estimated as being found in Cornwall, exists on granitic districts, the soil principally consisting of peat, oftentimes mixed with shar quartzy sand.

The great differences in the qualities of the "growan" soils arise from two circumstances, viz. their relative positions as regards altitude, and the comparative state of the subjacent granite. The former is well illustrated by comparing the moorland districts of Roughtor and its vicinity, which is 1,368 feet above the level of the sea, whilst the latter rarely exceeds 300 feet. In considering the causes of these distinctions, we must refer some, in a great measure, to differences of climate, elevation being proverbially productive of increased coldness from the equator. As we ascend a mountain, the temperature falls: in England, it is customary to calculate the fall at one degree of the thermometer for every 300 feet of elevation. The decrease of mean annual temperature will not alone account for the marked fertility of one district as compared with the sterility of another of similar geological position.

Theory would point out what observation has ascertained—that up to a certain height the annual rainfall increases according to the elevation above the level of the sea: the importance of this fact, in reference to the distribution of soils, will immediately be seen.

It may be stated that all soils (carbonaceous ones, such as peat, excepted) are formed from the decomposition of rocks; and so far as the researches of science have yet gone, it may pretty safely be asserted that all rocks, particularly the sedimentary ones, have been derived from the decomposition of granite. This assertion will no doubt surprise many, who are apt to conceive that granite is an indestructible substance, in consequence of its being selected as the most enduring stone for forming our most permanent public works and buildings. Granite is, however, susceptible of decomposition in various degrees according to its mineralogical structure; some of the Cornish are easily disintegrated, such as those from which porcelain clay is obtained; whilst others, to ordinary observers, are apparently indestructible, for instance, that of which Waterloo-bridge is built; yet, on examining this structure, it will be seen that an incipient decomposition has commenced; more particularly to be seen in the parts subjected to alternate tidal and atmospheric influences. This is made manifest to the eye of the most casual observer by the brown appearance assumed by the stone in the parts of the bridge alluded to, owing to the gradual absorption of oxygen by the iron in the granite; however indestructible the finest granite may appear to an ordinary observer, even when found, as is often the case, refractory when treated with the most powerful chemical fields, observation of what takes place in nature and experiment in the laboratory have proved that it eventually decomposes under the slow and continued action of water charged with natural elements, moisture and carbonic acid. The [illegible] of granite takes place more rapidly, as compared with others of less attitude. High districts are usually steep, which, combined with the circumstance of heavy rains, the water which falls thereon is commonly carried off in a very rapid manner, by which means the finer and generally more fertile portions of the disintegrated rock are carried to lower situations, leaving behind a sterile quartzy soil sometimes mixed with the aluminous material of the granite, in either case frequently overgrown or intermixed with peat.

In addition to the above causes, great variations in the fertility of granitic soils occur, owing to the varied composition of the rock which obtains that generic term. Granite is composed of three principal substances—quartz (flint or sand), mica, and felspar in various proportions. When quartz prevails, the soil is inferior. The other two ingredients, mica and felspar, have also a varied composition, the magnesian or uniaxial mica, forming a better soil than the ordinary micas, the soda felspar (albite), when decomposed, forms the Cornish porcelain clay, a very unfertile stuff only; whilst the potash, or red and flesh-coloured felspars, as they are frequently termed, form the richest soils. The quantity of iron present has a considerable effect not only on the character of the soil, but also on the facile decomposition of the rock, forming a richer soil and more [illegible] prevails.

Upon investigating the more fertile parts of Cornwall, it will be found that in proportion as the soil has been formed from rocks containing considerable quantities of potash felspar, is the quality of the soil improved—in such places the quantity of the felspar in the granite being found as high as 70 to 80 per cent. Frequently accompanied by a considerable portion of oxide of iron, which contributes to its more facile decomposition. It is this circumstance which explains the unusual fertility of the "growan" soils in the parishes of St. Burian, Sennen, and St. Levan, which are always let at very high rents. It may be almost invariably remarked throughout Cornwall, that the richest soils are found at the junction of different formations [illegible] and are locally spoken of as veins of rich land. In the neighbourhood of Mount's Bay and the vicinity of Penzance is a great number of such circumstances combine to render this locality peculiarly fertile, for contiguous thereto is found a rich decomposing potash felspathic granite at the junction of the decomposing slate, intermixed with erupted greenstone and trade porphyry. This intermixture of which has rendered apparently the most fertile soil in England; as an example of which it is related by Mr. Rashleigh, "that here there is occasionally produced what cannot be realised in any other district in England two crops of potatoes in one year; one acre yielding three hundred bushels (imperial) of early spring potatoes planted in November, and dug up in May and June, a crop of wheat, and 100 bushels for the second crop of potatoes dug after the crop of late potatoes planted in June yielding 400 bushels per acre. The usual method being to obtain a crop of early spring potatoes, after which a crop of turnips." It is not to be supposed that this fertility is universally peculiar to the vicinity of the Lizard, composed principally of [illegible] and [illegible] but even in the latter formation, and very sterile. It is very remarkable as producing a beautiful heath, the *Erica vagans*, (which it is said not a single specimen can be found out of the bounds of its formation, but in spots found in the vicinity of Liskeard, where the serpentine again crops out, which further bolsters itself by the deterioration of the soil [illegible] immediately. It occasionally happens that veins of dunlage and horn-stone run through the serpentine, in which case the intermixture adds considerably to the fertility.

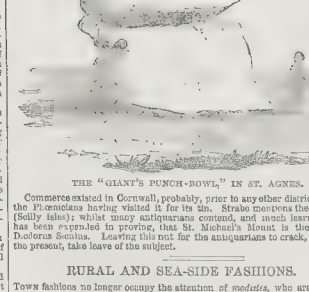
The soil on the Hornblende rocks which adjoin the serpentine forms a great contrast with the latter, being finely undulating, forming a remarkable contrast with the flat monotonous aspect of the serpentine. The former occupies the "*marle soil*," in consequence of their using this rock as a manure when decomposed, in which state it is found to be a considerable depth.

The slate formation, provincially called "Killas," occupies the greatest superficial extent of any particular geological formation in Cornwall: that part near Penzance is very fertile. Where much elevated, it generally consists of barren moors; and from Hayle to Perranzabuloe, a considerable extent of "waste" is a large portion of the district just named is, however, occupied with mining. The mines are to a considerable extent connected with the presence of erupted dykes of porphyry, the decomposition of which frequently forms a very fertile soil when mixed with decomposed slate. In the mining districts, an extensive breadth of land is occupied in small holdings by working miners and cottagers, a great portion of which has been reclaimed from the "waste" by these industrious individuals.

From Padstow to the commencement of the carbonaceous rocks, numerous bands of greenstone have been erupted amongst the slates, accompanied in several instances by [illegible] of volcanic ash, constituting considerable tracts of calcareous land, known locally as "killas," from its appearance in this and the adjoining county, under the names of diamsone and hornblende dun. Of a like character is the [illegible] district extending from St. Agnes Castle [illegible] to Callington. From this town to the British Channel [illegible] and the Looes, the soil is generally light, free, and loamy, resting on red, grey, and variegated shales, occasionally mixed with greenstone and volcanic ash, already named. Where this juncture of igneous and argillaceous rocks and volcanic ash is found, the soil is always more fertile, and obtains a higher rent. A similar remark applies to the soils on the cultivated rocks in Cornwall. The soils in the [illegible] are far from good, though occasionally fertile spots are found, as at Launceston, where some erupted trappean rocks exist: a [illegible] there, consisting of a [illegible] which, when [illegible] forms a good soil. The [illegible] of the south [illegible] and west of Launceston.

The Cornish tonst, "Fish, Tin, and Copper," indicates that the inhabitants of the county owe much of their prosperity to the [illegible] of these products. In reference to agriculture. An enterprising people, like the inhabitants of Cornwall, are not likely to overlook any advantage calculated to be beneficial which may be pointed out to them. Amongst these we may mention the rendering available the potash in their felspathic granites, and using the sulphur of their ores, now burned to waste at Swansea. Nothing can be more absurd than the fact of Cornish farmers buying super-phosphate of lime in London, formed of a mixture of sulphur obtained from Sicily, when they have such a superabundance of that material in their copper ores and mundics. Coprolites, from the east coast, and bones, can be imported as cheap as those manufactured [illegible] and [illegible] and London in the world are more certified hands at [illegible] and [illegible] and improvement. In the two subjects hereto pointed out, the farmers of Cornwall and the adjoining county have almost an unlimited source of manure to fertilise their unwasted lands.

The Cornish mines are, perhaps, the most perfect and extensive in Europe, and form an instructive subject to parties interested in mineralogy. Amongst these, as regards [illegible] the [illegible] Mine, [illegible] Mine, and numerous Druidical remains. The former have long passed antiquarians how a rude people could lift and adjust such huge masses of rock as some of the Logan stones at the present day, they can only afford proofs of the extensive decomposition and frequent denudation of certain rocks, the hard parts only being left. As an illustration, a representation of the Giant's Punch bowl in St. Agnes, one of the Scilly Islands, is given. An inspection of the drawing will shew that "*the pan* [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] selling away the edges of the lower stone, thus rendering [illegible] an extraordinary lifting power, wholly unnecessary.



THE "GIANT'S PUNCH-BOWL," IN ST. AGNES.

Commerce existed in Cornwall, probably, prior to any other district in Europe, the Phœnicians having visited it for its tin. Strabo mentions the Cassiterides (Scilly Isles); whilst many antiquarians contend, and much learned research has been expended in proving, that St. Michael's Mount is the "*Ictis*" of Diodorus Siculus. Leaving this nut for the antiquarians to crack, we must, for the present, take leave of the subject.

RURAL AND SEA-SIDE FASHIONS.

Town fashions no longer occupy the attention of *modistes*, who are exclusively engaged with the new costumes for rural *fêtes* and for watering-places. For the country, toilets, although less costly in appearance, are certainly more tasteful than those of town. Flowing gowns of organdi, plaited like a blouse round the neck, with scallop trimming all round, opening up at a cambric slip, embroidered with large flowers, drawn in to the waist with a wide sarcenet ribbon, also scalloped, are elegant *negligés* for breakfast. Loose pelisses of figured organdie, or muslin, trimmed with flounces of the same, surmounted by a narrow trimming of Maltese lace, add to the simplicity of this

* It must not, however, be understood that [illegible] place at all localities, or in some parts of the same districts the junctions are very [illegible]

† Probably Cornish acres; six statute acres being equal to only five Cornish acres [illegible] Many have entirely replaced the barèges so much in demand last [illegible] Short skirts of these light dresses are made very wide: some are [illegible] others, but the most part are trimmed with flounces *à la gauffre*. [illegible] ribbons has entirely returned, and is shown by wide [illegible] indispensable in every costume for the country. Braided [illegible] made quite plain, and opening in front from grey silks, so braided, with a polka of the same, make pretty walking dresses; and wide riding skirts are made in fine Cashmere, upon which are fitted rows of plaited cambric, these light riding habits being infinitely more becoming to young girls than the heavy skirts of cloth. Instead of the natural weight of the cloth, which makes them fall, is put at the bottom of the cashmere skirts a hoop of Spanish lead, or small shot fastened, like the Andalusian skirts. Round grey hats have replaced black ones. The finest linen is worn in small collars and cuffs. Jewels are now laid aside for natural flowers: these, gathered in all their freshness, form the only ornaments to the double skirts of zephyr gauze. Natural flowers, to last through the heat of dancing, are thus prepared:—Separate each flower from the stalk, for which substitute the finest wire, passed through the heart of the flower, after having secured the sap in the stalk with a little sealing-wax: the flowers once thus prepared, may be grouped into bouquets, garlands, and bunches, adding to them branches of green leaves. Nothing is more becoming than these head-dresses, renewed every day. Large round broad-brimmed Pamela straw hats, trimmed with long floating ribbons, are the most convenient for shade from the sun, at the sea-side; and although they have been generally adopted this year by very little girls for walking in the park, they are also worn by ladies and young girls, to whom, however, they are very becoming. The most dressy bonnets are made of white tarlatan, and are composed of a full round cap, and a bunch of the flowers of summer. Shell beads are very much worn, particularly of grey "coutils;" they are indispensable for country costume. Cloaks are worn almost always the same as the dresses; but there is no great novelty in this article. For afternoon dress, polka of black or white lace are worn; and large Cluny crape shawls are *comme il faut* to wrap oneself up, in case of the air being chill.

AN ARCTIC NEWSPAPER.

The officers on board her Majesty's ship *Assistance*, employed on the expedition in search of Sir John Franklin, have beguiled the tedium of their voyage by the publication of a manuscript Newspaper, the first Number of which has been obligingly forwarded to our office by a Correspondent. It is entitled *The Aurora Borealis*, and issued from Baffin's Bay. The leading is a view in the Arctic Seas, with icebergs in the foreground, and ships in the offing; the *Aurora* being personified by a half-length figure, beneath which is the motto, "Spes semper lucens." We are aware that this intellectual pastime is not altogether unprecedented, as the *North Georgia Gazette*, and similar publications in previous voyages to the Northern Ocean.

In the opening address of the *Aurora*, the editor states—"The journal we have now taken has been for the amusement of the officers and ship's company of her Majesty's ship *Assistance*, during the dull and dreary hours, when—

'Mingling, day and night
(Sweet interchange, which makes our labours light)
Will be unknown.'

and our sacred mission will not demand our services. It will amuse and instruct, and we hope it will be a bond to unite and keep up a spirit which will, we trust, reign triumphant throughout, and cause our ship, in after years, to be fondly and dearly remembered by the name of the 'Happy and Jolly *Assurance*.'"

We quote three specimens of this Arctic Journalism:—

ACROSTIC.

S ince other efforts have been vain
I ce-barriers to evade;
R esolved no danger shall restrain

J oint search for Franklin's sad.

F or Franklin's sake we'll brave the fates,
R elease his ships and crew;
A nd bring him home through Behring's Straits—
N o other way will do!
K ind friends our safe return will hail,
L ong absent from their care;
I n joy we'll spread our homeward sail,
N ew destinies to dare.

HONORIFICABILITUDINITAS.

TRANSLATION FROM "LES RAYONS ET LES OMBRES." (VICTOR HUGO.)

NIGHT OF JUNE.

From hidden flowers, when the summer's day has fled
The plain, inebriating perfumes sweep;
Eyes closed, ears to the various murmurs wed,
One's slumber is but a transparent sleep.
Purer the stars, much sweeter shades appear,
A dizzy half-day paints the eternal dome;
Watching her hour, Morning, pale and clear,
Seems all the night beneath the sides to roam.—E. D.

ACROSTIC.—INSTALLED ARSI-FANE.)

I n the gloomy despair of a long Arctic night,
N ear the bleak shores Polar Lears roam.
T he heroes whom England had sent to her aid
E spies on their country and home.
E very hope that I had tended their sorrows to mend
P ass like dreams with the long year away;
S o their sorrow, their hope, shall be [illegible] to cry!
D oes not England their worst fears allay?

A y! *Assistance* does come with speedy relief
S oon their sorrows and fears to dispel;
S ad, but few, are the days they will sojourn in grief,
I n despondency nothing can quell.
S uch are our hopes for the best:
T he *Assistance* for friendship and mercy has sailed,
A ll on board are being bent on success,
N o obstacles daunting, all dangers assailed,
C e-tating round, aside to succour distress,
E very eye being turned to the west.

To the Editor of the "Aurora Borealis."

SIR,—Having heard from an Arctic voyager that he has seen *crows' nests* in the regions, I request you will [illegible] whether they are built by the crow (*Corvus tintanoides*) which Goldie states "to utter a metallic like croak." My fast friend begs me to inquire when rook-shooting can means in these diggings?

A NATURALIST.

[We would recommend "A Naturalist" to visit these crows' nests, which is practicable, and when do exist in the Arctic regions. We would also advise his fast friend to investigate these said nests more thoroughly; he would find them tenanted by very old birds (ice-quartermasters), who would not only inform him of the species of *corvus* and the sporting season, but would give them a fair chance of shewing him how a pigeon may be plucked.—EDITOR.]

"SNIGGLING" FOR EELS IN THE RIVER LEA.

What is a name? SHAKSPEARE.

A GREAT deal. Is there [illegible] nothing infinitely more Arcadian in "Chloris and Amynton" than in "Jack and Joan?" and does not "Richard Cœur de Lion" have the world far better assurance of a noble knight than "Frosty-faced Fogo?" Now call to mind the semi-snaky creatures that furnish our *dramatis personæ*—pseudo-serpents. You could not "troll" them, nor "angle," [illegible] "bottom fish:" "eel-spearing" has a bumbastic sound, and "Bobbing" is low "Sniggle" is the word to the matter born. Its origin is obscure. Dr Samuel Johnson merely describes it as a verb neuter: not a syllable about a worm at one end, and a fool at the other. This round, cold word conveniently "holds it" as worthy his muse;" and "thus," according to gentle Izaak, "sniggling is performed. In a warm day, when the water is lowest (you will observe this is about the height of the season) take a strong small hook, tied to a string about a yard long; and then into one of the holes where an eel may hide herself, with the help of a short stick, put in your bait leisurely, and as far as you may conveniently: if within the sight of it, the eel will bite instantly, and as certainly gorge it: pull him out by degrees." Brummel said—if my memory serves me—that one could not be further off from being a gentleman than to be a fool. Now, to be ignorant of sniggling is to be ignorant of a fool. Now, to be ignorant of sniggling is to be ignorant of a fool. Now, to be ignorant of sniggling is to be ignorant of

MANDRILL BABOON IN TH[E] GARDENS OF THE ZOOLOGICAL SOCIETY, REGENT'S PARK.

me that the tree appeared to be quite alive with these little animals. The rapid and unsteady motion of the boughs did not appear to impede their progress."

If you are now prepared to "snigale," come forth, and take counsel by the way. Unlike other fish, the eel always swims with the current, and never against it. It is peculiarly sensitive of temperature, and, during the cold periods of the year, societies of this species bury themselves in the soft earth and mud, and pass their time in a torpid state, without food of any kind, as swallows have been observed to do. From June to September will be found the best season for the sport under consideration. Your locality shall be the lucid Lea, anywhere between Ware and Bow-bell. Select a site similar to that chosen by the artist whose characteristic sketch embellishes this notice. Your business, bear in mind, craves wary handling—a bungler will make no "snigler." True, you may see ragged boys, with crooked pins for hooks, and anything at all for rods and lines, circumventing the wriggling quarry; but pursue it with appropriate tackle—essay it with fair machinery, and your labour shall reward your pains.

Let your rod be two feet and a half long, and made of stiff bamboo. To this let there be a flexible toy affixed—such as will remain at any segment or curve that may be required. Half a yard of stout bell wire is the best material you can use, as it can be bent or inbent according to present necessity. The dapper "Sniggler" turned out by a metropolitan fishing-tackle maker is accounted with subtleties in hickory and the like—but these are only vanities. They are pleasatory puppies, as well as *boudoir beaux*, like Lord *Bouverie-in-Paradise*. The rod may be constructed with two telescopic joints, with room for the wire-top. The line should be of hair, stoutly plaited. This must not be fastened to the rod, but held in the hand, wound round the common thumb-winder. To the lower end of the line attach a strong hook, say No. 5 or 6. That, however, which the amateur greatly prefers is a button-needle, such as glovers use, with the point broken off, and whipped silk (silk waxed with shoemaker's wax), laying the end of the line about half-way down the needle, within a quarter of an inch of the eye. The line will then hang from nearly the centre of the needle, the finer portion of it uncovered, and also a quarter of an inch of the thicker end. The bait should be a worm, the needle being first passed into the thick part near the tail, and then drawn so as to complete cover the needle. Now survey your station for crevices, holes under stones, and similar places, likely to harbour the prey you seek. Having fixed on these, place the tail end of the worm upon the wire end of your rod, near to the tip, and then insert the head of the bait just inside the mouth of the opening, whatever it may be, taking the precaution to unwind so much of the line as will allow of this being done with facility. If there be an eel within, and disposed to bite, you will have but a short time to wait. Presently a gentle pull will be felt: don't be in a hurry, give your fish time to gorge his hook—a minute or two will suffice: then strike smartly, and the needle will become fixed athwart the eel's throat. Now shorten your dainty skill. Pull with resolution, but also with discretion. Be mindful of the strain on your line, and also that the hold on the fish may give way if it roughly tried. Hold on till the captive begins to relax his strain; then draw him scientifically, as you would a doubtful cork from a flask of pet Burgundy, and lo! he is landed.

Such are the rudiments of Sniggling. To become a proficient in the art, you will need experience, joined to local knowledge. Should your passion for the pasture induce you to consult some eminent hand to acquire the refinements of the craft, you may meet with an eminent master in the person of Mr. Salter, whose work upon this recondite science is thus spoken of in the "Encyclopædia of Rural Sports:" "Mr. Salter, with the professional ardour of a true London angler, has entered into an elaborate description of the most approved apparatus for the purpose, which he has done with a minuteness of detail that not only evinces his own proficiency as a 'snigler,' but shows how much he was interested in making others equally so; and we should be robbing this excellent practical writer of his just due, if we did not own that our figures and description of the apparatus and precise concerned in Eel 'Sniggling,' are indebted to him for their principal value."

Progress, which in the days of our fathers looked upon ten miles an hour as quick work, now travels by the electric "telegraph." The disciple of the gentle art, who whilom knew no ambition beyond a mountain trout killed by a fly of his own dedecking, now desires a ton of Swedish salmon for his morning sport. Nevertheless, even within an hour's reach of deepest Cockaigne is many a pleasant wavy river's bank, wherein a summer's day may be loitered away in wholesome recreation. Reader, art thou cognisant of "The Complete Angler"? The author was he who proved that truth did not lie in a well, but in the running waters. Moreover, he was the especial genius of the scene of this our "Sniggling."

Oh! pleasant Master Walton,	God rest thee, gentle Izaak—
The white and sweet Lea river,	Thou wert the best of the angle
That runneth through meads,	All the river fair,
And 'tween ragged reeds,	From Lea-bridge to Ware,
Babbleth of thee for ever.	Thou didst love to disentrail.

And whose followeth him throughout his course—rod in hand, and fancy-free—what time the soft air, the song of birds, and the incense of nature bid him abroad, verily, shall not regret his pilgrimage.

MANDRILL, IN THE GARDENS OF THE ZOOLOGICAL SOCIETY, REGENT'S PARK.

This fine specimen of the Mandrill has lately been received from Mr. George Brand, her Majesty's Consul in the province of Angola, in South-Western Africa; and has been disposed of by Mr. Edmund Gabriel, her Majesty's Arbitrator in that province, to the Zoological Society.

This Mandrill is between three and four years old, and is a remarkably fine specimen of the genus to which it belongs.

The Mandrill, which is considered the largest of the Baboons, or short-tailed Apes, is a native of Western Africa; and, although generally docile enough when young, it acquires some ferocity as it grows old. The present specimen measures about five feet, when standing upright; and it is impossible to look at its figure without at once perceiving that it is endowed with great muscular power. It is, we believe, the only specimen of the Mandrill in England, and much credit is due to the gentleman through whose exertions it has been brought to this country.

Mandrills are said to march in large bands, and frequently commit great ravages among the fruits and crops; sometimes even plundering the Negro villages, during the absence of the inhabitants.

"SNIGGLING FOR EELS."—DRAWN BY DUNCAN.

SEAMER HOUSE, THE SEAT OF THE KARA..... FAMILY, IN TAMBOV, 1100 VERSTS FROM ST. PETERSBURGH. (SEE NEXT PAGE.)

CHAPEL FOR THE CONSUMPTION HOSPITAL, BROMPTON

a beautiful edifice was founded by the Rev. Sir Henry Foulis, Bart., who laid first stone under the east window on August 30, 1849; and was consecrated on the h of June last, by the Bishop of London. It is specially intended for the use he patients of the Hospital, and was erected in memory of a near and dear tive of the founder. On the day of consecration, sermons were preached by Lords Bishop of Worcester, of Lincoln, and of Oxford, after which very con- rable collections were made in aid of the excellent Charity.

We abridge the following architectural details from the *Builder*:—

he Chapel consists of a nave, north and south transeptal projections, and ncel. The interior fittings of the nave are divided into classes, the two first rs of seats eastward being appropriated to the committee of management and bers of the institution. The next seats are for patients in a very weak condi- , and requiring the greatest degree of ease; these sittings are therefore arated by arms. The next sittings are still wide, and the backs far apart, but hout arms; the last seats, up to the west wall, are of the ordinary dimensions he open seats in churches, for those patients who may be recovering, and o may shortly leave the institution. The whole of the interior fittings are oak, some bearing the arms and crest of the founder: these happening to n most appropriate decorations, have been freely used in the interior as well exterior of the building; they are, heraldically "Arg. three bay leaves per; crest, a crescent arg. surmounted by a cross ss.;" the motto is, "Je ne nge qu'en mourant." The crest has been most frequently used on account its being applicable to the building—"Christianity overcoming Paganism." floor under the seats is boarded. All the other parts of the nave are paved h terro-metallic tiles, red and black: in one portion, between the pulpit and ding-desk, the arms, crest, and motto of the founder are laid with Minton's s. In the north recess an organ will be placed, the pipes to be within oak- ered screens on each side of the window. The organ is a present to the pel.

The chancel has two sedilia of stone of a florid character, the crockets, finials, d other carving, being combinations of the founder's arms. The crockets, &c., of credence table, are formed of vine leaves and wheat-ears. On each side of the ancel are seats, with traceried fronts. The whole of the chancel is paved with inton's tiles, in blue, red, and buff patterns. The chancel is separated from the ve by a low traceried screen. The east window is filled with stained glass; other windows of the chancel contain stained glass.

Adjoining the Chapel is a robing-room and bell-turret, seen in our view of the er or

The Chapel is approached, from the Hospital, by a corridor about 83 feet in gth, so that the patients may not be exposed to external air in bad weather.

The roof of the Chapel is of deal, open-timber framed, hammer-beam trussed, h diagonal ties, curved struts, arches, and pendants, the spandrils, &c. filled with tracery. The whole is stained, and is very effective.

Externally, the walls are of Kentish rag, and all the decorative parts are of en stone. The roof is covered with *old* plain tiles, interlaced with terro- metallic repeating tiles. The low part of the corridor is of red brick, to corre- nd with the Hospital; and the other part, built to correspond with the Chapel, ofty and gabled.

The contract for the Chapel was taken by Messrs. Hopkins and Roberts. The mmodation is for about 200 worshippers. The architect of this elegant morial Chapel is Mr. E. B. Lamb.

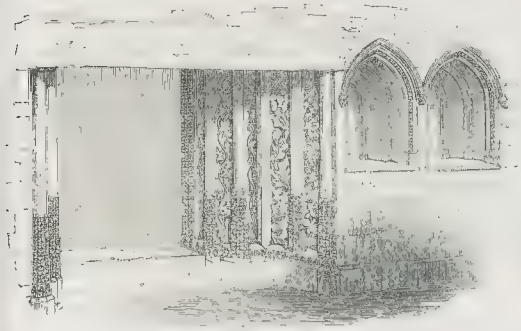
CHAPEL FOR THE CONSUMPTION HOSPITAL, BROMPTON.

ANCIENT DOORWAY DISCOVERED AT BURTON-UPON-TRENT.

(From a Correspondent.)

e engraving is a Sketch of an ancient doorway discovered a short time since in aking alterations in the Garden of the Abbey, at Burton-on-Trent; the finding of doorway of a separate chapel. The abutments showed that it measured 62 feet by 21 feet or thereabout. We found the stained glass broken and scattered on the floor, and the encaustic tiles ran over with the exception of broken fragments. I dug to the floor in these places—it was about 4 feet below the surface; and a spade, and soon dug down by the wall side till I had satisfied myself I had made a discovery. Being aware that an ancient doorway was below the surface and filled up with a rubble wall, I directed the masons to remove the wall, which being done, had open the beautiful work. I excavated and discovered it was the beneath the floor in one place found a body laid in a coffin of Irish stones: the remains were examined previous to careful re-interment, but no coins were discovered, nor did the coffin contain relics of any kind.

There is a record among the Abbey papers that the Abbot of Burton, in the



ANCIENT DOORWAY DISCOVERED AT BURTON-UPON-TRENT.

RUINS OF BRAMBLETYE HOUSE, SUSSEX; FROM AN ORIGINAL SKETCH.—(SEE NEXT PAGE.)

year 1470, built the Chapel of the Confessors; and as there are no traces of any other separate chapel having existed, we suppose this must have been it; and the more so, as the character of the architecture is of that period.

SUMMER VILLA OF A RUSSIAN NOBLE.

[illegible], Chernaeow, July 14.

ACCOMPANYING is a sketch of the elegant summer residence of the Kara ... am ly, situated on their estate in the remote government of Tambov, about 1100 versts from St. Petersburg. It will serve to convey to you, and to our friends in old England, some idea of the abodes in which the Russian nobility pass their lovely but fleeting summer. It is the property of a noble, neither very rich, nor of the highest rank, but one who has served his country in many a tough campaign, and still serves it well, by combating the prejudices of the several thousands over wh[illegible] odious sway extends, endeavouring to render their easy lives more manly, and consequently more easy still. You will perceive how far he has succeeded when I describe to you part of the building th[illegible] ing of [illegible] of his peasants, whom he has instructed; the same hands digging and preparing the clay, making the bricks, and building them up into wonderful forms; taking the stones from the quarry, and chiselling them into wondrous devices to ornament the same: their teacher, architect, and friend being at the same time their friend and master.

Never shall I forget the first *coup d'œil* I enjoyed of this charming place. [illegible] it seemed akin to enchantment: when, on the fourteenth evening after our departure from St. Petersburg, we, exhausted with the heat, and nearly suffocated with the dust, wandering low and where I should pass another night, whether on an assemblage of chairs or greasy bench, with a travelling cloak for a [illegible] or in a litter of straw, we gradually all in the very gentle manner at a[illegible] knock-down door. I was suddenly roused from my reveries by such a shout as shipwrecked mariners on a raft might be supposed to utter on beholding the long watched-for sail come at last. A turn in the road we travelled revealed the whole princely fabric at once to our astonished vision. I say "our," for so many magnificent additions had been made to the birthplace of my companions, by their indefatigable father, since their last visit, that they had great difficulty in recognising the "old house at home." "Ei Bogu[illegible] Kargalskoi! Kak tudyasnoe dom!" burst simultaneously from the lips of all, in accents so [illegible]

[illegible] on each side a grand Gothic [illegible] and with great accuracy [illegible] s it were stone; passing through which we passed our way [illegible] quadrangle, till, arriving in the middle, by a direct line from the gate, we turned to the right, following the curve of the drive through flower-beds shrubs, and columns of creeping plants trained to a great height. This brought us to the front or carriage entrance, situated in the main and original body of the building, being the other side of that given in my sketch. This part of the house is for the exclusive use of the family, differing little in appearance from the other, except that in the quadrangle [illegible] of covered [illegible] corridors, which [illegible] erve pillars and pointed arches, are, for the most part, composed of the white stone before mentioned. The one on the left comprises the kitchen and its appurtenances, cooks' rooms, Seigneur's clerk's room, the apartments of an old nurse, with others for the accommodation of strangers on business, not admitted to the family table. On the opposite side are the apartments of the intendant, the laundry, dye-house, mangle-house, carpet manufactory, [illegible]-workers' room, storerooms, [illegible]-cellars, &c. Continuing to turn and we have the [illegible] erections, designed as the barrack-places of the [illegible]. They are distant about thirty feet, but the line of the quadrangle is carried along by an [illegible] of brick, or, more properly speaking, a trellis formed by placing the bricks on end and leaving the arches with spaces [illegible] on each, having the appearance, in [illegible] has the most novel and pleasing effect. Behind this pretty range they are now digging [illegible] for a new church, belonging to the Seigneurie, to be dedicated to the Apostles Peter and Paul. Adjoining, and forming the gloomy mausoleums in a perfect [illegible] of art, was a fine arch leading out from the quadrangle. It reminds one of the [illegible] a window, made of the [illegible] from some [illegible] and a hill. It has a most [illegible] cut out of [illegible] said white [illegible] thanks with [illegible]

[illegible] on well with the rest. These are very small, and in their present state capable of accommodating 50 or 70 horses, but it is the intention of the proprietor to add to these, as he has done to his house. Here are several fine [illegible] of them, called Sulkeys, carried off several prizes at the Moscow Races a short time since. There are also six beautiful bays for harness, and [illegible]

[illegible] [illegible] [illegible]

[illegible] [illegible] [illegible]

[illegible] [illegible]

THE TRAVELLING ENGLISH.

Impressed as we are, by various reminders, from the earliest days of the Eton Latin Grammar to the present hour, that Time flies quicker than anything else, even the electric telegraph, still, year after year, the rapidity with which the season comes always surprises us.

Winter passes, and, before the crocuses have drooped, the amusements of the Operas proclaim that the Season is commencing. Gradually, as we have more than once shown in this Journal, it reaches its height. We still anticipate its gaieties, from long habit acquired all through the winter—still plan any number you please of amusements—still look forward to finer weather; and, in the middle of all this, we are startled by finding town emptying, Parliament ending, blinds closing, advertisements thinning, the Continent teeming with English, everybody gone everywhere, and the much-looked for Season slipped away whilst we were thinking about the enjoyment it we intended should characterize it.

It [illegible] close in London. The most plodding people [illegible] have laboured at their various callings since October patiently, without complaint, get irritable and restless, and long for expansion and circulation; all their metropolitan summer pleasures are coming to a rapid end. The window mignionette has straggled to seed, and is dry and dusty; the whitebait have turned to gudgeons; the theatres have closed; the Operas have exhausted their [illegible] movements in the fire-grate have become unpleasantly [illegible] has got to a shilling; clubs are deserts; peas and [illegible] that were—now only dwelling in the calm, deep [illegible] evenings are unbearable; and one cannot live for ever [illegible] ice and its compounds. There is no help for it: make what excuses you please—the power to stay, or the wish to remain—[illegible] or the sickness of the climate—my real, doubtful, or imaginary [illegible] you can but [illegible] the same [illegible] save to go abroad or to London.

There is a comical trick of experiment, perhaps, is the most proper town—performed with an electrifying [illegible] A number of well-dressed figures, collected on a conductor, in a grave and orderly manner, upon being excited, [illegible] much restless activity, dart suddenly away in every direction, in [illegible] feverish manner, as diverting to contemplate as it is incomprehensible to account for. Some dart off at once—others jostle and waver before they take their departure—and one or two always remain for some time, as if in grave incertitude, until, at last, unable to resist the impulse, they fly away like lightning, and [illegible] appear.

Something very like this movement is now commencing amongst us: and in another fortnight the Continent will be overrun by travelling Englishry and preparations for the reception of our sovereigns have already been made in all the hotels. No matter in what [illegible] the Hôtel [illegible] Rhenish, or the Hôtel [illegible] enlogement, or the [illegible] zum Rheinberg, or the Maison della Posta, or even the Astor House [illegible] New York, Shephard's at Cairo, Delmonico's at [illegible] [illegible] the contrary, the Crown and Coach, the Post [illegible] Pole—at all these places polyglot waiters have been [illegible] predominant), and huge stocks of London bottled porter [illegible]

Now it is that *B* [illegible]s in double quantities [illegible] Continental, and Ostend, Dieppe, Calais, Boulogne, and Havre [illegible] tions at Southampton, Brighton, Folkestone, Dover, and London-bridge [illegible] have constant change of passengers, with mighty luggage, for one night only. Now the cockney Rhine, and her graceful sister, the beautiful Moselle, rub up their boats, and prepare their banks for any amount of deposits. Now all the flies about Rolandseck and the Drachenfels, and the Lurleyberg are read over again by the romantic, and prudently scoffed at by the unbelieving; and folks take sketches of points on which tons of black lead must, years ago, have been expended; and drink perpetually, beginning at six in the morning, because they are on the Rhine, and it is cheap; and bathe at Baden, being in perfect health, to cure themselves; and, after Shakespeare, think Murray's handbooks the greatest works ever written.

Now, still further, the large family of the South—whose different members have won cottages [illegible] [illegible] sermons, with farces, and been knighted, transported, [illegible] these good people also flock abroad, and [illegible] More Murray's "Hand-books" everywhere—up on the top of the Jura, and down at the bottom of the Gemmi—lying on the [illegible] lonely convent of the Great St. Bernard—[illegible] rooms of the lively Interlaken. Now [illegible] is nothing in the world has such a wonder [illegible] tain. Once now [illegible] Switzerland. The [illegible] they flavour their trout with Burgess's Essence [illegible] drink London porter with the rear of the [illegible] ing in their sedan; the burly little corporal [illegible] up in a hat or Rowland's Kalydor; and, if the [illegible] of Zurich's fair daughters" dressed in the newest magic [illegible] may be sure enterprise is asleep for the time. Still further away, the [illegible] mountaineers have prepared for the English outburst. The [illegible] [illegible] Wenger-Alp under the shadow of Vesuvius (and the [illegible] an ascent); they can buy Day and Martin's blacking after a day [illegible] through Constantinople (and they need it equally); Professor [illegible] way dispenses his pills at Athens for them (which, perhaps, they do not need so much); and it is hard indeed, if at the stronghold of steel, Damascus, they do not find some Birmingham pens to write home with. If Paris were the city to which all roads ran, London is the city from whence all roads start. If a second Bruce would only go a little further south, and Mr. Gordon Cumming a little further north, so as to established a fixed and certain highway through Africa, from Cairo to the Cape of Good Hope, in another year there would be excursion parties to the Equator; and we should have views of Dongola, Zanzibar, Kasonde, and other strange places, where Mr. Sheriff Nicol had established a Palefot Consolidated Railways would follow, as a matter of course; and the Equinoctial Line be the cheapest, as its heat could not melt its own water. *Lobsdale*, already a large book, would become the size of Bohn's Guinea Catalogue, and require a regulation buffalo Overland portmanteau to [illegible] Indeed, greater than that of his [illegible] Elizabeth. "He shall [illegible] hang [illegible] [illegible] ing placed on the [illegible] boy and a puppet. Interspersed [illegible] public, knowing that the Continent's [illegible]

"Ah, that's something like a place—great people the Turks, sir. I sold half-a-gross the first day I got there. They were all children's handkerchiefs too—cotton ones, the alphabet round them, and a dancing [illegible] in the middle. I persuaded them that the letters were spells against Russia, and that the bear was the Emperor, and the man [illegible]cking him dance, Mr. Cobden. They'd heard of him, bless you, heaps of times; and so I did a capital business."

"How did you find Egypt?"

"No great things; the climate's too dry. Nobody ever has a cold in their head there, except the travellers on the Nile, from the night-dews. But that does no good: they are all nobs, and bring their own handkerchiefs with them. No; give me Lincolnshire when the floods are out, in the influenza time. It's worth all your Athenses put together—that it is."

Our friend quitted us at Malta, to try [illegible]k at Tunis. How he fared there, or [illegible] reader's hands, half London will have left town. Monster [illegible] packed carriages on their trucks, are leaving our turmoil every hour for the sea-ports: cheap excursions, which we believe will end in "To Paris and back for a shilling," are taking off additional hundreds. tourists generally are running, as thick as ants, over all the show spots of Europe; and those who cannot afford either time or money for a Continental scramble, still cannot stay at home, but establish themselves with a false medium, through which they comfortably find a Switzerland on Hampstead Heath, a Bois de Boulogne at Boshcrville, a Versailles at Hampton Court, [illegible] in the Desert on the dull, level sands of Worthing.

ALBERT SMITH.

THE NEPAULESE MINISTER.

The following passages relative to the Nepaulese Minister, are extracts from a letter from Calcutta, written on the very day of his embarkation for England:—

"Calcutta, April 7.

"The visit of the Nepaul Minister will be, I imagine, the most remarkable you have received this century. Rambuhn Roy was a clever, quiet, intellectual Bengalee Hindoo gentleman, who, I believe, turned Unitarian, and died in [illegible] [illegible] [illegible]

EMIGRATION OF DISTRESSED NE[illegible]

Although in our review of the S[illegible] of public amusements, we ought not to los[illegible]ct that one teristic of the past year has been that in t[illegible] so much pleasure, some of the most distinguished votaries of fashion hav[illegible]e so[illegible] the addresses made to them by Mr. Sidney Herbert, the Rev. Mr. Quekett, [illegible] personal interest tak[illegible] their fate by the noble ladies who [illegible]o hard in their b[illegible]lf, were among the most touching inci-

[illegible]tions, one representing the deck of one of these ships, the [illegible]lecks, with the female emigrants making their arrangements

THE ILLUSTRATED LONDON NEWS.

SECOND SUPPLEMENT.

SATURDAY, AUGUST 17, 1850.

PROROGATION OF PARLIAMENT.

On Thursday, as previously announced, her Majesty prorogued Parliament in person. The pageant as usual attracted vast numbers, the various avenues in the Park, from Buckingham Palace to the Horse Guards, and the street thence to the House of Lords being densely thronged with the lieges, who at once gratified their curiosity and testified their loyalty by an inquisitive gaze and a hearty cheer as her Majesty and Royal Consort and the gorgeous *cortège* passed along. Before twelve o'clock the windows in the neighbourhood of Whitehall exhibited a gay assemblage of fashionably dressed ladies and gentlemen, anxious to testify their loyalty to the reigning Sovereign.

The doors of the House of Lords were opened at twelve o'clock for the admission of those who had been so fortunate as to obtain the necessary tickets, and before one almost every seat was occupied by Peeresses and other ladies, whose elegant and gay attire, combined with the gorgeousness of the edifice, presented a most magnificent and imposing spectacle.

At one o'clock a detachment of the Guards arrived, and lined the whole of the way from the Palace to Westminster Hall; being assisted in the performance of their duty by a strong body of police, under the superintendence of the Chief Commissioners.

At twenty minutes before two, the Queen and Prince Albert left Buckingham Palace, passing through the entrance to the Horse Guards at two o'clock. In ten minutes from this time, the guns announced the arrival of the Queen at the House of Lords; and in another five minutes her Majesty entered the House, preceded by the heralds and officers of state, bearing the Mace, the Sword, the Cap of Maintenance, and the Crown upon a velvet cushion. Her Majesty, led by her Royal husband, and attended by her ladies, ascended the steps leading to the throne, Prince Albert taking his seat on her left hand. Having graciously bowed to the House, and seated herself, her Majesty requested all present to be likewise seated; when the Usher of the Black Rod was commanded to summon the House of Commons to attend, who shortly afterwards returned, accompanied by the Speaker and a great many members of the Lower House.

The Speaker then advanced to the bar, and made his obeisance to her Majesty, which she graciously and courteously acknowledged. He immediately addressed the Queen in a short speech, in which he briefly alluded to some of the more prominent measures which had occupied the attention of the House of Commons during the session now brought to a close.

Her Majesty then gave her Royal assent to the following public and private bills:—Spitalfields and Shoreditch New Street; Transfer of Improvement Loans (Ireland); Law Fund Duties; Savings'-Banks (Ireland); Holyhead Harbour, Lough Corrib Improvement Company Compensation (Ireland); General Board of Health (No. 2); Consolidated Fund Appropriation; Crime and Outrage Continuance; and Friendly Societies.

The Lord Chancellor Wilde then, kneeling, presented to her Majesty a copy of the following Speech, which she read with great clearness of intonation and distinctness of pronunciation:—

THE QUEEN'S SPEECH.

My Lords and Gentlemen,

I have the satisfaction of being able to release you from the duties of a laborious session. The assiduity and care with which you have applied yourselves to the business which required your attention, merit my cordial approbation.

The act for the better government of my Australian colonies will, I trust, improve the condition of those rising communities. It will always be gratifying to me to be able to extend the advantages of representative institutions, which form the glory and happiness of my people, to colonies inhabited by men who are capable of exercising, with benefit to themselves, the privileges of freedom.

It has afforded me great satisfaction to give my assent to the act which you have passed for the improvement of the merchant naval service of this country. It is, I trust, calculated to promote the welfare of every class connected with this essential branch of the national interests.

The act for the gradual discontinuance of interments within the limits of the metropolis, is in conformity with those enlightened views

STATE DINING-ROOM AT BUCKINGHAM PALACE.—(SEE NEXT PAGE.)

which have for their object the improvement of the public health. I shall watch with interest the progress of measures relating to this important subject.

I have given my cordial assent to the act for the extension of the elective franchise in Ireland. I look to the most beneficial consequences from a measure which has been framed with a view to give to my people in Ireland a fair participation in the benefits of our representative system.

I have observed with the greatest interest and satisfaction the measures which have been adopted with a view to the improvement of the administration of justice in various departments, and I confidently anticipate they will be productive of much public convenience and advantage.

GENTLEMEN OF THE HOUSE OF COMMONS,

The improvement of the revenue, and the large reductions which have been made in various branches of expenditure, have tended to give to our financial condition stability and security. I am happy to find that you have been enabled to relieve my subjects from some of the burthens of taxation, without impairing the sufficiency of our resources to meet the charges imposed upon them.

MY LORDS AND GENTLEMEN,

I am encouraged to hope that the treaty between Germany and Denmark, which has been concluded at Berlin under my mediation, may lead, at no distant period, to the restoration of peace in the north of Europe. No endeavour shall be wanting on my part to secure the attainment of this great blessing.

I continue to maintain the most friendly relations with foreign powers; and I trust that nothing may occur to disturb the general peace.

I have every reason to be thankful for the loyalty and attachment of my people, and while I am studious to preserve and improve our institutions, I rely upon the goodness of Almighty God to favour my efforts, and to guide the destinies of this nation.

The Lord Chancellor then, in her Majesty's name and by her Majesty's command, declared the Parliament prorogued until the 15th of October next.

Her Majesty descended from the throne, and bowing graciously to the assembled Peers, left the House, accompanied by her Royal Consort, and attended by the Royal Suite. On disrobing, her Majesty resumed her seat in the state carriage, and, amidst a flourish of trumpets and the clash of the bands of the Guards, the procession returned by the same route to Buckingham Palace.

STATE DINING-ROOM, BUCKINGHAM-PALACE.

THE State Dining-Room is a very handsome and spacious apartment, forming the southern extremity of the suite of state-rooms. It was not one of those built by George IV., but it was commenced by William IV., and finished by her Majesty, as is commemorated by the monograms in the circular panels in the walls. The room is lighted by windows on one side only, which look into the Palace gardens. The ceiling is coffered at the sides, and formed into three large compartments on its sofit by bands, inclosing sunken panels, enriched with roses. The large compartments rise somewhat in a domical form, and are filled with leaf foliage and large roses of elaborate character. The bands and spandrils forming the coving of the room spring from trusses of nice design, and are very highly wrought in floral ornaments. The chief entrances are at the north end of the room, one being from the ball-room, the other from the picture-gallery—a fireplace, with looking-glass over, dividing them. At the southern end is a deep recess, the extremity of which is almost filled by a huge looking-glass, in front of which, during state balls or dinners, the beaufet of gold plate is arranged, producing a most magnificent effect. Over the fire-place in the eastern side of the apartment is the full-length portrait of George IV. in his coronation robes, painted by Sir Thomas Lawrence, in a most elaborately carved frame; and on either side are portraits of Frederick Prince of Wales and his Consort, and some other members of the Royal Family of former days. The spaces between the windows are filled up with huge looking-glasses. The chandeliers are of very neat character.

The scene we have represented in our Engraving is a small dinner party at the Palace, in which much of the splendour of Royalty is carried out in the exquisite arrangement and ornaments on the table, but no beaufet set out in all its effulgent glory. Her Majesty takes the centre of the table, Prince Albert being on her left hand.

There is no gilding or colour in the decorations of the room, all the walls and enriched ceiling being of very neat stone tint.

THE CIVIL LIST.

The following protest has been entered upon the Journals of the House of Lords:—

1. Because the Civil List arrangement is framed upon statements laid before Parliament, with the full knowledge of the Ministers of the Crown, those statements being in the nature of estimates upon which the grant of income is to be made.

2. Because those statements contain a minute detail of the expenses for which provision is made, including the salaries of officers and even the wages of servants, and the grant is made on the supposition by all parties to the arrangement that such salaries are to be always paid.

3 Because, even as to the other heads of expenditure provided for, there is an understanding of all parties that nearly the same sums will be required during the continuance of the arrangement.

4. Because no supposition ever entered the mind of Parliament in making the grant, that large savings were to be effected out of the income thereby granted, or on the contrary the accumulation of wealth in the hands of the Sovereign is wholly alien to the spirit of our constitution, which requires the Monarch to be dependent upon Parliament for the revenue by which his state and dignity shall be supported.

5. Because any such accumulation by means of savings upon the Civil List has a direct tendency to diminish the splendour and impair the dignity of the Crown, and so to defeat the very purposes of the grant.

6. Because for these reasons it is the undoubted right of Parliament to obtain information, from time to time touching the amount of the savings under the several heads of the Civil List expenditure, and the rather because if there were a deficit instead of a saving, Parliament would be of course applied to for aid, whereas the public never can directly benefit by any surplus how considerable soever.

7. Because the amount of such savings must form an important matter in considering the applications from time to time made for Parliamentary aid in the establishment of the younger branches of the Royal Family during the reign of the Sovereign to whom the grant of the Civil List income was made, as well as in future arrangements which the wisdom of Parliament may make with respect to the rights and claims of the Crown.

8. Because no possible risk to the subsistence of the Civil List arrangement made with the Sovereign at the commencement of the present reign, can arise from giving the information sought; and there can be no indelicacy in disclosing the amount of the savings supposed, on good grounds, to have been effected, inasmuch as those savings must by law be made known to departments of the Government which are under no obligation to conceal them, and it must be made known under which head of the Civil List expenditure the saving, if any, has been made, or the deficiency, if any, has arisen.

9. Because the accounts before Parliament appear to state the amount of the savings—namely, £36,776 for the year ending the 5th of April, 1850; and, if this is an incorrect statement, or is, in reality, the statement bears reference to some other matter than that which it seems to regard, justice to all parties requires that this should be explained and set right. But if, as appears, such savings have been effected, there can be no reason why Parliament should not be informed of the branches of expenditure on which they have been so effected.

10. Because it appears that, independent of the Civil List revenue, and of £12,000 paid last year into the privy purse from the revenue of the Duchy of Lancaster, £29,000 have been paid from the revenue of the Duchy of Cornwall for the same year, for the service which, at that illustrious Prince's tender age, can hardly require so large a provision, and no one has ever contended that into such an expenditure Parliament has not both the right fully to inquire, and the practice of so inquiring.

(Signed) BROUGHAM.

FIRE.—A destructive fire broke out in the Kanturk Workhouse (Ireland), on Friday evening week, by which in a few hours the entire building of the male house, the dining hall, kitchen, bake-house, mill, and a part of the southern wing was burned to the ground, nothing left of this fine building but the walls. A part of the bedding was saved. No lives lost. The fire was accidental, and the building was insured.

FISHING EXCURSIONS UP THE THAMES.

EXCURSION I.—RICHMOND TO TEDDINGTON.

GENTLE reader, Parliament is "up"—the law courts are closed—all the world is out of town, and business is so dull as hardly to repay the trouble of opening the shutters. Suppose we take a trip up the river and go a-fishing? You stay and shrug your shoulders; "you are no fisherman; never held a rod in your life," and so forth. But what of that? It's never too late to learn, and fishing is precisely one of those few arts of which it may be averred that the learning of them is by no means the least pleasant part; every step and stage in your progress being marked by some incident of novelty, and every incident spiced by expectation, enlivened by surprise, crowned, perhaps, with triumph, which is all your own, and is none the less prized because it is cheaply bought, and may happen to be shared at the same moment by hundreds of fellow sportsmen in the same line.

The Fishing season on the good old "Father Thames" is now at its prime, and will continue improving for some months to come; and, perhaps, if a man wanted to enter upon his apprenticeship in the "gentle craft," he could not do so in a better school. The professional fishermen who dwell in the various villages along the banks, and whose mantles and whose punts have descended from father to son for generations, are reckoned some of the "cunningest hands in the world;" and well they may be so, for the fish here are cunning too; indeed, seeing how long and how pertinaciously they have been tempted, tickled, and tampered with by Cockney sportsmen of all shades and grades, the only wonder is that they are ever caught at all. But they are to be caught, as you shall presently see.

Before starting again, I say, to the Tyro, begin at the beginning, and, if you would learn well, be content to pay for learning. Depend upon it, it is more independent and more profitable in the end. Your great dons of amateur fishermen are a jealous, cantankerous, solitary, suspicious, supercilious lot, and avoid "a beginner" as instinctively as they would a mad dog. Seek not to fraternize with these "old hands" until you can pass unobtrusively through the first routine formulæ of the art—such as adjusting your rod and line, choosing your own bait and putting it on your-self, plumbing and ground-baiting your bottom (when you are bottom-fishing), and, above all things, holding your tongue. When you can accomplish all these matters tolerably well, you may pass muster, and may hope to be admitted into social fellowship at the fishing quarters, wherever they may be, with the oldest of the initiated; and then, if modesty and discretion be happily combined in your natural endowments, you cannot fail to pick up many valuable hints as to the nicer arcana of your adopted art.

You are impatient to be off; and Richmond Bridge may be reached in an hour, or thereabouts, by boat, buss, or rail; so you have your choice of dangers by the way. I say Richmond Bridge, because there I consider the Cockney fishing-ground to begin; and Richmond to Teddington, I consider his first stage. 'Tis true, ancient historians tell of "shoals of roach," which some two centuries ago used to "come down from the country," as low as the Temple and London Bridge; and of one Stratagem Jones, a worthy of Essex stairs (*circa* 1730), who used to watch daily for their arrival, and then go round to apprise his customers, aldermen or barristers learned in the law, as the case might be, who forthwith, to the peril of their wigs and book debts, came out to catch them. Those merry times have passed away, thanks to gas and steam, and the teeming sewers of modern Babylon; and although we still hear of certain fantastic barbel and roach, in the dead watch hours of the day divert themselves round certain piles of the unsightly and dangerous bridges of Battersea and Putney, I consider it idle for the London fisherman, intent upon business, to waste his energies at any intercepting point between the Custom House and Richmond.

As we are starting rather *à l'improvoso* for a single day's excursion, I will not, as some of the masters of old have done, impose upon you the task of cutting, seasoning, and shaping your own fishing-rod; manufacturing your own line; rearing or preparing your own bait, and so forth (all this was very well in that primitive age when that noble point in political economy, the "division of labour," was not understood, and when Piscator, setting out for a day's fishing at Ware, "stretches his legs in Moorfields Mall," and thinks nothing of it, instead of going quietly by the Eastern Counties Railway): depend upon it, that, as a tyro, you can be much better supplied for all essential purposes, at the cost of a pound, at any fishing-tackle shop in Piccadilly, than by all your own patching and planing; besides, whatever you may turn out to be deficient in, our fisherman will find you when we get afloat. Neither will I trouble you with a detailed account of the natural history, family relations, and peculiar habits of the various members of the finny tribe whom you are looking forward to the pleasure of inveigling into your custody. These are all matters which you will take more relish for, and better understand, further in the practice of the art; and at present you are too much engrossed with the exciting expectation of a fine day's sport of a novel kind, to give ear to any such dry details as must to fill that basket, of most modest dimensions, with fish of your own catching; and you care very little what sort of fish they may be, nor how they may be caught.

I may just observe, by the way, that, however saucy ignoramuses may condemn fishing for its monotony, and twit fishermen for their patience, which they consider allied to stupidity, there is, perhaps, no sport which offers such a variety of prey, nor which puts the ingenuity of man to so many devices and expedients in the catching of them.

These devices and expedients may be classed under three principal heads—float or bottom-fishing, trolling, and fly-fishing. In the first two the bait is sunk in the water; in the last it is dangled tremptingly along the surface. Again, the last two have reference respectively chiefly to jack, pike, and trout, lords of the stream, neither of whom we are likely to meet with where we are going to-day. So confine your observations at present to float or bottom-fishing, by which, between Richmond-bridge and Teddington, we may take, or assist at taking, a good round dozen of fish of a sort.

Thanks to the Thames Angling Preservation Society, aided by the Lord Mayor as far as the City jurisdiction extends, the river is now very strictly preserved, and cleared of those nuisances which used to poach all night, leaving not a solitary gudgeon to reward the labours of the angler in the morning. These gentry now find a better trade in "teaching the young idea" how to fish than they did in purveying for Billingsgate Market; and it is cheering to see how, for the requital of eight or ten shillings, they will assist in the education of your whole part he come, in plundering their favourite "deeps" of their finny treasures.

We are now arrived at Richmond, a favoured spot, in which art and nature have co-operated with a lavish hand to produce a panorama of exquisite beauty, unrivalled in any part of the world, at any period of the world's history. But I must not be tempted to enter upon the picturesque—the more particularly as the reader will find an interesting account of a steam-boat excursion up the river, from the Nore to Eton, in the Supplement to the ILLUSTRATED LONDON NEWS of the 26th of May, accompanied by a panoramic plan of the river.

Richmond "Deeps," or preserved fishing waters, extend from the bridge westward up to the Duke of Buccleuch's mansion, where the greensward comes down to the water's edge—a distance of about 700 yards. From a third to half-way up this portion of the stream will be found the best for barbel and dace; but the "Deep" is often so crowded that there is no room to pick and choose. Upon the whole, moreover, I think the young fisherman, out for a day, would do better to make his way at once to Teddington Deeps, a little higher up, where the scenery is more select, the ground more secluded, and the sport, consequently, better.

We will go to Twickenham, however, by water; a skiff will only cost half-a-crown for a party; and on the voyage we shall have an opportunity of observing the equipment, conduct, artistic prowess, and probably some stroke of success, of our brother sportsmen; all which will give us zest and courage for our own exploits, which are about to commence. On either bank of the river, at various favourite spots, we behold small groups of brother "Bobs," fishing for roach, which are remarkably fine and large in the Thames, and the best season of which is just now coming on; and, by the military manœuvres of the "whipping" with a black gnat, or a common house-fly, for dace, which fish love the shallow, sharp streams, amid osiers and weeds, whence the flies and insects sometimes drop into their mouths. That gentleman, you will observe, has taken off his boots, to keep them dry, and is up to his knees in water; to counteract the evil effects of which he has a small "pilot" of brandy in his pocket.

As a general rule, I should recommend the inexperienced angler on his first day to attempt very little. Let him resign himself and his tackle unreservedly and complacently into the hands of one of the Coxens or Kemps, or whatever may be the name of the worthy fisherman who has taken him and his fortunes in charge; let him observe carefully all that is done in his behalf, and, with true romantic spirit, humming through his teeth, which still hold the "light cigar," the burthen of some favourite air—as, for instance, "Il peacator di *Londra*" (excuse the *verisimum* reading)—await patiently what is to fall to his lot.

The punt being duly secured at a convenient spot over Twickenham "Deeps," which deeps extend from that classic spot which the reader has so often heard speak of, "Pope's Villa," down to the "Ait," better known to Cockneys as Eel-pie Island, he will be charmed with the rural and varied aspect of the scene which lies before him, the old tower of Twickenham Church crowning the distance on the left, in the middle and on the right the "Ait," and a straggling array of punts and fishing boats surrounding it in various directions. Turning to the left in search of Pope's Villa, his unaccustomed eye will be struck with the appearance of a gaudy pile of a sort of mixed Swiss and Chinese order, which has been recently built by a gentleman retired with a fortune from the tea business, and which striking "object" now occupies the site of the elegant poet's late residence. The present fortunate possessor is said to have paid a large price for this little plot of ground, ever sacred to the Muses, and an inscription over the gate, on the road-side, informs the passer-by that—

"On this spot stood, till 1809, the House of ALEXANDER POPE; the grotto that formed its basement still remaining. 1848."

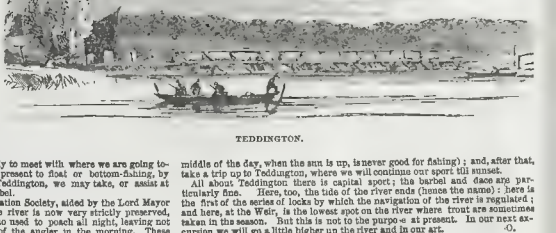
Sic transit! But come—no moral reflections: the fisherman has baited the ground and baited your hook, and thrown out your line, with a great bullet at the end of it, which flops into the water. You are going to fish for barbel, "ledger" fashion; or, rather, if you wish for sport, I should advise you to let your *cocurne* continue to handle the tackle until there is a bite; for there is a certain art required in "striking"—quickly, smartly, but not too violently—so as to secure the hook in the fish's mouth, thus making him "safe," and when this is done, he will give the line to play with him, and land him, by means of the "gaff," or landing-net, which he, with alacrity, will get out for the purpose. Depend upon it, this is the pleasantest way for a beginner; he will have more sport with a "diversion of labour," than by attempting to do it all himself. But you may have another line out, if you please, and try float-fishing for barbel or roach, as the case may be; in either of which cases be careful of one thing, as the first step towards a proper handling of the rod, viz. to keep that part of your line which is above your float so tight, or nearly (taking care, however, not to disturb the free play of the float): this may be done by holding the rod nearly perpendicular

RICHMOND "DEEPS."

when you drop in the bait near the punt, and then lowering the point forwards as the float travels from you with the stream. The advantage of this rule is that it enables you always to have command over your hook at an instant's warning; and whether your customer be roach or barbel, you cannot be too quick with him, if you would lodge him in your basket. When I speak of quickness, I apply it only to the act of "striking," which secures the hook; it must not be continued to the lugging of the fish out of the water in the first instance, an operation which must be done gradually and with caution. Many inconveniences may result from a spasmodic attempt to land a fish on the first bite: if the fish be a heavy one, the rod, or line, or both may break; if it be a very light one, it will fly over your head, the hook becoming entangled in branches of trees, or the tackle of your neighbour; finally, by tearing your line out of the water too convulsively, you may chance to bring it away with a bare hook, the fish being gone, which hook in its gyrations may lay hold of your own ear, or the finger or nose of your neighbour.

This mischievous propensity of erratic hooks is, I can assure you, no laughing matter; nor is it very easy to get rid of the incumbrance, unless you know the principle upon which to act. I once recollect seeing a very grave individual walking into a certain village, from a neighbouring fishing-ground, with the hook on his line in his nose! He did not know how to rid himself of it. Now, clumsy practitioners would try to force the hook back, by which means they must infallibly tear away a part of your flesh in the barb. Others talk of cutting the flesh down to the hook, which will then come out clean, leaving, however, a clean scar, and one no joke to bear while it heals. Now, the proper method on the occurrence of such an accident is this:—Cut the hook off the line, and cut away the waxed thread with which it is whipped to the gut, and then the said hook may be very easily removed from the spot where it has fixed itself, drawing it backwards by the shank.

This is enough of instruction for a first day; and see, we have covered the bottom of our basket with barbel, roach, and dace, eight or ten pounds weight at least; so we will now go and dine at the little tavern on Eel-pie Island (the



TEDDINGTON.

middle of the day, when the sun is up, is never good for fishing); and, after that, take a trip up to Teddington, where we will continue our sport till sunset.

All about Teddington there is capital sport; the barbel and dace are particularly fine. Here, too, the tide of the river ends (hence the name): here is the first of the series of locks by which the navigation of the river is regulated; and here, at the Weir, is the lowest spot on the river where trout are sometimes taken in the season. But this is not to the purpose at present. In our next excursion we will go a little higher up the river and in our art. O.

NET PUBLIC INCOME OF THE UNITED KINGDOM.—A return has just been presented to the House of Commons, giving an account of the net public income of the United Kingdom in the year ending 5th July, 1850 (after abating the expenditure thereout defrayed by the several revenue departments), and of the actual issues or payments within the same period, exclusive of the sums applied to the redemption of funded or paying off unfunded debt, and of the advances and repayments for local works, &c. It appears that the total ordinary revenue and receipts for the year amounted to £52,778,635 13s. 6d., and consisted of—Customs, £20,615,636 8s. 9d.; excise, £14,383,829 5s. 2d.; stamps, £6,802,954 9s. 9d.; taxes (land and assessed), £4,351,531 1s. 2d.; property tax, £5,459,844; post office, £834,000; crown lands, £160,000, &c. The expenditure amounted to £49,991,313 12s. 8d. Of this, £37,705,609 3s.1d. was the total charge of the funded debt, and £403,896 16s. 6d., the unfunded debt. Other items were—civil list, £396,681 2s. 2d.; annuities and pensions for civil, naval, military, and judicial services, &c., charged by various acts of Parliament on the Consolidated Fund, £409,624 16s. 8d.; salaries and allowances, £278,862 19s. 8d.; diplomatic salaries and pensions, £158,953 3s. 7d.; courts of justice, £1,086,126 1s. 2d.; miscellaneous charges on the Consolidated Fund, £241,690 1s. 7d. The expenditure on the army was £5,677,358 0s. 2d.; navy, £6,381,724; ordnance, £2,375,464 12s. 8d; miscellaneous, chargeable on the annual grants of Parliament, £3,872,101 19s. 8d. The excess of income over expenditure was £2,438,358 17s. 6d. From this amount is deducted an account of the balances of the public money remaining in the Exchequer on the 5th of July, 1849; the amount of money raised by the additions to the funded or unfunded debt in the year ending the 5th of July, 1850; the sum money applied towards the redemption of the funded, or paying off unfunded debt; the total amount of advances and repayments on account of local works, &c., with the difference accruing thereon, and the balances in the Exchequer on the 5th of July, 1850. The balances in the Exchequer, on the 5th of July, 1849, amounted to £7017,298 18s. 1¢d.; on the 5th of July, 1850, to £8,900,360 1s. 10¢d. The total amount of advances during this period, for local works, &c., including £1086 19s. 9d. for drainage in Great Britain and distressed unions in Ireland, was £1,930,366 12s. 1d.; ditto, of repayments of advances for local works, £1,229,369 15s. 5d., leaving the excess of advances over repayments, £700,996 15s. 8d. Besides this, there has been issued to the Commissioners for the Reduction of the National Debt, to be applied to the redemption of the public debt, £348,580 17s. 11d., and to the paymaster of Exchequer bills, for payment of unfunded debt, £17,767,000.

A great storm and high tide took place on Friday week, in the Lower Shannon. The tide overbowed some embankments and committed extensive ravages in the district near the new road in course of construction to Mungret

THE EAGLE.

Far from the sound of the hunter's horn,
On the beetling cliff, by lightnings torn,
Lonely and drear are thy regal halls,
High o'er the floods and the waterfalls.
Where the bleak winds murmur rudely by,
Thy young come forth to the open sky:
Their nest is bare to the tempest cloud,
When the thunder-storm is pealing loud.
The ancient hold of a fearless race,
Nature hath charter'd thy dwelling-place.
Wild king of the rocks, the wing'd, the free,
Oh, how I envy thy liberty!

In sunshine and storm, to soar away
Where Atlantic roars in its giant play;
To trace from thy freehold home afar,
On his ocean path, the dauntless tar;
Lightly to skim o'er the briny foam,
Awhile with the sportive winds to roam;
And then, what joy in thy upward flight,
To gaze on the sun's unclouded light!
Glorious art thou! though wild and rude
In thy sovereignty of solitude!
Wild king of the rocks, the wing'd, the free,
Oh, how I envy thy liberty!

B. W.

CURIOSITIES.

QUEEN ELIZABETH'S STIRRUP.—SILVER-GILT SALVER.

These curious specimens of olden art were exhibited to the Archæological Institute, assembled at Oxford in June last.

The Stirrup of Queen Elizabeth is the property of Jesus College, by the heads of which it was lent to the Institute, and exhibited in the temporary museum in the Taylor Gallery. Elizabeth was a famous horsewoman; and the examination of this, the Royal riding-furniture reputed to have been used by the Queen of "Prurience," excited considerable attention. Of kindred interest was a table in the museum covered with spurs from Edzehill and Ashdown, which, it was remarked, "spoke yet more strongly than Oxford herself of Charles I., and the reverses which he endured."

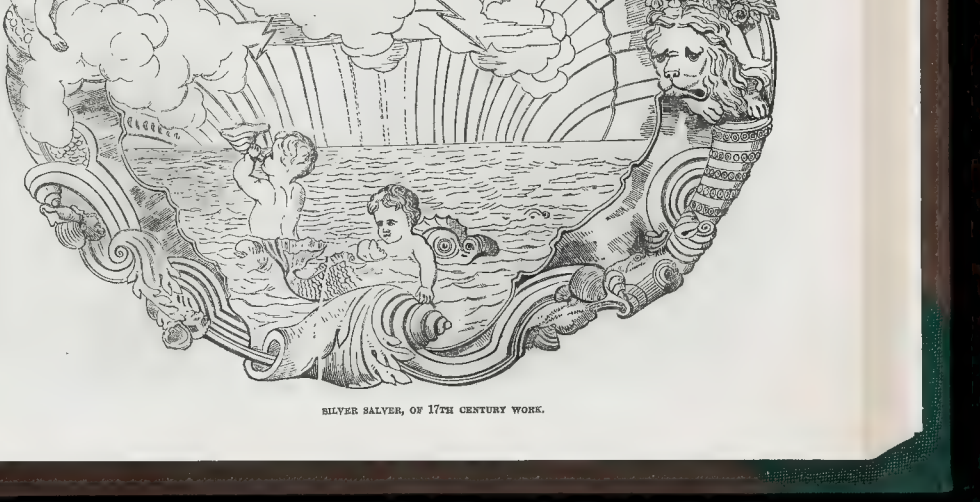
The antiquity of Stirrups has exercised the ingenuity of men of learning; and Beckmann has taken some pains to collect and condense their researches. No traces of the invention are to be found in the Greek and Latin writers. Stirrups are not seen in the equestrian statues of Trajan and Antoninus; Xenophon does not mention them in his instructions in horsemanship and the art

STIRRUP OF QUEEN ELIZABETH.

of riding; and Julius Pollux does not name them in his Lexicon of riding furniture.—See Beckmann's "History of Inventions," Bohn's edition, Vol I., pp. 425—442.

In the King's House, or Lord Warden's Lodge, at Lyndhurst, in the New Forest, is preserved an ancient stirrup, said to have been used by William Rufus. It is of iron, and was once gilt. Its width at bottom is 10⅛ inches; depth, 7½; and measured all round it is 2 feet 7½ inches. It was formerly used as a test for ascertaining what dogs kept within the forest should suffer expedition, *i. e.* cutting off three claws of each of the fore-feet, to prevent their running. If a dog could be drawn through the stirrup, he was to undergo this operation to disqualify him for the pursuit of deer.

To return to the Archæological Institute, at the Taylor Gallery. Prominent among the fine old plate displayed upon the tables, was the *Salver* here engraved. It is silver-gilt. In the general form of a shell, embossed with allegorical subjects of great diversity, but harmonizing into a very characteristic composition. In the *bordure* advantage is taken of the natural forms of shells, in combination with the scroll-work of art, dispersed with flowers; the Lion is *guardant* over the cornucopia, and the two boys appear as supporters; the angry bird of Jove scatters its lightnings, though not to disturb the serenity of the two Tritons, who are sporting with a dolphin in the sea beneath. This is a remarkably fine specimen of the plate-work of the 17th century. It is in the possession of the Earl of Ilchester, and was exhibited at Oxford by the Hon. Fox Strangeways. There are several works of this class preserved in the halls of colleges and city companies, where they are sometimes used as rose-water dishes; but rarely do we see so richly fanciful and elegant a production of the goldsmith's art as that now before us.



SILVER SALVER, OF 17TH CENTURY WORK.

Steamers in Australia.—The following extract of a private letter from Sydney indicates an opening for the profitable employment of some additional steamers in New South Wales:—"Within the last few days the *Phœnix* steamer has become a wreck in a southerly gale, about five miles from the Clarence River. She now lies stranded on the beach high and dry, and quite a wreck. Her engines may be saved, and all her spars and gear. Thus you see we have lost the only steamer that plied on that important line, making an additional opening for a steamer of double the size and power of the *Phœnix*, which, indeed, was never large enough for the trade. I intend, as soon as I have leisure, to get you the particulars of all the dividends and pressure as now paid by the Hunter's River Company, and what the *Phœnix* was paying. There is the Port Phillip and Launceston line now only about a quarter supplied; indeed, from ten to twelve good steamers equal to the *Shamrock*, that is, about 140 or 150-horse power, and to carry from 200 to 300 tons of cargo, would find ample employment and capital profits on the various lines now requiring steamers both to the north and south. I wish the public in London could be made acquainted with our wants in this respect, for we have no capital here to build new steamers. Our means of intercourse along the lines of coast and up our navigable rivers have become so limited, that many parts of this country are now left in abeyance."

The Council of State of France has just decided that the Standish Gallery and the Spanish Museum, in the Louvre, are the personal property of Louis Philippe.

There is one place in the Union where lawyers are in demand. A correspondent of the *Missouri Republican*, writing from Fort Laramie, says—"If you could manage to send us a few of your heedless lawyers, a good judge, and a constable or two, I think they would do well in this part of the country."

WRECK OF THE "VICEROY" STEAM-SHIP.

(From a Correspondent.)

The "Viceroy" left New York about one o'clock in the afternoon of Saturday the 21st of June, bound for Halifax, and almost immediately after having cleared Sandy Hook became enveloped in fog, which continued until seven o'clock on Monday evening, when the passengers were alarmed by the cry of "Land right ahead!" —"Back the engines!" followed by a severe shock. All hands were instantly on the alert, and during two or three hours the wheels were in forcible play backwards, while the crew and passengers were engaged in removing everything heavy to the quarter-deck and throwing the coal overboard; but, in a short time, our hopes of getting her off began to fail, as the tide was rapidly falling, and the furnaces were put out by the water, which had risen to within five or six feet of the deck. The fog had now quite cleared away, and the night was beautiful: we could easily see the land (Shag Island), which was within pistol-shot of our bows, rocky and wild, with a light surf. A boat was lowered, and soundings being taken, it was discovered that we were hanging on a rock midships, with plenty of water under our quarter: this, as well as a rocket which was sent up from the other side of the island, gave us hopes that, with help, she might be got off at high-water. About five o'clock next morning a boat hailed us, offering help from H.M. steamer *Columbia*, which they stated was coming round from the other side of the island, and had sent up the rocket: they informed us that we were on Shag Island, not far from Barrington Harbour, and about seven miles to the north of Cape Sable, and that, in all probability, the current of tide setting into the Bay of Fundy had brought us out of our course. The *Columbia* came round to our assistance shortly after; but, as the water had gained so much, it was useless to think of getting towed off. The passengers left in boats for Barrington, *en route* for Halifax (hoping to arrive in time for a homeward passage in the *Canada*, which was advertised to leave on Thursday, the 26th inst.), as the distance is only 130 miles by sea, and coasting schooners are very abundant. The crew now, with the assistance of Captain Shortland, the commander of the *Columbia*, and her crew, set to work to get all the bulk-heads perfect, and thus confine the water to one compartment; and on Wednesday a messenger was sent to Halifax with the mails, and to request the admiral to lend a diving dress. On Saturday the bulk-heads were tight, and the water was soon pumped out of the fore and aft compartments, leaving the engine-room (in which was the leak) still full. Our endeavour now was to get this full of puncheons, and thus displace the water, as there was no sign of the return of the Halifax messenger. Casks were procured at Yarmouth, and lashed in the machinery, paddles, &c., and Wednesday, July 1st, was fixed for a grand trial; but on Tuesday, June 30th, a ship of war was descried in the offing, on the clearing up of a fog, which had continued for some days: she came rapidly towards us, and turned out to be H.M. screw-propeller *Plumper*, which the admiral, with his characteristic energy, had dispatched, with the diving-dress, to our assistance, the moment he heard of our position. It was too late to attempt anything that evening; but early in the morning the diver went down into the engine-room, and brought up several pieces of her bottom, showing that a considerable leak existed, which he was unable to get at, as it was under water. The *Columbia* made every effort to tow her off, but was unsuccessful, and again on the following day renewed her attempts with no better success. More casks being deemed necessary, a messenger was despatched to Yarmouth for two schooner loads: the first of these arrived on Saturday afternoon, and was quickly unloaded, but our efforts were again disappointed. That evening a heavy breeze set in from the west, creating a tremendous surf, which broke over us, and soon strained and tore the bottom of the forehold, letting in the water to the level of the sea outside. Sunday the gale still continued, insomuch that the *Columbia* had to run for the harbour, and the *Viceroy* was letting more and more on her broadside every tide, leading us to fear that she would go over altogether. On the next day she was condemned, her valuables were sent to Yarmouth to be sold, and her hull and engines were advertised to be sold where they now are.

Thus ended a voyage, which, had it been successful, would have proved a great benefit to Ireland; and we must only hope that the tragical fate of the *Viceroy* will not prevent the formation of a packet station in Galway, or that the misfortune which has happened the latest and hitherto successful navigator who hitherto commanded her may not prove injurious to his character, knowing as we do the good sense of the public who will take into consideration the concurrence of a rapid current and a dense fog, the one hurrying the vessel from her course, and the other veiling the danger in obscurity.

The *Viceroy* is engraved in No. 430 of our Journal.

Post-Office.—From returns presented to the House of Commons, giving the number of letters delivered in the United Kingdom for each week in which they were counted up so as late a period as practicable, it appears that in the week ending 21st February, 1850, the total delivered were—England and Wales, 5,784,213; Ireland, 728,010; Scotland, 727,739; gross total, United Kingdom, 7,239 962. For the year ending 5th January, 1850, the gross revenue for the United Kingdom was £2,165,349 17s. 9½d.; the cost of management, £1,324,862 16s. 10d.; the net revenue, £840,787 0s. 11½d. Postage charged on the government departments, £106,923 18s.; and net revenue, exclusive of charges of the government departments, £733,863 7s. 11½d. The payment made by the Post-office for the conveyance of mails by railway in the United Kingdom during the year ending 5th January, 1850, was, for work done within the year, £128,719 11s. 3d.; for work done in previous years, £59,583 11s.; total £188,303 2s. 10d. In addition to this amount a sum of £25,000 was paid to the Chester and Holyhead Railway Company on account, but the portion for the work done in previous years cannot be distinguished, the sum of payment not being fixed. Of money orders there were issued from 5th January to 31st December, 1849, in England and Wales, 3,516,839—their amount, £6,880,865 11s. 2d.; in Ireland, 388,578—their amount, £599,504 14s. 3d.; in Scotland, 374,474—their amount, £679,273 12s. 1d.—total, United Kingdom, 4,246,891; amount £8,152,643 17s. 6d. The total of money orders paid in the same period in the United Kingdom was 4,245,352—their amount £8,158,336 14s. The cost of management, stated above at £1,324,862 16s. 10d., includes all payments out of the revenue in its progress to the Exchequer, except advances to the Money Order Office of the sum of £10,307 10s., disbursed in pensions, as follows:—£4000 to the Duke of Marlborough, £3407 10s. to the Duke of Grafton, and £2900 to the heirs of the Duke of Schomburg. Inclusive of these pensions there appears a sum of £17,084 14s 2d., "charges other than management," entered above under the "cost of management." The expenses of the Money Order Office throughout the United Kingdom, during the year ending 31st December, 1849, were £70,248; the amount of commission, £70,570. Of this £58,770 was for England and Wales, £5695 for Ireland, and £6105 for Scotland.

Jenny Lind's Brother.—It will be interesting to many of our readers to hear, that, last week, John Lind, mariner, of Stockholm, son of Hans Lind, schoolmaster, and brother of Jenny Lind, the "Swedish Nightingale," was married in the register-office in this town to Miss Mary Gee, of Pillgwenlly. John had not seen his sister for many years, until he accidentally met with her the other day at Liverpool, on her professional visit to that place. Jenny presented him with a handful of pocket-money; but John, like his other two brothers, is able and willing to work for his bread, and if his sister were to offer him an annuity to exempt him from labour he would not accept of it. He spoke in the most affectionate terms of his sister, stating that she had supported her father and mother since she was sixteen years of age.—*Bridgewater Times.*

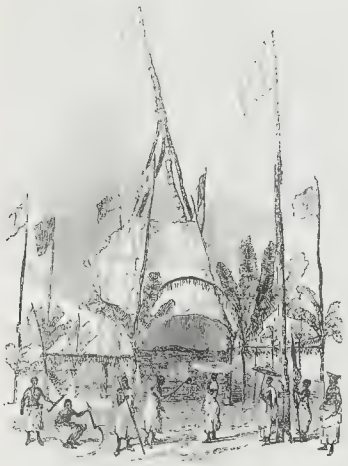
Thunderstorm and Loss of Life.—On Thursday evening week, Halifax was visited by a most awful storm of thunder and lightning, accompanied by heavy rain. The flashes of lightning were remarkably vivid, and, unfortunately, the storm did not pass over without loss of life; a little boy, named William Lambert, aged 12 years, son of Daniel Lambert, delver, Upper-lane, Northowram, having been struck dead with the lightning, about a quarter past eight o'clock in the evening, while he was sitting in the house near the chimney; a little girl being seated a short distance from him and close to the chimney. The door of the house was thrown open, and also a window up-stairs. A little above the head of the deceased a pair of tongs was hung upon the wall, as customary in many country cottages. The thunder was loud and terrific, and the vivid flashes of lightning succeeded each other in rapid succession, until at length there came one brighter than the rest, and which rendered the mother of the deceased insensible for some moments. Upon consciousness returning, the little girl screamed out "Mother! Willy's dead." The distracted mother ran towards her child, who sat motionless in his little-chair, with his head upon his breast and his arms hanging by his side. She spoke to him, but he answered not; and calling in her neighbours, the little fellow who, but a moment or two before, was full of life and vigour, was found to be a corpse. Not a single mark was found upon his body, excepting a very slight discolouration of the chest. A few yards above where he was sitting, the plaster was knocked off the wall to the extent of about twelve inches in length and one in breadth; and the middle rob of the ornamental work at the head of the clock, which stood in the opposite corner of the house, was knocked off. There was also a rent in the floor above the clock, and the posts of the bed were found to be slightly damaged. In the bed-room, a small piece of plaster was also taken out of the wall above the fire-place, but neither the tongs above alluded to, nor the fender or fire-irons, had apparently been moved. It would appear that the lightning had descended the chimney, through the room floor above the clock, and, being attracted by the tongs on the other corner of the house, expended itself upon the unfortunate child sitting beneath. The house itself stands in a somewhat prominent situation on the hill.

Funeral of the Earl of Dunraven.—At seven o'clock on Saturday morning the mortal remains of the late Earl of Dunraven were conveyed from the mansion of Adair Manor (Ireland) for interment in the mausoleum erected by the deceased nobleman in the churchyard of Adare. Over 4000 persons, including gentry, farmers, his Lordship's tenantry, and the peasants of the surrounding district assembled to pay the last sad tribute to the memory of a good and benevolent resident landlord, whose affectionate solicitude for the interests of the labouring classes was fully demonstrated in his last moments by a pressing request that his body might be borne to the grave on the shoulders of his tenantry, without funeral car or other appendage. The chief mourners on the occasion were his two sons, Lord Adare (now Earl of Dunraven) and Hon. W. Quin, 13th Light Dragoons; Sir W. P. Gallwey, William Monsell, Esq., M.P., Wyndham Gould, Esq., Gamaliel Fitzgerald, Esq., Wyndham Fitzgerald, Esq., Richard Fitzgerald, Esq., John Fitzgerald, Esq. The Protestant and Roman Catholic clergy also attended; 1600 of the tenantry walking in procession, with scarfs and hatbands, and the deep regret felt for the late Peer was manifested by the sad expressions of the multitude assembled. The escutcheons having been conveyed to the interior of the church, Archdeacon Warburton and the Rev. G. Beere, curate of the parish of Adare, performed the solemn funeral ceremony; after which the coffin was again removed to the burial-ground, and deposited in the family vault. Sir Vere de Vere, Sir David Roche, John Croker, Robert Maxwell, Gerald Blennerhassett, G. Fosbury, &c., joined the funeral procession; also, Archdeacon Warburton, Rev. Richard Dickson, Rev. E. Croker, Rev. R. Maunsell, Rev. G. Beere, Rev. G. G. Gubbins, Rev. Thomas S. O'Grady, P.P., Mr. John Owens, acted as undertaker, and his arrangements gave general satisfaction. The shell of the coffin was of Spanish mahogany, upholstered with white satin; outside this one of lead, and a third of oak, covered with rich black silk velvet, magnificently mounted.

THE LATE INSURRECTION IN CEYLON.

KANDY, SKETCHED FROM UNDER CASTLE-HILL.

THE Island of Ceylon, always a subject of picturesque attractiveness, has of late occupied a prominent position in the public mind, on account of the Reports which have just been presented to the House of Commons, by the Select Committee of that House "appointed to inquire into the grievances complained of in Ceylon, in connexion with the administration and government of that colony; and to report their opinion whether any measures can be adopted for the redress of any grievances of which there may be shown just reason to complain; and, also, whether any measures can be adopted for the better administration and government of that dependency."



BURNING OF THE AGED HIGH PRIEST OF THE GREAT TEMPLE OF KANDY.

The interest attached to this inquiry, considerable as it was, from the circumstances of the rebellion and the great loss of life attending it, has been heightened in no small degree from its having been thought necessary to close the doors of the Committee-room to the public, and make the investigation strictly private. Nor should it be forgotten that, in this Committee, of which Mr. H. Baillie is chairman, there are Mr. Hume, Mr. Disraeli, Mr Gladstone, Sir. J. Walmesley, and Mr. C. P. Villiers. One great spirit associated with these, the most illustrious of all, has, alas! gone from among us; and the sudden death of Sir Robert Peel has cast a melancholy tinge over the proceedings in which he took so deep an interest.

For our views on these proceedings we refer the reader to the opening page of the Number of our Journal published with the present Supplement, and headed "THE CEYLON INQUIRIES." Meanwhile, we are happy to be able to give our subscribers a glimpse of Ceylon, as pourtrayed in some sketches taken by an officer lately returned from that island, and of which we have been kindly permitted to avail ourselves.

Two or three of these are illustrative of incidents of the late rebellion; but before proceeding to describe these and the others individually, it may not be out of place to recall to the minds of our readers the position, appearance, and importance of Ceylon. The Cinnamon Isle, or Isle of Spices, as it has been sometimes not inaptly called, lies off the southern point of Hindostan, and may, to a great extent, be considered the key to the waters of India and to the Eastern seas. It possesses the only harbour of note: indeed, we may say the only safe haven which we can call our own, in that region of the globe; and Trincomale will not lose by comparison even with Sydney or Rio de Janeiro.

The productions of Ceylon are numerous and valuable; and it must be presumed that, at one time, the natives were more energetic and industrious than now, for the Serendib of the ancients sent spices and pearls to Rome in the days of the earlier Emperors. At the present time we receive from it cinnamon, cardamoms, pepper, cocoa-nut oil, and a great quantity of our best coffee. The latter is grown entirely in the elevated regions of the interior, known as the Kandian provinces; while all the former articles are the productions of the low country and the coast. The northern and eastern part of the island is chiefly occupied by Tamils or Malabars, emigrants from the coast of India; the rest of the low country, forming a belt nearly round the island, by Cingalese; while the mountainous region towards the centre and south is inhabited by Kandians. The people belonging to the first of these races are by far the most industrious; while those of the last-named race are, like all mountaineers, the most manly and free in their bearing and ideas. The low-countryman, or Cingalese proper, are generally lazy, cunning, and much given to thieving. In the forests to the eastward of the Kandian country roam at large,

> As free as nature first made man,
> Ere the base laws of servitude began,
> When wild in woods the noble savage ran,

the Veddahs, the supposed aborigines of the island—termed of late, by an undoubted authority, "the interesting race who dwell in trees;" the untamable and the untameable wild men of the woods. There is a large number of Malays also in the island, introduced originally to supply soldiers for Malay regiments, one of which, the Ceylon Rifles, is still kept up.

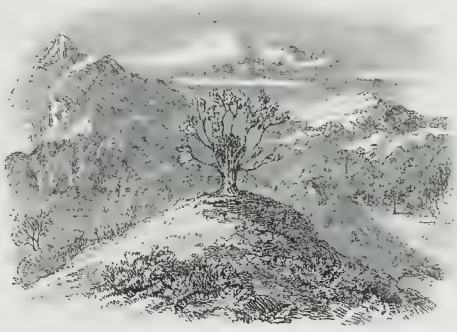
The Moormen, a race of Arab descent, who may be styled the Jew merchants of the East, are to be found in the most remote villages, indeed in every corner where a bargain is to be driven, or a copper chally* gained.

When we mention that there are also many descendants of the Portuguese and Dutch, both quondam masters of Ceylon, as well as a sprinkling of French, and a large number of British, the variety of languages and jargons one hears spoken throughout the island will be readily imagined.

TODDY-DRAWER ASCENDING A COCOA-NUT TREE.

The whole of this garden of the East (the ancient Paradise, as some have strangely supposed) teems with richness, smiles with verdure, "and all but the spirit of man is divine."

* One of the smallest current coins in Ceylon.



MAJOR DAVEY'S TREE.

THE COMMANDANT'S QUARTERS AT MATELL.

THE LATE INSURRECTION IN CEYLON.

ATTACK ON THE WARRIAPOLA STORE.

ATTEMPTED ESCAPE OF A PRISONER AT THE BRIDGE NEAR MATELE.

The above Illustration represents the attack on the store at Warriapola, where the pretender, or King, who figured in the late disturbances, had slept during the previous night. The Kandians, after firing on the Ceylon Rifles, who are seen in the foreground, fled, a few being shot—one while in the act of leaping from an upper window. The King's palanqueen was found in the store, with an unfortunate man who had secreted himself in it. The Kandian was immediately shot and bayoneted, while the palanqueen was broken into pieces.

The next Sketch shows the troops crossing the bridge close to Matelé, and one of the wounded prisoners, with his arms pinioned, leaping into the river The act was so sudden that the soldiers had no time to stop him. He fell on his back in the water, which, though shallow, saved him from the pointed rocks beneath; and he was retaken apparently not much injured, though the height is very great.

The view of the Commandant's quarters at Matelé, as also of the gaol, guard-room, and thatched barracks, will prove interesting; this being the town first sacked by the rebels, and the place in which so many of them were afterwards tried by courts-martial and shot. When the rebels entered Matelé, they broke open the gaol and liberated the prisoners; at the same time sacking the sub-assistant surgeon's quarters and the hospital, now converted into the Commandant's house and the guard-room. The barracks were erected by forced labour during the existence of martial law.

The view of Kandy, the capital of the central province, beginning with the Government granary on the right, comprises consecutively the Ceylon Rifle Mess-house, the Magazine, on an island, and formerly the King's harem; the Library (once the King's bath), the great Temple of Kandy, with its octagonal tower, the new Episcopal Church, and the Bank. To the right of the granary, is seen part of a coffee estate, while behind the centre of the view winds "Lady Horton's walk," a delightful and most picturesque ride, from part of which one sees the extensive vale of Doombera, with the Maha Villé Ganga, or Great Yellow-sand River, winding through it, and forming one of the most charming prospects in the world. The lake in the foreground is artificial, having been formed by one of the Kings of Kandy, by banking up the lower end of the valley, at that time full of terraced rice-fields. It improves the appearance of Kandy very much, and a beautiful drive runs along its banks, the whole way round.

Major Davey's tree was the scene of a dreadful massacre of British soldiers in the year 1803, when we had, for the first time, taken possession of Kandy. Here some thirty men, including six or seven officers, were murdered, after having, under a solemn treaty, given up their arms. Having marched out of Kandy to the ferry at the spot, a distance of three miles, they found the river swollen

KANDIAN CHIEF, FATHER OF LOCO BANDA.

Encamped under this tree for two days and nights, exposed to incessant rain, and without food, they were reduced to the necessity of laying down their arms. No sooner had they done this than they were led away, two at a time, and inhumanly massacred, being struck on the head and neck with heavy knives. Major Davey and two captains alone were spared. The two latter soon died, while the former lingered through a disgraceful captivity of eleven years. A corporal, who was left as dead, crawled by night to the hut of the ferryman, who succoured him and took him over the river. He succeeded in making his way to Trincomalee. A sub-assistant-surgeon named Greeving also escaped death, having hid himself in a dry well. All the sick—upwards of a hundred in number—left in the hospital in Kandy were murdered in their beds, save one artilleryman, who escaped severely wounded. The Kaffir who acted as executioner at Davey's tree, is still to be seen in Kandy. The Peak of Hoonasgiria, in the background, overhanging the Vale of Doombera, and the Knuckles Mountains now the site of many coffee estates, add to the interest of the scene.

The Kandian chief, whose Portrait we give, was one of the principal ministers of the last King, and father of Loco Banda, the present head of the family, and chief of the Kandy police force.

It is the custom of the Kandians to burn the bodies of their deceased chiefs and priests, while those of the commonalty are buried. The Sketch we give represents the burning of Galgirlavi Mahamuke Unanse, the aged high priest of the Malagawa, or Great Temple of Kandy. At this ceremony many chiefs, priests and priestesses of Budhu were present. The body was laid on its face, and oil was poured over the pyre. The deceased having no relatives, his servant knelt before the pile, called out his late master's name, and, bidding him adieu, set fire to the pile. Cocoa-nuts are mixed up with the firewood, so that the bystanders may not know, when they hear a report, whether it is caused by the bursting of the skull of the deceased or of a cocoa-nut. Loud prayers were offered up by those around, while the aged priestesses sobbed violently.

The native climbing the tree is a toddy-drawer. Placing a ring of twisted bark cord round his ancles, he presses his feet against the cocoa-nut tree, puts his arms round it, and, by the alternate motion of his legs and arms, ascends. The juice is drawn from the spadix, which is sliced off near the top, the tree not being allowed to flower. It is a pleasant, wholesome beverage, when used fresh from the tree at sunrise; but it soon ferments, and forms the intoxicating arrack, of which the natives are becoming so fond.

Our last Engraving shows the interior of a Court-house in the Kandian provinces. The young Kandian woman complains of the treatment she has received at the hands of her husband, who stands on the opposite side of the doorway. The nondescript being leaning against the door-post is a policeman, with his knot of hair protruding from under his cap, and arrayed in his uniform, beneath which hangs his combey, or native cloth. The listless but litigious natives hang around the court, while the headmen and chiefs of the neighbourhood have seats within.

INTERIOR OF A COURT HOUSE IN THE KANDIAN PROVINCES.

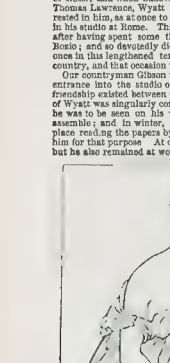
THE LATE R. J. WYATT.

THE death of this accomplished sculptor and excellent man took place at Rome, on the 29th of May last, under circumstances of interest unusually touching. Wyatt was born on the 3rd of May, 1795, in Oxford-street, in London, where his father, Edward Wyatt, was then settled. At an early age the subject of our memoir was articled to Charles Rossi, R.A., for the term of seven years; and during that term his services at the Royal Academy were so successfully pros-

THE LATE R. J. WYATT.

cuted as to entitle him to the award of two medals upon different occasions. At the time Wyatt was under the tuition of Rossi, he executed a monument in the church of Esher, in memory of Mrs. Hughes, and another in the chapel at St. John's Wood. But it is to Canova, in a great measure, that Wyatt was indebted for the ultimate refinement of his tastes; his natural genius was at all times impressive in narrative, but it was under the great Italian sculptor that he began to versify in marble with the purest feeling. He had seen and admired the works of Canova even while under the instruction of Rossi; and when Canova visited this country, through the kindness of Sir Thomas Lawrence, Wyatt was introduced to Canova, who became so far interested in him, as at once to promise him his protection and the permission to work in his studio at Rome. Thither he proceeded in the early part of the year 1821, after having spent some time in Paris under the celebrated Italian sculptor Rosio; and so devotedly did he prosecute the labours of his profession, that at once in this lengthened term of nearly thirty years did he revisit his native country, and that occasion was in the year 1841.

Our countryman Gibson was also a pupil of Canova at the time of Wyatt's entrance into the studio of this great man, and from that time the greatest friendship existed between the two distinguished English sculptors. The industry of Wyatt was singularly constant. In summer, long before five in the morning, he was to be seen on his way to the Caffè Greco, where artists of all nations assemble; and in winter, long before daylight, he was to be seen at the same place reading the papers by the light of a taper which he always carried with him for that purpose. At daylight he was for his studio, and not only thus early, but he also remained at work sometimes until midnight.



"TUNING," DESIGNED BY THE LATE R. J. WYATT.

It was during Wyatt's visit to England, in 1841, that he was honoured by the Queen with a commission for his statue of Penelope, which in Rome was considered the best of his works. His group of "Ino and the Infant Bacchus," a statue of "Glycera," "Musidora," a statue; two statues of Nymphs, and "Penelope," a charming statue, the property of her Majesty, are all works of high merit.

During the operations of the French against Rome, Wyatt sustained great injury, of which he writes as follows to a friend:—

"I had a most providential escape in the attack the French made at Popolo the last day of June: I was awakened one hour and a half after midnight by the roar of cannon, the explosion of shells, the smashing of windows and tiles, the inhabitants of my quarter alarmed, and flying through the streets in all directions. I expected there would probably be an attack at the Popolo, as the French, after gaining possession of Ponte Molle, had taken up a position on the high ground beyond the entrance. I had put all my works in marble in places where they would be least exposed, and had selected for myself, in the event of being surprised by an attack at night, to go and remain at the bottom of a stone spiral staircase, which leads from my apartment to my studio on the ground-floor; on entering the second study for a chair, a shell burst in the wall, which is full two feet and a quarter in thickness; this was only four feet from where I was. If I had been another step in advance I must had been seriously wounded, perhaps killed; but, thanks to Providence, I escaped with a few slight scratches and contusions. The lamp I held was broken, and I believe protected my hand. I picked up nine pieces of the shell in my study; several casts were broken, but, happily, none of my marble works were injured."

It is difficult to determine the remoter causes of Wyatt's decease. He was, apparently, a hale and robust man, more so than any of his brother artists. The attack which destroyed him took place on the morning, it may be presumed, of the 29th of May; for at six o'clock, struggling between life and death, he was found on the floor of his bed-chamber by the woman whose business it was to attend to his rooms. She had entered by means of her own keys; and having raised him into his bed, she instantly sent for Mr. Freeborn, the British Consul, who immediately brought to his aid Dr. Pantaleone, and Mr. Spence, the sculptor. The doctor bled him, and did everything that his knowledge and experience suggested, but without avail; poor Wyatt never spoke, nor did he show any decided signs of consciousness. He breathed his last at ten o'clock.

His friends and professional brethren, Gibson and B. Spence, have kindly offered their aid in superintending the completion of the works that were in progress at the decease of Wyatt; and Gibson, with a feeling that does him honour, has signified his intention to erect a testimonial over the grave of his friend, at his own expense.

We have abridged these very interesting details from a Memoir in the *Art-Journal* for the present month.

The accompanying Likeness is from a sketch made 26 years since in Rome, by Mr. John Partridge, the portrait-painter, who was on terms of close intimacy with Wyatt, and to whom the sculptor presented the design of "Tuning" (here also Engraved) as a friendly *souvenir*.

A FEW FACTS ABOUT MATRIMONY.

MODERN science is invading all the old realms of whims and fancies, charms and witchcrafts, prejudices and superstitions. No kind of ignorance seems sacred from attack. The wise men of our generation are evidently bent beyond recall on finding out all things that may by possibility be discoverable, no matter what pains the search may impose. Not content with making, and sending run messages, chemistry polish boots, and steam deliver parcels and passengers, the *savants* are superseding the astrologers of old days, and the gipsies and wise women of modern ones, by finding out and revealing the hitherto hidden laws which rule that charming mystery of mysteries—that lode-star of young maidens and gay bachelors—matrimony.

In our fourteenth number we gave a description of the facts made out by the returns of the Registrar-General on the subject of life and death in London and the Country. The office of that official has some other duties, however, beyond that of chronicling the departure and birth in this land of ours. There is a third great heading in his tables, under which there are long lists of serious-looking figures, and they tell not in units, or in *fees*, like the back page of a newspaper, but in tens of thousands, how many marriages take place in England. And besides the mere numbers of these interesting events, these figures reveal what are found to be the laws regulating their frequency and other circumstances connected with them, such as how many couples are joined by the costly and unusual mode of special license; how many by ordinary license, how many (and they are the great majority) by the old English fashion of "out-asking" by banns; how many by the new systems introduced for the union of various classes of dissenters, at Registrars' offices, in registered places of worship; how many between Quakers and between Jews; and, beyond all these particulars, how many young folks, hot of heart and full of courage, take the awful plunge into matrimony whilst "not of full age;" how many men take the advice of Sir Roger de Coverl-y, and marry widows; and how many widows, like the wife of Bath, love matrimony so well that when once released from its bonds they tie themselves up in them again for the benefit of the population in the universe of the country. And this would not interfere in the slightest degree with the marriage fees, which would continue to be paid to the officiating clergy. In the places of worship registered by Dissenting ministers, there were not quite ten thousand marriages in one year; nearly four thousand in the same year took place in the Superintendent Registrars' offices; one hundred and eighty-four according to the rites of the Jews; and seventy-four marriages between quakers. The only fortune-teller who can henceforth be believed, is the one who answers the question, "When will the wedding take place?" by saying, "When trade flourishes, and when bread is cheap."—(DICKENS'S *"Household Words."*)

GENERAL WILLISEN.

GENERAL WILLISEN, Commander-in-Chief of the Schleswig-Holstein army, is about sixty years of age. Descended from a noble Prussian family, he was early destined for a military career, and in the campaign of 1806 served as cadet in an infantry regiment. After the disasters at Jena and Auerstadt, he returned to the University of Halle, where he spent the next few years in the retirement of study. When the circle of the Saal was added to the kingdom of Westphalia, Willisen became liable to the military conscription, which was established in the new monarchy after the French model. His attempts to withdraw from the operation of the law were unsuccessful. He was carried to Cassel, and for a short time imprisoned there. This event took place in 1809, just as Austria was about to turn for the fourth time her arms against France. The occasion was favourable to Willisen's flight, however otherwise venturesome this may have been. He proceeded to Vienna, and entered a corps which was to fight in Italy and the Tyrol, and a few years later returned to the Prussian service. From 1817 to 1825, we find him attached to the general staff of Field-Marshal Prince Blucher. He was then in a good school. Led at first by Scharnhorst, then by Gneisenau, and including such men as Generals Clausewitz and Grolmann, this small corps of officers comprised the rarest military talents. Willisen remained in this position for a certain time after the conclusion of peace; and at the end of twenty years' experience, he was appointed to give instruction in military history in the General Military School of Berlin. The aim of his instructions was to lay down a clear and complete system of warfare, which, in respect of method, must, of course, be his own work, but, as to its principles, was nearly related to the system expounded in the writings of the Russian General, Jomini. Proceeding from the axiom, that the object of the art of war is victory, and of victory the attainment of military ends, he regards the army, the instrument of attaining those ends, under two aspects—first and chiefly, according to its requirements; and secondly, as to its capabilities. The supply of the first is the subject, then, of the first part of military science—"the doctrine of conditions" or strategy: to teach how the latter may be best brought out and applied, is the object of the second part of the system—tactics. Willisen then considers victory as it may be attempted in one of two ways, either by aggravating the enemy's difficulties, or by attacking him. It will be seen from the foregoing outline, that Willisen's instructions were at least systematic and logical. His views, however, met with various opponents; and to confute certain objections urged against his principles, he undertook, in 1831, through the medium of the *Military Weekly Gazette*, to establish and illustrate them by the course of the then unfinished Polish war of independence. In his articles he incidentally gave advice to the Polish heroes, and thus disclosed a political bias in no way calculated to win the favour of the court. Willisen, at that time a Major, fell into displeasure. His articles, however, made a great impression in all circles; they were clear, defined by logic, and animated by political feeling; but the issue of the war was unfortunate for their author, as it directly contradicted his predictions. Thus Willisen had prophesied that if the Russians below Wodlin should cross the Wiedsel, they would be lost. But they did so, and took Warsaw, and so shortly ended the war. Damaging as the exposure of this error was for Willisen, the death of his scientific rival and opponent was a more important event. General Von Clausewitz died November 16, 1831; and soon after, his widow published, from the copious literary remains of her husband, that work entitled "War," which has since become so celebrated. Many of Willisen's views were here controverted, and his theory generally denied. After a long silence, Willisen published in 1840 a reply, in a formal exposition of his system; he has had many opponents, but no rival to be compared to Clausewitz. For several years before 1848 Willisen was stationed at Posen, with the office of Chief of the General Staff of the 5th Army Corps, and afterwards as Commander of a Brigade. The plenipotentiary powers in the Duchy of Posen in 1848 are part of the history of the commotions of March. In the autumn of the same year he was present with Radetzky at the siege of Malghera, and observed the progress of the Italian campaign, whose history he has since written. In the promotions of the spring and summer of 1849 Willisen's name was not omitted, and his circumstance may have induced him to apply for the dismission which was granted him in the spring, with the title of Lieutenant-General.

POLICE AND LOCAL IMPROVEMENTS IN CONSTANTINOPLE.—Hitherto this capital has been *quasi* without a police, as the persons employed to watch over the security of the inhabitants are of the worst description of characters, themselves accessible to crime, bribery, and injustice. Crimes were committed by night and by day in the public thoroughfares with the greatest impunity. The streets themselves bear no names, the houses are not numbered, and a stranger secking here requires a guide to conduct him to a friend, who might be a next-door neighbour. To such ridiculous extremes of confusion in great metropolis an end is now about to be put. Policemen, organised on the London plan, are being established. The whole of the innumerable houses of bad fame have been closed. A regulation has been issued, which prohibits ambassadors' dragomans and other foreign protection have been seized, and wherever no guarantee was presented thrown into prison. The houses are to be numbered, the streets named, and we are promised all the usual blessings of European respect. Should more attention be paid to the paving of streets, I am sure it would have the most beneficial effect. The actual state of things is wretched in the extreme. One should not suppose that a capital of 1,000,000 souls, notwithstanding the aid of a potent lantern, it requires a good knowledge of localities to reach the place of destination. To afford you an idea of how agreeable this change will be, I give you the extract of a record address, presented a few days back to a traveler, who was desired to call on his referee:—"The first house on the right hand in the street leading from the guard-house of the hill of Tophane to the small burying-ground; a large house, painted orange colour, and with Venetian blinds." This is not an exaggeration: indeed, to be found out in this city, you must give a similar address, and even then none but the inhabitants can discover your lodgings. The Porte acts very properly in profiting by its diplomatic leisure to accomplish such important improvements. Unfortunately, in this country reforms are always on foot, but you cannot rely on their continuing. Thus, some couple of years back, the streets of Pera were lighted up at night, and the whole of the inhabitants subscribed towards defraying the expenses; but, with all this, the plan was abandoned after six months' trial. We all hope the present improvements will be permanent, and fully carried out.—*Correspondent of the Morning Herald*

The Heythrop (Oxfordshire) hounds began cub-hunting in the forest on the 1st instant, at six o'clock in the morning, and had excellent sport. We may add, for the satisfaction of our sporting friends, that the birds appear to be very strong this season, and the coveys more numerous than usual.

immense number of buckles were manufactured about Birmingham; Walsall, among other places, boasted the greater part of its available wealth in the speculation. The King unfortunately went in the state procession to St. Paul's without buckles, and Walsall was nearly ruined. Shoe-strings gradually supplied the place of straps. The effect of this freak of fashion and speculation on the marriages of Birmingham was to reduce them most seriously; and it had probably more to do with the licentious Birmingham riots, than the more patent political agitation of the day. The disuse of wigs, buckles, buttons, and leather breeches at the close of the eighteenth century, is supposed to have affected the business of a million of people. In 1765, the peace of London had been disturbed by the periwig-makers, who went in procession to petition the young King, "submitting to his Majesty's goodness and wisdom, whether his own example was not the only means of rescuing them from their distress, as far as it was occasioned by so many people wearing their own hair." When change of fashions influence unfavourably the employment of the people, and when, at the same time, influenced or increased by lack of work their poverty increases, matrimony is at a discount. It is not simply the poorer classes, dependent on weekly wages for their support, who feel the influence of times of dullness activity, and allow it to impel them to matrimony. When the workman is busy, the trader makes profits, the landlord gets his rents, and all sections of the community feel the beneficial influence of a prosperous season. The number of those persons entirely removed from such social sympathies is very few; indeed, as a great rule, when the workmen are prosperous, all classes above them are thriving too; and when the one section of the population of English family is influenced to matrimony in an unusual degree, the others feel the influence of the same law. When the reaction, a period of depression, arrives, the number of marriages declines, the two have never fallen back to their original numbers. A time of prosperity lifts up the total in a remarkable manner, and when the happy time ceases, the number falls—butmot equal to the level from which it sprung. It is to a certain degree a permanent increase.

As to the mode in which marriages are performed, it appears that nine out of ten take place according to the rites of the Established Church. The marriages by banns are about six times as numerous as those by license. Upon these weddings, by all of Doctors Commons, there is, it seems, a vast sum of money spent; but who are the lucky men receiving it, does not appear very clearly, and the service they render for the cash is still more doubtful. There are about eighteen thousand licenses granted in a year by Doctors Commons and surrogates every year. The usual cost of the license at Doctors Commons is £2 19s. 6d. There is 10s. 6d. additional for minors; and in the country, surrogates, it is said, obtain higher fees. At only £2 19s. 6d., the tax on eighteen thousand licenses is £47,250 a year. The stamps on each license are 12s. 6d. Deducting this sum, the licenses to marry yield at least £36,000 a year. The expense of granting licenses in a manner the most useful and economical to the public would not be considerable, and it is not easy to see why the surplus revenue derivable from the tax should not go into the public treasury, when a portion of the expenses of the registration of births, deaths, and marriages is paid out of the Consolidated Fund. The aggregate amount of charges for the General Register Office, at which all the returns of the country are examined, indexed, and analysed, and the Act is administered, was £13,795 in 1846; and the six hundred and twenty-one superintendent registrars received £9797 for examining certified copies. After discharging the expences of the civil registration, defrayed by the Consolidated Fund, and the cost of the decennial census, a large surplus would be left out of £36,000 a year. This would be a boon to the public revenue of the country. And this would not interfere in the slightest degree with the marriage fees, which would continue to be paid to the officiating clergy. In the places of worship registered by Dissenting ministers, there were not quite ten thousand marriages in one year; nearly four thousand in the same year took place in the Superintendent Registrars' offices; one hundred and eighty-four according to the rites of the Jews; and seventy-four marriages between quakers. The only fortune-teller who can henceforth be believed, is the one who answers the question, "When will the wedding take place?" by saying, "When trade flourishes, and when bread is cheap."—(DICKENS'S *"Household Words."*)

GENERAL WILLISEN.

GENERAL WILLISEN, Commander-in-Chief of the Schleswig-Holstein army, is about sixty years of age. Descended from a noble Prussian family, he was early destined for a military career, and in the campaign of 1806 served as cadet in an infantry regiment. After the disasters at Jena and Auerstadt, he returned to the University of Halle, where he spent the next few years in the retirement of study. When the circle of the Saal was added to the kingdom of Westphalia, Willisen became liable to the military conscription, which was established in the new monarchy after the French model. His attempts to withdraw from the operation of the law were unsuccessful. He was carried to Cassel, and for a short time imprisoned there. This event took place in 1809, just as Austria was about to turn for the fourth time her arms against France. The occasion was favourable to Willisen's flight, however otherwise venturesome this may have been. He proceeded to Vienna, and entered a corps which was to fight in Italy and the Tyrol, and a few years later returned to the Prussian service. From 1817 to 1825, we find him attached to the general staff of Field-Marshal Prince Blucher. He was then in a good school. Led at first by Scharnhorst, then by Gneisenau, and including such men as Generals Clausewitz and Grolmann, this small corps of officers comprised the rarest military talents. Willisen remained in this position for a certain time after the conclusion of peace; and at the end of twenty years' experience, he was appointed to give instruction in military history in the General Military School of Berlin. The aim of his instructions was to lay down a clear and complete system of warfare, which, in respect of method, must, of course, be his own work, but, as to its principles, was nearly related to the system expounded in the writings of the Russian General, Jomini. Proceeding from the axiom, that the object of the art of war is victory, and of victory the attainment of military ends, he regards the army, the instrument of attaining those ends, under two aspects—first and chiefly, according to its requirements; and secondly, as to its capabilities. The supply of the first is the subject, then, of the first part of military science—"the doctrine of conditions" or strategy: to teach how the latter may be best brought out and applied, is the object of the second part of the system—tactics. Willisen then considers victory as it may be attempted in one of two ways, either by aggravating the enemy's difficulties, or by attacking him. It will be seen from the foregoing outline, that Willisen's instructions were at least systematic and logical. His views, however, met with various opponents; and to confute certain objections urged against his principles, he undertook, in 1831, through the medium of the *Military Weekly Gazette*, to establish and illustrate them by the course of the then unfinished Polish war of independence. In his articles he incidentally gave advice to the Polish heroes, and thus disclosed a political bias in no way calculated to win the favour of the court. Willisen, at that time a Major, fell into displeasure. His articles, however, made a great impression in all circles; they were clear, defined by logic, and animated by political feeling; but the issue of the war was unfortunate for their author, as it directly contradicted his predictions. Thus Willisen had prophesied that if the Russians below Wodlin should cross the Wiedsel, they would be lost. But they did so, and took Warsaw, and so shortly ended the war. Damaging as the exposure of this error was for Willisen, the death of his scientific rival and opponent was a more important event. General Von Clausewitz died November 16, 1831; and soon after, his widow published, from the copious literary remains of her husband, that work entitled "War," which has since become so celebrated. Many of Willisen's views were here controverted, and his theory generally denied. After a long silence, Willisen published in 1840 a reply, in a formal exposition of his system; he has had many opponents, but no rival to be compared to Clausewitz. For several years before 1848 Willisen was stationed at Posen, with the office of Chief of the General Staff of the 5th Army Corps, and afterwards as Commander of a Brigade. The plenipotentiary powers in the Duchy of Posen in 1848 are part of the history of the commotions of March. PAPER-HANGINGS.—COTTERELL BROTHERS, 500, Oxford-street (a few doors from Holborn), invite attention to the very superior character of their PAPER-HANGINGS, selected with the utmost care all the principles, French and English manufactures. A stock of from 30,000 to 50,000 pieces is always on hand, so that they can supply any quantity, of every grade, class, and colour, for immediate use. Parties in the country should write for the Tables of Prices, which will be forwarded by return of Post. Should a celebrated Penny Paper for bedrooms, will be sent post-paid on receipt of two postage stamps. COTTERELL BROTHERS commence their Sales by Candle on Monday next, when the inspection of persons of taste. The Oxford-street Paper Hanging Warehouse, No. 500, a few doors from Holborn; also at Bristol and Bath.

CARPETS.—BRIGHT and CO.'s PATENT Power-loom BRUSSELS CARPETS, of Goods are strongly recommended to the Notice of the Public on the following grounds:—They are woven by Steam Power, and are, therefore, more firmly made than any of the usual hand-woven goods. They have the same good quality of Worsted throughout; whereas in the common Brussels the dark colours are generally made of an inferior Worsted. They are printed by a patent process, and by patent machinery; and the colours are fixed in the wool, and will stand more severe tests than those of any other description of carpet. The patent printing admits of an almost unlimited variety of shades of colours, patterns are, therefore, more perfect, and there is greater scope for design. They can be offered at a price about 30 per cent below that of goods of equal value made in the ordinary mode. In quality, pattern, in variety of colours, and in price, the Patent Power-loom Brussels Carpets offer great advantages to the Public.—Wholesale, 30, Skinner-street, Snow-hill, London; 33, New Brown-street, Manchester.

GREAT SALE of BLACK SILKS, Satinette, Durapes, Watered and Brocaded Ditto, Black Damasks, &c., &c.; and Black Dress Satins, at one-third less than the regular prices.—SEARLE and SEARLE, 65 and 84, Edgware-road, have just completed a very large purchase of the above goods for cash under peculiarly favourable circumstances. The sales are now being submitted to public inspection; and, for the convenience of ladies residing in the country, patterns forwarded postage free.
Address, SEARLE and SEARLE, 65 and 84, Edgware-road.
N.B. Just received, direct from Wales, 50 bales of the best manufactured flannels, undressed pure mountain wool, and will be offered full 30 per cent less than last year's prices.

NOVEL and ECONOMICAL METHOD of SELECTING your CLOTHING.—SAMUEL BROTHERS, 29, Ludgate-hill, respectfully purchases that there is the only establishment where gentlemen can select for the quantity, quality, and value of material in each garment, and in which a fixed price is charged for making up: thus, for a coat 7 yards of material, 7s. 6d.; making and trimmings 30s., complete £2 5s.; vest 2 of a yard of kerseymere, 3s. 6d. per yard, material costs 8s. 1d., making and trimmings 5s. 6d., complete 13s. 7d.; pair trousers 2¾ of a yard of kerseymere, 3s. 6d. per yard, material costs 12s. 10d., making and trimmings 7s. 6d., complete 19s. 7d.; suit complete £5 11s. 2d. Our ready-made stock embraces everything that capital and taste can produce, at prices that will defy competition. [illegible] SAMUEL BROTHERS, 29, Ludgate-hill.

Parcels of £3 sent throughout the Kingdom free of all railway carriage; Where Sent Carriage Free, Cash Only Received.
LISTS, with PRICES, sent POST-PAID.

BATHS of HOMBURG, near FRANKFORT-ON-THE-MAINE
The Mineral Waters of Homburg, their rise at the foot of the Taunus mountains, two hundred yards above the level of the sea. To the original springs, the reputation of which is so generally established in Germany, have lately been joined fresh sources, which, from the intensity of their mineralisation and the energy of their action in certain morbid states, have elevated them to the first rank among the mineral waters of Germany.
The springs of Homburg are five in number. They have been analysed by the celebrated Professor Liebig. Notwithstanding the differences which exist between them, they may be considered as the same medicament diversely modified. Their mineral principles retain the same, and the medicinal properties vary only in their relative proportions. This affords to the physicians the highly valuable advantages of applying to each individual case the peculiar water best adapted to it, and of rendering the treatment according to the course and progress of the complaint.
The temperature of these waters is of constant efficacy, above all when drunk at their source, for then the revivifying air of the mountains, the diversity of the beautiful walks, and the fresh breezes from the caves of the world, concur in assisting the action of the medicinal properties.
The waters of Homburg are stimulant, tonic, alterative, and aperient. They are suited to all cases requiring a gentle excitement of the digestive and assimilative organs, as affections of the nerves, hypochondria, sanious, the hemorrhoids, and obstinate constipation. In gout and all affections proceeding by derangement of the digestive functions, most happy results are derived from them.
During the eight years which have elapsed since these springs first became known as remedies, the city of Homburg has greatly improved. A new town has grown up by the side of the old, and new streets and promenades in all directions, and the comforts required by invalids, and luxuries to be found at the most favourite watering-places.
The forests, which surround Homburg like a rich scene, are pierced in rare taste and diversity, which the residents, and the many who come to these springs to enjoy the delightful scenery, visit the Feldberg, the Rock of Elisabeth, Luther's Oaks, and all the picturesque scenes of the Taunus.
The Directors of this Grand Establishment have constructed a magnificent Casino, which—by the beauty of its architecture, the excellence of its distribution, and the splendour of its decorations—surpasses any building hitherto erected at any point on the banks of the Rhine. It contains a theatre, concert-rooms, balls and rooms, rooms for the games of Trente et Quarante, and for Roulette; tables; a Cabinet for reading, in which are found the principal French, English, Russian, Belgian, and Dutch journals; a Coffee-room; a Divan for smoking, opening on to a terrace, covered with asphalt, and a grand Dining-room with a table d'hôte, served a la Francaise, twice a-day, viz. at 1 and 5 o'clock.
An excellent Orchestra performs three times a day; in the morning at the Springs, in the afternoon in the beautiful Gardens of the Casino, and in the evening at the Concerts.
Concerts, Balls, and Fêtes of every description succeed each other without interval.
The Directors shrink from no sacrifice to render this watering-place as de lightful as possible to its visitors, and to render the cure more certain and speedy. Besides the above-mentioned attractions, all abounding in game of about 50,000 acres of first lac ds and plains, all abounding in game of every description, as well as a rocky Park for the Grand Chasse at the close of the winter season. The Casino of Homburg is the only establishment of the kind that has enjoyed hitherto the privilege of remaining open all the year; and the concentration of its tables or play, its balls, its concerts, and its hunting parties throughout the winter season, make it attract a numerous and select society from every quarter of Europe, and there is now a great number of strangers of distinction there.
The Journey from London to Homburg, passing through Brussels, the Cologne, Mainz, and Frankfort, is performed in 36 hours. The distance from Frankfort to Homburg is got over in one hour and a half. Mail Coaches and Omnibuses run between these places every hour.

C. F. HANCOCK, a successor to STORR and MORTIMER, Jeweller and Silversmith by Special Appointment to the Queen and

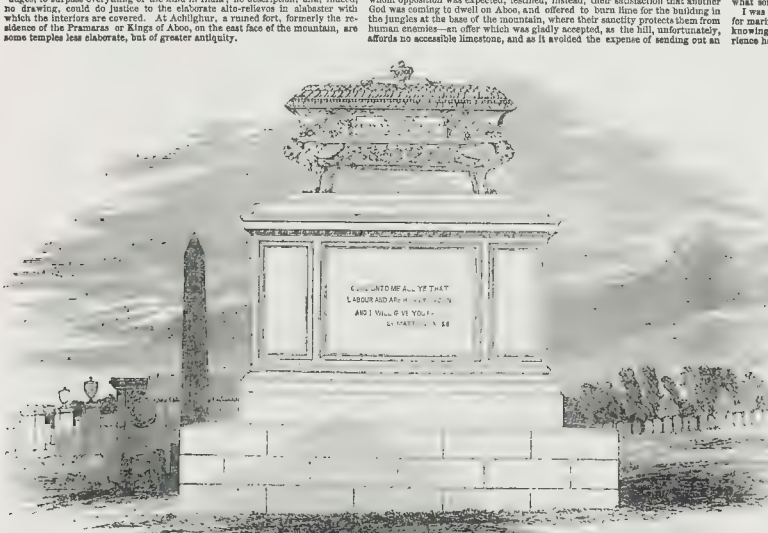
NEW CHURCH ON MOUNT ABOO, IN RAJPOOTANA, EAST INDIES.

NEW CHURCH ON MOUNT ABOO, IN RAJPOOTANA, EAST INDIES

(From a Correspondent.)

INDIA is an country of interest principally on account of our recent brilliant victories and vast accessions of territory; but there are changes in it going on of an important though less striking character: old residents remark a vast improvement in the social habits and tone of society amongst Anglo-Indians, connected with, perhaps caused by, the decrease of convivility, the increase of marriage, and the consequent introduction throughout the country of amiable and accomplished ladies and engaging families. Connected with this state of things, and, perhaps, standing to it in relation both of cause and effect, is the increase of places of worship, and of the religious advantages belonging to them. The little Church or Chapel represented above is an object of no common interest, from its being, we believe, the first Christian temple erected in a province of India of great extent and considerable importance, and from its planting, as it were, the standard of the cross on a mountain esteemed pre-eminently holy, and abounding with some of the most ancient and costly monuments of idolatry to be found in the whole continent of India. Rajpootana consists of a number of independent states, ruled over by separate rajahs, but having an international court, and some other institutions in common, analogous to the Germanic Confederation or the Saxon Heptarchy. One of these, Ajmeer, is a British possession, and thus brings us into close connexion with the Rajpoot Princes: they are, for the most part, an independent, high-spirited race, proud of their ancient and feudal institutions, but attached to the English rule; insomuch that when the disastrous retreat from Cabul had given rise to apprehensions of a general insurrection throughout the country, they voluntarily came forward with an offer of 40,000 sabres, if required, in our aid. Relations are kept up with them by a political resident, as representative of the British Government at each Court, under the superintendence of the "Agent for the Governor-General in the Rajpoot States," who resides at Ajmeer, and to whom the various states, in their turn, send Vakeels, or Consuls. Mount Aboo stands in the territory of Serohee, one of these States, and is a vast mass of granite, having the form of an irregular square, with rounded corners, presenting a side of about thirteen miles nearly to each point of the compass. The north-east corner is considerably higher than the rest, and is about 4500 feet above the level of the sea, and 800 above the Sanitarium. On the highest point is erected a small temple, from which the view is sublime, from its vast extent: this point is called, from the temple above-named, the Guru Sikra, or Priest's Pinnacle. The summit of the mountain is rugged table-land, surrounded by a very broken and irregular margin of granite ridges, and is divided by minor ridges into many beautiful valleys: the bottoms of most of these are as level as the surface of water, and are extensively cultivated with barley. The grape, peach, pomegranate, corinda (a sweet fruit resembling a damson), and dogrose, with a great many flowering shrubs, grow wild. Many European flowers, with the mulberry and potato, have been tried, and found to answer well; and there is little doubt, if Europeans were permanently resident there, that most of the fruits and flowers of temperate regions might be advantageously cultivated. The place has for many years had the highest reputation for sanctity, and the temples at Dewilwarra, erected by Guzerat merchants, about 800 years since, are said, by competent judges, to surpass everything of the kind in India; no description, and, indeed, no drawing, could do justice to the elaborate alto-relievos in alabaster with which the interiors are covered. At Achilghur, a ruined fort, formerly the residence of the Pramaras or Kings of Aboo, on the east face of the mountain, are some temples less elaborate, but of greater antiquity.

But the great attraction of Aboo is the climate. Rising with angular abruptness from a plain of vast extent, which has no appreciable rise for 120 miles, and is swept from March to June by a strong wind from the parched deserts of Kutch and Sind, it is scarcely possible to conceive the transition which an ascent of two hours causes, or the contrast which its cool breezes and ever-varying landscape present to the scorched ground and dusty atmosphere of the plains. In these a thermometer carefully protected from the action of the sun, direct and indirect, occasionally rises to 114°, and is sometimes 96° at midnight. On this account, Aboo is a favourite resort during the hot weather for the political agents scattered throughout Rajpootana, and for officers and their families from the surrounding stations of Nusseerabad, Neemuch, and Deesa. To the last station particularly it is of great importance, being only forty-five miles distant; and Deesa, containing one of her Majesty's Regiments (the 86th), with a troop of Horse Artillery, and two Native regiments, making up on the whole about 1500 Europeans, for the sick of whom a sanatorium has been established. This station is by no means on the most picturesque, or, perhaps, the most salubrious part of the hill, being rather low, and near a lake which receives a great part of its waters; but this lake, about half a mile in circumference, and of surpassing beauty, has, doubtless, been the first attraction, and the station has gradually extended from it. The number of residents at present, including 20 ladies and 32 children, is about 200. Divine service was at first celebrated by the chaplain of Deesa, who makes a certain number of visits during the year to the soldiers and gentry separately: to the first in a tent, then under a large tree, and finally in their new barracks; to the latter in any room he could procure. As the mountain was becoming yearly a place of more general resort, and several families had successfully tried the experiment of remaining there during the monsoon, it was resolved to build a small church in which rich and poor might worship together, and which, from its ecclesiastical appearance, might shew to the heathen around that we have a religion and a worship—a fact which many of them doubt. A subscription list was opened on December 13th, 1849; and, the interior being completed, Divine service was first celebrated in it on May 12, 1850. It is 44 feet long by 17 feet broad, and will accommodate about one hundred persons. Arches are built in the wall, to allow of transepts being hereafter added, if more room should be required; but the present accommodation is sufficient, a considerable proportion of the European soldiers being Roman Catholic. The building is of brick, and covered with tiles, as an improvement on the thatch generally used in such stations. The design and superintendence devolved on the chaplain; and, in carrying it out, considerable difficulties had to be overcome. The mountain furnishes no kind of artificers whatever, and the cutting of timber on it is strictly prohibited. Brick and tile makers, bricklayers, carpenters, &c., had therefore to be induced, by a promise of fifty per cent. in addition to their ordinary wages, reluctantly to go out from Deesa, where also all the wood-work had to be prepared, then carried over fifty miles of sandy road as heavy as a ploughed field, and finally carried on men's heads up a steep mountain, far higher than Snowdon: in addition to this, the work was altogether new to the native artisans; and, there being no foreman, or clerk of the works, the clerical architect was obliged to depend on the instruction afforded by a wooden model prepared with his own hands, and such occasional flying visits as he could make amidst the pressure of other duties. The total cost of the building and its furniture will be about 1400 rupees, or £140, including a disheartening loss of all the teak-wood doors and windows, with part of the roof, by fire, after they had been conveyed to the summit. The Gosains (Buddhist mendicant friars), from whom opposition was expected, testified, instead, their satisfaction that another God was coming to dwell on Aboo, and offered to burn lime for the building in the jungles at the base of the mountain, where their sanctity protects them from human enemies—an offer which was gladly accepted, as the hill, unfortunately, affords no accessible limestone, and as it avoided the expense of sending out an establishment for the purpose, and a guard to protect it against wild beasts, and the savage Bheels, still more formidable, with which the jungle abounds.

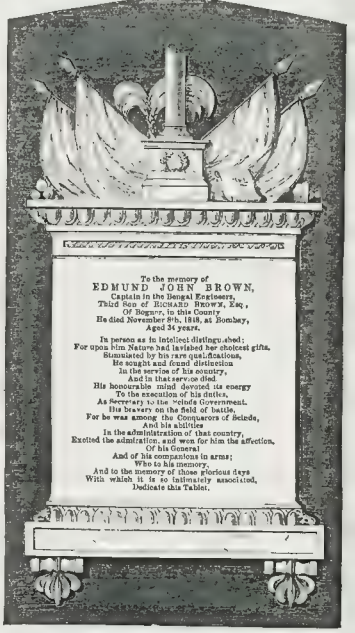


MARBLE TOMB OF THE PRINCESS SOPHIA, JUST ERECTED IN THE KENSAL-GREEN CEMETERY.

MONUMENT TO CAPTAIN E. J. BROWN, OF THE BENGAL ENGINEERS.

THIS characteristic memorial has just been placed in the church of Bursted, in SUSSEX, to the memory of Captain E. J. Brown, who fell in the Scindian war.

The inscription derives an especial interest from its being from the pen of Sir C. J. Napier, and records, we believe, the general sense entertained in Scinde of this gallant young officer's merits. Able alike in the field and in the cabinet, there was also something chivalrous in the courage of Captain Brown; as Scindiana, who remember the entrenchments of Hyderabad and the ride to Omerkote, will not be slow to testify. Of such men, not uncommonly, are the first-



To the memory of
EDMUND JOHN BROWN,
Captain in the Bengal Engineers,
Third Son of RICHARD BROWN, Esq.,
Of Bognor, in this County
He died November 9th, 1843, at Bombay,
Aged 34 years.
In person as in intellect distinguished;
For upon him Nature had lavished her choicest gifts,
Stimulated by his rare qualifications,
He sought and found distinction
In the service of his country,
And in that service died
His honourable mind devoted its energy
To the execution of his duties,
As Secretary to the Scinde Government.
His bravery on the field of battle,
For he was among the Conquerors of Scinde,
And his abilities
In the administration of that country,
Excited the admiration, and won for him the affection,
Of his General
And of his companions in arms;
Who to his memory,
And to the memory of those glorious days
With which it is so intimately associated,
Dedicate this Tablet.

MONUMENT TO CAPT. E. J. BROWN, JUST ERECTED IN BURSTED CHURCH, SUSSEX.

fruits of Death; and such especially should a grateful country hold up to the emulation of her young officers in the East.

THE LATE STEAM-BOAT BOILER EXPLOSION.

(To the Editor of the ILLUSTRATED LONDON NEWS.*)*

SIR,—The late fatal accident at Bristol to a high-pressure boat should not be passed over without some practical suggestions that may prevent its repetition. It is clear that most of the unhappy people that were thrust into eternity on that occasion were ignorant of the character of the vessel they were embarking in. From twenty-five years' acquaintance and connexion with steam navigation, I am sure that not one passenger in twenty in this country would put his foot on board a steamer, if he had an idea she was worked with high-pressure steam; and I would suggest that the Board of Trade (who have ample power) should make it compulsory on all passenger steamers to have the pressure per square inch on the safety-valve painted in legible characters nine or ten inches long on the paddle-box, so that her Majesty's subjects might know before they paid the fare what sort of craft they were going on board of.

I was formerly of opinion that the engineer who made a high-pressure engine for marine purposes, should be tied down by legislative enactment to work it; knowing that such a regulation would be equivalent to a prohibition. But experience has shown me the inutility of legislative prohibition: that all we can do is to warn people, just as we license a cab to carry two, an omnibus twelve in and fifteen out, or vice versâ; and after that, if any obstinate fool chooses to risk being blown up in the *Cricket*, with 5 lb. pressure, while he can go as fast in the *Fly* with five—why, her Majesty may have lost a subject, but not a valuable one.

Yours respectfully, M. L.

Fenchurch-street, Aug. 12, 1850.

MONUMENT TO THE LATE PRINCESS SOPHIA.

OUR readers will, doubtless, recollect that, at the funeral of her Royal Highness Sophia, in the cemetery at Kensal-green, the Royal remains were temporarily deposited in the catacombs beneath the chapel. Soon after this interment, a piece of ground was selected near the tomb of the late Duke of Sussex, where an elegant memorial has been erected to the Princess, and thither her remains have been removed. It consists of a large altar-tomb, of Sicilian marble, designed by Mr. Gruner, and executed by the brothers Signori Bardi, of Carrara, and Messrs. Noakes and Pearce, of London. The tomb is surmounted with an exquisitely sculptured sarcophagus; and upon one of the faces of the altar is inscribed—"Come unto me all ye that labour and are heavy laden, and I will give you rest."—*St. Matthew*, chap. xi., v. 28.

This very interesting memorial has been erected at the joint expense of the Royal Family.

STRANGE, IF TRUE.—The following is taken from the *Galway Mercury*:—The following fact, in connexion with the potato blight, may throw some light on that mysterious subject:—A woman named Mary M'Donough, aged 33, and from Oranmore electoral division of this union, was brought a few days ago on a car to the workhouse gate. She appeared to be suffering from acute pain; her hands and face presented the appearance of having been severely burned, as if they had been held over the flame of a strong fire. The skin was off, and the flesh corroded. In reply to questions put to her she made the following statement:—She was employed by a man of the above-named division to weed potatoes, and was at work about one o'clock P.M. on Friday, the 18th inst., in her perfect health, when a sudden blast of burning air came over her and she was thrown back. She felt as if a quantity of pungent snuff had entered her nostrils. She recovered in a few minutes, and found her hands and face scorched in the manner described. She also stated that the stalks of the potatoes where she was at work were burned to a cinder, and the tubers made soft and black. It is thought the parts of the poor woman's body which are affected by the blast will mortify.

THE ILLUSTRATED LONDON NEWS

No. 443.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, AUGUST 24, 1850. [SIXPENCE.

AN EDUCATIONAL EXPERIMENT.

THE great question of National Education is adjourned *sine die*. Our statesmen do not care to embarrass themselves with it. It is too difficult for their strength, too complicated for their perseverance, and too dangerous to their power for their courage to attempt, and so they let it alone. And while this unhappy result is to be deplored, it is not to be wondered at. Where can we expect a leader of parties in the House of Commons, who, by placing the education of the people in the hands of the Established Church, will run the risk of letting loose against him and his adherents, not only the angry tongues of Dissent, but the damaging votes of the multitudinous Dissenters? Even the Dissenters cannot expect a statesman to ignore, in such a question, the claims of the Church of England, and take cognizance of them alone. Statesmanship between the two falls disheartened to the ground; and if any one aspiring to the name of a legislator attempts the compromise of secular education, the belligerents cease their strife for awhile to run foul of him, and to belabour him with the charges of atheism and infidelity. In short, public men, although they cannot but see that a mighty evil is in existence, and that it is increasing day by day amongst us, cannot touch the question. The present state of men's minds forbids a remedy as gigantic as the evil, and will tolerate no other attempts to cope with it than isolated and partial ones.

The friends of the cause cannot but rejoice, therefore, when any new movement is made, however partial or local it may be, which has a tendency to diminish the awful ignorance in which the children of the poor are allowed to grow up in this country. Among recent attempts of this kind, the most remarkable, and the most promising of future good, is that which we owe to the energy and philanthropy of the gentleman who holds the office of stipendiary magistrate in Liverpool. Mr. Rushton has proposed a plan to the parochial and municipal authorities of that great town, by which he hopes to diminish the cost of prosecuting and punishing the young children of the poor who are brought before him for offences against property, and of rescuing them, at the same time, from the certain destruction, bodily and spiritual, in which they are engulphed by the present system. The magistrates of Liverpool—a town that, notwithstanding all its opulence and charity, teems with poverty, degradation, and vice—presented a petition four years ago, in which they prayed the House of Commons to order an investigation into the whole subject of Juvenile Crime. In that petition they selected the cases of fourteen children who had been several times convicted of theft before them, and committed, and re-committed to prison, at a large expense to the community. Not one of those fourteen children could write and only one of them could read, and that very imperfectly. The first, at the age of eighteen, had been sixteen times committed to prison, and cost the Corporation of Liverpool a sum, omitting fractions, of £129; the second, at the age of sixteen, had been convicted twelve times, at a cost of £71; the third, at twelve years of age, had been convicted ten times, and cost £74; the fourth, at twelve years, had been convicted nine times, and cost £71; and the fifth, at twelve years, had been convicted eight times, and cost £47. We need not run through the entire list, which is but a repetition of the same story—repeated convictions, repeated punishments, and repeated returns to their old courses of crime. The youngest of these children, at nine years of age, had cost Liverpool £64 18s. in punishment. The total cost of the fourteen was £889 1s. The petitioners—who were men of station and fortune, rich merchants and rate-payers, exercising the respectable functions of the unpaid magistracy—found, upon investigating the possibility of reforming such offenders as these, that, in the small Reformatory Asylum at Warwick, much good had been effected; that in eight years, from 1833 to 1841, 77 young boys had been admitted, of whom 44 had been converted into useful, honest, and self-supporting members of society; and that the expense of reforming these outcasts had been only one-fourth of the expense attendant upon punishing, without reforming, the young criminals of Liverpool whose cases they cited. Parliament took no particular notice of this important statement. The petition was tossed upon the table, where it lay for the customary time, until it found its way to the limbo of all such documents. It was hoped by the magistrates of Liverpool that Government would so far aid the object which they had in view, as to introduce a bill permitting counties and boroughs to establish reformatory asylums. Nothing, however, was done; the subject dropped, and the evil grew. Wicked fathers and mothers traded as before upon the crimes of their young children, and sent them out into the streets to steal. Thus, a threefold loss, of which it is difficult to say which was the most deplorable, was inflicted upon the community: first, there was the loss of property caused by their depredations; secondly, there was the loss of money expended in their punishment and maintenance in prison; and, third, there was the loss to the commonwealth caused by their incapacity to pursue any honourable calling. Mr. Rushton, who, more than any other magistrate of Liverpool, was cognisant of the whole extent of this evil, despairing either of the active or passive aid of the Government, was led to consider what could be done without it. After earnest study of the whole subject, he penned and published a letter to the Town Council and Select Vestry of Liverpool, in which he recapitulated the painful and convincing evidence placed before the House of Commons, and added some new and equally flagrant instances of the expensive mischief of the present system of dealing with young criminals. He cited, more especially, the cases of three brothers, the sons of a man who traded upon their offences. The eldest was fourteen, the second was nine, and the third was eight years old, at the time the letter was written. The

DEPARTURE OF ENGLISH MEMBERS OF THE PEACE CONGRESS FOR FRANKFORT.—(SEE NEXT PAGE).

first had been twenty-four times in custody for theft, the second eight times, and the third six times. The two younger children were small of their age, and their faces were not entirely visible above the dock at which they stood before the magistrate. These children, said Mr. Rushton, "were trained by a vicious father to the work of plunder; he taught them how to steal with dexterity, and he used them as a means of supplying himself with a luxurious existence. Time after time," added the benevolent magistrate, "I have remanded these infants, and after certain periods of delay I have sent them by night to places where they might have a chance of escape from their father who is destroying them; but the father has discovered them, and having no power to detain the children, his commands have been obeyed, and here is the sad result." Mr. Rushton feeling that these children were not moral agents, and that they might, under proper management, if the father could be prevented from exercising any authority over them, be trained into useful members of society, proposed to the Town Council and Select Vestry of Liverpool to try what could be done to reform them and all other children in similar circumstances who might be brought before him. The existing law is, it appears, sufficient for the purpose, and there only needs the co-operation of a public body to provide the funds. Mr. Rushton, therefore, proposed, as a matter of economy, as well as expediency and philanthropy, that the parish and municipality of Liverpool should appropriate a wing or section of their public school for pauper children at Kirkdale to the reception of children whose ignorance and evil training make them a burden upon the community. By the provisions of the Act of the 3rd and 4th Victoria, cap. 90, the Lord Chancellor may assign the persons of all children convicted of felony to the custody of any persons who are willing to take charge of them until they are twenty-one years of age. Mr. Rushton, instead of summarily convicting such children as those whose unhappy cases have been cited, proposed to send them for trial before the Borough Recorder and a jury, and, after conviction and punishment, to apply to the Lord Chancellor, on behalf of the select vestry, for the custody of their persons. They would thus be rescued from the mischievous control of wicked parents and vile associates, and, at a smaller expense than that of repeated prosecutions, be trained to habits of industry and order, and imbued with the principles of morality and religion. The public authorities of Liverpool, after earnest deliberation, finally resolved to try the experiment, and have voted the necessary funds for the purpose, amounting to £1300 per annum, and an outfit of 500 guineas. The parish and town will not necessarily be burdened with the support of these youths until they arrive at the legal age of self-government. The criminal will, in the first instance, be treated as a criminal until he shall be convinced of his errors and crimes, and will only be admitted to the privileges of industrial and educational training when he shall have qualified himself by a satisfactory probation. Being withdrawn from all evil influences, he will be placed within the sphere of beneficial influences, and the true work of his social elevation will begin. Taught a trade, and made to some extent a participator in the advantages of our civilisation, he will be fitted to go out into the busy world of life, with as fair a chance as if he had had a good father instead of a bad one; and will cease, at the usual period when the labour of a properly-trained youth becomes valuable to himself and to society, to be a burden upon any one. Of course, there will be failures. The children of the virtuous sometimes turn out ill; and it will be strange indeed, if a proportion of such boys as these ill be prove incorrigible. But if even half of the cases turn out well, a triumph for humanity will have been achieved, of which Liverpool will have reason to be proud.

We shall look with anxious interest for the result. If that great town prove, by the practical working of this project, that it be cheaper to prevent than to punish crime, it will have been the means of conferring an inestimable boon, not only upon its swarming population of thieves and vagrants, but upon its rate-payers, and upon all great towns where similar misery, demoralisation, and crime exist. At all events, the experiment is a most important one, as regards the two great questions of "Crime" and "Education;" and its progress and results will, there can be no doubt, excite the attention of every statesman and philanthropist, as well as of every one concerned either in the administration of justice or in the education of the people.

THE PEACE CONGRESS AT FRANKFORT.

The friends of peace, from various countries in Europe, and from the United States of America, are about to hold their third Congress at Frankfort-on-the-Maine. A large party of delegates and visitors, upwards of 500 in number, have proceeded from this country, special trains and steamers having been engaged to convey the company direct from London to Frankfort, viâ Dover, Calais, Malines, and Cologne. Of this number, 420 left the London-bridge station in a train of 24 carriages, specially engaged, at half-past ten o'clock on Tuesday morning.

A large number of delegates have arrived from the United States, including men of high influence, both in the literary and political world; and not the least interesting among the American delegates are two gentlemen, one of whom is a Red Indian, who, twelve years ago, was a hunter in the forests of the Far West; the other a coloured man, of pure negro descent; they are both gentlemanly and well-educated men, and are highly esteemed as publishers in America. The sittings of the Congress commenced in St. Paul's Church, on the morning of the 22d, and continued on the 23rd and 24th. Resolutions were submitted to the Congress, and fully discussed, affirming the impolicy and immorality of all war, and suggesting certain practical measures, leading to establish the peaceful relations of nations, and to provide efficient substitutes for war in the settlement of international disputes

Messrs Burritt and Richard, the two secretaries of the London Peace Congress Committee, have been engaged during the last six weeks in visiting many of the most important cities and towns in Germany and Prussia, in each of which places they obtained interviews with some of the most influential men, by whom they were cordially received, and who manifested a warm sympathy in the proposal to hold the Congress in Germany. Their interview with the venerable Baron Humboldt, at Potsdam, was exceedingly interesting; a very general desire had been expressed that he should be nominated as president of the Congress, and Messrs Burritt and Richard conveyed to him this invitation on the part of the committee, but his great age prevented him from accepting it. He expressed, however, his warm approval of the movement.

NATIONAL SPORTS.

YORK RACES Wednesday

Yorkshire Oaks of 15 sovs each, with 100 added Mr Shelley's Britomia (F. Butler), 1. Mr Watlow's Harriott (Whitehouse), 2

Produce Stakes of 100 sovs each Mr. Meekham's The Italian (Templeman), 1. Mr. Jaques's Dauphin (Flatman), 2

Shadbrooke's Two Years-Old Stakes of 10 sovs each, with 50 added.—Mr. Steven's Britannia (H. Crickmere), 1. Lord Stradbroke's ch f by Alpheus (Boyce), 2.

FOREIGN AND COLONIAL INTELLIGENCE.

FRANCE.

From Paris or the departments the only news that comes relates to the reception of the President Louis Napoleon at the various stages of his progress through the eastern provinces. It would appear that he was very well received in Lyons and other places which are regarded as the great hotbeds of Socialism and Red Republicanism

On the evening of the 18th he arrived at Besançon, where he was received with the warmest demonstrations of applause. On the 19th he attended two balls, and reviewed the National Guard and troops of the line in the Champ de Mars. Vast numbers of persons crowded around the President wherever he went, eagerly desirous of paying him every mark of respect and admiration. Louis Napoleon quitted Besançon in the afternoon of the 19th, and continued his journey, proceeding to Colmar, where he arrived on Tuesday last. He was expected at Strasburg on Wednesday. No particulars of his journey from Besançon had reached Paris; in the absence of which, rumours were current on Wednesday that Louis Napoleon had been fired at at Colmar; that the Republicans at Besançon, Colmar, and Mulhouse had exhibited the most turbulent demonstrations, and that several persons had been arrested. The atmosphere being so cloudy on that day, the French Government did not receive their usual daily telegraphic despatches, and therefore the truth of these reports could not be ascertained. They may, probably, be founded only on the confusion which occurred at the people's ball at Besançon, arising from the impertinent intrusion of some individuals, which induced General de Castillane to draw his sword, and compelled Louis Napoleon to retire when he would otherwise have remained for some time longer

The President intends to remain but a short time in Paris on his return from his present tour. He will then proceed to Cherbourg, where preparations are already made to give him a flattering reception. A grand naval review is expected to take place there on the 3rd or 4th of September.

The *Bulletin de Paris* says that a man of note belonging to the Moderate party has received a letter from the Prince de Joinville, announcing his intention to offer himself for the Presidency when Louis Napoleon's term of office shall expire. The journal above-named states that "the Prince says textually that there are, in his opinion, no longer but two regimes possible in France, the hereditary and legitimate monarchy or a republic, but not a princely republic; and adds, what is still stranger, coming from a son of Louis Philippe, that it cannot any more be question of the monarchy of expedients which we had during the reign of his father." This intimation, it is said, has caused considerable sensation among the several parties in France.

The *Pouvoir* mentions that Count Montalembert, who had an interview with the Duke of Bordeaux, unanimously resolved to oppose any proposition which might be made to prolong the President's term of office.

M. Challen, one of the editors of the *National*, was seized with apoplexy on Monday, and died a short time afterwards.

The celebrated novelist, M. de Balzac, died in Paris on Monday, after a protracted illness.

The damage done to the crops by the late rains has been much exaggerated; and though the harvest may prove less than the last, it gives every promise of being above the average.

DENMARK AND THE DUCHIES.

From the theatre of war there is no news whatever; both hostile armies still continue in presence, awaiting the opportunity of striking a blow with advantage.

From Copenhagen we learn that on the 7th inst. the King of Denmark contracted a morganatic marriage with Lola Rasmussen. The marriage was celebrated by the Bishop of Zealand. Mademoiselle Rasmussen was formerly a milliner, and was well known to the Copenhagen corps of officers. She then became acquainted with the King, and has now been raised to the rank of Baroness Danner. She has great influence over the King. Persons well-informed state that she exercises her influence in the revolutionary Danish sense, and was the person who induced the King to make such sudden concessions to the Casino Club in the Copenhagen revolution of 1848. This marriage is so far important, that it confirms the extinction of the Royal House of Denmark.

The *Hamburgh Nachrichter* says that in the last Cabinet Council the King expressed his determination that as soon as the succession to the throne should be fixed, which he hoped would be within a month, he would abdicate and resign the throne to his successor.

UNITED STATES.

The news this week from New York is to the 8th inst.

In the Senate, the Compromise Bill, which had occupied the attention of the House for so many months, was thrown out of the bill being carried by a majority of 14. Subsequently an independent bill for the admission of California was discussed

The disputed question of territory between Texas and New Mexico continued to create much anxiety. Information had been received at Washington that 1500 men had volunteered to march against New Mexico, but that the Governor awaited an answer from Washington, and the decision of the Texas Legislature. A President's message, declaring his intention to protect New Mexico against any invasion by Texas.

The Secretaryship of the Interior, declined by Mr. Grier, Lad been offered to Mr. J. F. Kennedy, with a choice of the War Department

A desperate affray had occurred at New York on the 5th inst., between the police and a mob composed of tailors, in which some lives were lost. The disturbance was caused by the employment in the house of a man who was said to be working at prices below those usually charged.

On the 1st a large force of labourers left New Orleans to prosecute the Panama Railway.

On the 29th July, the ship *Alice Bentley*, from Liverpool, was lost near St. John's; crew and passengers saved.

CALIFORNIA.

From California we have accounts to the 1st of July. The amount of gold dust on freights and in the hands of passengers, by this arrival from San Francisco, is understood to make the gross amount of nearly 3,000,000 dollars. All accounts represent that the production of gold will now immediately be greatly increased, the season for operations being just at hand, and prospects in general favourable.

WEST INDIES.

We have accounts this week by the Royal mail steamer *Medway*, which dilate on the recent disastrous hurricane which swept over several of the West India islands on the 11th and 12th of July, the fact of which was made known by our last notice of events. A vast deal of property was destroyed, and many ships with valuable cargoes totally lost. Off Dominica, the ship *Osbert*, with 600 or 700 hogsheads of sugar, was wrecked, and the crew with difficulty saved by the exertions of the people on shore. Several other vessels were lost, and the whole bay was strewn with portions of the wreck. From Guadaloupe we learn that a sloop, with the American Consul on board, bound for Martinique, had left the former place on the morning of hurricane, and had not since been heard of. In Antigua the cane crops suffered severely, many buildings having been uncovered and considerable damage done to the trash-houses and out-buildings. In Martinique serious injury had occurred to the shipping, and a Government steamer was despatched in quest of the missing vessels. The island of St. Vincent escaped the violation of the hurricane.

The reports of the growing crops from Barbadoes are very favourable. The next sugar crop is likely to be an abundant one

The Jamaica mail arrived at Southampton on the 23rd ult. They are unusually barren of interesting intelligence. The intelligence conveyed by the *Clyde* of the altered route of the Royal Mail Company's vessels was generally received with regret. The Spanish Main is furthermore to be closed against merchants engaged in trade with the Spanish Main. The weather in the seaport towns was particularly stormy. There were continuous sea-breezes and very frequent squalls of heavy rain, thunder, and lightning. The crops, however, had been, almost universally, heavy rains, but the effects of a previous drought had presented themselves. On some properties the fields had been entirely re-supplied with new canes at a very considerable expense. The British brig *Caroline*, Capt. Pratt, was totally wrecked on a place called Pedro Shoal. She left Kingston to Alligator Pound, early on the morning of the 15th ult. The captain and crew were saved; cargo lost The island remained healthy

From Havannah we learn that the American prisoners connected with the late expedition of adventurers who were taken at Conloy amounted only to fifty-two. After the judicial investigation, forty-one were pronounced innocent, because they went on board of the vessels on the supposition that they were bound for Chagres, and refused to take part in the expedition when its real object was made known to them; one, whose name was Moore, was pardoned on the ground of having given information; one committed suicide in prison with a knowledge of the objects of the enterprise. These forty-two men were handed over to an American vessel of war. Ten men remained, whose cases were still under investigation; three of the officers and crews of the two captured vessels, which had been declared confiscated.

INDIA

We have accounts this week in anticipation of the Overland Mail. Sir Charles Napier has resigned, and takes his final leave of India in October next. Nothing certain is known regarding his successor. The Punjab is quiet, and the country in a tranquil state enough. Another intestinal warfare had broken out in the Nizam's capital, between some Gosdens and 300 Rohillas on one side, and 4000 of the Nizam troops, with guns, on the other. The Rohillas occupied a fortified building with thick mud walls, and after having sustained without loss a cannonade for [illegible] hours, were [illegible] of their ammunition, when they [illegible] the [illegible] the amount of their just claims [illegible] exempted from all punishment on account of their wild way of obtaining justice. The Nizam's vassal, the Nawab of Elchpoor, has defeated the force which has kept land unjustly sent against him to dispossess him of his Jagheers

The subject of Indian railways now begins to occupy a considerable space in the Madras and Bengal Journals. In Bombay, all local interest in the Peninsular line has been extinguished by the result of the London meeting of the 20th of April

The Governor-General and Sir Charles Napier are at Simla; the Governor of Bombay and Sir W. Cotton at Poonah

Robert James Mackintosh, Esq., Lieutenant Governor of the island of St Christopher, is promoted to be Governor and Commander-in-Chief of the Leeward Islands, in the Room of Governor Higginson, appointed to the Mauritius.

INUNDATIONS IN BELGIUM.

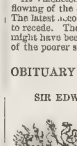
The excessive rains which fell in Belgium at the close of last week have so swollen the rivers, that they have, almost without exception, overflowed and flooded the low districts in every direction, destroying a vast quantity of property, and occasioning some loss of life.

At Brussels, on Sunday night, the inundation extended from the Faubourg d'Anderlecht to the Place St. Géry, and covered all the streets on both sides. The waters of the Senne extended from the Quai de la Fiancée to the Place de la Monnaie by the Rue Fossé-aux-Loups, and to the Place des Martyrs by the Rue Chant d'Oiseau, thereby intercepting all communication with the Northern Railway. All the cellars of the neighbouring houses were inundated. In the lower parts of the Théâtre de la Monnaie there were six feet of water, and some of the machinery was inundated. On the following day, in the Rue de la Fiancée, a vast quantity of objects were swept away by the violence of the waters, and several parties were drowned in different localities. Near the church of St. Josse-ten-Noode, and in some streets near the quarter of the Vieux Marché, the water was five feet deep. The Church des Riches Claires was surrounded on all parts. In the Faubourg de Flandre, however, and in the interior of the town, the water is notably diminished, and at eleven o'clock had fallen a foot and a half. Warehouses, containing oil, beer, spirits, and other descriptions of merchandise, were completely destroyed. A great number of cattle perished, and about fifty houses or buildings were so injured that they fell. All night the authorities were on foot, and active measures were taken in different parts to prevent the waters from extending. In the quarter Leopold the waters dug large ravines. At Etterbeek considerable damage was done. The town of Hal greatly suffered, and several persons were drowned. From observations taken at the Royal Observatory at Brussels, it appears that on the 15th and 16th the quantity of water which fell was 78 millimetres; with one exception, in 1839, it is the largest quantity since 1833. The Belgian papers are filled with accounts of inundations in different parts of the kingdom. Without going into details, it may be mentioned that incalculable damage appears to have been caused at Tournai (Audenarde, Syngham, Aspre, and Seche by the overflowing of the Escaut: at Ninive by the overflowing of the Dendre, at Marcq-les-Enghien, Lavaux Sainte Anne, &c., the destruction was chiefly of growing crops and agricultural produce. At several places farm-buildings were destroyed by lightning, and at Lavaux Sainte Anne a man was killed. The whole of Waterloo was inundated, and in some houses the water rose as high as the saloons. At Ghent the river overflowed, but it does not appear that much damage was caused. The lower parts of the city of Liege were inundated, and navigation on the river was interrupted. Near Charleroi all the fields were submerged, and the injury done to crops was immense. The lower part of the town was submerged to a depth of between two and three yards, and the Sambre rose with such rapidity that it was almost expected to cover the bridge. The church on the Place Verte was completely surrounded with water. The workmen of the railway station employed there, and during the night to keep on the water, but without effect. Boats were swamped on the Marchienne, and it was found that several persons had perished. In consequence of the inundation, the price of flour rose six francs the sack. The service on most of the railways was interrupted.

At Valenciennes there have been extensive inundations, caused by the overflowing of the Scheldt. The neighbouring country has also been under water. The latest accounts, which are dated Wednesday, state that the waters had begun to recede. The injury done is however very great, and fewer lives have been lost than might have been expected. Subscription lists have been opened for the benefit of the poorer sufferers.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

SIR EDWARD BOWYER SMITH, BART., OF HILL HALL, AND HORHAM, CO. ESSEX.



The death of this Baronet occurred on the 15th inst. He was the eldest inheritor of the title, having succeeded his brother, Sir John Smyth, the ninth Bart., in 1839; in the following year, as heir of his maternal ancestors, the Bowyers of Waghen and Camberwell, he assumed, by Royal license, the additional surname he bore.

The founder of Sir Edward's family is stated to have been Roger de Charneton, Knt., natural son of the Black Prince; but its greatness was achieved by Sir Thomas Smith, a very learned and eminent person, who filled the office of Secretary of State in the reigns of Edward VI. and Queen Elizabeth.

The Baronet whose decease we record was born 1st March, 1785, and married, 26th May, 1813, Letitia-Cicely, daughter of John Weyland, Esq., of Woodcaton, Co Oxford, and Woodrising Hall, Norfolk, by whom he had issue two sons, Sir William, the present Bart., who is married to Marianne-Frances, second daughter of Sir Henry Meux, Bart.; and Alfred-John-Edward, whose wife is the only daughter of Major-General Sir John Rolt, K.C.B. Sir Edward has also left four daughters; viz. Cicely-Abigail, married 18th August, 1840, to Henry Bullock, Esq., of Faulkbourne Hall, Essex; Jane-Elizabeth, married 30th August, 1839, to Gordon Willoughby Gyll, Esq., second surviving son of the late William Gyll, Esq., of Wyrardisbury House, Bucks; Adela-Monteen, married 4th July, 1844, to Edward Arthur Ashley, son of Sir Richard Paul Jodrell, Bart., and Marianne-Weyland, married 4th May, 1847, to Samuel Brise Ruggles-Brise, Esq., only son of John Ruggles-Brise, Esq., of Spains Hall, Essex.

THE RIGHT HON. CHARLES ARBUTHNOT.

The official service of Mr. Arbuthnot extended over a lengthened period: so far back as 1793 he was appointed Precis Writer in the Foreign Office; and became, subsequently, Chief Clerk of Affairs in Sweden, Consul-General at Lisbon, Envoy-Extraordinary and Minister Plenipotentiary in Sweden, Under-Secretary of State for Foreign Affairs, Ambassador to Turkey, First Commissioner of Woods and Forests, and finally, in 1828, Chancellor of the Duchy of Lancaster. He was sworn of the Privy Council in 1804.

The right hon. gentleman was born in 1767, the son of John Arbuthnot, Esq., by his wife, a daughter of J. Stone, Esq., of London, banker, and niece of Archbishop Stone, Primate of Ireland. His grandfather, George Arbuthnot, Esq., who held a commission in Queen Anne's Guards, derived descent from an ancient Scottish family.

Mr. Arbuthnot married, first, a daughter of William Clapcott Lisle, Esq.; and, second y, Harriet, daughter of the Hon. Henry Fane, which latter lady died in 1834. Mr. Arbuthnot's decease took place on the 18th inst., at Apsley House, Piccadilly.

THE DOWAGER LADY WENLOCK.

Maria Dowager Lady Wenlock was widow of Robert Lord Wenlock, and sister of the late opulent William Joseph Denison, Esq., of Denbies, M.P. for Surrey, who died not very long since, bequeathing his immense fortune to (the son of his late sister, the Marchioness Conyngham) his nephew Lord Albert Conyngham, now Lord Londesborough. Her Ladyship's marriage to the late Lord Wenlock, then Sir Robert Lawley, occurred about fifty-seven years ago, and produced no issue. Lady Wenlock became a widow in 1834, and survived until the 29th inst. The next brother of her deceased husband is the present Sir Francis Lawley, Bart.; and the youngest, Paul Beilby, now Baron Wenlock.

SIR MARTIN ARCHER SHEE,

President of the Royal Academy, died on the 19th inst., at Brighton, after a long and severe illness, in the 81st year of his age. We shall give a memoir of this distinguished painter in our next

NARROW ESCAPE FROM DROWNING OF MR. CHARLES BARRY BALDWIN, M.P.—This gentleman proceeded on Tuesday, by the *Gem* steamer, for the purpose of passing a few days with a friend at Purfleet, from which place a boat was hailed to take him off at the middle of the river, when, stepping into the boat, he lost his balance and fell backwards, and the tide being very strong, he was carried down a great distance, and was obliged to swim nearly half a mile before he could reach the boat, in which he was most incautiously taken and one of its oars to assist him, and thereby rendered himself incapable of directing the boat; but, fortunately, Mr. Barry Baldwin, being a good swimmer, by great good luck came up to the boat in a most exhausted state, and was providentially saved. He was taken to the boatmen's house, where he was provided with a change of clothes, and afterwards joined his friends. The means for his recovery were successfully used, and he has felt little or no ill effects from the unpleasant accident.

EASTERN COUNTIES RAILWAY.—22nd August: Half-yearly Meeting: E. L. Betts, Esq., in the chair. The report of this company was adopted, declaring a dividend at the rate of 1 per cent per annum—the shareholders being [illegible] part in the dispute which has arisen between [illegible] rivers of this company, which has resulted in their [illegible] the company's service.

CALIFORNIAN GOLD.—We have been favoured by Mr. Limbird, of 143 Strand, with the sight of the largest and finest specimen of gold yet brought to England from California; it weighs 144 pounds.

METEOROLOGICAL.—From a Correspondent, Tipperary.)—On the evening of saturday, the 10th inst., about ten o'clock, myself and two brothers were witnesses of a very large and remarkable meteor. It first appeared about 80° at ove the N.E. horizon, passed through the Galaxy; and, after proceeding some distance further in a south-easterly course, disappeared. In appearance magnitude it almost equalled the moon at its full. Its colour, when was first of a reddish hue, afterwards changed to a brilliant blue. The light from it was so great as to illumine us and cast strong shadows of every object around. Its train, which consisted of three long tails, remained waving backwards and forwards in the sky for at least 30 seconds subsequently to the disappearance of the fire-ball itself. The weather during the afternoon of the 10th was very gusty wind S.W. The next day we had strong gales and very heavy rain.

COUNTRY NEWS.

REPRESENTATION OF CAMBRIDGE.—MR. BUTT.—An influential party is forming in the University of Cambridge, to bring forward Mr. Butt to fill the vacancy caused by the death of the Recorder of London

GRANT OF CASTS FROM THE ANTIQUE TO THE SALFORD ROYAL BOROUGH MUSEUM.—At a special meeting of the Salford council, held on the 8th inst., a memorial to the Honourable the Commissioners of her Majesty's Board of Trade was unanimously agreed to, praying for a "grant to the Salford Royal Museum of such portion of casts from the antique, and modern statues, busts, or works of art, in the British Museum, as the board might think fit." The memorial was forwarded by the Mayor, on the following day, to Joseph Brotherton, M.P., and was by him presented to the commissioners, with what success will be seen by the following letter, received by the Mayor on Thursday:—

Office of Government Schools of Design, Somerset House.
August 14th, 1850

SIR,—I am directed by the Lords of the Committee of Privy Council for Trade to inform you, together with the aldermen and council of the borough of Salford, that my Lords have been pleased to comply with the request expressed in your memorial, addressed to the Board of Trade, that a collection of cast, specified in the list appended, be granted to the Salford Royal Museum, with a view to the elevation and improvement of the public taste. I have accordingly received their Lordships' instructions to move time be provided one half the time at which you.

I have the honour to be, sir, your obedient servant,
WALTER RUDING DEVEREUX, Secretary

Mr E. R. Langworthy Mayor of Salford.

"The list appended," we believe, contained among others the following:—Statues: Laocoön, Apollo Belvidere, Fighting Gladiator, Dying Gladiator, Venus de Medici, Venus de Milo, Discobolus, Diana Robing, Dancing Faun, Antinoüs, Listening Slave, Boy extracting thorn. Busts: Ajax, Apollo. Cupids, Laocoön Ten pieces of the five orders of architecture; six pieces of ornament. Bas-reliefs. Title as a very valuable addition to the museum, for which we believe the inhabitants of the borough are mainly indebted to the exertions of their indefatigable representative, Mr. Joseph Brotherton, and the Mayor, Mr. E. R. Langworthy. The mere money value of the casts enumerated is upwards of £120.

THE BRITISH ARCHÆOLOGICAL ASSOCIATION.—The seventh annual meeting of this British Archæological Association (appointed to be held in Manchester and Lancaster) commenced in Manchester on Monday morning last, under the presidency of James Heywood, Esq., M.P., F.R.S., F.S.A. The meeting was a large attendance of members. After visiting the cathedral, the general meeting was held on the morning of that day, and there was also an evening sitting. Tuesday was devoted to the hearing a series of communications for the purpose of inspecting the antiquities of the County Palatine of Lancaster, the members proceeding from Manchester to Whalley Abbey, in Ribblesdale, and thence to Ribchester, Preston, and Lancaster, where a meeting was held in the evening at the Music Hall. On Wednesday, the Association proceeded to view the remains of Piel Castle and Furness Abbey

THE BLIND PASTOR.—The inhabitants of the neighbourhood of Stowmarket, Suffolk, have, during the past few days, been favoured with a visit by the Rev. J. F. Gowering, A.M. incumbent of Clapham, Surrey. On Sunday week, the rev. gentleman (who is totally blind) preached two eloquent sermons to very crowded congregations in Great Finborough Church, kindly permitted by the Rev. J. F. Mulvany, the vicar; and on Friday evening last he addressed about 400 persons in a barn on the farm of Mr. Stearn, of Stowupland. Great anxiety was manifested by the inhabitants of Stowmarket and Great Finborough to hear their former able and respected but blind pastor

THE ROYAL BUCKS YEOMANRY CAVALRY.—The guns and carriages of this fine body of men, commanded by Colonel the Duke of Buckingham and Chandos, K.G., have been ordered by the Master-General of the Ordnance to be sent to the Royal Arsenal at Woolwich, the guns to be exchanged and the carriages to be repaired, that the corps may be placed in a state of efficiency in every respect.

THE UNIFORM HACKNEY-COACH SCHEME.—"The six weeks' trial accorded by the magistrates of Edinburgh to Councillor Wemyss's scheme of a uniform fare to all places within the parliamentary boundary expired on Thursday last; but, as the scheme has received anything but a fair trial from the hackney-coach proprietors, the magistrates have ordered it to be continued till the 31st current, when some definite resolution will be come to with regard to it.

SWIMMING THE QUEENSFERRY.—Great astonishment was excited at Queensferry, Edinburgh, on Thursday morning last when a person was swimming across the Firth of Forth. The unprecedented task was accomplished with great ease by means of Cox's patent swimming stockings—the swimmer leaving the North Ferry pier at twenty minutes past two o'clock and grounding the New Queensferry harbour at two minutes to three, thus being exactly fifty minutes on the passage. The distance traversed could not be much under two miles. Captain Roxburgh kindly added a boat to accompany the swimmer, and also ordered the ferry steamer to diverge from her usual course, so as not to interfere with the experiment

CHESTER CASTLE OR FIRE.—On Monday evening a fire broke out in the castle immediately over that portion occupied by the debtors. The fire was occasioned by the new steam apparatus igniting the rafters of the roof. By the timely assistance of a body of the soldiers in garrison it was soon extinguished without any further damage to the roof

ANOTHER FIRE IN LIVERPOOL.—Another and much more extensive fire broke out in Liverpool on Monday night, shortly before twelve o'clock, in the premises occupied by Messrs Tyrer and Co., as a cooperage, in Sea-street. The alarm of the fire was given by the engineer [illegible] and [illegible] the first [illegible] [illegible] all the adjoining premises, with [illegible] Cox to the cooperage was the adjoining house of Messrs. Thomas Eyre and Co., wholesale oil-merchants, and of Messrs. Cunliffe and Co., wine merchants, and the extensive warehouse of that establishment, partially filled with oils, drugs, and other combustible matter. The wood in the cooperage was soon consumed. The supply of water for a length of time deficient; the consequence was that on being the loss of the stock and building of Messrs. Tyrer's cooperage, the destruction of the office of Eyre and Co, and the demolition of a considerable portion of the two yards. The premises were insured.

CASUALTIES.—EIGHT PERSONS DROWNED.—On Sunday night, one of those fatal accidents which have recently been of too frequent occurrence in the neighbourhood of Liverpool, took place on the river there opposite to Eastham, by which seven fourteen persons, including two young women, one seventeen and the other twenty-one years of age (the latter of whom was only married the previous week), left their residences in Toxteth Park, and took possession of a pleasure boat, which at the time was at anchor off Toxteth Pier. Having cruised about the river during the whole of the afternoon, they arrived off Eastham about half-past seven in the evening; and as the night o'clock steamer was about leaving the pier she observed a boat about half-a-mile from the shore capsize, and in a few minutes afterwards they saw several parties scrambling in the water, endeavouring to gain the shore. The Eastham steamer made towards the boat, and succeeded in picking up three men and a boy; but it has since been ascertained that nine others in the boat have met with a watery grave. Several of the parties in the boat were said to be in a state of intoxication. On Tuesday morning the boat was run ashore, near Eastham, and there were found in it the bodies of Eliza Walker and the two children, James and William Spencer. Eliza Walker was in service, in the capacity of nurse, and the children found with her belonged to her mistress. The unfortunate girl came to Eastham without the consent of their parents. The names of the persons who are drowned are, William Blackie, James and William Spencer, John Youd, Bell-street; Eliza Walker and Nancy M'Fall, John Duncan, Jolly-street, and Thomas Gerrard, Soho-street.

STRANGE ACCIDENT TO A HORSE.—A horse belonging to Mr Samuel Taylor, butcher, of Ipswich, was sent out to grass in Mr. Somerset's park. On Sunday morning, a son of the owner went to see it, and to his surprise found the poor animal with its shoulder completely pierced through by a [illegible] bough of a tree. The assistance of Mr. Long, the veterinary surgeon, was sent for, but it was as much as two men could do to draw the stump out of the [illegible] body. The injuries proved to be so great that the animal was at once despatched. It is not known how this injury was occasioned, but it is supposed that the flies had annoyed the mare, which was a valuable and high-spirited creature, and that she had so violently plunged upon the point of the bough as to pierce it completely through her shoulder.

NEW METHOD OF GOLD REFINING.—The accounts from the United States contain a highly important discovery in gold refining made by Dr. S. D. Mc.ullch, Professor of Natural Philosophy in Princeton College, and late United States melter and refiner at the Philadelphia Mint. This gentleman professes to have discovered a new, quick, and economical method of refining argentiferous and other gold bullion, by which the work can be done in half the time at present required. It appears that the new method would save in labour and materials about one-half the cost required by the process now used in the mint of the United States, so that the charge to depositors would be less, which is now taxed according to law, at the actual cost, may be considerably reduced. The apparatus required is less costly and more compact than that used in either of the methods now employed. The advantages of the invention to the public are such that it is stated, probably five times as much work as at present may be done in the same building. Professor M'Culloh has taken out a patent for the discovery, but has offered to dispose of it to the United States Government on certain terms—an offer which it was thought probable that the Government would accept.

FRENCH FINE ARTS EXHIBITION.—The Minister of Public Works (France) has ordered M. Chabrol, an architect of the National Palais, to draw up plans for the construction of a temporary building in the large court of the Palace, for the annual exhibition of painting and sculpture, which is positively to commence on the 15th of December. The building is to be specially devoted to the reception of sculpture, the galleries of the Palace in which the paintings were to be placed not being strong enough to support the weight.

On Thursday week, the foundation-stone of a new church at Carlton-upon-Trent was laid by H. Vere, Esq. The requisite funds for the edifice have been raised by subscription, to which Mr. Vere and his family contributed £500. The style is to be the early English. The architect is Mr. G. Place, of Nottingham, and the builders are Messrs. Huddlestone and Tinker, of Lincoln.

It appears from a return to parliament (issued last week,) that in the year ending the 5th January, last, the duty was paid on 6,335,093 gallons of British spirits for consumption in Scotland. In the previous year the number was 6,548,190.

THE ART OF SUCCESSFUL EMIGRATION.

The *Daily News* is publishing a series of papers on this subject, which contain many useful hints and suggestions. In an article on "Who ought to emigrate," the writer very judiciously observes: By emigrant we do not mean a person who proposes to venture abroad in order to "push his fortune" and return a nabob, or something of the kind, to astonish his friends and render them envious. It is not without cause that we point to the distinction between men of this class and emigrants proper. Our colonies have, especially of late, been too much resorted to by a set of persons who regard them merely as places to earn money which they may spend at home. Thus, for example, no sooner was it known in this country that some large and rapidly acquired fortunes had been made in New South Wales, than the rush began to swarm with young adventurers, who flattered themselves that by roughing it for a few years there, they would be able to return "home" with "money in both pockets." Our tropical colonies and dependencies have always been haunted with swarms of these vidonaries in the disguise of buccaneers, sugar-planters, servants of the East India Company, &c.

Now be it known to all who are anxious to become very rich in a great hurry, that colonies, at least well-regulated ones, and such as honest men would like to live in, are no places for them. The advantage of colonies, of countries still in the progress of settlement, is, that with moderate prudence and industry a competence can always easily be obtained; that affluence is within the reach of any one who seriously tasks himself to attain it; and that destitution, in the appalling shape it assumes in the crowded hives of Europe, is unknown. But in colonies, as in all limited societies, large fortunes of rapid growth are the exception, not the rule. Colonies afford fit habitations for men of reasonable ambitions and moderate desires, who are contented to make them their homes.

The emigrant, therefore, who would escape the curse of disappointed hopes, must start for his new home with the irrevocable determination to make it permanently such. He must wind up all his old country accounts. He must make the effort to break up for ever the ties that bind him to the old country, by engaging it costs him what it may. He must enter his new country resolved to wed himself to it, "for better for worse, till death them do part." He must give his whole heart to the land, which will amply reward him for the sacrifice if he does, but not unless. * * * * * * *

Premising, therefore, that the first requisite in an emigrant is to have made up his mind to cling to the land of his adoption, we proceed to consider the qualities he ought to possess

The emigrant ought to be one in whom action preponderates over reflection, who is awake to the realities that surround him, and little given to be absorbed in reverie. We lay series of questions for the purpose of inspecting the antiquities of the County Palatine of Lancaster, the members proceeding from Manchester to Whalley Abbey, in Ribblesdale, and thence to Ribchester, Preston, and Lancaster, where a meeting was held in the evening at the Music Hall. On Wednesday, the Association proceeded to view the remains of Piel Castle and Furness Abbey

THE BLIND PASTOR.—The inhabitants of the neighbourhood of Stowmarket, Suffolk, have, during the past few days, been favoured with a visit by the Rev. J. F. Mulvany, incumbent of Clapham, Surrey. EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Lord-Lieutenant of Ireland has nominated the Hon. Gerald Ponsonby and Major Henry Ponsonby to fill jointly the office of private secretary to his Excellency, in the room of Mr. Corry Connellan, who has been appointed Inspector-General of Prisons, and has already entered on his new duties, and proceeded on a tour of inspection to the country

Hyacinth Darcy, Esq., of Clifden Castle, whose estates in the county of Galway have come under the operation of the Encumbered Estates Commissioners, has been appointed Inspector of Schools by the Church Missionary Society, at a salary of £100.

THE Government have advanced £100,000 for the immediate completion of the railroad to Waterford from Limerick.

Some experiments made on Saturday last, with a small screw steamer on the Grand Canal, near Dublin, proved highly satisfactory, and steamers of that kind are henceforth to be employed by the company

An accident of a painful and serious nature (says the *Devonport Telegraph*) occurred last week to Major Gully and his friend, Captain Mainwaring, who, having been fishing, were returning to Trevennen in a small four-wheeled carriage, when, owing to the breaking of some part of the harness, the horse started off at full speed. Captain Mainwaring unfortunately sprang out of the carriage, and, entangling his foot in the wheel, sustained a compound fracture of the leg. Major Gully, with great presence of mind, reined up the horse towards the hedge, thus stopping him in his wild career, on the summit of a steep hill, and saving himself and two lads, who were likewise in the carriage, from further danger. The captain is going on favourably

The last lift of the last tube of the Britannia Bridge was completed amid much acclamation on Friday week, and everything is understood to progress so satisfactorily as to lead to the conclusion that the entire structure will be opened a fortnight earlier than was expected.

Dr. Wiseman left town on Friday week, *en route* for Rome, to discharge the functions of the office of Cardinal, to which he has been recently created by the Marquis *Sebus*, of that town, in Funday Bay, on her voyage to St. John's. She struck suddenly on a rock, and went down in ninety fathoms of water. The crew were saved.

On Saturday afternoon, two sailors on board the *Juliet*, lying in the Commercial Docks (Thames), quarrelled, when one struck the other a violent blow, which knocked him overboard, and he was drowned. The body has since been recovered.

A singular discovery was made last week, by some excavators who were employed in forming a new sewer from Orchard-street and Strutton-ground, Westminster. They came across a cesspool which had been closed for many years, and there dug up a jar containing a considerable sum of money. A scramble took place, and it is, therefore, impossible to say what the amount was. It is remembered by some of the old inhabitants, that, between 40 and 50 years ago, a large sum was stolen from a public-house in Ann-street, near at hand; and as there was a hot pursuit, there is reason to believe that the plunder was secreted on the spot where the present discovery was made

A singular discovery was made last week, by some excavators who were employed in forming a new sewer from Orchard-street and Strutton-ground, Westminster. They came across a cesspool which had been closed for many years, and there dug up a jar containing a considerable sum of money. A scramble took place, and it is, therefore, impossible to say what the amount was. It is remembered by some of the old inhabitants, that, between 40 and 50 years ago, a large sum was stolen from a public-house in Ann-street, near at hand; and as there was a hot pursuit, there is reason to believe that the plunder was secreted on the spot where the present discovery was made

The Count de Streletzski arrived in Limerick last week, upon his benevolent mission for the relief of the Irish poor.

The excise duty on sugar, by the act 13 and 14 Vict., cap. 67, is now reduced to 11s. the cwt. and from the 5th July it will be further reduced to 10s. the cwt.

By an act of Parliament which was passed the last week of the session, a duty of 1s. 4d. per cwt. has been imposed on sugar used in the brewing of beer, to commence from the 5th of July next. From the 5th of October next brewers are not to sell at any other premises than their licensed brewing premises, or on premises licensed for the express purpose. Brewers may take out a license for the sale of beer at any other place as well as their brewing premises for the sale of beer is not to be deemed selling beer at any other than their licensed houses

An act to amend the law relating to customs has just come into force. All rules and regulations made by the commissioners of customs are declared valid. Superannuation allowances to officers of customs "shall be wholly void to all intents and purposes, and shall not be enforced in any court of law or equity." This act prohibits the importation into the United Kingdom of any extracts, essences, or other concentrations of coffee, chicory, tea, or tobacco, or any admixture of the same. Witnesses refusing to attend or to give evidence may be fined £50. The export duty of 2s. per cwt. on coals is now repealed. All manufactured goods are to be deemed to be the produce of the country of which they are the manufacture. No abatement of duties shall be made on account of any damage received by any corn, grain, or pulse imported into the United Kingdom

A Meltham man, who had never seen a railway, lately went to the Standege Tunnel, on the Huddersfield and Manchester Railway, and ascended an eminence, from which he witnessed a train at full speed. The following is a long black thing coming as sharp as learning, and puffing and rocking loik mad: un as soin as ever it saw me, it sets up a great scream, un run into a hole."

Messrs. Cliffe and Mackenzie, auctioneers of 64 Dean-street, Soho, well-known in Liverpool, has been appointed, through the influence of Lord Brougham, to the office of official assignee to the Court of Bankruptcy, Manchester.

The Chichester Theatre has been sold by auction for £350. It was built in 1796 by tontine, and formed, with Portsmouth, Southampton, and Winchester, what was called the southern circuit, which did a good business. Messrs. Collins and Hawtrey were the original lessees under the tontine; but it was here that Incledon made his first appearance on the boards, and received a summary dismissal for paying his suit to a daughter of one of the managers. For many years Chichester Theatre past a rent of £30; but of late years it has dwindled down to a very small sum, till it disappeared altogether. The theatre had scarcely been opened for the last six or eight years. The purchaser means to pull it down.

On Thursday week, about eleven o'clock in the forenoon, the tall chimney connected with the bleach-works of Mr. Ambrose Wilkinson, of Tottington, near Bury, fell with a tremendous crash, demolishing the building on which it stood, and destroying a great portion of the machinery. The amount of damage sustained was about £300. The chimney had been considered in an unsafe condition for some time. The accident was unattended with the loss of human life.

On Thursday week, the new organ, built by Bishop, for St. Margaret's Church, Lee, was opened by Dr. Wesley.

Letters from Malta, of the 13th inst., mention that the cholera is becoming daily more decrease. On the 11th the number of attacks were 69, and of deaths 66; on the 12th the attacks were 33, and the deaths 31. The total number of attacks among the population since the first appearance of the disease on the island was 2,000, and of deaths 1,000. The cholera has broken out at Alexandria, and has already made many victims.

The *Gazette* of Rome, of the 9th, contains the nomination of the Abbé Talbot, son of Lord Talbot of Malahide, and lately a priest of St. George's, Westminster-bridge-road, to the office of *cameriere segreto*.

All the galleries throughout the British Museum are now open, though in the new part the fittings have not yet been set up. Barely a wreck of the old entrance remains, and in a short time Montague-house will be swept away.

The Lochaber Highland Society's annual games, and competition for pipes, including, among other objects, suits of the Highland dress, will take place on Wednesday, the 28th inst.

The intelligence of the death of Perceval W. Banks will be heard by all who knew him with the deepest sorrow. The world at large, who admired the sportive fancy, classical eloquence, and kind yet fine criticism of the "Morgan Rattler," for many a year gone by, in *Fraser* and in the other monthlies, will regret the early decease of one so gifted

Mr. Charles Brackenridge, a gamekeeper to the Earl of Antrim, Ireland, lately captured a large eagle on Carey Mountains. It carried an iron trap, nine pounds in weight, about a mile.

On Monday, a mill boiler exploded at Oldham, by which the boiler-maker was killed and two or three of his men severely scalded. The mill had been stopped for repairs, and fortunately there was no one else on the premises.

The Head-Master of Winchester College has received her Majesty's most gracious commands that the present hondays of the boys should be extended for one week, on the occasion of the birth of his Royal Highness Prince Arthur.

The rebuilding of one of the corner towers on Tower-Green (City of London) is going on, and will much improve the appearance of the structure, as well as add to its military strength.

During a confirmation, by the Lord Bishop of Chester, at Bebington, last week, a venerable old man, 77 years of age, presented himself as a recipient of the "laying on of hands."

On Collier-row, Romford, a man named William Beard, aged 42, residing at Enfield Lock, who had for some time evinced symptons of insanity, trespassed upon the Eastern Counties Railway, near Enfield, and, lying down, with his head upon the rail, his skull was smashed to pieces by the eight A.M. express train

The Right Rev. Dr. Sharples, the Roman Catholic coadjutor Bishop of the Lancashire district, died on Sunday week, at Great Eccleston. His disease was a gradual wasting away. His Lordship was educated at Ushaw College, and was ordained at Rome, whither he proceeded to complete his theological studies, in company with Dr. Wiseman. He was consecrated August 15, 1843.

On Saturday afternoon, a waiter at Cremorne Gardens, named Nicholas Adams, while bathing with two of his fellow waiters, was seized with the cramp and drowned

ATTEMPT OF A BRAZILIAN SLAVER TO RUN DOWN H. M. S. V. PHŒNIX, ON THE COAST OF AFRICA.

We subjoin the following authenticated particulars of the above capture, and a Sketch taken on the spot, from a Correspondent :—

"On the morning of the 13th of April, whilst 'dodging' about on our cruising ground, the exciting cry of 'Sail, ch!' from the mast-head induced us to get up steam, and make all possible sail in chase. She was about fourteen miles off when first seen, and running towards us under all studding-sails, but no sooner did she perceive we were an English cruiser (and a steamer to boot), than she took in every studding-sail, and hauled dead on a wind, which soon convinced us what she was. We chased her from one o'clock until eight P.M., when, after dropping six or eight 68-pound shot 'uncomfortably' close to her, she hove to, and showed a light over the stern, it being very dark (in fact, the last two hours of the chase were so dark, we were afraid we should lose sight of her): however, we ranged up alongside of her to leeward, when the scoundrels, driven to desperation at their being captured, put her helm up, and filled, and ran right into us (no doubt, thinking we were a paddle wheel steamer, with the intent of damaging the wheels). However, our old craft (ugly as she is) bore the shock nobly: she struck us on the starboard bow, and only carried away a few of our shifting bulwarks and a little iron-work; her jib and flying jib-boom, with all the sails and gear attached, she made us a present of first, by breaking them short off, and leaving them on board of us: she then gradually dropped astern, close alongside of us (we had a great deal of way on us at the time, although the engines were stopped immediately), when the gear she was hanging by inboard of us dragged her foretop-gallant-mast, top-gallant-sail, and royal and maintop-mast, with all the gear and sails attached, over the side. She then dropped astern clear of the ship, a perfect wreck, her bowsprit completely unshipped, lying over her starboard bow; her masts gone by the board, lower masts unstepped, and her cutwater and bows completely knocked to pieces, and leaking like a sieve. We immediately sent a well-manned and armed boat, in charge of our first-lieutenant, to take possession of her, took her own crew out (who were landed next day), and, in consequence of the crippled and unseaworthy state she was in, held a survey on her next day, and burnt her. On first boarding her, we found a large poopoo tub, with a small spar placed in it, and a lantern, all ready to put overboard to deceive us, lashed to the top of the spar in the tub, imagining we should take it for the vessel and go after it; but, unfortunately for them, we had been too long in the 'Bights,' and were not to be duped so easily, although (as some of our brother cruisers know too well) they often do such things as their last hope. The *Phœnix*, up to June, had taken eight slavers, and was then on her way to the south coast, where we have no doubt she will give plenty more slavers the same opportunity as she did the *Dos Amigos*, of testing their solidity against 'English oak.' We heartily wish her success."

STATE SWORD FOR THE EMPEROR OF HAYTI.

STATE SWORD FOR THE EMPEROR OF HAYTI.

The illustrious Soulouque has already given abundant evidence of his fondness for the trappings of Royal state, and here is an additional instance.

This magnificent sword has been manufactured by Mr. Robert Mole, of Birmingham, for the Emperor, being intended as a Presentation Sword from the Grand Masonic Lodge of Hayti.

The blade, which is of the finest steel, is richly ornamented along its whole length with devices in blue and gold; bearing the inscription in French on one side—"To the illustrious F. Faustin Soulouque, Emperor of Hayti;" and on the other, "Homage of the Grand Order of Hayti." The hilt is of the most ornate and exquisite workmanship, and is surmounted by the Imperial crown, and adorned with various Masonic emblems. On the shield are richly chased the arms of Hayti, with the motto—"God, my country, and my sword. Liberty, Independence."

The scabbard is of the richest crimson velvet, elaborately embroidered in gold in open-work, and with various devices in excellent taste. The "lockets" are beautiful specimens of artistic skill, in design as well as in execution: altogether it is one of the most superb state swords ever manufactured in England.

HER MAJESTY'S VISIT TO BELGIUM.

On Wednesday, her Majesty and Prince Albert, with the Royal suite, left Osborne-house at 22 minutes past 5 P.M. and embarked from Osborne-pier on board the Royal yacht at 5 34 for Ostend.

The Royal squadron consists of the *Victoria and Albert* (with the Queen and Court on board), the *Black Eagle* steam-yacht, with the First Lord of the Admiralty on board; the *Fairy* Royal tender, and the *Vivid* steam-packet.

On passing through Spithead, the *Blenheim* screw guardship, 60 guns, and the exercise brigs *Nautilus* and *Rolla*, manned yards, the former fired a Royal salute.

OSTEND.

Throughout Tuesday, the good people of Ostend were looking out for the arrival of her Majesty. Towards evening, many began to doubt if the news was at all true, till the preparations to receive King Leopold convinced them there was some foundation for it; and even then the great flood which has deluged all the country about Charleroi, and has laid whole miles of corn-fields under water, more than divided their attention.

Ostend at the best is not remarkably lively; those tall massive houses with peaked gables, narrow windows diminishing in lugubrious perspective, for all their gaudy whitewash, through furlongs of rocky pavements, till they close up against some dingy chapel or storehouse, bounded on every side by sandy ramparts or dreary fosses, and an occasional glimpse of a muddy sea, like an illimitable Thames beyond, do not form a very enlivening scene.

It was generally stated that her Majesty would land and dine with King Leopold. The King's residence is a very plain, unpretending edifice, painted with yellow wash, in one of the principal streets, with nothing to distinguish it from the neighbouring mansions but two little sentry-boxes at each side of the doorway. Up to the departure of the packet, the King had not arrived; but several of his staff were in the town, and 10 or 12 carriages, with the Royal horses, had been forwarded from Brussels. The preparations (says the *Times* Correspondent) are rather meagre as yet. A small triumphal arch has been erected on the route from the terminus to the Royal residence, the consular flags are fluttering from all quarters, and there is no stinted display of the Belgian tricolor. There is a small force of military (of the 7th Regiment of the Line), in addition to the usual garrison, to furnish a guard of honour.

THE RIGHT REVEREND FRANCIS FULFORD, D.D.,
LORD BISHOP OF MONTREAL.

The Right Rev. Dr. Fulford, first Bishop of Montreal, in Canada, the second son of the late Colonel Fulford, of Great Fulford, near Exeter, Devon, was born in 1803, and educated at Tiverton Grammar-School, from which he entered Exeter College, Oxford, where he took his degree of B.A. at the Easter Term of 1824, and of which, in the following year, he was elected a Fellow.

In 1832, he was presented, by the Duke of Rutland, to the living of Trowbridge, in the diocese of Salisbury; in 1842, removed to Croydon, in Cambridgeshire; in 1845, was nominated by Earl Howe, minister of Curzon Chapel, Mayfair, where he continued until his recent appointment to the newly-created see of Montreal.

THE RIGHT REV. DR. FULFORD, LORD BISHOP OF MONTREAL.

Dr. Fulford is known, not only as an esteemed and laborious minister, but as an able writer. In 1838 he published a volume of plain sermons on the "Ministry, Doctrine, and Services of the Church;" in 1840, a second volume, under the same general title, on the "Church and her Gifts;" and in 1841, an essay on the "Progress of the Reformation in England," and a reprint of two sermons by Bishop Sanderson.

At the Privy Council held at Buckingham Palace on Thursday week, the Bishop was presented to her Majesty. His diocese extends over an area of 36,238 square miles, has a population of 1,7213, and but 44 clergymen.

Our portrait is from a photograph by Kilburn, and from which Mr. Skelton has in hand an engraving, to be published in December, the entire responsibility of which he has taken upon himself, and the whole profits of which are to be placed at the disposal of the Colonial Bishops' Fund, for the benefit of the churches in Montreal.

ADELAIDE, SOUTH AUSTRALIA—FROM HINDLEY-STREET.—(SEE NEXT PAGE.)

CURIOSITIES.

ANCIENT ALMS-DISH.

Among the communion plate of Bermondsey Church is an ancient Silver Salver, now used for the collection of alms. It is supposed to have belonged to the Abbey of Bermondsey. In the centre is an engraving of a knight in plate armour, kneeling before a female, who is about to place a helmet on his head at the gate of a castle or fortified tower. From the fashion of the armour and form

ANCIENT SILVER ALMS-DISH.

of the helmet, this curious specimen of art in the olden time has been assigned to the age of Edward the Second.

NOOKS AND CORNERS OF OLD ENGLAND.

SHARPHAM PARK, SOMERSET, THE BIRTHPLACE OF FIELDING, THE NOVELIST.

one of the wainscoted rooms of the gabled house shown in the Illustration, Henry Fielding, "the prose Homer of human nature," first saw the light, April 22, 1707. Fielding was of high birth: his father (a grandson of the Earl of Denbigh) was a general in the army, and his mother the daughter of a judge. The general had a large family, and was a bad economist, and Henry was early familiar with embarrassments. He was educated at Eton, and afterwards studied the law for two years at Leyden. In his twentieth year the home supplies failed, his studies were stopped, and the youth returned to England. His father promised him £200 per annum; but this, the son remarked, "any one might pay who would!" The same sum came to him in a few years by the death of his mother, from whom he inherited a small estate to that amount per annum. He also obtained £1000 by his marriage with Miss Cradock, a lady of great beauty and worth, who resided in Salisbury. Having previously subsisted by writing for the stage, in which he had little success, Fielding gladly retired with his wife to the country. Here, however, he lived extravagantly; kept a pack of hounds and a retinue of servants, and feasted all the squires in his neighbourhood. In three years he was again penniless. He then renewed his legal studies, and qualified himself for the bar. His practice, however, was insufficient for the support of his family, and he continued to write pieces for the stage and anti-Jacobite pamphlets. In 1742 appeared his novel of "Joseph Andrews," which at once stamped him as a master, uniting to genuine English humour the spirit of Cervantes and the mock-heroic of Scarron. There was a wicked wit in the choice of the subject, and its purpose—to ridicule Richardson's "Pamela." This was unjustifiable, and Richardson never forgave the desecration of his pet production; but, as Sir Walter Scott has remarked, "how can we wish that undone without which Parson Adams would not have existed." Still keener is the satire of Fielding's "History of Jonathan Wild;" but the hero and his companions are such callous rogues and unsentimental ruffians, that we cannot take pleasure in their dexterity and success

In 1[illegible], Fielding was appointed one of the acting magistrates for Westminster, for which he was indebted to the services of Lyttelton; though the appointment did not bring him in, "of the dirtiest money upon earth," £300 a year. He lived in a house on the site of the present Police-office, in Bow-street, Covent-garden. "It was Fielding, and his half-brother, Sir John Fielding, who made Bow-street Police-office and Bow-street officers famous in our annals."—(*Cunningham's "Handbook of London."*)

In the house in Bow-street Fielding wrote his "Tom Jones," which, the reader will recollect, abounds with pictures of English life in the eighteenth century in Somerset, the author's native county. He received £600 for the copyright; and such was its success, that Millar, the publisher (who lived at 141, Strand), presented £1000 more to the author. In 1751 appeared "Amelia," for which he received £1000. Johnson was a great admirer of this novel, and read it through without stopping. This was the last work of fiction that Fielding gave to the world.

Fielding's last public act was an undertaking to extirpate several gangs of thieves and highwaymen that then infested London, and in this he succeeded. Soon after this he was attacked by dropsy, jaundice, and asthma. As a last resource, he was advised to try the effect of a milder climate, and departed for Lisbon in the spring of 1754: he resided there but for two months; his health gradually declined, and he died on October 8, in the same year. The English factory at Lisbon erected a monument to his memory.

The only likeness extant of this prince of English novelists is that painted after death, from recollection, by Hogarth. It has various histories. According to Murphy, Fielding had made many promises to sit to Hogarth, for whose genius he had a high esteem, but died without fulfilling them: a lady accidentally cut a profile with her scissors, which recalled Fielding's face so completely to Hogarth's memory, that he took up the outline, corrected it and finished it, and made a capital likeness. The world is seldom satisfied with a common account of anything that interests it—more especially as a marvellous one is easily manufactured. The following, then, is the second history: Garrick, having dressed himself in a suit of Fielding's clothes, presented himself unexpectedly before the artist, mimicking the step, and assuming the look, of their deceased friend. Hogarth was much affected at first, but, on recovering, took his pencil and drew the portrait. For those who love a soberer history, a third edition is ready: Mrs. Hogarth, when questioned concerning it, said that she remembered the affair well; her husband began the picture, and finished it, one evening in his own house, and sitting by her side. (We quote the above from Allan Cunningham's "Lives of British Painters, &c.")

Opinions have been much divided as to the tendency of Fielding's works. Their extreme indelicacy, often unnecessarily introduced, has been palliated by the manners of the time admitting allusions and even expressions at which we should now feel the greatest disgust. The novels of our country at the present day are remarkably free from imputation of indelicacy; and more so than they were when the *furor* for "fashionable novels" was at its zenith

Within these twenty years three editions of Fielding's works, two of them illustrated by the pencils of artists who are very princes of humour, have failed to become popular; notwithstanding Fielding's truth and originality of delineation, skill in language, dramatic power and brilliancy of wit which has never been surpassed. It was in reviewing one of these reprints, that an acute critic exclaimed: "How refreshing it is to return to the vigorous, healthy air of his style, after being perfumed and pastilled to death by the tawdry trash of the day. There is more strength in half a page of Fielding or Smollett, than in a whole shipload of the diluted, mawkish, sickly sentimentality with which the socalled fashionable novelists, male, female, and epicene, drench their patient."

At Sharpham Park were, till lately, preserved a coat and leathers which Fielding once wore. The greater part of the house has been taken down: the remaining portion is tenanted as a farm dwelling. Sharpham has, however, been an important place: it was originally the country-house of the Abbot of Glastonbury, who came hither by water from his abbey. A well-timbered park surrounded the manor-house at Sharpham: of this little remains, the land being divided, and stocked with cattle, whose well-conditioned sides proclaim the fatness of the soil. So rich an appurtenance to the abbey was, of course, not overlooked by Henry VIII. at the Dissolution; but the last Abbot, Richard Whiting, refused to yield, but fled to Sharpham, whither he was pursued, and, being taken, was dragged upon a hurdle to the Tor Hill, Glastonbury, where, without regard to his age or character, the poor Abbot was executed; his severed head set upon the great portal of his own abbey, and the four quarters of his abused trunk sent to bleach in the blast at Wells, Bath, Ivelchester, and Bridgewater.

SHARPHAM PARK, SOMERSET, THE BIRTHPLACE OF FIELDING THE NOVELIST.

With its host of monastic associations, and its later celebrity as the birth-place of the father of the English novel, Sharpham is certainly not the least interesting "Nook and Corner" in our series.

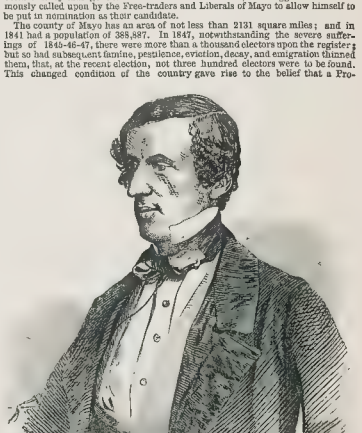
PARLIAMENTARY PORTRAITS.

GEORGE GORE OUSELEY HIGGINS, ESQ., M.P. FOR MAYO.

The recently elected member for Mayo, second son of Captain Fitzgerald Higgins, of Westport, by Mary, only child and heiress of W. Ouseley, Esq., of Rushbrook, a near relative of the late Right Hon. Sir Gore Ouseley, Bart., was born at Rushbrook, in the October of 1818; was educated at Brussels, under the Rev. Dr. Drury, formerly head-master of Harrow; in 1833, entered Trinity College, Dublin, as a fellow commoner; took his degree of A.B.; and, subsequently made an extended tour of Europe; passed some time in the East, visited the greater part of our West Indian and North American colonies, and the principal cities of the United States. On his return to Mayo, in 1839, he was appointed, under the Lord-Lieutenancy of the Marquis of Sligo, to the commission of the peace for the county

In 1846, on the resignation of Mr. Blain, a vacancy having occurred in the representation of his county, Mr. Higgins, popular from his urbanity, intelligence, and unswerving impartiality as a magistrate, as well as his known but always unassumingly enforced liberality of political opinions, was at once invited by a very influential body of electors to become a candidate, and so far accepted the invitation as to publish an address and commence his canvass; but, being unwilling to give a Protectionist candidate a chance of success from a division of the Liberal interest, he retired in favour of Mr. Macdonnell, of Doo Castle, who was returned with the late Robert Dillon Browne. On the recent vacancy occasioned by that gentleman's almost sudden death, Mr. Higgins was unanimously called upon by the Free-traders and Liberals of Mayo to allow himself to be put in nomination as their candidate.

The county of Mayo has an area of not less than 2131 square miles; and in 1841 had a population of 388,887. In 1847, notwithstanding the severe sufferings of 1845-46-47, there were more than a thousand electors upon the register; but so had subsequent famine, pestilence, eviction, decay, and emigration thinned them, that, at the recent election, not three hundred electors were to be found. This changed condition of the country gave rise to the belief that a Protectionist could be returned, and Mr. Jasae Butt, Q.C., was put forward in that interest. Since the memorable Clare election, there has been no more eager contest in Ireland. Mr. Butt, though in no way connected with the county, was on that side the best candidate to be found; a professor of political economy in Dublin University, a distinguished lawyer, an eloquent and able speaker, popular from his brilliant defence of Smith O'Brien and other leaders of the late Young Ireland party, well supplied with needful funds and landlord influence, he was a candidate of no mean pretensions. The question to be tried was, whether the remnant of the constituency of Mayo were changed by adversity, and would vote for the restoration of Protection as a safeguard against future suffering. If so, they could have no more able representative than Mr. Butt. Both parties used their utmost influence; not a voter was left unseen. Mr. Higgins's speech at the hustings made no pretence in point of length or oratory to that of his learned opponent. It was a clear straightforward statement of facts as to the condition of the people, and of his own independent political convictions, giving evidence of observation, tact, self-confi-



GEORGE GORE OUSLEY HIGGINS, ESQ., M.P. FOR MAYO.

dence, and such finesse as can always on needful and well-thought occasions gain audiences of the House

The numbers at the close of the poll were—Higgins, 141 ; Butt, 94.

The father of the honourable member is the representative of one of the oldest Catholic families of the West of Ireland. Through all the stormy period of the times immediately following the invasion, the Higgins's were renowned amongst the Connaught chieftains. Through all the wars of the Commonwealth they were devoted adherents of the King, and, on the defeat of the Royalists, the then representative of the house had his estates confiscated, and was driven for refuge to the Continent. Another member of the family, Colonel Hugo O'Higgins, held high rank in the army of James II., and was killed at the siege of Athlone, in 1690.

The hon. member is a Liberal and Free-trader, in favour of Reform, retrenchment, and an equitable measure for the protection of tenants, and the assurance to them of the fruits of their own improvements. The hon. member is unmarried.

Our Portrait is from a photograph by Beard.

ADELAIDE.

We have been favoured by a correspondent with the accompanying view of the capital of South Australia, sketched from the west end of Hindley-street, in November last. It is somewhat unfortunate that all the principal buildings of the city are in the background; but, altogether, this is the best point the Artist could select. The view has been lithographed and published in Adelaide.

The land originally surveyed for the intended city amounted to 1000 acres, of which 760 acres are on the south side of the river Torrens, and 300 acres on the north. The streets are laid out at right angles to each other, and, being from one to two chains in width, are broad enough for all purposes. In the town six public squares have been laid out, and twenty-five parallel streets—thus allowing plenty of room for increase at a future day, and making the present city healthy and pleasant

Wilkinson describes park lands in the environs, which have been reserved for the recreation of the inhabitants. This park land is a pleasant scene, and has much the appearance of the English parks, being adorned with large native trees in clumps, and having the river passing through them, and winding for some distance, with trees upon its banks. These trees are the favourite resort of numberless parrots, which keep up a constant chattering amongst the branches, their gay plumage sparkling in the sun. The banks of the river, only a few years since, were a favourite resort for emus, kangaroos, and other animals, before the white man scared them away; now they are not seen here, unless, perchance, at be some stray specimen, hunted by dogs, and past its wits, seeking shelter among the abodes of its destroyers.

The Government House, shown in the distance of the View, shows a high digni-fied-ness, on which the British flag floats proudly. This house was built by Col. Gawler. In front, and separated from its grounds by only a large sunken ditch, is a promenade, railed from the road, and a favourite resort of the townspeople after the heat of the day is over.

Another important point is North-terrace, which contains the Australian Company's offices, the Bank of South Australia, and further on, Trinity Church. On the same side as the Government House is the Legislative Council House, and other substantial edifices. King William-street has on one side comfortable houses, and on the other stock-yards, and other premises belonging to the Auction Mart, at the corner of King William and Hindley-streets, and which Mr Williamson considers to be a very fine building, fit to ornament any English town Further up King William-street are Younghusband's, Montefiore's, and Stock's stores; and in the distance the Government offices and Commissariat stores, many good private houses, and shops. The point of our view is thus described:—

"Hindley-street is the principal place of business, and here is to be observed all the bustle of a flourishing town, the way being filled with heavy drays loaded with produce, drawn by four, six, or eight bullocks, and accompanied by the drivers shouting and cracking their long whips, also with waggons and carts, drawn by strong English-looking horses, and mingled with gigs, carriages, and horsemen, all seemingly eager to transact business, and taking little notice of the half-naked black men, armed with spears and waddy, accompanied by their *lubras* (or women) and children, and followed by gaunt, lean kangaroo dogs. Hindley-street is lined on both sides with good shops, brick, or wooden houses, some few of which are of a superior build, and do credit to Australian street architecture. Many of the stores or merchants' warehouses are massive brick or stone buildings; and, altogether, the street has a much more imposing aspect than could be expected from the difficulties it has encountered and the short time it has been established. There are two churches, Trinity and St. John's, and two or three very commodious chapels belonging to different sects.

CALENDAR FOR THE WEEK.

SUNDAY, Aug 25 13th Sunday after Trinity.
MONDAY, 26 Prince Albert born, 1819.
TUESDAY, 27. Explosion of the *Crocket*, 1847.
WEDNESDAY, 28.—St. Augustine.
THURSDAY, 29. —St John beheaded.
FRIDAY, 30.—Sun rises 5h. 10m. ; sets 6h 41m.
SATURDAY, 31.—John Bunyan died, 1688.

TIMES OF HIGH WATER AT LONDON BRIDGE,

FALL OF THE BRICKLAYERS' ARMS RAILWAY STATION.—LOSS OF LIFE.

On Wednesday afternoon, an accident of an alarming and extraordinary character, by which one man lost his life and two or three others were more or less seriously injured, occurred at the Bricklayers' Arms terminus of the South-Eastern Railway, in the Old Kent-road. The porters, it would appear, were engaged moving a truck on one of the turn-tables under the large shed which covers the station, when a train which was being slowly shunted on an adjoining line of rails came unperceived upon them, and, running into the truck when in a transverse position, forced it against one of the pillars that support the roof, and the result was that the whole of the roofing, constructed of iron and extending over an immense area, fell en masse to the ground, burying beneath its ruins both men and carriages.

It providentially happened that there was no passenger-train in the station, and that at the time of the accident not more than half-a-dozen men were at work in the shed, all of whom, with one exception, were protected from instantaneous death by the carriages around them; one poor fellow, however, in attempting to find shelter under a gateway, was struck by a falling beam, and unfortunately lost his life.

Inspector Hanagan, of the M division, with a large body of the force under his command, was on shortly on the spot, and rendered effective assistance until the station was erected in 1844, on the site of one which had previously fallen, and where an accident of the same character occurred, also attended with loss of life. Up to a late hour in the evening the wives and friends of the various workmen engaged on the premises congregated around the spot making inquiries. It is extremely fortunate that this accident did not occur about a month since, as then no less than 150 men were employed at the same spot.

TRADES OF LONDON.—A public meeting of the trades of London was held on Tuesday evening, at the Mechanics' Institute, Southampton-buildings, Holborn, for the purpose of preventing, if possible, the lowering of wages in the tailoring business, by the introduction of French workmen into this, then of England. Mr. Luke James Hansard, who presided, explained that it was stated that men, to the number of 96, in the employ of Messrs. Caslon, Nagg, and Co., were compelled to leave their work, in order to prevent an alarming reduction of wages, which was entirely uncalled for, there being no competition for types in the market, save that which was produced by the few existing masters themselves. Their employers had used every unwarrantable stratagem to induce them to work for a low rate of wages, but all to no purpose; in consequence of which they had recourse to foreign workmen; and, through agents employed all over the Continent, they had succeeded in procuring eight French men and women, all of whom had been imported from the city of Paris. If this system were suffered to go on without notice being taken of it, their English labour market would be inundated with foreign workmen, and the whole body of English artizan classes must leave their native soil, or, worse than that, go and help to fill the various workhouses of England. The chairman also read a letter which he had received from Messrs. Caslon and Co., expressing that the statements made by the men were untrue, and that it was a most unreasonable strike on their part, and merely done with a view of obtaining an increase of wages. He stated that they had paid their men the wages stipulated in the arrangements entered into in the year 1841, and that they never even attempted to reduce them. It seemed that the main point of dispute arose from the price paid to the rubbers, the demand of the men being that all rubbers, of whatever age they might be, should be paid 2d. per 1000. The chairman concluded by reading several letters from respectable firms, setting forth the amounts paid by them, with a view of throwing some light upon the grounds of complaint which these men had against their masters. A long statement of the cause of the present strike was then read by Mr. Bouquet. It appeared that about four years ago the same thing had occurred. The affair was then settled by agreement in a fair and satisfactory manner, and the men had hoped that they should be allowed to settle down in quiet, and that their employers would not be disposed to depart from their agreement by pressing another reduction. Fourteen months since a Mr. Fagg entered their firm as partner; since which there had been a marked difference, several of their long-standing privileges having been taken off, and hints given that the time was not far distant before another reduction would be made. Six months since, on hearing that a small firm which had been started for many years in Northumberland-court intended to visit their foundry, and fearing that the country prices would be introduced, they appointed a deputation to see Mr. Fagg, and got for an answer that it would not interfere with them in any way. Finding that the visit of the strangers was only to buy the public meeting of the trade, and resolutions were adopted that might prevent the introduction of this firm by all possible means. Shortly afterwards, a person who had received 30s. a week was reduced to 28s., and other instances of injury occurred. They therefore declared their intention of not returning to work until the notices issued by their employers for the reduction of wages had been withdrawn. Assurances had been given that no reduction should be made. From circumstances, they had found it absolutely necessary to strike, but in their strike they had maintained merely a passive resistance. They never had expressed a wish to dictate, but, after carefully deliberating upon it, they felt themselves bound to act as they had done. After a long discussion, in which several speakers took a prominent part, resolutions to the following effect were unanimously agreed upon:

That this meeting is of opinion that the type-founders were justified in resisting the attempt to reduce their wages, and that they emphatically reprobate the introduction of foreign labour when Englishmen were contending for a just remuneration of their toil, and they condolence that the type-founders are now on strike were deserving of every assistance.

After a vote of thanks to the chairman, the meeting separated, having lasted more than four hours.

FUNERAL OF THE LATE RECORDER OF LONDON.—On Tuesday morning, at half-past eight o'clock, the remains of the Right Hon Charles Ewan Law, late Recorder of the city of London, were removed from his late residence, 72, Eaton-place, Eaton-square, Pimlico, to the church of St. John, Bethnal-green, where they were interred in a vault, which is under the altar, where one of his daughters lies interred. At the head of the vault was placed a wreath of white roses, in the centre of which was a black cross. On the coffin, which was covered with red cloth, was the inscription: The Right Hon. Charles Pepys Lushington Charles Ewan Law, M.P. for the University of Cambridge, Recorder of London, son of Lord Ellenborough. Born 14th June, 1793; married, 7th March, 1822, to Jane Emily, eldest daughter of Sir Thomas Plumer, Bart. Died 13th August, 1850, aged 58 years." The funeral was strictly private.

CREMORNE GARDENS.—The tenth annual exhibition of dahlias and other flowers of the choicest and most exquisite-tinted hues, attracted a large concourse of fashionable visitors to these Gardens on Tuesday and Wednesday last. The weather was propitious, and the entertainment not a little enlivened by the various pieces of music played by the juvenile performers of the Duke of York's school. The gallery, verbenas, bally'nocks, &c., were tastefully arranged under a large marquée, erected for the occasion, and presented a very brilliant and beautiful exhibition. A variety of prizes were distributed, under the direction of Mr. Glenny. There were also some handsome specimens of flowers in wax models exhibited. The members of the Royal Chelsea Horticultural Society dined together in the evening.

BIRTHS AND DEATHS.—Births registered in the week ending August 17:—Males, 699; females, 674: total, 1363. Deaths during the same period:—Males, 441; females, 433: total, 874. This return shows that the mortality is decreasing in London. The 874 deaths last week were less by 12% than the deaths in the previous week, and to nearly the same extent below the average of the ten corresponding weeks 1840–9, if we exclude the week of 1849, when 2230 deaths were registered. In the same season last year the danger of dying in London was twice as great as it is now; and the epidemics of cholera and its inseparable attendant diarrhœa, which destroyed 1230 and 188, were fatal last week only to 8 and to 139 lives. Six of those who died on cholera were aged and dirty labourers, of whom one was a lay in his bed about in stables; and one was a widow, of the age of 73, who refused to take nutritious diet. Of the 139 persons who died of diarrhœa, 118 were children under 15 years of age, 8 were adults, and 13 were aged persons. A fifth of the numbers, as the details of the cases of cholera returned, and at the advanced period of the year, so many weeks after the epidemic broke out, not only in 1849 and 1849, but in 1833, it must be admitted that the mortality of the present year is considerably diminished. The immunity from attack will no doubt accelerate the great works which are now in contemplation for the drainage and purification of London; for it cannot be forgotten that that unseen power of the air which slew so many thousands last year may return, and put the sanatory defences of the city to a second and severer proof, when the population is more scantily supplied with vegetables, fresh bread, meat, and the other means of living. The following are the particulars of the eight cholera cases:—On the 10th of August, at 3, Hunt-street, Lambeth, the daughter of a waterman, aged 4 months, "vomiting, hyperæsthesia, cholera." On the 13th, at the same place, stated that "the parents of the child occupied a small house, under which runs a most offensive drain; the former occupiers left in consequence of the stench arising therefrom." On the 6th of August, at 3, Dorset-street, Hatton-st., the son of a labourer, aged 7 months, "cholera (36 hours)." On the 10th of August, at 2, Swan-court, Glasshouse-street, Whitechapel, the son of a labourer, aged 8 months, "Asiatic cholera (24 hours)." On the 12th of August, at the workhouse, Kingsland-road, brought from a cellar in the Eagle Wharf-road, on the 10th, a labourer, aged 41 years, "English cholera (2 days)." Mr. N. Bowring, the registrar, states that "this man had not been in a bed for the last six months; he lay about in stables, but more commonly on the dust-heap in a yard, and when brought to the workhouse he was in a most filthy condition." On the 10th of Aug., at 12, Cork-court, St. James, Clerkenwell, the son of a compositor, aged 3 years, "gastro-enteritis (4 days), cholera (36 hours)." On the 11th of August, at 31, Marshall-street, Golden-square, the daughter of a clicker, aged 8 months, "cholera (24 hours)." On the 10th of August, at 30, Vauxhall Bridge-road, the daughter of a labourer, aged 1 year, "dentition, diarrhœa (2 days), cholera (15 hours)." On the 13th of August, at 3, Cross-street, Chelsea, the widow of a domestic servant, aged 73 years, "cholera (3 days), exhaustion from refusing sufficient nourishment (1 day)." Mr. W. Clifford Smith, the registrar, states that "this person was recovering from cholera, but remained low and weak, and, refusing to take nutritious diet, died from exhaustion." It is worthy of note that the decline in the general mortality has taken place on the north side of the river Thames, and that it is observed in both sexes, and in all ages under the age of 60

METEOROLOGICAL OBSERVATIONS.—The mean temperature of the air in the shade was 62 deg. 6 min.; the temperature of the Thames water was 65 deg. 2 min. in the day, 62 deg. 8 min. in the night. The temperature of the air was 1 deg. 3 min above the average of the corresponding week. Electricity was active, and nearly an inch of rain fell, chiefly on Monday. The wind passed over Greenwich at an average rate of less than 100 miles a day.

POSTSCRIPT.

THE QUEEN'S VISIT TO BELGIUM.

ARRIVAL OF HER MAJESTY.

About half-past eleven o'clock on Thursday, the Royal yacht, conveying Queen Victoria, Prince Albert, and the Royal children, dashed up the narrow entrance between the two piers which led to the harbour of Ostend, the Royal standard at the main, the Admiralty flag at the fore, and with the lead going from the chains. As she rounded the lighthouse, a spirt of flame flashed from out of the grass rampart, and the thunder of the first gun of a Royal salute echoed through every street in Ostend. The crowd on the piers took off their hats and waved handkerchiefs as the yacht passed. Her Majesty and Prince Albert, who had left the quarter-deck, and mounted up to the paddle-box platform with the Prince of Wales, his brother, the Princess Royal, and the Princess Alice, soon after the yacht entered the harbour, seemed in high spirits, and looked as if they enjoyed the scene amazingly. As the yacht hauled up alongside, at 12 o'clock, the Queen and suite descended to the quarter-deck, and the King of the Belgians stepped up the gang way and welcomed his Royal guest with great warmth. The interview was like that which takes place between old friends. The King took both the ladies' hands with most cordially. He took particular notice of the children, who looked in good but not in robust health, and the whole party were most engaged in animated and apparently in happy conversation. At one o'clock five of the Royal carriages drove into the square, in obedience to a message from the yacht; and soon afterwards King Leopold, with uncovered head, led her Majesty along the gangway from the deck, and handed her into the principal equipage. The crowd cheered vigorously as soon as they perceived the Queen; every hat was off: and as Prince Albert followed with the Royal children, the cheering was renewed, the troops closing up the demonstration with three military cheers. The Royal party having got into the other carriages, after an interval, followed her Majesty, who, preceded by outriders, had slowly driven to the Royal residence.

A déjeûner à la fourchette was prepared for the Royal party, after partaking of which, the Queen, King Leopold, Prince Albert, and the Royal children took a drive to the West Sands, where they got out and walked for a little, returning to town in about half an hour

Her Majesty dined with the King, at his house, in the evening, and Sir F. T. Baring and Lord A. Fitzclarence had the honour of receiving invitations to join the Royal party. The Belgian Moniteur, Commander Crispin (*Victoria and Albert*), Master Commander Walsh, Master Commander Cooke, Master Commander Smithett, and Sir J. Hamilton (who was on board the *Vivid*), &c., were invited to dine at his Majesty's command, at the Royal mansion also.

Her Majesty and the Royal family left Ostend yesterday at one o'clock on their return to Osborne, The weather was delightful.

ECCLESIASTICAL COMMISSION.—It is understood that the three commissioners under the New Ecclesiastical Commission Bill have been nominated. The Queen's names are Baring and Lushington, and it is said that the Archbishop of Canterbury nominates the Right Hon. Henry Goulburn, M.P., as the third commissioner is Mr. John Shaw Lefevre.

DEATH OF THE SENIOR FELLOW OF TRINITY COLLEGE, CAMBRIDGE. The Rev. John Brown, M.A., the Senior Fellow of Trinity College, expired at Swaie, near Coventry, on the 19th inst. He was about 75 years of age, and, at the time of his death, was the oldest resident member of the foundation of Trinity, of which he has been tutor.

There having been rumours that Lord-Advocate Rutherford is to be elevated to the Bench, the electors of Leith have resolved, in case of a vacancy, to invite Admiral Sir Charles Napier to become a candidate.

DISCOVERY OF HUMAN BONES NEAR NEWGATE.—During Thursday, numbers of persons were collected at the top of the Old Bailey, it having been currently rumoured that a quantity of human bones had been dug up at that spot, and a leg-bone with a felon's leg-iron attached. Upon inquiry, it appeared, that, when the men employed in laying down the pipes for the new City of London Gas Consumers' Company and dug down about six feet, opposite St. Sepulchre's Church, one of them turned up a number of human bones, chiefly rib-bones, and one leg with the iron which was formerly placed on felons' legs, but which had long since been disused except in extraordinary cases. In the course of the afternoon another quantity was found near the same spot, together with another shackle. This place is the junction of the four roads, the Old Bailey, Snow-hill, Newgate-street, and Giltspur-street, and it is surmised that many years ago persons who committed *felo de se* were buried here under the old barbarous custom, when stakes were driven through their bodies, and that the irons probably had been buried in this way on the body of some felon who had committed that crime in Newgate; but, on inquiry of the officers of that prison, they could not recollect any such circumstance, and if it ever occurred there, it must have been many years ago. It is expected that many more of these remains will be found about this part as the pipes are laid down. As yet no skull has been discovered, nor any of the arm bones. Those found are not in a very decomposed state.

LATEST FOREIGN NEWS.

FRANCE

According to our accounts of yesterday (Friday) from Paris, the rumours circulated in Paris that the President of the Republic had been fired at at Colmar; that the Socialists at Besançon, Colmar, and Mulhouse had manifested great hostility upon his arrival; and that some of the more violent had been placed in custody, have only been partially confirmed. The latest telegraphic despatch received by the Commissaire-Général of Police on the Prince President's journey is down to five o'clock on Wednesday evening, which announces his arrival at Strasburg in the afternoon of that day; and adds, that from the moment he quitted Besançon on the Right, on his way to Belfort, Mulhouse, Colmar, and Strasburg, he had been every where received with the greatest enthusiasm. This despatch makes no mention whatever of the least circumstance which could have warranted the story of the shots fired at him; and it is inferred that if not without foundation they have at least been considerably exaggerated. Some of the government journals affirm that there was a plot concerted by 5000 Swiss operatives at Besançon, the object of which was to seize the President, and hold him in safe custody, even if an attempt should not be made to take away his life, during which period a strong demonstration was to be made in favour of Socialism. Louis Napoleon, we are further told, was apprised of the scheme, and at first heeded it not, but he soon discovered by the compact pressure of the crowd about his person, the cries of "Vive la République Rouge!" and by some individuals wearing the red cravat, that the plot was about to be put into execution; which induced him to make his speedy exit, under the protection of General de Castellane. Nine of the conspirators were arrested by the gendarmes. These details, whether true or false, are given with much minuteness in the *Moniteur du Soir* and in the *Patrie*, but they are not generally believed by the Parisian press, at least to the extent described.

General Jung Bahadoor Koonrur Ranajee, chief minister of Nepaul, and Ambassador to the Court of England, arrived in Paris on Wednesday with his suite, and put up at the Hotel Sinet.

Serious damage was occasioned at Valenciennes on the 20th inst. by the overflowing of the rivers. Some persons lost their lives, and a vast quantity of cattle suffered the same fate.

CHURCH, UNIVERSITIES, &c.

THE CHURCH UNION.

The Committee charged with carrying out the resolutions of the general meeting of clergy and laity, held on the 23d of July, have made the following statement of their proceedings

The "Address of the Archbishops and Bishops of the provinces of Canterbury and York," adopted at the general meeting of clergy and laity at St. Martin's Hall, on the 23d of July, was presented to his Grace the Archbishop of Canterbury, at Lambeth Palace, on the 25th of July. The deputation was received by his Grace with his accustomed courtesy, and the address having been read by the chairman, his Grace, after expressing his satisfaction at having so early an opportunity of seeing the deputation, observed:

"I have seen many meetings assembled to address which admitted of much difference of opinion, and that it was probably known to the deputation that he had the misfortune of disagreeing with some of the sentiments which it embodied. He might have wished, perhaps, that the language of the address had been less positive, and more as to an avowal of such differences of opinion, but that an address signed by so many members of our Church was entitled to respectful consideration, and he felt sure that it would receive all due attention, both from himself and from his right reverend brethren for whom it was intended.

To his Grace the Archbishop of York, and the bishops who had left town, copies of the address were forwarded by the chairman; and to the Bishop of London, being still at Fulham, received the copy of the address from a deputation, and acknowledged it in the following letter to a member of the deputation:—

Fulham, July 31, 1850.

My dear Mr Hope, I have read with deep interest the address which you placed in my hands.

It was upon the Archbishops and Bishops of the provinces of Canterbury and York to express to the Crown their humble desire that freedom may be granted to the Convocations of the Church of England, assembled, to judge matters of doctrine and discipline; or, if [illegible] ordained, so to declare canonical truth and discipline as to secure the [illegible] address, for the present, against the utter death of sacramental grace which they plainly see to be involved by the late decision of the Judicial Committee of the Privy Council.

With respect to the first of these points, I beg to assure you that I entertain a strong opinion that the Church's right to a well-regulated freedom of synodical deliberation and I earnestly hope some method may be found of combining such freedom with a due security for the [illegible] and [illegible] of the Church.

With regard to the second point, I apprehend that each bishop, in his own diocese, will adopt such measures as may appear to him best calculated to guard against the danger which the address describes.

One mode of warding off that danger all may have recourse to, both clergy and laity—that of earnest persevering prayer to the great Head of the Church, that it may please Him to drive away from it all erroneous and strange doctrine, and to preserve his Ecclesand in the true faith, in unity of spirit, and in the bond of p[illegible]

deliver me, my dear Mr. Hope, yours most truly,

(Signed) C. J. [illegible]

The address to the "Bishops of the Church in Scotland" (subscribed with 3000 names) has been transmitted to the Venerable Primus, the Right Rev. the Bishop of Aberdeen, with a request that he would be pleased to lay it before his right reverend brethren on their next assembling in synod.

Letters have also been despatched to all the colonial bishops, enclosing copies of the address which refers to them as bishops of the province of Canterbury, and inviting their attention, and that of churchmen within their several dioceses, to the appeal with which the resolutions of the 23rd July appropriately closed.

The protest and petition to the Queen have been committed to the chairman for safe custody—the petition until, at a convenient opportunity, and through proper hands, it can be presented to her Majesty—the protest, until the occasion which made it the record of a great public vindication of the faith of Churchmen shall cease to exist, when it may find a fitting place among the archives of Lambeth Palace. Meanwhile, names can be affixed to both or either of the documents, under a written authority sent to the secretary of any Church Union.

PREFERMENTS AND APPOINTMENTS.—The Rev. E. Foley to be archdeacon of Ossulsta. *Rectories:* Rev. John Thomas Layard to Swaffield, Norfolk. Rev. W. Reade to Chedburgh, Suffolk. Rev. Elias Tardy to Augnamullen, in the county of Monaghan. *Vicarages:* Rev. G. A. Cockburn to Ifield, Sussex. Rev. Robert Fynes Clinton to Keddington, Lincolnshire. Rev. H. Harvey to Olveston, Gloucestershire. Rev. George Henry Turner to Deopham, Norfolk.

TESTIMONIALS.—The following clergymen have recently received testimonials of esteem and affection:—The Rev. H. B. Bowlby, on his leaving the curacy, from the inhabitants of Whitstable and Seasalter. Rev. John Rotherford Farrow, Curate of Chivelstone, Devon, from the parishioners. Rev. A. John G. Ryde, late assistant-Master of St. Mary, Glasgow, from the congregation. Rev. Robert Williams, late Incumbent of Gwernaiell, from the congregation. Rev. A. Costes, Incumbent of Pemberton Church, near Wigan, from two esteemed and benevolent ladies, members of the congregation. Rev. Frederick Haggit, late Curate of Welwyn, Herts, from the inhabitants. Rev. E. T. Evans, Curate of Ysceifiog, Flintshire, from the inhabitants.

VACANCIES.—Chaplaincy of Cleobury-Mortimer Union Workhouse, Salop, diocese of Hereford; Rev. J. Hayton resigned. Devonport Mocoe-Town St. James's P.C., Devon and Exeter; value, £130; patrons, Trustees; Rev. W. B Kilpack deceased.

The Dean and Chapter of Canterbury have presented the Rev. T. W. Goldsmith, M.A., curate of St. Marylebone Church, London, to the vicarage of Sheldwick, Kent, rendered vacant by the cession of the Rev. S. J. Lyon.

NAVAL AND MILITARY INTELLIGENCE.

THE COMMAND IN THE PACIFIC.—Rear-Admiral of the Blue, Fairfax Moresby, C.B., is appointed to the command of her Majesty's vessels in the Pacific, in the room of Rear-Admiral Thomas Edward Lawrence Bettesworth Bladen Thomas Hyde Parker, C.B., whose three years of the command of that station are now completed, having been appointed on the 25th of August, 1847.

PROMOTIONS IN THE DOCKYARDS.—The following Admiralty circular has been received at the respective dockyards:

Admiralty, Aug. 8th.

My Lords advert to the regulations of February 27, 1847, and more especially to that part which relates to the selection of the inferior officers in the dockyards for promotion. It was the object of the board, in framing these regulations, to award promotion to merit on public grounds alone, and in the course to which their Lordships have since adhered, their Lordships have not, in forming a decision upon the relative merits of candidates, great care must be taken in applying worthy judgment and fairness the amount of encouragement to which different kinds of merit are entitled, and though the board appreciate, and will always encourage as it deserves, all possible zeal and activity in the public service which does the lead of the examinations, they are of opinion that good and faithful services are by no means to be lost sight of, and that practical knowledge is of the greatest importance to conducting the business of the yards. These principles, therefore, do not lead to the bestowment the names of all candidates should be forwarded to them in the order in which they stand in the examinations, and that, together with the original documents, a full report should be transmitted, not only of the length of service of the candidates, but of their character and practical knowledge, and the board will then make their selection, not altogether, or in all cases, with sole reference to proficiency in science, but with such regard to other points of merit as may appear just and expedient. Their Lordships, in conclusion, wish it to be distinctly understood, that in making their selection they will proceed on public grounds alone, and they desire you will caution all parties concerned, that all applications out of the authorised course, whether direct or indirect, will be discountenanced. (Signed) J. PARKER

MILITARY PRISONS.—"Horse Guards, August, 1850.—It being desirable that the routine of discipline established for garrison and barrack cells should be conducted more uniformly in the different districts and places, and more in accordance with the system pursued in the military prisons, the attention of commanding officers is directed to the circular of the 21st of December, 1846, relative to the distribution of the time of the prisoners. It is to be understood that the punishment of shot exercise and drill are to be enforced, in all cases, to the extent and with the exceptions only therein specified, in whatever manner the prisoners may be employed during the other portion of the day; and all prisoners, whether in confinement under sentence of court-martial, or by award of the commanding officer, are to be dealt with alike, and subject to the same discipline during their imprisonments in cells; due care being always taken not to put a prisoner to shot exercise or other hard labour that may be prejudicial to his health. Commanding officers are recommended to avail themselves of every opportunity to obtain advice and instruction on the subject of prison discipline from Lieutenant-Colonel Jebb, the Inspector General of Military Prisons, when that officer, in the course of his periodical tours of inspection, happens to visit their quarter.—By command (signed) G. BROWN, Adjutant-General."

JENNY LIND'S DEPARTURE FOR AMERICA.

(From our own Correspondent.)

LIVERPOOL, Wednesday Night.

JENNY LIND is gone! gone amidst a scene of triumph which was not more a tribute to her own surpassing worth and talent, than to the art which it is her honour to profess, and to which she does so much honour. Ere these few hasty lines are before the reader, this incomparable songstress will have performed nearly one-fourth of her voyage to the United States, where we are assured, a reception awaits her which will cast in the shade even the splendid ovation which has just attended her departure from among her European admirers.

Fresh and glowing from the magnificent display of public feeling and sympathy, I can scarcely enter into details. With ears still deadened with the booming of cannon and the shouts of the thousands who were assembled on either side of the Mersey, and eyes dazzled by the gay effect of innumerable flags waving over by the sunlight as they ran to and fro on the river, or followed in the wake of the *Atlantic*, I can scarcely give you a sober description of this extraordinary scene.

The authorities foresaw that there would be a great demonstration, and took their precautions accordingly. Fancy what must be the interest excited by Jenny Lind, when the police thought it necessary to notify to Mr. Barnum's agent, that if the lady took her departure from the quay at the hour generally expected, they could not ensure the safety of life and limb! We doubt much whether any sovereign was compelled to change the programme of his movements for such a reason. Let us it was; and much hurrying to and fro was there in consequence. Instead of leaving at nine or ten o'clock, as had been arranged, Jenny Lind was obliged to slip out privately at a quarter to eight, and go down to the river, where a steamer was ready to take her on board unseen. In this she was successful; and while the intending sight-seers were disposing of their muffins and coffee, the little woman whom they were all going out to see had quietly gone on board the *Atlantic*, and was in her steamer; but not until after she had been annoyed (during a few minutes stay on the pier) by a crowd of idlers who pressed around her in the most rude manner, and could scarcely be kept off by the police. When will this nuisance be abated? When will the British public treat great or distinguished persons as such, and not as marvels are treated in the Zoological Gardens?

When at last the 150 passengers who had engaged all the berths were received on board, with all their luggage, and had taken leave of all their friends; and when the sound of a gun booming across the water from the bows of the steamer announced that all was ready for departure, what was certainly a "great scene" commenced. The immense floating mass began to move, and, as it did so, all the craft that had been playing about on the surface of the river, formed into lines, and made a sort of procession. As the *Atlantic* steamed up the river, accompanied, past the Albert Docks, she turned her head in a direction, the direction of the town, and slowly passed in front of the magnificent line of quays, amidst the enthusiastic shouts of the thousands of human beings who lined the shore, not merely on the Liverpool side, but also all along the Cheshire coast, from Birkenhead downwards to the mouth of this great arm of the sea. Guns were fired from the shore, and they were returned from the *Atlantic*; and the whole scene, such an army of craft of all sorts and kinds floating, with pennants flying—such a deafening—such a roaring of cannon—such a bright sunlight (which broke out suddenly, as if to afford presage of fair weather), was really one of the most extraordinary sights we ever witnessed. Every eye was strained to get a sight of Jenny Lind. There she little woman stood, on the Paddle-box, with her arm in that of Captain West, and waving her handkerchief, enthusiastically, in return for the greeting of the crowds who had assembled to witness her departure.

After such a scene, any account of the concerts will seem an anti-climax

The miscellaneous concert on Friday does not call for special remark, as it was little more—but a rehearsal—such a rehearsal as would make a London audience mad. All the interest centered in Lind. Such a reception! The audience rose at her. These cold people of Liverpool one would scarcely have supposed to have so much blood and heart in them. Verily, if they could have eaten her, they would. Her first song was that "Ah non paventar," from the "Magic Flute." After that an interest came the cavatina of *Agatha*, from "Der Freyschutz," which was given as I never heard it given before in any country. She wound up with the bravura rondeau, which she sang with a delicious comedy that sent the audience off in convulsions of laughter

Her singing in the "Messiah," in the Monday's concert, proved a great treat to music-lovers, who were on the qui vive to hear how she would deal with Handel's music. Genius knows no trammel a of style, it goes straight at once to the core of things, and is as familiar with the massively sung strains of Handel, as with the magnificently spiritual melodies of Mendelssohn. Lind's own religious feeling goes with this music of Handel, and therefore there was no reason to doubt her giving it the full force of devotional expression This a not the place for criticism; enough to record, that not only in an artistic point of view was her singing a perfect triumph, but that on her retirement (after having repeated "I know that my Redeemer liveth") she was, to use the expression of an eye-witness, literally "buried" with bouquets. She could scarcely make her way o it of the orchestra, there was such a heap of flowers in all possible shapes. One couplet rested on her shoulders, and remained there an

DEPARTURE OF MDLLE. JENNY LIND FROM LIVERPOOL FOR AMERICA.

she bowed repeatedly her acknowledgments. It was taken off at last by a gentleman standing by, and the happy captor preserves it with pride.

Of course there has been no thought of anything or anybody but Jenny Lind and her doings. These have been few. She has remained in her rooms, in the Adelphi Hotel, except when going to church or the Southern Hospital, whither she went yesterday, and was presented with a silver teakettle and two candlesticks (in return for her having sung them a wing to the building), or to and from the Philharmonic Hall, to rehearsals or the concerts. Into private amusements we have no right to penetrate. She has, of course, had innumerable presents, among them a very handsome piece of floral architecture, hung with the most magnificent bunches of grapes we ever remember to have seen. Her chosen friends were allowed to pick these grapes as they hung so temptingly. She has also had an address presented to her by the Philharmonic Society.

The story about her brother is a pure fabrication—the silly and wicked invention of some scribbler for local journals.

RAILWAY VIADUCT OVER THE TWEED, AT BERWICK.

This stupendous Viaduct, connecting the York, Newcastle, and Berwick Railway with the North British Line, will be formally opened next week by her Majesty, *en route* to Edinburgh. The foundation-stone of this structure, which we believe to be the largest work of the kind in Britain, was laid without public ceremony on the 15th of May, 1847, by the wife of the resident engineer, the same lady who had the satisfaction of keying the last arch on the 26th of March, 1850.

The Viaduct consists of twenty-eight semicircular arches, 61 feet 6 inches span each, springing from lofty piers 8 feet 6 inches broad at the narrowest point. The abutment at the north end of the Viaduct is built on the steep bank, on the top of which the old Castle of Berwick once stood: the south abutment is joined by the railway embankment, forty feet high. Besides these main abutments, the bridge is divided into two series of arches by a minor abutment, standing near the edge of the river; this enabled the company to finish all the land arches and get the traffic over them without waiting for the completion of the more difficult and uncertain river operations.

The total length of the Viaduct is 2170 feet; and the greatest height from the bed of the river, 125 feet. The whole bridge is built of stone, with the exception of the inner part of the arches, which is built with bricks laid in cement.

There is in this structure upwards of one million cubic feet of masonry; and nearly two millions and a half of bricks have been placed in the arches.

One hundred thousand cubic feet of timber was used in the foundations, which were of a very expensive and difficult character. In the execution of these foundations two of Nasmyth's patent steam piling engines were brought into requisition for the purpose of putting in the coffer-dams and the piles on which the bridge is built, the natural foundation being merely loose sand and gravel. An engine of fifty horse power was used for pumping the water out of the coffer-dams.

The contractor at one time employed as many as 2000 men in the various departments embraced within his contract

In addition to this large stone Viaduct, there is also a very extensive temporary timber bridge, along which the trains have been carried since October 1848. Her Majesty passed along it in a train in September, 1849.

The total quantity of timber used in the construction of the stone and timber bridges has not been less than 240,000 cubic feet.

The total length of the temporary bridge is 1166 feet, its height being the same as that of the permanent structure.

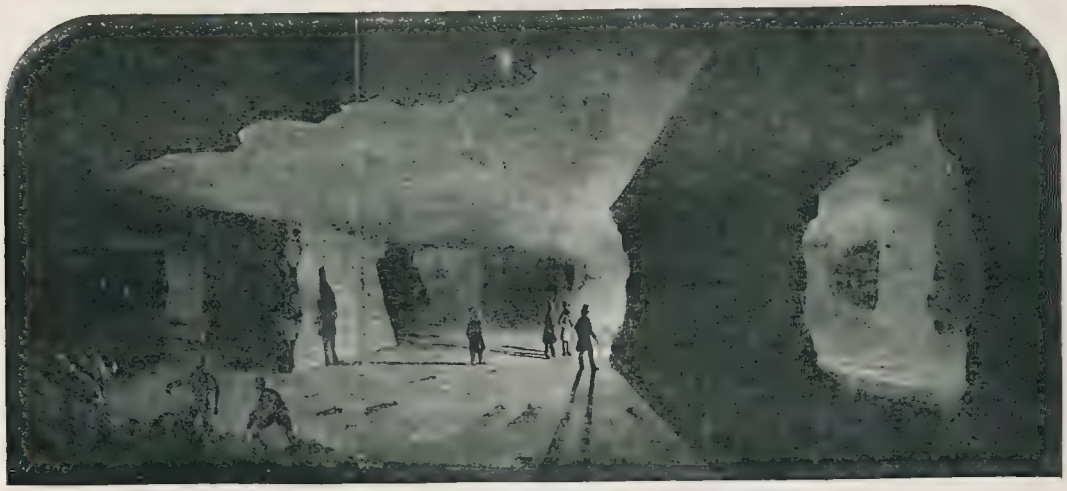
The cost of the stone and timber bridges together has been somewhat under £130,000.

The bridge is joined at the south end by an embankment five-eighths of a mile in length, and in some parts upwards of 60 feet high, containing between seven and eight hundred thousand cubic yards of earth.

The engineers-in-chief of this magnificent work are Mr. Robert Stephenson M.P., and Mr. T. E. Harrison; resident engineer, Mr. J. B. Bruce; contractors Messrs. M'Kay and Blackstock.

RAILWAY VIADUCT OVER THE TWEED, AT BERWICK.

A VISIT TO THE SALT-MINES OF CHESHIRE.



THE MARSTON SALT-PIT.

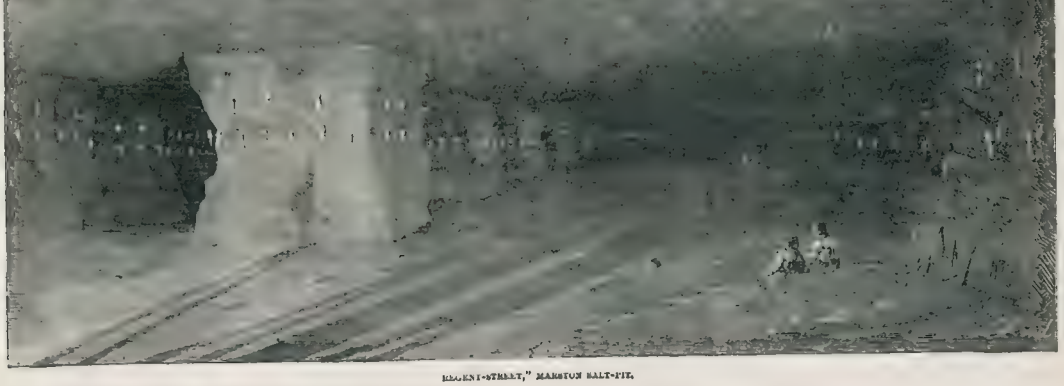
A VISIT TO THE SALT MINES OF CHESHIRE.

(From our own Correspondent.)

There was a time, and that within the memory of the living generation, when salt in England was burdened with the heavy duty of £30 per ton, and sold retail as high as 4*l.* or 5*l.* per lb. It is now free of duty and so abundant as to be sold retail at 6*d.* per 14 lb. The wholesale price of common salt is 5*s.* 6*d.* per ton, of the middle grain salt, 12*s.* 6*d.*, and of the very finest sort 15*s.* per ton. Were the duties and the price of labour to be remitted, what a boon salt is so abundant can scarcely be understood or appreciated by the generations of salt in countries where it is scarce. In early times it possessed a far more extended and emblematic character. It was a pledge of hospitality among the Romans, of the Prophet and among the Greeks it was supposed to preserve from several passions of the mind. Among the mysterious ingredients of superstitious sacrifices, says Mr. Ormerod, "Pliny mentions the 'Immolatio Superstitiosa,' which was to throw incense and salt on the victim's head. In the ancient rituals the Prophets of Israel were commanded to salt their sacrifices, and in the ancient Mexican and other heathen rites salt was established in a manner. It was deemed an acceptable gift to the Deity, as the Mosaic institutions testify, and was typical of incorruptibility and the Eternal. It was an ingredient used in their marriages, rites, and funerals, and a universal appetiser. Many of the superstitions regarding it seem to be derived from the most remote antiquity. Salt was considered a substitute the most acceptable to the gods. Salt and bread entered every sacrifice of the Israelites. Rock salt to be used in sacrifice by the Egyptians was procured by the priests of Jupiter Ammon. Even before the superstitions connected with salt ceased and modern times would not only be its many vocations. Numbers of these superstitions still linger in England and Ireland, and the great French lyrist Beranger alludes to this and to the ancient superstition against thirteen at table, in one of his most beautiful songs:—

THE SALT — DESCENT OF THE LADDER.

"In the interior centre of Africa," says Mungo Park, "the greatest of all [illegible] large islands, is a source of health and [illegible]



REGENT-STREET," MARSTON SALT-PIT.

of a large portion of that county is in salt, and its manufacture gives employment to large numbers of people. In the year 1844, no less than 13,476,684 bushels of rock and white salt were exported, of which quantity

Russia took	..	..	..

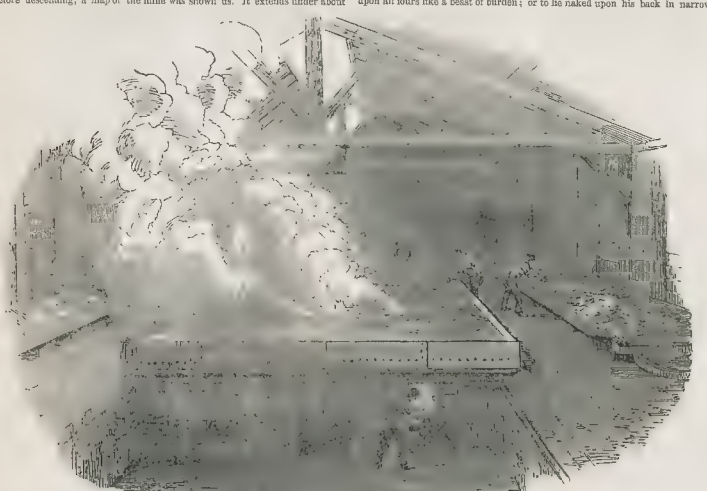
Western Coast of Africa	..	..	1,000
[illegible]	..	..	[illegible]
Guernsey, Jersey, &c.	..	..	[illegible]

The remaining quantity was sent in small shipments to the West Indies, to the Mediterranean, Brazil, &c. The quantity consumed for home consumption in the same year was about 12,647,616 bushels. It is estimated that, last year, 740,000 tons of salt were made in England principally in Cheshire.

With these few preliminary remarks, I proceed to detail the particulars of my visit, in the course of the present summer, to the great Marston Mine, near Northwich, in Cheshire. From the Hartford station, on the London and North-Western Railway—about twenty-two miles from Liverpool—it is a pleasant walk of four miles to the town of Northwich, the centre of the salt districts of Cheshire. I had heard much of the Marston, or Duke's Mine, as the largest and best worth seeing, and on making inquiries at the inn at Northwich, as to the best means of procuring admission, I was directed to the house of the agent or manager, at a short distance. I was informed that there would be no difficulty, and that every facility was shown to strangers who were desirous of seeing the workings of the mines. I had the advantage of the company of a friend who had formerly descended into the Marston pit, and, under his guidance, proceeded to a chemist's shop, where we provided ourselves with a few shillings'-worth of blue lights—an essential preliminary to those who wish to see the mine to advantage. We found the agent was not at his house, but at the "pit," and thither we proceeded in search of him. The landscape about Northwich seemed somewhat ricketty. Some of the houses leaned fearfully to one side, as if from the effect of an earthquake. There was a general air—if I may use such a simile—as of drunkenness abroad at the whole place. The buildings and the trees seemed as if they had been making a night of it, and were going home intoxicated. I was afraid, as I looked at some of the houses, that they would fall. This odd appearance was caused by the subsidence of the soil over old and abandoned salt mines, which had thrown the trees and houses off the perpendicular. Instances have from time to time occurred of serious loss of property, and even of life, from this cause; and many of the farmhouses which we passed seemed so insecure in their positions, that I should certainly not have liked to pass a night in them. A walk of about two miles brought us to the Marston Pit. On presenting ourselves at the office, we found a party of three gentlemen and a lady, waiting to descend before us. The matter soon made his appearance, and, having asked us to inscribe our names in the visitors' book, he politely made us free of the premises, and deputed his foreman to accompany us, and to explain the various stages of the manufacture. Before descending, a map of the mine was shown us. It extends under about thirty-five acres, and the shaft is 250 yards in depth. "If you had given us notice of your coming," said the foreman, "we would have prepared a treat for you, and have had the mine lighted up with as many candles and torches as we could have procured for you. When Mr. Canning visited it five-and-twenty years ago, we lighted no less than 15,000 candles, and the effect in the mine was magnificent." We expressed our regret that we had not been informed of the possibility of such a treat, and explained that we had a few pounds of blue lights with us. "We will make them go as far as we can," said our guide, "and do the best to shew you the mine to advantage." The bucket being prepared, the previous party—who were also provided with a quantity of blue lights, to be used below—stepped into it, holding fast by the rope, and were slowly lowered into the mine. After a few minutes, the empty bucket ascended, and our turn came to be let down into the bowels of the earth. The motion was pleasant, and the descent, unlike that into a coal mine, was perfectly free from the annoyance of dripping moisture. The aperture above seemed to grow "small by degrees" as we descended, until, at last, it appeared no larger than the crown of a hat. We were, however, soon below. The descent did not occupy five minutes. On stepping from the bucket, a small candlestick, with a dip candle, was handed to each of the party, and our walk over the mine commenced. The light was just sufficient to make the darkness visible; but, on holding the candle to the ground, we could see that the floor was of rock salt, perfectly dry. It was covered with a fine dust, which sparkled like crystal in the light—though it must be confessed that the crystal was of a reddish and somewhat dirty tincture. The roof, and the gigantic pillars which were left to sustain it, were of the same material; and I carried, as I looked upon the square foot of it—which was all that I could at any time distinguish by the miserable light of my one candle—the brilliant spectacle which Mr. Canning must have enjoyed when the fifteen thousand candles were lighted up for him. "Wait a little," said our guide, and placing a couple of handfuls of the blue light upon the ground, set fire to it. The effect was instantaneous and highly beautiful. It was as if the underground palace of the gnomes, or earth genii, had been displayed. The gigantic columns of rock salt with floor and roof of the same material all glittered in the sudden light; and the shadows of the guests, preternaturally lengthened, fell behind them to the distance of twenty or thirty yards, and seemed to climb up the massive columns of salt, upon which they might have been used in Brobdingnag. But the pleasure of the fairy spectacle was only too fleeting. In less than a minute the tantalizing light burned out, and all once more was a thick darkness, convertible, however, into semi-darkness, by each individual as he moved about with his candle. Each person seemed the centre of a circle of hazy twilight, wandering about in the utter gloom. Luckily we had blue light enough to be enabled to repeat the experiment several times, and to enjoy the brilliant spectacle of this magnificent cavern, if only for a few seconds at once. I could not help wishing that it had been possible to illuminate the cavern with gas, so that I might have been a witness of the scene. The miners did not happen to be at work on this particular day; but a few were procured from the neighbourhood, and came down by the bucket to shew us the first process of the manufacture. Working in a salt mine is comfortable, and infinitely preferable to working in a coal pit. There is no fear of explosion in a salt mine; the ventilation is good; the miner also can walk erect, and is never obliged, like the unhappy coal miner, to crawl upon all fours like a beast of burden; or to lie naked upon his back in narrow



EVAPORATING HOUSE AND SALT PAN.

seams, and strike the mineral from the roof above him. The rock is sometimes blasted, but more commonly the miner uses the pickaxe to detach it in smaller fragments. It is not hard, and easily yields to the implements employed. While we were engaged in questioning the miners upon their work, their hours, and their wages, and the general state of the salt trade, a surprise had been prepared for us. We were requested to accompany the foreman, and were led through rows of stupendous pillars of salt, fifty or sixty feet square, and about fifteen feet high, to a distant part of the mine, which seemed to be full three-quarters of a mile from the place where we had started. Here a new scene of beauty presented itself. My wish had, to some extent, been gratified. Candles had been stuck against the sides of the walls and pillars down a wide avenue of at least of 500 yards in length, which presented an appearance similar to that of a street [illegible] on city, with all its lamps lit up at night. The name given by the miners to this vista was "Regent-street;" and I certainly looked far more beautiful than the street after which it had been called, for the semi-darkness into which the more dim and distant lights faded away, gave me an idea of infinitude and sublimity which Regent-street itself could not, under any aspect, have displayed. It was only now that the extreme beauty of this underground mansion became fully visible and palpable. The pattern of concentric curved lines worked upon the roof and pillars by the nails of the workmen as they went down the rock, gave an appearance of ornamental design, which, in the full light thus thrown upon it, was singularly novel, unexpected, and pleasing. We lingered long in this spot, and were informed that not many weeks previously a party of guards officers from a regiment stationed at some town in the vicinity, of which the name has escaped my recollection, invited all the beauty and fashion of the neighbourhood to a grand ball in this place. The scene was represented as gorgeously beautiful, which, I have no doubt it was. The idea I saw convinced me how much more was to be seen under favourable auspices. There needs but light, and plenty of it, to transform a salt mine into a fairy palace; and is needs but ladies in the brilliant costume of the ball to fairies to grant it. On being "Regent-street," we were conducted once more to the bottom of the shaft, but turned aside to visit a stable erected for the accommodation of a horse employed to draw the coal trucks from the remote parts of the mine to the foot of the shaft. The horse had recently returned to the mine, having been at ted up during a thick week, to enjoy a run in the green fields, and a sight of the blue sky, both of which treats were, doubtless, as agreeable to him as they would have been to men under similar circumstances. It appears, when a horse has once been got down into the mine he is very quiet. The air is good, he is well fed, and he has every inducement to do his work well: but when he is taken up again, he is not to be persuaded by the voice of the charmer, charm he ever so [illegible] to approach the mouth of the pit a second time. Nothing but force is available—though it appears that it is the descent in the bucket, rather than the darkness below, to which the animals have so decided an objection.

On leaving once more into the open air, we were shown the next steps of the manufacture. When the rock salt is raised in the buckets—the same by which visitors second and descend—it is thrown into a pond or tank to dissolve. Here it lies for a few days, and a red scum arises from it [illegible] by this process of the rock-salt. It is filtered into a [illegible] where it forms a purer brine, and the scum and rock-dust of the first tank are dug out. They form excellent manure, and are often employed for that purpose. The manager showed us a field of wheat growing upon a made soil composed entirely of the residuum of rock-salt. The wheat was then but young—it was early in the season—but it presented an appearance [illegible] of [illegible] neighbourhood, and some [illegible] superior. From this point I am not sufficiently an agriculturist to speak with confidence; but I am assured that the crop was a very fine one. The brine, after it has been sufficiently filtered from earthy impurities, is pumped up into a reservoir, where it remains until it is required for the next process, which is that of evaporation. It is then pumped as it is wanted through wooden pipes or long troughs into the evaporating pans. These are made of cast-iron, in the form of an oblong square, with a superficies of from 600 to 1000 feet, and a depth of from 12 to 16 inches. Under these pans sufficient fires are lighted, the brine is slowly heated, the moisture evaporates, and the salt is left behind. According to the fineness of the salt required, must be the haste or slowness of the evaporation. The coarser and common descriptions of salt are procured by hasty, and the finer sorts by the slow process.

Common salt, or, to use its proper chemical name, the chloride of sodium, forms itself naturally by evaporation into crystals, of which the shape is a perfect cube. "These cubes," says Bergman's "Chemical Essays," "exhibit diagonal markings or strias, but frequently on each side produce squares parallel to the external surfaces, gradually decreasing inwards circumstances which shew the vestiges of their internal structure, for every cube is composed of six quadrangular hollow pyramids, joined by their apices and external surfaces; each of these pyramids filled up by others smaller, but gradually decreasing in size, completes the form. By a due degree of evaporation, it is no difficult matter to obtain these pyramids separate and distinct; or six of each, either hollow or more or less solid, joined together round a centre. If we examine the hollow pyramid of salt still further, we find it composed of four triangles, and each of these formed of threads parallel to the base, which threads, upon accurate examination, are found to be nothing more than a series of small cubes."

To crystallize the brine to perfection requires care in the evaporation—a proper regulation of heat, and an absence of agitation of the brine during the process. Various temperatures are employed, according to the quality of the salt required. If the salt forms a scum or scab upon the surface, and does not fall readily to the bottom of the evaporating pan, the evaporation of the whole is impeded. In this case, a small piece of fresh butter is thrown in, which, melting, diffuses itself over the whole surface of the pan, and causes the rapid dissipation of the particles of floating salt, which then fall to the bottom. "No other cause but fresh butter will answer the purpose," said the manager; "oil will poison it, and make no salt. Even salt butter, if thrown in, will produce no effect. I do not know why salt butter should not answer the purpose; but I know the fact that it does not, for I have tried it a score of times. Fresh butter never failed—salt butter always did. As for oil, the reason is clear enough: it does not diffuse itself over the pan, but flows in a mass. The salt butter, however, puzzles me."

Four kinds of salt are made: *the stoved, or lump salt*; the *common salt*; the *large grain flaky salt*; and the *fishery salt*, sometimes called the *large diamond*. To make lump salt, requires boiling heat for twelve hours; at the end of which the greater portion of the water has evaporated, and the salt, still moist, remains at the bottom of the pan: it is then drawn out, and placed on a long, sloping wooden bench, whence the still superabundant moisture drains off into a tub at the bottom, called the "leech-tub." It is then made up into blocks or squares, and dried in heated stoves, when it becomes fit for the import or export market.

To make common salt requires twenty-four hours' evaporation; the large grained flaky salt, forty-eight hours; and the [illegible]grained, or fishery salt, five or six days. The very finest kinds of salt are sometimes dried for fourteen days, after they have issued from the evaporating pans. When the salt is made, it is conveyed to the Mersey by the river Weaver, which has been deepened and widened for the trade, and from the Mersey it is conveyed to all parts of the world. The Marston mine has been worked for seventy-five years, appears as inexhaustible as ever. There are fifteen other mines in the immediate vicinity of Northwich, many of them very large, but none so large as this. The total number of evaporating pans at work in the Northwich division is 286. There are 201 in the Wansford division, or 867 in these two salt districts. Each pan is capable on the average, of making twenty-five tons of salt [illegible], from which statement a calculation can easily be made of the total [illegible] full work of the Cheshire mines. The complaint of the trade, however, is, that too much salt is made, and very few of the mines are worked to the full extent of the pans which they possess. The price of land in Cheshire under which salt mines yielding fine rock salt are known to exist, has been sometimes as high as from £1200 to £1400 per acre.

The salt-tax originated in the ninth year of King William III., and was not removed till 1823. It was very injurious in its operation; and, for purposes of agriculture, salt became almost entirely unknown to the English farmer. Professor Johnson, in his lectures on agriculture, enters at full length into the uses and abuses of salt as a manure; and the reader who is interested in this branch of the subject, will there find all the information he requires.

In conclusion, let me recommend any one who may happen to be in Cheshire with a day to spare, and to be desirous of employing it with pleasure and profit, not to omit the opportunity of visiting the Marston Pit; and, as the best piece of advice I can give him, let him be well provided with LIGHTS.

CHESS.

GAME II.

BY CORRESPONDENCE BETWEEN THE SAME PLAYERS.

M. Hanstein giving the Pawn and two moves.

(Remove Black's K B Pawn from the board.)

WHITE (Mr. L.)	BLACK (Mr. H.)	WHITE (Mr. L.)	BLACK (Mr. H.)
1. P to K 4th	P to K 4th	16. K Kt to his 5th	Kt takes Kt
2. P to Q 4th	P to K 3d	17. P takes Kt	P takes K B P
3. P to Q B 4th	P to Q B 4th	18. P takes K B P	K B takes kt P
4. P to Q 5th	P to Q 3d	19 Q to K 2d	K B to his 3d
5. P to K B 4th	Q Kt to Q R 3d	20. Q B to K R 6th	K R to Kt sq
6. K Kt to B 3d	K Kt to K B 3d (a)	21. Kt to K 4th	Q to K 2d
7. K B to Q 3d	K Kt to K R 2d	22 K R to B 2d	Kt to Q B 2d
8. Castles	K B to K 3d	23. P to K Kt 4th	Kt to K sq
9. Q B to Q 2d	Castles	24. Q R to K R sq	K B to Kt's 2d (e)
10. P to Q R 3d	P to K 4th	25. P to K B 6th	K B takes P
11. P to R 3th	Q B to Q 2d	26. P to K Kt 6th	K B takes P
12. Q to K sq	K to R sq	27. B takes B	R takes B (ch)
13. Q Kt to B 3d	K R to K Kt sq	28. K takes R	Q takes Kt (ch)
14. P to K R 4th (b)	P to K Kt 3d	29. K to Kt sq	Q to K R 2d (f)
15. Q to K 3d (c)	K R to Kt 2d (d)	30. Q to K B 3d	

(a) This mode of opening with the two Kt's appears to have been first introduced by Mr. Staunton, in the well-known games wherein he gives the Pawn and two moves to Mr. Harrwitz.

(b) The advance of this Pawn, we suspect, was premature, and if properly taken advantage of by his opponent, might have seriously compromised White's game.

(c) We confess we do not see the force of this, why, in reply, Black declined to take the K B Pawn with Pawn.

(d) Taking the K R Pawn would have been fatally imprudent; for example—

WH TE.	BLACK.
16.	K B takes P
16 K B P takes P	R or P takes P
17 Kt takes B. &c.	

But, as we observed in the preceding note, Black's objection to take the K B Pawn, and thus open the file for his K's Rook, is not apparent to us at the moment.

(e) This is not a good move, nor is it easy to suggest one for him under present circumstances.

(f) This is not making the best of a bad position. He ought rather to have retreated his Queen to K 2d. In that case, the *Berliner Schachzeitung* suggests the following as a likely result:

WHITE.	BLACK.	WHITE.	BLACK.
29.	Q to K 2d	33. B takes P	K to K B 3d
30. Q to K B 5th	P to K Kt 3th	34 B takes K R P	R to R sq
31. Q R to R 7th	Kt to K B 3d	35. K R to K sq (ch)	P to K B 4th
32. Q R takes Q	Kt takes Q		And Black's game is hopeless.

We believe, however, in this variation, White may play more skilfully better at the outset. Instead —30. Q to K R 6th, he may suppose—

WHITE.	BLACK.
30. Q to K B 3d	(Threatening mate in two Kt to K Kt 3d or to Q B 2d. (If Kt to K B 3d, White takes it, and has a clear Rook ahead)
31 Q to K B 7th	Q takes Q (Must)
32 R takes Q	

And Black cannot in any way save the game.

CHESS ENIGMAS.

St. Sylvione are three peculiar situations, communicated by the celebrated Russian player, Major JAENISCH; with a request that amateurs will not be content to solve them simply, but will examine them in connection with each other, as they lead to some interesting consequences in the theory of End-games.

I.

White: K at his R sq, Q at K R 6th; P's at K B 4th and Q R 4th.
Black: K at K Kt 6th, R at Q B 4th; P's at K R 4th and 6th, K Kt 4th, and Q Kt 6th.

White to move, and win.

II.

White: K at K R sq, Q at K R 6th; P's at K B 4th, Q Kt 3d, and Q R 2d.
Black: K at K Kt 6th, R at Q B 4th; P's at K R 4th and 6th, K Kt 4th, and Q Kt 2d.

White has the move, and Black can draw the game.

III.

White: K at K R sq, Q at K R 6th, P's at K B 4th and Q R 6th.
Black: K at K Kt 6th, R at Q B 4th; P's at K R 4th and 6th, K Kt 4th, and Q R 2d.

White to move, and play, and win.

THE THEATRES.

HER MAJESTY'S.

The season terminated on Tuesday night with "Norma," in which Signora Florentini supported the character of the Druid priestess with added power and effect. The National Anthem was sung by the entire company; and the brilliant assemblage, upstanding, formed a *coup d'œil* unsurpassable for its substantial splendour. Two extra nights, as usual, are given, and the portals of this vast establishment will be closed on Monday for the present season. A review of the past campaign will appear in our next publication.

ROYAL ITALIAN OPERA.

The eleventh representation of Meyerbeer's "Huguenots" took place last Saturday, the enthusiasm of the audience for this grand work appears to be on the increase every season, inspiring the executants to fresh exertions. The *Valentine* of Grisi and the *Raoul* of Mario create a perfect *furore*.

On Tuesday, Rossini's "Otello" was given for the third time. Owing to the hoarseness of Ronconi, Tagliafico enacted *Iago* at a very short notice. The *Elmira* (Brabantio) and *Roderigo* of Zelger and Meraldi, and the part of *Emilia* of Madame Cotti, are great drawbacks in the cast; but the pathos and vigour of Grisi in *Desdemona*, and the vocal and histrionic powers of Tamberlik in *Otello*, produced an unusual excitement. The great tenor, in the scene of the duet with *Iago*, again electrified the house by singing the C sharp, in alt, from his chest voice—an unparalleled feat in vocalization. His fine acting in the last scene played Tamberlik appearing in his old part of *Figaro* (vice Ronconi), singing and acting with much vivacity. Madame Castellan, Polonini, Tagliafico, and Mario, were the *Rosina*, *Bartolo*, *Basilio*, and *Almaviva*, so that the act passed off with the greatest spirit and precision.

On Thursday, in which the 46th final subscription night of the 27th that was included, the first act of "Norma" was performed, and, for the first time since 1847, Donizetti's "Elisir d'Amore" was revived. Madame Viardot making her first appearance here as the coquettish *Adina*, and Ronconi, also for the first time here, enacting the mountebank *Dr. Dulcamara*; Mario was *Nemorino*, and Tamburini the dashing *Sergeant Belcore*.

The production of the "Elisir" proved to be one of the greatest hits of the season. The house was crowded to excess, and the execution of the lively opera was perfection, not only in the choral and orchestral departments, but as regards the principals. Madame Viardot's *Adina* was a piece of genuine refined comedy, and her vocalisation was distinguished by the most brilliant cadenzas. She was encored with the greatest enthusiasm in the first act, and the second act; and in the "Prendi per me" she was immensely applauded. Mario's singing of the "Una furtiva" secured a rapturous encore; he sang throughout the opera, admirably. The *Sergeant* of Tamburini is known as one of his best parts. Ronconi's *Dulcamara* convulsed the house with laughter, from first to last: it was a most finished specimen of comic acting. This evening (Saturday) the "Elisir" will be repeated, with the first act of "Norma;" and next week the following additional nights, at reduced prices, the subscription season ending to-night.

OLYMPIC.

Mr. Bolton's management of this theatre terminates, it appears, this week. The revival of "The Malcontent" has, nevertheless, proved attractive, and continued to be played almost nightly. The conductor has also ventured upon the revival of Fielding's "Pasquin;" or, the Life and Death of Common Sense." It is to this satire that the legal restrictions on the English stage were partially due. The Licensing Act, though previously resolved on, was immediately consequent on the license in which the dramatist indulged in this and similar pieces. The form of the drama is analogous to that of the "Critic;" or, "Puff" "Pasquin" are among the comedy of the "Election," and a tragedy called the "Life and Death of Common Sense." Mr. Bolton, however, has contented himself with the latter. Much of the pasquinade is, of course, obsolete, but some of the strictures are yet applicable; and, accordingly, the dialogue between the *Queen of Common Sense* and the *High Priest of the Sun* was referred by the audience to the Gorham controversy. Other passages directed against foreign entertainers are as available to the purposes of the management at the present day as to those of the period of their original production. On the whole, Mr. Bolton's brief season has been conducted with some spirit; and, considering the limited capacity of his company, with considerable success.

On Wednesday, a Miss Lyons, the pupil of Mrs. W. West, made her *début* in the character of *Juliet*. In her juvenile appearance and age, she possesses some of the requisites for the part. She has evidently been professionally taught, and though her elocution is yet defective, her action is, for the most part, appropriate, and occasionally graceful. She did not exactly come up to our expectations in the chamber scene; but she succeeded in gaining considerable applause from the audience, both in that and other trying situations of the drama. Altogether it was a performance of promise, though wanting in that development which only continuous practice can afford.

This theatre, we understand, has, at length, been taken by Mr. Farren.

SADLER'S WELLS.

On Saturday this well-conducted theatre was opened for the season, with the tragedy of "Hamlet." Mr. Phelps had evidently re-studied the part, and presented with great effect not only an intelligible reading of the part, but a "chaste and noble" impersonation of the character. His princely Dane is a fine and elegant interpretation. Miss Glyn sustained the *rôle* of the guilty Queen with her usual originality, and conducted during the scene of the first appearance of the interlude was striking and appropriate. The look of wonder with which she regarded the *King* was, in particular, artistic. In the closet scene, and at *Ophelia's* grave, she likewise made some points, which were effective and appropriate. The evening, also, was remarkable for the *débuts* of a Miss Travers in *Ophelia*, and a Mr. Walter in *Laertes*. Neither was apparently well fitted with the part that each sustained; and we would defer our judgment of their merits on their performance until we can decide upon them in more favourable characters What new seems to us crude and awry may then be better justified by the order of position and the special aptitude of the actor.

On Thursday, Mr. Leigh Hunt's "Legend of Florence" was revived, and gave us the desired opportunity of testing Mr. Waller's talents, in the rather difficult and elaborate part of *Rondinello*. He performed it with spirit and elegance—much, indeed, as to justify us in forming considerable hopes of his future success. Mr. Phelps' *Agolanti*, also, was a masterly performance; and Miss Glyn supported the singularly arduous character of *Ginevra*, the patient wife, with taste, judgment, and feeling. We were also impressed favourably with Mr. Hoskin's *Colonna*, and the *Olympus* of Mrs. Archbald, a new actress here. But, for such a critique as the revival merits, we must refer the reader to another week, when we shall present an illustration of one of the leading scenes in this most exquisite and poetic drama.

MR. BUNN AT HARROGATE.—The local papers report in enthusiastic terms Mr. Bunn's delivery of his Literary and Dramatic Monologue, with the Shakspearian illustrations. "As a reader and declamator," states the *Harrogate Advertiser* of Saturday last, "Mr. Bunn possesses all the ease, grace, elegance, and power of such a difficult undertaking requires, and his style of diction is pleasing and appropriate. The Rooms were well filled with a brilliant audience, who testified their gratification by loud and frequent applause." Mr. Bunn will give another entertainment at Harrogate, at the Cheltenham Rooms, before the end of the season

Mr. John Langford Pritchard, the well-known manager of the York theatrical circuit, and, under Mr. Macready's management, leading actor at Covent Garden, and, since at Dublin and Edinburgh, died, after a long, lingering and painful illness, on the 8th inst., aged 52. He was, for many years, the honorary secretary to the Edinburgh Theatrical Fund. His remains have been interred in the Leeds Cemetery.

IRISH MANUFACTURES.—The village of Waringstown, Banbridge, presented a very animated appearance on Saturday, the 17th inst., when it became known that Mr. Henning, of Carnboy House, Waringstown, had gained the first prize for damasks and cambrics at the late Cork Exhibition of Manufactures in Ireland. A splendid arch was erected, dressed with the flax plant, intermingled with laurel; in the centre hung the motto "Irish manufactures for ever." A car, ornamented with flax, and containing a loom in full work, was drawn through the village. At night, tar barrels were lighted and carried through the village, which was illuminated. About 3000 persons were present.

PAROCHIAL ASSESSMENTS.—The Select Committees of the Lords appointed to consider the laws relating to parochial assessments have reported that it is expedient to rate the owners instead of the occupiers of houses of the value of £6 and under, and that no person whatever shall be exonsed from the payment of rates; that every description of property ought justly to contribute to the relief of the poor; that all rates should be assessed as coal mines; that it is expedient to approximate railway assessment as nearly as possible to the net letable value and on a mileage rate; that it is necessary to exempt stock in trade until the value can be defined with greater accuracy; and that it is not expedient that the general maintenance of the poor should be provided for out of the Consolidated Fund. The committee has also reported that no evidence had been received by them to induce them to recommend any general system of union rating.

CHESTER AND HOLYHEAD PACKET SERVICE.—The efficiency of the packet service on the Chester and Holyhead Railway Company is evinced by the following run of the *Scotia* against the *Banshee*. It appears that the rivalry existing on the Holyhead and Kingstown stations between the boats of her Majesty's government and those of the Chester and Holyhead Company especially during the last month, in small service between those ports to a company opposed to the Chester and Holyhead, has led to some spirited trials of speed between the Government vessels and those of the newly established line. On these contests came on the 13th instant, when Her Majesty's packet the *Banshee* left Holyhead with his Excellency the Lord Lieutenant of Ireland on board, having a slight start of the Company's boat, the *Scotia*. Notwithstanding the latter boat was the last to leave the quay, it reached Kingstown five minutes in advance of its competitor, having performed the journey in three hours and forty minutes

SOUTH-EASTERN RAILWAY.—Notice of an intention to file an it junction against this company has been lodged, to prevent them from opening their new completed line from Ashford to Hastings, on the ground that the line is constructed, does not agree with the parliamentary sections by as much from 13 to 36 feet in the levels in some places, while the deviation allowed should nowhere exceed five feet.

THE ILLUSTRATED LONDON NEWS.

DRIVERS' STRIKE ON THE EASTERN COUNTIES RAILWAY.

Various meetings have been held by the drivers and firemen who have resigned their engagements on this railway, for the purpose of showing that, in their judgment, no other course than the extreme one which they have taken was left open to them.

On Monday evening, at a meeting which they held at the George, Stratford, Mr. Hope, who presided (as he had at the former meetings), directed attention to a fact, which he contended was the strongest in favour of the men—Mr. Gooch's conduct. viz. that, upon attending at the offices of the company to receive our pay, all those men who had been fined by Mr Gooch for accidents over which they neither had nor could have any control had the amount of the fines returned to them, and those who were suspended were paid their wages for the whole period of such suspension." The speaker then detailed certain detentions and irregularities which he stated had occurred with respect to the arrival and departure trains at several of the stations, and which he attributed to the ignorance and incompetence of the new hands employed. He concluded by exhorting the men to persevere in their present course of steady and peaceful conduct.

Several of the men having addressed the meeting in confirmation of the statements of the chairman, a resolution was agreed to affirming the chairman's view of the remission of the fines.

The Directors have published a statement in justification of the course they have adopted, which, after setting forth a scale of wages demanded by the men, and to which they (the Directors) did not think proper to accede, continues the following report from Mr. Gooch, which would seem to show that a want of proper discipline is at the bottom of the disagreement.

"Locomotive and Carriage Department, Stratford, August 7th, 1850. "To the Chairman and Directors of the Eastern Counties Railway.

"Gentlemen,—From the various statements which appear daily in the papers, I do not think it necessary to trouble you to explain, as concisely as I can, the several circumstances connected with the present dispute. I was by myself in the workshops on the afternoon of Monday, the 15th instant, to resign their situations on the evening of Sunday the 18th inst. The reasons they assigned for so doing in the manner they presented themselves were the unjust fines which had been imposed upon them by me. You are fully aware that, in the absence of the superintendent of the locomotive department, the strictest discipline is necessary to ensure safety to the travelling public as well as economy to the shareholders; it is with great regret I am compelled to say that the taking away from the foreman of your railway, a few months ago, I found the discipline throughout the whole extent in a very unsatisfactory state. Being most desirous to effect the changes which were necessary as quickly as I could, and only preferring to introduce the same system on this railway as prevails throughout all other leading railways, I do not see the reason why the fines should only be paid out of the wages of the men, and not as a punishment for the offence. I may most emphatically that, in any case, has a fine been imposed for any locomotive engine which a guarded man would not have been in command care and control of those in charge. I wish also to state that the other fines were imposed for not reporting; and one case in particular, where a guard came in late with the luggage train, the train had to be taken a distance of six miles by horses. Fines also have been imposed for arriving at stations with goods trains at periods varying from one hour to twenty minutes. Recently *Dalzomera* convulsed the house with laughter, from first to last: it was a most finished specimen of comic acting. This evening (Saturday) the "Elisir" will be repeated, with the first act of "Norma;" and next week the following additional nights, at reduced prices, the subscription season ending to-night.

"I have, &c.,

"C. GOOCH."

On Wednesday the drivers and firemen held another meeting in Stratford, at which the chairman (Mr. Hope), sought, by quoting instances to the contrary, to controvert Mr. Gooch's averments with respect to the imposition of fines, the intention to reduce wages, and the fitness of their successors to perform their duties. The proceedings were, on the whole, a resolution to that effect.

As a proof of the kindly feelings entertained by the directors towards their late servants, it is stated that the directors have notified to such of them as occupy cottages and garden, belonging to the company, that they may retain the gardens if not of sufficient maturity to be removed, shall be valued, and the amount paid to the late occupiers.

J. H. Drummond Hay, Esq., President and Senior Member of Council of the Virgin Islands, is promoted to be Lieutenant-Governor of the Island of St. Christopher, in the room of Mr Macintosh. Arthur Rollox Hollingsworth, Esq., is appointed Assistant Receiver-General of Trinidad.

FEBRUARY SAVINGS-BANKS.—The Huddersfield Mechanics' Institution have just established one of these banks, with very gratifying results It commenced on the 8th ult., with 57 depositors. Last Saturday there were 96 depositors, amounting to an average of *one shilling and tenpence each*. The number of accounts open is 147.

CAUTION TO FARMERS.—Mr. Cook, of the Swan Inn, Dunkerton, near Bath, fed his pigs with diseased potatoes, and feeding on them, and found a few morning after, several of them out of eleven dead. He administered salt and water to the remaining two, by direction of Mr. Kneeling, and they recovered and are doing well.

THE BURNING OF PARKHURST PRISON.—Five juvenile convicts, named William Saunderson, William Fortune, William Pearce, Thomas Knott, and Frederick Grimes, have been committed for trial at the next assizes, charged with having wilfully set fire to Parkhurst Prison, on the night of the 30th of July last, whereby one of the wings of the prison was totally destroyed. The convicts planned the burning of the prison to afford them means of escape, not only raising their own lives by the act, but those of nearly 300 convicts. The result proceeded to that part known as the C dormitory, which he found to be on fire: and although every effort was made by the officers to suppress it, the flames gained ascendancy, and the building was burned to the ground. After the fire was extinguished, information was brought him, on search, by which he ordered the prisoners into confinement in separate dark cells. On the succeeding morning the prisoner Grimes sent for witness. Witness went, in company with the chaplain of the prison, and cautioned the prisoner. The prisoner made no statement, and witness and the chaplain went away; but the next day the prisoner again requested their attendance, when he made a confession to them that he had himself fired some matches from out of the chapel bible, prayer-book, hymn books, given him by Pearce and Fortune, which were placed in the ventilator of the dormitory. He made his escape from the building by dropping from the window, on Tuesday, between 2 and 3 o'clock, when he left the cell out of the officers' window, and held a light of Mr. Baldrel's while he let the bars out. Mr. Shirlaw added that the other prisoners had confirmed Grimes's statement.

MONETARY TRANSACTIONS FOR THE WEEK.

(From our City Correspondent.)

The English Funds have been very inactive during the past week, a predominance of sales tending to depress prices. Indeed, the general wish regard to securing the remainder of the harvest, and the potato disease is also reported to be rapidly spreading. These sinister rumours, added to a decidedly increased demand for money, have not only tended to discourage speculation, but Exchequer Bills and India Bonds are also drawn in the decline Consols quote a reduction of a quarter per cent. upon the week, having opened on Monday at 96¾ to ⅞ for Money, and now quoting 96 to ⅝. Exchequer Bills have been gradually receding, at present, however, only a few shillings; and India Bonds are also a few shillings cheaper. The market was inactive at the close of the week, with quotations as follows: Bank Stock, 212; Reduced Annuities, 96⅝; Consols, 96¾; New Three-and-a-quarters per Cent. Annuities, 97¼; Annuities, 30 years, 8; India Stock, 266; India Bonds, £1000, 88 p; Ditto, under £1000, 88 p; Consols for Account, 96⅝; Exchequer Bills, £1000, June, 68 p; £500, June, 68 p; Small, June, 68 p.

The principal feature in the Foreign Market has been the fluctuations in Mexican. On Monday some large purchases for the rise gave an impetus to prices, and 29¾ was for a time quoted for Consols. The fairness of the English Harvest, however, on Tuesday, influenced Foreign dealings generally, Mexican declining ½ per cent. Yesterday, Mexican fell another ½ per cent., and on Thursday ⅛ per cent. Danish Five per Cents quote last week's prices. Brazilian Bonds 29½ for Account. Danish Five per Cents quote last week's prices. Brazilian Bonds, 92¾; Ditto, New, 1829 and 1839, 91½; Danish Bonds, 1825, Three per Cent., 77; Ditto, Five per Cent., 102; Equador Bonds, 3¾; Mexican, Five per Cent., Ex. Jan. Coupons, Account, 29¾; Peruvian Bonds, four-and-a-half per Cent., Account, 84½; Portuguese, 34; Portuguese Converted, 1841, 34¾; Russian Bonds, 112¾; Ditto, Four-and-a-Half per Cent., 96¾; Spanish Five per Cent, 1840, 17¾; Ditto, Three per Cent., 37¾; Belgian Four-and-a-Half per Cent., 91¾; Dutch Two-and-a-Half per Cent., 12 Guilds, 59¾; Ditto, Four per Cent. Certificates, 89¼.

Shares continue heavy. Eastern Counties quote 6 a better market is, however, apparent for Great Northerns. Blackwalls are flat, and East Lancashires have fallen to par. Closing prices are: Great Northern, 9½; Ditto, Ex Scrip, Ditto, Ex Dividend, 1½; Eastern Counties, ⅛; Ditto, No. 2, £6, ½ p.; Ditto New Preference, ½ per Cent., 1½; Eastern Union, Cast A, B, and C, ⅝; East Lancashire, guar. 6 per Cent., 28½; Great Northern, 9½; Ditto, Ex Scrip, Ditto, Ex Dividend, 1½; Great South. and West. (Ireland), 20; Ditto, Eighths, 2½; Great North of England, 24 x d.; Great Western, 57½ x d.; Ditto, New £17, 7½ x.; Lancashire and Yorkshire, 85; Ditto, Fifths, 2½; Leeds and Bradford, 94; London and North-Western, 111½; Ditto, New Quarters, 18; Ditto, Fifths, 1¾; Ditto (£10 M. and B.), C., 2; London and South-Western, 60¾ x d.; Midland, 33¾; Ditto, £50 Shares, 9½; Ditto, Birmingham and Derby, 13½; Ditto, Consolidated Bristol and Birmingham, Six per Cent., 121½; Norfolk, 15; North British, 5½; North Staffordshire, 6¾; Reading, Guildford, and Reigate, 18½; Royston and Hitchan, 6¾; Shrewsbure Union, 2¾; South-Eastern, 15; Ditto, No. 3, 15; Ditto, Registered No. 4, 5; Wear Valley, Six per Cent. Guaranteed, 25; York, Newcastle, and Berwick, 14½; Ditto, Newcastle Extens., 9¾; York and North Midland, 15¾; Boulogne and Amiens, 7¾; Dutch Rhenish, 3¾; Paris and Strasbourg, 47; Tours and Nantes, 4.

Rather more business was transacted in the Consol Market on Friday, and prices advanced a quarter per cent. The Three per Cents—Money and the Account were done at 96¾ ⅞; and the Three per Cents Reduced, 97; India Bonds, 88s. to 88s.; and Exchequer Bills, 68s. to 68s premium. In Foreign Bonds and Railway Shares we have no material change to notice.

THE MARKETS.

CORN EXCHANGE (Friday).—During the present week only 990 quarters of wheat of home produce have come to hand for our market constantly. By land carriage about 100 quarters came fresh to hand this morning from Essex and Kent, in greatly improved condition, some of the samples weighing 63 lb per bushel. Although the show of samples was small, the demand for all kinds of English wheat rather very inactive, at about stationary prices. The imports of foreign wheat have rather exceeded 15,000 quarters. Good dry qua lities were mostly held at full rates of currency. In all other kinds comparatively little business was transacted. No English barley offering, and the show of foreign was but moderate. The trade ruled steady, and prices were well supported. We had rather more inquiry for malt, at fully late rates. The supply ready for delivery was small. Scarcely any English oats were brought forward. The supply from abroad was 10,790 quarters. Sales progressed steadily, and the quotations were well maintained. Beans, peas, and flour were firm, at previous rates.

ARRIVALS.—English wheat, 990 quarters; malt, 340; oats, 130; flour, 680 barrels. Foreign wheat, 10,790; barley, 1640; oats, 10,790; flour, 4950.

[illegible] 12s [illegible] ditto, white, 46s to 50s [illegible]

distilling ditto, 22s to 25s; malting ditto, 26s to 27s; Norfolk and Lincoln malt, 44s to 46s; Kingston and Ware, 52s; Chevalier, 52s to 53s; Canadian, 42s to 45s; Yorkshire and Lincolnshire feed oats, 16s to 17s; pott. ditto, 18s to 21s; Youghal and Cork, black, 14s to 15s; Limerick, Sligo, and Londonderry, 15s to 16s; Galway, 16s to 17s; Scotch, 18s to 20s; grey peas, 32s to 34s; maple, 34s to 36s; boilers, 35s to 37s per quarter. Town-made flour, 32s to 40s; Suffolk, 28s to 33s; Stockton and Yorkshire, 29s to 32s per 280 lbs.—Foreign—Wheat, red, [illegible] to [illegible]; white, 48s to [illegible] per quarter. Barley, [illegible] to [illegible]; peas, [illegible] to [illegible] per quarter. Flour, American, 21s to 22s per barrel, Canada, [illegible] to [illegible].

The Seed Market.—Canary seed is still very dull, at nearly the late decline. New tares are somewhat heavy. New white mustard seed has been disposed of at 8s per bushel. New rapeseed steady; but old parcels are dull

LIVERPOOL, Monday.—Wheat, 4s 6d to 5s 3d; Middleman and [illegible] Coriander, 18s to 24s per cwt. Brown mustard, 5s to 13s; white ditto, 6s to 8s. Tares, 3s 6d to 4s 6d per bushel. English rapeseed, £24 to £25 per last of ten quarters. Linseed, 6s 6d to 7s per quarter. Flour, 20s to 24s per barrel. Foreign, £3 15s to £7 5s per 1000. Rapeseed cakes, £4 15s to £5 15s per ton. Canary, Foreign, 40s to 42s per quarter. English clover-seed, red, —s to —s; white, —s to —s per cwt. Tares, —s to —s extra, up to —s. Foreign, red, —s to —s, extra, —s to —s; white, —s to —s, extra, up to —s. Rapeseed, —s to —s per cwt.

LONDON, Monday.—The arrivals of wheat into the metropolis are from 6qd to 7qrs of household qualities, and 5qrs of foreign, to 6s per 4 lb loaf

Liverpool Corn Exchange.—Wheat, 4s 5d barley, 2s 6d; oats, 1s 8d; rye, 1s 9d; beans, 2s 6d; peas, 1s 6d; beans, 25s 2d; peas, 26s 6d

The Six Provincial Towns.—Wheat, 43s 5d; barley, 22s 8d; oats, 18s 6d; rye, 23s 3d; beans, 25s 2d; peas, 26s 6d

Bristol.—Wheat, 4s 6d; barley, 2s 6d; oats, 1s 8d; rye, 2s 0d; beans, 2s 6d; peas, 1s 6d

Cattle.—Cattle, 1s 8d; barley, 1s 6d; oats, 1s 2d; rye, 1s 0d; beans, 1s 3d; peas, 1s 0d

Tea.—Public sales of 8000 packages have taken place this week; about 5000 sold—low qualities, with a little, at high as 11½d per lb. By private contract, a steady business is doing, and prices are well supported. The arrivals are small

Sugar.—Most kinds of raw sugar have commanded a ready sale throughout the week, but we have no advance to notice in prices. Brown lumps are still selling at 36s per cwt

Coffee.—About 1600 bags good ordinary native Ceylon have changed hands, at 41s to 42s per cwt. Plantation is quite inactive for sale.

Rice.—The article is a slow sale, and rather easier White Bengal is selling at 10s 6d to 11s per cwt.

Provisions.—We have to notice a [illegible] irish butter, at an advance of from 1s to 2s per cwt. Carlow, Limerick, and Belfast are firm, being a seller at 86s to 90s. Cork, 68s to 80s; dark, 62s to 65s per cwt English butter is firm, at full currencies. Fine Dorset, 78s to 86s; Devon, 66s to 78s per cwt. Irish, 8s to 10s per dozen lbs. Foreign butter has improved in value 2s to 4s per cwt. Fine Friesland, 80s per cwt. Prime Irish bacon is brisk at 58s, and Hambro 54s per cwt. In lard and most other articles we have no change to notice

Tallow.—Both on the spot and forward delivery, very little is doing, yet prices are supported. P. Y. C. 6 is mandlist, delivery is quoted at 36s 3d to 36s 6d per cwt

Oils.—Linseed is in request at 30l to 30l per ton. Olive and rape move off slow by but most other oils are neglected

Spirits.—Rum is in demand, and quite as dear as last week. Cognac of the best vintages of 1847 is selling at 3s 6d to 4s 6d; and inferior sorts, 2s 6d to 4s 6d per gallon. There is more inquiry for rum. the stock of which is very small. Proof Leewards, 1s 6d to 2s; Jamaica ditto, 2s to 2s 6d; Demerara, 2s 3d to 2s 6d; and Cape ditto, 2s 6d to 2s 9d per gallon. Genova dull, at 1s 6d to 2s per gallon. No change in the value of [illegible]

Hay and Straw.—[illegible] to [illegible]; [illegible] to [illegible]; £2 10s to £3 3s; old clover, £3 10s to £4 4s; new ditto, £3 5s to £3 15s; old meadow, £2 5s to £2 15s; new ditto, £2 2s to £2 8s per load.

Wool.—[illegible] bales of 50,000 have been commanded. The [illegible] is in a healthy state, and the purchases have been made [illegible] Prices are unchanged. The [illegible] is inactive.

Potatoes.—The supplies of English potatoes are large. A good business is doing in them.

[illegible] Wigan, [illegible] Belmont, 16s 6d; Haswell, 16s. Hartley, 13s, and Gardiff, 21s per ton.

Hops Friday.—On the whole the accounts at hand from the plantations this morning are favourable, intimating that the mould is said to be on the increase in some parts of the [illegible] The hare is mostly in burr, and the duty is freely booked at £250,000, some parties call it more. We have a fair demand for the finest hops at full prices. In the inferior qualities a little is doing—

Mid and East Kent pockets, £7 0s to £11 11s; Weald of Kent ditto, £5 15s to £6 12s; Sussex ditto, £4 15s to £5 12s; yearlings £4 15s to £5 15s, old hops, 16s to £2 10s.

Smithfield, Friday.—The numbers of beasts on offer in to-day's market were seasonably moderate, but the inferior quality. The primest Scots sold at a steady sale, at 3s per 8lbs. A slight improvement in the quotations—say of 2d per 8 lb—but all other breeds were dull of sale, at barely late rates, and a clearance was with difficulty effected. With sheep, both English and foreign, we were heavily supplied. On the whole, the mutton trade ruled inactive, but with no alteration in prices worth notice. In the carcase trade of the best old Lowns being 4s 2d per 8 lb. The inquiry for lambs was in a very sluggish state, at a full in prices of 2d per lb; prime Down qualities being 4s 6d to 4s 8d per 8 lbs. We had a fair sale for calves, the supply of which was good, at fully late rates. In pigs only a limited business was transacted. Milch cows moved off slowly, at from 15l to 21l each, including their small

Per 8 lb to sink the offals.—Coarse and inferior beasts, 2s 6d to 2s 8d; second quality ditto, 3s 0d to 3s 2d; prime large oxen, 3s 4d to 3s 6d; prime Scots, &c. 3s 10d to 4s 0d; coarse and inferior sheep, 3s 2d to 3s 4d; second quality ditto, 3s 6d to 3s 8d; prime coarse-woolled ditto, 3s 10s to 4s 0d; prime small Downs, 4s 0d to 4s 2d; large coarse calves, 3s 8d to 4s 0d; prime small ditto, 3s 8d to 3s 10d; large hogs, 3s 2s. to 3s 6d. inst small porkers, 3s 8d to 4s 0d; lambs, 5s 0d to 6s 6d; suckling calves, 2s 2s to 2s 8s, and quarter 3l store pigs, 18s to 30s each. Total supplies beasts, 801; cows, 122; sheep and lambs, 16,120; calves, 338, pigs, 360. Foreign: beasts, 452, sheep and lambs, 3869, calves, 156, pigs, 16. Scotch: beasts, 166; sheep 200

Newgate and Leadenhall (Friday).—Only a limited business was transacted in to-day's markets, yet prices were fairly supported

Per 8 lb by the carcase.—Inferior beef, 2s 6d to 2s 8d; middling ditto, 2s 8d to 2s 10d; prime large ditto, 3s 0d to 3s 2d; prime small ditto, 3s 4d to 3s 6d; large pork, 3s 10d to 4s 0d; inferior mutton, 2s 10d to 3s 4d; middling ditto, 3s 6d to 3s 8d; prime ditto, 3s 10d to 4s 0d; veal, 3s 0d to 3s 10d; small pork, 3s 8d to 3s 10d; lamb, 5s 6d to 6s 6d.

BUDLEIGH SALTERTON, DEVON

THE WATERING-PLACES OF ENGLAND.

BUDLEIGH SALTERTON, DEVON.

This charming resort lies about four miles from Exmouth, passing through the sequestered village of Littleham, adown Knowle Hill. Like many other resorts on the coast, it has risen from a few straggling fishing huts into notice as a Watering-place within the present century. It is built along the bottom of a small valley, inclining from north-west to south-east, with buildings rising on each side, the eastern extremity opening towards the sea. The lodging-houses or places of residence for visitors are on the summit and sides of the hills. Through the middle of the main street runs a brook of clear water, across which are two or three wooden bridges: nothing can be more primitive. The beach, which is composed solely of broad, flat, oval-shaped pebbles, extends from Otterton Point on the east, to the base of Orcombe Hill on the west, a distance of between two and three miles.

The air is light, buoyant, and exhilirating. Rain is not so frequent here as at some other places on the coast. There are hot and cold baths, and bathing-machines on the beach. From its pebbly nature, the terrace or marine parade at the south-eastern end of the town, in front of the sea, is the principal promenade. A broad footpath rises from the beach, on the western side, which will take the pedestrian over the cliffs, and to Exmouth. There is also a very pleasant walk or ride on the Exeter road, as far as Woodbury Common, about two miles distant: also, by turning off this road on the right, through the village of East Budleigh, and returning by the banks of the Otter at the eastern end of the town. In taking this road you should visit Hayes, the house in which Sir Walter Raleigh was born, still a farm-house, between Knowle and East Budleigh. About three miles eastward of Budleigh Salterton is Ladram Bay, the cool caves and rocks of which attract pleasure-parties to enjoy their romantic seclusion. Salterton beach abounds in rich pebbles; varieties of moss-agate and jasper are abundant.

TYNEMOUTH, NORTHUMBERLAND.

Tynemouth, as its name plainly implies, lies at the mouth of the Tyne, where ships receive their cargoes from Newcastle. It is much frequented in the bathing season, and some elegant baths have recently been erected here. The place has a host of historical and antiquarian associations. It has been supposed that the Romans had a post on the site of Tynemouth Castle. On the same site a religious house was afterwards erected, which was inclosed and fortified in the time of William the Conqueror. Here Malcolm, King of Scotland, and his son Prince Edward, were interred in 1094. It was twice besieged and taken during the great civil war. Considerable remains still exist both of the priory and the castle. The priory church was used as the parish church until the time of Charles II., when a church was built at North Shields; but a new one has since been erected at Tynemouth.

Scott, in his "Marmion," sings of "Tynemouth's haughty prioress;" and there are beautiful remains extant of this celebrated pile. Eastward of the old Priory Church is a beautiful Chapel of the Blessed Virgin, which has long fallen to uses which obscured its beauties and threatened them with final destruction. Latterly it has been employed by the Ordnance authorities as a magazine for gunpowder. Some time since, the Society of Antiquaries of Newcastle memorialised the Lords of the Treasury for its restoration to the officers of the parish church, and were seconded by the Architectural Society of Durham and supported by the Bishop of the diocese. This application has, it is stated in a recent Number of the *Athenæum*, been successful, possession of the interesting little edifice having been yielded as required last month. There is some hope of its now undergoing architectural restoration also.

The Castle, about one hundred yards west of the monastic ruins, is fitted up as barracks; and within its walls are a lighthouse and some modern buildings. The lighthouse lantern is 148 feet above the level of the sea.

Our Artist's View is taken from the Priory walls, and shows the harbour

TYNEMOUTH, NORTHUMBERLAND.—THE HARBOUR, FROM THE PRIORY.

with Longh's colossal statue of Lord Collingwood in the distance. This statue was engraved in No. 188 of the ILLUSTRATED LONDON NEWS; and in No. 220 is a view of the picturesque remains of the Priory.

Cullercoats, another small bathing-town, lies two miles from Tynemouth. Eight miles from Tynemouth is Seaton Delaval, formerly the seat of the Delavals, now the property of Lord Hastings. It was built by Sir John Vanbrugh, and was one of the finest mansions in Northumberland, but was, unfortunately, destroyed by fire, about twenty years ago. In the grounds is a mausoleum, besides a chapel of the time of William the Conqueror, and a fine specimen of Norman architecture.

"THE CREATION OF ADAM."

THIS figure, illustrative of the "Creation of Adam," has just been modelled by Mr. James Physick, and has obtained for him the honour of studying abroad: the decision having been given at a general assembly of the Royal Academicians, in Trafalgar-square, on the 30th ult.

The height of the figure is about seven feet. The subject is from Milton's great work:—

THE CREATION OF ADAM, MODELLED BY J. PHYSICK.

"* * * * As new waked from soundest sleep,
Soft on the flow'ry herb I found me laid
In balmy sweat, which with his beams the sun
Soon dry'd, and on the reeking moisture fed.
Straight toward Heav'n my wond'ring eyes I turn'd,
And gazed awhile the ample sky, till raised
By quick instinctive motion, up I sprung."
Paradise Lost, Book viii.

NEW CHURCH AT RUSTHALL.

THIS new Church, situate at Rusthall, near Tunbridge Wells, has just been consecrated for divine service. It is dedicated to St. Paul, and is a cruciform structure with a south porch, and a vestry on the north side of the chancel. The style is early English. The walls are very thick, and are constructed entirely of the stone of the country, from Mr. Powell's quarry. It is capable of containing 430 adults and children. The nave is internally 57 feet long and 25 feet wide, and is lighted by nine single lancet windows on the north and south sides, and two in the west end, which has also a spherical foliated window in the centre of the gable. These windows have bold splays, which are formed into trefoil heads from the springing line. The transepts are 17 feet long and 17 feet wide, and have triplet windows in each gable. The north transept has a trefoil opening to the organ gallery, and a similar doorway on the west side. The tower is 23 feet square externally, and is supported by very bold splayed piers and arches, with the addition of shafts and mouldings to that arch only which faces the east. The chancel is 27 feet long by 17 feet wide, and is raised two steps. The walls are perforated with an enriched triplet window at the east gable, and three trefoil lancets on the sides. The vestry is approached by a low moulded doorway, over which is a triplet with double shafts, forming openings to the organ gallery. All the shafts in the chancel are of highly-polished Derbyshire marble, with Caen stone capitals, bases, and neckings. The roofs are

NEW CHURCH OF ST. PAUL, RUSTHALL, NEAR TUNBRIDGE WELLS.

open throughout, and stained. The bell chamber floor is supported by carved trusses springing from stone corbels. The tower is 78 feet high. The octagonal stone turret terminates under the upper stage, and the belfry has four moulded lancelets opening on each face, with corbelled parapet. The roofs are covered with Staffordshire tiles; and quarries from the same county are used for the floor and the aisles. Minton's encaustic tiles are laid in the chancel, and the steps and borders are formed with Hutchinsonised stone. The sittings of the church are of stained deal; the pulpit is of carved oak on a stone base; the reading-desk, stalls in the chancel, the altar rail, the Lord's table, and the open screen behind the organ triplet, are of wainscot oak of characteristic design and carved. The font is of Caen stone, with carved foliage in eight compartments, and is placed on the south side of the nave to the west of the porch. The stained glass in the nave was from Messrs. Powell's manufactory, Whitefriars; and, together with the font, altar-cloth, and beautifully-designed communion plate, were donations.

The architect of this handsome church is Mr. Henry J. Stevens, of Derby, who has been assisted in the superintendence by Mr. N. E. Stevens, of Rusthall. The builder is Mr. Constable, of Penshurst.

The spire of Salisbury Cathedral is about to be fitted with the improved tubular lightning conductor, which is to be carried outside the edifice, instead of being conveyed (as at present) through the interior of the spire, by which the frame of timber work has been twice endangered from fire.

DESIGN FOR A SELF-SUPPORTING VILLAGE.

THE SELF-SUPPORTING VILLAGE.

THE above is a Sketch and plan of the Church of England Self-Supporting Village, designed by Mr. J. Minter Morgan. It is intended to "promote the religious, moral, and general improvement of the working classes, by forming establishments of three hundred families, and combining agricultural and manufacturing employment for their own benefit." Mr. Morgan's plan is to raise a fund of £50,000, by donations or shares, or by loans, to bear an interest of 5 per cent, till the whole is paid off; to rent about 1000 acres of land; to build in the form designated in the Sketch, inclosing an area of 34 acres, 300 cottages, each containing four rooms, and to furnish them; to build a church, houses for a clergyman and a director, lecture-room, dining-hall, and kitchen; school, store-house, infirmary, dwellings for schoolmasters and mistresses, for the surgeon, secretary, &c.; to provide farming establishment, bailiff's house, workshops, tools, &c.; and support for the establishment for the first year.

Over the entrance-gate, in the middle of the side to the left, is a large committee-room, and apartments on each side appropriated as lodging-rooms for the visiting committee and for strangers. Passing from the gate to the right, the infirmary and surgeon's house occupy the corner in the foreground. In the middle of the side (in front of the Sketch) is the clergyman's house, with a garden behind it, and a pathway to the church. The next angle is occupied by the infants' and girls' school. In the middle of the next side is the hall of assembly. In the next angle is the boys' school, library, and lecture-room. The governor's house is the large building opposite the clergyman's. In the fourth angle is the store-house and storekeeper's residence. The centre building is a kitchen and dining-hall, for those who do not like to dine in their own cottages. In the distance the spectator sees buildings for carrying on shoemaking, hat-making, carpentering, smith's work, &c., a laundry, a bailiff's house, and farm buildings, a mill, &c.

That the gentleman who has designed this self-supporting village means well, we have no doubt; that he is extremely benevolent, is the general belief; that his plan has met with the approbation of the Bishops and managers of the Herrnhuters, of the prime minister of Saxony, of the benevolent Baron Von de Recke, near Dusseldorf, of Monsignor Corboli Bassi, and of his Holiness the Pope, we devoutly believe, on Mr. Morgan's assertion; and that it has received the sanction of many prelates and clergy of our church, and of some members of Parliament, their names to the prospectus amply testify.

Nevertheless, we cannot say that it looks well, even on paper. It resembles a prison, rather than a village—a barrack, rather than the dwellings of individuals. It looks more like a lunatic asylum, than the ordinary abodes of rational men. It reminds us of Bridewell, or some contrivance for central inspection, not of the sunny or shady lanes in which the rose and honeysuckle-decked cottages of our native land are so happily nestled. That they are neither so well built nor so well furnished as they ought to be—that they are frequently unhealthy and inconvenient, as well as sometimes unsightly, we admit; but we hope they may be improved. We know, in fact, that, in many cases, they are improved; and it is quite possible that their inhabitants may obtain higher wages, more comforts, and greater independence, without quitting the sheltered nooks and corners of our valleys to be shut up in barracks under the command of a governor, like soldiers. Besides, the scheme is not calculated to improve the condition of our peasantry, it is not intended to increase their wages; it is rather to take the supposed destitute from the towns and plant them in colonies on the land, to the still further deterioration, if possible, of the condition of those who now dwell there.

Nor do the moral features of the scheme accord so well with village life as with prison discipline. The governor and clergymen planted in their respective central positions, the gate of entrance, the visiting committee's-room, the hall of assembly, all indicate control, oversight, restraint, coercion, drilling—not the free development of human nature. The idea of so fashioning villages is obviously borrowed from the unsuccessful efforts of the State to correct the people by bridewells, workhouses, and prisons—substituting a gentler kind of control for meagre diet, whips, dungeons, and fetters. Nor has it even in this subordinate view, the merit of originality. It is a poor imitation of Mr. Owen's plan, substituting a square for a parallelogram, and invoking the aid and guardianship of the clergy and the Christian religion, which Mr. Owen rejected. His plan, too, for society at large was an imitation of a factory, less the freedom enjoyed by the boys and girls when at work.

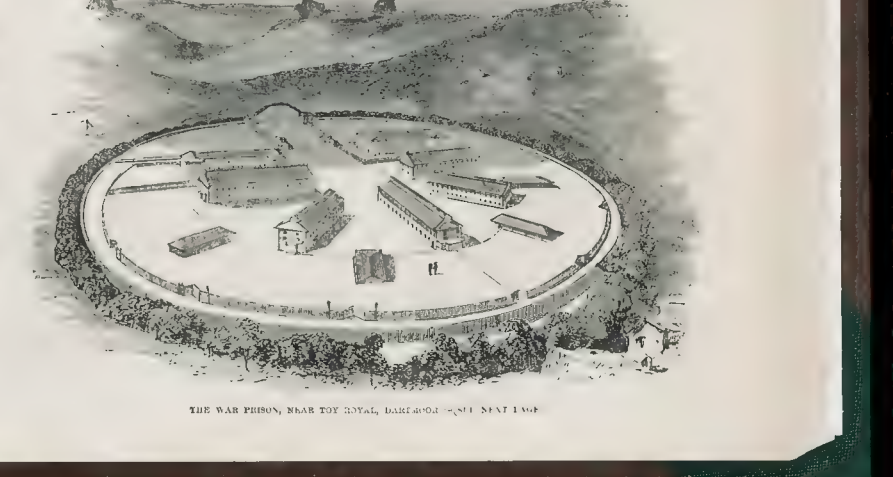
A single phrase is sometimes a better clue to an author's meaning than an elaborate description. In a note appended to the prospectus, it is said, "it would be desirable that an uniformity of sentiment and feeling should prevail in each establishment," to lead, of course, to an uniformity of manners and morals. In fact, Mr. Minter Morgan does not conceal his desire to organize the "destitute people" and the whole society in Reductions (formal villages) similar to those by which the Jesuits drilled the Indians in Paraguay, and made them fit for the despotism and desolation of Dr. Francia. To produce a similar and uniform condition of society in England is avowedly the object of collecting villagers into uniform squares, with perfectly similar and uniform dwellings, save those of the governor, the clergyman, and the visiting committee. To this end, there is to be one system of instruction, discipline, and employment for all, to the exclusion of competition, regulated and overlooked by the governor and the clergyman. All who enter the self-supporting village are to be forcibly adapted to it, and such as are not adapted may be dismissed by the directors as incorrigible. The scheme is as much at variance with the mind of man as the asylum-like look of the place is different from a smiling village. Mankind are no more created similar and uniform in sentiment and feeling, than they are in height and colour; and the project of dooming them to an oyster-like level of morals and manners, is as foolish as a project to cut and squeeze every man to the same size.

Such schemes, however, purporting to be for the benefit of the people, and addressed to those who are too often a prey to hunger and want, are occasionally very captivating, and hence, after the failure of New Harmony, and scores of similar projects, there was still a fund of credulity sufficient to supply dupes for Snig's End. So, in France, the failure and disgraceful squabbles of the St. Simonians only fired the zeal of Cabet, and hastened the establishment of Icaria, inflicting much suffering on his disciples. We may, perchance, therefore, render some service by pointing out one or two of the economic errors of such schemes, and warning the too easily deluded against wasting their resources and their hopes on bubbles which gleam only to betray.

The prospectus is not very clear, and therefore we are not certain whether Mr. Minter Morgan proposes actually to bestow on "the destitute people" he is to collect in his village any of the £50,000 to be gathered by donations, or not. So far as he is to collect money from the rich to be given to the poor in the shape of furnished cottages round his square, the scheme is one merely of alms-giving with a peculiar object, and is only one of a thousand similar schemes that have helped to keep the great masses in dependence and pauperism, by undertaking to provide for their wants. So far as he is to lend the capital he collects to them, making them pay interest for it, and pay the salaries of their governor, surgeon, clergyman, schoolmaster, &c., it is only a peculiar employment of capital, which Mr. Morgan alone fancies will be advantageous.

As the interest of money is very low, and as there are a great many persons anxious to employ spare capital in an advantageous manner, and yet never think of employing it as Mr. Morgan recommends, the presumption is that his recommendation will not be profitable; in other words, the people whom he proposes to tempt into his village really produce more and gain more by their present employment, than they would by following his lead. Stripping the scheme of all disguises, it is a mere plan to give a forced direction to capital and labour.

Then comes the question, can it be more for the advantage of the people to direct their labour towards the construction of Mr. Morgan's square, with a rent for the governor, &c., than to direct their labour as at present, according to their own views, and under the general laws that regulate society? Do the mass of the people know better than Mr. Morgan how to employ their labour and capital, or know what is for their own interest? He proposes, like a great number of statesmen, to give a new direction to a certain portion of capital and labour, fancying that he knows better how to direct them than the people themselves. It is the error of Corn-law legislators in another form. As long as Mr. Morgan could not remove his self-supporting village from the control of the civil magistrate, and it must pay, like every other portion of the land and labour of the community, a fair share of all national and local burdens, and must pay as rent a fair interest on the capital invested in the land, he would subject his villagers to payments for a governor, a clergyman, and a great variety of officers over and above all those who conduct the government of society and perform the services of religion. It is a scheme, in fact, for ex-



THE WAR PRISON, NEAR TOY ROYAL, DARTMOOR (SEE NEXT PAGE

tending the Government and the Church, after a peculiar and most restrictive [illegible] Mr Morgan briefly fails to explain how further inducting labour for that purpose can be beneficial to the labourers.

Mr. Morgan proposes "rigidly to exclude competition and a spirit of rivalry from his proposed Christian colony. It is this *pernicious* principle of competition," he says, "that has been the great impediment, both in Protestant and Roman Catholic countries, to the existence of vital Christianity." Mr. Morgan, therefore, is the declared opponent of competition; and as he cannot point out any regulation or any institution, whicl, introduces competition into society, he must be acting contrary to the natural constitution of society rapidly to exclude competition. He is a true socialist, not on the principle of its growth, but on the principles of Mr Morgan. While he demands additional payments from his labourers, for governors, secretaries, &c., he deprives them of the motives which stimulate exertion. He would make them poorer, and exact more from them. He assumes that their labour, in the villages where there would be no competition, would be more productive than the ordinary labour of competitive society. His assumption is contradicted by experience.

With a climate equal to any in the world, and with a soil unsurpassed in fertility, Paraguay, the seat of his model society, where everything was regulated, has become a desolate waste; while the United States have grown, under the influence of competition, to be a mighty empire. In Paraguay, a few weak and simple-minded beings, uniform in sentiment and feeling—very much, too, under the influence of the Jesuits—were driven through an oyster-shell existence, and then sunk into the grave, knowing no more, and being no more known, than the monkeys of their forests. In the United States, millions of active and intelligent beings are converting a waste into a happy abode for freedom and intelligence. Doing the will of their Creator, they are rearing in a mighty [illegible] and subduing the material world to their purposes. To them Nature [illegible] revealed some of the grandest of her secrets They taught the rest of mankind to bring the lightning from heaven; and they, as Sir D. Brewster told us at the opening of the British Association at Edinburgh, have taught us how to calculate the exact length of the day of a planet that was probably destroyed before man existed. They employ the steamboat to carry them from one end of their country to the other; and they use the lightning for their messenger. All this they have done under a keener competition than exists elsewhere in the world; yet Mr. Morgan, with a painful blindness to these facts, denounces competition, and prefers the system of Paraguay to that of the United States

He would reduce, too, our varied, and glorious, and expanding society—four glorious it is, notwithstanding many defects—to the level of an Indian tribe brought under subjection by the united influence of the sword and supernatural terror. Banishing competition, he would make all men no better than monks, and send us back to the uniform sloth of the plaster monastery. At the same time he injures and destroys the noblest principle by which man can be impressed, and, describing it as opposed to competition, which is as much a part of society as the hands and legs of man

We should extend our remarks no further, were we to notice half the errors and foolishnesses of the Self-Supporting Village scheme—as if every village, or rather every man who now honestly pays for what he consumes, were not self-supporting and must consent ourselves with these few remarks. We regret to see the names of many of the clergy announced as supporters of such a foolish scheme For them to countenance it, betrays an uneasiness and a readiness to promote silly changes foreign to their character, which can only be detrimental to their interests and their influence.

DEVONSHIRE is famed for its cider and clouted cream. Every writer on the agriculture of this county has recorded the little attention paid by its orchard cultivators to the fermentation of the expressed juice of the apple, or a due attention to which forms the chief flavour of cider depends. Whilst in Devonshire during the late meeting of the Royal Agricultural Society, we took every opportunity of ascertaining what was the general character of this celebrated local tipple, we found, however, as [illegible] Farmers, as to render a detailed description impossible. From information we had previously received, we were prepared to meet with an article different from that exported to the various large cities and towns of the empire—the exported being designated as "sweet," in contradistinction to that locally consumed, which is termed "dry" cider. In our imagination we were anticipated to find that, with one exception, the dry cider was something sim- ar to the *dry* wines of the Rhine, but we regret to state that all which fell in our way was either vapid, or, if astringent, it was due to the alcohol having been converted into vinegar. Both these faults might be remedied by a careful attention to the process of fermentation—for we tasted some of excellent "*bouquet*," but of deficient strength.

From these remarks it will be perceived that we are no admirers of the bulk of the home-made "undoctored" ciders, so emphatically praised by native Devonians. The fact is, fermentation is a most delicate process, requiring constant attention and care—so much so, that the necessary superintendence is only remunerative when carried out on a large scale, and cannot be given in the management of the produce of the majority of orchards. For this reason we are Goths enough to give a preference to the cider manufactured by dealers—even at the risk of having it "doctored" which, we believe, is nothing more than using a little sugar occasionally, to give the cider strength when, as sometimes happens in cold summers, the apples are deficient in the saccharine material

We must confess to enjoying a glass of cider (we presume, home-made), free from the defects alluded to, at the hospitable *fête champêtre* of Mr. J. Pyke Archard, Bart., M.P., at Killerton. It ought, however, to be remarked, that at Killerton and its vicinity there are irruptions of volcanic ash amongst the pervading red sandstone rock—a circumstance which, we believe, is invariably found to increase the quantity and quality of cider in a manner unknown with those occupied by the best orchards in the counties of Hereford and Worcester, viz on the confines and marks of the old red sandstone

The value of cider varies from £2 to £4 per hogshead, but the greatest portion does not fetch above £2 10s The average produce is said to be ten hogsheads per acre.

Clouted or scalded cream is not only used in Devonshire as a table luxury, eaten with tarts, &c., but is also the preliminary operation in manufacturing butter. This mode of preparing milk for butter-making is peculiar to the West of England. The milk as soon as it is drawn from the cow, is strained into shallow pans, in each of which about half a pint of water is previously placed; in winter, the same quantity of boiling water is used. The water is to prevent the purpose of obtaining cream for table use or butter-making. In cold weather, it is allowed to remain in the dairy undisturbed twelve or [illegible] four hours. In sultry weather, the morning's milk is scalded in the evening; in cool weather, it would be retained until the following morning, and scalded with the previous evening's milk.

The scalding is variously performed, but is generally done over a small charcoal furnace; sometimes on a clear wood fire; better than either, by means of a water-bath. By the first plan, the pans are placed on the iron plate which [illegible] the furnace, and moved slowly towards the fire, so as *gradually* to increase the heat of the milk. This usually takes from 40 to 50 minutes—too much or too little frequently a cause of failure with persons unaccustomed to the practice. The period of removing the pan from the fire is indicated by the appearance of small bubbles under the *head* of cream, giving the surface a dimpled appearance. The temperature should be kept at 180° Fahrenheit, which is 32° below the boiling point: if the heat should rise to the latter, the cream formed at the top becomes broken and injured for the purpose. When the milk is removed from the fire, it is replaced in the dairy, and care taken to preserve the surface of the cream unbroken. It is skimmed from 12 to 36 hours after, and the cream sold in that state, or made into butter. A much better plan of obtaining cream than either of those above enumerated, would be to heat the milk in a water-bath, the bath being heated by means of a steam-pipe from a steamer in an adjoining apartment, from which it could be conducted by means of a leaden pipe, having a valve attached to it, to heat the cream off, or let it on, at pleasure By this means, with the aid of a thermometer, the milk could be kept at any desired temperature during any part of the operation. This system would also be found more economical, particularly in large dairies, as by this means a trough (the water bath) of any capacity can be heated; and, if found desirable to divide this into compartments so as to economise heat at periods of the year when cows cease to give a full flow of milk, very little mechanical ability is required to so subdivide it. By using a wooden trough of this description as a bath, and employing zinc or glass milk pans, with perforated dressers to each, the process will nearly approach perfection. There exists in the West of England a prejudice in favour of butter formed from scalded cream: that it yields a larger per-centage of solid matter from a given quantity of milk, and with less labour in churning, we are willing to concede, but that it is of equal flavour with butter formed from fresh cream, or that it will keep so well as the latter, we totally deny; the exact weight of the butter formed by the scalding process is owing to the unexplained albumen which is formed in heating the milk, which becomes incorporated with the butter, thus adding to the weight but injuring the quality. Whilst we, in some degree, condemn the practice of making butter from scalded cream, we must wonder that this delicacy in various forms might be much more generally used at table. We have no less authority than that of "The Friar of Orders Grey," that he enjoyed "Good fat pullet and clouted cream," a dish with which Mr. Sayer omitted to grace the tables at the Agricultural dinner at Exeter, but which we opine would have given more satisfaction to epicurian palates there assembled than the sight of the huge "baron" or "sirloin" of agricultural beef. Should this effusion of the culinary muse take his final leave of the Reform, perhaps he will take this hint, and astonish its members by some new sauces, compounded of clouted cream, oyster, lobster, crayfish, shrimp, &c., instead of the quasi quart compounds of grease, flour, and water, which are often designated by the above titles. We pledge ourselves that such compounds would immortalise him amongst gourmands, and for a name might be termed "Soyer's Ambrosia," a fitting accompaniment to "Soyer's Nectar," or the fame of "Exeter Sauce" to the opponent of cider and clouted cream.

The climate of Devonshire varies greatly according to situation, as will be perceived by comparing the two following registers—one kept at Ilfracombe on the British Channel, and the other at Oakhampton near the foot of Dartmoor, elevated about 200 feet above the level of the sea:

	Jan.	Feb.	March	April	May	June	July	Aug.	Sept.	Oct.	Nov.	Dec.
Ilfracombe	53	45½	52	57½	62½	64½	69	69	64½	60	54½	50½
Oakhampton	34½	36½	41½	45½	50½	54½	62	61½	57½	49½	41	37½
Difference	18½	11½	10½	14	11½	9½	7½	7½	6½	10½	13½	13

A reference to the above will at once shew the great difference that must exist between the value of two farms so differently placed in respect to climate, even if in all other respects they were alike in quality of soil. The difference in climate here noticed, which is so much greater than that which is due to elevation, is owing to the proximity of Oakhampton to the extensive moors and mountains of Dartmoor. The latter, from their great height, attract much rain, which being retained in the spongy peat soil of that district, continually diminishes the temperature by absorption of heat consequent on the evaporation of so much moisture.

In a county so extensive as Devonshire, occupying 1,654,400 acres, it may be expected to find a great variety of soils. It is generally estimated that 1,200,000 acres are arable, pasture, or meadow land, and that 454,000 acres remain in an uncultivated state: of the latter, the greater portion is to be found in the vicinity of Dartmoor and North Deven. The soils of Devonshire, like those of Cornwall, have considerable reference to the rocks on which they are placed, so singularly, however, do they vary in some parts, that a person interrogated with such other, that, without a map, it is almost impossible to give a detailed account of the boundaries of each district, a minute description of which would occupy much space, and at the same time be tedious

The South Hams district includes the whole of the south of Deven, extending from Tagginouth through Ashburton to Beesalston, with a northern prolongation to Tavistock: there exists a small portion of Dartmoor within the limits here named. The rocks that constitute this part of Devonshire consist of clay, slate, limestone, and the volcanic product, so often noticed in Cornwall, called diestone; whilst in the vicinity of Tavistock there are several irruptions of greenstone: over a considerable extent of this district trap-rocks, intermingled with trappian ash, are to be found, the decomposition of which has formed some of the most fertile soils in Devon. Of this neighbourhood it is remarked, by Sir H. De la Beche, "that it would appear as if trappean ash had been thrown out abundantly from some vent or vents between Petherwin and Tavistock, this ash being accumulated in great thickness about Milton Abbot (probably the cause of the celebrated rich grazing lands of this neighbourhood) and other adjacent places. Volcanoes seem to have ejected molten matter and ashes during the formation of the Petherwin rocks and of those which immediately followed, so that large quantities of ashes must have been interstratified with trappian ash, are to be found, the decomposition of which has formed some of the most fertile soils in Devon." Of this neighbourhood it is remarked, by Sir H. De la Beche, "that it would appear as if trappean ash had been thrown out abundantly from some vent or vents between Petherwin and Tavistock, this ash being accumulated in great thickness about Milton Abbot (probably the cause of the celebrated rich grazing lands of this neighbourhood) and other adjacent places. Volcanoes seem to have ejected molten matter and ashes during the formation of the Petherwin rocks and of those which immediately followed, so that large quantities of ashes must have been interstratified with each other, that, without a map, it is almost impossible to give a detailed account of the boundaries of each district, a minute description of which would occupy much space, and at the same time be tedious

The South Hams district includes the whole of the south of Deven, extending from Tagginouth through Ashburton to Beesalston, with a northern prolongation to Tavistock: there exists a small portion of Dartmoor within the limits here named. INDIA OVERLAND MAIL.—DIORAMA GALLERY of ILLUSTRATION, 14, REGENT STREET.—Additional Pictures, MARRAT and HOSKINS'S MOVING PANORAMA, ILLUSTRATING the ROUTE of the OVERLAND MAIL to INDIA, from Southampton to Malta and Alexandria, is now OPEN DAILY at Morning, Twelve; Afternoon, Three; Evening, Eight. Admission, 1s.; Stalls, 2s. 6d.; Reserved Seats, 3s. Doors open half-an-hour before each representation.

THE NILE.—Important Additions to this Panorama.—The Nubian Desert from the Second Cataract to Dongola.—Mr. Banne by Twilight. March of Caravan by Moonlight. Morning Prayer. The Mummy of a High-Priest is added to the cast in since Both hands of the river are shown in the fine painting EGYPTIAN HALL, PICCADILLY. Daily at 2 and 8. Admission, 1s.; Pit 2s., Stalls, 3s. Children and Schools, Half-price.

ROYAL POLYTECHNIC INSTITUTION.—During this week the ALPINE SINGERS from Styria will perform daily at Four, and in the Evenings at Half-past Eight. LECTURE on CHEMISTRY, by J. H. Pepper, Esq. LECTURE by Dr Bachhoffner on VOLTAIC ELECTRICITY. NEW SERIES of DISSOLVING VIEWS daily at Half-past Four, and in the Evenings at a Quarter to Ten. Also a Series, exhibiting SCENES in the ARCTIC REGIONS and ILLUSTRATIVE of the Art of DIVER and DIVING-BELL, &c.—Admission, 1s.; Schools, Half-price.

EXHIBITION OF 1851.

NOTICE to EXHIBITORS is hereby given, that her MAJESTY'S COMMISSIONERS have fixed the 31st of OCTOBER next as the LAST DAY for RECEIVING APPLICATIONS for SPACE from the different LOCAL COMMITTEES of the United Kingdom, the Colonies, and the Channel Islands. Intending Exhibitors failing to give due and sufficient notice to the nearest Local Committee, cannot be assured that their claims for space will receive any consideration.

August 17, 1850. M. DIGBY WYATT, Secretary.

GEOLOGY.—Elementary Collections, to facilitate the study of this interesting Science, can be had, from Two Guineas to Fifty, of J. ADAMS, F.G.S. Mineralogist to her Majesty, 149, Strand, London. Mr. Tennant also gives Private Instruction in Mineralogy and Geology.

A TUTOR FOR COLLEGE.—A Clergyman, M.A., late Fellow of his College, and a University Examiner, residing not far from London and receiving only Two Pupils, has Two vacancies for Gentlemen proposing to read with him. Several of his Pupils are now in each University, to whose friends references will be given, as to his success in bringing forward Distinguished Scholars and Clergymen in Oxford, Cambridge, and London Academics, cannot be assured that their claims for space will receive any consideration.

GUYS.—The MEDICAL SESSION COMMENCES on TUESDAY, the 1st of OCTOBER.—The Introductory Address will be given by BRANDY B COOPER, Esq., F.R.C.S. Gentlemen entering for the Winter Session only must give satisfactory testimony as to their education and conduct. They are required to pay £20 for the first year, £10 for the second year, and £10 for every succeeding year of attendance; or the sum of £100 in one payment will entitle a Student to a perpetual ticket.—Dressers, Clinical Clerks, and Resident Obstetric Clerks are selected, according to merit, from those students who have attended a second year.—Mr. STOCKELL, Apothecary to Guy's Hospital, is authorised to enter the names of Students, and to give further information, if required.

CLERICAL, MEDICAL, and GENERAL LIFE ASSURANCE SOCIETY.

NOTICE is hereby given, that the usual DIVIDEND of FIVE PER CENT (less income-tax) on the paid up capital or Shares of the Society, will be payable at this Office on and after Tuesday, the 10th day of August next.

An ADDITIONAL AMOUNT, just obtained enables the Society to give IMPORTANT BENEFITS to PERSONS now ASSURING, the particulars of which are set forth in a REPORT, which may be had at the head office or any of the Society's Agents, or by applying to

GEO. H. PICKARD, Resident Secretary.

99, Great Russell-street, Bloomsbury, London.

ROYAL HOTEL, WEST CLIFF, WHITBY, is now open for the season. Situate on the West Cliff, Whitby, and commanding the finest Bridge of the county of York, combining extensive and magnificent sea and inland views, is now open under very efficient management. The Hotel is replete with every comfort and convenience, and no exertions will be spared to render it in all respects worthy of the patronage of those who may honour it with their support.

The town of Whitby is a particularly healthy and delightful watering-place, the surrounding country is unrivalled for its romantic scenery, whilst its antiquarian and geological features render it also interesting to the literary and scientific.

Whitby enjoys the advantage of a railway communication with all parts of the Kingdom. An omnibus belonging to the Hotel attends at the station on the arrival and departure of each train.

Royal Hotel, Whitby, 12th July, 1850.

PAPER-HANGINGS.—COTTERELL BROTHERS, 800, New Oxford street (a few doors from Holborn), beg to direct attention to the superior character of their PAPER-HANGINGS, comprising the very best designs of the day, both French and English. A stock of from 20,000 to 50,000 piece is always on hand, so that they can supply any quantity, of every grade, class, and colour, for immediate use. Parties in the country should write for the Table to measure rooms, which, with a specimen of Cotterell's celebrated Penny Paper for bedrooms, will be sent post-paid on receipt of two postage stamps. COTTERELL'S PATENT ANAGLYPTIC for Dados designs for walls and ceilings are well worth the inspection of persons of taste. The New Wholesale and Export Paper Hanging Warehouse, No 20, a few doors from Holborn, also at Bristol and Bath.

DECORATIVE PAPER-HANGING MANUFACTORY and GENERAL FURNISHING ESTABLISHMENT, CARPET and FLOOR-CLOTH WAREHOUSE, 451, Oxford-street.—T. ARCHER solicits an inspection of his extensive Paper-Hangings (made by his patented invention), fitted up on the walls of the show-rooms in the manner of Show-rooms in Paris, to display the style of artistic arrangement, and for every kind of room. In addition, the rooms are furnished with superior Furniture (marked in plain figures the price), giving at one view a drawing-room fit for reception Bed-room and other Paper-hangings, 4d. per yard. French and other Foreign Hangings of the first taste. Brussels and Tapestry Carpets, at 8s to 3s 6d per yard. Best warranted Floor-Cloth (8 yards wide), cut to any dimensions, 3s 3d, 3s 6d, and 3s 9d per yard.

CARPETS.—BRIGHT and CO.'S PATENT VENTILATING BRUSSELS CARPETS are strongly recommended to the Trade and the Public on the following grounds:—They are woven by Steam Power, and are, therefore, more firmly made than can be done by hand-weaving goods which have the same good quality of Worsted throughout; whereas in the common Brussels all the colours are generally made of an inferior Worsted. They are printed by a patent process, and by patent machinery; and the colours are more durable, and will stand more severe tests than those of any other description of carpet. The patent printing admits of almost unlimited variety of shades or colours, patterns are, consequently, always in proper scale for the size of the room they are to be allotted at a price about 20 per cent. below that of goods of equal quality made in the ordinary mode. In quality, in pattern, in variety of colours, and in price, the Patent Power-loom Brussels Carpets offer great advantages to the Public.—Bright and Co., Pelmonde, 36, Skinner-street, Snowhill, London; 32, New Brown-street, Manchester.

NEW BOOKS, &c.

NEW MUSIC.

NEW SONGS.—"THE RICH MAN'S BRIDE," "THE EXILE'S FAREWELL," "THE STRANGER'S GRAVE." Price 2s. each, sent postage free

These songs are the production of "Will you love me then as now," &c. They form a series of charming compositions, and are exceedingly graceful and effective. "The Rich Man's Bride" will be an immense favourite; but the sweetest song, as more of a very superior description, and calculated to render it a permanent fave ante.

London: DUFF and HODGSON, 65, Oxford-street.

NEW POLKA.—The VERY LAST POLKA, by [illegible]

The original and characteristic polka performed by J. Wallpert's band at her Majesty's last state Ball, June 28, at Buckingham Palace, was one of the most effective and attractive compositions of the night. It is supposed to be the last dance at the ball, and is descriptive of the clock striking, regret at parting, revolution of preparing the last set the last merry tune. The pianoforte copy is exceedingly well adapted to dance to.—London: DUFF and HODGSON, 65, Oxford-street.

THERE'S A POWER CAN CONQUER THE SWORD! Song and Chorus. Composed by ALEX. LEE. "Oh, sacred as a Mother's Tears, composed by G. Linley. "Le Secret" (The Secret). Ballad, composed by F. Berger. "The Lament of those Eyes" Ballad, composed by Alex. Lee. "The Merry Peasant" Invited Ballad, composed by J. Blewitt. "The Standard Polka," (Hymn), composed by Alex. Lee, and "The Family Polka," composed by Henry Rose. The whole of the above New and Original Copyright Music is contained in the Second Volume of the FAMILY FRIEND, just published. In addition to the Music, the volume contains Fifty Pages of Reading and Fifty Pages of Illustrations, also elegantly printed, and elegantly bound. Price 9s 6d; or, post free from the Publishers, Messrs. LONSDALE HOULSTON and STONEMAN, 65, Paternoster-row; and all Booksellers.

LA FLEUR DU BAL; Waltz by F. G. CALLCOTT. A graceful waltz, "the melody of which is exceedingly pretty" (See "Musical Review," Aug 17). Also, the MAGNET POLKA, by the same composer. "Mr. Callcott has shown much musical fluency, a vigour of thought and execution in the above publications."—See "Musical World," Aug. 17.

Published by C. JEFFERYS, 21, Soho-square, and Co., 201, Regent-street; and 67, Cornhill-street.

LE PROPHETE, as performed at the Royal Italian Opera, with Pianoforte accompaniment; folio edition, with Italian words, complete, 42s.; quarto edition, 20s. Various arrangements for Pianoforte, at slight reductions, by the Pianoforte, by Calkott, Osborne, Benedict, Richard, Burgmuller, Herz, &c. From 2s. to 6s. each.—CRAMER, BEALE, and Co., 201, Regent-street.

PIANOFORTES. CRAMER BEALE, and Co. have a great variety of New and Second-hand PIANOFORTES, including Grands by Erard and Broadwood; also, Cottage Pianofortes, from three-guinea cottages to the most elegant. All instruments are warranted, and may be exchanged if not approved of 201, Regent-street; and 67, Conduit-street.

PIANOFORTES, 25 Guineas each.—The ROYAL PIANOFORTE of D'ALMAINE and CO. combine all the latest improvements of construction with richness of tone and elasticity of touch. They possess that regularity of form and unfinished beauty of workmanship, are unsurpassed by the varied effects of temperature, therefore admirably adapted for India and extreme climates, and recommended by the most eminent musicians. Manufactured in mahogany, rosewood, maple, zebra, satin, and walnut woods, at 25 Guineas each

D'ALMAINE and Co., 20, Soho-square. Established 1780.

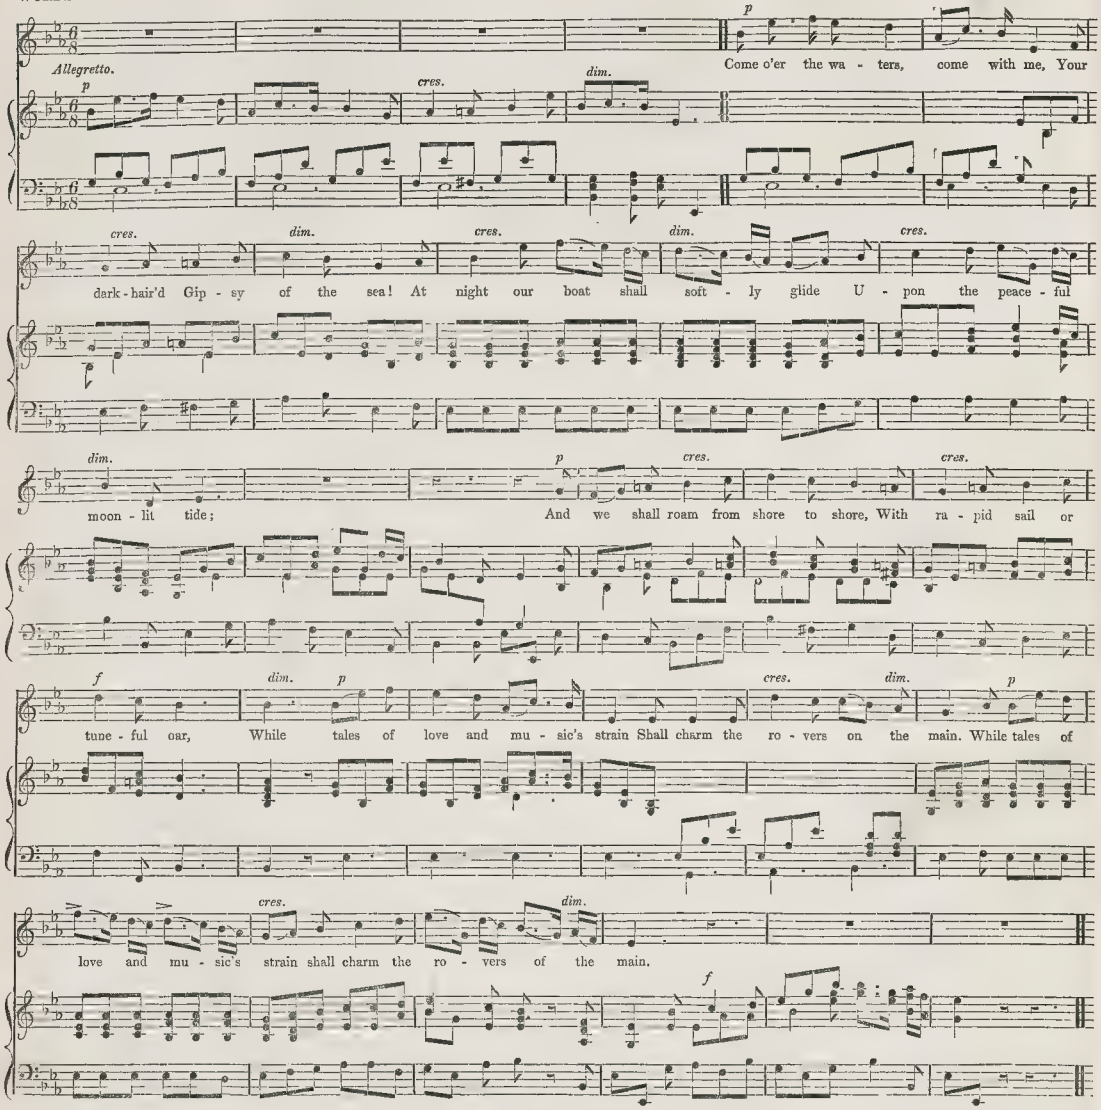
Also Fashionable Coloured Shirts, Six for 41s or very best, made to measure, Six for 45s. Sent free to any part of [illegible] Regent-street.

THE DARK-HAIR'D GIPSY OF THE SEA.†

WORDS AND MELODY BY S. N. ELRINGTON, Jun. ARRANGEMENTS BY PROFESSOR SMITH.



Allegretto.
Come o'er the wa - ters, come with me, Your
dark-hair'd Gip - sy of the sea! At night our boat shall soft - ly glide U - pon the peace - ful
moon - lit tide; And we shall roam from shore to shore, With ra - pid sail or
tune - ful oar, While tales of love and mu - sic's strain Shall charm the ro - vers on the main. While tales of
love and mu - sic's strain shall charm the ro - vers of the main.

† The Gipsies and Pirates of the Archipelago flock together in large bodies, and, lying in boats, pass their days and nights floating from sea to sea. They never venture out unless the wind is fair and the waters are tranquil. They worship the Great Spirit of the winds and seas, and often freight a boat with shells, fruit, and flowers, as an offering to him. One of the most beautiful and daring of these female Gipsies loved a brave young Pirate of the Archipelago, and thus addresses him:—

Come o'er the waters, come with me,
Your dark-haired Gipsy of the Sea!
At night our boat shall softly glide
Upon the peaceful moonlit tide;
And we shall roam from shore to shore,
With rapid sail or tuneful oar,
While tales of love and music's strain
Shall charm the rovers on the main

Calm as a lovely swan shall float
From isle to isle our Grecian boat;
And when our fleet returns to land
We'll banquet with the Pirate band;
And when the festive cup goes round
Your dark-haired maiden shall be found
More light of foot, more swift in song,
Than any of our Gipsy throng.

And we shall gather shells and flowers
From pearly sands and summer bowers—
A beauteous tribute to appease
The Spirit of the winds and seas;
And as we gaily glide along,
With gentle breeze and merry song,
You'll sing some barcarolle for me,
Your dark-haired Gipsy of the Sea!

MUSIC.

Concert for the Italian Refugee Fund.—St. Martin's Hall, on Monday night, was crowded to excess, and a large sum will be realised for the unfortunate refugees. The vocal attraction was very great, and such was the enthusiasm of the audience, that nearly every piece was encored, the concert lasting until past midnight. The accompanyists were Signori Schira, Bellini, Pinsuti, and Biletta; the solo instrumentalists were Mdme. Goffric (piano), Signor Briccialdi (flute), M. Sainton (violin), and Signor Piatti (violoncel.o). Grisi sang the cavatina "Que la voce," from the "Puritani," to perfection, her cadenzas were in exquisite taste. Madame Viardot delighted the auditory with her Spanish airs. Mario was in his finest voice, and sang the air from Mercadante's "Guerraneho" superbly. Madame Castellan, Mdlle. de Meric, Signori Gardoni, Baucardé, Coletti, Tamburini, Tamberlik, Ciabatta, Maralti, Massoi, Mei, Tagliafico, Ronconi, and Herr Formes also afforded their valuable aid. The trumpet duo from the "Puritani," sung by Ronconi and Formes, created a great sensation.

Musical Events.—Evening concerts will be given at Manchester on the 2d and 6th of September; and at Liverpool, on the 3d and 5th; Shrewsbury, on the 4th; and a morning concert at Harrowgate on the 7th, at which Mdlle. Parodi, Mdlle. De Meric, Signori Gardoni and Coletti, will sing, and M Vivier perform.——Madame Sontag, Signor F. Lablache, &c., will commence a provincial tour in the west of England, next week.——Madame Sontag has been engaged for the winter by Mr. Lumley.——Medame Frezzolini, Mdlle. Alboni, Signor Gardoni (and possibly Herr Formes), are engaged for the Italian Opera winter season at Madrid.——Mdlle. Angri is in negotiation for Vienna.——Madame Grisi, Mdlle. de Meric, Mdlle. Corbari, Mario, Tamburini, Coletti, Tagliafico, Polonini, and Tamberlik, are engaged for St. Petersburgh, for the winter season.——Mdlle. Steffanoni, Madame Vietti, Salvi, and Marini have been very successful at the Italian Opera, at the Castle Garden, New York.——Mr Sims Reeves is engaged for the Italian Opera in Paris, in November.——Madame Viardot will recommence her engagement at the Grand Opera in Paris, in October.——There was a brilliant attendance at the last entertainment for the season of Mr. John Parry, at the Music Hall, Store-street, last Monday.——Bellini's "Norma" has been successfully performed this week, at the Surrey Theatre, with Mdlle. Nau as the *Priestess*; Miss Anne Romer, *Adalgisa*; Mr. Travers, *Pollio*; Mr G. Tedder, *Flavio*; and Berrani, *Oroveso*.——Meyerbeer's "Prophète" is in preparation for the Grand Opera in Brussels; the work is very popular at Aix-la-Chapelle and Frankfort. Antoine Weinert, a musician of the Court of King Stanislaus of Poland, has just expired at Warsaw, at the advanced age of one hundred: he gave lessons up to eighty-two.——M Quérian, the well-known pantomimist at the Grand Opera in Paris, who played the *Emperor* in "La Juive," the *Executioner* in "Jerusalem," the *Archbishop* in the "Reine de Chypre," &c., has committed suicide, having lost his employment through deafness.——Alboni has gone to visit her natal Cesena, in the Papal States.——The celebrated Mdme. Ugalde is expected to return to her duties at the Opéra Comique, in Paris, next month, after her sojourn in Spain.——Miss Andrews did not accompany Mdlle Lind on board the *Atlantic*; and it is probable that Miss M. Williams, the contralto, will be engaged in the transatlantic tour with Mdlle. Lind: liberal offers have been made also to Vivier.——Miss Catherine Hayes has been engaged by Mr. Beale for a provincial tour, including Ireland and Scotland, for Italian opera, prior to her departure for Rome.——On Thursday afternoon Mr. T. M. Mudie performed, at the Queen Anne-street Rooms, a selection from his compositions. Mr. Mudie has been for some time a resident in Edinburgh. He is one of our most accomplished pianists and musicians. His music is full of poetry and elegance, whether in pianoforte pieces or vocal works. We regret that he afforded no specimens of the latter in Thursday's selection; but the lateness of the season, and the migration of vocalists, will account for the omission. In the scheme there were nine pianoforte compositions, an "Introduction" and "Valse Brillante" for four hands; a "Morceau à la Russe," executed by the gifted composer and Mr. W. Holmes; "L'Inquietudine," for four hands, played by Mr. Mudie and Mr. R. Barnett; "La Gentilezza," and "Pas Redouble," also both for four hands, interpreted by Miss Kate Loder and Mr. Mudie, and four solos—a "Rondo," in E minor, a "Notturno," a "Chanson d'Amour," and a "Tema con variazioni." In these beautiful inspirations there is the happiest flow of melodious imagery, combined with a thorough knowledge and effective use of the most classical forms. The rondo, "Allegretto Scherzoso" is full of fancy and piquant modulations: the impressive feeling in the "Chanson d'Amour," was also remarkable. Mr. Mudie is an admirable pianist, and, with the able coadjutors who assisted him in the duets, it may be concluded that this *matinée* was a real treat to those amateurs who love purity of style, intellectuality, refinement, and soul in pianoforte music, in preference to mechanical exhibitions of mediocrity in art.

London: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by William Little, 198, Strand, aforesaid, Saturday, August 24, 1850.

THE ILLUSTRATED LONDON NEWS.

No. 444.—VOL. XVII.] FOR THE WEEK ENDING SATURDAY, AUGUST 31, 1850. [SIXPENCE.

THE DEATH OF LOUIS PHILIPPE.

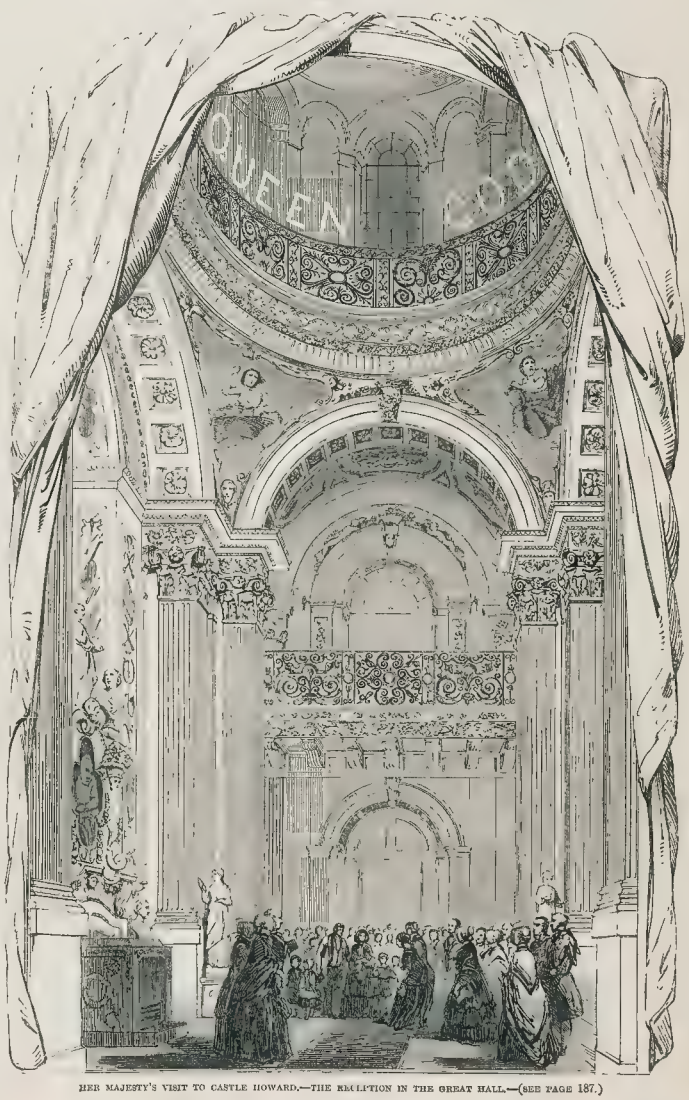
BUT five years ago, the repose of France and the peace of Europe were supposed to be dependent upon the life of one man. Louis Philippe was thought to be the corner-stone of Order—the very bulwark of society against wild anarchy at home, and desperate ambition abroad. The prayers of crowds ascended for his safety; and the assassins who raised their hands against his sacred person were pursued by the anathemas of mankind. There were not wanting some, however, who saw deeper into character and into motives—who could trace events from causes, and calculate the consequences of wrong—who maintained that his life was more dangerous to society than his death. Their predictions were verified; and Louis Philippe, living, produced those very disasters which his friends feared would ensue from his death. Had that powerful Sovereign died upon the Throne five years ago, how different the state of Europe might have been at this moment! The Comte de Paris might have been the King of the French, with a Liberal Regency, knowing how to yield all necessary reform; the revolutions of Italy, Hungary, and Germany might have been spared; and constitutional liberty might have been making a slow but sure progress in the matured opinion of reflecting men, instead of being disgraced in the eyes of the prudent and the industrious, as it is in too many countries of Europe, or of being trampled out altogether under the hoofs of a military despotism. But these things were not to be. The corner-stone of Order rolled itself away, and the bulwark of French society crumbled from its own rottenness.

The character of such a man as Louis Philippe is the property of the world. No pity for great misfortune, no sympathy for the old man shorn of his glory, hurled from his throne and dying in exile, can be allowed to blind the eyes of his contemporaries to his defects. To find fault for the sake of fault-finding, is at all times odious, but more especially so when the grave has not closed over the mortal remains of the man whose conduct is passed in review; but with such great personages as Louis Philippe and others, in whose hands the destinies of nations have been placed, contemporaries must not and cannot refrain from being judges. Their opinion and decision are wanted, that posterity may be enabled to form theirs. The history of the future must take its hue from the history and feeling of to-day, or it will want vitality, and fail to inspire confidence in its justice or its accuracy.

At this moment, the death of Louis Philippe is absolutely without political consequence. It adds no strength to the cause of the Comte de Paris, if the friends of that young child wish to make him a pretender to the throne; it removes no difficulty from the path of the Comte de Chambord; it facilitates in no respect whatever the present design of Louis Napoleon for re-election to the Presidency, or his future design, if he have yet formed it, of vaulting into the saddle of his Imperial relative. It influences no party, unties no knot of involved policy, smoothes no obstruction in anybody's way, and throws no light upon the past, the present, or the future. It is simply an event of personal, and to many of painful interest. It will excite sympathy, and point out to the most unthinking, some of the great moralities of life. It might, and doubtless will, form the theme of many an impressive homily upon the instability of greatness, the vanity of human designs, the rottenness of personal ambition, and the baselessness of all those worldly objects which men most pertinaciously struggle for. The event is indeed a mournful one, considering all the circumstances, past and present, under which it took place. To die in exile is a sad termination of the career, even of the humblest of men; but when, as in the case of Louis Philippe, the exile is old, broken-hearted, and once a king, it is impossible for the most callous of spectators not to be struck with a feeling of melancholy sympathy. All enmity that his name once excited has long ago expired, and the reddest of the Red Republicans have banished the animosity which they once felt against him.

But, as we have said before, the forgiveness of his contemporaries for the evils which he precipitated, if he did not cause, cannot make them shut their eyes to his errors, or prevent them from educing the true moral from his career. It is possible, to some extent, to separate the character of the man from that of the King. In so doing, the voice of impartial justice may find much to praise in the character of Louis Philippe. He was the good son of a bad father; he was moral and decorous in a most immoral and indecorous age; he was brave in prosperity, and still braver and more self-reliant in adversity: born to immense wealth, and deprived of the barest means of living, he earned his own crust by the sweat of his brow in honest labour; he educated himself in sorrow and in suffering, and, when restored to wealth to honour, and to position he found in domestic duty and the cultivation of literature and the arts the highest reward of his private life, and the best example he could give to the public.

But even as a man he had one great error, or one great misfortune—perhaps it was a combination of them both. He was never thrown into the society of good and great men, and he had no faith in human nature. He was prudent rather than virtuous, coldly correct, and utterly deficient of that genial warmth, which, if it sometimes leads its possessor astray, endears him to the hearts even of those whose judgments may condemn him. He had not the most infinitesimal particle of enthusiasm; nothing could stir his blood. This misfortune or error as a man, became his ruin as a King; made him selfish, made him mean, made him think more of his own aggrandisement and that of his family than of the far weightier matters of the public morality and well-being. He thought the French nation a nation of knaves and fools—of ambitious and empty busybodies—to be ruled for his purposes, and to be bought by his bribes; and when, at a ripe age, in the full harvest of his days, he found himself at the head of that nation, he discovered, unluckily, that his own want of faith was but the counterpart of that of the people



HER MAJESTY'S VISIT TO CASTLE HOWARD.—THE RECEPTION IN THE GREAT HALL.—(SEE PAGE 187.)

around him. ..naves and intriguers were ready at his hand; and the corrupt functionarism of France—the most venal class in Europe—became, under his guidance, the ready instruments of his purposes, and the eager recipients of the *largesse* of his corruption. It was his one great and overwhelming error, that he disbelieved utterly in human virtue, and that he governed a great country upon that principle. That is the secret and key of his career—the prevailing characteristic of his mind and history. Even the purest of his Ministers—a man above money, bribes for himself—was not above the meanness of being the agent of bribery, and of introducing into the nation a more gigantic system of corruption than was ever before attempted, even in France. Two hundred and forty thousand voters in a country—and two hundred and eighty thousand places under the Government to be given away! These two facts explain the policy of Louis Philippe as King of the French. Upon this basis he moved, with this lever he wrought, and for these reasons he obstinately resisted moderate demands for an extension of the suffrage which were urged upon him by more prudent and far-seeing statesmen than those to whom he gave his confidence. But even the corrupt electors of France were ultimately scandalized at his conduct in the last and crowning iniquity of his reign—the Spanish marriages. The public honesty and virtue, which he ignored or denied, were affronted; and the middle classes, who would have pardoned much for the sake of peace, order, and the interests of trade and commerce, were so enraged in their sense of right and common decency in this matter, that, with every desire to uphold his throne, they found themselves unable to stir a finger in its defence. If the middle classes of France had had confidence in Louis Philippe, or if Louis Philippe had had confidence in anybody, even in himself, the Revolution of February, 1848, would have been an insurrection only; it would have been nipped in the bud; and the Republic would still have been the day-dream of a few isolated plotters and scholastic zealots. He fell in those days, not because his foes were strong, but because his friends had ceased to respect him. His own judgment misgave him. He knew too late that he had played an unworthy part, and the consciousness of wrong forbade him to use the means that were at his command for stifling the insurrection. Conscience made a coward of him, when a little bravery would have been his salvation; and the revolution—the source of so many evils to France—was consummated.

The great moral to be deduced from his life, is the inefficiency and worthlessness of corrupt means for the government of a nation. Honour and virtue, though unhappily too rare, are not shadows. They are palpable realities; and he who, in the affairs of nations, affects to ignore them, or attempts to set them aside, must fail, as Louis Philippe did. At the same time, it must be confessed, that all the blame of failure is not fairly chargeable upon him. Something must be set down to the defects in the character of the people over whom he ruled. But, as the people never die, the French, it must be presumed will learn more wisdom in after-time. They will study the reign of Louis Philippe and the troubles which succeeded it, and learn a lesson which they greatly need for their own safety and well-being, and for the sake of all Europe.

VALUE OF SURGICAL MECHANICS IN MEDICAL JURISPRUDENCE.

The importance of mechanical knowledge in dental surgery, in this point of view, was pointed out with much force in an inaugural address, recently delivered at the College of Dental Surgery, Baltimore, United States, by Mr. Robinson, surgeon dentist, of London. The lecturer dwelt much upon the value of the legal evidence which it afforded in cases where identity of person was to be proved, and in which other means of recognition were destroyed; and he illustrated his meaning by reference to the identification of O'Connor, the victim of the Mannings, and of Dr. Parkman, whose recent tragic fate at Boston, in the United States, is in the recollection of all. In the former case, Mr. Robinson pointed out that the evidence of the surgeon who examined the body, which contained a description of the mouth, with the peculiarity of a protruding lower jaw, appeared in the public papers. This attracted the attention of a dentist who had had under treatment a case corresponding with that description; the teeth were shown to him, were recognised, and having been applied to the working model, proved beyond a doubt that the person who had worn them was the same individual who had been murdered. The recognition and identification by the gentleman who had made and adapted the teeth followed as a matter of course, from his practical mechanical knowledge; and a most important link in the chain of evidence was thereby furnished. In the case of Dr. Parkman was a still more remarkable instance of the value of the evidence which the "working model" supplied. The bones of the cranium had been calcined by throwing them into a furnace. The bones of were examined, and amongst them artificial mineral teeth were found, which could not be destroyed. Inquiry was made among the dentists, and Dr Keep, a celebrated dentist of the place, instantly identified the work, and having placed them upon his working model, at once supplied the desired link of evidence. He had made the teeth a few weeks previously. A merely theoretical dentist would be unable to identify pieces of artificial work, which he neither knows how to make nor to adapt to the mouth.

THE AUCKLAND ISLANDS.—Our readers will recollect that we engraved, in No. 339 of our Journal, two views of the Auckland Islands, and gave some account of their grant by Government to Mr. Charles Enderby, F.R.S., who subsequently proceeded thither on behalf of the Southern Whale Fishery Company. The New Zealand papers just received give many interesting particulars of the islands and the new settlement, visited by her Majesty's ships *Havannah* and *Fly*, on February 13. The preliminary expedition, under Lieut.-Governor Enderby, with Messrs Mackworth and Smith (assistant and secretary), and thirty mechanics and artisans, arrived on the 15th December, 1849, in the *Samuel Enderby* and *Fancy*. A bachelor's house, a house for Mr. Enderby, and two cottages, were erected; and a site was cleared for the store. A rock rubbing in, was being put up. A small cutter was ready for launching; it had been brought out in frame. The people were short of provisions and vegetables, which were daily expected by the *Fancy* from Sydney, and would be required for the whalers. The Auckland Islands must ultimately be supplied from New Zealand. The weather was cold; thermometer at forty-two degrees. The New Zealanders, who engaged further south years ago, were not to be found, time to be, of great service to the settlers. Mr. Charles Enderby and his colony have, as the sailors say, gone to work with a will. Their township has been laid out, one or two buildings have been erected, one a capacious structure for married men and their families, the other for single men, and a third for the Governor and founder of the colony. There were two ships in Port Ross a magnificent land locked basin—one the *Samuel Enderby*, fitting for the fishery; and the *Fancy*, in a doubtful state of efficiency, and likely to remain at her anchors; also a barque, the *Brisk*, fully equipped. Vessels, and other supplies, were expected from New South Wales; and vessels from England, with colonists and stores. Mr. Enderby had renamed the harbour Port Ross, in honour of Sir James Clarke Ross, who surveyed it in the *Erebus*, in 1848. The settlers were manfully following their avocations, the founder encouraging them, by his own assiduity, to the successful accomplishment of their novel and arduous enterprise.

THE KING OF HOLLAND'S ITALIAN DRAWINGS.—(*From a Correspondent.*)—The history of the early Italian Drawings, which formed a prominent feature, and one of unique interest, in the King of Holland's collection, recently brought to the hammer, may not be generally known; but, for all that, is not uninteresting as an incident in the annals of art. They—together with many more long since separated from them—were originally collected by the late Mr. William Young Ottley, who, during eight or ten years at the close of last century, sought out in all the principal cities of Italy all that was genuine and valuable of art, and formed the unique collection which contained all the great masters upon which many of those paintings were executed; and he also purchased very largely for a private collector. These drawings so collected—and a smaller collection of which could never be made by any one else—remained in Mr. Ottley's possession till about the year 1823, when, after having published fac-similes of some of them in his great work, entitled "The Early School of Design," he parted with the whole of this portion of his collection to Sir Thomas Lawrence, for a large price, £8000, I believe. The latter prized them very highly; and, I believe, never added anything to them; but, when he died, he left special directions in his will that they should be offered, in a first instance, to the Government of this country, for a certain sum, being that which he had paid for them, or something less, perhaps of the amount, I am not quite clear. Upon the Government declining the purchase, which they unfortunately did, the drawings were brought to sale. Many of them were purchased by Mr. Woodburn (for a larger sum than the whole collection had been offered for); and of these the principal found their way into the collection of the King of Holland. Where they will now go to, in how many directions they may be dispersed, it would be impossible to predict; but this may be asserted with perfect confidence, that such another collection of the finest models of the finest school of art, in art's palmiest days, will never be made again by public or private collector in this or any other country.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The unexpected death of the ex-King Louis Philippe has created a great sensation in Paris, especially amongst the adherents of the House of Orleans; and almost all the papers have reflections on the melancholy event. The *Débats* observe:—

> Not only has the life of King Louis Philippe terminated on exile. It has been shortened by exile. If his heart had been less French, the King who saved France in 1830, and with France abandoned at 1848, would have died on the throne. The French society, which raised as a barricade in July, and which a caprice of the country overthrew 18 [illegible] had not been an implacable and [illegible]. Had he been less of a patriot than he was, he would have triumphed at the ruin, [illegible] sitions, the disasters, and the disgraceful kinds, which violently assumed to be [illegible] honoured reign. He would have triumphed at these sanguinary struggles to which [illegible] unchained by the fall of a throne, gave themselves up over its ruins. But at all these [illegible] fortunes, which never like a demonstration, which Providence, justly severe, wished to give [illegible] the wisdom of his policy, the King only felt the most bitter affliction. The striking justification which the catastrophe of February gave him, surprised his conscience: it doubled his heart and shortened his life. It is thus which makes us think that we shall not be alone in regretting and deploring the death of the King. His cause was, before his fall, that of constitutional monarchy: it became after February that of society itself. Every one has felt this, even those who took a criminal or an unprudent part in that work of destruction. Every one now [illegible] it, even those who have profited by it. For it is not only the commercials, and [illegible] the great community of that great desire for peace and tranquillity which is [illegible] It is the Government itself, in its most lofty expression, when it went to the door of a political prison, to render homage to the Conservative principles of society, too long misunderstood and outraged. This solemn reparation of public opinion in favour of the policy of the last reign, the King was able to recognise towards the close of his life by some incontestable signs. Deeply touched at the injustice of his contemporaries, he never doubted the justice of history.

The "progress" of the President of the Republic through the departments terminated on Wednesday, by his return to Paris. His reception at Chalons-sur-Marne, on the night of the 27th, was more brilliant than any he had met with during his journey. Cries of "*Vive Napoleon!*" and "*Vive le President!*" were heard upon all sides; while the streets were splendidly illuminated, and the houses decorated with flags. The authorities of the town gave a ball on the 28th, in honour of the occasion, at which Louis Napoleon was present, who freely entered into conversation with all parties, which excited the greatest admiration. He then reviewed the troops, where he made himself equally affable, which won all hearts. At Metz, on the 30th, he reviewed the National Guard and the garrison troops. During the morning he completely traversed the city, visiting, in his progress, the arsenal, public schools, hospitals, and, in fact, all the principal institutions. He was everywhere received with respect by a vast population, who continually surrounded him, though amidst the shoutings of "*Vive le President!*" were mingled occasionally cries of "*Vive Napoleon!*" which he acknowledged, that it was plainly observable Louis Napoleon felt the indignity most acutely.

A man of the name of Gerber has been arrested at Strasbourg, charged with having conspired to assassinate Louis Napoleon Buonaparte. Two other individuals connected with the same plot have also been seized at Nancy, and placed in safe custody.

ITALY

From Naples we have dates to the 17th. The official journal publishes a law against the press, so strongly severe in its character that it amounts to a total suppression of the liberty of public discussion in the newspapers. By this law, no publication, print, or plastic work of any description can appear without authorization from the Government. No publication can be authorized if it be directed against religion, public morals, the Royal Family, foreign sovereigns, the local government, or private persons. The Council of Public Instruction is intrusted with the right of examining the sermons of archbishops and bishops may publish their pastorals without authorization. The law bears the date of the 16th.

In Turin (the capital of Piedmont), of the 24th, we learn that the health of the King of Sardinia is visibly improving. It is stated that much difference of opinion exists in the Cabinet on the subject of the difficulties arising out of the disputes with the Court of Rome relative to the abolition of the ecclesiastical privileges, the imprisonment of Archbishop Franzoni, and ecclesiastical reform (in temporals) generally. Many political refugees are being daily expelled from the country

DENMARK AND THE DUCHIES

The intelligence from the seat of war is still of a negative kind. There is no indication of any movement whatever by either army. But such a state of mere negation cannot long continue. It is impossible but that the present extraordinary condition of Germany itself, and the relation of the Powers to it, and to each other and to Denmark, must occupy the attention of the greater powers; and it appears clear that the solution must come from without, for within the Germanic body has reached the last stage of distraction and dissolution.

There have been some cases of cholera at Rendsburg, where the Schleswig headquarters are, but not numerous in proportion to the present amount of the population. Dr. Stroyan, the medical staff, who was left in charge of the wounded at Schleswig after the retreat, and was sent prisoner to Copenhagen, has been released, and rejoined the head-quarters.

The Danish Admiral has communicated the fleet in the Baltic has given notice to the Lieutenancy-General, that any vessels bearing either the German flag or that of the Duchies, which shall venture into the open sea, shall be treated as pirates by the Russian vessels which shall encounter them.

RUSSIA.

The Russian journals contain an account of a battle which took place on the 3d ult. between the Russian General Sass Lazard and the Lesghen, near the village of Bechelda. The Lesghen were defeated, with a loss of 320 killed and 600 wounded. Six of their largest villages were sacked and burned. Gen. Belgard only lost 7 killed and 19 wounded.

UNITED STATES.

We have accounts this week from New York, to the 15th inst. They are of interest. The Cabinet of President Fillmore, which, as at first appointed, only five of the members occupying office, has been completed, and is now constituted as follows:—Secretary of State, Mr. Webster; Secretary of the Treasury, Mr. Corwin; Secretary of the Navy, Mr. Graham; Postmaster-General, Mr Hall; Secretary of the Interior, Mr. McKennan; Secretary of War, Mr. Conrad, Attorney-General. Mr. Crittenden.

On the 6th inst. the President addressed to the two Houses of Congress a very important message on the subject of New Mexico and Texas, with an official letter from Mr. Webster, in reply to a communication from the Texan Governor, relative to the boundary dispute. The case stands thus:—Texas threatens to take military possession of Santa Fé, in defiance of the United States, in defiance of the boundaries of the old provinces of Mexico, and in defiance of the treaty of Guadaloupe between the United States and Mexico, by which treaty all New Mexico was ceded to the United States. Texas, in fact, claims it as being within her boundaries, and her governor, Mr. Bell, addressed a letter, under date of June 13, to the senators and representatives of Texas in the United States Congress, in which he intimated that the State of Texas would use the necessary means to maintain her civil jurisdiction over Santa Fé, and requested the Texan delegation in Congress to inform the President of all the facts of the case, adding that he "will at once exercise the power and authority vested in him to enforce civil jurisdiction over Santa Fé, which a misguided and refractory population (the New Mexicans) are attempting to sever."

This letter has been officially communicated with the message referred to from President Fillmore, in which the President says that New Mexico is now a territory of the United States, with the same extent and the same boundaries which belonged to it when it was a province of Mexico, and declares that he will enforce the laws and the authority of the United States by the militia and the army and navy, if a case of need should arise. He says that Texas, as a State, can suppress her own insurrections by her own local power, but that she has no right to conflict with the laws or rights of the United States. It is therefore, no longer a question to be treated as such. He adds that the case of Rio Grande, too, belongs to New Mexico, and for that reason he must protect it from Texas and other State intrusions. This Presidential document was laid before Mr. Webster's communication was read to it. It is to be seen, however, that in the south the disunionists contemplate the difficulty with satisfaction.

Mr. Webster, in his letter to Governor Bell, shows, both legally and historically, that Texas errs in her claim, and that New Mexico is rightfully under the jurisdiction of the United States. In short, the views of the President in his message were confirmed in the most expatiatory manner by the Secretary of State. Meanwhile, a bill which had been brought in for the settlement of the boundary question between Texas and New Mexico has passed the Senate. By its provisions Texas is to receive 10,000,000 dollars (£2,000,000 sterling). 5,000,000 of which are to be issued until the claims against her, growing out of the act of annexation to the United States, shall be satisfied. The bill, which has yet to pass the Lower House, was carried by a majority of 10. From the territory of Texas itself we learn that the Legislature has passed resolutions for raising troops in almost every county, for Santa Fé, to be ready to march on the 1st of September, to defend the assumed boundary against the Federal Government.

The bill for the admission of California as a free and sovereign state has passed the Senate sim at intact. It is extremely short, and recites that the people had presented a Constitution, and claimed admission to the Union; that this Constitution had been found to be republican; and then proceeds to enact that the State of California shall be one, and is hereby declared to be one, of the United States of America, and admitted into the Union on an equal footing with the original States, in all respects whatsoever; and then proceeds to lay on the following restrictions:—That the people of California shall not interfere with the primary disposal of the public lands within its boundary, nor question or impair the right of the United States to dispose of the same, nor shall they tax or assess for same for taxes at no time shall non-resident proprietors, who are citizens of the United States, be taxed higher than residents: and that all the navigable streams within the said state shall be common highways, and for ever free, as well as to the inhabitants of the said state as to the citizens of the United States, without any tax, impost, or duty therefor.

It is said, however, that, although the bill has thus passed the Senate, it will have to undergo a severe ordeal in the House of Representatives. The southern members, fearing the effects which this measure will have upon the settlement of the slavery question, have organised an opposition to its finally becoming law.

The dispute between the American and Portuguese Governments had been the subject of debate in the Senate, strong opinions being expressed in regard to the refusal of Portugal to admit the American claims.

From Havannah we learn that the remainder of the Contoy prisoners are yet in confinement, but that seven of them were to be liberated on the 6th of August. The remaining three were to be sentenced to eight years in the chain-gang. This is the *finale* of the unnatural invasion of Cuba by Lopez.

At New York Garibaldi had refused a public entertainment.

The cholera was abating in most parts of the States.

A Mr. Page had succeeded experimentally in applying electricity as a motive power.

METROPOLITAN NEWS.

EXHIBITION OF 1851.—The following circular of important instructions to parties intending to exhibit has been issued to all the local committees of the United Kingdom by the Executive Committee:—"Office for the Executive Committee, 1, Old Palace-yard, Westminster, 22nd August, 1850.—Sir,—I am instructed by the Executive Committee to inform you, that her Majesty's Commissioners have fixed the 31st of October as the last day when returns of demands for space from intending exhibitors are to be transmitted by local committees to the Executive Committee, and I have to request that you will move your local committee to take the necessary steps for transmitting the whole of the returns on or before that date. The local committee will, of course, fix such final period as it may think desirable for receiving the demands from the exhibitors themselves in its neighbourhood, so as to enable the local committee to comply with the wishes of the Commissioners to receive its return on or before the 31st of October. At the same time, I am to call your attention to the desirable to impress upon exhibitors the great facility they will afford to the arrangements if they will send in their demands immediately. I am further instructed to beg you to call the attention of exhibitors to the absolute necessity of all returns being passed through a local committee, and to make them understand that it will be impossible that all articles should be submitted to the local committee for approval, and be certified by the local committee accordingly before they can be examined by the Commissioners at the building. I send you a new edition of the 'Decisions;' and beg leave to direct your attention to 'Decisions' 15a, 53, 56, 60, 61. If you desire to have any copies of this new edition, they will be supplied on application for them. I have also to request that you will be kind enough to communicate this letter to the chairman of your committee, and to the mayor of your town (if there be one), as soon as possible I am, &c., M. DIGBY WYATT, Secretary."

ST. MARGARET SEAMEN'S ORPHAN ASYLUM.—The general meeting and half-yearly election of candidates for admission to this admirable institution took place on Monday, upon the premises of the Asylum, in the Bow-road. Fifteen children (ten boys and five girls) were elected on the occasion into the asylum, which is limited to the number of 60 children of both sexes, gives a total of 120 now dependant upon the establishment. Subjoined are the names of the successful candidates, and the number of votes to each: The names of the female candidates were—Elizabeth Jane Andrews, 5967 votes; Isabella Lang, 5470; Ann Katherine M'Causland, 1844; Eliza Jane Richardson, 2871, and Ann Wenborn, 930. The list of the boys comprised John Barclay, 2256 votes; Thomas Wenborn, 1844; John Thomas Hayes Bloomfield, 1535; William Morrison Colchester, 3007; Henry Cutting, 2100; Alfred Frederick Evans, 1796; Richard Millington, 2260; Alfred William Pennisll, 2520; Joshua Stennings, 1457; and Thos. Waters, 2050.

ROYAL ORTHOPŒDIC HOSPITAL FOR THE CURE OF CLUB FOOT, &c.—On Tuesday afternoon the half-yearly general meeting of the governors of this charity was held at the London Tavern, Bishopsgate-street; Quaries Harris, Esq., the benevolent founder of the hospital, occupying the chair, and supported by a very full attendance of governors. The minutes of the former court having passed, Mr. B. Maskell proceeded to read the report of the operations of the last six months. It appeared that on the 23d of February last, 36 patients occupied the wards of the hospital; and from that period to the 26th of August 41 additional inmates were received. Of this number 32 were cured, 9 were relieved, and 36 remain under treatment. The total, including outpatients, received during the half-year, amounted to 733, being a very considerable increase over the corresponding period of last year. The report having been adopted, the Chairman drew attention to the fact that 300 individuals were suffering distension, whose affections required in-door treatment; yet, owing to the want of space in the present hospital, they could not be received. Mr. Harris strongly urged the institution of a building fund, to render the hospital able to meet the requirements of so numerous a class of sufferers. It was obvious that a building capable of containing 300 beds would be no more than sufficient; for with so many patients now waiting admission, and that number daily increasing, there was no doubt but that they would be fully occupied. The funds were in a prosperous condition, and were on the increase, although it was to be regretted far from adequate to the increase of applicants, who doubled the numbers of the previous year. The chairman concluded by proposing the health of the chairman closed the proceedings.

ROYAL SOCIETY FOR PROMOTING THE IMPROVEMENT OF THE HACKNEY CARRIAGE TRADE.—On Tuesday, the members of this association celebrated their first annual meeting by a musical entertainment and a dinner in the grounds attached to the Pier Hotel, to which about 130 sat down, under the presidency of Dr. Blundell. Mr. W. S. Long, in proposing the toast of the evening, stated that the number imposed on the hackney-carriage trade exceeded twenty times the amount paid by any other business. In the reign of William III., when this kind of impost was first resorted to for the purpose of revenue, the tax on a coach-driver was fixed at 8s., and in 1815 it was subsequently raised to 10s., but now the proprietor of any sort of hackney-carriage was compelled to pay that sum every week. Though they were so highly taxed, the Legislature seemed determined to increase the degradation which existed amongst them, by passing enactments after enactment of so irritant a character, that it was impossible to comply with them, and then the drivers were sent to gaol, as if that was the place to teach them their moral or social duties. Mr. E. Hider, the acting manager of the association, stated that the association was scarcely a year in existence. It was originated, and almost entirely supported, by persons engaged in the trade; and its objects were, by combining together, to resist the wrongs and exactions to which they were subjected, and to assist the influential classes in their favour. They also intended to establish a benefit and benevolent society in connexion with the association. He denied that the character of the cab-drivers of the metropolis was as generally supposed. Of course, there were many dishonest individuals in that as in other employments, but on an examination of the facts it would be found that, taking 6000 individuals (the number then engaged in London) from any other class, as large a proportion were convicted of infractions of the regulations among the cab-drivers. He said the criminal law, for they were so hedged up by legislative enactments, that it was impossible they could avoid convictions for infringing them. Indeed, so overwhelming were the magistrates with complaints against them by the public and the police, that a cab-driver never had a fair hearing, and it was often a wiser course to plead guilty to an offence, even although innocent, and pay somewhere about a 5s. fine, than to take up the time of the court with a defence, which was generally unsuccessful. He detailed several other instances in which the law, as it at present stands, operates unfairly to the drivers of the hackney carriages, and urged them to unite for the purpose of obtaining an alteration

THE NEW HACKNEY-CARRIAGE REGULATIONS.—The Commissioners of Police have issued an order for the appointment of standings for hackney-carriages within the Metropolitan Police District, and the regulations to be observed as directed by the recent act for consolidating the office of Registrar of Metropolitan Carriages with the office of Commissioner of Police. The following regulations are to be observed at the standings for hackney-carriages within the police district:—1. Drivers of hackney-carriages or other persons are not to stand together upon the footway, or cause any obstruction or annoyance to passengers, and no person is to use abusive, insulting, or obscene language, or by any improper behaviour or gesture to cause offence or annoyance to passengers. 2. No person is to smoke or drink any spirituous or malt liquors at any standing. 3 No hackney-carriage or horse is to be washed or cleaned upon a standing, and the drivers and licensed waterers are to prevent any dirt or mud from being thrown upon the horses. No waterers are to be allowed to stand with more than one horse. 4. Every driver of a hackney-carriage, when required to do so by the driver of any private coach or other carriage, is to move such hackney-carriage, if sufficient space exist for that purpose, so as to allow such coach, &c. to take up or set down at any place. 5. No hackney-carriage or horse is to be washed or cleaned upon a standing, and the drivers and licensed waterers and to prevent any dirt or mud from being thrown upon the horses at the standings. 6. Every driver of a hackney-carriage, when required to do so by the driver of any private coach or other carriage, is to move such hackney-carriage, if sufficient space exist for that purpose, so as to allow such coach, &c. to take up or set down at any place. No waterers are to be allowed to stand with more than one horse. No cab-stands are to be allowed to stand across any street or thoroughfare, or opposite the end of any street or carriage-way, or upon any place where foot passengers usually cross the carriage-way.

NEW POSTAL CONVENTION WITH SWEDEN AND NORWAY.—The preliminaries of a postal convention were signed on Saturday afternoon, at the Foreign office, between Great Britain on the one hand, and Sweden and Norway on the other, by which the intercourse between the respective countries will be greatly facilitated, and all commercial, as well as political, relations very much improved. Hitherto, the rates of postage between this country and the dominions of the King of Sweden were one of the most expensive and exaggerated scale. By the newly-proposed arrangement, the rates of postage will be very considerably reduced, and the facilities of intercommunication greatly increased, good will be the results of an arrangement which is calculated to confer important benefits upon the trade between the two countries; the details, however, will not be made public until the ratifications shall be exchanged. To Lord Clanricarde, the Postmaster-General, is due the chief merit of bringing about this most desirable reformation.

SEAMEN'S LETTERS.—GENERAL POST-OFFICE, August, 1850.—The Lords of her Majesty's Treasury having been pleased, by a warrant, dated 26th July, 1850, to authorise the use of postage stamps for the payment of letters forwarded to the United Kingdom by seamen employed on board her Majesty's ships on foreign stations, all seamen's letters which may hereafter reach this country in bags made up on board any of her Majesty's ships will be delivered free, provided the postage of one penny to which they are liable be paid by means of a postage stamp affixed to such letters. In those cases where bags of seamen's letters are brought to the United Kingdom by private ships, the gratuity of twopence payable by law to the master will still be chargeable upon each letter, unless such sum of twopence, *in addition to the postage of one penny*, be paid by the seaman by means of postage stamps. It must, of course, be understood that all the conditions laid down by law, under which the letters of seamen are transmitted at a reduced rate of postage, must be duly complied with as respects the letters to which the present regulation refers. Seamen will be supplied with postage stamps by the purser of the vessel to which they are attached.

REMOVAL OF THE MARBLE ARCH.—On Tuesday, workmen were employed in erecting a scaffolding of considerable strength round the marble arch at Buckingham Palace, preparatory to taking it to pieces.

THE HON. ARTILLERY COMPANY.—On Monday evening, certain members of this ancient corps, of which Prince Albert is Colonel, not feeling disposed to join their brother members at the dinner to celebrate the Colonel's natal day, held at the Armoury House, in consequence of a long-existing pique relative to the affairs of the company, and the departure from the established custom of dining in uniform, dined together at Gunter's, and, having ceased soon after the close of the banquet, to return to the Armoury House to resume their civilian costume, were set upon by their opponents, who endeavoured to disarm them, and by force thrust them out into the street. The usual scuffle ensued, and drawn by certain parties, their rapiers, their fists knocked down, swords taken from them and broken into fragments, and very serious mischief sustained by the parties engaged. The affair is, of course, under investigation.

EAST INDIA RAILWAY.—Half-yearly Meeting: London, Aug. 21. J. A. Aglionby, Esq., in the chair.—The report of the directors, stating that the engineer and other officials of the company had arrived in Calcutta in April last, and declaring the interest payable out of the guarantee of the East India Company, was adopted, and the meeting separated.

GREAT NORTHERN RAILWAY.—Half yearly Meeting: London: E. Denison, Esq., M.P., in the chair.—The report, stating that every effort was being made to develope the traffic of the line to Peterborough from the 20th of 7th inst., was adopted, and 7722 shares in arrear of calls forfeited, the directors having powers given them to dispose of the same as preference shares for the benefit of the company

NEW RAGGED SCHOOL AT HOLLOWAY.—On Wednesday, at three o'clock, the ceremony of laying the foundation stone of a ragged school for the district of Holloway was performed in the presence of a large number of spectators. The site of the intended school is in Flower's-place, Hornsey-road, and is quite eccentric in the Great Northern Railway. The style of architecture selected for the building is the Elizabethan. The boys' school will be 50 feet by 28; the girls' will not be so large. The ceremonial of laying the first stone was inaugurated with an impressive invocation of the divine blessing on the institution, by the Rev. Mr. Wilson, the vicar of the parish. The stone, which weighed more that half a ton, and measured 4 feet 4 in. by 2 feet 2 in., was then elevated from its resting place by means of pulleys, and the trowel was handed by the treasurer, Mr. R. M. Phillips, to Mr. Pownall, who proceeded to lay the mass with the usual formalities. A simple inscription, bearing the date, &c., was engraved upon it.

THE HOLYROOD RAGGED SCHOOL.—A splendid building has just been completed in Newport-street, Lambeth-walk, for the education of the ragged children of the vicinity. The erection is in the Doric style of architecture, with a noble *façade* and portico, approached by a lofty flight of steps. The entire building, including the out-offices, workshops, masters' residences, &c., covers an area of 3000 feet. It has been erected by the munificence of Mr. H. Beaufoy, the eminent distiller of Lambeth, at a cost of £3000. The schools will be opened for the reception of 1000 children early in the ensuing month.

IMPORTATION OF WINE FROM THE UNITED STATES.—The American line-of-packet ships arriving in the London Docks from New York continue to bring large quantities of wine, the produce of the south of Europe, as part of their cargoes, for reasons which make it more advantageous to carry the wine twice over the Atlantic than to import it direct. The packet-ship *Margaret Evans*, just arrived in the docks from New York, has brought 39 pipes and 58 other casks, and the packet-ship *Cornelius Grunnell*, arrived from the same place, 33 pipes and 119 other casks of port wine, as portions of their cargoes, consigned to wine-houses in the metropolis.

ALARMING OCCURRENCE.—On Wednesday afternoon a portion of the new building in course of erection at the corner of New Broad-street and Tenham-tree-road, fell with a tremendous crash. A large quantity of the material fell on the footpath and roadway, and several persons who happened to be passing were seriously injured.

DEATH FROM LOCK-JAW.—On Wednesday night, Mr. Langham, deputy coroner, held an inquest at the Plough Tavern, Cary-street, Lincoln's-inn-fields, on the body of Richard Wilmot, aged 37, a stableman, living at No. 19, Shire-lane, who died from lock-jaw. About a week previously, the deceased, who was a stout, able-bodied man, received a puncture in one of his toes, through a rusty nail penetrating his shoe. The wound festered, and a few days afterwards he went to King's College Hospital, where he was informed that the wound would heal, but on Monday he was seized with symptoms of lock-jaw, and on the following day he was removed to the hospital, where he expired. Verdict, "Died from tetanus, produced by a puncture from a rusty nail."

FIRE AT LINDSWOOD.—On Wednesday morning, about six o'clock, a very alarming fire broke out on the premises belonging to Messrs. Gray and Son, hydraulic engineers and plumbers, in Mark-with-terrace, Commercial-road, Lambeth, and which is situated in the neighbourhood of the Kent-road Railway Station. Plenty of water having been speedily obtained from the Grand Surrey Canal Company, the engines were set to work, but they were unable to obtain the mastery over the flames until the plumbers' and engineers' workshops and stores were burned out, and some damage done to the contiguous houses. The loss is said to amount to some hundred pounds, but the firm was insured. The cause of the disaster could not be traced.

DEATH FROM DRINKING A BOTTLE OF BRANDY FOR WAGER.—On Tuesday Mr. Langham held an inquest in St. Martin's Workhouse, on the body of Joseph Stonestreet, aged twenty-five, foreman to Mr Norchi, marble merchant, of King William-street, Strand, whose death occurred in the following awful manner:—Mr. George Wilkins, an intimate friend of the deceased, residing at Hampstead-road, said, that on Sunday afternoon last, he, the deceased, and his cousin, dined together at the Mail Tavern, Noble-street, City, and after tea the deceased offered to lay a wager of £1 that he could drink a pint and a half of brandy, and walk from Charing-cross to London bridge, in less than two hours. The money having been deposited, a bottle of brandy was purchased, when the witness, his cousin, and deceased proceeded. Mr. Stonestreet then poured the brandy into a pint pot, which having been diluted with water, the deceased commenced his stupid feat. Having drunk within four ounces of the spirit and water, he put the jug on the table, and immediately rolled off his seat upon the floor. Mr. Watkins, a surgeon, having been sent for, the stomach-pump and other remedies were resorted to to save the deceased's life, but without effect, and he died at six o'clock on Monday morning. Witness and his cousin, on hearing of the death, left the house hurriedly, and to cry off the bet, when he laughed, and said he wished some one would lay him another wager, that he could not perform the feat within one hour, instead of two Mr. Watkins, a surgeon, proved that deceased had died from apoplexy, in consequence of drinking such a large quantity of brandy. Verdict, "Accidental death."

ROBBERIES AT THE EUSTON TERMINUS OF THE LONDON AND NORTH-WESTERN RAILWAY.—On Tuesday, previous to, and during the time occupied in her Majesty's departure, the swell mob were busily engaged in levying contributions on those persons who had assembled to witness the departure of the Royal party. The principal scene of their avocations was on the platform of the station, where several complained to the police of being minus their purses and handkerchiefs; and a poor woman who was going to pay an instalment into the County Court had her pocket picked of 25s., with its contents, amounting to a shilling and-twenty shillings; and three gentlemen lost their watches. But outside the gates was not the only place where these depredations were committed, for, notwithstanding the precautions taken by the railway officials, some of the gang appeared to have been extremely active even in immediate proximity with royalty, as one of the clerks belonging to the secretary's office was deprived of a gold watch and chain in the station yard. Two of the gang were secured by the police, who found on one of them a purse containing eleven or twelve sovereigns

BIRTHS AND DEATHS.—Births registered in the week ending Saturday, Aug 24—Males, 733; females, 813: total, 1416. Deaths in the same period—Males, 464; females, 441: total, 905. This return shows that the health of the inhabitants of London continues as good as it usually is. The deaths last week were 905; more by 31 than in the preceding week, previous weeks, but less than the average of the corresponding week of 1849. In that week 2456 persons died in London, 280 of diarrhœa, and 1273 of cholera. The deaths from cholera last week were 5; from diarrhœa, 118. Of the latter number, 109 were children under the age of 15, 4 adults under 60, and 9 old persons past the age of 60. The deaths by cholera in the five preceding weeks, including the last, were 13, 11, 15, 8, and 5; so that the disease, in the form it has usually visited London in August, is declining. The deaths from diarrhœa in the same weeks were 104, 136, 152, 139, and 118. Although the mortality of London is now below the average, that average is itself high; and it appears scarcely to be a natural state of things that, in ordinary times, of 906 persons whose career terminates in the week, only 155 pass the age of 60, that 318 end their course in the middle of life, and 432 die in their infancy or childhood to youth. Yet the middle of life, and 432 die in their infancy or childhood to youth. result of this result. 129 of the deaths occurred in public institutions, viz. 79 in workhouses, 4 in military and naval asylums, 39 in hospitals, 4 in lunatic asylums, 2 in military and naval hospitals, and 1 in prison. The proportion of deaths in public institutions is less than it has been; for from an early return it was shown that about 1 in 10 of the inhabitants of London died in the workhouses, 1 in 21 in the hospitals, 1 in 581 in prisons, 1 in 102 in the state of things that, in ordinary times, of 906 persons whose career terminates in the week, only 155 pass the age of 60, that 318 end their course in the middle of life, and 432 die in their infancy or childhood to youth. Yet the result of this result. 129 of the deaths occurred in public institutions, viz. 79 in workhouses, 4 in military and naval asylums, 39 in hospitals, 4 in lunatic asylums, 2 in military and naval hospitals, and 1 in prison. The proportion of deaths in public institutions is less than it has been; for from an early return it was shown that about 1 in 10 of the inhabitants of London died in the workhouses, 1 in 21 in the hospitals, 1 in 581 in prisons, 1 in 102 in the state of things that, in ordinary times, of 906 persons whose career terminates in the week, only 155 pass the age of 60, that 318 end their course in the middle of life, and 432 die in their infancy or childhood to youth. Yet the result of this result. 129 of the deaths occurred in public institutions, viz. 79 in workhouses, 4 in military and naval asylums, 39 in hospitals, 4 in lunatic asylums, 2 in military and naval hospitals, and 1 in prison. * this man had been sitoric from his birth, at all times subject to diarrhœa, and requiring medical assistance on every occasion of the attack. The neighbourhood is healthy and well drained."

METEOROLOGICAL OBSERVATIONS.—By the Greenwich observations the barometer was low last week; the wind was west or south west; rain fell on Wednesday; on Saturday there was a thunderstorm; the mean temperature of the air was 57 deg. through the week, or 3·3 deg. below the average The mean temperature of the Thames was 62·5 deg. The air was dry, the dew point having been 48 deg.

TOWN TALK AND TABLE TALK.

THE year is waning: Murray's Handbooks figure in the advertising columns of every newspaper, and there is not a *boudoir* blind undrawn in May-fair. Yellow slippers and eccentric shooting-coats—like their owners, "fearfully and wonderfully made"—flourish upon every fashionable beach; and the sound of the English-French—the hesitating summons to the *garcong* so well loved of Continental landlords—may be heard rising over the clatter of knives and forks in half the *tables d'hôte* of Europe. One Opera has closed the other is closing; Vauxhall is down to the final shilling; and the only "men" (using the word in its West-end signification) who are to be seen about town are the "fast" (as last night, and are going down to-morrow morning." From one of the last-mentioned nugatory class I had the following scrap of anecdotic gossip from Boulogne. It illustrates the sad mental hallucinations now and then experienced from a too-exclusive contemplation of the pictures of that Dutch artist-work, the French Dictionary:—An English family lodged at a French house in the Cape Cure, and, to the credit of the host be it said, very comfortable our compatriots were; so much so, indeed, as to be entirely satisfied were they with the establishment, and, above all, with the cookery, that, upon leaving, a formal vote of thanks was given to the landlady, who had, during the preceding month, presided over the stoves. Her dishes had been delightful; nothing could have been better. Henceforward the family would remember with gratitude and delight the good things which had been so skilfully dished up for them by Madame." The compliment was fully appreciated, and the good matron returned a suitable reply in her most voluble Picardian *patois*. The bulk of the oration was wasted upon the slowly understanding Britannic ear; but the sense of one, the concluding sentence, our Insular friend gathered that had made. Eager to help in an awful emergency, it was for them. The good dame was understood to have attributed almost all the charms of her cookery to the constant use, in all her operations, of a new and admirable article—*castor-oil!* Here was a mystery. The idea of a respectable family actually living for ever so many weeks on meat dressed with castor-oil, and that, thanks to the diabolical ingenuity of French cookery, without having the slightest notion of the atrocity. The idea was overpowering, dreadful to contemplate—a case actually for Lord Palmerston to take up *cause belli*—an outrage pregnant with the delivery of ambassadors' passports, demands for safe separation, or a British squadron bombarding the bathing-machines of Boulogne. Happily, none of these warlike consequences are likely to arise. A little investigation proved the fact that the agent alluded to by the *cuisinière* as having so maternally aided her operations, was a species of salad oil, either sour or rank-frowzy, but simply a new and capital set of *casseroles*, or copper stew-pans; the similarity of sound between the English drug and the French kitchen implement having made all the mischief. The Boulognese must, however, be thankful to have escaped so lightly at the hands of a gentleman living at an hotel in the Haute Ville, and who visited one morning to make inquiries about some linen which he had sent to the laundress, put a question to the waiter, by-the-by, of which, by the double blunder—first in the selection of a verb and then in substituting another word for it by mistake—my friend horrified the dapper functionary whom he addressed, by an unwitting inquiry as to whether he had not got some shirts to bri! It was long before the victim heard the end of his alleged peculiar style of obtaining linen.

Who is to be the new Member for Cambridge, is a question greatly agitating the banks of the Cam. Truth to tell, the University has not been very fortunate out by any means to much advantage in the choice of their Parliamentary representatives. Oxford, indeed, has recently sent Mr. Gladstone to St. Stephen's; but Sir R. H. Inglis, who may be considered as the life representative of Alma Mater, and as such faithfully—in an old-fashioned crotchet and every antiquated prejudice—carrying out the mouldy views of his constituents, hardly carries the weight of intellectual metal which one would naturally look for in the chosen of a vast corporation of learned men, entrusted with the mental culture of the flower of the youth of England. Mr. Macaulay's name has been mentioned in connexion with the University of the Cam. But Mr. Macaulay is a thorough-going Whig; and, furthermore, it has been generally understood that he has given up making history, in order to write history—a step which would draw forth the great essayist from his silent labours in dissembling and displaying, by the flashing brilliance of his genius, the hoary remains of the departed Past, would, I am pretty sure, be welcomed by but few. Mr. Macaulay is better occupied in the "Albany" writing the narrative of his favourite William, and giving the *coup de grâce* to the

NEW YORK AMERICAN LINE-SHIP, "CORNELIUS GRINNELL."

THE NEW AMERICAN LINE-SHIP, "CORNELIUS GRINNELL."

This fine vessel, owned by Messrs. Grinnell, Minturn, and Co., of Boston, has lately been fitted out at that port, and is, "by all odds," the strongest ship of her size ever built in that vicinity.

She is 172 ft. on the keel, 180 ft. on deck, has 38 ft. extreme breadth of beam, and 23½ feet depth of hold, and will register about 1100 tons. She has 12 inches dead rise at half floor, a foot swell or rounding of sides, and about 26 inches sheer. Her keel is sided 16 in., moulded 30 in. forward, and 25 in. aft.; the floor timbers in the throats are 12 in. by 17 in., and she has three keelsons, each 15 in. square, or, combined, 15 in. by 45 in., making her back-bone about 7½ ft. through, from the top of the keelson to the base of the keel, of course including the moulding of the floor timbers. There are two bolts through every floor timber and the keel: one of 1½ in. copper, driven through and rivetted, and the other of refined iron, of the same size, driven through the keelsons, and down blunt into the keel. She has also sister and bilge keelsons, and a stringer, 7 ft. below the deck, over which the lower ends of the hanging knees lap, and through which they are bolted. The sister keelsons are 15 in. square, bolted through the navel timbers and the midship keelsons, and each other; the bilge keelsons, two on each side, are 10 in. by 16 in., and the stringer is 14 in. by 15 in., all square bolted, with 1¼ in. iron. The ceiling on the floor is 4½ in. thick, square fastened, with inch iron, and all the other ceiling, up to the deck, is 7½ in. thick, also square bolted; in a word, she is square fastened throughout. Forward she has seven hooks and pointers, and aft five, all of oak, and very closely bolted. About 10 ft. above the ceiling she has seven hold beams, viz. one before the foremast, three between it and the mainmast, and three between the main and mizen masts. These have standing, lodging, and hanging knees of oak, and pass through the midship stanchions, which are fitted to support them, and to extend to the beams above. These beams are 15 in. by 19 in., the lower-deck beams 15 in. by 16 in., and the upper-deck beams 15 in. by 16 in., all of Southern pine. The hanging knees in the hold are of oak, those in the between decks of hackmatack, and her hold stanchions, which are 10 in. square, are kneed to the beams and keelson. These entirely new points of construction are shown in the Engraving.

The lower deck waterways are 15 inches square, and the two strakes over them each 10 by 12 inches, and those inside of them each 5 by 7 inches, bolted vertically and horizontally. The planking of both decks is 3½ inches thick; and the ceiling of the between decks is all 3 inches, except the clamp, which is 6 inches. Her transom is 16 inches square, and the knees and breast-hooks in the between decks are very stout, and closely bolted.

The upper deck waterways are 12 inches square, the plank shear 6 by 16 inches, and the main rail of the same substance. Her garboards are 7 inches thick, the next strake 6, and the third of 5 inches, which is tapered to 4½ inches, the substance of the planking on the bottom. She has 20 strakes of wales of 7 by 5½ inches, and the waist is of 4½.

Her bulwarks are 5½ feet high, surmounted by a monkey rail; and she has a full poop, 80 feet long, and a topgallant forecastle, which almost forms a complete hurricane deck amidships.

Her mainmast is 84 feet long, main yard 74 foot square, and the other spars in proportion. She is built of oak: her scantling is mostly of yellow pine; is seasoned with salt, caulked in the hold, and well ventilated.

The *Horatius Grinnell* arrived a few days since in the London Docks, where the vessel has excited much curiosity among persons interested in ship-building. She is appointed to sail for New York on Saturday next, September 7.

HOLD OF THE "CORNELIUS GRINNELL" LINE-SHIP.

THE LATE SIR MARTIN ARCHER SHEE, BART., PRESIDENT OF THE ROYAL ACADEMY.

The venerable President of the Royal Academy died on the 19th instant, at Brighton, after a long and severe illness.

Sir Martin was born 23d December, 1770, the second son of Martin Shee, Esq., of Dublin, by Mary his wife, eldest daughter and co-heir of Francis Archer, Esq., of the same place, and grandson of George Shee, Esq., by Mary his wife, daughter of Martin Kirwan, Esq., of Blindwell, county Mayo. His uncle, Anthony Shee, Esq., of Castlebar, was father of the first Sir George Shee, Bart., of Dunmore.

Sir Martin, whose celebrity as a portrait painter has rendered his name universally known, became an Associate of the Academy in 1798, was elected a Royal Academician in 1800, and succeeded Sir Thos Lawrence in the President's chair, on which occasion he received the honour of Knighthood. He was also an honorary member of the Hibernian Academy, and of the Academies of New York, Charleston, and Philadelphia. It was not only in painting that Sir Martin Shee gained distinction. As a poet, he achieved considerable repu-

THE LATE SIR MARTIN ARCHER SHEE, P.R.A.

tation by his "Rhymes on Art," "Alasco," a tragedy, &c., and is immortalized by Byron in the following lines:—

> And here let SHEE and genius find a place,
> Whose pen and pencil yield an equal grace.
> To guide whose hand the sister Arts combine,
> And trace the poet's or the painter's line:
> Whose magic touch can bid the canvas glow,
> Or pour the easy rhyme's harmonious flow;
> While honours, doubly merited, attend
> The poet's rival, but the painter's friend.

Sir Martin married, in 1797, Mary, eldest daughter of James Power, Esq., of Youghall, county Cork, and had three sons and three daughters.

"THE FIRST OF SEPTEMBER."—THE LUNCHEON.—DRAWN BY DUNCAN.

THE FIRST OF SEPTEMBER—NEAR READING.

THE LUNCHEON

—— recubans sub tegmine fagi.

THE time is about noon, and "sitting in a pleasant shade" a social group of men and dogs is seen discussing a luncheon *al fresco*, on "the 1st of September, near Reading."

This is a very simple paragraph, and yet it contains within its narrow limits all the elements suitable for a *brochure* on Partridge Shooting. With your leave we will essay its analysis—if not for your learning, at all events not unseasonably *pour passer le temps*. Our theme does not lack novelty, for it commences with the end of its subject. A shooting party, resting from a grateful toil, has betaken itself to the russet shelter of an ancient beech and the savoury contents of an ample pannier. Think you our company consists of laggards? If so, they had found no habitation here. Set down this maxim in your memory, gentle Septembrian. Towards noon you miss the partridge from his ordinary haunt, and meet with him beside some patch of water; and, having drunk, he will repair to some bank or potato ridge, for the purpose of sunning himself. At this hour betake yourself and your dogs to some place of shade and repose, for the heat is too oppressive, peradventure, for biped or quadruped, and the scenting is sure to be bad. About three (this leaves you at liberty to choose between a cigar or a siesta) the birds will again begin to run, and, if a breeze, too, should put itself in motion, look for sport: afternoon shooting is ten per cent. better than morning. If the range you beat in the morning held a good head of birds, go back to it: partridges, unless very frequently disturbed, are found more generally near home than elsewhere. . . . . "Near Reading (this is *apropos* of the scene of action), Berkshire," we are told by the "Gazetteer," "is a very fruitful district, producing grain in great abundance." Now, is not that the sort of place where one might expect to meet with the sample of ornithology most sought after in September? Choose a grain country. Your partridge has a taste for civilisation, and makes his home among hedgerows, and where the hand of man has made the rough places smooth. The grouse—wild denizen of blue mountain and brown heath—ever recedes before cultivation: the partridge is a domestic bird, and seems in his native element when served at table with bread sauce.

"The First of September"—how much to the lover of the trigger do these words convey! The dawn of this day, be it foul or be it fair, opens to him a campaign, the delights of which, far from at any time wearying, accumulate intensity and force by iteration. An energetic and long-repressed passion the curb now removed—bursts forth doubly vigorous, and slakes itself in enjoyment. . . . . A most enviable moment is that when the shooter takes the field on the thrice-welcome morning of "the first." Calm and impassioned as may be the outward semblance of the man, he has a world of agreeable emotion within. The expectations, the hopes, the anxieties of months have long centered on the issues of this day; and behold, the trial which soon will destroy or fulfil them has begun. The very dogs, too, on whom, if he is what he ought to be, his eye rests with no ordinary pride, give dumb utterance to their deep joy by gestures, and by the ardour and earnestness wherewith they discharge their duties. Full of life and energy, with a purpose as steady and unflagging as his bodily frame, the sportsman advances, beating closely and carefully field and meadow, bush and brake. Nor is it alone in the raising, scattering, and thinning his feathered quarry, that he experiences pleasure. His soul, like a delicate mirror, answers quick to the impressions of material objects. From the red squirrel, skipping among the boughs, to the broad flush of beauty shed by the sloping sunbeams on the yellow landscape beneath, there is nothing escapes him, or that passes without contributing its quota of delight. He inspires health from the fresh and elastic atmosphere that cools his glowing cheek, and gathers additional strength and hardiness from exercise and fatigue. . . . Such is the language of an enthusiast; the more grave follower of the pastime has pondered thus, and from his reflections may be gleaned good matter.

There is one general rule worthy of observance by the partridge-shooter, viz. that at every season of the year the favourite resort of his quarry is the wheat-stubble or the turnip-field—next to which are the fallows. In trying the latter, the lands nearest the hedgerows are the most likely. Towards the close of the year the birds especially settle upon fallow land; and, should the weather be fine and open, there will he find them, if there be any in the neighbourhood. They lie close, and he may look out for double shots. At this time, too, he should beat closely furze, fern, colesced, and the long grass in young plantations. In fogs and high winds they lie very close; and so they do after heavy rain, particularly among turnips. As regards his mechanical accomplishments—first, let him be steady—"steady, boys, steady." The sudden flush tries the stuff the nerves are made of. Don't hurry up to a point—a palpitating heart does not help to a straight eye or a staunch finger. Also, heed must be had to a quick movement of the gun up to the shoulder, and coolness in levelling it. In shooting, it is a canon ever to be on the *qui vive:* where least the game is expected to spring, is the spot whence most commonly it is raised. Let the system of beating be both close and careful. Never set off on a wild-goose chase in pursuit of rumoured coveys, neglecting the probability of finding where you are. And, having found them, stick to your game: once on the wing, let your object be to scatter the covey. Judgment and sagacity develop themselves here to goodly account. The line, the probable length of flight, the inducement to settle which cover just beaten may hold out—all must be maturely weighed. The backs of ditches, scraps of old palings, stubbles no thicker than a school-boy's beard, surfaces offering no more shelter than the palm of your hand, must be curiously scrutinised when birds are scattered, for they will drop anywhere. Is it necessary to say, better no dogs at all than those which run in, or "blink?" or, as Sir Harcourt Lees counselled his Irish friends, "Keep your powder dry?" There's no necessity for your aim to be as murderous as that of the wager men at the Red House. You do not sport to get a dinner for your appetite, but rather to get an appetite for your dinner. Go forth, then, well found in appointments, with a light heart and a pair of keen eyes, and do not fear our wish will be a vain one, when we bid you a pleasant "First of September."

The Earl of Cardigan, with his beautiful schooner yacht, the *Enchantress*, has been for the last fortnight at Lowestoft, and is, we understand, about to become the proprietor of a marine residence in that popular watering-place, which has this year been visited by a number of fashionables altogether unprecedented on the eastern coast.

NEW SAFETY GUN.

M. Fontenau, of Nantes, has just applied a simple and ingenious arrangement for the prevention of accidents by fire arms. It consists merely in adapting a screw to the ordinary hammer which strikes the percussion cap. It will be seen by the Engraving that the bottom of the screw strikes the cap; consequently, by giving the screw two or three turns to elevate it, the capsule can receive no blow, although the hammer fall by accident or otherwise

NEW SAFETY GUN.

AN EPISODE IN THE LIFE OF THE LATE LOUIS PHILIPPE

We have been favoured by a Correspondent with the annexed Sketch of the cottage, at Honfleur, in which the ex-King and Queen of the French took refuge for a few days soon after the revolution of February, 1848. The following details relative to this memorable event are from the pen of the Right Hon. John Wilson Croker, and are extracted from the "Quarterly Review" for March, 1850.

"Every one who has sailed in front of Honfleur, must have remarked a little chapel situated on the top of the wooded hill that overhangs the town. It was dedicated by the piety of the sailors of ancient days to Notre Dame de Grâce, as was a similar one on the opposite shore. From it, Mr. de Perthuis' cottage is commonly called La Grâce; and we can easily imagine the satisfaction of the Royal guests at finding themselves under the shelter of a friendly roof with a name of such good omen.

COTTAGE OF LA GRACE, AT HONFLEUR.

"On Thursday, the 2nd of March (1848), just at daybreak, the inmates of La Grâce were startled by the arrival of a stranger, who, however, turned out to be Mr. Jones, the English Vice-Consul at Havre, with a message from the Consul, Mr. Featherstonhaugh, announcing that the *Express* steam-packet had returned and was placed entirely at the King's disposal, and that Mr. Jones would concert with his Majesty the means of embarkation. He also brought news, if possible, more welcome—a letter from Mr. Besson, announcing that the Duke de Nemours, his little daughter the Princess Marguerite, and the Princess Clementine, with her husband and children, were safe in England. This double good news reanimated the whole party, who were just before very much exhausted both in body and mind. But the main difficulty still remained, how they were to get to the *Express*.

Escape became urgent; for not only had the Procureur de la République of the district hastened to Trouville with his gendarmes to seize the stranger (who, luckily, had left it some hours), but, having ascertained that the stranger was the King, and that Mr. de Perthuis was in his company, that functionary concluded that his Majesty was at La Grâce, and a domiciliary visit to the Pavilion was subsequently made.

The evening packet (from Havre to Honfleur) brought back Mr. Besson and Mr. Jones, with the result of the council held on the other side of the water, which was, that the whole party should instantly quit La Grâce, and, taking advantage of the dusk of the evening, embark in the same packet by which these gentlemen had arrived, for a passage to Havre, where there were but a few steps to be walked between leaving the Honfleur boat and getting on board the *Express*. The Queen was still to be Madame Lebrun; but the King, with an

English passport, had become Mr. William Smith. Not a moment was to be lost. The King, disguised as before, with the addition of a coarse great-coat, passed through Dover, and, by Ramsgate and Tunis, through one line of streets; Madame Le Brun, leaning on her *nephew's* arm, by another. There was a great crowd on the quay of Honfleur, and several gendarmes; but Mr. Smith soon recognised Mr. Jones, the Vice-Consul, and, after a pretty loud salutation in English (which few Mr. Smiths speak better), took his arm, and stepped on board the packet, where he sat down immediately on board one of the passengers' benches. Madame Le Brun took a seat on the other side. The vessel, the *Courser*, happened to be one that the King had employed the summer before at Tréport. M. Lamartine, who mistakes even the place, and all the circumstances of this embarkation, embroiders it with a statement that the King was recognised by the crew, who, with the humour and generosity inherent in all Frenchmen, would not betray him. We are satisfied that there are very few seamen who would have betrayed him; but the fact is, that he was not recognised; and, when the steward went about to collect the fares and some gratuity for the band, Mr. Smith shook his head, as if understanding no French, and his friend Mr. Jones paid for both. On landing at the quay of Havre, amidst a crowd of people and the cranes of the several hotels was Mr. Featherstonhaugh, who, addressing Mr. Smith as his *uncle*, whom he was delighted to see, conducted him a few paces further on, into the *Express*, lying at the quay, with her steam up; Madame Lebrun following."

CALENDAR FOR THE WEEK.

SUNDAY, September 1.—14th Sunday after Trinity.
MONDAY, 2.—Great Fire of London, 1666.
TUESDAY, 3.—Sun rises, 5h. 10m.; sets, 6h. 42m.
WEDNESDAY, 4.—Calais taken by Edward III., 1347.
THURSDAY, 5.—Old St. Bartholomew.
FRIDAY, 6. Field-Marshal Blucher died, 1819.
SATURDAY, 7.—Bunnerchus. Plague of London, 1665.

TIMES OF HIGH WATER AT LONDON BRIDGE, FOR THE WEEK ENDING SEPTEMBER 7, 1850.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager, Mr. W Batty.—On MONDAY, SEPTEMBER 2nd, 1850, the Entertainments will commence, at Seven o'Clock, with (for the 29th time) the magnificent Spectacle of MAZEPPA and the WILD HORSE. Masseppa, Mr. N. T. Hicks. To be succeeded by a most brilliant routine of Equestrian Wonders in the Arena, and the extraordinary and elegant Exercises of the accomplished artists, Mdlle Garioni, on the Tight Rope. To conclude with the highly interesting Mole-Drama of the WHITE FARM.—Box Office open from Eleven till Four. Stage Manager, Mr. W. West.

ROYAL POLYTECHNIC INSTITUTION.—During this week the ALPINE SINGERS will perform daily at Four, and in the Evenings at Half-past Eight. LECTURE on the HYDRO-ELECTRIC MACHINE by Dr. Bachhoffner, daily at Two, and in the Evenings at Eight. LECTURE on the MECHANICAL PROPERTIES of a JET of STEAM, daily at a Quarter-past Three, and in the Evenings at a Quarter-past Nine. NEW SERIES of DISSOLVING VIEWS, daily at Half-past Four, and the Evenings at a Quarter to Ten; also a SERIES exhibiting SCENES in the ARCTIC REGIONS and CEYLON, daily at One o'Clock. Admission, 1s.; Schools, Half-price.

LOVE'S ENTERTAINMENTS.—These celebrated Entertainments will be given on MONDAY, Sept. 2, at the Queen's Rooms, Ryde; on Tuesday, Sept. 3, at the Town Hall, Ryde, Isle of Wight. On Wednesday, Sept. 11, at the Royal Hotel, Ventnor. On Thursday, Sept. 5, at the Assembly Rooms, Regnor. On Friday, Sept. 6, at the Public Rooms, Littlehampton. On Monday, Sept. 9, at the Assembly Rooms, Tunbridge. On Tuesday Sept. 10, at the Union Hall, Torquay. On Wednesday, Sept. 11, at the Assembly Rooms, Ashburton. On Thursday, Sept. 12, at the Savage Reception Rooms, Plymouth. On Friday, Sept. 13, at the Assembly Rooms, Dawlish. On Monday, Sept. 16, at the Assembly Rooms, Exeter. On Tuesday, Sept. 17, at the Institution, Ballarbay. On Wednesday, Sept. 18, at Bradon. On Tuesday, Sept. 17, at the Institution, Ballarbay. On Wednesday, Sept. 18, at Reading. On Tuesday, Sept. 17, at the Institution, Ballarbay. On Wednesday, Sept. 18, at Reading. On Thursday, Sept. 19, at the Assembly Rooms, Winchester. On Friday, Sept. 20, at Basingstoke. On Monday, Sept. 23, at the Assembly Rooms, Dawlish. On Monday, Sept. 16, at the Assembly Rooms, Exeter

COUNTRY NEWS.

REPRESENTATION OF POOLE.—In consequence of the death of Mr. Robinson, a vacancy has occurred in the representation of this borough. Two candidates are in the field—Mr. Savage, of St. Leonard's, on the Protectionist, and Mr. Seymour, of Knoyle House, near Shaftesbury, a Free-trader. Mr. Ledyard, a banker, is mentioned as likely to be the successful candidate.

An equestrian statue of her Majesty is about to be erected in Glas-

FRENCH ALBERT'S BIRTHDAY.—The anniversary of the birth-day of his Royal Highness Prince Albert was celebrated at the Castle Hotel, Windsor, on Monday, the 26th, when about forty guests, consisting chiefly of the Prince's tradesmen in the above town, sat down to an excellent dinner, provided by Mr. Chater, in his usual good style. Amongst the gentlemen present were William Hanam, Esq. (Mayor), Frederick Twnch, Esq., (Alderman), Robert Blunt, Esq., William Jennings, Esq., &c. Her Majesty upon the occasion most graciously sent a fine buck, and a magnificent dessert. The enjoyment of the evening was much enhanced by the excellent singing of Messrs. N. J. Sperle and Holmes, from London.

HER PEEL MONUMENT IN MANCHESTER.—A general public meeting of the subscribers to this fund was held at three o'clock on Wednesday afternoon, in the Mayor's parlour, at the Town-hall. The mayor announced that the subscriptions amounted to upwards of £5000, of which £4221 had been paid into the bank. After considerable discussion, two resolutions were passed, the effect of which was to appoint a committee to carry out the erection of a colossal bronze statue to the memory of the late Sir Robert Peel in the area surrounding the Manchester Royal Infirmary, the character and ornamentation of the pedestal, and the drapery of the statue, being left to the committee and artists. An attempt made by a few gentlemen, to insert a proviso that the statue should be attired in the costume of the present day, was negatived.

Subscriptions are being collected for the erection of a Peel memorial at Darwen, near Blackburn.

EXTRAORDINARY SHOOT.—The Earl of Stamford and Warrington, with a friend, this season killed 261 head of grouse in two days and a half, on his Lordship's moors in Lancashire. The birds were very much packed and wild.

GROUSE IN CHESHIRE.—The grousing season has come in under less auspicious promise than has been known for many years, and it is feared this beautiful species of game will soon become extinct. Two or three nights' frost in the month of May is supposed to be the immediate cause of the great falling off in the number of birds this year, by the extinction of the eggs when hatching.

THE MOORS.—From various inquiries made in Wigtonshire and the Stewartry, we may safely state that grouse are this season numerous, and in exceedingly good condition. Sportsmen have bagged large quantities, and twenty brace in a day have not been uncommon. The other day we saw nine boxes of grouse addressed to various parts of England lying in the mail at Castle-Douglas, waiting the arrival of the mail for Dumfries. The greatest feat heard of was the execution done on one of Lord Galloway's moors, on which a young gentleman, assisted by a brother and a beating one day and a half's shooting, seventy brace of fine birds.—*Dumfries Courier.*

DISCOVERY OF A ROMAN VILLA AT HADSTOCK.—The Hon. Mr. Neville's exertions in pursuit of the Roman remains have of late been crowned during the last few days. The excavators in the employ and under the personal direction of the hon. gentleman have brought to view the remains of a singularly formed villa. The site on which the discovery was made is in a field known as "Sunkin Church Field," in the above parish. The discovery proves that a building of considerable importance once occupied the place, thus affording to the antiquary, &c., an opportunity to view what is seldom met with, as the foundations, hypocaust, flues, &c., are of that rare character that cannot fail to gratify.

The Lord Bishop of Chichester will hold his visitation at Lewes on the 24th, and at Hastings on the 26th September.

The Bishop of Manchester consecrated a new church at Heaton Mersey, on Monday.

BIRKENHEAD.—This town presents a marked contrast to its appearance twelve months ago. The utmost activity now prevails, and the number of artificers there known to the Waterloo Dock Act of 1850 men are employed in making the docks and the immense float, and some of the docks in the locality of Wallasey Pool will be ready to admit vessels in the beginning of October. The ship-building yard of Mr. Wilson, at Birkenhead, is in a complete state of readiness for work, and a few days ago the keel of a first-class frigate, for the BRITISH GOVERNMENT, was laid. The graving dock will admit of the largest screw steamer afloat. There are few shops now empty, business is becoming more brisk, and almost every house in Birkenhead and Tranmere is occupied.

HOLYHEAD HARBOUR.—The Government have completed the purchase of the ground and property requisite for the construction of the new harbour at Holyhead, and the whole of the works will be pushed forward with the utmost expedition, nearly 1500 men being constantly engaged in the various operations. The contractors are Messrs. Peto, Brassey, and Betts, and the superintendence of the works, under the direction of the Admiralty, is vested in Captain Denham, R.N. Many thousands of cubic feet of stone are now ready for the commencement and carrying on of the extensive sea-wall.

The emigrant ship from Birkenhead left that place on Tuesday, Buenos Ayres was the destination.

On Saturday, about eleven o'clock in the forenoon, Samuel Lord, of Radcliffe, Lancashire, cotton-waste dealer, was working at a pan-pit belonging to Messrs. Andrew Knowles and Co., stmate at Green-lane, Radcliffe, when the roof of the pit fell in, and Lord was killed on the spot.

Thirty-seven bottle-nose whales were captured in the Forth, Scotland, a few miles above Alloa, on Sunday last.

DESTRUCTIVE FIRE.—On Monday afternoon, about three o'clock, a fire broke out at the end of St. John's Farmyard, adjoining the town of Wallingford, Berks; and, as there was a strong westerly wind blowing at the time, the whole of the thatching and ricks were shortly in a blaze. By the prompt assistance of three engines, the progress of the flames was to some extent arrested; but not till the whole of the farm-buildings and several ricks of corn and hay were entirely consumed. When the conflagration was extinguished, nothing remained on the back and left-hand but a heap of ruins. A large cottage adjoining, the residence of Mr. W. S. Clarke, also caught fire several times, but was not extinguished until the dwelling had sustained considerable damage. The greenhouse and valuable collection of plants and flowers were destroyed. The cause of the fire, which is attributed by some to the act of an incendiary, has not yet been satisfactorily ascertained. The property destroyed is of a heavy amount, but most of it was insured.

SOYER'S MAGIC STOVE.—*La Patrie* tells a story of a dispute between an English traveller and a *douanier* respecting the admissibility of M. Soyer's magic stove. The *douanier* contended that it was hardware prohibited by law. The Englishman asserted that it was furniture, and, to convince the *douanier*, he lighted a few charcoal embers, he quietly fixed the stove, lighted a brass lamp, produced from a kind of book one or two raw *cotelettes* ready egged and breaded, threw them into a microscopic frying-pan, and in a few minutes up in Paris, to the great astonishment of the spectators. The *douanier* was not proof against this demonstration, and the stove was allowed to pass.

THE PEACEFUL PURSUIT OF AGRICULTURE IN TEXAS.—We find in the Western Texas, of the 11th of July, published at San Antonio, a detailed account of the late Indian depredations. We abridge from it the following:—

"On the night of the 3rd inst., a party of Indians stole from the rancho of Mr. Ley, four miles from Seguin, nine horses also, on the night of the 4th inst., from Mr. Erskine, living in the neighbourhood of Seguin, a number of horses, the exact number we have been unable to ascertain. On the evening of the 7th, the party of Mr. Kendall, county Sheriff, on the Colorado, three miles below the Sulphur Springs, were driven off. The citizens living about the springs were gathering on the morning of the 8th to pursue them. On sunday, the 7th, the Indians were on the Colorado and on Monday, a party of 15 or 20 men from the neighbourhood of Seguin crossed the Coleto on the trail, in hot pursuit. It is probable they will join the party from the Springs and pursue them together. On Monday last an express arrived here, who reported that on Friday, the 5th inst., two parties of Indians were committing depredations on the Cibolo, about 45 miles below this place. One party of fifteen had attacked the rancho of Mr. Cassiano, killed one man, and driven off the horses. Another party of six or seven had, when seen, a drove of horses, the majority of which, it is supposed, belonged to Mr. James Peacock. On the 8th ult., Lieutenant Underwood, with 13 men, left Fort Merrill, to escort the mail rider to Laredo, and on the same day met with a party of Indians on their return, who fired on him from the opposite side of the river. He immediately crossed over and dispersed them. On the 12th instant, when within about 35 miles of Laredo, he met a party of nine Indians, well mounted, who came upon him with guns and arrows, which being returned, a sharp conflict ensued, which lasted about half an hour, when the Indians retreated. The condition of Lieutenant Underwood's horses not permitting a charge, he dismounted them and fought on foot. Lieutenant Underwood had one man killed and seven wounded, among whom was Lieutenant Underwood himself. One of the wounded men died a few days afterwards, at Fort M'Intosh. The Indians are reported to have had one killed, and four or five wounded—one very seriously, if not mortally. During the skirmish one horse and one mule strayed away, which were doubtless carried off by the Indians. We learn that the mail was also lost."

AMERICAN FIREMEN.—There was a fire at Washington on the 11th instant, accompanied (as would seem, to be the ordinary course of things in the United States) by a riot. The following are the particulars as we find them in the American papers:—"A false alarm of fire broke out last night, and continued about nine o'clock last night, and a personal collision occurred between some companies in Pennsylvania-avenue, near Perseverance engine-house. Bricks were thrown and pistols fired; but, it rough the exertions of the police, the rioters separated without serious damage to any one. This morning, about one o'clock, an alarm again sounded and a number of frame buildings, on E, near thirteenth-street, were found to be fire. The companies were promptly on the spot, and, after subduing the fire, a disgraceful riot and fight ensued among the firemen, in which one man was stabbed dangerously, and Captain Goddard, endeavouring to quell the riot, also received a few wounds. The body of an unknown man is now lying at the watch-house, which was discovered this morning some distance from the fire, and supposed to have been assassinated.

POSTSCRIPT.

ARRIVAL OF HER MAJESTY AT EDINBURGH.

Her Majesty arrived at Edinburgh at five o'clock on Thursday afternoon.

At Berwick she inaugurated the magnificent new viaduct over the Tweed at the Royal Border Bridge, at an earlier period of the day. The reception was of a very enthusiastic character, and the scene altogether was very imposing. At [illegible] through Sir George Grey, on her road, and on the arrival of the train in Edinburgh, the whole of the population turned out to welcome her.

The display was among the grandest and most striking the metropolis of Scotland has ever witnessed.

The slopes of Arthur's Seat, round the base of which the Royal party passed in procession, were covered with thousands of spectators; and, amidst loud cheering and under the protection of her body-guard of Royal Archers, her Majesty was conducted to her ancient Palace of Holyrood.

The inhabitants of Edinburgh, and of Scotland generally, are greatly delighted at finding Holyrood once more occupied as a Royal residence.

FEMALE ORPHAN ASYLUM.—On Thursday a general court of the governors of this charity was held in the asylum, Westminster-bridge-road, to elect a President in the room of the late Duke of Cambridge. His Royal Highness the present Duke of Cambridge having signified his willingness to accept the office, was unanimously elected President.

THE SUBMARINE ELECTRIC TELEGRAPH.—On Thursday afternoon his Grace the Duke of Wellington visited the Submarine Electric Telegraph, that now connects the shores of England and France. The wires are carried in temporarily at the terminus of the South-eastern Railway. In the absence of Mr. Reid, the telegraph engineer, who superintended the laying of the wires across the Channel, his foreman showed the noble Duke the working of the instruments, and explained to him how the wires were insulated, and the plan adopted for laying them across. At the Duke's request, he also furnished him with a specimen of the insulated wire. His Grace seemed highly pleased, and would, no doubt, appreciate this wonderful agency that could communicate in a second of time between this country and the Continent.

CLOSING OF THE BRITISH MUSEUM.—The British Museum was closed yesterday (Friday) till the 21st of September, for the purpose of the reading-rooms, &c. being thoroughly cleansed.

LATEST FOREIGN NEWS.

FRANCE

Our accounts of yesterday (Friday) from Paris state that the President expresses himself highly gratified by his reception in the departments, which has closed prospects of [illegible] tranquillity. During his recent tour, the President received no less than 3000 petitions.

Louis Napoleon, it is said, will leave Paris for Cherbourg on the 5th of September, to review the French fleet; and, after six returns to Paris, he will visit the northern departments of France.

The Council-General of the Aube have voted the immediate revision of the Constitution by twenty votes to five. The Council-General of the Eastern Pyrenees have come to a similar decision.

ROYAL VISIT TO CASTLE HOWARD.

On Tuesday morning, according to arrangement, her Majesty and Prince Albert came to town, in order to proceed, by the London and North-Western Railway, to Castle Howard, to visit the Earl of Carlisle, on their way to Scotland. It had been arranged that the train should start from Euston square at half-past eleven o'clock; and soon after ten o'clock, a number of persons, mostly ladies, who were admitted by the politeness of the directors of the Railway, allowed to witness the Royal departure from the opposite platform, began to assemble. It was not, however, till near twelve o'clock, that the Royal carriages, escorted by a detachment of the Lancers, drew up in front of the Parcels Office, from the platform of which the train was to start. The cause of this delay was, we understand,

ARRIVAL OF HER MAJESTY AT THE CASTLE HOWARD RAILWAY STATION.

her admiration of the many interesting and valuable works of art which they contain.

At twelve o'clock the Royal party visited the cricket-ground, and witnessed for some time the play of the Castle Howard Club. About two o'clock, luncheon was provided in the Castle for a party of seventy; and after it the Royal visitors proceeded to inspect the fine herd of short-horned cattle with which the park is stocked, and upon the merits of which Mr. Henderson, the Earl's land-steward, feels a very natural and laudable pride. The stock of cows deserve especial praise for their symmetrical proportions and evident purity of breed.

At three o'clock her Majesty and the Prince drove round the park, and admired the splendid prospects and the stately avenues with which it abounds. There are many noblemen's seats, the grounds round which display evidences of a more active superintendence and a more expensive outlay; but there are few with a richer variety of scenic effects dependent upon the natural beauty of the woods and the fine undulating sweep of the land. The whole proceedings of the day were of the most quiet, unostentatious character, and in complete keeping with the privacy which her Majesty wished to preserve in visiting Castle Howard. So little formality was there, that the crowds of visitors flocking there to catch a glimpse of their Queen, and who during the morning kept respectfully at a distance, in the after-part of the day occupied, in the form of a well-conducted mob, the entire approach to the Castle, up to the very steps of the main entrance. Her Majesty was received wherever she went with every sign of loyal attachment. The number of people assembled was very considerable, but not so large as to produce the tumultuous character of a town demonstration of loyalty.

THURSDAY.

The Queen and Prince Albert closed their visit to the Earl of Carlisle this morning; and having taken an affectionate leave of their noble hostess, left Castle Howard for the railway station, at ten o'clock. The Earl of Carlisle and his brothers accompanied the Royal party on horseback to the station.

After a few moments' delay, her Majesty and the Prince, with the Royal children, having taken their leave of Lord Carlisle, entered the Royal carriage, and the train immediately sped on towards York.

On the arrival of the Royal party at York, her Majesty was met by a party of the directors of the York, Newcastle, and Berwick Railway, who attended her Majesty on her progress northwards.

The route contained no novelty of scenery for the Queen, the whole line having been traversed last year. On approaching Newcastle, the town, with its handsome churches and ancient Norman castle, as well as the shipping on the Tyne, were disclosed to view. The Royal train, due to its appointed time, crossed the High Level Bridge at a quarter to one o'clock, and entered the new central station amid the cheers of the assembled thousands.

On the Royal train drawing up within the station, the Mayors of the two boroughs, headed by Earl Grey as Lord-Lieutenant of Northumberland, approached the Royal carriage. Her Majesty and the Prince, with the Royal children, then alighted, and proceeded across the platform to the apartments prepared for their reception. The Mayor of Newcastle (Mr. Joseph Crowhall) and the Mayor of Gateshead (Mr. Hawkes) were introduced to the Queen, and had the honour of presenting addresses from the boroughs over which they preside.

Her Majesty and the Royal party then returned to the platform, and entering the Royal carriage, proceeded on their journey northwards.

Nothing could possibly exceed the manifestations of affectionate loyalty which greeted the Royal party during their arrival and departure.

Her Majesty was expected to reach Berwick about three o'clock, when the ceremony of opening the Tweed Viaduct, henceforth to be called the "Royal Border Bridge," would take place immediately upon her arrival.

After a short delay at Berwick-upon-Tweed, her Majesty and the Royal party were to proceed direct to Edinburgh, where they were expected to arrive about five o'clock.

Next week, we shall present our readers with some additional Illustrations of this very interesting Royal visit. We cannot, however, omit the present opportunity of expressing our acknowledgments to the Earl of Carlisle, whose courtesy to our Artists has permitted them to make the requisite Sketches.

ARRIVAL OF THE QUEEN AT THE LODGE, CASTLE HOWARD

Louis Philippe

THE LATE LOUIS-PHILIPPE, EX-KING OF THE FRENCH.

The vicissitudes of Kings form an impressive chapter in the history of Europe; but the most striking episode in the narrative is, undoubtedly, the chequered life of the Prince who has just departed from amongst us. One week the mightiest monarch, on the loftiest pinnacle of ambition, he was, the next, an exile and a suppliant in a foreign land—his past supremacy almost forgotten.

Louis Philippe died on the morning of Monday the 26th instant, at Claremont, in the presence of the Queen and several members of his family. He had been made aware of his approaching dissolution early the previous day, and receiving with calmness the melancholy intimation, prepared for the final arrangements he wished to make. After a conversation with the Queen, he dictated, with remarkable clearness, the concluding portion of his Memoirs, and then, having caused to be assembled his chaplain, the Abbé Gaelle, and all his children and grandchildren who were at Claremont, he received, with resignation and firmness, the last rites of the Catholic Church. Towards seven in the evening the debility that had oppressed him appeared to pass off, and fever came on, which continued during the night with much violence, but without disturbing his composure of mind. At eight o'clock in the morning he expired, in the presence of his devoted wife, and of the following members of his family—the Duchess of Orleans, the Count of Paris, the Duke de Chartres, the Duke and Duchess de Nemours, the Prince and Princess de Joinville, the Duke and Duchess d'Aumale, and the Duchess Augusta of Saxe-Coburg. Thus ended the closing scene of the life of Louis Philippe of Orleans, once the Sovereign of a great people, the soldier of one revolution, the conqueror of a second, and the victim of a third.

We will not now attempt any minute or elaborate description of Louis Philippe's extraordinary career. It will be more acceptable to annex a brief and succinct account of the leading events of his life, and conclude with a few particulars of the renowned family whose faults of intrigue and ambition the deceased inherited in a very marked degree.

Louis Philippe was born in Paris, 6th Oct., 1773, the eldest son of Philippe Joseph Duke of Orleans (so well-known under the revolutionary *sobriquet* of Egalité), by Marie Louise Adelaide de Bourbon his wife, daughter and heir of the wealthy Duke de Penthievre. At his birth he bore the [illegible] of Valois; but after the death of his grandfather, [illegible]-styled Duke de Chartres. The care of the young Prince's education was assigned to Madame de Genlis, and ably and admirably did that eminent woman perform the important duties entrusted to her. From her guidance, Louis Philippe passed at once to the busy arena of active life. In 1791, the young Prince, then Duke de Chartres, having previously received the appointment of Colonel in the 14th Dragoons, assumed the command of that regiment, and shortly after, quitting the garrison of Vendôme, proceeded to Valenciennes, where he continued to pursue his military avocations. In the [illegible] war [illegible] Austria, the Duke made his first campaign [illegible] and with Dumouriez, at [illegible] progressing with giant strides [illegible] scaffold, and, within a few months after, the Duke of Orleans was seized on a plea of conspiracy against the French nation, and, after a mock trial, consigned to the executioner. A short time previously to the death of his father, the Duke de Chartres had effected his escape through Belgium into Switzerland, and there was joined by his sister Adelaide and Madame de [illegible]. Our confined space precludes the possibility of our dwelling on the romantic events of this period of Louis Philippe's life, and permits us to glance only at his wanderings through Switzerland, Denmark, Lapland, Finland, America, and England. For one year he held the appointment of Professor in the College of Reichenau, at a salary of £50; and for that sum undertook to teach history, mathematics, and English. He bore the name of Chabaud-Latour, and none but the superiors of the institution were aware of his rank. The news of his father's execution reached him while quietly instructing the youth of Reichenau, and he instantly threw up his Professorship, and after a protracted journey through Northern Europe, succeeded, by the kind instrumentality of Mr. Morris, the American Ambassador at Paris, in reaching the New World, where he landed at Philadelphia, 24th October, 1796, and where he was joined by his brothers, Montpensier and Beaujolais. The three brothers passed the winter in that city, and afterwards visited General Washington at Mount Vernon. Their residence in the United States was not, however, of any long duration. After an inhospitable reception by the Spanish authorities in Cuba, the Royal exiles made their way to England, in February, 1800, and thence immediately proceeded to Barcelona, in the hope of meeting their exiled mother. But this object failing, they returned to England, and took up their abode at Twickenham, on the banks of the Thames. In this country they were treated with the greatest respect and consideration, and were furnished with ample opportunities for repose after their exciting adventures. Within a few years, however, the Duke of Montpensier and the Count Beaujolais both died: the former in England, the latter at Malta. Louis Philippe had accompanied his last surviving brother to that island, and after his interment sailed for Sicily, on the invitation of the King of Naples. There he gained the affections of the Princess Amelia, and their marriage took place in November, 1809. No event of material importance marks the subsequent life of the Duke, until the year 1814, when, on the abdication of Napoleon, he returned to Paris, and, for a short period, was in the full enjoyment of his honours. In 1815, Napoleon's escape from Elba again called the Duke of Orleans into active employment, and he proceeded, in obedience to the desire of Louis XVIII. to take the command of the Army of the North. In this situation he remained until the 24th of March, when he surrendered his command to the Duke de Treviso, and retired to Twickenham. After the Hundred Days, the Duke of Orleans obeyed the ordinance, authorizing the Princes of the blood to take their seats in the Chamber of Peers; but, subsequently incurring the jealousy and displeasure of the Court, he resought his old

residence on the Thames, and dwelt there in seclusion until 1817, when he went back to France, and devoted himself to the education of his children, until the Revolution of 1830 broke out, eventuating in his elevation to the Throne of France. The subsequent events of his reign, and the memorable outbreak of 1848, that finally overthrew the dynasty that the ill-fated Monarch had strained every nerve to establish, are too fresh on the public mind to require recapitulation here.

The present House of Orleans was founded by PHILIP D' ORLEANS (second son of Louis XIII., King of France, by Anne of Austria, his wife), who succeeded to the dukedom at the decease of his uncle, the celebrated Gaston d'Orleans, and achieved, as military commander, by his victory of Mon Cassel, some martial reputation. Both his wives were of the Royal House of England, the first, Henrietta, being daughter of our Charles I., and the second, Charlotte Elizabeth, that Monarch's niece. By the latter lady, he was father of PHILIP II., Duke of ORLEANS, the famous Regent of France. He married Mdlle. de Blois, one of the daughters of Louis XIV by Madame de Montespan, and had a son and successor, LOUIS, Duke of ORLEANS, who married a Princess of Baden, but was deprived by death of his beautiful wife, to whom he was passionately attached, two years after his nuptials. Abandoning, in consequence, all the attractions of the most fascinating Court of Europe, forgetful of the hereditary ambition of his race, and cherishing only the memory of his youthful bride, the broken-hearted Prince retired altogether from the busy scenes of life, and, in the seclusion of the Abbey of St. Geneviève, devoted the remainder of his earthly pilgrimage to Ecclesiastical studies. His death occurred on Feb. 4, 1752, when the honours of his illustrious house devolved on his son LOUIS PHILIPPE, Duke of Orleans, first Prince of the Blood, and first Peer of France; who married Louise-Henriette, daughter of Louis Armand, Prince of Bourbon Conti; and had (with a daughter, Louise-Maria-Theresa-Mathilda, wife of Louis Henry Joseph, Duke of Bourbon, and mother of the ill-fated Duke d'Enghien) a son, LOUIS PHILIPPE JOSEPH, Duke of Orleans, "the Egalite" of the French revolution

By his Consort, the estimable and excellent Queen, Maria-Amelia, daughter of Ferdinand, King of the Two Sicilies, Louis Philippe had issue:—

I.—Ferdinand-Philippe-Louis-Charles-Henry-Joseph, Duke of Orleans, born 3rd September, 1810; married 30th May, 1837, Helena-Louisa-Elizabeth (born 24th January, 1814), daughter of Frederick-Louis, late Hereditary Grand Duke of Mecklenburg-Schwerin, and died 13th July, 1842, leaving issue:—Louis-Philippe-Albert, Count of Paris, born 24th August, 1838; and Robert-Philippe-Louis, Duke of Chartres, born 9th of November, 1840.

II.—Louis-Charles-Philippe-Raphael, Duke de Nemours, born 25th October, 1814; married 27th April, 1840, the Princess Victoria of Saxe Coburg Gothia, and has issue.

III.—Francis-Ferdinand-Philippe-Louis-Marie, Prince de Joinville, born 14th October, 1818; married, 1st May, 1843, Donna Frances-Caroline-Jean (born 2nd August, 1824), daughter of the late Emperor Don Pedro of Brazil, and has issue.

IV.—Henry-Eugène-Philippe-Louis, Duke d'Aumale, born 16th January, 1822; married the Princess Maria-Caroline-Augusta de Bourbon, daughter of Prince Leopold of Salerno, and has issue.

V.—Anthony-Marie-Philippe-Louis, Duke de Montpensier, born 31st July, 1824; married, in 1846, the Infanta Maria-Louisa, sister of the Queen of Spain, and has issue

1.—Louisa-Maria-Theresa-Charlotte-Isabella (born in 1812), consort of Leopold, King of the Belgians

2.—Mary-Christina, married to the Duke Alexander of Wurtemburg, and died in 1839. This lamented Princess had earned a high reputation throughout Europe as a sculptor. Her "Jeanne d'Arc" is well known.

3. Mary-Clementine, born 1817; married, in 1843, to Augustus, Prince of Saxe-Coburg and Gotha.

It may be worth remarking that Louis Philippe derived eighth in a direct line from James I., King of England; and was, consequently, great-great-great-great-great-grand-nephew of our Charles I.

LAST ILLNESS OF LOUIS PHILIPPE.

(From a Correspondent.)

The ex-King had enjoyed comparatively good health since his arrival in this country until December last, when the symptoms of organic disease of the stomach became serious; and in May last, when he removed to the Isle of Wight for the benefit of the sea air, his frame was much reduced. The effect was at first unfavourable, but it subsequently proved beneficial; and the ex-King returned to Claremont on the 26th of July in an improved health. His digestive powers were good; he slept soundly; but his legs were much swollen. He had arranged to go to Richmond, for a few weeks, on the 17th inst., but, owing to the premature accouchement of the Duchess d'Aumale, his departure was delayed. Thenceforth his illness took a sudden turn. Dr. Chomel, the eminent physician of Paris, was summoned to Claremont, but his skill proved of no avail, and on him devolved the melancholy duty of communicating to the ex-Monarch his approaching dissolution. He received the sad information with calmness, on Sunday morning last, in the presence of the ex-Queen, and then proceeded to put the arrangements which he wished to make. He then called for General Dumas, and dictated to him a few words to conclude his memoirs, which he had commenced some months previously, but which illness had compelled him to suspend. He next called for his Chaplain, the Abbé Guelle, all his children and grandchildren were assembled around his bed, and in the presence of the Countess and his family he discharged every duty of religion with the most perfect Christian resignation, a stoical firmness, and a simplicity which is the real evidence of honest greatness.

He then remained for some time surrounded by his family. Towards seven o'clock in the evening the debility which the ex-King had been suffering appeared to have ceased over, and fever came on, which increased during the night, but not much violence, but without disturbing the composure of mind which never abandoned him.

He expired at eight o'clock, in the presence of the ex-Queen and the following members of his family:—Their Royal Highnesses the Duchess of Orleans, the Count de Paris, the Duke de Chartres, the Duke and Duchess de Nemours, the Prince and Princess de Joinville, the Duke and Duchess d'Aumale, the Duchess Adelaide de Saxe Coburg, the Generals Dumas and Charlemagne, the faithful companions of his exile, and the attached attendants of his household.

On Monday a special messenger was dispatched to Queen Victoria at Osborne, conveying the sad intelligence of the death of Louis Philippe.

The apartments at Claremont occupied by the ex-King and Queen are on the ground, or principal floor of the mansion; they comprise the library, dining-room, gallery, breakfast-room, and the chamber in which the Princess Charlotte expired in 1817: adjoining is a small dressing-room, the drawing-room and the noble suite of rooms

Since the arrival of the Royal exiles, the following changes have been made in the appropriation of the apartments.—The gallery has been converted into a private chapel: the bed-room of the Princess Charlotte, at the south-west angle of the mansion, becomes the cabinet of the ex-King, and the dressing-room adjoining, the bed-chamber of the ex-King and Queen. In this room Louis Philippe expired.

The body was embalmed on Tuesday, and placed in four coffins, made by Mr. Chandelon, of Greek-street, Soho: the inner coffin, containing the remains, is of Spanish mahogany, lined with white satin, and covered with lead, of much thickness; the third coffin is of mahogany, highly polished, and the outer or state coffin is of the same material, covered with rich black Genoa velvet, thickly studded with silver nails and ornaments, and handles of the same metal, richly cased; on either side are the arms of the House of Orleans; and the plate is surmounted by a magnificent royal crown, underneath which are three fleurs-de-lis, and the following inscription:—

LOUIS PHILIPPE Ier,
né le 6 Octobre 1773,
à Paris
Et décédé le 26 Août 1850
à Claremont
(Comté de Surrey, Angleterre)
Le 26 A. 1850

The coffin is for the present deposited on a catafalque erected in the gallery, which is hung with black draperies, and converted into a *chapelle ardente*. Here the coffin will remain until Monday next, when the funeral will take place, at half-past eight in the morning. The office for the dead will be celebrated in the private chapel, without any official solemnity. The procession will then advance from the mansion to the park-gate, where mourning coaches will be provided for the Princes and the Royal household, who will follow the remains to the Catholic Chapel at Weybridge, in the vaults of which they will be deposited until arrangements shall be completed by the Princes for conveying the remains of their lamented father to the Royal Chapel of Dreux, in Normandy. A mass will be celebrated in the chapel at Weybridge, before the remains are placed in the vaults.

We learn, with great satisfaction, that the ex-Queen is in good health, and has sustained her affliction with great fortitude

The facsimile of the signature of Louis Philippe, appended to the Portrait on the preceding page, is from the King's signature affixed to a State document in the autograph collection of Messrs. Waller, Ibs, Fleet-street.

THE PROTESTANT MOVEMENT ON THE CONTINENT.

(Extract of a Letter from a French Pastor to a Friend in England.)

The Protestant movement in Bohemia has produced a striking conversion—that of the Count de Stadion, the Austrian ex-Minister, and the conversion of a member of the high aristocracy has accelerated the movement.

At Vienna, the capital of the Empire, eighty Roman Catholic families have just embraced Protestantism, and those conversions have not been to pure rationalism

On this subject I may add, that a new and learned review has appeared in Germany under the direction of the celebrated writers, Tholuck, Nitzsch, &c. Its declaration in favour of the authority of the Bible

In Belgium, the party of the priests, which was formerly dominant, is now in a minority in the Chambers and in the Government, and the king, who formerly was scarcely saluted in the public places, is now received with loud acclamations. Many conversions are spoken of at Brussels and elsewhere. In your journey from Dieppe to Paris, you may perceive have observed about half way the pretty town of Mantes. The consistory of Paris has just appointed its Pastor to preach on the subject. Three parishes are in many places, whose inhabitants have joined the national Protestantism. In five of these conversions the twelve municipal councillors have become Protestant. Thank God it is useful to make these facts known.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

VISCOUNT NEWARK.

His Lordship, who died on the 23rd instant, after a long illness, was elder son of the present Earl Manvers, and grandson of Charles, the first Peer, who inherited the great estates of his maternal uncle, the second Duke of Kingston Lord Newark was born 2nd September, 1805; and married, 16th August, 1832, Emily, second daughter of Lord Hatherton.

As Viscount Newark died without issue, his brother Sydney-William-Herbert is now Viscount Newark, and heir-at-parent of the noble house of Pierrepont.

SIR CHARLES VINCENT LORAINE, BART., OF KIRKEHARLE, NORTHUMBERLAND.

The decease of this Baronet occurred in London, on the 19th instant, after a very severe illness Sir Charles had completed his 42nd year He was the second son of Sir Charles Loraine, the fifth Baronet, by Elizabeth his wife, only daughter of Vincent Campert, Esq., of Turnham Green, and grandson of Sir William Loraine, Bart., by Hannah his first wife, daughter of Sir Launcelot Allgood, Knt., of Nunwick. The family of Loraine, of Kirkeharle, is one of the most ancient in Northumberland. In the reign of Henry VIII., Robert Loraine, then of Kirkeharle, became so formidable to his marauders up in the Borderland, a party of them waylaid him returning from church, and, having barbarously murdered him, cut his body into small pieces, which they boiled and "of cutting him into pieces small as flesh for the pot."

SIR CHARLES BLOIS, BART., OF COCKFIELD HALL, SUFFOLK.

SIR CHARLES died on the 21st instant, in the eighty-fifth year of his age. This lamented gentleman, the sixth Baronet of his ancient house, married, 30th December, 1789, Clara, daughter of Jocelyn Price, Esq., of Cambleworth Hall, county York, and by her, who died 22nd February, 1847, had four sons and three daughters. Of the former the present Sir Charles Blois is the eldest; and of the latter, Lucy-Anne, wife of Joshua, Lord Huntingfield, is the youngest. Tradition affirms that the ancestor of the family of Blois came from the court of that name in France, and established himself in England at the time of the Conquest

WILLS OF EMINENT PERSONS RECENTLY DECEASED.

THE LATE DUKE OF CAMBRIDGE, K.G., G.C.B., G.C.H., G.C.M.G.

Probate of the will and three codicils of his Royal Highness Prince Adolphus Frederick Duke of Cambridge has been granted by the Prerogative Court of Canterbury to the Royal Highness Prince Augustus William Frederick Duke of Cambridge, his only son, and the sole acting executor. The other executors and trustees named, namely, the most noble George Granville, Duke of Sutherland, Major-General Sir Henry Wheatley, and Sir James Henry Reynett, Knight, having first renounced the probate and execution of the trusts

The will, dated 21st of August, 1843, is written on four sheets of paper, bequeathing to his Duchess all her own use absolutely, such property at the residence, Piccadilly, consisting of bed and table linen, and such like articles, with the carriages, &c., to the value of £5000; also the use of plate to the like amount, and the occupation of Cambridge House, and the use of it, Kew, with all the furniture, for her own enjoyment, benefit, and advantage, during her life; and should Princess Mary require a separate establishment, £2000 is to be applied towards such purpose His investments in the British and foreign funds to be divided into three parts, one-third to his sons, and the two Princesses (his daughters), the Grand Duchess of Mecklenburgh Strelitz, and the Princess Mary Adelaide. His real estate he devises to his son, Prince George, Duke of Cambridge, and his heirs male of that name for ever.

The three codicils are dated respectively the first on the same day as the will, the second in 1845, and the third in 1849. By these his Royal Highness bequeaths many annuities, to the amount of forty-one thousand pounds and upwards, principally members of his household To his nephews, Captain Baron Knesebeck, £400 a year, and Colonel Keats £200 a year; to his house steward, Mr. John Urlin, £200 a year; to his two pages, £50 a year each; and so on, leaving annuities to others in amounts gradually diminishing, and, in like manner and proportion, legacies to all his servants.

His Royal Highness' autograph and signed, "P. ADOLPHUS," is attached to each of the documents.

The personal estate in this country was estimated at £120,000; and the stamp duty of £1800 was paid on the probate, as in ordinary cases, there being no exemption from the payment of duty in favour of the Royal Family, though bequests made to any of the Royal Family are exempt from the payment of legacy duty.

THE LATE VICE-CHANCELLOR'S.

The will of the Right Honourable Sir Lancelot Shadwell, the late Vice-Chancellor of England, was only executed by him on the 31st ult., but about ten days prior to his decease, and then in his seventy-first year It is contained in a very few words, appointing Lady Shadwell sole executrix and the guardian of all minor daughter The value of his property (with the exception of a legacy of £7000 to his son Charles Frederick Alexander Shadwell) he has left to Lady Shadwell, whom he has appointed residuary legatee The amount of property sworn to, passing under this will, is £60,000, and the probate duty thereon £750

The immense fortune which was bequeathed to the Vice-Chancellor a few years since, by the will of Mrs. Lawrence, of Studeley Royal, he settled during his lifetime upon his numerous family, having been twice married.

THE LATE LORD PETRE, F.R.S.

The will of the Right Hon. William Henry Francis Lord Petre, Baron of Writtle, has been proved in London: his Lordship, who resided in Mansfield-street, Portland-place, and Thorndon Hall, Essex, having died possessed of personal property in England valued at £120,000. The testator left £2000 apiece to his wife, executing small legacies to his servants, and a legacy of £300 to Joseph Coverdale, Esq The will was made in 1840, by which he gave to the Baroness £500 a year, during her widowhood, in addition to the settlement and a legacy of £10000 for immediate requirements, to his married daughters £5000, in addition to their marriage portions, and to his unmarried daughters £300 a year To his sons Henry and Edward £1000 each, they having received portions to which they were entitled under marriage settlements, and to his sons Edward and Albert, £10,000.

His Lordship was a great patron of the Catholic Church, and had contributed largely in his lifetime to the chapel in Lock's-fields He was a representative Peer of Ireland, and of ancient title, bearing date in 1603

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS. *Deanery*: The Rev. Henry Sidney, to Waterford. *Rectories*: The Rev. F. Haggitt, to Wallsey, Cheshire; the Rev. James Burdakin, to Bisnett, Suffolk. Rev. James Penny, M.A., Steeple-Ashton, Dorset. Rev. Paul Bush, M.A., to Duloe, Cornwall. *Perpetual Curacies*: The Rev. Leeles Carter, to Bradford, with Westwood, Holt, Winsley, Stoke, Wraxall, and Atworth. *Curacies*: the Rev. T. W. Goldhawk, to Shedwith, Kent Rev. Wm. Collings Lukis, to Great Bedwyn, Wiltshire; patron, the Marquis of Ailesbury: the Rev. David Royce, to Nether Swell.

TESTIMONIALS.—The following clergymen have recently received testimonials of esteem and affection: The Rev. J. Brand, rector of Aldford, Cheshire, from the youth of the Church in that parish, who were presented to the Bishop at the recent confirmation, the Rev. D. J. Harrison, his assistant curate of Tattenham, from his congregation; the Rev. L. G. Welch, curate of Farnham, from his late parishioners; the Rev. R. J. Cooper, late chaplain of Gloucester County Prison, from the governor and officers of the prison, the Rev. Joshua Fawcett, incumbent of Wibsey, from his parishioners.

The Rev. Dr. Jeremie, recently elected to the important office of Regius Professor of Divinity at Cambridge, has received from the Court of Directors, in consideration of his eminent talents and valuable services during twenty years as Classical Professor and Dean at the East India Civil College, the present of a valuable piece of plate.

NEW COLONIAL BISHOPRICS.—It has been determined that three new colonial bishoprics are to be established: the first at Perth, the Port of Manitimba, the second for Western Australia, and the third for Sierra Leone. The appointment of the Bishops is not yet confirmed, but it is stated the following arrangements have been made: The Rev. Francis Russell Hanna, D.D., Fellow of Exeter College, Oxford, and Secretary to the Society for the Propagation of the Gospel in Foreign Parts, to be Bishop of the Island of Mauritius; the Rev. James Harris, M.A., Incumbent of All Saints' Church, Stepney, to be Bishop of Western Australia; and the Rev. F. W. Weeks, M.A., Incumbent of St. Thomas's, Lambeth, to be Bishop of Sierra Leone.

On Saturday, the Right Rev. R. Rufford, D.D., recently consecrated to the new bishopric of Manitoba, took his departure from England to enter upon the episcopal duties of his distant diocese. His Lordship was a passenger by the *Canada*, and bound for Boston, where he will remain for a few days, and then proceed to his destined city. Prior to leaving, as native land, the congregation of Curzon Chapel presented the right rev. gentleman with an elegant testimonial service and a purse containing 300 guineas

IRELAND.

RENTS.—The question of rents, as compared with usury in money, is thus pithily expounded in the *Freeman's Journal* of Tuesday, and it may be observed that the term of "usury in land," as applied to exorbitant rents, is now becoming very generally used to express public opinion on the subject in Ireland:—

Land says the *Freeman*) is the landlord's capital, just as bullion, or its representative, is the capital of the "aristocrat" of Lombard-street; and when the law puts into the Lombard-street aristocrat from receiving more than a given percentage rent for the use of his bullion, it is a higher "rent" would bring social injury on the land aristocrats who have it. It certainly is most reasonable to extend that principle of law, and say to the land aristocrat, "We have protected you from the usurious grippings of the Lombard-street Jews, and we will protect the industrious tenants of the occupiers from your usury, in turn" There is, besides, this difference between the interference with land usury that had usury brings death on thousands and tens of thousands, and misery on millions, while money usury could only bring penury on a few thriftless vagabonds.

His Excellency the Lord-Lieutenant, it is expected, will leave Dublin on the 9th of next month, on his visit to the north, and will, on the first instance, proceed to Crom Castle, the seat of the Earl of Erne, and thence will go on to visit the Giant's Causeway and other interesting localities in that neighbourhood, *en route* to Lemon Tower, the marine residence of the Marquis of Londonderry, and it is expected will arrive at Belfast about the 12th of the month.

The Lord Chancellor has appointed Patrick Dingman, Esq., to be a magistrate for the county of Roscommon.

Edward J. Collins, Esq., has been appointed a stipendiary magistrate and has had the district of Rathkeale, in the county of Limerick, assigned to him. Mr. Collins is the son-in-law of Mr. J. Roche, of Cork.

The *Limerick Chronicle* says that Major Pitt Kennedy, military secretary to Sir Charles Napier in India, is to be appointed Director of the railway department in that country, in the room of Mr. Simmons, and that his experience and extensive knowledge of India will be of great advantage to the undertaking.

At the Conciliation Hall, on Monday, where the doings of the Liberator are parodied in the most wretched fashion by Mr. John O'Connell, the proceedings were without interest, the speeches most dull, the topics used-up, and the rent 9*d*. 9*s*.

The complaint of a want of sufficient labourers to save the harvest is now becoming very general throughout Ireland. Labourers cannot be procured in some districts of the country at any price.

The Right Rev. Dr. M'Gettigan, Roman Catholic Bishop, has been appointed by her Majesty one of the Commissioners of Charitable Donations and Bequests for Ireland, in the room of the late most Rev. Dr. Crolly.

EASTERN COUNTIES RAILWAY.—FINAL ANSWER OF THE DIRECTORS TO THE LATE ENGINE-DRIVERS

In accordance with a resolution passed at a meeting of the late engine-drivers and firemen upon the Eastern Counties Railway, held at the George Inn, in Stratford, a letter, of which the following is a copy, was addressed to the chairman of the directors, and delivered to the secretary (Mr. Roney), on Monday last, in order that it might be laid before the board at the weekly meeting, on the following day (Tuesday,

TO THE HON. THE CHAIRMAN AND DIRECTORS OF THE EASTERN COUNTIES RAILWAY.

Gentlemen—It is with deep regret on our part that a dispute should have arisen between ourselves and you, which, if not soon settled, may cause serious loss of the interests of the company and our labour We, therefore, after mature consideration of the circumstances in dispute in question, cannot but acknowledge that our proceedings have been wholly inexcusable and justifies us in making an honourable compromise with you We, therefore, respectfully ask for your decision as to the resolutions forwarded through Mr. Ashcroft, on Saturday, the 17th inst., or whether you will entertain any part of them. We also beg to add, that a deputation will attend at your office on Tuesday morning, to wait your decision.

We are, Gentlemen, your obedient servants

(Signed) THOS. HOPE. J. SLIAD.
VINCENT GRUNDY.
J. REES.

A deputation of the men attended accordingly on Tuesday, at the Bishopsgate Station, but the board declined to see the men, and they were told that an official answer would be sent to their communication.

Immediately on the receipt of the answer from the directors, a meeting of the men was convened at the usual place, the George Inn, Stratford, when the chairman, Mr. Hope, said he had received the following answer to the offer they had made to the directors:—

Eastern Counties Railway Office, Bishopsgate Station, London, 27th August.

SIR,—I beg to hand you, on the other side, an extract from the minutes of the board of this I am, Sir, your obedient servant,

To Mr. Thomas Hope. C. P. RONEY.

[EXTRACT from the minutes of the board, of August 27, 1850:—"Read a letter signed by Thomas Hope, J. Sliad, Vincent Grundy, and J. Rees, stating that late engine-drivers in the company's service resolved, that the late engine-drivers and firemen be informed that if any of them apply to the Goods Station, they will be employed in the same capacity as their predecessors were, but the staff of the company's engine-drivers and firemen is at present complete."

The chairman said he regretted very much that the communication they had thought it advisable under the circumstances to make to their late employers, had not produced a more satisfactory result. He could only, however, advise them to make the best of a bad bargain, and patiently endure privations and hardships that had occurred, to conduct themselves peaceably and quietly, and on no account to interfere in any manner with the new drivers, or with any of the works on the line; they must be upon no public meeting, he hear. He was sorry to say, for the sake of the company, that during the present week two more engines had been burned through mismanagement—one of them (No. 50) so much damaged as rendered useless. Before they separated, he had to call their attention to a letter he had received from Mr. Edward Betts, Esq., chairman of the company, who had presided at the meeting of the shareholders held at the London Tavern on Thursday last. It would be recollected that at that meeting Mr. Betts had made certain charges severely affecting their characters, and imputing to the commission of malicious acts previously to their leaving the company's employment. They (the late engine-drivers and firemen) met those charges promptly; and at a meeting holden at the Black Lion, Bishopsgate-street, they unanimously passed a resolution emphatically repudiating them In obedience to the terms of that resolution, the committee wrote a respectful letter to the chairman of the company requesting him to furnish them with the numbers of the various engines said to have been in any way tampered with or to have had their gauge-glasses broken, with the names of the men who had the charge of such engines in the last journey prior to such man leaving the company's employment, to enable them, in defence of their own characters as honest men, to give such an explanation relative to each engine as the charges might require. To that letter, respectfully addressed to Mr. Betts, that gentleman had just left the following reply:—

Preston Hall, Aylesford, August 24, 1850

SIR, In reply to your letter of the 19th inst., I have to say, the directors, as soon as they can definitely ascertain and prove by evidence the names of persons who have been guilty of such wilful mischief will not fail to place them on the list and severe punishment the law affords for such conduct, and which they hope to be enabled to do, as a warning to all future cases of the character.

I am, Sir, yours obediently,

To Mr T. Hope. EDWARD L. BETTS, Chairman

The chairman said, the meeting could perceive that the letter of Mr. Betts failed altogether to afford them the information they desired, and which they thought they were entitled to expect. Although a very sweeping charge had been made against the characters of the late engine-drivers and firemen, as far as they were concerned, was altogether vague He could only express his deep regret that such charges had been made; and he again, for his own part and on the part of each and every man, entirely denied that they were well founded. He had only again to impress upon his fellow workmen the necessity of their continuing so to conduct themselves as to obtain the approval of the public. He was happy to say, various meetings had been held between some of the shareholders, expressing a warm interest in their favour, and several gentlemen had called at the committee-room, influenced by similar feelings.

Some statements were made by the men as to the detention of several of the trains. One was that the Woolwich train, that left on Monday morning at 9.15, stuck in the curve half-way between Stratford Bridge and the junction. The passengers had to leave in consequence; and, their money having been returned, the train continues to London. Another case was that which occurred also on Monday—that of the Colchester express train, which left London at three p.m., and which stuck between Forest Gate and Ilford. In that position it remained for an hour and twenty minutes, till the pilot engine from Stratford went and took the train forward.

VICTORIA REGIA IN WAX.

This is the name of a flower discovered in 1837 by Sir R. Schomburgk, in British Guiana, while growing in the river Berbice, where it displayed a multitude of flowers, most brilliant in line and majestic in form. Mrs. Peachey, her ladyship's maid, has modelled a magnificent specimen in wax, the entire of one of the flowers, fourteen inches in diameter, and the leaf five feet, growing at bay, which the lady and nancy the honour of exhibiting to the Queen and Prince Albert, on their visit to Windsor Castle. The model is in its stages, in the bud, in the half expansion of its blossom, and, lastly, in the full splendour of perfect efflorescence. This modelling of flowers in wax is a most ladylike and delightful accomplishment, and, in its exercise, involves but few rules. They are, indeed, simply these. Choose a perfect flower for the object; use wax sufficiently coarse and tough, and colours ground in spirits sufficiently prepared for the purpose. The art has lately become so simplified in its processes, that the impediments to excellence in them are nearly as few as the rules to be observed. Specimens, also, of roses, picotees, and fancy flowers in vases, are to be seen at Mrs. Peachey's apartments, 35, Authbone-place. Her method of modelling is remarkably adroit, and the results significantly artistic.

A terrible accident took place on the 19th inst. on the railway between Lisznick and Cassel As the train was going rapidly round the curve which is through the locomotive went off the rails, dragging the carriages after it. The tender and three carriages were overturned with a dreadful shock. Five persons were killed, and twenty-six badly wounded. Five of the carriages of the train remained on the rails

A gentleman who conveyed one bottle of whisky the other day from Cork to Bristol, as a passenger in the steam-packet, had to pay a penalty of £10 for the smuggle, or, in default, to enjoy three months' recreation on the treadmill.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The Lords of the Treasury having indorsed the report and recommendations of the Sunday Postal Commission, arrangements are in progress for giving them practical effect on Sunday next, the 1st of September, when the usual morning delivery of letters and newspapers throughout the country will be resumed.

At a conference held in the Foreign Office on Friday week, of the plenipotentiaries of the great powers, on the Danish question, the Austrian minister signified his adhesion to the protocol of the 2nd of August, with reservation of the rights of the German Confederation. At the same time the Danish minister made a declaration that it was well understood that those federal rights extend only to the duchy of Holstein and Lauenburg; and this declaration has been accepted by the representatives of France, Great Britain, Russia, and Sweden.

The Duke of Wellington has been appointed, by the Queen, Ranger and Keeper of St. James's-park and Hyde-park, in the room of the late Duke of Cambridge.

The clearing clerk of an eminent banking-house absented himself from business in Lombard-street on Saturday morning, when, on examination, his previous day's clearing was found to be £5000 deficient.

The banking-houses in Glasgow have just announced that the interest allowed on deposit receipts (that is, the more permanent kind of deposits) will be reduced to the same rate as that allowed upon the daily balance of current accounts, making a uniform rate of two per cent. on all moneys lodged with them. Two of the Edinburgh banks have also made the same announcement.

Mr. Lavi, of Liverpool, has proposed that the approaching assemblage of men of various nations at the Industrial Exhibition should be taken advantage of, so that discussions might be held on the subjects of commercial law universally.

On the 16th inst, the lands of Pargillies, in Fifeshire, which are entirely arable, were sold after many offers at nearly thirty-two years' purchase of the rental, notwithstanding the abolition of protection.

A gold chain and seal, of the value of £140, has been presented to the corporation of Bolton for the use of the mayor for the time being. The chain has been purchased by subscription.

Mrs. Jane Tremaine has presented the Asylum for Idiots with a donation of £300.

Her Majesty has appointed the Earl of Chichester to be First Church Estates Commissioner, and John George Shaw Lefevre, Esq., to be Second Church Estates Commissioner, the former with a salary.

We understand that Mr. Bodkin, of the Home Circuit, is a candidate for the office of Recorder of the city of London.

A few days since, Mrs. Thomas, a widow, residing at Marcross, near Bridgend, South Wales, was walking along the edge of the cliff, when she accidentally fell over and was killed on the spot. The body, when found, presented a dreadfully mangled appearance.

On Saturday afternoon, a party of labouring men and their wives, all more or less intoxicated, were returning from Battersea, where they had been spending the afternoon, when, off the Houses of Parliament, a Mrs Shadbrook, in a fit of jealousy, threw herself overboard. Mr. Shadbrook, though unable to swim, leaped in to save his wife: the unfortunate woman, however, was not soon to rise again, and her husband was with difficulty dragged into the boat. The body was not recovered.

An inhabitant of Wakefield underwent penance in the parish church on Sunday, to which he had been sentenced by the Ecclesiastical Court of Richmond, for alleged slander upon a lady, an inhabitant of the same town. Considerable excitement prevailed during the ceremony, which consisted of reading a recantation of the slander, but no disturbance took place.

On Saturday, the 10th inst., one of the wings of Sing-Sing prison, New York, was nearly destroyed by fire.

During the week ending the 10th inst. two murders were committed in the purlieus of Philadelphia, by perfidy gangs of men and boys, and a row of eight houses were destroyed by incendiarism.

On Monday, about ten o'clock, as a man named Simes, residing in Passmore-street, Pimlico, was in the act of sweeping the lead projecting over the shop-front of Mr. Fenn, cheesemonger, High-street, Marylebone, a portion of the lead gave way, and the unfortunate man fell on to the pavement with such force that his brains were dashed out on the spot. On being picked up life was quite extinct.

Galveston (Texas) dates of the 7th inst. report continued Indian depredations: 200 attacked Captain Ford's camp at San Antonio Diego, and took several horses, also captured a train of mules; they afterwards attacked a party of rangers and killed seven and wounded nine men.

Wild Cat, the Seminole chief, with 700 Indians have settled near Eagle Pass, and made a compact to protect the Mexicans from the Cumanches Indians, in Texas.

Major Steen, of Mobile, who has completed the survey of the contemplated Galveston and Brazos Canal, has made a highly favourable report of the practicability of the work, and the economy by which it can be executed.

Accounts from the Windward Islands had been received at Ponce, stating that upwards of forty vessels were driven ashore and wrecked during the hurricane of the 11th and 12th of July.

We have dates from Porto Rico to the 23d ult., which state that there were a number of English, French, and Dutch merchant vessels in port, for which would be obliged to leave in ballast, as the crop of sugar had nearly all been shipped.

The *New York Evening Mirror* states, the daughter of President Fillmore "is an accomplished young lady, about eighteen years of age, and now engaged, we believe, in the honourable employment as teacher of a public school in Buffalo."

Several mills in Rhode Island (United States) have recently determined to suspend operations—among which are the Compton Mill, 10,000 spindles; Union Steam Mill, 10,000 spindles; and the Newport Steam Mill—all manufacturing print cloths.

In the Berkshire County Court, last week, a milliner named Chapman obtained a verdict against Mr. Stanford, M.P., for £17 11s. 10d. for "bows" and "resettes" used during the election for Reading.

The herring fishery in the district of Wick, North of Scotland, has proved very short hitherto. At Fraserburgh it is not much above a third of what it was last year, and on the Banff and Aberdeen coasts not above half.

A local committee to collect and forward articles for the Exhibition of 1851, has been formed at Hong-Kong (China).

The vacancy in the deanery of Waterford has been filled by the appointment of Dr. Townsend, the present Dean of Lismore. The appointment has been made by the Lord-Lieutenant of Ireland.

The Lord Primate of Ireland returned from London to Armagh, last week, and his arrival was celebrated by the ringing of joy bells.

The Fishery Board has issued a circular, recommending fishermen to catch as many dog-fish as possible, skin them, and dry their skins for sale, to be used in lieu of emery paper, for which they are by no means a bad substitute.

The Manchester subscriptions for a monument to the memory of Sir R. Peel, amount to £5050, of which £4000 has been paid in.

It is intended to form a new and direct road from Brompton to Notting-hill and Bayswater, in the west end of the metropolis, by pulling down some houses in High street, exactly opposite the Queen's-road.

The incumbency of St. Paul's Chapel, Lambeth, has been conferred on the Rev. John Goring, B.A., of Trinity College, Dublin.

Captain Moorsom, R.N., has retired from the chairmanship of the West-Cornwall Railway; and Mr. H. O. Wills, of Bristol, has accepted the office.

The loss of property by the great fire at San Francisco, in California, on the 14th of June, was estimated at five millions of dollars.

As proofs of the rising prosperity of California, three new papers are announced as having been established there.

It appears from an official return that the cost of building and fitting out a French ship of the line, of three decks, and carrying from 110 to 120 guns, is 3,009,000f.; one of 100 guns, 2,800,000f.; and one of 90 guns, 2,500,000f.

At the Exeter District Court of Bankruptcy, on the 20th instant, Charles Parnall, grocer and draper, of East Looe, Cornwall, a bankrupt, in consequence of the numerous prevarications in his evidence, was committed to prison until he should be prepared with more satisfactory answers.

Three "flash" members of the London swell mob, calling themselves William Saunders, John Johnston, and George Edwards, have been committed for trial in Dublin, for some depredations committed immediately after their arrival there, on the usual annual excursion to Ireland.

The works have been resumed by the contractors on the Cork and Bandon Railway.

Out-door relief has been discontinued in all the unions of the county of Clare.

The existence of coal of good quality had been discovered a short distance from the city of San Francisco.

An accident of a shocking character occurred on Tuesday, in the neighbourhood of Bristol. A man had been engaged to do some work, near Bedminster, and arriving at the place earlier than the appointed hour, he laid himself down on a limekiln to sleep. A policeman, who found him, aroused him and warned him of his danger, but the poor fellow, on getting up, becoming giddy, fell back into the pit and received injuries of which he died.

The Rev. Dr. Bandinel, librarian of the Bodleian Library at Oxford, having represented to the Lords of the Treasury that he has purchased at Vienna, for that library, a large collection of books of Polish history and literature, their Lordships have given directions to the proper authorities of the revenue for the free delivery of the books for the purpose stated. The collection alluded to, contained in several packages, has arrived in a steamship from Hamburg, directed to the librarian of the Bodleian Library at Oxford.

THE ILLUSTRATED LONDON NEWS.

CHESS.

TO CORRESPONDENTS.

DISPUTANS.—The CHESS-PLAYERS' Companion is, we still consider, the Exchequer was of carpet, or a sort of tapestry. Cloaths speaks of having seen "Chess-carpets" in the Exchequer. Some of them were chess-board divided into squares, without any distinction of colour, and sometimes with only lines drawn in one direction.

R D T, Cad. National, Lewisham, is thanked for the games between Count Vitzhum and Dr. Ledwyr. The best shall appear.

A M.—Very neat, though very easy. It shall have a niche.

W G, R.N., and Others.—Always acceptable.

C M J.—We are obliged by the copy of the rules and list of the members of the Birmingham and Edgbaston Chess-Club.

F W [illegible].—You are the first person upon

J A W [illegible].—Your way is good.

G D R [illegible].—Your moves, if White begin with R takes Q. 2 What was the information you required?

SALVIS.—The long-expected Treatise on Game Endings, by Messrs. Horwitz and Kling, is, we believe, approaching completion, but we have really no means of knowing when it will actually appear.

LOUIS.—You will obtain the great German Chess work of Bilguer and Von der Lasa of Messrs. Williams and Norgate, in foreign boards.—ED.

C M J.—We are obliged by the copy of the rules and list of the members of the Birmingham and Edgbaston Chess-Club.

F W [illegible].—You are the first person upon

J A W [illegible].—Your way is good.

G D R [illegible].—Your moves, if White begin with R takes Q. 2 What was the information you required?

SALVIS.—The long-expected Treatise on Game Endings, by Messrs. Horwitz and Kling, is, we believe, approaching completion, but we have really no means of knowing when it will actually appear.

LOUIS.—You will obtain the great German Chess work of Bilguer and Von der Lasa of Messrs. Williams and Norgate, in foreign boards.—ED.

QUERIST.—There appears to be no reason to doubt that Philidor on more occasions than one played *three* games at the same time without seeing the chess-boards. In a London newspaper of May 4784, we find it stated that, "Yesterday, at the Chess Club in St. James's-st., Mr. Philidor performed one of those wonderful exhibitions for which he is so much celebrated. He played three different games at once without seeing either of the tables, has opponents being Count Brühl, Mr. Howitzer (the two best players in England), and Mr. Sheppard." E. Philidor died August 5th, 1795, in his 70th year.

SIR SAVILLE, OXFORDENSIS, and others.—To guess correctly played by Mr Staunton, to which we alluded in a former Number, are preparing for the press, and will be given in our columns shortly.

J A W H A.—Your aim have two Queens on the board at once.

MARTINUS.—Problem No. 343 certainly cannot be solved in the way you propose.

G M, Aberdeen.—We transfer your game next week. See notice to Simon Pure.

J W, Basingstoke; PERDUE, and many others.—Neither Problem No. 342 nor 344 can possibly be solved in less than the stipulated number of moves. Young players are much too apt to jump at conclusions without examination.

BERES, M P.—The Rev. Mr. Bolton's Brownill Problem shall appear shortly.

GRENADIER.—We have not room at present for the "Account of the Chess-playing Village of Strocbeck."

E. Hennessy, Secretary.—The best move is questionably, and in long run the cheapest, are the new ones, but their great success has led to many spurious imitations of Chess Clubs should be cautious, therefore, and on no account buy any without being first assured that each box has the description label with the autograph signature as the bottom.

* * Any amateur possessing a copy of Salvio, Il Gioveo d'g., Second del Dottor Alessandro Salvio, printed at Naples in the Year of Our Lord 1723, which he is desirous to dispose of, is requested to apply to the Editor.

* * Amateurs (Clubs, &c.) in town and abroad who are desirous of co-operating for the purpose of carrying out the Great Congress of Chess-players in London during the Exhibition next year, are requested to let us hear from them, or by letter with the Editor of the *Chess-player's Chronicle*, 27, King William-street, Charing-cross.

SOLUTION OF PROBLEM No. 343, by F S, Newport Mon.; R F, Bombardier, Jun.; Alpha, Tadpaven, St Edmund, R J T H, Portsea, A College-house Scholar, Jolly, J A W, are correct.

SOLUTION OF PROBLEM No. 344, by P Holdon, Exoniensis, W S T, M P, F R S, Rev N D, Rev G H W, Myers, Philo-Chess, are correct.

SOLUTION OF PROBLEM No. 343.

WHITE.	BLACK.	WHITE.	BLACK.

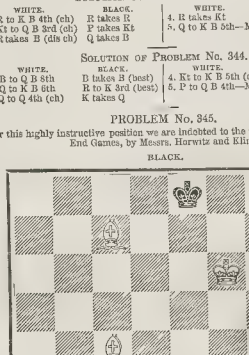
PROBLEM No. 345.

For this highly instructive position we are indebted to the forthcoming work on End Games, by Messrs. Horwitz and Kling.

BLACK.



WHITE

White, having the move, is to win.

CHESS IN THE METROPOLIS.

BETWEEN MESSRS. SMITH AND BIRD.

The annexed is one of fourteen games recently played, in which Mr Smith opens with the "Evans' Gambit," and wagers two to one in the event of its being accepted. These *parties* have produced the following result: Mr. Bird won 10, Mr. Smith won 3, drawn 1.

(Evans' Gambit.)

WHITE (Mr. C. F. Smith).	BLACK (Mr. H. E. Bird).	WHITE (Mr. C. F. Smith).	BLACK (Mr. H. E. Bird).
1. P to K 4th	P to K 4th	16. R takes P	Q to Q 3rd
2. K Kt to B 3rd	Q Kt to B 3rd	17. Q R to Q sq (a)	B to Q B 4th
3. K B to Q B 4th	K B to Q B 4th	18. P to Q 5th	P takes P
4. P to Q Kt 4th	K B takes P	19. Kt takes P	B takes R

	(is alike inevitable and irremediable)
	Q takes Kt

CHESS ENIGMAS.

No 599.—By a Lady.

White: K at K B 5th, Q at K R 3d, R at Q B 8th, Kts at K Kt 3d and K 5th, P at K Kt 6th.

Black: K at Q 5th, Q at K 8th, Rs at K R 8th and Q B 5th; Ps at Q 3d, Q Kt 7th, and Q R 6th.

White to play, and mate in four moves.

No. 600. By Hugh Brighstaff.

White: K at Q sq, R at Q B 5th, B at Q 4th, Kt at Q Kt 5th, Ps at Q B 2d and Q Kt 3d.

Black: K at Q R 4th, Kt at Q Kt 3d, P at Q Kt 2d.

White to play, and mate in three moves.

No 601.—By the Same.

White: K at Q B sq, R at K 8th, B at Q sq, Kt at Q Kt 5th; Ps at Q 4th, Q B 3d, and Q Kt 2d.

Black: K at Q 6th; Ps at K 5th and 6th, Q 4th, and Q R 6th.

White, playing first, mates in three moves.

No. 602. Curious study, composed by M. Kieseritzky.

White: K at his 4th, Ps at K Kt 2d, Q 8th, Q B 4th, Q Kt 8th, and Q R 4th.

Black: K at K R 4th; Ps at K B 5th, K Kt 4th, Q 3d, Q B 2d, Q Kt 2d and 3d.

White to play first, and win.

NATIONAL SPORTS.

The racing fixtures increase in number every week, and will afford ample employment for the metallics for a month to come. The first of any importance is the Warwick and Leamington, for which an unusually attractive bill of fare has been issued. The days are Tuesday and Wednesday next. On Wednesday and Thursday, the Weymouth and Morpeth people hold their gatherings; and on Thursday and Friday, the Lincoln and the Western (N. B.) meetings come off. There will also be some racing, on a small scale, at Wimslow, on Tuesday, and at Barnet and Bungay on Friday. The cricket register, unlike the turf one, is getting "small by degrees," the only matches on the tapis for next week being an All-England contest, at Sheffield, on Monday, and another on Thursday at Darlington. The results advertised are the Shadwell, on Monday, and the Richmond, on Tuesday.

TATTERSALL'S.

MONDAY.—The subjoined return will show little change in the position of the favourites for the great events:

LEAMINGTON STAKES.	
7 to 1 agst Doubt (t)	6 to 1 agst Top sail
9 to 1 agst Priestess (t)	12 to 1 agst Deedly
SURREY AND MIDDLESEX STAKES.	
2 to 1 agst St. Rosalia	

12 to 1 Pershell (t)	
12 to 1 Knight of Gwynne	
	3 to 1 agst Little Jack

YORKSHIRE HANDICAP.	
6 to 1 agst Clothworker (t)	7 to 1 agst Strong ons
6 to 1 Mark Tapley (t)	
	10 to 1 agst Bessborter (t)
	10 to 1 —— Port Tempora (t)

ST. LEGER	
Even on Voltaire	10 to 1 agst Bessborter (t)
5 to 1 next to it (t)	20 to 1 —— Wilhelmina
30 to 1 —— Cyprus	
4000 to 20 agst King of Oude (t)	

25 to 1 agst Mildew	
40 to 1 —— William the Conqueror	

EGHAM RACES.—WEDNESDAY.

The Gold Cup of 50 sovs.—Lord Exeter's Little Jack (J. Mann), 1. Sir G. Heathcote's, by Sir Hercules (G. Bowman), 2.

The King John Stakes of 25 sovs each, with 50 added.—Duke of Richmond's bf by Ugly Buck (Flatman), 1. Sir G. Heathcote's c by Lanercost (Dockeray), 2.

Members' Plate of 50 sovs, added to a sweepstake of 5 sovs each.—Mr. Ramsbottom's Beebee Bunno (G. Brown), 1. Mr. Payne's Brington (Harding), 2.

THURSDAY.

The Surrey and Middlesex Stakes.—St. Rosalia, 1. Little Jack, 2.

Handicap.—Little Jack, 1. The Swede, 2.

Queen's Plate.—Little Jack, 1. The Swede, 2.

DERBY RACES.—TUESDAY.

Trial Stakes of 5 sovs each, and 30 added.—Mr. Hobson's Gladiole (Osborne, jun.), 1. Mr. Howlin's Shitmaller West (Sharpe), 2.

Tradesmen's Plate of 100 sovs, added to a handicap of 15 sovs each.—Mr. Rodd's Cothworth (Charlton), 1. Mr. Pedley's Prior of Lanercost (Sharpe), 2.

Sweepstakes of 10 sovs each, and 50 added. Mr. Wadlow's Harriott (G. Whitehouse), 1. Mr. J. B. Minor's Modestina (H. Evans), 2.

Maiden Plate of £30, added to a Sweepstakes of 5 sovs each.—Mr. Wadlow's Sarah (G. Whitehouse), 1. Mr. Choyce's Bedford (J. Evans), 2.

WEDNESDAY.

Chatsworth Stakes of 10 sovs each, &c., with 50 added by the Duke of Devonshire.—Mr Reid's Clothworker, 1. Mr. Reynard's Wild Rose, 2.

Chesterfield Stakes of 10 sovs each, and 50 added.—Mr. H. Stebbings' Tiller Cutter, 1. Mr. J. Phillips's Le Kock, 2.

Innkeepers' Plate of £60.—Mr. Parr's Clothworker, 1. Mr. Kemp's General Sale, 2.

Selling Stakes of 5 sovs each, and 30 added.—Mr. Davis's Pansey, 1. Mr. Critchley's Lyme, 2.

UNITED CLUBS EIGHT-OARED SCRATCH MATCH.

The great aquatic gathering under this title on Monday was, in every respect, of a most gratifying character, and was most materially calculated to promote a friendly feeling amongst aquatic gentlemen, and to restore the somewhat languid condition of aquatics. The proposal had emanated from the Rex Club, and was most cordially responded to by several other metropolitan gentlemen's clubs, who were all anxious to enter the lists; and as many excellent crews, or so great a number, has hardly ever been seen upon the Thames. The prizes were both elegant and valuable, consisting of wine-cups electro-plated, and the distance contested was from Chiswick to Putney Bridge.

Rex Club.—Messrs. Frazer, Messon, Whitelock, Woodcock, J. Carsey, J. Smith, Bedell, Gregory (stroke); Croaton, steerer: 1.

Black.—Messrs. Richter, Purdie, Howard, Revell, Lucas, Caper, W. Nixon, Berry (stroke); Pulham, steerer: 2.

Five others started, forming no less than seven eight-oared crews. Mr. E. Searle was the starter, and Williamson, of the Thames Club, operated as umpire in their eight.

RICHMOND ROYAL REGATTA.

This regatta, in honour of Prince Albert's natal day, also came off on Monday, and was, as usual, most excellently conducted and contested. The race was won in the waterman, in four boats

Fourth Heat.—Mackenney and Trowbridge (White), 1; Platt and Bell (Red), 2.

GREAT ROWING MATCH.

The great contest between T. Coombes, the brother of the champion of the Thames, and Chitty, of Richmond, for £100, came off on Tuesday, and fully realised the most sanguine expectations of the great mass of rowing men.

The distance to be rowed was from Putney-bridge to the Ship, at Mortlake. Betting was 5 to 4 on Chitty, at which price a great deal was done. At five o'clock they made their appearance at Putney-bridge, both apparently in first-rate condition. Chitty won the choice of station, and took the Middlesex side. It was a fine start. Coombes took the lead slightly at first, and kept it up to Finch's, where Chitty gradually drew upon him, and off the White Cottage, between Craven Cottage and Rosslank, passed him. Chitty increased the distance from this until within half a mile this side of Barnes-bridge, when Coombes, in crossing the water, gained materially upon his adversary, who had been until then four or five lengths ahead, but was unable to pass him, although he narrowed the distance in every stroke to the finish. Chitty, from apparent weakness in the arm, owing to the severe one-handed labour, made a curve just before arriving at the winning post, by which he lost six or eight yards; he still, however, beat Coombes by nearly a length, after a most gallant race, in which it was clear, that, although a loser, Coombes was the better man where the water was rough. Mr. E. Searle officiated as umpire.

WENTZELL'S OARS MATCH.

The pair-oared race amongst tradesmen, for two pair of silver oars, annually presented by Mr. A. Wentzell, of the Slip, Fore-street, Lambeth, took place on Monday, and afforded first-rate sport. There were three heats.

Final Heat.—Turner and Beeckhe (White), 1; Dennis and Sanderson, (Purple), 2.

FALL OF THE BRICKLAYERS' ARMS RAILWAY STATION.

This unfortunate accident, which occurred on Wednesday, the 21st instant, was reported in our Journal of last week. We now give some additional details with a View of the remains

The portion of the Station which has fallen comprises two roofs, pointed at the top, and covering the permanent way to a distance of 400 feet. The external covering of these roofs was of deal planks, slated over, and resting upon beams formed of a bar of fir, bolted between two *lanterns* of iron. This kind of beam was used for the double purpose of insuring strength and elasticity, and of enabling the boarding of the roof to be nailed firmly down. The base of the cone formed by these beams was spanned by jointed *laminæ* of iron, from which rose iron bars, affording support to the roof. The beams were placed along the roof at intervals of about four feet, and their ends rested upon cast-iron supports running along iron pillars, about 12 feet high and 8 inches thick. This row of pillars formed a central support, on which the two roofs rested, the other ends of the beams resting upon the sup ports of the sheds at each side of the station. The accident was caused by a carriage which was being moved round on the turn-table striking against the last pillar of the central row. This instantly snapped, as also did two others upon which a great weight was thus suddenly thrown, and a great portion of both roofs being thus unsupported, the whole fabric was thrown away from the bolts by its own weight, and fell with a tremendous noise. When the fall occurred, there was a long train of first and second-class carriages under the sheds; and it has been stated by some of the morning journals, that, had these been filled with passengers, the sacrifice of life must have been awful. It appears, however, that the iron-work of the roofs fell on these carriages and bent over them, without breaking a single window or damaging any of them in the slightest degree. To this fact is owing the preservation of the three porters at work near the carriages. The sole human sacrifice was that of a man, during the fall of the pillars at the lower end of the shed, attempted to escape into the station, but was knocked down by the falling materials, and suffocated by one of the sparts falling across his neck. He was three men taken to Guy's Hospital, only one (Watson) was found to be seriously injured, he having had his leg broken. The other two escaped with some severe bruises, and were sufficiently well to leave the hospital yesterday afternoon. The iron pillars along the centre, with the exception of the three which broke, are still standing, and the east iron supporters along their tops are still entire

An inquest was held on the deceased man on Friday, where the jury, after Sir Richard Mayne had given evidence, returned the following verdict: "Accidental death, being caused by the falling of a roof of a certain shed, being part of a railway terminus, resulting upon a collision of a railway carriage against an iron column supporting the same."

On Sunday morning last, by permission of the authorities, a man here of the officers, miners, and others employed at the Bricklayers' Arms station, attended Divine service at St Mary's, Newington, Old Kent-road, to offer up their public thanksgiving for their providential preservation when the accident occurred on Wednesday last. A last suitable and very impressive sermon was preached on the occasion, by the Rev. C. Bowen, the incumbent, from the 91st chapter of St. John, and the 14th verse: "Others have laboured, and ye are entered into their labours." The collections at the doors which were made, are still standing, and the sum of £1 was handed to each of the three men who had been severely injured by the fall of the roof, and a further sum of £1 to each of the churchwardens for money deposited in the poor-boxes on that day,

THE GREAT WOOL-FLOOR AT THE LONDON DOCKS.

amounting to £9 2s. 6½d., will be applied for the benefit of the widow and orphan of the unfortunate man who lost his life by the melancholy event.

An Engraving of the entire station appeared, just after its erection, in No. 185 of the ILLUSTRATED LONDON NEWS.

WOOL WAREHOUSE, LONDON DOCKS.

THE vastly increasing importance of the Colonial wool trade for some years past has induced the directors of the London Dock Company to enlarge very considerably the warehouse appropriated to the reception of this article, and to provide therein long ranges of glass roofing, whereby most superior accommodation is gained on all the floors for the advantageous inspection of wool when placed on show.

The accompanying View of a portion of the interior exhibits the convenient adaptation of the floors for stowing and shewing wool.

The public sales of wool occur every six weeks, and are attended by dealers and manufacturers from Yorkshire and other counties, as also by buyers from the Continent

Every bale, when on show, is inspected by drawing out a portion of wool, which, after examination, is thrown on the floor; which to a stranger has a most extraordinary appearance, so much lying on the gangways, that the parties inspecting it frequently walk knee deep in loose wool.

The sales of wool in the London Dock warehouses alone vary in quantity from 15,000 to 25,000 bales at one time. The machinery employed is capable of housing 3000 daily; and the accommodation for delivery will admit 1800 to be disposed of in one day. These operations give employment to 200 men, exclusive of clerks and foremen. The importation of wool annually at the London Docks is 130,000 bales, the value of which is £2,600,000.

A sale commenced on Thursday week, and will last till Thursday, Sept. 12.

THE BRICKLAYERS' ARMS RAILWAY STATION, AFTER THE LATE ACCIDENT.

SCENE FROM THE "LEGEND OF FLORENCE," AT SADLER'S WELLS THEATRE.

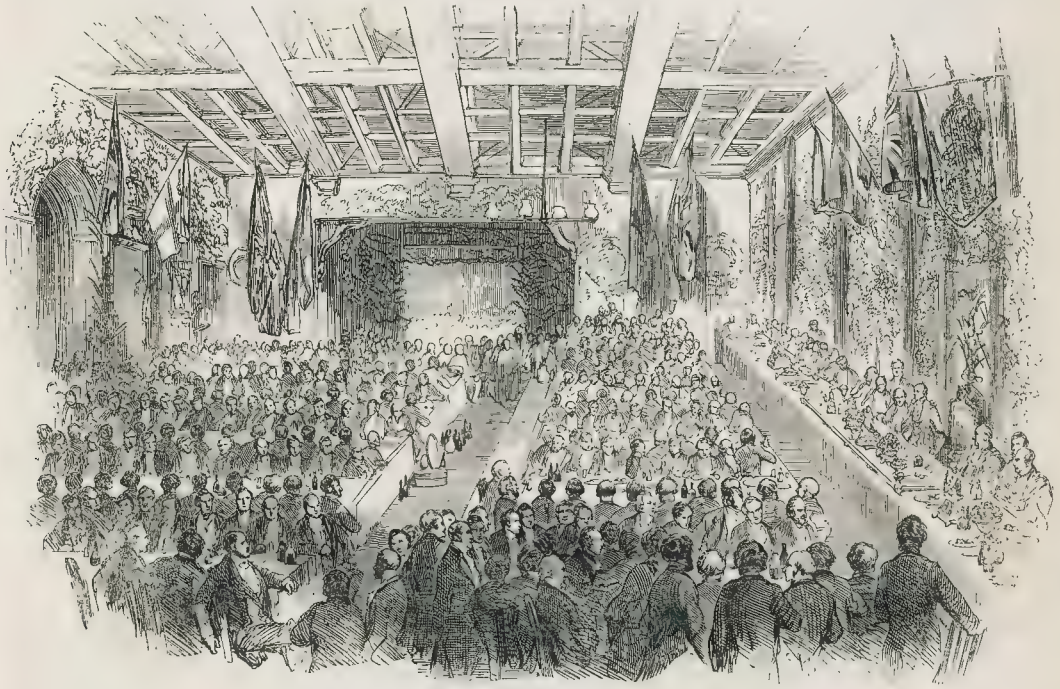
LEIGH HUNT'S "LEGEND OF FLORENCE."

In reverting to the performance of this fine play at SADLER'S WELLS, we confess that much of our satisfaction arises from a sense of justice thereby done to the author. The drama, when first produced at Covent Garden, was charged with the burthen of creating a taste and audience for the legitimate drama at a large house, the fortunes of which had to be redeemed. It was, in fact, produced on the forlorn hope, and might have been slain in the adventure. However, it perfectly succeeded and attracted increasing audiences, though not sufficiently numerous to enable a management dependent on the receipts of the house to grant it a long run. Its success, also, might have been greater but for one unfortunate circumstance, the poet was compelled to alter the catastrophe of his piece. According to the legend, a sentence of divorce should have been pronounced by papal authority. But this was deemed, by those who had a voice in the theatre, to be a dangerous expedient with a British public willingly subject to the indissolubility of the marriage tie; and, accordingly, in order to get rid of the offensive husband, it was necessary to kill him—an absurd expedient, and little less than a murder. Now there can be no doubt, that, with an Italian argument for a play, the public would have been content enough with an Italian solution of the dilemma. At all events, the legitimate catastrophe would have been free from all objections, save that of the prejudice sought to be evaded, and which in time would have vanished of itself. We regret that Mr. Hunt has not supplied the original *dénouement* for the present performance. It would doubtless have been well received by the exceedingly judicious audience which usually crowds the pit on first nights, and would have done away with the only hindrance to its popularity that affects the revival.

The drama itself has had the singularly good fortune of being well acted on both occasions. It is now performed, indeed, with remarkable elegance and power. Mr. Phelps does all he can to justify his ultimate "removal." He paints *Agolanti* in the darkest colours; but we think that he is likewise careful (notwithstanding the opinion to the contrary of some critics for whom we have great respect) to show the degree of self-torment endured, so as to make him the victim both of disposition and destiny, as well as the tyrant and wrong-doer. It is hard to blend these two points in characteristic delineation; but, in justice to the actor, we are strongly disposed to assert that he has effected and embodied the required union. In proof of it, we may state that the audience, in a great measure, are still disposed to sympathize with the husband, notwithstanding his unamiable exterior. We fear, indeed, that the poet has drawn *Ginevra* in too patient an attitude: her excessive indifference to her husband's taunts almost places her in the wrong. We are glad when she is moved to some passion, save resentment. The transition to this point, in the scene to which our Illustration refers, was electric—a result due to both author and actress. Miss Glyn's impersonation is, indeed, admirable for its artistic keeping. Her constitutional energy is repressed, and the resigned woman affected with wonderful *vraisemblance*. Towards the end, where the dialogue grows pathetic, the feeling which she displayed found an echo in every bosom. We would offer, in all kindness, a word of advice to Mr. Waller, in the part of *Rondilli*. Let him not brood so much on the sound of his own fine voice. His ear gets pleased with the deep monotones, until his speeches, if of any length, become sermons. He should throw greater variety into his declamation, and mark each clause of a sentence with its proper expression, and discriminate it with its proper punctuation. At present he runs one into another, with an affectation of the familiar. He must eschew all affectations. We hope to see both him and the play successful; but are afraid, for the reasons above given, that the latter will not become popular until the catastrophe be better justified.

GRAND ENTERTAINMENT AT SOUTHAMPTON.

On Monday last a banquet was given to the Lord Mayor of London, by the Mayor of Southampton, Richard Andrews, Esq., in return for his Lordship's hospitality to his Worship a short time back, at the Mansion-house, and to celebrate the suc



BANQUET GIVEN BY THE MAYOR OF SOUTHAMPTON TO THE LORD MAYOR AND SHERIFFS OF LONDON.

cessful progress in South Hants of public feeling in favour of the Great Industrial Exhibition of 1851.

Arrangements were made on a most extensive scale to welcome the Lord Mayor and the other civic authorities on their arrival

Nearly every house in the public thoroughfares was decorated either with flags, banners, or evergreens, the High-street being hung with a profusion of colours and magnificent banners, in different parts, extending across the road.

The north and south sides of the Town-hall were illuminated in the evening, as well as many of the hotels and tradesmen's houses, which, together with the display of fireworks and other demonstrations, surpassed anything of the kind ever witnessed within its ancient walls.

The Lord Mayor having complied with a request from the inhabitants of Southampton to receive him at Bishopstoke, about five miles from their town, in order that they might show him some of the scenic beauties which abound in the neighbourhood, the Mayor and Corporation, in their official robes, accompanied by a large concourse of persons in carriages and on horseback, left Southampton in the morning by the Bishopstoke railway station, where, at a quarter past one in the afternoon, the Lord Mayor with his suite, the Sheriffs of London and Middlesex, and several of the distinguished guests, arrived from London and other places by the railway train. Personal greetings and introductions having taken place, the Mayor, members of the Corporation, Lord Mayor, Sheriffs, and principal visitors, partook of an elegant *dejeuner* at the station hotel, and then, attended by an immense cavalcade, started for Southampton, in the following order:—The carriages of the civic authorities; horsemen, three abreast; private carriages; licensed vehicles.

Having entered the green drive on the common, the carriages waiting their arrival, together with the Ancient Order of Foresters, Odd Fellows, and Modern Order of Foresters, joined the procession, making it one of vast length and of a most imposing character.

In this form the procession proceeded to the cemetery, and thence into the high road leading into the town at the entrance of which were assembled many thousands of the inhabitants; in which form they perambulated the principal thoroughfares, visiting the magnificent docks, returning by another route to the Royal York Hotel, where the vast procession separated

THE BANQUET.

The Town Hall, where the banquet took place, is over the ancient Bargate, which is an object of great curiosity to strangers. The south portion of this ancient structure was built in the 13th, and the northern portion in the 15th, century. The south front has been stuccoed, and spoilt, the northern has been only partially disfigured. This part is of a semi-octagonal form On the south side was the Hall of Justice, and in it the present Solicitor-General sat for many years as Recorder. Over the northern portion was a grand jury room and other offices. The present Mayor suggested that the whole space over the southern and northern gates should form one large justice hall; that the bench of justice should be in the centre of the northern tower, which would be naturally raised on account of the height of the surrounding buildings, and which would command a view of all parts of the hall. This has now been just finished. In pulling down the windows of the grand jury-room, the arrow slits of the ancient building have been discovered and restored, to the great improvement of its architectural beauties and the future delight of antiquarians

Both the interior and exterior were fitted up magnificently for the present occasion The judicial bench formed a dais at which the principal guests sat. From the dome of the hall was suspended a beautiful floral ornament, formed of the choicest flowers. Over the heads of the most distinguished guests were their coats of arms beautifully painted, and the whole of the hall was decorated with numerous flags and banners. Opposite the Mayor's chair, between the south windows, was a floral crown on a velvet cushion. On the tables were vases filled with flowers, and the top of the hall was wreathed with flowers and evergreens The walls were lined with massive looking-glasses, the borders of which were wreathed with oriental foliage and flowers. The exterior of the hall was brilliantly illuminated.

Soon after six o'clock the guests began to arrive; and as each was announced, he was introduced to his Lordship by the Mayor of the borough.

On the right of the Mayor were Lord Dudley Stuart, Sir W. J. Cockburn, M.P., Sir J. B. Mill, Bart., the Chaplain, Rear Admiral Maurice, M.P., &c.; and on his left, Lord G. Lennox, Colonel Freestun, the Dean of Winchester, Thomas Chamberlayne, Esq., Charles Brett, Esq., &c. There were also present the Aldermen and Councillors of the different wards, the Mayors of Cambridge, Hertford, Portsmouth, Yarmouth, Lymington, Basingstoke, Newark, Winchester, Salisbury, Newport, Christchurch, and Ramsey.

The Mayor of Southampton, after proposing loyal and patriotic toasts, proposed "The health of her Majesty's Ministers," a body of men to whom they were much indebted for the service they had rendered to the country. One member of that Ministry was one who had kept this country from war, and its tranquillity for many years, when they had seen other countries torn to pieces by rebellion and discord (applause)—he had hoped to have had the pleasure of greeting at that festive board the head of the Government (communication from him (the Mayor) till late that afternoon, and important business alone prevented his attendance at the last. He gave them the toast of "Sir Alexander Cockburn and her Majesty's Ministers." (Immense cheering.)

Sir Alexander Cockburn, her Majesty's Solicitor-General, briefly responded to the toast. In common with the Mayor and his guests, he regretted the absence of the noble Lord (Palmerston), who he knew, from personal communication with him, was desirous to be present on this occasion, to meet the inhabitant of the county, but because he saw with infinite gratitude the town of Southampton rallying round its worthy mayor, a man who had been the arch test of his own fortune, which he only wished to value so far as he could with it promote the good of his fellow-creatures. He assured them that the present Ministry were anxious to do their best to promote the interests of commerce, and to advance in every way the welfare of every interests which combine to make England so great and exalted a nation. In the name of her Majesty's Ministers he thanked them for the compliment which had been paid them. (Applause.)

The Mayor next gave the health of "The Bishop and Clergy of the Diocese, and other Ministers of the Gospel," which was responded to by the Rev. the Dean of Winchester.

Next came the "Army and Navy."

Lord George Lennox responded on behalf of the army, and Captain Yelverton, R.N., on the part of the navy.

[illegible] called for a bumper for the next toast, which he might call the toast of the evening They had been honoured that day by the presence of the Lord Mayor of London, and he should be wanting in gratitude if he failed to express his sense of the kindness and attention which his Lordship had so kindly conferred upon him and the town He gave them, therefore, "The health of the Lord Mayor of the City of London." (Enthusiastic cheering.) That was the most gratifying day he had ever experienced; and he believed that, in saying that, he was uttering the feeling of nine-tenths of the inhabitants of Southampton. (Cheers.) The Lord Mayor had cheerfully responded to his invitation, and the people of Southampton had given his Lordship such a reception, that he trusted that the Lord Mayor's visit would become an annual one. (Applause)

The toast was received with tremendous applause, which continued for several minutes.

The Lord Mayor, in rising to return thanks, was again warmly cheered. He said that if anything would tend to make a man dumb, or to prevent him from giving expression to his feelings, it was the manner in which he had been received that day by the people of Southampton. He could not find words to express in words his feelings on that occasion He had been elected Lord Mayor of the chief city of the world (applause); and if he did but do his best, and work in a way by which the honour of the city and the office would be maintained (hear, hear) and justice supported (hear, hear), he should do his duty as well as he could. As to the show of the office, he put it at one side, and was only anxious to do his duty to his fellow-citizens. He was deeply grateful to them for the way in how pleased and gratified he was at his reception and the whole proceedings of that day. (Cheers.) It almost made him a proud man. At all events, he should return to London a greater man, in his own consideration, than before (hear, hear); for, in regard to the applause of his fellow-countrymen, and the manner in which, the people of Southampton had acted that day, was, indeed, a gratifying thing. He again expressed the pleasure and gratification he felt, and thanked them all most heartily for the honour they had done him. (Great applause.)

The Mayor next proposed "The health of the Members for the borough of Southampton." which was briefly responded to by B. B. Wilkeix, Esq.

The Lord Mayor proposed "The health of their worthy Chairman."

The Mayor, in a few remarks, acknowledged the compliment, and thanked the Lord Mayor and the Corporation of London for the honour they had conferred upon him by their attendance at the proceedings of that day. He hoped he should see many more such assemblies before the Great Exhibition of 1851, and for many years after that event.

"The health of the Mayors," "The Sheriffs of London and Middlesex" &c., were then given, and the festivities were continued till a late hour.

PUBLIC LIBRARIES AND MUSEUMS.—The new act for enabling town councils to establish public libraries and museums is now operating, having received the Royal assent on the close of the session. The act 8 and 9 Vict. cap. 43, for encouraging the establishment of museums, has also been repealed, and this act may be adopted in any municipal borough, the object being, as expressed, "to give greater facilities than now exist for establishing and extending public museums of art and science, and for the rational recreation and instruction and recreation of the people." In any borough, the population of which exceeds 10,000, the mayor, on the request of the town council, may ascertain whether the ratepayers be agreed by the votes of the burgesses, and when adopted, all necessary things are to be provided out of a rate of not more than one halfpenny in the pound per year. The public libraries and museums are to be held by the town council in trust for the benefit of the inhabitants. The admission to such libraries and museums is to be free of charge. There are are eleven sections in the act, and, notwithstanding the former one is repealed, museums remain or establish. d may be maintained under the present act.

CURIOUS DISCOVERY.—An ancient mill has within a few days been discovered on the townland of Snarmucshank, parish of Ballinchloe, about five miles north-east of Dunmanway. The massive framework of solid oak is in good preservation. It bears the marks of having been originally by fire. The remains of the upper and lower millstones are to be seen, one not much injured, the other greatly fractured by the action of the fire. A curious spade or shovel was found composed entirely of wood, but it was destroyed by an ignorant countryman. The old man in the neighbourhood state that from eight to ten feet of turf have been cut over its present position. *Cork Examiner.*

THE PEACE CONGRESS AT FRANKFORT.

The proceedings of the Third General Peace Congress were opened on Thursday, the 22nd instant, at Frankfort-on-the-Maine, in St. Paul's Church, the building made memorable by the recent meetings of the Frankfort Parliament. Herr Jaup, the Minister of Hesse-Darmstadt, presided. There were about 550 English present out of a total audience of 2000.

The Congress sat three days—there being a morning and evening sitting each day; and the following were the resolutions agreed to:—

1. The Congress of the Friends of Universal Peace, assembled at Frankfort-on-the-Maine on the 22nd, 23rd, and 24th of August, 1850, acknowledge that war, even when sanctioned alike by public opinion and by law, is a crime; that it is the duty of all men to adopt measures calculated to abolish war; and the Congress recommends all its members to [illegible] their respective countries, by means of a better education of youth, by the public [illegible] of war, and the press, as well as by other practical methods, to eradicate those hereditary national and political and commercial prejudices which have been so generally the cause of disastrous wars.

2. That Congress is of opinion that one of the most effectual means of preserving peace would be [illegible] to refer to arbitration all those differences between them which cannot be [illegible] adjusted.

3. That the standing armaments with which the [illegible] armaments of [illegible] one another impose intolerable burdens and inflict grievous moral and social evils upon their respective communities; this Congress cannot, therefore, too strongly urge the necessity of immediate measures of entering upon a system of international disarmament, without prejudice to such measures as may be considered necessary for the maintenance of the security of a citizens and the internal tranquillity of each state

4. That Congress records its strong disapprobation of all foreign loans negotiated for the [illegible] furnishing to one people the means of slaughtering another

5. That [illegible] ry state to regulate its own affairs

6. This Congress recommends all the friends of peace to prepare public opinion in their respective countries for the formation of a congress of the representatives of the various states, with the view to the formation of a code of international law

A full notice of the proceedings, accompanied with Illustrations, shall appear next week.]

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The funds have again been very inanimate, Consols fluctuating barely ¼ per cent. during the week. A shipment of gold from America, with the tendency of the Exchange between Europe and the United States in favour of the latter, had influence in supporting quotations at the beginning of the week, which, however, yielded in a slight degree towards the close. The extreme range of Consols has been from 96¾ to ¾; and 95¾ ⅜ for Money. Considerable buoyancy exists in Bank Stock, the prices having advanced from last week's quotation of 213 to 215½ 216. New Three-and-a-Quarter per Cents continue a favourite investment, from the guarantee against any reduction in the rate of interest for the first ten years after subsidising. Three per Cents Money has rather slackened in demand this week. At the close of business dullness prevailed, the following list showing the latest quotations:—Bank Stock, 214½; Reduced, 97⅛; Three per Cent. Consols, 96¾; Three-and-a-Quarter per Cent. Annu., 99¼; Long Annu., to expire, January, 1860, 8⅛; Ditto, 30 years, October 10, 1859, 8 1-16; India Stock, 265; India Bonds, under £1000, 89 pm.; Ditto, above, 1000, 1050; Bank Stock for Account, 215½; Consols for Account, 96⅝; Exchequer Bills, £1000, June, 68 pm.; £500, June, 68 pm.; Small, June, 68 pm.

A meeting of the Spanish bondholders was held on Wednesday last, when the terms agreed on by the several representatives of the Foreign and English bondholders were presented to the meeting. The proposition is, that £180 Active Stock shall be given for every £100 per cential and £60 arrears, and that the Passive Stock shall rank at the rate of £33 6s. 8d. per £100 Active. Upon this a dividend of 1 per cent. is to commence payment in half-yearly proportions, the first to become due in July, 1851, and to increase every two years 5s. per cent., so that at the end of seven years a minimum of 3 per cent is to be reached, which will constitute the ultimate limit of interest to be discharged. It was plainly intimated that the Spanish Government, in consequence of the flourishing state of its finances, was not, under any circumstances, comp y with more liberal terms. Resolutions were passed empowering the committee to make a proposal for the settlement of the debt upon this basis, it being said that there was every prospect of its immediate acceptance. The holders of Passive Stock of course objected to the above arrangement; and as a speculation has for some time been carried on in this security, from its temptingly low price, a considerable augmentation of it stock should be made. It was, however, unsuccessful, and the meeting seemed to be tolerably satisfied with the hope of getting such a paltry instalment as the proposition conveys the shadow of willingness to accept.

Business in the Foreign Houses has been unusually uninteresting: prices have scarcely fluctuated, with the exception of Spanish Active Bonds and Russian Two per Cents. Spanish Actives advanced on Thursday to 19¾; and Russian, including the dividend, to 104¾. Spanish Actives have since sold at the late advance, and a demand for Dutch Two-and-a-Half per Cents has caused the price to creep up lately. At the close of business, quotations were—For Russian Three Bonds, 86; Danish Bonds, 86; Dutch Bonds, 5 per Cents, 103; Ditto, 4 per Cents, 5 per Cent., ex Jan. Coupons, 99½; Peruvian Bonds, 4½ per Cent., Account, 81½; Ditto, Deferred, 33⅛; Russian Bonds, 112¾; Ditto, 4½ per Cent., 95¾; Spanish, 5 per Cents, Ditto, Account, 19¾; Ditto, Coupons, 19¾; Ditto, Passive, 3⅜; Ditto, 3 per Cent., 37⅛; Ditto, Account, 37⅜; Dutch, 2½ per Cent., 57⅛; Ditto, 4 per Cent., Certificates, 89½

The Share Market is generally firmer, more real business being transacted South-Western continue to improve; a rise of five per cent. has been registered during the Account, which closed on Thursday. At the close of the week prices were firm, as follows:—Caledonian, 73¼; Eastern Counties, 6¼; Ditto, Northern and Eastern, 20¼; Eastern Union, 7⅞; Eastern Counties, 6¼ (late E. U. Shares), 5; E. Lancast., 48 ⅜ d; E. Lincoln, Gun. 6 per Cent., 28½; Great Northern, 99; Ditto, Half, A, Deferred, 92; Ditto, Half, B, Six per Cent., 7; Ditto, Half, C, Preference, 11; Great Western, 92¼ 4; Lancashire and Yorkshire, 40¼; Ditto, Fifths, 2¼; Leeds and Bradford, 94; London and Blackwall, 4; London, Brighton, and South Coast, 80; Ditto, New, Guaranteed, 137½; London and North-Western, 111¼; Ditto, New Quarters, 18; Ditto, Fifths, 1¾; London and South-Western, 61¼; Ditto, New Pref., 7⅛; Midland, 33⅝; Ditto, £50 Shares, 9⅜; Ditto, Consol. Debent and Cert., 130; Norfolk, Gunr. 5 per Cent., 84; North Staffordshire, 6¼; Oxford, Worcester, and Wolverhampton, 6; Royston and Hitchin, 7; Ditto, Shoprath Extension, 1; Shrewsbury and Birmingham, 6⅜; Ditto, Oswestry and Newtown, 1; South-Eastern, 18; Ditto, No. 3, 18; Ditto, Registered, No. 4, 3½; South Wales, 20¾; York, Newcastle, and Berwick, 14¾; Ditto, Newcastle Extension, 9⅜; Ditto, Great North of England Preference, 4; York and North Midland, 14½; Boulogne and Amiens, 7⅜; Namur and Liege, 1; Northern of France, 14¾; Orleans and Bordeaux, 2⅜; Paris and Strasbourg, 7½; Rouen and Havre, 9¼.

SATURDAY MORNING.—The Market for Consols ruled steady yesterday, and the quotations are the turn higher. The Three per Cents closed at 96¾ ⅞, the Account. The New Three-and-a-Quarter per Cents have been done at 99¼ to ⅜. Bank Stock, 214; India, ditto, 264. India Bonds, 89s., and Exchequer Bills, 68s. pm. Spanish Bonds steady. Railway Shares flat, but not lower

THE MARKETS.

CORN EXCHANGE, Friday.—The supplies of English wheat up to our market this week have been moderate—actually on the increase. Per land carriage, 3830 quarters; per coastwise, 3830 quarters; per foreign, 1830 quarters. The arrivals by land carriage since Monday last have been very moderate, and the supply will be was larger than for some weeks past. The weather being more favourable for harvest work, [illegible] change to notice in the quality. [illegible] 200 quarters of foreign wheat have arrived, and reported this week. Selected parcels were held at very full prices, but the middling and inferior qualities were a dull sale, and a small supply of both English and foreign barley was brought forward. That article sold steadily, and malting parcels were the turn higher. We had a fair supply for malt. The arrivals of oats have been moderate. Good and fine sorts sold at very full prices, and were [illegible]. Most other kinds ruled steady. Beans, peas, and flour [illegible].

ARRIVALS.—English: wheat, 2830; barley, 60; malt, 1050; oats, 700; flour, 2460 sacks. Wheat, 1830 qrs.; barley, 200; beans, 60; peas, 60; flour, 1000 sacks.

Wheat, basis and Kent, red, 42s to 48s; ditto, white, 48s to 50s; Norfolk and [illegible] ditto, white, 44s to 46s, rye, 21s to 23s; grinding barley, 19s to 21s; [illegible] ditto, white, 24s to 26s; malt, 52s to 57s; oats, 16s to 17s; feed, 15s to 16s; Kingston and Ware, 48s to 50s; Chevalier, 52s to 56s; Norfolk and Suffolk, 20s to 23s; Stockton and Lockwidge, 20s to 23s per 280 lb.

Bonded red wheat, 24s to 25s; white, 27s to 28s; fine, 29s to 30s; grinding barley, 13s to 14s; beans, 28s to 30s; peas, 28s to 30s per quarter. Flour, American, 21s to 22s per barrel, Canada, —s to —s per barrel.

Mark Lane Wednesday.—Monday's moderate demand was [illegible] and brown ditto, 2s to 10s per bushel in other seeds only a limited business was done. Cakes are almost unsaleable.

Linseed, English, sowing 52s to 56s; Baltic crushing, 49s to 49s; Mediterranean and Odessa, 49s to 49s; brownseed, 52s to 56s per quarter. Coriander, 16s to 20s per cwt. Canaryseed, new, 8s to 11s; white ditto, 7s 9d to 8s; and tares, 3s 6d to 4s per bushel; rapeseed, £23 to £25 per last; linseed cakes, £9 to £9, London ditto, £5 5s to £7 5s per thousand; cakes, £5 to £5 15s per ton; canary, 56s to 63s per quarter

Bread.—The prices of wheaten bread in the metropolis are from 6½d to 7d, of household ditto, 5d to 6d per 4lb loaf.

Imperial Weekly Average Wheat, 43s 6; barley, 29s 6d; oats, 17s 9d; rye, [illegible]; beans, 28s 5d; peas, 28s 3d.

The Six Weeks' Average—Wheat, 43s 5d; barley, 22s 6d; oats, 18s 5d; rye, [illegible]; beans, 27s 9d; peas, 27s 9d.

Butter.—Wheat, 1st barley, 1st oats, 1st rye, 1st beans, 1s. peas, 1s

Cheese.—[illegible] sales this week have been dull, and without a limited quantity has sold at very full prices. Common sound Cheese is saving, privately, as high as 11d to 1s per pound The total stock of teas in London is only 31,948,000 lbs., against 34,041,000 lbs at the corresponding period last year.

Spices.—As few average amount of business has been transacted in West India sugar, the market is at present quiescent. Bengal and Manilla sugars are firmly supported. Refined firm Both sorts goods moved off freely, and brown lumps are worth 58s per cwt

Coffee.—Little business doing in good ordinary native Ceylons, at 44s per cwt. In the value of no article has there been a greater fluctuation

Teas.—In all kinds the sales and prices are with difficulty supported

Provisions.—Dutch butter a fair moderate request at about stationary prices. Fine Irish is selling at 78s to 80s; ordinary ditto, 72s to 76s per cwt. The business doing in Irish bacon is somewhat extensive, and the quotations have advanced 2s to 3s per cwt. Cargoes of 70s to 73s; and Limerick, 68s to 69s per cwt. Hams quite moves off slowly, on somewhat lower terms. Lard, 74s to 80s per cwt; fine, 78s to 80s per cwt. Irish Waterford bacon is quiet, at 62s; and American prime parcels are dull to hear Lard tolerably firm; but most other kinds of provisions command very little attention

Tallow.—P. Y. C. on the spot is selling at 39s 6d per cwt for old, and 37s for new, with a very moderate inquiry

Oils.—Our market is decidedly firmer, and prices are well supported on every instance Several parcels of sperm have sold for export

Sperm.—The demand for West Indian from is steady Low to good Jamaica is quoted 84 5s 6d to 3s 6d; and fine, 3s 6d to 4s 6d per gallon. The best brands brandy of are firm, at 4s 2d to 5s 5d for 1847. Genera, is 6d per

Hay and Straw.—Old meadow hay £2 12s to £3 17s; new ditto, £2 8s to £3 5s; old clover, £3 13s to £4 10s; new ditto, £3 to £4; and straw, £1 2s to £1 9s per load.

Wool.—The public sales of colonial wool are still progressing steadily About 17,000 bales have been disposed of, at very full prices.

Potatoes.—The metropolitan markets continue to be extensively supplied with English potatoes, in which a good business is doing, at from 60s to 75s per ton

Coals (Friday).—Holywell, 13s 6d; Hewicke and Co., 13s 9d; Hetton, 13s 6d; Stewart's, 13s 6d; Scaffarough, 13s; South Kelton, 14s 3s; per ton.

Coal Trade.—Fine types of best years' growth rise in moderate request at full prices In all other kinds very little business is doing, and in some instances the quotations are almost nominal. On the whole the situation remains unchanged, and the supply is steadily selling 1,200,000 Tons Ostend 65 bales have received as the week.

Mid and Kent pockets 20s 3d, seconds 19s 3d, Kent and Kent ditto, £5 15 to £5 18s; Sussex ditto, £3 15s to £3 18s, Yearlings, £1 18s to £2 15s 6d hops, 18s to £2 18s

Smithfield (Friday).—The numbers of beasts on sale in the market to-day were somewhat extensive, but of very inferior quality. The few prime Scots, &c., offering and freely, at prices fully equal to those of [illegible] on Monday Otherwise the best trade was in a very sluggish state, and most were disposed of very heavily at [illegible] per stone. With sheep we were likewise well, but not to any heavily supplie All breeds were in very moderate request In the quotations, however, no change took p Lambs—the supply of which was good—ruled dull, at the late decline in value. the [illegible] Down qualities selling at 4d per 8 lb. There was a full average supply of calves on offer, while the veal trade was heavy, at barely stationary prices In pigs next to [illegible] was doing Milch cows, with their small calf, were selling at from £14 to £18 [illegible]

Per 8 lb to sink the offals—Coarse and inferior beasts, 3s 6d to 3s 8d; second quality ditto, 4s 0d to 3s 2d; prime large oxen, 3s 4d to 3s 6d; prime Scots, &c., 3s 8d to 10d. coarse and inferior sheep, 3s 4d to 3s 6d; second quality ditto, 3s 8d; prime coarse-woolled ditto, 3s 8d to 3s 10d; prime South Downs, 3s 10d to 4s 0d; large coarse calves, 3s 2d to 3s 6d; prime small ditto, 3s 8d to 4s 0d; large hogs, 3s 2d to 3s 4d; neat small porkers, 3s 8d to 4s 0d; lambs, 3s 8d to 4s 6d, sucking calves, 3s to 3s 8d, and quarter old store pigs, 16s to 21s each. Total supplies, beasts, 300, sheep, 12,190; calves, 120; pigs, 200 Foreign beasts, 2001; sheep and lambs, 2190; calves, 160 South-boasts 57; sheep, 60

Newgate and Leadenhall.—A very limited amount of business was transacted in these markets to-day, on the f

Per 8 lb to sink the offals—Coarse and inferior beasts, 3s 4d to 3s 6d; middling ditto, 3s 8d to 3s 10d; prime large ditto, 3s 10d to 4s 0d; prime small ditto, 4s 0d to 4s 2d; large pork, 2s 10d to 3s 0d; inferior mutton, 3s 10d to 3s 4d, middling ditto, 3s 6d to 3s 8d; prime ditto, 3s 8d to 3s 10d; veal, 3s 0d to 3s 10d; small pork, 3s 8d to 3s 10d, lamb, 5s 0d to 6s 0d.

DEATHS.

At Bathampton, George Edward Allen, aged many years a Deputy Lieutenant and Magistrate of the county of Somerset.—August 20, at Bradfield Hall, Berks, aged sixty-nine years, Katherine, wife of the Rev Jean Cudmore, after an illness of a few days

THE QUEEN'S VISIT TO DOVER.

(From a Correspondent.)

THE following account, from an eye-witness, of her Majesty's flying visit to Dover, may prove acceptable, especially as the very brief notices of it published in the newspapers do not give it its just importance

Between seven and eight o'clock in the morning of the 23rd inst. the Queen was transmitted by the ordinary mail boat from Ostend to Captain Baldrock, R.N., Superintendent of the Mail Packet Station, of the intention of her Majesty to pay a passing visit to Dover, on her return to the Isle of Wight, and that the Royal squadron would arrive at about half-past five P.M. This information, however, did not become generally known till the afternoon. The passing of the *Stromboli*, as it was thought to be, down the Channel during the day, not followed by any vessel coming to the anchorage, the quantity of smoke issuing from many that the report was conceded or erroneous; until unmistakeable signs of preparation, later in the afternoon, assured the anxious many their loyal curiosity would in time be gratified The preparations, however, were confined to the garrison, who, long before the fleet hove in sight, were in readiness to receive it. At five P.M. every eye from the Heights above, the Parade below, and the piers stretching out into the harbour, was directed towards the eastward, and most of them were aided by the telescope in their searching gaze after the first faint trace of the expected visitors.

A long line of distant smoke, floating over the horizon in the direction of Ostend, grew gradually more distinct, until, at last, the well-defined forms of three steamers opened on the view, a fourth remotely in the rear. The noble proportions of the first, with the Royal standard flying at the main-mast head, immediately drew the eyes of the whole assembly to it, and when declared to the assembled thousands that she bore the beloved object of their unceasing interest, and, by the course the yacht was taking, that it was her Majesty's intention not only to pass within hailing distance close to, gave but a faint sight of the beauties of the bay and the points of interest connected with the national works in progress, but that, under the able guidance of Commander Hewlett, the vessel was actually to be brought to her anchorage as nearly and as intimately as she could, considering at the time it was dead low-water, and spring tides. The skilful manner in which her temporary pilot brought the Victoria and Albert up to her moorings, without a foot of water below the keel to spare, and yet in perfect safety, revealed to all the initiated on the beach and the pier head, whose was the master-hand that controlled the course, and at the same time elicited the plaudits of all on board and on shore. Lord Adolphus Fitzclarence kept the lead during the whole of the [illegible] time. A companying the Royal yacht were the *Fairy* (Royal yacht tender, Commander Welsh), and the *Vivid* (Dover mail-packet), to whose commander (Mr Smithett) was entrusted the duty of the Royal pilotage. The *Black Eagle* (Command r Cooke) had not arrived when the other vessels cast anchor in the roads

A brief eye now from this focus of attraction to the Castle and heights behind, was to behold a novel and imposing sight. The Royal standard was floating from the staves at the Castle and the heights, and all the mail-packets, modern and old, were decked out in their gayest colours, and the ensign at the stern of each, as well as others, were decked out in their parti-coloured flags. A long line of the gallant 91st, with their bright bayonets glittering in the light of the shining sun, were drawn up on the Castle hill, between the two gate-houses, and the barbette batteries bristled with scores of armed artillerymen. The first salutes we're booming from the venerable and long-silent walls of the old Castle, which, except on very especial occasions, remains in a mouldering condition outward and inward, a commentary of welcome or respect, such being entwined by the ivy and the western heights alone. But upon this gladsome occasion he could not hold his peace, and the white wreaths of smoke that enveloped his embattled towers were hailed with a deafening cheer. The first salute of the *Victoria and Albert* was given at 5h 40m, and when the Royal standard was lowered from the vessel's mast-head, and the ensign at the stern displayed, the 91st presented their arms, and the band struck up the National Anthem. Then came the passing of the *Victoria and Albert* up to her moorings, which was effected in the most masterly manner, and at 6h 10m she was brought to her anchorage, and the Royal standard was again hoisted at the mast-head. Her Majesty, Prince Albert, and the Royal children appeared on the deck, and were received with the most enthusiastic cheering. The Royal party then descended the companion-ladder, and entered the barge, which was manned by the crew of the Royal yacht, and pulled by them to the pier-head, where they were received by the Mayor and Corporation, the Lord Warden's carriage being in attendance to receive her Majesty. The Royal party then entered the carriage, and proceeded to the Lord Warden Hotel, where they remained for a short time, and then returned to the pier-head, and entered the barge, which was pulled by the crew of the Royal yacht, and proceeded to the *Victoria and Albert*, which was immediately steamed out of the harbour, and proceeded on her way to the Isle of Wight.

The Royal party were received on board the *Victoria and Albert* by Captain Grey, Commander Hewlett, and the officers of the Royal yacht, and the Royal standard was hoisted at the mast-head, and the ensign at the stern, and the yacht proceeded on her way to the Isle of Wight.

The Royal party were received on board the *Victoria and Albert* by Captain Grey, Commander Hewlett, and the officers of the Royal yacht, and the Royal standard was hoisted at the mast-head, and the ensign at the stern, and the yacht proceeded on her way to the Isle of Wight.

ADVERTISEMENTS.

MR. JOHN PARRY'S NEW ENTERTAINMENT entitled NOTES, VOCAL and INSTRUMENTAL, with the Author's Illustrations, will be given by Mr JOHN PARRY at his Theatre Royal, Adelphi, on Monday evening September 2nd, at Ross—for on Tuesday the 3rd, at Maidstone, on Thursday, the 5th, at Tunbridge Wells—and on Monday, the 9th, at Canterbury.

INDIA OVERLAND MAIL.—DIORAMA GALLERY of ILLUSTRATION, 14, REGENT-STREET.—Mr. Theatrical Painter WILLIAMS'S magnificent MOVING DIORAMA ILLUSTRATING the ROUTE of the OVERLAND MAIL to INDIA, from Southampton to Madras and [illegible] EVERY EVENING at Eight, and Afternoon, Thursday, at Three. Admission, 1s; Stalls, 2s. 6d; Reserved Seats, 3s. Doors open half-an-hour before each representation.

CAPE of GOOD HOPE BANK.—CAPITAL PAID UP, £75,000.

The Directors of the LONDON and WESTMINSTER BANK having accepted the Agency in London of the CAPE of GOOD HOPE BANK, Notice is hereby given that the Local and Wholesale Bill Business, Discounts and Advances, Letters of Credit on this Bank by persons proceeding to the Cape of Good Hope, and all other business connected therewith, may be had at the Bank, 41, LOMBARD-STREET, City.

By Order, J. B. ORMEN, Manager.

THE Late RIGHT HON. SIR R. PEEL.—A recent correct LIKENESS of the above Statesman is now ready, and is placed in PARIAN and STATUARY MARBLE, by Messrs. NATHANIEL GRAY and CO., HILL STREET, BERKELEY-SQUARE, from a MODEL by Mr. WILLIAM JACKSON, of the Royal Academy. Price 21s each; with glass shade and velvet covered stand, 1s 6d each.

JONES'S £4 4s. SILVER LEVER WATCHES, and £10 10s GOLD LEVERS, at the Manufactory, 338, Strand, opposite Somerset House, are recommended not to vary more than half a minute per week. The great reduction of price now added to the quality, either of the watch manufactures or any other house in the trade, renders it a matter of no consequence where purchases are made; these advantages are all secured when JONES'S name is on the dial. Watches sent to any part of the world, payable in JONES'S Watchwork, free for 66.

WATCHES and TIME-MANAGEMENT.—JOHN C. SAVORY and Co. have published a PAMPHLET on the construction of the various Watches in use at the present day, and explaining the advantages of each, with lists of prices, &c. Its perusal will enable the purchaser of a watch to obtain perfect value for the purchase of an article, the principal characteristics of which are elegance and durability. It also contains numerous hints for the better management of a watch by the wearer. It may be had gratis at the Manufactory, 22, CORNHILL, or will be forwarded by post on application.

J. C. SAVORY and Co., 47, Cornhill, London, seven doors from the Bank.

SILVER PLATE, New and Second-hand.—J. C. SAVORY and Co.'s Pamphlet of Prices, with outlines, may be had gratis, or will be sent free, if applied for by a card bearing the name and address of a correspondent. The Illustrated Silver Spoons and Forks, new and second-hand Dessert-knives, Silver-hilted Table-knives, Electro-plated and white Silver-ware, Watches, silver-dial Watches, Clocks, Cut-glass, Gold Ornaments, Spoons and Forks, Watches, Clocks, Cut-glass, Gold Ornaments, Spoons and Forks, new and second-hand Dessert-knives, Silver-hilted Table-knives, Electro-plated and white Silver-ware, Watches, silver-dial Watches, Clocks, Cut-glass, Gold Ornaments, Spoons and Forks, new and second-hand Dessert-knives, Silver-hilted Table-knives, Electro-plated and white Silver-ware,

THE QUEEN'S VISIT TO DOVER HARBOUR.

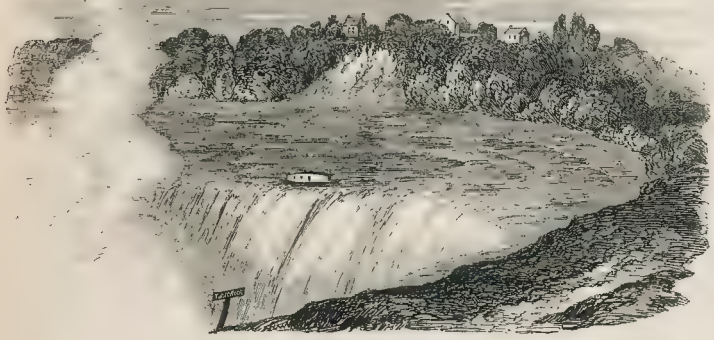
THE QUEEN'S VISIT TO DOVER HARBOUR.

(*Continued from page 194.*)

Three or four of the Royal children were on deck, and, perhaps, equally with their Royal parents, formed a source of attraction and delight to the numerous eyes that gazed on them earnestly, though respectfully, from the boats below and around. The good folks of Dover, as I am informed, were flattered at the proud distinction enjoyed by their fellow-townsman, Captain Smithett, who, holding one of them in his arms, seemed to be directing the child's attention to the beauties of his native place, graciously visited by the Queen. A steamer belonging to the Commissioners of the Harbour, kept buzzing about her, grander and more honoured sister with a meaning which was not quite obvious; but if any of those on board had expected the honour of a reception on board the Royal yacht, they were disappointed. Indeed, it was not till after the lapse of a considerable time that Captain Baldrock was granted an interview, to ascertain her Majesty's pleasure, a subject about which endless conflicting statements were rife; some giving it out she intended landing to inspect the new Admiralty Pier, and others, that the South-Eastern Railway Company were making arrangements for her conveyance, by special train, to London. Certain it was that at one time she was expected to disembark, for preparations were made to facilitate her so doing. The return of Captain Baldrock, however, into harbour soon displayed these ideas. The public were informed that her Majesty and party, having enjoyed the scene so long as the light of the evening sun had enabled them, had quietly descended below, and were now partaking of their dinner—a fact which appeared to be corroborated by the brilliant lights discernible through the portholes of the vessel.

The crowds now dispersed in every direction; telescopes that earned sixpence a peep were speedily reduced to their *minimum* dimensions; no more boats were offered for the convenience of sight-seers; "Castend apples and Queen's pears" ceased to be cried; and after one more Royal salute had roared from the heights simultaneously with the weighing the anchors of the steam squadron, feats performed in the gloom of eight o'clock, the once excited town and port of Dover returned peacefully to their routine of pleasures and duties, with hearts full of loyalty towards their excellent Queen, and patriotism for their well-beloved and highly-favoured country.

WATCHER.



CANAL-BOAT AT "THE HORSESHOE FALL," NIAGARA.

CANAL-BOAT, HORSE-SHOE FALL, NIAGARA.

(*From a Correspondent.*)

On a recent visit to the Falls of Niagara (Tuesday, July 23rd), my eye was quickly arrested by the novel spectacle of a Canal-boat perched on the very edge of "The Horse-shoe Fall," on the British side of the river.

It appears that about six weeks ago (from August 8th), this Canal-boat, laden with pork and whiskey, but fortunately with no one on board, broke loose from the harbour at Chippeway, and was carried down the river by the current, pursuing her perilous voyage through the Rapids without any apparent injury, till she lodged against a rock on the extreme verge of the Fall, in which position she has since lain, *as if at anchor*, with the chafed waters roaring and gushing past her as they take their fearful leap into the abyss below.

I made a Sketch of the west section of the Horse-shoe Fall, as seen from Table Rock, showing the curious position of the boat on the edge of the cataract—a position in which no earthly power can reach her. As the boat will probably soon go to pieces under the action of the raging waters around her, and there being little likelihood of any craft being ever again similarly situated, I enclose a copy of the Sketch.

LUMP OF GOLD FROM CALIFORNIA.—VALUE £500.

CALIFORNIAN GOLD.

THIS "big lump" of gold is pronounced by competent judges to be not only the largest, but the finest specimen yet brought to England. Its weight, with quartz, is 14½ lb. troy; specific gravity of the mass, 5·052; quartz being 2·3. The average specific gravity of gold from California is 16: this will show the specimen to contain nearly 9 lb. of gold; and estimating it at £45 a pound, the specimen is intrinsically worth £400; though we are assured the offer of £500 for it has been refused.

This wondrous product of the Californian *dorado* may be seen at Mr. Limbird's, No. 143, Strand, a few doors west of Somerset House. It has also been exhibited in the United States; for we find the following announcement of the mammoth lump in the *New Bedford Daily Mercury*, April 16, 1850:—

"California Gold!—*At Concert Hall.*—An opportunity will be afforded to our citizens this evening of seeing with their own eyes one of the most remarkable and astonishing specimens of product of the California mines which has yet been discovered in that auriferous region—a mammoth lump of gold, weighing about FIFTEEN POUNDS. It is owned, we understand, by V. F. Perkins, Esq., of Maine, and others in this city."

We find, also, the following characteristic mention of "the big lump" in the *Alta California* of Feb. 1:—

"I had heard that some persons had arrived in town with a mammoth lump, and, with two or three friends, went to inspect it. I think, had the minstrel who so feelingly laments the demise of the venerable Edward seen this specimen, he would have changed his tune to 'Get out of the way, old Dan Tucker,' and been still more urgent, in his request to have 'de shovel and de hoe taken down. It was procured from the Auburn Diggings, near the North Fork, by three men named T. S. Wetherby, R. Raskin, and T. Cragier, and weighs twelve pounds avoirdupois, or about 14 pounds 7 ounces 10 pennyweights troy. It is of an irregular egg shape, somewhat flattened, and of about 18 inches circumference one way, by 12 the other. It is a conglomeration of stone and gold, smooth on the surface; and though, probably, three-fourths or five-eighths of its bulk are stone, there is not more than four pounds in it. Its intrinsic value is, at least, 2000 dollars; but the holders have been offered 3000 and 3200 for it. They decline selling, however; preferring the chances of making a good thing by it, in taking or sending it home. *Seeing these terrifically large lumps is apt to make one very nervous.*"

We have only to add, that our Illustration is of the actual size of "the big lump."

THE ILLUSTRATED LONDON NEWS.

No. 445.—VOL. XVII.] SATURDAY, SEPTEMBER 7, 1850. [SIXPENCE. { WITH SUPPLEMENT, GRATIS.

COLONIZATION.—THE CANTERBURY SETTLEMENT

COLONIZATION, as an art, has never been practised by the British people; and yet the British people have colonized to a greater and more successful extent than any nation under the sun. The British Government never colonized at all, and yet one of its former colonies ranks, at the present time, among the most powerful nations of the earth; and another colony, in the southern hemisphere, promises, ere long, to become almost at rich and as populous as Great Britain herself. Without system and without co-operation, the sons of the hardy and adventurous race that people the British Isles betook themselves to the most distant part of the world whenever they found that the old country denied them bread, or when, as in the case of the Pilgrim Fathers, they were not allowed to worship God in their own fashion. The overflow of our teeming population has irrigated, with its vivifying streams, almost the whole of the North American continent, and is now spreading itself over Southern Africa, Australia, and New Zealand. It asks no aid from the Government, and demands no favour, except to be let alone in the task of converting the wildernesses into arable or pasture lands, and of building cities on the banks of navigable streams or on the shores of capacious and safe harbours. Elbow-room, freedom from taxation, and non-interference; these are the Englishman's demands. Give him but these, and under his vigorous strokes the primeval forest disappears, and the long untrodden wilderness begins to smile with plenty. Emigration, by a spontaneous and natural process, the result of sheer necessity, has thus in course of time, given to Great Britain a larger colonial empire than was ever possessed by any state or nation of which mention is made in the history of the world. The process is continually in operation. Each of the three great divisions of the old country has its favourite emigration field. The men of English birth seem at present to look to the East and the South, and to prefer Australia and New Zealand as their future homes The Scotch look westward to Canada; and the scattered remnant of the clans, deprived of a chance of living in the glens and straths of their forefathers by the combined operations of extensive graziers and sheep-farmers, and of still more extensive deer and grouse preservers, settle down upon the banks of the St. Lawrence or the northern shores of the great American lakes. The Irish, with no love for England, its religion, or its laws, betake themselves to the United States, and swarm over in such numbers as to lead to a fear in some parts of Ireland that sufficient hands will not be left behind to reap the harvests that are still thought worth sowing in that country.

The notorious fact and reason are that we are overstocked with people, and that men with small capitals find no profitable or safe investments at a time and in a country where all the operations of trade have a tendency to fall into the hands of large capitalists. The latter, being contented with small profits, organize business of every kind upon so thorough a plan, that the small capitalist has no chance of living. Every trade is passing gradually into the hands of the large holders of money. The small tradesman endeavours to compete with them, and ultimately ruins himself. The pressure of these circumstances increases in intensity from year to year; and a proportion of the agricultural and labouring classes, along with another portion of handicraftsmen of various kinds, draught themselves off to new regions, lest this excessive competition should squeeze or trample them into pauperism or into crime. "From the highest to the lowest," said the late lamented Charles Buller, in his admirable speech on systematic colonization, in the session of 1843, "there is the utmost difficulty in procuring employment in England; and the gains of most classes, if not of every class, are diminished by the competition of redundant labour. The liberal professions are more overstocked than any others. Gentlemen of the first station and fortune find a difficulty in knowing what to do with their younger sons; and we hear every day of the sons of gentlemen entering into occupations from which their pride in former times debarred them. Among the middle classes there are the same complaints. There is the same intense competition amongst tradesmen, and notoriously a most severe competition amongst farmers. And the competition of educated men is nothing in comparison with the severity of that competition which exists among educated women. Since 1810 more than six millions have been added to the population of Great Britain, and for all this additional population agriculture has not supplied any, or hardly any, additional employment." The seven years which have elapsed since Mr. Buller spoke have but increased the difficulty of living among all classes—manufacturing and trading, as well as agricultural—of which he drew so striking and so painful a picture. Emigration has naturally increased under the pressure. The total emigration of the year 1843, which Mr. Buller spoke of as very large, was under 60,000 souls; in the year 1849 it had quintupled itself, and was within a small fraction of 300,000. In the present year it bids fair to exceed even that large amount; and fully two-thirds of these overflowing hundreds of thousands hasten to a foreign, independent, and rival country—the United States. They cost Great Britain nothing to go, and on their arrival in a new land they unfortunately take care to remember that they owe her nothing. They give her neither allegiance nor affection, neither gratitude nor deference, but often cherish a feeling of bitter hostility.

This great process by which England and Ireland spontaneously relieve themselves, cannot be stopped. The greater the number of emigrants that leave our shores and settle prosperously across the Atlantic or the Pacific, the greater the number of their friends and relatives still left behind who will be induced or aided to follow them in the natural course of time. The process is beyond the powers of the parent state to interfere with. It is like water finding its level, or like air rushing into vacant corners. It proceeds entirely from the operation of natural laws. It benefits the mass who leave our overburdened shores; it slightly and not very perceptibly diminishes the home pressure, relieves the poor-rates, and stores up in other regions of the globe future customers for our productions. In this respect, it increases our wealth, and the wealth of the world. But, without wishing to interfere in any way with this grand movement, it has been felt by those who are best qualified by their previous studies to form an opinion upon the subject, and who have devoted their time and their energies to practical questions of statesmanship, that something might be done to direct the stream. The speech of Mr. Buller, in introducing his motion for an address to her Majesty to take into consideration "the means by which extensive and systematic colonisation might be most effectually rendered available for augmenting the resources of the empire, giving additional employment to capital and labour, both in the United Kingdom and in the Colonies, and thereby bettering the condition of the people," was

THE CANTERBURY COLONISTS.—SCENE AT GRAVESEND, ON MONDAY.—(SEE NEXT PAGE).

by far the most complete and able exposition of the whole subject that was ever submitted to Parliament or the country. But it led to no result. It excited admiration, drew down the applause of men of all parties, was commented upon by the press, and then forgotten. The Government of the day had no desire to grapple with a subject so large. Colonisation was postponed, and Emigration was left to take its own course, without any other State supervision than that afforded at the outports by the emigration agents, whose sole business is to convince themselves that the emigrant-ships are seaworthy and not overcrowded, and that a proper quantity of wholesome food and pure water are provided. In the meantime, the great stream has continued to roll on undirected. Jealousy and possibly hostile America has received year by year our swarming multitudes; and Australia and other colonies, towards which the tide is not systematically turned, have suffered for want of the labour which we could so well have spared, and have been prevented from being good customers because their wealth remained undeveloped, in consequence of a scarcity of men.

The people of this country, however, if there be any blame in this matter, have been more to blame than the Government. They look with mistrust, if not with a more positive ill-feeling, upon all great schemes which the Government proposes to undertake; and any project for the maintenance of a quarter of a million of men, women, and children per annum to any one or several of our colonies, would excite a storm of disapprobation and misinterpretation which no Government would willingly encounter. It is very desirable that colonies, similar in laws, feelings, and religion to the parent State, and bound to it by ties of the tenderest affection, should be established in our vast possessions; but it is not likely that the Home Government will be induced to originate or mainly support any proposal of the kind. The people may colonise; the Government dare not. But, while the Government thus remains inactive from policy and necessity, we rejoice to see that the people are alive to the importance of doing for themselves what the majority of the people will not allow the Government to undertake, and that at least one great plan of systematic colonization has been attempted. The New Zealand Company has proved a failure; but the Canterbury Settlement, founded on a different basis, will yet, we trust, grow up into a veritable Young England in that distant clime, and flourish, not as the jealous foe, but as the firm friend and partner of its parent state. We have given, in another portion of our paper, the full details of the departure of the first large detachment of the colonists, and we need do no more in this place than express our hearty good wishes for their welfare, and our earnest hope that they may prove but the pioneers of many similar detachments of sturdy English people, who shall transplant to the southern hemisphere the energy and the virtue of the national character. That they may meet the full reward of worldly happiness and prosperity, is a wish we form for their own sake; that they may lay the foundation of a great Empire, is a wish we form for our own. Upon every ground, public and private, the Canterbury colony and its promoters deserve success. It will be a step in the art of government and an era in civilization, if they attain it.

THE CANTERBURY ASSOCIATION.

FAREWELL TO THE NEW ZEALAND EMIGRANTS.

A few weeks ago we recorded the proceedings at a *dejeuner* given in the East India Import Dock to the higher class of emigrants as a kind of farewell on leaving their native land; and on Monday we had the pleasure of being present at a dinner given to the labouring emigrants, in booths erected for the purpose in the fields adjoining Wate's Hotel, Gravesend, the hotel itself not being able to accommodate so large a party. About 600 persons sat down to an excellent dinner of good old English fare, while many friends of the emigrants were also present at the tents, and appeared to take great interest in the proceedings. Nor were parties outside at all inactive, a regular fair appearing to have sprung up on the spur of the moment to meet the wishes and the wants of the multitude assembled in the vicinity of the refreshment booths.

As we have before announced, this first squadron for the new colony consists of four vessels, the *Sir George Seymour*, the *Cressy*, the *Charlotte Jane*, and the *Randolph*, which will convey about 600 passengers out to their new homes.

The emigrants sat down to dinner at about one o'clock, the Rev. Thomas Jackson, Bishop designate of the new colony, presiding in the absence of the Right Hon Lord Lyttelton, who afterwards took the chair.

The same seemed to carry us back to bygone times, when the Pilgrim Fathers went forth over perilous seas (linked together by one faith) to establish colonies in far-off lands, and build cities in wild wooded wastes which had before borne no impress but that of the wild beasts of the chase, or the fortmark the Indian hunter left behind while pursuing them. Stern men, such as Cromwell selected his Ironsides from, and stout matrons who, during the civil war, laid aside their pastors to load and reload muskets, were the undertaking spirits of the new colonies were formed in those stormy old times Neither gaols nor workhouses were emptied to people these early settlements, but firm high-souled men and women went out, accompanied by their ministers and grave elders, such as in more ancient days assembled in our Saxon witenagemotes, full of moral resolves, and gave them laws, and established another England, in which they could worship God according to the dictates of their own consciences. They wrestled not the garden to transplant its sickly and seedy roots, (so to speak) took out the very seed, and the purest mould, and formed for themselves strong and healthy beds, that produced such fruit as tempted and attracted others to sally forth and cultivate their newly-discovered fields

Of similar materials to these is the Canterbury Settlement, in New Zealand, to be formed, and more than a million acres to be peopled, by those who are of one faith—members of the English Church—and who are to begin by building schools and erecting places of worship, and thus providing for the intellectual and spiritual wants of the community. Food and raiment and shelter are not all they intended to supply, but ample provision is made for much higher and holier purposes.

Now who are really poor and wretched company them: such as go out as servants and labourers are men and women of good character, and members of the English Church. The Archbishop of Canterbury is at the head of the Association, which numbers amongst its members noblemen and gentlemen, and those connected with the Church. In short, we shall not err by calling it a religious community. Hunger, and cold, and crime, and sin, and sorrow, and nakedness, and w[illegible]-lessness are left behind. Except the working emigrants who accompany them, we believe nearly the whole of the settlers are large purchasers of land: some few of them may have gone out themselves, but they have taken an liberty to establish their own forms of government, to be, in fact, free and independent of England. It will be seen that they set out with such wealth, respectability, and numbers as startles all the other minor colonists ever possessed: but that they take away none of our unemployed and needy poor.

What we witnessed last Monday, awakened no painful feelings, for they were not people actually compelled to leave their country because they were unable to obtain a living in it, like the many thousands who covet but the common necessaries of life, and cannot obtain them. We turned from the well-spread tables then before us, and thought of the poverty and wretchedness of those who drag out a miserable existence in our over-crowded cities; the thousands who stand

Homeless near a th ground be,
And near a thousand in the line for want of food

who bring no old memories into the crowded city, in which many of them were born. Home, with all its green boughs rustling above the rippling stream, the murmur of the bee, the shout of the cuckoo, and the mellow [illegible] of the golden tufted blackbird were never to them old, familiar sounds; they have nothing to sigh over, to look back upon and regret. The word "Home" to many of them has no charm, has never been surrounded with comfort; it is but a shifting from attic to attic, or from cellar to cellar; it but couples up unhealthy back-rooms, and high, dead walls, and breathless courts, which keep the wind reaches, it only stirs the sleeping poison, and scatters wider the stench of a thousand stagnant sewers. There they sit and hear of holidays and merry seasons, in which they have no share; the Christmas bells have rung out to call to their last resting-place many of their companions, and they are compelled to sit and listen to those sounds in the darkness, or by the flickering of a handful of fire,

[illegible] holidays but tell them that there are pleasant places somewhere, which people are rushing out of town to see, though for them the flowers grow not, [illegible] All they know of time is by feeling hungry, [illegible] "stitch, stitching," keeping no other record of the hours but by the number of stitches they take, or how long it will be before they can afford to eat again, while misery is gnawing within, and the miserable meal is but too soon concluded. Their homes were places from which they were many a time turned out, because they could not pay the rent, then left to stand shivering and starving in the street, until some one, who pandered to many miseries as they all knit the want of a wretched roof for a covering, invited them in—and they sat crouching beside the hideous grate, thankful that, in addition to hunger, they had not to endure

The pitiless pelting of the outer storm.

They have nothing to offer one another but sympathy—nothing to give but sigh for sigh, as they mingle tears with tears What have they to throw a charm of[illegible] home? Where is the comfortable bed on which to repose when their labour is ended? Behold that heap of rags and straw in the dark corner of the room! Where are their pictures to enliven the walls? their flowers, to tell that spring or summer has come? The imagination must form a landscape where the mortar has broken away—the only white patch in that dirty dwelling; their flowers of summer are dying in that broken jug where the halfpenny nosegay is placed, purchased when hunger needed appeasing, because memory was pining for nourishment, and the heart had eyes for nought else. Look at those black roofs and tall chimneys, and they wanted to look on something which God had made, for,

Though man has power to build a town,
He cannot make the tiniest flower
With every wish and will to shake.

Mighty England, with all her glory, has but left them heirs to misery. When such as these are borne away to another country, we can almost picture the guardian angels that would accompany them hiding their faces with their hands as they speed along with their white wings expanded above the vessel, as if weeping for these poor outcast daughters. But Hope, with her "golden hair" streaming out, would herald the way, pointing to other stars beyond the rim of the horizon, far over the sea, and bidding them remember that God is also there; that there are no crowded courts and starving populace in those lands, where Health would stand with roses in her hands to plant in their pale cheeks, while honest Labour waved his sickle to welcome them to the thatched hut, which stood with plenty, humming-birds, and blue smoke under the green trees, and then in coiling shadows over the golden harvest-field. Alas! these go not out with the Canterbury Colonists We should consider the prudent emigrants as going before to prepare a home for their feebler or poorer brethren. Their intelligence, capital, and enterprise will, we trust, create such a demand for labour, that they will invite the misery and poverty left at home to join them in the happy land of Canterbury, where hope plenty will be found for all. May their turn soon come, and may they speedily join those who are now on their way; and, when it does, may the sea on which they will sleep flow around them with a gentle murmuring, as if to lull them as softly as a mother's breath when she bends over her slumbering infant, and so dream during their long voyage over the ocean. May they at last anchor in a foreign land, where they will find a home such as they have never known.

Here, where there is not even room for their dead, but where the last silent tenant is removed to make room for the next comer, what have they to weep over? Nothing! No one, perhaps, would be by to close their dying eyes, or, when they turned their faces to the cold wall, to bid "God bless them!" No friendly hand to lift them down those stairs up which they had so often gone with aching hearts, but be borne by pauper arms, in a pauper's coffin, to a nameless grave, the very spot where it would be levelled within a month after they had been thrust beneath it, as if there was neither room for them living nor dead. Who would not pray to heaven to send them a prosperous voyage to those were prayed for on Tuesday? as they fly from a shore which brings to memory only misery, where the only hours of happiness they [illegible] are those which went winged over their unconscious childhood, when hunger was scarcely felt while they played, or were forgotten when they slumbered—when the Angel of Sleep came and carried away the very memory of wretchedness until they awoke again. May the peaceful daisies soon blow about their home in a land where there is plenty, and to spare, and humour is not made up of lashings and hunger-pangs, and where the moaning snatches of slumber, which is not sleep. May they, like those who are now preceding them, find a home around which to twine their affections, with a few trees and flowers that they can love and call their own, where the sun has room to get near them at morning, and can give them a parting smile before he sets at night, and no tax is laid on the window through which he shines, but where he comes streaming free as water, first launched from God's almighty hand, he went thundering with a golden trail of glory behind, until the voice of the Omnipotent bade him stop in the immensity of space. May they find verdant valleys over which no board ever looked, threatening the wanderer with imprisonment for trespassing, but where the land is as free as it is to the foot of the bird, and where, in time, the tall church-spire may rise and the Sabbath-bell ring, and the hum of childish voices be heard coming from beneath the blossoming trees in the orchard where they were at play. When we turn to such a picture as this, and look at the haunts of wretchedness they now inhabit, we are compelled to acknowledge Emigration as a blessing.

If Emigration is too expensive, let us not close our eyes to the fact that there are millions of acres of waste land in England and Ireland which might be brought into cultivation, and enable thousands to live thereon in comfort, or be made to bring in a profit, so as to support those who cannot send out, and that this could be done at but little more cost than we should have to pay to get rid of them and their labour. Let us look at the quantity of fruit and cattle imported into England every year, and which might be grown and fed in our own country, if these wastes were brought into cultivation by the capital which we are sending abroad, buying in food on the one hand, and on the other, paying those who have left the country with the means and profit to produce it. A wise king, in a remote and barbarous age, found it cheaper to divide his kingdom with pirates and robbers than to be constantly at war with them, though they were aliens; surely England ought to do for her own children, as much as Alfred did for the Danes. Emigration, if she will not send them to other countries. Labour is the only true wealth that nature ordained when she provided us with the raw materials—the power of mind is compelled to buy labour, and will neither clothe nor feed him, with it he calls in hard-handed industry to his aid. These are old truisms which no arguments can overthrow. Have we exhausted all our resources of employment, that we are compelled to send away capital which we are willing to labour from the land? This is a question more important than any other, and of a thousand times more consequence than the money even now spent in sending out emigrants. How many thousands would be reared in our own land for other markets, with what we are spending annually in Emigration? and how much closer would those little spots bind the affections of the occupiers to the soil, and make them struggle proudly to bear those burdens which are necessary to support the state. Let a large portion of these millions of acres be brought into cultivation at any cost; and then, if our busy hive is overstocked, send a swarm abroad. Women are needed in our colonies, and we should send as many as we can safely spare—the sweet images of themselves over distant lands; faces to look upon in after years which will call up the England their mothers were compelled to leave; such as we see brooding the evening shadows with their pensive eyes, and until bed-time on the village green. Anything to lessen the vice and wretchedness which is eating like a canker into the heart of our over-crowded cities. Such as these the Canterbury colonists will not take with them, but cannot afford to send them abroad, let us see what can be done for them with our waste lands at home, instead of leaving them to pine and die unwept and uncared for, in our overcrowded cities.

Early on Tuesday morning, the *Cressy*, the *Sir George Seymour*, the *Randolph*, and the *Charlotte Jane*, left Gravesend for the intended new colony. One or two of the ships will sail direct for their distant port, while the others will call at Plymouth for the Bishop elect, and the remaining portion of the settlers. The Right Hon. Lyttelton (so named after Lord Lyttelton, the chairman of the Association, and who has devoted much time to the objects of the expedition) lies about six miles from the final destination of the site of grants. The distinctive feature of the enterprise, and what renders it more than ordinarily interesting, is, that all classes of the community, of the mother country are represented in the agricultural labourer, the mechanic, the artificer, the tradesman, the manufacturer, law and physic; while a Bishop elect, the Rev. Thomas Jackson, M.A., and several divines, are intended to form a nucleus round which the colony will rally, as the centre of the Church of England, of which they are all, professedly, members. A technical ecclesiastical and legal difficulty has prevented the immediate consecration of Mr. Jackson to the episcopacy of the settlement, but it is understood that according to the usage in New Zealand, was appointed Bishop generally or all the islands. This being found too extensive a diocese, and the present scheme having in the meantime been revised and acted upon, the appointment of an additional Bishop is now obviously required from the present one. There has been no time to obtain such consent. It is, therefore, proposed that Mr. Jackson should at once go out, and, after some few months in the colony, should return to England, to receive the necessary consecration, leaving his lady and six young children, who now accompany him, in the island. Many advantages, no doubt, will accrue to these colonists from the course being pursued. He will personally be experienced the little wants which may remain to make up the comfort and promote the welfare of his flock; while his return to New Zealand may be looked forward to as an opportunity for another batch of emigrants to increase the strength of the settlement.

CHARITABLE BEQUESTS.

The CHEESEMONGERS' BENEVOLENT SOCIETY receives a bequest, under the will of the late Mr. Thomas Mansell, of Bond-street, Wednesbury, of which society she was a subscriber; being the gift for a term of 250 years of cottages, premises, and land at Claylull Bushey, Herts, to be occupied by members of the Society free of payment. She also leaves £50 to the Worcester Hospital; £50 to the Worcester Dispensary, Charles-street; and £20 to the Asylum for Female Orphans, at Lambeth.

A late Spanish Ambassador, Don Ignacio Perez de Lema y Soto, whose will is now before the English Court for probate, has made the following charitable bequests:—To the Casa de Misericordia of the city of Valencia, 8000 reales; to the General Hospital of the same city, 820 reales; to the Casa de Beneficiencia, 500 reales; to the orphan children of San Vicente Ferrer and Casa del Pecado Mortal, 300 reales; to the Holy House of Jerusalem, and the Redemption of Christian Captives, 200 reales vellon each; entreating of the whole of these establishments to remember to command him to God.

The late Mr John Jones, of Hernehill and Cheapside, London, bequeathed £100 to each of the following charitable societies for the Support and Education of Indigent Deaf and Dumb Children, the School for the Indigent Blind, the Infirmary for Fistula and other Diseases of the Rectum, Charterhouse-square, the Royal Free Hospital in Gray's-inn-road, the [illegible] for Teaching the Blind to read, and the Free Watermen's and Lightermen's Asylum at Peng[illegible]

On Sunday last twelve persons were baptized [illegible] behind Mr Young's mill, in the presence of several [illegible] beheld with the greatest decorum. The baptized were [illegible] Spitalfields, over which Mr. Martin presides as pasto[illegible]

FOREIGN AND COLONIAL NEWS.

FRANCE.

Louis Napoleon has resumed his "progresses" through the departments, for the purpose of further testing the state of public opinion on the present state of the country. On this occasion he has taken a westward course, the professed object being to review the French naval squadron at Cherbourg, for which place he left Paris on Tuesday morning, *viâ* Evreux, on the Rouen Railway, accompanied by the Minister of the Interior, the Minister of Commerce, and the Minister of Marine. He was to return on the 13th. He arrived at Evreux at six o'clock the same evening, and was well received. Complimentary addresses were presented by the Mayor and Bishop, to which he made suitable replies.

The Paris *Journals* intimate, that, after the President's return from Cherbourg, he will visit Marseilles.

The Legitimist Court held by the Duke of Bordeaux at Wiesbaden broke up on the 30th ult., on the morning of which day the Duke had, on hearing of the death of Louis Philippe, directed a mass to be offered up, which the French in the town attended in mourning. In the evening the Duke dismissed his followers with a speech which he concluded as follows:—

I now wish to repeat to you all, that if [illegible] with the triumph of our noble and sacred cause, which is that of France, union and discipline are indispensable. With regard to principles, show yourself inflexible, while you are moderate and conciliatory towards individuals. He whom you regard as your chief—as your king—and who I may say is the best of your friends, will always set you an example, and will [illegible] by Providence should ever be in danger, ready unhesitatingly to all our friends, how happy and proud I should be to fly with you to her defence

The Duke thus openly, and without equivocation, assumes to himself the title of King. This speech puts an end also to the stories that have been flying about of a reconciliation of the two branches of the Royal House, for the "legitimate King" declares that on the score of principles there can be no compromise. This declaration is not unexpected in Paris as a highly important circumstance, and will go far to determine the existing Government in taking decisive steps. The Duke of Bordeaux is going to Lintz, where the Duchess is to meet him at her uncle's, the Archduke Archduke Ferdinand d'Este. The personages who paid their respects to the Duc de Bordeaux was the Prince Augustus de Broglie, the brother of the Duc de Broglie, and not the son of the latter, as erroneously stated.

There can be no doubt that the Government of the President of the Republic is preparing the way for effecting a change in the constitution. The *National* says, when they turned their faces to the cold wall, to bid "God bless them!" No friendly hand to lift them down those stairs up which they had so often gone with aching hearts, but be borne by pauper arms, in a pauper's coffin, to a nameless grave, the very spot where it would be levelled within a month after they had been thrust beneath it, as if there was neither room for them living nor dead. Who would not pray to heaven to send them a prosperous voyage to those were prayed for on Tuesday? as they fly from a shore which brings to memory only misery, where the only hours of happiness they [illegible] are those which went winged over their unconscious childhood, when hunger was scarcely felt while they played, or were forgotten when they slumbered—when the Angel of Sleep came and carried away the very memory of wretchedness until they awoke again. May the peaceful daisies soon blow about their home in a land where there is plenty, and to spare, and humour is not made up of lashings and hunger-pangs, and where the moaning snatches of slumber, which is not sleep. May they, like those who are now preceding them, find a home around which to twine their affections, with a few trees and flowers that they can love and call their own, where the sun has room to get near them at morning, and can give them a parting smile before he sets at night, and no tax is laid on the window through which he shines, but where he comes streaming free as water, first launched from God's almighty hand, he went thundering with a golden trail of glory behind, until the voice of the Omnipotent bade him stop in the immensity of space. May they find verdant valleys over which no board ever looked, threatening the wanderer with imprisonment for trespassing, but where the land is as free as it is to the foot of the bird, and where, in time, the tall church-spire may rise and the Sabbath-bell ring, and the hum of childish voices be heard coming from beneath the blossoming trees in the orchard where they were at play. When we turn to such a picture as this, and look at the haunts of wretchedness they now inhabit, we are compelled to acknowledge Emigration as a blessing.

If Emigration is too expensive, let us not close our eyes to the fact that there are millions of acres of waste land in England and Ireland which might be brought into cultivation, and enable thousands to live thereon in comfort, or be made to bring in a profit, so as to support those who cannot send out, and that this could be done at but little more cost than we should have to pay to get rid of them and their labour. Let us look at the quantity of fruit and cattle imported into England every year, and which might be grown and fed in our own country, if these wastes were brought into cultivation by the capital which we are sending abroad, buying in food on the one hand, and on the other, paying those who have left the country with the means and profit to produce it. A wise king, in a remote and barbarous age, found it cheaper to divide his kingdom with pirates and robbers than to be constantly at war with them, though they were aliens; surely England ought to do for her own children, as much as Alfred did for the Danes. Emigration, if she will not send them to other countries. Labour is the only true wealth that nature ordained when she provided us with the raw materials—the power of mind is compelled to buy labour, and will neither clothe nor feed him, with it he calls in hard-handed industry to his aid. These are old truisms which no arguments can overthrow. Have we exhausted all our resources of employment, that we are compelled to send away capital which we are willing to labour from the land? This is a question more important than any other, and of a thousand times more consequence than the money even now spent in sending out emigrants. How many thousands would be reared in our own land for other markets, with what we are spending annually in Emigration? and how much closer would those little spots bind the affections of the occupiers to the soil, and make them struggle proudly to bear those burdens which are necessary to support the state. Let a large portion of these millions of acres be brought into cultivation at any cost; and then, if our busy hive is overstocked, send a swarm abroad. Women are needed in our colonies, and we should send as many as we can safely spare—the sweet images of themselves over distant lands; faces to look upon in after years which will call up the England their mothers were compelled to leave; such as we see brooding the evening shadows with their pensive eyes, and until bed-time on the village green. Anything to lessen the vice and wretchedness which is eating like a canker into the heart of our over-crowded cities. Such as these the Canterbury colonists will not take with them, but cannot afford to send them abroad, let us see what can be done for them with our waste lands at home, instead of leaving them to pine and die unwept and uncared for, in our overcrowded cities.

Early on Tuesday morning, the *Cressy*, the *Sir George Seymour*, the *Randolph*, and the *Charlotte Jane*, left Gravesend for the intended new colony. One or two of the ships will sail direct for their distant port, while the others will call at Plymouth for the Bishop elect, and the remaining portion of the settlers. The Right Hon. Lyttelton (so named after Lord Lyttelton, the chairman of the Association, and who has devoted much time to the objects of the expedition) lies about six miles from the final destination of the site of grants. The distinctive feature of the enterprise, and what renders it more than ordinarily interesting, is, that all classes of the community, of the mother country are represented in the agricultural labourer, the mechanic, the artificer, the tradesman, the manufacturer, law and physic; while a Bishop elect, the Rev. Thomas Jackson, M.A., and several divines, are intended to form a nucleus round which the colony will rally, as the centre of the Church of England, of which they are all, professedly, members. A technical ecclesiastical and legal difficulty has prevented the immediate consecration of Mr. Jackson to the episcopacy of the settlement, but it is understood that according to the usage in New Zealand, was appointed Bishop generally or all the islands. This being found too extensive a diocese, and the present scheme having in the meantime been revised and acted upon, the appointment of an additional Bishop is now obviously required from the present one. There has been no time to obtain such consent. It is, therefore, proposed that Mr. Jackson should at once go out, and, after some few months in the colony, should return to England, to receive the necessary consecration, leaving his lady and six young children, who now accompany him, in the island. Many advantages, no doubt, will accrue to these colonists from the course being pursued. He will personally be experienced the little wants which may remain to make up the comfort and promote the welfare of his flock; while his return to New Zealand may be looked forward to as an opportunity for another batch of emigrants to increase the strength of the settlement.

AUSTRIA

Accounts from Vienna of the 29th ult. mention that the Russian Cabinet is particularly anxious that a grand diplomatic congress of the representatives of the German States should be held in the Austrian capital, there to decide upon a new basis of European policy by which those states shall in future be governed.

UNITED STATES

We have accounts from New York this week to the 21st ult., but they are of little interest, with the exception of an announcement that the differences between the United States and Portugal have been settled, Portugal consenting to pay in all claims, except in that of the *General Armstrong*, and that is to be left to the arbitration of a disinterested power, probably Sweden.

At Washington, the Senate having passed the Utah Bill, the Texas Boundary Bill, the Bill for establishing a territorial government in New Mexico, and the bill for admitting California into the Union, had taken up the Fugitive Slaves, the Territorial, and Appropriation Bills, which were still being angrily debated, without any result. The South were determined to resist the admission of California, and organising resolute opposition to it in the House of Representatives.

Texas continues her preparations for an armed defence of her boundary, and Indian incursions have been renewed on the frontier.

The majority of the Contoy prisoners detained at Havannah had arrived at Mobile, by the United States sloop-of-war *Albany*. The prisoners say that they were subjected to very severe discipline during their imprisonment at Havannah. They were confined in irons the whole of the time, and constantly guarded day and night. Their food was of inferior quality, and scarcely sufficient to support life. Keeping up incessant efforts of the United States Government in their behalf, they were in daily expectation of a summons to death. Their release from prison was as unlooked for as it was welcome.

CENTRAL AMERICA.

We have accounts this week from the Isthmus of Panama, representing the place as very sickly from the heavy rains. Numbers of persons were dying for want of food and the want of proper medical attendance. Another affray had taken place between the Indians and Americans, the latter having fired upon the former. The Indians afterwards united themselves, and drove the Americans to a part of the town of Chagres entirely occupied by them

There is no particular intelligence from Nicaragua. A small steamer had arrived at Greytown from New York, and two more were hourly expected to arrive, which would be employed on the river, and on the Nicaraguan route to the Pacific. A great number of workmen had arrived to work on the canals, which are to be formed when the rapids are impassable.

The railway from the frontiers of Panama from Navy Bay had been commenced by the American Company, hundreds of labourers having arrived there from Carthagena and the surrounding country.

WEST INDIES.

Advices from Jamaica have reached us to the 7th ult.

The August holidays, in commemoration of negro emancipation, which were formerly celebrated with great mirth and festivity, are by the peasantry, passed off very quietly, scarcely an event occurring to dispel the ordinary monotony of Jamaica life. The island remained pretty healthy, except in the town of Falmouth, where the yellow fever had made a good deal of sickness prevailed among children. In Falmouth it was feared there would be much suffering when the wet season commenced.

[illegible]ation in the routes of the Royal Mail Company's steamers has been very generally disapproved of in Jamaica. Petitions have been got up to the Assembly at Kingston, requesting them to establish steam communication between Kingston and the Spanish Main, the same as heretofore carried on by the Royal Mail Company's vessels. A requisition has also been got up by the merchants to the Spanish Consul, requesting his interference with his Government to supply a Spanish vessel to convey the mails between St. Jago de Cuba and Kingston

INDIA.

Advices in anticipation of the Overland Mail have been received this week from Bombay to July 25, and Calcutta to the 15th of the same

Lieutenant-Colonel King, of her Majesty's 14th Light Dragoons, has died by his own hand. A rebuke received by him in November last, and more severe than he could bear, from the Commander-in-Chief on some courts-martial, indicating a sad want of discipline in the regiment, are said to have preyed upon his mind till insanity supervened, and he blew out his brains. It may be remembered that Major Parker, of the 39th Regiment, committed suicide at Kurrachee some five years since, immediately after having received a severe, and, as was alleged, unmerited rebuke from Sir C. Napier. The curse of the army, the morning dram, had, it is said, driven him to it.

The *Lahore Chronicle* says that "The order retaining Sende allowances for the troops beyond the Indus, at the time the Governor-General had expressed his anxious desire to assimilate the pay, is the real ground of the feud known to exist between his Lordship and Sir C. Napier."

The Governor General and family are at Chini, in the hills of Kunawur. The Commander-in-Chief continues at Simla, all doubt as to the certainty of his retirement in November being at an end.

A furious hurricane ravaged the Punjaub around Wuzzerabad, on the 22nd of June, uprooting houses, prostrating trees, and leaving everything bare as it advanced.

At Delhi, on the 16th of July, a violent shock of an earthquake was experienced. The bunaloows shook to their foundations, and the people rushed into the open air between his Lordship and Sir C. Napier."

At Dumdum another explosion of gunpowder has taken place. The catastrophe occurred on the 9th of July, in a fleet of thirty boats, adjoining a [illegible] magazine. Nine boats have been sunk, but those containing [illegible] were destroyed. No lives were lost.

[illegible] at frontier of the Punjaub, the Meerdies are once more disposed to make themselves troublesome. It was supposed early in July that

amicable arrangements with the hill men had been finally arranged, and Mr. Brande Sapte, with Lieutenants Pollock and Miller, assistant commissioners, were about to proceed from Peshawur to Kohat. They were fortunately warned, when on the r way, of a conspiracy to entrap and murder them existing among the villagers, and only escaped by a lucky return

Cholera has been prevalent among the 78th Highlanders at Bombay, and the 10th Hussars at Kirkee.

AUSTRALIA.

From this remote, but important portion of our colonial possessions, we have intelligence of considerable interest. The latest dates are from Melbourne, the capital of Victoria (Port Phillip), to the 16th of May. We thus learn of the commencement of an open and determined agitation of the question of the severance of the Australian colonies from the mother country. Dr. Lang recommends the immediate formation of an "Australian League," to consist of all colonists who pay an entrance-fee of 5s., with a yearly subscription of not less than 10s. The executive powers of this body, he proposes, shall be entrusted to a president, vice-president, one or more secretaries, and a council of fifteen, who will pursue the objects set forth in the four following resolutions:—

1. To unite in one grand political league for mutual protection and defence, and for general advancement, the five Australian colonies of New South Wales, Van Diemen's Land, South Australia, Port Phillip, and Cook's Land, or the Moreton Bay country, that the inhabitants of these colonies may henceforth feel and know that they are no more isolated and detached communities—to be governed and oppressed separately and independently by viceroys from Downing-street, with none to interfere for them from without—but one people, having one and the same interests and common objects, the nucleus and elements of one great Australian nation.

2. To prevent the degradation of any one of those colonies into a mere receptacle for the convicted felons of Great Britain and Ireland; and to remedy, as far as may be practicable, the enormous evils that have already resulted from the prevalence and abuse of the transportation system in certain of these colonies.

3. To encourage and promote, by every legitimate means, the influx of an industrious, virtuous, and thoroughly British population into these colonies, that their vast and inexhaustible resources may be duly and fully developed, and that they may be fitted as speedily as possible for taking the high and influential place which they are obviously destined to hold in the civilised world, as the great leading power of the southern hemisph.

4. To achieve, by moral means exclusively, and with the full approbation and concurrence of Great Britain, the entire freedom and independence of these colonies, and their creation into sovereign and independent States; to be incorporated into one great political Confederation, like the Swiss Cantons of Europe, or the United States of America, under the style and title of "The United Provinces of Australia."

Assuming that England will agree to the erection of the proposed republic, Dr. Lang's scheme descends to the minor arrangements for its government, which he would commit to the hands of a president, with a salary of £3000 per annum. A general legislature would assist and control the president, with functions it is designed to assimilate to those of the American chief magistrate

On all matters of internal legislation, education, religion, police, public works, and so forth, Dr. Lang recommends that the respective States of the Federation should be left perfectly free. Dr. Lang, in a long lecture, entered into the details of the scheme at great length, and every word was applauded to the echo.

Dr. Lang appears to have been subsequently sent into prison arbitrarily for some matter of debt, to the great displeasure of the Melbourne public, who were raising a subscription to procure his release. The particulars of the affair are not given in any of the papers that have reached India.

The mining interest at Adelaide (South Australia) is in a flourishing state, and the total proceeds of copper-mines during the last four years and a half are estimated at £307,252. Gold washing has commenced with sufficient prospect of success to stop emigration to California. Experiments have been made on the sands from the bed of the Onkaparinga, a stream south of Adelaide, with a newly-invented machine, capable of washing 25 to 30 tons per day. Two ounces of gold were obtained from 160 lb. of sand. Very promising indications of coal have been met with on the south side of Kangaroo Island.

VIOLENT DISPLAY OF POPULAR INDIGNATION

AGAINST THE AUSTRIAN MARSHAL HAYNAU, AT BANKSIDE.

MARSHAL HAYNAU, the Austrian General, whose sanguinary cruelty during the late military operations which he conducted as Commander-in-Chief against the Hungarians, has obtained for him, throughout the civilized world, the infamous title of the "Butcher Haynau," has within the last week come to London, in the course of a *tour* which he is at present making in consequence of his having fallen into disgrace with the Imperial Court at Vienna, by recent orders from which he has been deprived of his military command in unfortunate oppressed Hungary.

The Marshal seems to have had little idea of the loathing and horror with which all classes in this country universally regarded his deeds in the land of the MAGYARS: accordingly, he was making a round of visits to the various objects of attraction in the metropolis immediately after his arrival, and among other places, he proceeded on Wednesday last, about twelve o'clock, to see the wonders of the great brewery of Messrs. Barclay and Perkins, in Southwark. He was accompanied by two other gentlemen; and though the moustachios (especially those of the Marshal, which are very long) and other indications showed that the party were foreigners, they at first attracted little notice, being of course unknown to all the persons at the brewery. According to the regular practice of visitors, they were requested to sign their names in a book in the office, after which they crossed the yard with one of the clerks. On inspecting the visitors' book, the clerks discovered that one of the parties was no other than the notorious Marshal Haynau. It became known all over the brewery in less than two minutes, and before the General and his companions had crossed the yard, nearly all the labourers and draymen ran out with brooms and dirt, shouting out "Down with the Austrian butcher!" and other epithets of rather an alarming nature to the Marshal. A number of the men gathered round him as he was viewing the large vat, and loudly continued their hostile manifestations. The Marshal being made acquainted by one of the persons who accompanied him, with the feeling prevailing against him, immediately prepared to retire. But this was not so easily done. The attack was commenced by dropping a truss of straw upon his head as he passed through one of the lower rooms; after which grain and missiles of every kind that came to hand were

VIOLENT DISPLAY OF POPULAR INDIGNATION AGAINST THE AUSTRIAN MARSHAL HAYNAU, AT BANKSIDE.

freely bestowed upon him. The men next struck his hat over his eyes, and hustled him from all directions. His clothes were torn off his back. One of the men seized him by the beard, and tried to cut it off. The Marshal's companions were treated with equal violence. They, however, defended themselves manfully, and succeeded in reaching the outside of the building. Here there were assembled about 300 persons, consisting of the brewers' men, draymen, &c., the presence of the obnoxious visitor having become known in the vicinity. No sooner had the Marshal made his appearance outside the gates than he was surrounded, pelted, struck with every available missile, and even dragged along by his moustache, which afforded ample facilities to his assailants, from its excessive length, it reaching nearly down to his shoulders. Still battling with his assailants, he ran in a frantic manner along Bankside until he came to the George public-house, when, finding the doors open, he rushed in and proceeded upstairs into one of the bedrooms, to the utter astonishment of Mrs. Benfield, the landlady, who soon discovered his name and the reason of his entering the house. The furious throng rushed in after him, threatening to do for the "Austrian Butcher;" but, fortunately for him, the house is very old-fashioned, and contains a vast number of doors, which were all forced open, except the one in which the Marshal was concealed. The crowd had increased at that time to several hundreds, and from their excited state Mrs. Benfield became alarmed about her own property as well as the Marshal's life. She accordingly despatched a messenger to the Southwark Police-station for the assistance of the police, and in a short time Inspector Squires arrived at the George with a number of police, and with great difficulty dispersed the crowd and got the Marshal out of the house. A police-galley was at the wharf at the time, into which he was taken, and rowed towards Somerset House, amidst the shouts and execrations of the assembled people. Messrs. Barclay have suspended all hands, in order to discover the principals in the attack. It appears that the two attendants of the Marshal were an aide-de-camp and an interpreter. He had presented a letter of introduction from BARON ROTHSCHILD, who had therein described him as "*his friend Marshal Haynau.*"

[Our Artist has depicted the brave woman-dogger in the full enjoyment of the *charivari* which the *stout* "sons of freedom" so cleverly improvised for his reception.]

QUEEN'S SCHOLARSHIPS.—The annual letter addressed by the Committee of Council on Education to her Majesty's inspectors of schools on Queen's scholarships explains the views of the committee in relation to Queen's scholarships. The class qualified to compete for these scholarships will consist of the apprentices who have passed the examination for the end of the fifth year successfully. The committee propose that the pupil teachers who have successfully completed their apprenticeship shall be at liberty to attend at any of the examinations which their friends or patrons may select, with the concurrence of the principal of the training school. In order to limit as little as possible the opportunities by which peculiar talents may be exhibited, it is not, perhaps, desirable to prescribe which of the subjects of examination these candidates shall be at liberty to select, further than to state strongly their Lordships' opinion that they should not attempt answers upon all the subjects. The following subjects must not be wholly omitted by any candidate, viz

1. The Holy Scriptures, the Catechism, and the Liturgy of the Church of England (in schools connected with the Church of England). 2. English History. 3. Arithmetic (including vulgar fractions and decimals). 5. English grammar and composition). 6. The use of a globe, or some observations on the practical duties of a teacher

A candidate who answers in these subjects really well, may obtain an exhibition of £20 for one year. A candidate who answers in the foregoing subjects really well and also in one other subject really well (to be selected by himself out of those proposed to the candidates for certificates of merit, but with a preference on the part of my Lords for the first three books of Euclid), may obtain an exhibition of £30 for one year. Candidates for Queen's scholarships in female training schools will not be required to answer questions in vulgar fractions or decimals. For the higher exhibitions, they will be at liberty to select one of the subjects proposed to female candidates for certificates of merit, such as book-keeping, biographical memoirs, or domestic economy. Their Lordships would prefer a knowledge of some good manual upon the last-named subject, in connexion with which they will be prepared to give due weight to certificates from the managers of the candidate's school, attesting her practical knowledge of household duties. The exhibitions awarded to females will be at the rate of two-thirds of those awarded to males, viz. £13 6s. 8d., and £16 13s. 4d., instead of £20 and £25, to correspond with the different expenses of boarding in training schools for males and females respectively. Every candidate will further be required to instruct a class in the presence of the inspector, to read intelligently, with good articulation and pronunciation; to write a fair hand, and to spell correctly. As to the number of these scholarships to be awarded, the committee will confine it within 25 per cent. of the number of students who shall have been resident in each training school for one year and upwards at the date of the examination

THE NEW FRIENDLY SOCIETIES ACT.—The act passed on the 15th inst. to consolidate and amend the laws relating to friendly societies contains 52 sections, besides several schedules. It is an important piece of legislation, and was passed, according to the preamble, to make further provision for protection of the members against "fraud and the misapplication of their funds." The laws are now consolidated into one statute, and the other acts are repealed except so far as they are required for matters to be transacted or perfected. The objects for which friendly societies may be formed under the act are detailed, viz. "for the purpose of raising a fund for the mutual relief or maintenance of the members or their wives, children, or nominees, or of any other persons dependent on them, in sickness or infirmity, old age, widowhood, or orphanhood, or in case of the death of such members, or for the funeral expenses of such members, or for the relief or maintenance of any person or persons, for such time as the trustees of any society may think fit, who, by the rules of such society, may be entitled to receive relief or maintenance from the funds thereof, or for the endowment of the children of members, or for the reversionary interest of members in any benefit society, or for any two or more of such purposes, or for any other purpose not contrary to law, and which shall be specified in the rules of such society." The act is to come into operation on the 1st of October next.

OUTWARD AMERICAN MAILS.—Hitherto letters for the United States from this country, unless specially directed to be sent by the United States mail-packets from Southampton or Liverpool, have been forwarded by Canard's packets. As the United States mail-packets now keep good time, and often great inconvenience has been felt by the majority of letters for America being sent exclusively by the British packets, the Postmaster-General has at length decided that all letters, unless specially directed, shall be forwarded from this country by the first mail steam-packet that leaves England, whether British or American, from Liverpool or Southampton. The following is a copy of a notice and an instruction to postmasters which is about to be issued from the General Post-office on this subject:

By command of the Postmaster-General.—Notice to the Public, and Instructions to all Postmasters, Sub-Postmasters, and Letter-Receivers

General Post-office, 1st September, 1850.

Henceforward all letters addressed to the United States, and not directed to be otherwise sent, will be transmitted by the first packet, whether British or United States packet, which may be ready to be dispatched after they are posted. Letters specially directed "by British packet," or "by United States packet," or by any particular vessel named, will be forwarded in accordance with the desire thus expressed by the writers.

ROMAN CATHOLIC MISSION.—On Tuesday, the Right Rev. Dr. Joynes, Roman Catholic Bishop of Demerara, left London by railway to join the *Dee* at Southampton, by which vessel he proceeds to his diocese. The Bishop was accompanied by several missionary priests and brothers of the order of St. Paul. The Right Rev. Dr. Burns, whose diocese is situated between the Little Rock and Van Buren, United States, is preparing to take his departure for the diocese. The Bishop will be accompanied by 600 Irish farmers as emigrants, a large number of clergymen, and several sisters of mercy. These missionary expeditions are prepared and equipped by voluntary subscriptions only.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

We are happy to learn that the operation Lord Lyndhurst found it necessary to undergo for the recovery of his sight has proved most successful, and, should his bodily health permit, he will early in the next session be found at his post in the House of Lords hearing appeals.

There are now three seats in the House of Commons vacant by deaths, since the close of the parliamentary session. They are—University of Cambridge, the borough of Poole, and the county of Hereford.

The union workhouse of Ballina, in the county of Mayo, is at present under seizure, in execution, at the suit of Mr. Maloy, one of the contractors

A poor man, named Sutton, committed suicide last week, in the county of Westmeath, from his inability to meet the demands of the poor-rate collector, who had served him with process.

The Liverpool Gas Company have, as usual, ever since those great reductions of price which were to ruin them, announced a dividend of 5 per cent. for the last half-year, being the highest allowed them by their own act of Parliament.

The Venerable Dean of Dromore is at present in a dangerous state of health, with but faint hopes of his recovery, to the deep regret of all who know him.

Alderman Staunton, the proprietor of a Dublin paper called the *Weekly Register*, has received the appointment of collector-general of taxes, an office created by the new Dublin Municipal Act.

M. Lallande de Calan, the Governor of Pondicherry (French settlement in India), died on the 13th of June.

The great gun at Beejapore—a famous Mahratta city now deserted—is said to be about to be brought to Bombay, with the view of being transported to Europe. It is fourteen feet in length, and about five feet in circumference. It carries a ball of 3000lb.

A duel has been fought betwixt Lieutenants Litchford and Huxham, of the 48th Bengal N.I., at Bareh (East Indies), in which the latter was wounded in the groin; he is not expected to recover. His murderer (if he dies) was the provoker of the quarrel.

A stamp in place of a postage charge is to be imposed on all newspapers in India.

A newspaper in the German language, called the *Süd-Australische Zeitung*, has been established in Adelaide (South Australia), and appears to be conducted with great ability. It circulates chiefly among the German immigrants, whose numbers are increasing fast.

The states of Europe in which the claim of the poor to relief is recognised as a legal right, and where systems of succour are administered under authority, are Denmark, Norway, Sweden, Mecklenburgh, Prussia, Wurtemburgh, Bavaria, the Canton of Berne, and lastly Great Britain.

W. B. Walton, a poor miner, living near Aldstone, was last week left, by will, heir and executor to the property and estate of William Bell, Esq., High Sheriff, near Hexham, estimated to be worth about £100,000. The fortunate heir of this magnificent property is a decent, respectable man, with a large family.

In the matter of Bowles, Ogden, and Wyndham, of Shaftesbury and Salisbury, bankers, who where bankrupts in 1810, a final dividend of one-eighth part of a penny (!) in the pound has been declared.

The British Museum, closed at present for the purpose of cleansing, &c., will be re-opened to the public on Monday, the 9th. From that period to the 8th of May the Museum will close at 4 instead of 7 P.M.

By her Majesty's gracious command, on occasion of the birth of his Royal Highness Prince Arthur, the Provost of Eton has added an additional week to the election holidays.

Lord Stanley has consented to lay the corner stone of a literary institution in the manufacturing town of Bury, where the Derby family have large landed possessions.

The *Growler*, war-steamer, has arrived at Marseilles with the Prince and Princess of Capua, their family and suite, to wait there for the Neapolitan Ambassador, whom he will take back to Alexandria, instead touching at Malta. The *Growler* will go to Naples, and from thence to Egypt, through the Straits of Messina.

Sir George Grey, it is said, has offered Mr. Robert Stephenson the honour of knighthood, which, however, Mr. Stephenson has declined.

A charter of incorporation has been granted to South Shields.

The *Giornale di Roma* of the 24th ult. states that the bridge of Milvio, which had been partly destroyed by the Roman Republican Government during the siege, has been rebuilt.

The family of Charles Bonaparte, Prince of Canino, has returned to Rome.

It is an important fact, and one necessary to be known, particularly in the Long Vacation, when all the other courts are closed, that the act which extends to £50, and which was said not to commence till the 1st of October, was in force after the 14th of August, the date of the passing of the bill. Actions for debts exceeding £50 are now pending in the Southwark County Court.

The Great Western Railway Company's line from Oxford to Banbury was opened on Tuesday, giving a competing route with the London and North-Western out of London to these districts.

Several pits at Haydock Colliery, Lancashire, which took fire a few weeks ago, from the blasting of some coal with powder by one of the colliers, are still burning. Some of them have been covered up, and the fire smothered within them, and it is hoped that very soon others will be extinguished.

The cuisine at the banquet to be given at York in October, by the Mayors of England, to Prince Albert, the Lord Mayor of London, and other distinguished guests, is to be under the direction of M. Soyer.

At the London (city) Registration, amongst 170 objections to the list of freemen, there is one to the Lord Chancellor, who belongs to the Turners' Company.

The cricket match between Manchester and All England, eleven of the latter against fifteen of the former, has terminated in favour of England, by 94 runs. Their second innings alone scored 119 against 69 of Manchester.

The subscriptions to the "Working Men's Memorial to the late Sir Robert Peel" were intended to have been closed on Saturday last, but the receipt has been extended to the 17th instant.

We regret to learn the failure of a large cotton-spinning firm in Manchester, that of Messrs. William and David Morris and Co., of Salford and Chorlton. The liabilities are variously stated at from £80,000 to £50,000, but it is understood they will be found not to exceed £25,000. Mr. William Morris was an alderman in the corporation of Salford, and has sent in his resignation.

On Saturday evening last, several stacks, at Whitton, Suffolk, the property of Mr. S. Catt, were in flames. Notwithstanding every effort, two wheat stacks and a tare stack were consumed. An incendiary occasioned this conflagration. The property was insured in the Suffolk Fire-office.

On Tuesday, an extraordinary general meeting of the proprietors of the bank of British North America was held at the company's offices, 7, St. Helen's-place, Bishopsgate-street, for the purpose of electing a director in the room of Joseph Foster, Richard Robinson, Esq., and Thomas Holdsworth Brooking, being the only candidate nominated to fill the vacancy, was elected a director, without much opposition.

On Monday last, a spark from an engine running between Witham and Chelmsford alighted on a field of barley, belonging to Mr. Joseph Foster, of Blunts Hall, and, before the rapid progress of the fire could be arrested, the crop upon between four and five acres was destroyed.

On the morning of Monday last night, about five o'clock, the travellers on the road between Greenwich and Woolwich were astonished by seeing the highway actually covered with millions and millions of young frogs or toads, similar to the flight of locusts which invade and devastate whole countries at a sweep.

On Thursday week, the ceremony of laying the foundation stone of the new church of St. Mary, at Carlton, near Newark, was performed by John Ward, Esq., of Carlton House, in the presence of a numerous assemblage of neighbours and visitors. The beautiful and retired village of Carlton is situated on the banks of the Trent, about six miles below Newark.

The erection of the new church at Romford is approaching completion. Its consecration is fixed for the 19th inst

The public subscription towards the restoration of the parish church of Arundel goes on very satisfactorily, and about £2000 of the £2500 required to perfect the enterprise has been subscribed. The Hon. Mrs. Howard and the Hon. Colonel Upton have proved themselves munificent benefactors.

The works for the rebuilding of that portion of All Saint's Church, Maidstone, which was recently destroyed by fire are much advanced, and it is hoped that the edifice may be opened in about six weeks for public worship

A fight between the seamen of the frigate *Fox*, lying off Spithead, and the soldiers of the 50th Regiment, recently, has created in Portsmouth and its neighbourhood the excitement of apprehension. The ill-feeling that exists between the man-of-war's men and the 50th is of very long standing, and loses no opportunity of showing itself. The *Foxes* are now at Spithead, and will sail shortly. The soldiers are confined to barracks

The first experiments for lighting by gas are within the recollection of many living persons; yet such progress has it made, that no less than 360,000 tons of coals are now used annually for the making of gas in London alone.

The works upon the Swansea Floating Dock are being prosecuted with great vigour, and it will be opened at an early period.

The foundation-stone of a new Infirmary has been laid at Torquay, by the Prince of Oldenburg.

A most interesting discovery has been made in Russia, between Dorpat and Narva, of a combustible as carboniferous and calefactory as coal. It is of a yellowish brown colour, with white spots and is the subject of much speculation, being said to be of a much earlier geological period than any known coal-field.

The engine-drivers lately in the service of the Eastern Counties Railway Company met at Stratford on Saturday; but their proceedings were chiefly confined to reading letters containing remittances from various parts of the country, and allegations of incompetency against the present drivers. Several of the men are stated to have left to seek employment on other lines.

VISIT OF THE ROYAL PARTY TO THE CRICKET-GROUND, AT CASTLE HOWARD.

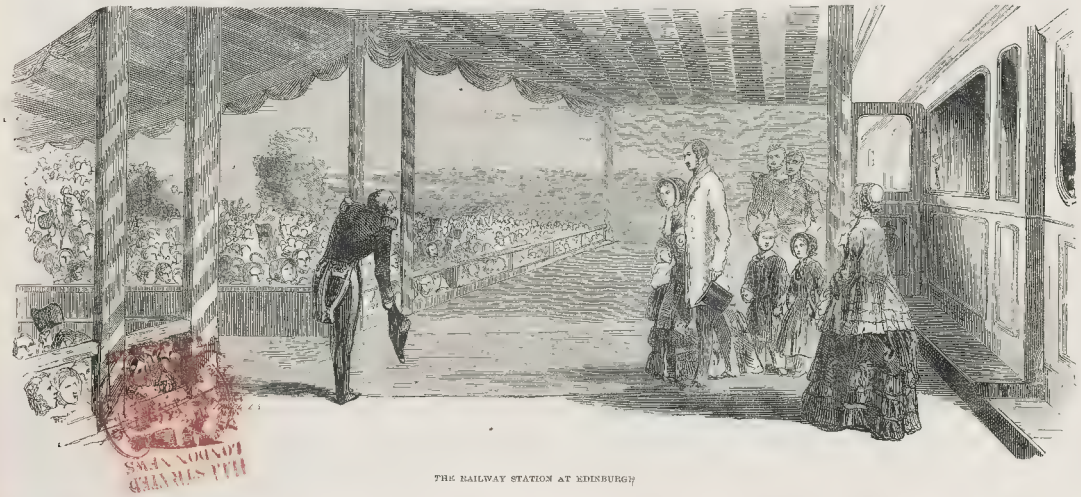
THE ROYAL VISIT TO SCOTLAND.

In our Journal of last week we recorded the Royal progress to the close of the visit to Castle Howard; we now engrave the visit of the Royal party to the Cricket-ground, where they witnessed for some time the play of the Castle Howard Club. The Earl of Carlisle is particularly fond of this game; and the spot devoted to it in the park, being surrounded by an amphitheatre of noble trees, and ornamented by flags and tents, has a very pleasing appearance.

RECEPTION OF HER MAJESTY AT BERWICK-UPON-TWEED.

DEPARTURE FROM CASTLE HOWARD.

On Thursday morning, at ten o'clock, Her Majesty took leave of Castle Howard, and proceeded on her way northward. Her departure was of the same simple, unostentatious character as her reception. The approach to the Castle was lined on either side by the school children on the estate, the boys being arranged on one side and the girls on the other. At an early hour in the morning



THE RAILWAY STATION AT EDINBURGH.

ENTRANCE OF THE QUEEN INTO THE GREAT CENTRAL RAILWAY STATION, NEWCASTLE-UPON-TYNE

they assembled at the Castle to breakfast, and afterwards turned out to pay an affecting tribute of loyalty to their Queen. Their shrill hurrahs met with a very gracious acknowledgment from her Majesty. York was soon reached. The line from York to Newcastle was noticed in our last.

[illegible] To the High Level Bridge [illegible] certainly in grandeur, but not unworthy of [illegible] Central Station, which her Majesty [illegible]

RECEPTION OF HER MAJESTY AT THE GREAT CENTRAL RAILWAY STATION, NEWCASTLE-UPON-TYNE.

available space within this splendid shedding was occupied by the inhabitants of Newcastle, who assembled in great force to give their Sovereign a true north-country welcome. The entrance to the station was handsomely decorated with evergreens; and above each archway were erected three emblematical bas-reliefs, in imitation of stone—the centre containing the Royal arms, that on the right being a full-length representation of her Majesty, surrounded by figures symbolical of the different portions of the empire, while on the left was a likeness of his Royal Highness Prince Albert, and the arts and sciences impersonated around him. Outside the station and along the line of railway an immense concourse of spectators assembled, and the windows and roofs of the houses with a highly respectable assemblage. As the hour approached for the arrival of the train, the excitement rose to fever heat. At last it came in sight, and slowly glided in amidst deafening cheers, and the waving of a perfect sea of handkerchiefs and hats. Her Majesty and the Prince repeatedly and most graciously acknowledged the enthusiastic demonstrations of attachment which greeted them.

Notwithstanding the immense concourse of people present, the utmost order and regularity prevailed in the proceedings. A wide space on the platform was kept clear for the ceremony of her Majesty's reception by a guard of honour, consisting of a detachment of the 33rd Regiment, not exceeding the usual regimental band, under the command of Captain Mundy. There was also a company of the Queen's Bays present, and a party of Horse Artillery at the fine old castle on the south side of the station, to fire the Royal salute on her Majesty's arrival, and again on her departure. The grounds outside the station were admirably kept by the pensioners. The Royal party alighted and partook of refreshment. During their stay, they were welcomed to Newcastle by the chief magistrates of that town and their respective wives and families. An address was presented by Mr. Joseph Crawhall, Mayor of Newcastle, and a similar address by Mr. Hawks, the Mayor of Gateshead, and to both her Majesty made a very gracious reply. Earl Grey, the Hon. Mr. Grey, Mr. Hunt, M.P., Mr. F. Howard, M.P., Mr. Mathew Bell, M.P., Sir Walter Trevelyan, and a number of the neighbouring gentry, were on the platform during her Majesty's stay, and joined in the hearty manifestations of attachment which greeted the Royal party were welcomed. The *coup d'œil* which so spacious and elegant a structure presented, filled with an animated yet orderly throng, decorated with banners and evergreens, was very striking

The Royal train left Newcastle at a quarter past one o'clock, and the enthusiasm which characterised her Majesty's reception in that loyal town rose to a still greater height on her departure. Every point from which a glimpse, however passing, could be obtained of the illustrious visitors, was thronged with occupants. The north end of the High Level Bridge was covered with a dense mass of human beings. The interstices in the spire of St. Nicholas Church had their occupants The windows, doors, and roofs of the houses that ever lighted a garret, had women's and children's heads thrust through them, with an energy which finely illustrated what sacrifices of comfort the people were prepared to make to their loyal feelings. Nearly every house-top was occupied. On open spaces and at street corners placed on a lower level than the line, a sea of upturned eager faces presented themselves. Along the railway itself the swarms of human beings, all cheering, shouting, waving handkerchiefs and hats, gesticulating vehemently, and otherwise fervently showing their excitement, gave one a very extraordinary idea of the populousness of Newcastle and its neighbourhood.

From Newcastle to Berwick the most considerable towns passed are Morpeth and Alnwick. The little valleys formed by the windings of the Wansbeck and the Coquet were passed; Warkworth Castle, the ancient hold of the Percys, was left behind; and the train, as if fearing to enter the wild regions of the Cheviot Hills, which now began to rise upon the view, moved along close to the coast. Glimpses of the sea were occasionally caught, with ships sailing in the distance, and nearer shore fishing-boats and coasting vessels. The remnants of Alnmouth, through Sir George Grey, presented a loyal address; and from the summit of a hill adjoining the station where this ceremony took place, a very effective Royal salute was fired.

Passing Alnwick, with its castle, celebrated in border warfare, on the left, and catching through the trees a hurried glimpse of Chillingham Castle, in the park round which the Earl of Tankerville still feeds the famous herd of wild cattle, the train now sighted Bamborough Castle and the Holy Island, with its abbey ruins and wave-washed stronghold. Thence the Royal train, passing along the sea-coast, and within hearing of the roaring waves at a distant cheviot rising on the right, at length glided round the entrance into Berwick, and passing slowly over the new viaduct, drew up on the other side of it on that neutral ground which is neither England nor Scotland.

The magnificent viaduct was engraved in the ILLUSTRATED LONDON NEWS for August 24.

ARRIVAL AT BERWICK.

The arrangements for the reception of her Majesty, which were under the direction and superintendence of Mr. Bruce, resident engineer, on behalf of the railway directors, were excellent. A large platform was erected by the Directors for her Majesty's landing. It was canopied at the top with strong calico, underneath which was a roofing of red and white cotton, in alternate bars, forming a passage, 150 feet long, erected and ornamented in the same manner, extended to a handsome marquee situated at the south west corner of the ground, on the very verge of the site of the ancient Castle of Berwick. The flooring of the marquée was carpeted with crimson cloth; and an elegant chair, covered with crimson silk damask, was prepared for her Majesty.

A triumphal arch was erected at the south end of the bridge: its exreme height was 55 feet from the level of the rails, and 22 feet wide; it was surmounted by an entablature, with a richly decorated frieze. On the spandrils were medallions of the Queen and Prince Albert in bas-relief, and the entablature was supported by elegant ornaments on rich "Victoria tartan" drapery. Beneath the arch was placed the emblem of the Union; on the abutments were the arms of York, Newcastle, Berwick, and Edinburgh, on shields, surrounded by Grecian ornaments; from the arch were suspended large banners; the whole was surmounted by the Royal arms of England powerfully painted in imitation of statuary. Conspicuous amongst the mottoes was "The last act of the Union." Encircling the column were "God save the Queen and Prince Albert," and "God save the Royal Family."

When the train stopped, the Queen, the Prince Consort, and the Royal children all alighted, and proceeded, amidst the cheers of the assembled spectators assembled within the ruins of the old Berwick Castle, to look up Tweedside, and to feast their eyes upon that border land, every glen of which is rife with legendary lays.

The Chairman of the York, Newcastle, and Berwick Railway Company, Mr. Leeman, had the honour of conducting her Majesty and the Prince, accompanied by the Royal children, to the platform, the ladies in attendance upon the Queen, Earl and Countess Grey, Viscountess Canning, Sir George and Lady Grey, Major-General Wemyss, the Mayor and Mrs. Mayoress, the Sheriff and Lady. Col. Wade, and Mrs. Wellesley, and several of the Directors, followed.

The Queen being seated, the presentations took place. The Mayor, the Sheriff, and Colonel Wellesley, with their ladies, and the son of Sir George Grey, were successively presented, and kissed the Royal hand These necessary forms

"Majesty expressed to the Mayor her appreciation of the loyal welcome which she christened formally the "Royal border Bridge." After remaining a few minutes in conversation, the Royal party returned to their carriages. In passing the platform which accommodated the municipal authorities and the Corporate officers, the presentation of the addresses to the Queen and Prince Albert took place, and they were graciously received. After a little further delay, the Royal party were conducted to the carriage prepared for them, and renewed cheers. There were estimated to be from 12,000 to 15,000 persons present. From this point the train was under the charge of the North British directors, who had arrived at Berwick by the previous train.

The event was celebrated at Berwick by a public dinner, ball, supper, and display of fireworks

From Berwick, Earl Grey, who had arrived from the south as Secretary of State in attendance on the Queen, resigned his functions to his relative. Sir George Grey, who immediately accompanied her Majesty.

ARRIVAL AT EDINBURGH AND HOLYROOD.

The Royal train now hastened on to Edinburgh, precipitating among the Lammermoor hills, and along the fine iron-bound coast terminating in the bluff point called St. Abb's Head. At Dunbar a loyal address was presented, through Sir George Grey. Here the fishermen, in their characteristic dresses, surmounted by the "red Kilmarnock cowl," turned out in great force, and gave the Royal party a very warm and hearty reception. From Dunbar and the heights above it the course of the railway brought the Royal travellers into the finely cultivated lands of East Lothian. In East Lothian, the broad estuary of the Forth, the Bass rock and other islands studding its bosom, and with the high grounds of the kingdom of Fife appearing beyond, are almost constantly in sight of the railway. It passes, also, close at hand, the field of Preston Pans. At length the Pentland Hills and Arthur's Seat, with its varied and picturesque outlines of cliff and sloping height, were brought close at hand by the locomotive. The evidences of a large town became more frequent, crowds of people assembled, half uttered cheers were heard, the steam was shut off, and gliding round the base of Arthur's Seat, the train was brought to its private station close to the Queen's-park, and erected expressly for her Majesty's accommodation on her way to Holyrood. This approach to the ancient palace is about a mile and a-half in length from the Queen's Park Station. Each of the points where the outlines of that extremely picturesque hill are most striking, and united with all of natural charm that engages the eye in the surrounding mass of the "Modern Athens," were thronged upwards to the Castle-rock and the monumental decorations of the Calton-hill, and, more at hand, the venerable pile of Holyrood, with its ruined and mouldering chapel. Along this approach, a mile or more before them, the Royal party, it being now six o'clock, prepared to proceed. Except at the immediate vicinity, any preparations of the usual kind had been made to receive them. There were no triumphal arches and very few flags; no salutes fired. The landing platform at the station was covered with crimson cloth, and the entrance to the vestibule leading to the spacious flight of steps by which her Majesty was conducted to the Royal carriage in waiting on the Abbeyhill-road, close by Parsons-green. The vestibule was roofed by an elegant timber canopy, finished in front to resemble festoons of drapery. The Royal Crown surmounted the centre, with the letters "V. A." on each side. The neighbouring slope was fenced by light framework, and decorated with heather; and at the entrance to the flight of steps, on each side, two elegant pedestals were placed, bearing urns filled by splendid exotics, in full flower. The interior of the landing hall or pavilion had a superb and tasteful appearance. The roof was finished in the style of an Arabian tent, by graceful festoons of white and pink drapery. The steps, which were divided into two series, were laid with crimson cloth from end to end; but the carpet placed for her Majesty to walk from the railway train to the Royal carriage, was formed of the "Stuart hunting tartan." The pavement was open at the sides, and was separated from the neighbouring grass slopes by a neat rustic railing. The old gateway closing upon the road was entirely removed, and its place filled by a splendid crimson curtain, hung with much taste, and forming an appropriate termination to the beautiful vista of the interior. The gateway whence the Queen emerged to the Royal carriage was spanned by a graceful arch, decorated with bay-leaves, and dahlias interspersed.

Within this elegant gallery and above platform, the Royal Scottish Archers were assembled, and with the Duke of Buccleuch at their head, received her Majesty on landing. The Royal party were immediately conveyed to their carriages, and in them, at a slow rate, proceeded to Holyrood. A description of the welcome which they received there from the countless thousands who crowded the base of Arthur's Seat, and swarmed on every hillock and projecting point with which its picturesque sides abound, would convey a most imperfect idea of the actual reality. It was a scene of high enthusiasm, but its impression upon the mind of those who witnessed it cannot thoroughly be reproduced in language.

The line of the procession was kept by the 93d Regiment; the utmost order and regularity prevailed; and her Majesty and the Prince both looked immensely gratified.

The same evening, and before night had closed in at Holyrood, the Queen proceeded to the suite of apartments occupied by the beautiful and unfortunate Mary Stuart. The apartments now occupied by the Royal party are in the more modern part of the Palace, erected on the site of that which John Knox's fiery zeal burned down, and which was restored by Charles II. Here Charles X. of France resided from 1830 to 1833. The levees of George IV. were held in the hall of state on the eastern side of the Palace His Grace the Duke of Hamilton is hereditary keeper of Holyrood; but for a long period of time little has been done to keep this Royal residence in good and tenantable repair. Everybody in Scotland had ceased to regard it as anything but a venerable and interesting ruin, worthy of a certain amount of care from time to time. And in memory of the days when the Court lived at the foot of the Canongate. No one ever expected to see the Sovereign residing in that quadrangular and turreted old building again. Hence its occupation by her Majesty has greatly delighted the people of Edinburgh, and of Scotland generally.

The following had the honour of dining with her Majesty: The Duke and Duchess of Buccleuch, the Duke of Roxburghe General Riddell (Commander of the Forces), the Lord Provost, Mr. Sheriff Gordon, the Hon. C. A. Murray, and Sir James Clark

LAYING OF THE FIRST STONE OF THE NATIONAL GALLERY

On Friday morning, the Queen and the Prince Consort were early astir, and ascended to the very summit of Arthur's Seat. They also visited, at a later period of the day Donaldson's Hospital, but these were in the nature of private visits, and the only proceeding of a formal and public character which took place was the ceremony of laying the foundation stone of the proposed National Gallery on the Mound. This ceremony was performed by his Royal Highness Prince Albert, at one o'clock, and drew together an immense concourse of spectators. The Prince was loudly cheered as he passed in procession along Prince's-street, attended by a splendid cavalcade. On alighting at the Institution, a Royal salute was fired from the Castle, with grand effect. On all sides, wherever the eye turned, countless multitudes of human beings were assembled. The whole space southward, sloping upwards to the many-storied houses of the old town was filled with a perfect sea of heads. On the flat roof of the Bank of Scotland, and on the graceful galleries of the Scott monument, and far up on the battlements of the Castle, in fact, everywhere whence a commanding view could be obtained, groups of spectators were clustered. The pensioners, the high constables of the city, and the Royal Scottish Archers (her Majesty's body guard), kept the ground admirably. The enclosed space had several stands erected within it; one at the northern extremity of the new building connected with the Institution by a canopied passage, and set apart for the board of trustees and their friends. Through this, after the members of the board, and those of the Board for Fisheries, had been presented to him, his Royal Highness passed to the foundation-stone, recognising and shaking hands on his way with several of the distinguished personages assembled there. Among these were—the Duchess of Buccleuch, the Duchess Dowager of Roxburghe, the Duchess of Roxburghe and the Ladies Innes Ker, the Earl of Haddington, the Earl and Countess of Rosebery and Lady Louisa Primrose, the Countess of Morton and Lady Hood Macnaghten, Lord and Lady Belhaven, Lord and Lady Berriedale, Mrs. and Miss Hope, Sir George Clerk, M.P., and Lady Clerk, Sir William Gibson Craig, M.P., Mr. Cowan, M.P., the Ladies Charteris, and Sir Patrick and Lady Harriet Grant Suttie, Colonel Ferguson, of Raith, M.P., Lady Anne Baird, Mr. Balfour, of Balbirnie, and Mr. Baillie, of Dochfour. On the west side of the area was another stand, capable of containing 1200 persons, for the accommodation of the magistrates and town-council, and the professors of the University in their robes. There was a platform south of this for the students attending the School of Design. Such being the preparations for the ceremony, the Prince Consort entered the area, and, amidst loud cheers, took up his position close to the foundation-stone. The Rev. Dr. Lee, Principal of the University, then stood forward, and offered up a fervent prayer for the success of the proposed edifice. The manner of the venerable Principal, and the substance of his prayer, were exceedingly impressive.

The Lord Justice-General then advanced, and taking up the trowel, which he afterwards presented to the Prince, addressed his Royal Highness, explaining the object of the new building.

The usual masonic rites having been duly complied with by his Royal Highness, who was then addressed by Sir William Gibson Craig, Sir George Clerk, Sir John Watson Gordon, and Sir William Gibson Craig,

His Royal Highness Prince Albert, addressing the Lord Justice-General and those more immediately around him, said:—

"Gentlemen,—Now the ceremony is concluded, you must allow me to express to you how much satisfaction it has given me to have had it in my power to comply with your invitation, and to lay the foundation-stone of this important national institution, and to have become connected with the interest which her Majesty the Queen has come among you, and has given you a further proof of her attachment to this country by again taking up her abode, if for a short time only, in the ancient palace of her forefathers. I am happy to say she has been received with such unequivocal demonstrations of loyalty and affection. The building of which we have just begun the foundation is a temple to be erected to the fine arts the fine arts, which have so important an influence upon the development of the mind and feeling of a people, and which are so generally taken as the type of the degree and character of that development, that it is on the fragments of the works of art come down to us from bygone nations that we are wont to form the estimate of those arts of their civilization, manners, customs, and religion. Let us hope that the impulse given to the culture of the fine arts in this country, and the daily increasing attention bestowed upon it by the people at large, will not only tend to refine and elevate the national mind, but will also lead to the production of works which, if left behind us as the memorials of our age, will give to after generations an adequate idea of our advanced state of civilization. It must be an additional source of gratification to you to find that part of the funds rendered available for the support of this undertaking should be the ancient grant which, at the union of the two kingdoms, was secured towards the encouragement of the fisheries and manufactures of Scotland, as it affords a most pleasing proof that the arts connected with the useful life they arrived at that stage of manhood and prosperity that—no longer requiring the aid of a fostering Government—they can maintain themselves independently, and upon their own activity and talent can now look for their encouragement and support to their younger and weaker sisters, the fine arts. Gentlemen, the history of this grant exhibits to us the picture of a most healthy national progress: for from the encouragement given to the useful arts of life they gaining strength; then education and science supervening and directing further exertions; and, lastly, the arts, which only adorn life, becoming longed for by a prosperous and educated people, naturally claim their own share of the fostering care of Providence, and, following closely upon the steps of the former, by God's blessing, that peace and prosperity be preserved to the nation, which will ensure to it a long continuance of moral and intellectual enjoyment."

This concluded the ceremony, and the Royal Highness almost immediately after returned to the Palace, followed by the acclamations of the multitude.

The proceedings were viewed with evident interest by the Royal children from the Argyle Battery. The Princesses were attired in deep mourning dresses, and the Princes were dressed in Highland costume, with glengarry bonnets. The visit of the Royal family to the Castle having become known, a large crowd speedily collected, and loudly cheered the youthful visitors, which they gracefully acknowledged.

In the afternoon, her Majesty and Prince Albert, the Prince of Wales, the Princess Royal, the Prince Alfred, and Prince Alfred, drove through the town of Edinburgh and round Arthur's Seat, visiting Donaldson's Hospital.

The Royal family, attended by Sir James Clark and Miss Hildyard, also viewed the Castle of Edinburgh

The Duke and Duchess of Buccleuch, the Duke and Duchess of Roxburghe, the Earl and Countess of Morton, the Earl and Countess of Rosebery, the Lord Justice-General, the Lord Advocate, the Earl and Countess of Haddington, the Rev. Principal Lee, Sir William Gibson Craig, Lord and Lady Belhaven, the Lord Advocate, the Marquis of Abercorn, and Colonel the Hon. Charles Grey, had the honour of dining with her Majesty in the evening.

The Queen had afterwards a full-dress ball, at which the visitors comprised Lord Aberdour, Sir George and Lady Clerk, and Mr. Bailey of Dochfour.

DEPARTURE FOR BALMORAL.

At half-past eight o'clock on Saturday morning, the guns of the Castle, firing a Royal salute, announced that her Majesty and suite had resumed their journey northwards. Notwithstanding the early hour, a large crowd had assembled in Parliament-square, and numbers of the inhabitants of Edinburgh attended to pay a parting tribute of loyalty to their Sovereign. The train, passing Stirling and Perth on its way, reached Dundee at half-past eleven o'clock. There the Royal party were conveyed in four carriages to Balmoral, where they arrived at half-past five o'clock.

THE ROUTE TO BALMORAL.

Bridge of Cally.—The Royal party arrived here about half-past one o'clock. The being the first stage from Dundee the horses were changed. None of the party alighted. There was a large concourse of people here, who cheered most enthusiastically on the arrival and departure of the Royal family. Mr. Douglas, the innkeeper, had a very neat arch erected, with the Gaelic motto, "Ceud mile fealtachd" (welcome), upon it.

Spittal of Glenshee.—The *carriage* arrived here at three o'clock. Mr Grant, the innkeeper, had received orders the previous day to have lunch ready for the Royal Family and suite as usual. Her Majesty was met here by Mr. Farquharson of Invercauld, and two of his sons, with a number of his retainers, in the usual dress. There was a large number assembled at the inn to welcome the Royal Family, and who seemed highly gratified at the urbanity and condescension of the Queen and Prince. A number of flags floated at the inn and at various parts of the glen; and the day being beautiful, the Highland glens shone to advantage. The Royal party remained at the Spittal upwards of an hour; and, the horses having been changed, proceeded on their route to the Castleton of Braemar. On their arrival at the Cairn Mount, the whole of the Royal family alighted and walked up the hill, which is about a mile long, and is the highest point to which any public road rises in Scotland. The view from the road at this point is very fine. We observed, whilst walking up the hill, the Prince of Wales turned back, and, after cordially shaking hands with Mr. Farquharson's two sons, exceeding, by handsome youths (twins of about thirteen), walked the rest of the way with them.

NATIONAL SYNOD of IRELAND.

THE ILLUSTRATED LONDON NEWS

For SATURDAY next, SEPTEMBER 14, 1850,

WILL CONTAIN

A SERIES OF ENGRAVINGS

OF

THE SYNOD AT THURLES,

Its GRAND PROCESSIONS and PUBLIC CEREMONIALS; with a PORTRAIT of the ARCHBISHOP of TUAM.

TO CORRESPONDENTS.

M J H, Brixton—Thames water is used by Messrs Barclay, Perkins, and Co, for brewing: the water from the Artesian well upon their premises in Southwark, is, on account of its low temperature, principally employed for cooling the wort in hot weather

W H, Dublin—The metallic design is strikingly like the vignette to Vol 13 of our Journal

C W H, Kirkaldy—The large View of Paris is to be had by order of any bookseller

SAFETY-VALVE is thanked for his letter. The address in question is Printing-house-square, Blackfriars. The engine is not a novelty

AN HARROVIAN—The Queen's Visit to Harrow is illustrated in our Journal for Nov 25, 1848

D R, Liverpool—The Guide published by Curry and Co, Dublin

F K Y—See Falck-Lenaha's "The German Language in One Volume" Whittaker and Co

J M—The name, Bell-a-house, is the reply we can give

J B B is thanked for the letter on Polar Temperature, though we cannot print it

G B, Leicester—See Holland's "British Angler," published by H Bohn

A CORRESPONDENT—The Epigram beginning,

"I do not like thee, Doctor Fell," &c,

is taken from Martial's epigram—

Non amo te, Sabidi, nec possum dicere quare:
Hoc tantum possum dicere, non amo te.

ANATEUR—The patronage of the Heralds' College—the only office in which such appointments are to be found, is vested in the Earl Marshal of England, at present the Duke of Norfolk as Earl Marshal It is very difficult to obtain a situation in the College

DELTA—Address Mr Wilkes, of Darley on the Nid, Yorkshire, and "Or three pales gu. on a arg., three ancles of the second *Crest:* A tiger sejant gu., tufted and maned or thereon a garb, charged with a mullet of the second" Sandford, arm. "Or, on a chief embattled az. three suns ppr. *Crest:* Out of a ducal crown or, a demi-lion rampant gu. holding a sun ppr."

R M C A, SCARBOROUGH FROM THE FIRST—There are no arms on record to the name of MARKAM Those of Cook are, "Or eight shields in orle—

SCHILLER—The arms of Black are "Or on a chief az. three leopard's faces arg. *Crest:* A hawk's lure as *ramed* or."

G B, Ilkeston—Prince Albert bears for arms "Quarterly 1st and 4th Royal arms differenced by a label of three points, on the centre point a cross gu.; 2nd and 3rd Barry of ten az. and arg., a cross ere'te'd vert. *Supporters:* Two lions rampt. crowned ppr., each charged on the shoulder with a label as in the arms"

A U—The right to bear arms does not, of itself, confer the title of Esquire

J M H—Any of the worsted embroidery shops would have the armorial design made

A B—We know of no work containing the pedigree of the London family. Bloomfield's "History of Norfolk" contains a genealogical account of families connected with the

RIBER, Camberwell—We can trace no arms of Browne exactly according with the crest sketched for us

I C, essay, perhaps, by a reference to Glover's "Ordinaries of Arms," be enabled to identify the arms and crest of which he sends a very good impression

HISTORICUS—It was at the battle of Almansa, fought in 1707, that the *Dutch* were commanded by an Englishman—the Marshal, Duke of Berwick), and the *English* by a *Frenchman* Ruvigny, Earl of Galway. The victory remained with the French

F W. The military band play in Kensington Gardens on Tuesday and Friday afternoons

E J G—of Jarbroad. On seal of the Lincoln, appended to No 261 of our Journal. A note to the Parish Clerk of Stowe would, doubtless, obtain the precise information

W W, Sheerness—See "Bradshaw's Railway Time Table

A SUBSCRIBER, Deal—A company has lately been formed in aid of the Freehold Land Movement."

L M—Apply for the "Colonial Guides" to Mr Saunders, publisher, Charing-cross

E D B—Apply to the Canterbury Association, Warwick-street, Charing-cross

O P Z, Newcastle—Child, in his work on Trade, quoted by Dr Johnson, uses wharfs as the plural of wharf

H B A—A work on Diabetes, written by Dr Bright, was published some years ago, price four- Contributions on the same subject have been published from time to time, in the [illegible] capital, for which apply to Mr Bright, 32, Soho-square, between Carlisle, Frent-street.

J L D—We do not interfere in disputes at cards

T F H, Bermondsey—The Income Tax Act of Sir Robert Peel was passed on the 14th May, and is now in force. By this act, for the better assessing and collecting the poor and high- in respect of small tenements, it is provided that vestries are to determine the rateable value of tenements and be rated to the poor-rate, and when this rated tenements are to be rated on a reduced scale. The goods of the occupiers are to be liable for the rates as well as the goods of the owners. The act extends only to England and Wales

A CITIZEN OF THE WORLD—You are an [illegible]

[illegible] The arms of Standish are—"As three standing dishes, two and one, arg."

J B, Reader—Dedicated to the memory of "Bessie" a Furioso" by William Barnes Rhodes, Leeds, born 1797.

A SUBSCRIBER—Address a letter to 3, Chancery-lane, Holborn, [illegible]

[illegible], Birmingham—Apply to Mr Bale, Hobo maker, Bod, Fleet-street, respecting the B A hood belonging to the University of London.

J L—The question must be answered in the negative. Much will depend upon what the quality is scarred. The image is a mere trifle

VISITATE READER, Todmorden—The impressions received are too imperfect

AN OLD SUSSEX SUBAH "Ecclesiastic"—The impression is from a Nuremberg [illegible] of no value.

A SUBSCRIBER, Paxton—We are not aware DEVONSHIRE CIDER—Next week

J B, Reader—Declined [illegible] Todmorden—We have not heard

AAnBBas—Either form may be used PUBLIC—Yours is a case for a magistrate

W B, Manchester—The ages are 84 and 49 M W J, Rugely—Declined

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, SEPTEMBER 7, 1850.

THE news by the last Overland Mail very painfully justifies the severity of Sir Charles Napier with regard to the discipline of some of our regiments in India. The circumstances which led to the melancholy suicide of Colonel King are in the highest degree deplorable; but they are by no means the only events which prove that the service is not in the state in which it ought to be. The behaviour of the 14th Regiment of Dragoons at the battle of Chillianwallah has been sufficiently commented on both in England and in India. We have no wish to stir the subject again, and only allude to it as an explanation of more recent events, which would otherwise be unintelligible. A private of that regiment was ordered to the triangles to be flogged; but from oversight, or more positive breach of duty, was permitted to have access to arrack, or other intoxicating liquor, before being brought out to receive his punishment. He was actually flogged when in a furious state of intoxication, and when taken back to the guard-room was supplied with an additional quantity of arrack and some beer. The circumstances having been represented to the commanding officer, Colonel King, the man was brought on parade under escort, and, excited by the drink he had imbibed, grossly insulted the Colonel, by calling out in a loud voice, that he was a coward, and that the men would never have fled from the enemy at Chillianwallah if they had been better

led. The man was tried by court-martial for this military crime, and sentenced to seven years' transportation. Sir Charles Napier recommended the court to re-consider the sentence, upon the ground that, however disgraceful and insubordinate the conduct of the culprit may have been, it was certainly as much produced by neglect of duty in others, in supplying him with drink, and suffering him to be punished when intoxicated, as by the conduct of the drunken man himself. The Court respectfully declined compliance; upon which, Sir Charles—having power to pardon the prisoner, but not to commute the sentence—chose the former alternative. The circumstances preyed upon the mind of the unhappy Colonel, the more especially as the insulting words of the pardoned soldier were but a brutal version of the opinion expressed by the Commander-in-Chief, when reviewing the regiment at Meean Meer, that "he had no doubt if the men were better led they would behave as well as any regimen. in her Majesty's service." The result was, the suicide of Colonel King. Another circumstance, showing a want of discipline, occurred at Banda, about the same time. Lieutenant Litchford, of the 48th Bengal Native Infantry, in consequence of some dispute at the mess-table, applied, with an oath, the epithet of "a sneaking coward" to Adjutant Huxham, of the same regiment. The result was a challenge, which coming to the knowledge of the commanding officer, he placed the disputants under arrest. Both parties broke the arrest, and fought a duel, in which Mr. Huxham was dangerously wounded. At Simlah, another officer, of the name of Rose, has been placed under arrest, apparently for swearing the peace against a civilian who had threatened him with a horsewhipping, instead of demanding "satisfaction" in a more military manner. We do not profess to understand the etiquette or the rules of the military profession in this matter, or why the officer who will not fight a duel is punished equally with him who resolves upon fighting one. All these events, trivial as the last may appear, are symptomatic of something wrong, and will lead to much regret that Sir Charles Napier does not remain in India to complete the task he has begun of tightening the relaxed cords of discipline throughout the whole service. The retirement of Sir Charles himself does not show that perfect accord and harmony between the high officers of State in India which could be wished, as it appears to have been mainly caused by a difference with the Governor-General. All that is known of this untoward business is derived from a letter from Sir William Napier, which has been published in England, and will find its way to India in due time. The gallant officer says:—

It has been said that a difference has arisen between him and Lord Dalhousie because of some barrack building—because of his disbanding the 66th Regiment without reference to the Governor-General—because he desired war (it is not said with whom), and that Lord Dalhousie desired peace—because the Commander-in-Chief attempted to usurp the power of Government, and, when mildly corrected, replied with intemperate language, and resigned.

To these statements Sir William Napier replies:—

It is true Sir Charles Napier has tendered his resignation on account of a difference between him and Lord Dalhousie; but it is not true that this difference arose about barrack building, or from any desire to make war, or because he disbanded the 66th Regiment, or that his language was intemperate and unbecoming, or that he resigned peevishly. The real cause of that step was a difference between him and the Governor-General on a vital point of public interest, accompanied by circumstances which rendered it imperative upon Sir Charles Napier to resign the high office conferred on him by his Sovereign; and he is prepared to justify his conduct to that gracious Sovereign and to the public, proudly confident that he has served both well, and would have served them better, if he had been permitted to combine such service with that self-respect which no man can relinquish without dishonour.

Upon the whole, the news from India is not of a character to give satisfaction in England; and the explanation of Sir Charles Napier will be looked forward to both with curiosity and anxiety.

We have already given an abstract of the report of the Select Committee appointed to inquire into the amount of official salaries. The voluminous evidence upon which the committee based their recommendations has since been published, and is rendered remarkable as containing the opinions of Sir Robert Peel on the important question of the remuneration to be given to the highest officers of the State. Some members of the committee were evidently bent upon retrenchment, even in these high quarters—retrenchment for the sake of retrenchment, without reference to the duty to be performed or those collateral considerations which are, in fact, more essential than those of mere money; but the statements and opinions of Sir Robert Peel must have convinced them of the necessity of caution. "I think," said he, "in answer to a question from Mr. Cobden, "that those who wish to see the arena of public service open to all, without distinction of rank or fortune, ought not to contend for an undue limitation of official emoluments. Those emoluments ought to be sufficient to induce a man of great abilities and of very moderate means to enter into the public service; and it would be unjust to such a man to place him in immediate contact with men of great wealth, and leave him with insufficient means to maintain the proper dignity of the office which he held. I feel that very strongly. If you were to adopt that principle, you would confine the tenure of great offices to the aristocracy and to men of fortune. That would be a great public misfortune." Sir Robert Peel, disinterestedly, for he himself possessed a fortune which rendered the official salary attached to the office of Prime Minister a matter of indifference; and his opinion, so emphatically expressed, would, if there had been any doubt upon the subject, have been sufficient to remove it from the most predetermined. The recapitulation afterwards made by the lamented statesman, of the position and qualifications of his predecessors in office, afforded a striking corroboration of his argument. "If," said he, "you review the great offices of state for the last fifty years —the office of Prime Minister, the Secretaries of State, and the Chancellor of the Exchequer, you will not find that aristocratic connexions have much influenced these appointments. In the cases of Mr. Pitt, of Mr. Addington, of Mr. Perceval, and of Mr. Canning, it would surely be impossible to contend that aristocratic influence had determined their appointment. In other cases wherein persons of high family connexion have held the chief offices, it is because they have been the fittest persons for them. Lord Grey and Lord John Russell did not owe their appointments as Prime Minister to their aristocratic connexions, but to their superior personal qualifications, and to the confidence of their party. I do not think they owed it in the slightest degree to the accident of birth." Upon the whole, the evidence given before this committee establishes very clearly the fact, that, considering the position which our Ministers are compelled to hold, and the policy of opening the highest careers in the State to the ambition of men possessed of abilities but not of fortune, the nation is by no means extravagantly generous in remunerating them. If there be a doubt on any part of the subject, it relates to the higher diplomatic offices, and our chief Ambassadors, such as those in France, Spain, Berlin, Vienna, and St. Petersburgh. But even in this department, all but the very highest officers are under-paid. When we look into the inferior but still most useful and highly responsible offices in the gift of the Government, we find that niggardliness is our principle, not generosity. Many a merchant in the City of London pays his clerks with far more liberality than the Government of Great Britain pays the men who are entrusted with the more arduous clerkships of the State; and in one great and important department—that of the Post-office—by far the larger portion of its hardest-working and most useful *employés* are paid with a parsimony which a private gentleman or trader would be ashamed to display. The publication of the whole of the valuable evidence collected by the committee cannot fail to be useful in clearing up misconceptions, and in directing the energies of financial reformers to more vulnerable points. There is much room for a reform of the national expenditure, and a pressing necessity for a general re-adjustment of the public burdens. The great statesman whose opinions we have above quoted was the man to whom the country looked for accomplishing this task; and it is not the least of the reasons for its regret at his untimely loss, that it now looks in vain for a statesman with sufficient grasp of mind and clearness of purpose to undertake it as a whole. It can but hope, however, that the necessity will in due time bring forth the statesman, and that the financial affairs of the empire will find a minister who is able to regulate them.

POSTSCRIPT.

ROMAN CATHOLIC SYNOD IN IRELAND.—THE QUEEN'S COLLEGES. A letter from Thurles announces that the Roman Catholic Bishops have at length come to a decision upon the Queen's Colleges. After a protracted discussion, "a vote of condemnation was passed—but only by a majority of one." No decided step can be taken without the sanction of the Pope, and the whole proceedings of the Synod must be submitted to his Holiness.

THE DEATH OF BARONESS ROTHSCHILD.—We announce with much regret the death of Baroness Rothschild, yesterday afternoon, at Gunnersbury Park, her seat near Ealing. The Baroness was seized with determination of blood to the head on Sunday, the 25th ult., and the symptoms, then alarming, continued to increase, when at half-past twelve on Thursday she expired, surrounded by nearly the whole of her family. The deceased baroness, who was in her 68th year, was widow of the celebrated capitalist, and third daughter of Mr. L. B. Cohen.

THE LIVERPOOL CAB STRIKE.—Owing to a temporary arrangement with the Town Council, the hackney coach proprietors commenced running on Thursday.

Yesterday (Friday) morning, about half-past two o'clock, a fire broke out on the premises of Mr. J. A. Jordon, wheelwright, 20, Old-street-road. The fire was discovered by the police on duty by sparks issuing from the roof, which was burnt off. The engines from Whitecross-street were quickly on the spot, but the fire was not extinguished before it had communicated to the premises of Messrs. Smith and Owen, timber merchants. Considerable damage was done to the stock

LATEST FOREIGN NEWS.

FRANCE.

Our advices of yesterday (Friday) state that Louis Napoleon gave a grand dinner to the authorities of Evreux on Tuesday, but he found himself so unwell that he was obliged to leave the table. His indisposition continuing, he was prevented from attending the ball at the Prefecture in the evening. He, however, had recovered by Wednesday morning, when he pursued his journey, on his route to Caen, where he was expected to arrive that evening.

The Minister of War had received an official note from the envoy of the Emperor of Austria, announcing that the Restricted Germanic Diet had been constituted at Frankfort on the 2nd instant, under the Presidency of Austria; and that Bavaria, Wurtemburg, Hanover, Saxony, Electoral Hesse, Hesse Darmstadt, Denmark for Holstein, Duchies of Luxemburg, Nassau, Brunswick, and Lippe-Delmold had given their adhesion to the new confederation. Prussia had repudiated all connexion with that body. Austria and the other members of the Diet, it is said, are determined to make their acts respected, even should it be by force of arms.

Rumours of a change of ministry were in circulation in order to give the present Government a more decidedly Bonapartist character.

GERMAN STATES.

The Assembly of States of Electoral Hesse was dissolved on the 27th ult. By the decree of dissolution it is ordered that a new Assembly shall be convoked within six months.

SCHLESWIG-HOLSTEIN.

The National Assembly is summoned to meet on Monday next

The town was greatly alarmed on the 1st, by the approach of the Russian fleet, which came within cannon-shot. At ten o'clock the fleet all the ships of war were seen arranged in order of battle, as if preparing to make an attack on the fort of Fredrichsort, which protects the entrance of the port of Kiel. These dispositions, however, have since become less menacing.

No change has taken place in the state of affairs, 30,000 Holsteiners are still in face of 35,000 Danes. Both armies have strong positions, which they are daily strengthening by fortifications

COURT AND HAUT TON.

THE COURT AT BALMORAL.

BALMORAL, Sept. 2.

Her Majesty and his Royal Highness Prince Albert took their usual early walk this morning. His Royal Highness afterwards went out shooting. The Queen drove out in the afternoon, attended by the Marchioness of Douro. The younger members of the Royal family took walking exercise during the day

Her Royal Highness the Duchess of Kent and Her Highness the Prince of Leiningen, Lady Augusta Bruce, Baroness de Speth, Lord James Murray, Sir George Couper, and Dr. Roberston had the honour of dining with her Majesty.

BALMORAL, Sept. 3.

The Prince Consort went out shooting this morning, accompanied by his Serene Highness the Prince of Leiningen and Sir George Grey, and attended by Colonel the Hon. Alexander Gordon. The Queen drove out in the afternoon in an open carriage, with the Princess Royal, the Princess Alice, and Prince Alfred. The Prince of Wales rode out this afternoon, attended by Mr. Birch. The dinner party this evening included the Duchess of Kent, the Prince of Leiningen, Lady Augusta Bruce, the Baroness de Speth, and Sir George Couper.

CHURCH, UNIVERSITIES, &c.

PREFERMENTS AND APPOINTMENTS.—The Rev. W. Otter to the Prebendal stall of Somerly, in Chichester Cathedral. *Rectories:* The Rev N. Roffe to Morningthorpe, Norfolk. Rev. J. W. Chaloner to Newton Kyme, Yorkshire. Rev. J. Ley to Waldron, Sussex. *Vicarages:* Rev. E. Gibson to Ashby Magna. Rev. R. Allnutt to South Dunnerham, Wilts. Rev. C. L. Royds to Aldenham, Herts.

VACANCIES.—Barningham Town, Norfolk, diocese of Norwich; value, £138; patron, J. T. Mott, Esq.; Rev. F. N. Roffe, promotet. Craxton, Cambridgeshire, diocese of Ely: value, £185, with residence, patron, S. Newton, Esq.; Rev. T. Kidd, deceased.

TESTIMONIALS.—The following clergymen have lately received testimonials:—The Rev. J. L. Walton a very massive silver salver, and a purse of 50 guineas, from the inhabitants of Selby. The Rev. J. A. Jerome, D.D., from the Court of Directors of the East India Company, as Classical Professor and Dean at the East India Civil College, Haileybury, a valuable piece of plate. The Rev. H. J. Stevenson, of Grimley-with-Hallow, Worcestershire, a testimonial of esteem from the inhabitants of that parish.

THE UNIVERSITY CONVOCATION.—T. Halford Vaughan, Esq., Fellow of Oriel College, Oxford, and professor of Modern History, has been nominated one of her Majesty's Royal Commissioners to inquire into the state of that University

ECCLESIASTICAL COMMISSION.—The act of the late session relating to the ecclesiastical commissioners, under which the First and Second Church Commissioners, Lord Chichester and the Hon. George Shaw Lefevre, have been appointed, contains 29 sections. The salary of the First Church Commissioner is not to exceed £1500 a year, and that of the commissioner to be appointed by the Archbishop of Canterbury, £1000. The First Church Commissioner and the commissioner appointed by the Archbishop are to be joint treasurers. The estates held in trust for the commissioners are to vest in the First Estates Commissioner The church estates commissioners are to be "The Estates Committee," which committee is to manage all property of the commissioners. Two church estates commissioners are to be present at all meetings of the ecclesiastical commissioners. The episcopal fund of the commissioners is to be transferred to the common fund. Fixed incomes may be secured to Archbishops and Bishops appointed after the 1st January, 1848. There are provisions in the act respecting the endowments of the Deans of Salisbury and Wells; the income to each is to be £1500 a year. Deans appointed after the 10th of April last are not to hold any benefice not situated within a city or town. Benefices annexed to the sees of Gloucester and Bristol, Oxford, and Peterborough are to be severed from the sees. The proceedings of the commissioners are to be laid before Parliament.

The Bishop of Gloucester has admonished the Rev. M. R. Whish for having interrupted divine service in St. Peter's Church, Bishopsworthy, by calling the Rev. H. Bruncker, the perpetual curate, to come down from the pulpit. His Lordship has also condemned Mr. Whish in the costs. It appears that Mr. Wish, who is vicar of Bedminster, deemed that he had authority in the church of Bishopsworthy, though it has been taken out of his parish and constituted a district church.

NEW MODE OF ADVERTISING.—The novelty in the genius of the advertisers has adopted a rather novel and amusing mo[illegible] of bringing their wares before public notice. Yesterday (Friday) morning, a day covered over with advertising placards, perambulated the Strand and Fleet-street, attracting particular notice, and exciting much amusement. The quadruped appeared to be fully conscious of the importance of his office, and marched along the street with great dignity and gravity.

COUNTRY NEWS.

REPRESENTATION OF MONTGOMERYSHIRE.—We understand that Capt. Herbert Wynn, of the 7th Fusileers, will offer himself as a candidate for the county of Montgomery on Protectionist principles, in consequence of the death of his uncle, the late Right Hon. Charles Williams Wynn.

ROCHDALE SAVINGS-BANK.—The Right Hon. Fox Maule, Secretary at War, has given orders that all those pensioners who had deposits in the Rochdale Savings-Bank shall have their dividends made up to twenty shillings in the pound.

SEAFORD.—The preliminary mining operations at Seaford Cliff are nearly completed, and it is expected that the explosion will take place in about a fortnight. The two principal mines, of 12,000 lb. each, are reached by galleries driven at an inclination upwards from the face of the cliff, which is pierced at about 90 feet above the level of the beach. Three smaller charges, of 1000 lb. each, are placed above, at a depth of 40 feet from the surface, the whole to be fired simultaneously by means of voltaic battery. The whole operation is performed by a detachment of the Sappers and Miners, under the direction of Captain Frome, Royal Engineers. We intend to illustrate these very interesting operations.

THE HOP DUTY.—A meeting was held on Saturday last at Canterbury, at which it was proposed, seconded, and carried unanimously, that the representatives of East Kent be requested to oppose a substitution of an acreage duty in lieu of the present method of charging the duty.

FREE PUBLIC LIBRARY IN LIVERPOOL.—On Wednesday, the Town Council of Liverpool, by a majority of 36 to 11, resolved upon the establishment of a free public library. The proprietors of the Royal Institution in Colquitt-street, in that town, have agreed to hand over for the purpose, without any pecuniary consideration whatever, their library, museum, and gallery of arts, with the sole stipulation that these shall be kept in their usual state of efficiency.

LONSORATION OF A NEW ROMAN CATHOLIC CATHEDRAL.—On Wednesday morning the solemn dedication of the cathedral, which has been erected by the Roman Catholic body in the city of York, took place. Several dignitaries of that Church, and a large number of its influential members, assembled with a view to take part in the proceedings. Although the tickets of admission were sold at 8s. each, they were eagerly purchased, and more would have been disposed of had the sacred edifice been capable of affording sufficient accommodation for all who applied. Shortly after ten o'clock, the Right Rev. Dr. John Briggs, Bishop of Trachis and Vicar-Apostolic of the district of York; the Right Rev. Dr. James Gillis, Bishop of Limyra and Vicar-Apostolic of the Eastern district; the Right Rev. Dr. William Ullathorne, Bishop of Hetalona and Vicar Apostolic of the central district; and the Right Rev. Dr. Morris, Bishop of Troy; entered the cathedral, followed by a large number of priests in their sacerdotal robes, deacons, acolytes, and other officers of the cathedral. High mass was performed by the Rev. Robert Tate, D.D.; after which the ceremony of dedication or consecration took place. The sermon was preached by Dr. Gillis, Bishop of Limyra, who spoke in highly eulogistic terms of the efforts made by the Roman Catholic clergy to make more generally known the doctrines of their Church, as evidenced by the many remarkable conversions which had of late taken place The new cathedral, which is a handsome structure, is dedicated to St. George. After the ceremony a collation was provided at the Festival Concert-room—the Hon. Charles Langdale presiding. At a spacious church, dedicated to St. Marie, has been erected by the same body at Sheffield, and is to be consecrated by Bishop Briggs on Wednesday next, the 11th inst.

HERRINGS BY RAILWAY.—Not the least important part of the goods traffic of the Caledonian Railway at this period of the year is the enormous number of herrings which are now daily transmitted to the south. One day last week, a train was despatched from the station in Lothian-road with no less than 84 tons of this fish alone. The train, which was no ordinary sized one, would not, according to the most moderate computations, have contained less than half a million of this particular genus of the finny tribe.

It has been suggested to replace the extensive powder magazine, at Lisbon, near the Liverpool, by the erection of six towers along the shore, and store the powder in the upper stories, which, in the event of explosion, would cause no injury below.

COMMENCEMENT OF COACH AND CAR PROPRIETORS AT LIVERPOOL.—All the hackney-coach proprietors closed their establishments on Monday in consequence of a dispute with the Town Council relative to fares, which they allege are fixed by the Council at too low a rate to be remunerative. Great inconvenience has consequently felt. A full-dress concert was intended to be given on Tuesday at the Philharmonic Hall, but, in consequence of the "strike," the committee were obliged to issue a notice that ladies were not expected to appear in full dress.

THE CHARTIST COLONY AT SNIG'S END.—Mr. Feargus O'Connor has commenced legal proceedings for the purpose of recovering rents from the 102 allottees at Snig's End. On Wednesday last, a number proceeded from Chepstow to serve fifty-two writs. The colonists, who had got intelligence of the coming storm, held a meeting on the preceding evening, and concerted their arrangements. On the appearance of the bailiffs, they intimated that they would "manure the land with their blood before it should be taken from them." The bailiffs, we understand, did not make a levy, being convinced by the statements of the colonists that it would be illegal and impracticable: illegal, because the colonists are not tenants; and impracticable because a most determined resistance would have been offered to them. The bailiffs, therefore, retired, and the colonists are now awaiting with some anxiety the next step of Mr. O'Connor towards his "children"

SALE OF CHARTIST ALLOTMENTS IN OXFORDSHIRE.—On Saturday last, the allotments at Minster Lovell (one of Mr. Feargus O'Connor's land schemes) were brought to the hammer, at Oxford, by order of the mortgagees, who have a charge of £4000 upon the whole of the estate, which, as described in the catalogue, comprises 297 acres of superior land (the superiority of the land may be inferred from the fact, that seven acres and a half, with a good shed upon it, fetched £190 only), and 83 excellent cottages of three, four, and five rooms each. The auction was attended by a large number of occupiers and others, who were attracted to the room, no doubt expecting to see some fun, in consequence of the following having been circulated previous to the sale, more than for the purpose of purchasing:—"Minster Lovell Estate. Notice is hereby given, that any persons purchasing any portion of the above-named property, which is advertised for sale at the Star Hotel, Oxford, on the 31st August, 1850, will thereby involve themselves in a suit in Chancery." One of the occupants, in addressing the auctioneer, said it was the intention of all of them to keep possession, or throw it into Chancery. This threat of not giving up peaceable possession by the present tenants (who considered the allotments theirs) seemed to have the effect of restraining persons from becoming purchasers, for out of the 85 lots only six were really sold; several were bought in, and for the greater majority of the lots there were no bidders. One lot, consisting of a cottage and four acres of land, with a rent-charge of £1 8s., and a land-tax of 4s., realised £250. Another, with two acres and proportionate outgoings, was knocked down for £125. The cottages cost building £100 each. A solicitor attended on the part of Mr. F. O'Connor.

ACCIDENT OF THE SOUTH WESTERN RAILWAY.—An accident of a singular character occurred on the London and South Western Railway on Tuesday night. The 7 p.m. down train left the Waterloo-road station at the usual hour for Guildford, and proceeded onwards without meeting with any interruption until it had arrived about midway between Esher and Weybridge. Shortly after passing Weybridge, where the first-named station, the engine-driver espied on the line some moving objects. He therefore shut off the steam, and signalled to the guards to apply the breaks; but before they had sufficient time to do so, the train came in contact with the obstruction in front, which was found to be pieces. The driver proceeded on his journey, leaving word, as he went by the different stations, for inquiries to be made as to the extent of mischief done. On the train arriving, it was clearly ascertained that three of the cattle had been literally cut to pieces, and their mangled remains were found scattered in sundry directions on the line. The same were picked up by the driver of the goods train, and conveyed to the nearest station. The cattle had broken down an entrance upon the line, owing to some defect in the palings which surrounded the meadow where they were at pasture.

FIRE IN HUNTINGDONSHIRE.—On Monday night, the village of Hemingford, Grey, was thrown into the greatest confusion by the sudden outbreak of a fire, which involved in flames and reduced to ashes a large farmhouse, with all its stock of hay and straw, and twenty-one cottages, the inhabitants of which are now sheltered in the church, which was instantly open for their reception. It originated in some children playing with lucifer matches near some hay and straw, which ignited, and so quickly spread its flames, that although the Ramsgate and the St. Ives engines were with instantly on the spot and in full play, they could not check their fury before the above-named destruction took place. A collection is being made on behalf of the poor houseless villagers of Harboys.

EXTENSIVE FORGERIES.—Information has been communicated to the authorities in Glasgow of an extensive forgery committed on the firm of Abraham Crocker and Co., tea and sugar merchants, London, by Mr. Cailhun, commission merchant, Paisley-road, Glasgow. The accused party has disappeared. He was last seen in London on the 17th of August, and, as far as can be conjectured, it is not unlikely that he has gone across the Atlantic, by the steamer which left Liverpool about that time. It is supposed that he left with bills to more than £1000, forgeries of bills of exchange in the name of the firm on two of their customers to the amount of £875 having already been discovered, besides other sums in which he was behind with the firm.

DESTRUCTIVE FIRE.—A fire broke out between nine and ten o'clock on Sunday evening last, on the premises of Mr. W. Ledger, Ford Farm, Wrotham, Kent, the property of Sir W. Geary, Bart., which proved greatly destructive. The fire was first seen by Mrs. Ledger, from the dwelling-house, in the out-stack, at the corner of the straw-yard, which, with the granary, forms a complete square close to the high-road. Almost in an instant the flames communicated with the other stacks and buildings, and it ran comparatively round the premises. An express was immediately sent for the engines. The loss of property is lamentably great, including fourteen stacks, of which all but two, we believe, were corn; a granary, two stables, and a lodge, and about seventy quarters of beans, corn. Notice is known as to the cause of the fire, but it is supposed to be feared that it may have been caused by some of the many arrangements lately about the country, who usually have pipes in their mouths, and are utterly reckless as to the effect of the sparks or ashes which might be emitted from their pipes. The property was insured in the Kent Fire Office. The loss is estimated at nearly £1500.

THE ROYAL PROCESSION TO HOLYROOD.

HER MAJESTY'S VISIT TO SCOTLAND.

(Continued from page 202.)

Castleton of Braemar.—The party arrived here about six o'clock, and stopped at Mr. Clark's to change horses. A large body of Mr. Farquharson's men, in the Highland costume, were likewise here, under charge of Master Farquharson. Lady Agnes Duff was also present to welcome them, and with whom her Majesty cordially shook hands. Flags were waving from the castle and a number of other places in the neighbourhood, and added considerably to the picturesque appearance of this beautiful place. So soon as the horses were changed they started for Balmoral, where they arrived about seven o'clock, being about ten hours from the time they left Edinburgh, the whole distance being 150 miles, whereof 100 miles was per railway, and the rest by post-horses. It required sixteen pair of post-horses for each stage. Mr. Ross, of the Defiance Hotel, Cupar-Angus, supplied the horses thence to Spittal and Glenshee; Mr. Grant, thence to Castleton; and Mr. Clark, thence to Balmoral. We are happy to say, not the slightest accident occurred the whole way, although in some places the road is very steep, and the two luggage carriages weighed about six tons each, which is rather heavy for hilly roads.

Her Majesty, as usual, has been very fortunate for weather, as it has been very fine since her arrival at Balmoral.

ON HER MAJESTY'S VISIT TO HOLYROOD PALACE.

Bid vanish'd years their phantom flight reverse,
And moaning winds their demon tales rehearse,
Bring from oblivious shades, in grim array,
The bleeding victim in the fiercest fray;
Again arouse the echoes from their lair,
The midnight shriek of murder and despair;
That Peace may hear, and Truth secure behold
What nobler deeds triumphant times unfold;
That War's despoiling hand profanes no more
The palace hall, the tombs and temples hoar;
That o'er these towers, with ruin traced between,
May float the lull of love and rest serene;
That soft 's the sleep that clouds the crown-capp'd throne
Of her whose dreams can shape few splendours past herown.

W. T. Young.

HIS ROYAL HIGHNESS PRINCE ALBERT LAYING THE FOUNDATION-STONE OF THE NATIONAL GALLERY, AT EDINBURGH.

TEMPORARY STATION AT DOVER.—STEAMERS PREPARING TO START.

SUBMARINE ELECTRIC TELEGRAPH BETWEEN DOVER AND CALAIS.

In our Journal of last week we described the accomplishment of the first telegraphic despatch, clearly printed in Roman type, from Dover, and received at the temporary station at Cape Grinez, near Calais, on the evening of Wednesday week, at nine o'clock. We now give a very interesting series of Engravings illustrative of this great scientific triumph, the details of which will be found at page 186 of our last Number. Mr. John W. Brett was present at the Dover Station, watching the progressive success of the operations until the final signal of its entire completion was made in a clearly-printed message at Cape Grinez.

"THE GOLIAH" STEAMER "PAYING OUT" THE ELECTRIC WIRE.

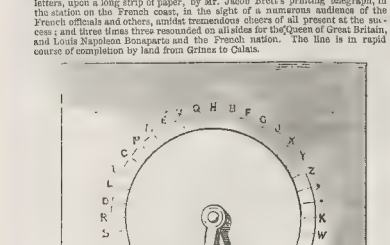
THE ILLUSTRATIONS.

The first Engraving shews the Temporary Station at Dover, with the two steamers preparing to start. In the second Engraving is seen the *Goliah*, accompanied by H. M. packet *Widgeon* "paying out" the electric wire. The third scene is a view of Cape Grinez, and the taking of the wire up the rock. Next is the Communicator, or Dial Plate; and, lastly, is the Apparatus by

THE ELECTRIC WIRE AT CAPE GRINEZ.

which the Message is printed and delivered from the communicator on the opposite coast; with a cross section of the wire, insulated with gutta percha, both of the actual size.

The only conjectured difficulty on the route was at a point in mid-channel, called the Ridge, between which and another inequality called the Varne, both well known and dreaded by navigators, there is a deep submarine valley, surrounded by shifting sands, the one being seventeen miles and the other twelve miles in length. Here ships encounter danger, lose their anchors, and drift; and trolling nets of fishermen are frequently lost. The submarine telegraph line was, however, successfully submerged. On nearing Cape Grinez the soundings become very rugged, and the coast dangerous; but by steady and cautious manipulation, the *Goliah* delivered her cargo of wire to be safely connected with the end of the tubing which had been laid at Cape Grinez, and run up the cliff to a temporary station at its summit. This was completed the same evening, and every accommodation was afforded by the officials at the lighthouse, in the use of lanterns and lamps, so that at nine o'clock the same evening (the 28th of August) a message was printed, in legible Roman letters, upon a long strip of paper, by Mr. Jacob Brett's printing telegraph, in the station on the French coast, in the sight of a numerous audience of the French officials and others, amidst tremendous cheers of all present at the success; and three times three resounded on all sides for the Queen of Great Britain, and Louis Napoleon Bonaparte and the French nation. The line is in rapid course of completion by land from Grinez to Calais.

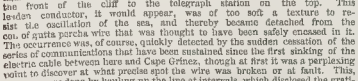


COMMUNICATOR, OR DIAL PLATE.

The originating of telegraphic communication between London and Paris, and the European continent, is due to the enterprise of an Anglo-French Company, *en commandité*, first established in Paris by Mr. Jacob Brett, who obtained a decree from the French Government under Louis Napoleon Bonaparte, which, together with authorizations from the various departments of the English Government, confers on Mr. Brett, for a period of ten years, the exclusive right of telegraphic communication between Dover and Calais. When the gigantic nature of the undertaking is considered, it cannot create much surprise that, at the time Messrs. Brett first proposed by letter to Sir Robert Peel to carry out this and similar projects, the minds of most of our leading men of the possibility of its accomplishment. The great problem is, however, now solved.

PRINTING APPARATUS.

In a letter from Dover, dated Wednesday the 4th inst., it is stated that the wire so successfully submerged last week has been cut asunder among the rocks at Cape Grinez, where the physical configuration of the French coast has been found unfavourable for it as a place of holdfast or footing. All communication between coast and coast has consequently been suspended for the present. The precise point where the breakage took place is 200 yards out at sea, and just where the twenty miles of electric line that had been stranded out from Grinez joins on to a leaden tube, designed to protect it from the surge beating against the beach, and which serves the purpose of conveying it up the front of the cliff to the telegraph station on the top. This leaden conductor, it would appear, was of too soft a texture to resist the oscillation of the sea, and thereby became detached from the con. of gutta percha wire that was thought to have been safely encased in it. The occurrence was, of course, quickly detected by the sudden cessation of the series of communications that have been sustained since the first sinking of the electric cable between here and Cape Grinez, though at first it was a perplexing point to discover at what precise spot the wire was broken or at fault. This, however, was done by hauling up the line at intervals, which disclosed the gratifying fact that since its first sinking it had remain *in situ* at the bottom of the sea, in consequence of the leaden weights or clamps that were strung to



INSULATED ELECTRIC WIRE.

it at every 16th of a mile. The operation was accomplished by Messrs. Brett, Reid, Wardell, and Jones, who attended to the management of the telegraph without intermission, and who are now, with their staff, removing the wire to a point nearer Calais, where, from soundings, it has been ascertained that there are no rocks, and where the contour of the coast is favourable. It is thought that for the present leaden tube a tube of iron must be substituted, the present apparatus being considered too fragile to be permanently answerable. The experiment, as far as it has gone, proves the possibility of the gutta percha wire resisting the action of the salt water, of the fact of its being a perfect waterproof insulator, and that the weights on the wire are sufficient to prevent its being drifted away by the currents, or of sinking in the sands. It is not intended to make use of the wire for commercial and newspaper purposes until the connexion of it with the telegraphs of the South-Eastern and that now completed on the other side from Canals to Paris is effected. Should the one wire answer, it is intended eventually to run out 20 or 30 more, so as to have a constant reserve in the event of accident in readiness. The huge retardation of electric line will represent 400 miles of telegraph submerged in the sea; and, as each will be a considerable distance apart, a total water width of six or eight miles in extent.

On Thursday afternoon, his Grace the Duke [illegible] visited the Telegraph. The wires are carried in temporarily at the terminus of the South-Eastern Railway. In the absence of Mr. Reid, the telegraph engineer, who superintended laying the wires across the Channel, his foreman, shown, the Duke the workings of the instruments, and explained to him how the wires were insulated, and the plan adopted for laying them across. At the Duke's request, he also furnished him with a specimen of the insulated wire. His Grace seemed highly pleased, and would, no doubt, appreciate this wonderful agency that could communicate in a second of time between this country and the Continent. On Tuesday, the Duke again visited the Telegraph, with a party of ladies; but there was no person in attendance who could explain the operations.

IRELAND.

CONCILIATION HALL.—Mr. John O'Connell on Monday announced the approach of another death amongst the nine lives of Conciliation Hall. He said that they could not continue in possession of the hall unless the people, that is, the Repealers, supplied the means of paying £60 a year rent and £30 a year taxes; and it would be necessary for some person to become personally liable for the payment of these sums. He could not himself, in justice to his family, take this responsibility upon him; and, unless in the course of four weeks the country should give him some assurance of support as to secure the payment of the rent and taxes, they could not continue in the building where they then held their meeting. He also made the further melancholy announcement that the rent for the week was only £8 9s.

AUSTRIAN SUBSCRIPTION FOR THE IRISH POOR.—The *Evening Post* contains the following:—"The Austrian Government having placed £3200 at the disposal of the Synod for the relief of the distressed poor of Ireland, the allocation of that sum was made on Monday, and £1200 for the relief of the province of Munster, £1200 for a similar purpose in Connaught, and £800, we believe, equally between Leinster and Ulster."

The Royal College of Surgeons of Ireland entertained Sir B. Brodie at dinner, in Dublin, on Friday; and in the course of the proceedings Sir Philip Crampton presented the distinguished guest with a complete set of the instruments used in the treatment of aneurism by compression.

ELECTRIC TELEGRAPH COMMUNICATION IN IRELAND.—The *Freeman's Journal* points out a result of the recent successful extension of the submarine telegraph, which appears almost inevitable, namely, the necessity which must soon be created of carrying on the intelligence communication with America through Ireland. If, as the *Freeman* says, the miles of sea strait between Dover and the French coast has been spanned by the telegraphic wire, there is no reason whatever why the sixty miles strait between Holyhead and Kingston should not be similarly spanned; and as the wires could, of course, be conveyed to the point of Ireland which would offer most advantage for the purpose, it necessarily follows that the line of intelligence could thus be shortened to some considerable extent, and consequently that a transatlantic steamer touching at such a telegraphic terminus in Ireland, would have an advantage over one passing uninterruptedly between America and Liverpool. There are, it is suggested by the *Freeman*, two ways of meeting this necessity: either to start the mail steamers direct from some Irish western port, say Galway; or, if they must still sail from Liverpool, at least that they should make Ireland a touching point both going and returning, and in such case, Cork, or some south-western Irish port, would, most probably, be the point selected.

INDIAN CORN.—Notwithstanding that no sales of Indian corn of importance take place at present, owing to the prolific and superior crop of potatoes, which are consumed by the labouring classes for the first time since the famine, cargoes of maize continue to arrive in Queenstown, Cork. On Tuesday week six vessels with maize, and three with wheat, arrived.

THE CROPS.—The harvest crops continue to be spoken of in all quarters as in the most favourable condition, and the reaping process is actively carried on in most of the midland and several other counties.

EJECTMENTS.—The *Tuam Herald* supplies the following:—"A few days since, the inhabitants of the village of Carras, county Mayo, numbering, we understand, upwards of thirty families, were dispossessed, and their houses razed to the ground. The property is that of the Nolans, minors; and we believe the proceedings were instituted by order of the Court of Chancery

EXCURSIONS.—The excursion trains have filled Killarney with visitors from England and other distant places. There never was a season when these beautiful lakes and surrounding scenery were so thronged with admiring strangers. On Thursday week the accommodation of the one hotel alone was compelled to fit up thirty-six beds for temporary accommodation besides his ordinary supply; and on all the other hotels there was a similar pressure.

EMIGRATION.—The *Waterford Mail* gives the following account of the progress of emigration from that port:—"Yesterday we witnessed the self-expatriation of some hundreds of the most respectable-looking class of farmers and their families, by the Liverpool steamers, that we have seen during the present year. We perceive, by former returns, that, as the harvest advances, the tide of emigration will continue to increase; and the prediction was fully realised yesterday and yesterday se'nnight."

THE SEA-SERPENT AGAIN!—The *Cork Constitution* publishes the following circumstantial letter:—"Courtmacsherry, Aug. 29. Sir,—The following particulars, the accuracy of which need not be questioned, will, I doubt not, interest many of your readers.—The different fishing establishments on the shore of this extensive bay, extending from the Old Head of Kinsale to the Seven Heads, have been within the last few days abundantly supplied with fish of every description, and the greatest activity prevails to profit by the bounty which has been thus sent to us literally in shoals. It has been remarked, too, that some description of fish, hauk, for instance, have been captured further within the limits of the inner harbour than was ever known before. In fact, as I heard it observed, the fish were literally leaping ashore. These novel appearances, however, it was my lot to see fully accounted for yesterday. At about one o'clock A.M., when sailing in my yacht, with a slight breeze off shore, about two miles to the south of the beacon erected on the Barrel Rocks, one of the party of four gentlemen on board (Mr. B., of Bandon) drew attention towards the structure mentioned, with the interrogatory of 'Do you see anything queer about the Barrels?' In an instant the attention of all on board was riveted on an object which at first struck me as like the upheaved back, and of a large mast, but which, as it was made out plainer, proved to be the head of some huge fish or monster. On bearing down towards the object, we could distinctly see the naked eye what I have best describe as an enormous serpent without mane, or fur, or any like appendage. The portion of the body above water, and which appeared to be rubbing or scratching itself against the beacon, was fully 30 feet long, and in diameter I should say about a fathom. With the aid of a glass it was observed that the eyes were of immense size, about nine inches across the ball, and the upper part of the back appeared covered with a furrowed shell-like substance. We were now within rifle-shot of the animal, although such an one hardly exhibited pardonable nervousness at the suggestion, it was resolved to fire a ball at the under portion of the body whenever the creature's unwieldy evolutions would expose its vulnerable part. The instant the piece was discharged the monster rose, as if impelled by a painful impulse, to a height which may appear incredible -say at least thirty fathoms—and, culminating with the most rapid motion, dived or dashed itself under water with a splash that almost stopped our breaths with amazement. In a few moments all disturbance of the water subsided, and the strange visitor evidently pursued its course to seaward. On coming up to the beacon, we were gratified to find adhering to the supports numerous connected scaly masses, such as one would think would be rubbed from a creature 'coating,' or changing its old skin for a new one. These interesting objects can be seen at the Horse Rock Coast Guard station, and will repay a visit. These particulars I have narrated in the most accurate manner I am able, and of others, in other boats, who had not so good an opportunity of seeing the entire appearance of the animal as those in my boat had, should send you a more readable account of it, I pledge myself can be implicitly adhere to the real facts.—I am, Sir, your very obedient servant, ROGER W. TRAVERS."

SIXTY thousand people want every week the art of the ILLUSTRATED LONDON NEWS, and would feel a blank in their lives if they were deprived of it. And it is curious to observe how generally the art of wood engraving has improved since its commencement. The art of that paper is decidedly *useful* art, mixed up with the events and sympathies of the day; and to this cause—a very natural and wholesome one—may attribute the surpassing success, whilst other illustrated, and even cheaper, periodicals, which treated of subjects more foreign and unnecessary to every-day life, have become extinct. The ILLUSTRATED LONDON NEWS is itself a great fact, full of hope for the progress of design.—*Journal of Design.*

INDIAN OUTRAGES IN TEXAS.—The Indians in the west of the state seemed resolved to cut out work for the Texans, as will be shown by the following gleanings from Texian journals. The *Western Star* of the 16th July, says:—Last evening several persons arrived in town, bringing an Indian bead-dress, shield, and quiver of arrows. They stated that, yesterday morning, a party of Indians attacked the rancho of Mr. Flores, on the San Antonio river, about twenty miles below this place, and drove off most of his horses. He immediately collected a company of men and started in pursuit. On overtaking the Indians they forsook their stolen horses and fled, but were so closely pursued that they left behind their dress, shield, and quiver, and in many of their dresses, among which were those brought in. Mr. Flores regained all his horses. We have not been able to learn the number of the Indians, but understand [illegible] of the whole country between the San Antonio river and the Cibolo is infested with them. We have learned with regret, says the *Houston Telegraph* of the 1st instant, from a gentleman who has just arrived from Bexar, that the whole country between San Antonio and Cibolo is infested with hostile Indians. They are dispersed in numerous small bands, in all directions, from the head of the Cibolo to the vicinity of Goliad, and fears are entertained that several parties have been murdered. These Indians are by many of their depredations as if the soldiers were so many cattle. They have stolen horses and murdered citizens, almost in sight of the head-quarters of the commanding general. This new incursion, just after an official notice had been promulgated that an efficient force would be sent out to chastise them, has tended to destroy all confidence in the general government. All the papers in Western Texas are filled with accounts of Indian atrocities. And while these go unpunished, the people treat in masses and threaten to take matters into their own hands. Only one new-y acquired suiter to try her hand at whipping the Indians first, and after she is through with that, then she will be better prepared for her second expedition to Santa Fé. The *Victoria Advocate* learns that several murders and robberies have recently been committed by the Indians west of [illegible] and in the neighborhood of San Patricio and Black Point. There are said to be a large number of Indians now in the section of country above described. A rumour has reached Victoria that Mr Charles Harrison and a Mexican named Castro have been recently murdered by the Indians, a short distance west of the Nueces. The *Banner Star* gives a rumour prevalent in the Red River counties, that there are about 6000 Indians gathered on that frontier, with hostile intentions.

METROPOLITAN NEWS.

PUBLIC MEETINGS.

ENTOMOLOGICAL SOCIETY.—The usual monthly meeting of this society was held last Monday evening; J. F. Stephens, Esq., vice-president, in the chair. Mr. Shepherd exhibited specimens of *Rhodaræa sanguinalis*, taken at New Brighton, by Mr. Gregson; also, some black varieties of *Eschata Ennomella*. Mr. S. Stephens exhibited a pair of the very rare *Papilio, Ornithoptera Pruanus*, from Richmond River, New Holland. Mr. Douglas exhibited specimens of *Odontus dentatis*, found on *Echium vulgare*, at Folkestone; and several other rare *Lepidoptera*. Mr. White read a note on a specimen of *Monohammus sutor* which had bored through a leaden pipe that happened to oppose its exit from the wood in which it had passed its larva and pupa states; he also exhibited a small, but most interesting collection of Indian insects received from Mrs. Hamilton.

LONDON HOSPITAL.—A meeting of the governors of this hospital was held on Wednesday, to receive the report of the committee of management, and to elect his Royal Highness the Duke of Cambridge president, in the room of the late Duke. The report stated that during the past quarter legacies to the amount of £3250 had been bequeathed, £2000 Consols from Mr. Jonas Davis, and £1125 from Mr. Robert Nicholson, and £100 cash from Mr. J. H. Peacock. Since 4th June 791 in-patients had been discharged cured, of whom 455 were cured, 442 relieved, and 66 had died; 298 patients now remained in the hospital. During the quarter there had been 1872 out-patients. The number of accidents had also materially increased. In 1842 there were 5903 accidents of all denominations. In 1843 there were 5666; in 1844, 6012; in 1845, 6555; in 1846, 7019; in 1847, 8277; in 1848, 9018; in 1849, 9011; giving a total of 57,149 received merely for accidents during the eight years. In 1836 there were 2736 in-patients, of whom 277 died, being ten per cent. In 1836 there were 2813, of whom 249 died, being 10¼ per cent. In 1837 there were 2916, of whom 418 died, being 14 per cent. In 1838 there were 2961, of whom 276 died, being 12½ per cent. In 1839 there were 3247, of whom 305 died, or 9½ per cent.; this sudden decrease having probably arisen from the completion of a more effective drainage in the hospital during that year. The income of the hospital up to January last amounted to £10,239, of which sum the expenditure was something short; and the estate of the hospital, including the recent legacies, amounted to £190,898, which sum was invested in various modes, and yielded an income of more than £7000. The calls, however, on the hospital, were much on the increase. The report was adopted, and it having been intimated that his Royal Highness the Duke of Cambridge had consented to become the president of the Institution, he was unanimously elected, and the proceedings terminated.

THE ROYAL FREE HOSPITAL.—On Wednesday evening, a meeting of the governors of the above hospital was held in the Court-room of the institution, in Gray's Inn-road, for general business; the Rev. Dr. Rice in the chair. During the past year there had been 881 patients admitted into the wards, and 27,339 out-patients had received advice and medicine; being together 28,190 totally destitute poor relieved, and a grand total since its foundation of 310,547.

PHILANTHROPIC SOCIETY.—The quarterly meeting of this society was held at the London Tavern on Thursday; Mr. Ralph Ricardo in the chair. The report presented to the meeting stated, that during the past three months two legacies, of £500 each, had been left to the charity by Miss A. M. Clarke and Mr. W. Blandell. There were now about 100 boys in the Farm School at Redhill, who had successfully secured a very abundant harvest. The report was adopted; a resolution carried authorizing the committee of management to complete the purchase of the farm; and Messrs. T. Alcock, M.P., and J. W. Freshfield, High-Sheriff of Surrey, added to the committee.

WESTBOURNE SCHOOLS.—On Saturday morning last the first stone of the Westbourne Schools, Westbourne Park, Paddington, was laid by the Hon. Arthur Kinnaird, in the presence of several of the subscribers and those interested in the undertaking. Numbers of the children who are here after to benefit by the instruction given in the schools were present, and were addressed in a most appropriate manner by the Rev. Capel Molyneux, minister of the Lock Hospital, in connexion with which the schools are founded, the Rev. Lord Radstock, and members of the principal subscribers. Upwards of half an acre of land has been purchased for the site, at an expense of nearly £700, and is the joint gift of the Hon. Arthur Kinnaird and the Rev. Edward Holland, the former gentleman being also the large subscriber to the building fund. Mr. F. W. Porter, of Charlotte-street, Bloomsbury, is the architect to the building, which will be of fire-proof construction. The style is Decorated Tudor, and will contain, besides the requisite and exclusive of the school, about £2800; the contract being taken by Messrs. Winsland and Holland. As yet the subscriptions fall far short of this sum, but we hope the soon they will amount to what is required to complete so desirable an undertaking, and one so necessary in a neighbourhood where several hundreds of children are now rising into youth without education of any sort.

THE GREEN PARK.—Workmen are engaged in forming new walks in the Green Park, in consequence of the improvements in front of Buckingham-place. A portion of the ride up Constitution-hill will be curtailed, and the railings carried back into the Park. One of the walks forms a mall between some fine trees, and seats will be placed in it.

THE SUNDAY POSTAL ARRANGEMENTS.—On Sunday last, by command of the Postmaster-General, there was a general delivery of letters and newspapers throughout the metropolitan districts and the provinces. In the majority of cases the delivery commenced shortly after nine o'clock, and terminated at half-past ten in the forenoon; and although in some instances it began rather later, in no case was it permitted during the hours of Divine service. It is generally understood by the authorities that no further modifications on points of detail will affect the existing regulations in the London district (country) department, though further orders will be shortly issued with reference to the Sunday duty in many of the more distant post towns.

BARTHOLOMEW FAIR.—On Tuesday, in pursuance of ancient charter, the Lord Mayor and other civic authorities proceeded to Smithfield, when the usual proclamation for holding Bartholomew Fair was made. The ceremony, although legally necessary, is now a mere farce. The "Fair" consisted of only three booths for the sale of gilt gingerbread, and some dozen barrows of itinerant dealers in apples, nuts, and children's toys.

THE TRANSFER-BOOKS AT THE BANK OF ENGLAND.—The transfer-books for the undermentioned annuities, due the 10th of October next, will be closed and opened as follows:—Bank Stock, from Friday the 13th inst. to Friday the 18th of October; Three-and-a-Quarter per Cent. Annuities, ditto to ditto; Reduced Three per Cent. Annuities, from Thursday the 12th inst. to Friday the 18th of October; Long Annuities, from ditto to ditto; Annuities for terms of Years, from ditto to ditto.

CITY IMPROVEMENTS.—The removal of the houses in Cannon-street, to make room for the new thoroughfare from Blackfriars to London-bridge, is rapidly progressing. The destruction of the buildings between Budge-row and Cloak-lane have been completed, and the churchyard enclosed. Operations have been commenced from the corner of Cannon-street, and in the course of a few days nearly twenty houses will be entirely removed. Two new and handsome houses have been already erected along the line of the new street. A good deal of inconvenience is at present caused to passengers by the dust and the partial destruction of the road, but this will be more than compensated for by the improved state of the localities.

METROPOLITAN SEWERS.—An official return, published pursuant to an order of the House of Commons, of the flushing work done in the Surrey and Kent divisions of the metropolitan sewers, gives the following results. The total number of yards lineal of sewers flushed out during thirty-one weeks ending the 31st July, was 377,874; the amount paid, £2230 2s. 4d.; cost per mile, £10 7s. 10d.

FOREIGN FRUITS.—The supplies of fruits of every description now in season, at present taking place from the continent of Europe, and more especially from Belgium, from Holland, and Holland, are enormous, and form an important addition to the home supplies to the metropolitan markets. The supplies of fruits from Belgium, &c., within these few days, have been larger than on any former occasions, in many cases exceeding 5000 packages of all kinds of fruits.

PROPOSAL TO CONVERT THE THAMES TUNNEL INTO A SEWER FOR DRAINING THE NORTHERN SIDE OF THE METROPOLIS. A proposal has been forwarded to Lord Ebrington, as chairman of the Metropolitan Sewers Commission, by Mr. James Graham Harding, a gentleman of independent property, although a practical man, residing in Albany-street, Regent's Park, for the conversion of the Thames Tunnel into a means of draining the whole of the Middlesex side of the metropolis, and carrying the sewage into the main sewer of the Ravensbourne, on the Surrey side, as proposed by the engineer of the Sewers Commission for the drainage of the south side of the river. Mr. Harding's proposal is as follows:—Let a sewer be formed along the side of the river so as to receive all the present sewers and drains into it which are above and below the Thames Tunnel; make two sewers along the bottom of the Thames Tunnel to the Surrey side, emptying themselves into the intended main sewer proposed to be made, according to the plan of Mr Frank Forster. By adopting this plan, it would render the valuable part of the Thames Tunnel, and a ready way to get rid of the vast amount of filth which at present pollutes the river Thames, to the great injury of the health of the inhabitants of London.

NOVA METHA.—At the Polytechnic Institution is a new mode of [illegible] now being demonstrated, which, under this title, consists of a series of [illegible] moving along with their own motor, in the form of a tube, which is fixed on the [illegible] line of rail. This tube has a series of side valves, entirely under the care of a guard, who, by levers, has perfect control over his train. The application is very ingenious, and is the invention of a mechanic. Along the whole line of railway is laid a pair of pipes of any given diameter, in connexion with which a series of pistons are fixed between the rails intended to receive the tube above-mentioned in its passage. In these pistons are atmospheric valves opening into the fixed pipe, which is always kept exhausted, so that, when the train passes over the pistons, the side valves in the tube are opened by means of inclined planes communicating with other levers, which levers are raised up on the train passing. The atmosphere existing in the tube consequently rushes from the tube to supply the vacuum, and the train is impelled by external atmospheric pressure [illegible] mechanics, formed into a society, [illegible] executed the illustration of a [illegible] by which the invention [illegible] may be accomplished.

ROBBERY AT THE MANSION-HOUSE.—On Tuesday some expert thief effected an entrance into the Lord Mayor's Chamber, at the Mansion House, and, amongst other property, stole the Marshal's master pistols. Notwithstanding the number of police in attendance, the thief got clear off with his booty.

THE LATE SIR ROBERT PEEL.—WORKING MAN'S TESTIMONIAL.
Central Committee Office, No. 454, West Strand, 2nd Sept., 1850.

SIR, -Although the 31st of August was fixed to close the subscription to the Working Man's Memorial to the late Sir Robert Peel, the committee find it necessary to extend the period to the 17th instant, by which day it is hoped that all those who have undertaken to obtain contributions will finally close their lists, giving to the working classes, in the meantime, the fullest opportunity of contributing each his mite, in token of gratitude to the statesman who, at the sacrifice of political power, of personal friendships, and Government patronage, devoted himself successfully to the accomplishment of measures directed solely to the welfare of the industrious members of the community.

The amount of subscriptions may be sent either to the Bank of England or to this office.

An earnest effort should be made between this time and the day named for the cessation of the subscription. I am, sir, your obedient servant,

(Signed) JOSEPH HUME.

To the Editor of the ILLUSTRATED LONDON NEWS, Strand.

THE CIVIC CHAIR.—In consequence of Michaelmas-Day falling this year upon Sunday, the election of chief magistrate of the City of London will take place on Saturday, the 28th inst. The sheriffs elect, Aldermen Carden and G. E. Hodgkinson, Esqrs., will be sworn in on the 27th inst. The choice of the livery for Lord Mayor elect, it is expected, will fall upon Alderman Harvey, who was elected Alderman of Broad-street Ward in 1849, and served the office of Sheriff in 1843, and is now the senior Alderman below the chair.

SEIZURE OF AN EXTENSIVE ILLICIT DISTILLERY.—On Monday a seizure of an illicit distillery on a large scale was effected by Messrs. Frederick Pargeter and Benjamin Elmy, officers of Excise. From information received, the officers proceeded to No. 7, Carlisle-street, Bethnal-green, but were unable to gain admission by repeated knocking at the front door. Mr. Pargeter then made his way to the back, leaving Mr. Elmy to keep watch at the front A new and unexpected difficulty in the way of gaining an entrance at the back, however, presented itself; for on Mr. Pargeter going towards it, he found a large dog chained outside, so as to have a complete range of the back-door, and there was another of a similar description inside the house. The one on the outside was soon disposed of, an entrance was made by breaking open the back-door with a stratagem, the other dog was secured. Mr. Pargeter then passed through the house, and opened the front door to Mr. Elmy. They then made a search of the house, but found no person within. It was evident, from the appearance of the house, however, that the owners of it had been alarmed, and anticipated the visit of the officers, as the still had been taken from the brick-work, but in such a way that it could easily be replaced when an opportunity served, as a quantity of molasses fermented was prepared to commence operations. The still, with the fittings and apparatus, was then conveyed to the Excise warehouses in Broad-street.

DAHLIA SHOW.—ROYAL SURREY ZOOLOGICAL GARDENS.—The Royal South London Floricultural Society held their last flower show of the season on Wednesday, at the Surrey Zoological Gardens. The assortment of dahlias and hollyhocks was magnificent, and greatly surpassed, both in the number and beauty of the specimens presented, anything that we remember to have seen at the former exhibitions of the same society. There was also a very fair display of orleas, clerodendrums, and fuchsias; and Mr. E. F. Francis, of Hertford, exhibited a very fine collection of roses, which were especially worthy of notice at this advanced period of the season. The weather was exceedingly propitious.

PUBLIC BILLS.—The number of public bills introduced into the House of Commons during the session of 1850, and which received the Royal assent, was 114. The number introduced, but subsequently either withdrawn or lost, was 49.

BIRTHS AND DEATHS.—Births registered in the week ending Saturday, August 31st:—Males, 721; females, 734; total, 1461. Deaths during the same period: Males, 451; females, 431: total, 882. This return shows that the health of London is now better than it usually is at this season of the year. The average of the ten corresponding weeks (1840-49) is 1078; or, corrected for the increase of population, 1176. If the week of 1849 is omitted (when 2796 persons died), the corrected average is 998; and the deaths last week are less by 87 than this number. In the last week of August, 1849, cholera carried off 1053; diarrhœa, 234 lives. In the corresponding week of this year the deaths from cholera were 4; from diarrhœa, 118; and at the present time there is no trace of Asiatic cholera in London. A costermonger, with diseased kidneys, died of English cholera, in Walworth, on August 21. Three cases of infantile infantum were also registered in the course of the week. In addition to diarrhœa, the two zymotic cases that deserve attention are typhus and scarlatina; typhus was fatal to 14 children, to 33 adults between the ages of 15 and 60, and to 3 old people, in all to 40 persons: scarlatina and putrid sore throat to 28 children under the age of 15, to 4 adults, and to 1 person in advanced life. Scarlatina, which is so fatal to young persons, has been extremely scarce for the last thirty weeks; it was fatal in the three series of ten weeks in 145, 185, and 212 cases.

METEOROLOGICAL OBSERVATIONS.—By the Greenwich observations, the mean reading of the barometer was 29.979 inches, or much higher than the previous weeks. The mean temperature of the Thames was 61 deg., of the air, 56 9 deg.; which is 3·6 deg. below the average. The wind was southwest and south-west, and often stagnate; it travelled at the rate of 220 or 226 miles a day for three days, and from 40 to 85 miles daily during the last four days of the week. Rain fell on Monday and Wednesday, but it was not the one-seventh part of an inch.

REMARKABLE NATURAL CURIOSITY.—The following statement from Messrs. Rez and Mitchell has been published:—"A log of mahogany was being cut into veneers, a short time ago, in the timber-yard of Mr. Alfred Desandes, a cabinet-maker, Jersey, when his attention was attracted by the appearance of a most remarkable and striking profile of her most gracious Majesty in a knot of the wood. The likeness is so true that all who have yet seen it acknowledged the resemblance." The veneer is at present in the possession of the above firm, at 103, Newgate-street, who, we have no doubt, will gratify respectable parties with a sight of it.

SITTINGS OF THE HOUSE OF COMMONS.—A return, which was ordered to be made on the motion of Mr. Brotherton, and which has just been printed, gives the number of days on which the House of Commons sat in the session of 1850, stating for each day, the date of the month, and the day of the week, the hour of meeting and the hour of adjournment, and the total number of hours occupied in the sittings of the House, and the average time; and also showing the number of hours on which the House sat each day, and the number of hours after midnight; and the number of entries in each day's votes and proceedings. We have not room to give the details of each day's sitting, but the following is the summary:

Months.	Number of days of sitting	Number of hours of sitting		Number of hours after midnight	Number of entries in votes
		H.	M.	H.	
Jan. and Feb.	21	185	0	8¾	1399
March	18	140½	0	12¾	1079
April	17	140	22	11¾	1204
May	18	149	37	17¼	1445
June	20	181	50	23¾	1168
July	23	236¼	0	25½	1564
August	12	99	20	9¼	726
Total	129	1104	14	108¼	8571

Average time per diem . . . . 8 hours, 33 min. 35 secs.

The longest sittings were:—On the 22nd of July, 15 hours; July the 9th, 14¾ hours; and on the 26th of that month and the 1st of August, when the House sat 14½ hours each day.

ACTS OF PARLIAMENT.—A return has just been issued, which was prepared on the motion of Mr. Brotherton, of the total number of acts passed in each session since the year 1800, distinguishing the number of public, private, and local and personal acts. It shows that the total number of Acts of Parliament which have passed since 1800 is 14,362; of these 5392 were public acts. The number of local, personal, and private acts which passed between 1801 and 1813-14 was 2393. In that year the private acts were placed under a separate heading The number of local and personal acts which have passed since 1814-15 was 4971, and of private acts 2393. The greatest number of acts which passed in one year was in 1845, when not less than 962 were carried; of these 117 were public, and 402 local and personal (chiefly railroads). It is, then, singular that, generally speaking, a greater number of public acts were passed each year previous to 1819 than since that time.

EXTRACT OF A LETTER FROM AN OFFICER OF RANK IN INDIA.—"Kussouli, July 5, 1850.—There have been some unpleasant matters here in the 14th Dragoons and every endeavour has been made to hush up something as to the running away at Chillianwalla. This has gone so far as to attract the attention of Sir Charles Napier, who, after inquiries, had determined that a general court-martial on the commanding officer should bring the matter to a conclusion, when the intelligence reached us of the commanding officer (Lieut.-Colonel King) having shot himself." *Morning Chronicle.*

The Duke of Buccleuch, who is owner of very extensive possessions in the neighbourhood of Hawick, has set apart a field of seven acres near the town for allotments to the working classes. Whether or not this will answer the purpose intended, namely, to allure these persons from drinking and other low pursuits, remains to be seen; but, certainly, the movement is in the right direction.

The *Times* of Monday announces that Viscount Fielding, M.P., has deserted the ranks of the Established Church, and gone over to the Church of Rome. During the last few weeks a rumour to that effect was in circulation, but we believe it was generally discredited. However, on Friday evening week, the fact of the noble Lord's secession was announced to the respective committees of the London Union on Church Matters and of the Metropolitan Church Union, with which bodies he was connected.

The jury empanelled at Edinburgh to inquire into the circumstances connected with the loss of the *Orion* have found the captain guilty of culpable neglect of duty, and the second mate of culpable and reckless neglect of duty. Thomas Henderson, the captain, has been sentenced to 18 months' imprisonment; and John Williams, the second mate, to seven years' transportation. George Langlands, the first mate of the vessel, was a subordinate officer, not on duty at the time of the wreck, and so escaped the consequences of the verdict which has been returned against his brother officers.

THE ILLUSTRATED LONDON NEWS.

CHESS.

TO CORRESPONDENTS.

M N—We repeat, that Problem No 344 cannot be solved in less than the stipulated number of moves.

T W, Plymouth, must send a copy of the solution he mentions; but, as the Problem cannot possibly be solved in three moves, he will, perhaps, before again troubling us, re-examine it once more.

AN EIGHT YEARS' SUBSCRIBER.—The first of Jasnish's three curious positions should be—White: King at K 8 sq, Q at K B 6th, Ps at K 3 4th and Q 2 6th. Black: King at his Kt 6th, R at Q B 4th, Ps at K R 6th and 6th, K Kt 4th, and Q R 6th. White to move and win.

H H, Holyhead—The fine study in our last, by Messrs. King and Horwitz is anything but the simple affair your solution would make it. Up to the present time, out of our many hundred correspondents, three only have hit upon the proper *modus operandi*, and one of these is a lady.

SKMLA.—In the first variation which we gave to the 17th move in the game last week, instead of carrying on the contest to the 23d move, we might have terminated it by checkmate with the Bishop a move before.

JUDY.—Quite right in both particulars.

W H, Glasgow.—Your solution, though differing somewhat from the author's, is indisputable. We have resolved the same key from several of our most acute communicants, and can discover no flaw in it.

MOX.—It is too true, we fear, that M. St. Amant is about to leave Europe for some years, on an expedition to Ga...rnia.

A YOUNG AMATEUR, Madrid—The Problem No. 343, by Herr Bles, cannot be solved as you submit. At the third move, you overlook the fact that Black can take the Bishop with the Queen.

J W, Kardington—Your first "Problem" is a palpable mate of one move, instead of three: the next an equally obvious one of two moves in lieu of four, and the third too simple for the veriest beginner.

JUVENIS.—The subjoin is our last were peculiarly clever, but it is a reproach to the sagacity of our numerous correspondents that so few have succeeded in solving them.

PRESIDENT.—As the demand for the "Staunton Chessmen" will in all probability this season exceed even that of last, the public should be on the qui vive for guard against the vile imitations which we have had attempted to be palmed on us for the real ones. The only security against fraud is never to purchase any object first ascertaining that the description label with the autograph signature of the amateur whose name they bear is attached *to the bottom of the box*.

EUCLIDIAN.—Eoshrok, in the "Encyclopædia of Antiquity," assumes the Abacus of the Latins was the modern Chess-board, but of an oblong form, and that the Tabernæ had Chess-boards as a sign that Chess was played there. Notwithstanding all this, and Christie's ingenious quarto to prove that the type of Chess was the SEPTUCH of Palamedes, the general opinion is that the game of Chess was known neither to Greeks nor Romans

Φ—1. We shall look forward with interest for the promised game by the celebrated Breslau player, Mr Anderssen, whose success in contest, both with and without the chess-board, agrees his townsman, Mr Harrwitz, has stamped him as one of the finest play rs in Germany 2. The other *parties* have already reached us.

SOLUTIONS OF No. 343 by H M H, D C L, ARGUS, M M, CAVALRY, FIDO, CIVUS, are correct. All others are wrong

SOLUTIONS of No. 345 by JUDY, ST EDMUNDS, are correct. All others are wrong

*** Amateurs of Chess, both here and abroad, who are desirous of co-operating for the purpose of carrying out the stimulated "Great Congress of Chess-players in London," during "the Exposition" next year, are requested to lose no time in communicating by letter with the Editor of the *Chess-player's Chronicle*, 27, King William-street, Charing-cross.

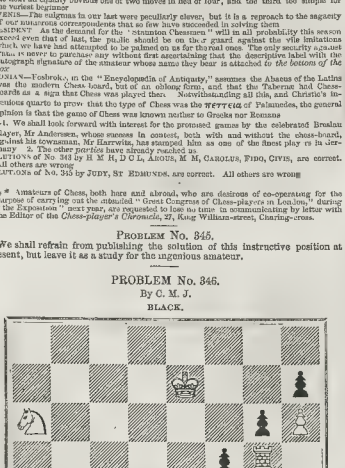
PROBLEM No. 345.

We shall refrain from publishing the solution of this instructive position at present, but leave it as a study for the ingenious amateur.

PROBLEM No. 346.

By C. M. J.

BLACK.



WHITE.

White, playing first, to mate in four moves.

CHESS IN THE METROPOLIS.

Mr. Staunton gives his Q's Rook to an Amateur.

(*Sevens Gambit.*)

(*Remove White's Q Rook from the board.*)

WHITE (Mr. S.)	BLACK (Mr. T.)	WHITE (Mr. S.)	BLACK (Mr. T.)
1. P to K 4th	P to K 4th	8. R to K sq	K Kt to Q 3d *(a)*
2. K Kt to B 3d	Q Kt to B 3d	9. Q B to K Kt 5th	
3. K B to Q B 4th	K B to Q B 4th	*(b)*	P to K B 3d *(c)*
4. P to Q Kt 4th	B takes Q Kt P	10. P takes K P	Kt takes K B *(d)*
5. P to Q B 3d	B to Q R 4th	11. P takes K B P (dis-	
6. Castles	K Kt to B 3d	covering ch)	K to B 2d
7. P to Q 4th	Kt takes K P	12. Q to her 5th (ch)	K to Kt 3d

And White mated him by force in three moves.

(*a*) Heydebrant commends this as the best move for Black at the present juncture, but he seems to have overlooked the rejoinder adopted by White in the game.

(*b*) After this, as a game of equal force, and the players well matched, there can be no doubt, we think, that the attack should win.

(*c*) In a subsequent game, at the same opening, Black here played Q Kt to K 2d, and the following variation ensued.

WHITE	BLACK	WHITE.	BLACK.
10	Q Kt to K 2d	12. Q to K 5th (ch)	K to 3 sq (best)
11 K Kt takes K P	P to K B 3d.—(Castling	13. B takes P	P takes B.—If Q to
	seems of no avail, as		K sq, B takes Kt
	White in that case		(ch, and wins)
	might take the K B P	14. Kt to Kt 6th (ch)	Kt takes Kt
	with his Kt, and	15. Q Mates	
	surely win.)		

(*d*) Do what he can, his game is lost. For example, suppose—

10	P takes Q B	12. Q to Kt 4th	Q to K B 3d
11. P takes Kt (dis ch)	K to B sq	13. Kt takes P, and Black has no resource.	

Another sparkling contest, between Messrs. Smith and Cradock, in which the former gives the Pawn and two moves.

(*Remove Black's Kt's Bishop's Pawn off the board.*)

WHITE (Mr. C.)	BLACK (Mr. S.)	WHITE (Mr. C.)	BLACK (Mr. S.)
1 P to K 4th	P to K 3d	14. K Kt takes K t	Q takes Kt
2 P to Q 4th	P to K 3d	15. Q Kt to K 4th	K B takes Q B (ch)
3 K B to Q 3d	P to Q B 4th	16. Q takes B	Q takes Q R (ch)
4. P to K 5th	K Kt to K 2d	17. K to his 2d sq	Q takes K R
5. P to Q B 3d *(a)*	Q Kt to B 3d	18. Kt to Q 6th (ch)	K to Q sq
6. Q B to K 3d	Q to her Kt 3d	19. Q to K Kt 5th (ch)	K to Q B 2d
7. P to Q Kt 3d *(b)*	Q B P takes P	20. Kt to Q Kt 8th (ch)	K to Q B 3d
8. P takes P	Kt to K B 4th	21. Q to K 7th	K takes Kt
9. P takes Kt	P takes B	22. P to Q R 4th (ch)	K to Q R 3d
10. K Kt to K 2d	K B to Q Kt 5th (ch)	23. Q to her 6th sq (ch)	P to Q Kt 3d
11 Q Kt to B 3d	P to K B 5th *(c)*	24. Q to her 3d sq (ch)	K to Q Kt 2d
12. Q B to Q 2d	P to K B 6th	25. Q to her 5th sq (ch)	K to Q R 3d
13. K Kt P takes P	Kt takes Q P	26. Q to her 6th sq (ch)	K to Q sq
			And White struck his flag

(*a*) This is not vigorous enough for a player accepting the odds of the Pawn and two moves White should have played his Q B to K Kt 5th.

(*b*) White plays a dreadful game. He might have left this Pawn as a bait, and occupied himself by bringing his two knights into play

(*c*) Well played. The attack seems already to have changed hands.

CHESS ENIGMAS.

No. 603.—By C. S., Esq., of the Brighton Chess Club.

White: K at K R sq, Q at K 3d, R at Q B 7th, Kts at K B 3d and 6th, B at K B 4th, Ps at K R 4th and Q 4th.
Black: K at K B 2d, Q at her Kt 7th, Rs at K sq and K Q 2d, B at K R sq; Ps at K Kt 3d, K B 4th, and Q R 7th

White to play, and mate in four moves.

No. 604. By G. O. C., of Worthing.

White. K at his 6th, R at Q 5th, B at K B 4th, Ps at Q 4th and Q B 5th.
Black K at his B sq; Ps at K R 2d and 3d, K 2d, and Q B 3d.

White, playing first, mates in two moves.

No. 605.—By R. B. WORSALL, Oxford.

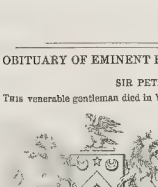
White: K at his Kt 4th, Q at her sq, Kts at K R 6th and Q B 7th, Ps at K Kt 2d and Q B 3d
Black. K at his 4th, R at Q 6th, Kt at Q 3d; Ps at K R 4th, K Kt 6th, K 5th, and Q B 3d.

White to play, and mate in three moves.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

SIR PETER POLE, BART.

THIS venerable gentleman died in Welbeck street on the 30th ult., in the 80th year of his age. He was formerly head of the banking firm, Pole, Thornton, and Co. Sir Peter succeeded to the Baronetcy in 1813, at the decease of his father, Sir Charles, who had changed his name from Van Notten to Pole, in consequence of his marriage with Millicent, daughter of Charles Pole, Esq., of Holcrott, a scion of the ancient and eminent family of Pole, of Radborne, county of Derby. Sir Peter, on 24th December, 1798, married Anna-Gueriernina, eldest daughter of Richard Buller, Esq., and has left four sons



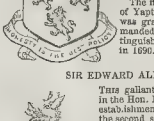
and three surviving daughters:—Amelia Matilda, wife of the Rev. Walsam Buller Pole; Wilhelmina, wife of Thomas Swettenham, Esq.; and Maria, Countess of Edward Earl of Winterton. The eldest son, Sir Peter Pole, the present and third Baronet, is married to Lady Louisa Pery, daughter of Edmund Henry, Earl of Limerick.

JOSEPH BAILEY, ESQ., OF EASTON COURT, M.P. FOR HEREFORDSHIRE.

THE death of the hon. member for Herefordshire took place in London, on the 31st ult., in the 59th year of his age. He was the eldest son of the present Joseph Bailey, Esq., of Glanusk Park, county Brecon, M.P., one of the greatest landed proprietors and ironmasters in England.

The deceased gentleman represented at one time Sudbury in Parliament, and twice unsuccessfully contested the borough of Monmouth. He was first returned for Herefordshire in 1841. He married, 22nd June, 1839, Elizabeth Mary, only child of William Congreve Russell, Esq., and has left issue

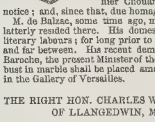
SIR WILLIAM LEWIS GEORGE THOMAS, BART.



THE decease of this Baronet occurred at Weymouth, on the 24th ult. He was the only son of Sir George Thomas, Bart., M.P., and succeeded to the title at the death of his father in 1815. Sir William married Elizabeth, daughter of Richard Welsh, Esq.; and by her, who survives him, has left issue two sons, both commanders in the Royal Navy, and two surviving daughters—the elder of the former being the present Sir William Sydney Thomas, who is married to Thomasine, daughter of the late Captain Henry Haynes, R.N.

The first Baronet of the family, Sir George Thomas, of Yapton, Captain-General of the Caribbee Islands, was grandson of Colonel John Thomas, who commanded the Barbadoes Regiment, and greatly distinguished himself at the capture of St. Christopher's, in 1690.

SIR EDWARD ALEXANDER CAMPBELL, C.B.



THIS gallant officer, late Lieutenant-Colonel of Cavalry in the Hon. East India Company's service, in the Bengal establishment, died on the 25th ult., aged 49. He was the second son of the present Sir Robert Campbell, Bart, of Carrick-Ashy, county Donegal, by Eliza his wife, daughter of Dr. Alexander Paton, Physician-General at Madras, and younger brother of Sir J. N. R. Campbell, K.C.H., British Charge d'Affaires in Persia.

M. DE BALZAC.

HONORÉ DE BALZAC, one of the most eminent of the modern novelists of France, was born at Tours, the 20th May, 1799. He received his education in the College of Vendôme, and thence went to Paris, where he commenced his career as an author, and passed many years in the severe struggles of literary obscurity. "Le Dernier Chouan," published in 1829, first brought him into notice; and, since that, due homage and fortune have attended his genius.

M. de Balzac, some time ago, married a Russian lady of fortune, and he latterly resided there. His domestic happiness interfered very much with his literary labours; for long prior to his lamented death, his productions were wide and far known. His recent demise has been deeply felt by his country. M Baroche, the present Minister of the Interior in France, has decided that Balzac's bust in marble shall be placed among those of the other great men of his age, in the Gallery of Versailles.

THE RIGHT HON. CHARLES WATKIN WILLIAMS WYNN, D.C.L., F.S.A., OF LLANGEDWIN, M.P. FOR MONTGOMERYSHIRE

MR. CHARLES WILLIAMS WYNN, the Father of the House of Commons, was educated at Westminster and at Christ's Church, Oxford, and entered Parliament as member for Old Sarum, on attaining his majority, in 1796. In the following year he became Knight of the Shire for the county of Montgomery, and continued as such up to the period of his decease. From 1822 to 1828 he held office as President of the Board of Control, from 1830 to 1831 as Secretary at War, and from 1834 to 1835 as Chancellor of the Duchy of Lancaster.

On all points connected with the laws and regulations of the House of Commons Mr. Charles Wynn was deemed an authority, and he was frequently mentioned as not unlikely to occupy the speaker's chair, which an ancestor of his, Sir William Williams, had filled shortly after the Restoration.

The right honourable gentleman added at his town residence, in Grafton-street, on Monday the 2d inst. He was the second son of Sir Watkin Williams Wynn, Bart., of Wynnstay, M.P. for Denbighshire, by Charlotta his second wife, sister of the Marquis of Buckingham; and grandson of Sir Watkin Williams, Bart., who inherited Wynnstay and the other great estates of his maternal great-great-grandfather, Sir John Wynn, of Gwydyr, and assumed, in consequence, the additional surname and arms of Wynn. The possessions and influence of the present Sir Watkin Williams-Wynn (Mr. Charles Wynn's nephew), popularly styled "Prince of Wales," are paramount in the Principality; and his magnificent seat at Wynnstay yields to few in the empire

At the time of his death, Mr. Williams-Wynn had nearly completed his 75th year, having been born on the 9th of October, 1775. He married, on the 9th of April, 1805, Mary, eldest daughter of Sir Foster Cunliffe, Bart., and by her (who died on the 14th of June, 1838) has left one surviving son and four daughters. Mr. Wynn was called to the bar by the Honourable Society of Lincoln's Inn in 1798

The Dublin papers announce the death of Admiral Robert Dudley Oliver, for a number of years resident in that city, and an active member of the Bible and other religious societies established in that city. His demise, which was occasioned by a severe attack of paralysis, took place on Sunday, at his country residence, Barnhill, Dalkey. The gallant officer had reached the mature age of 83 years.

LOUIS PHILIPPE.

(*From Galignani's Messenger.*)

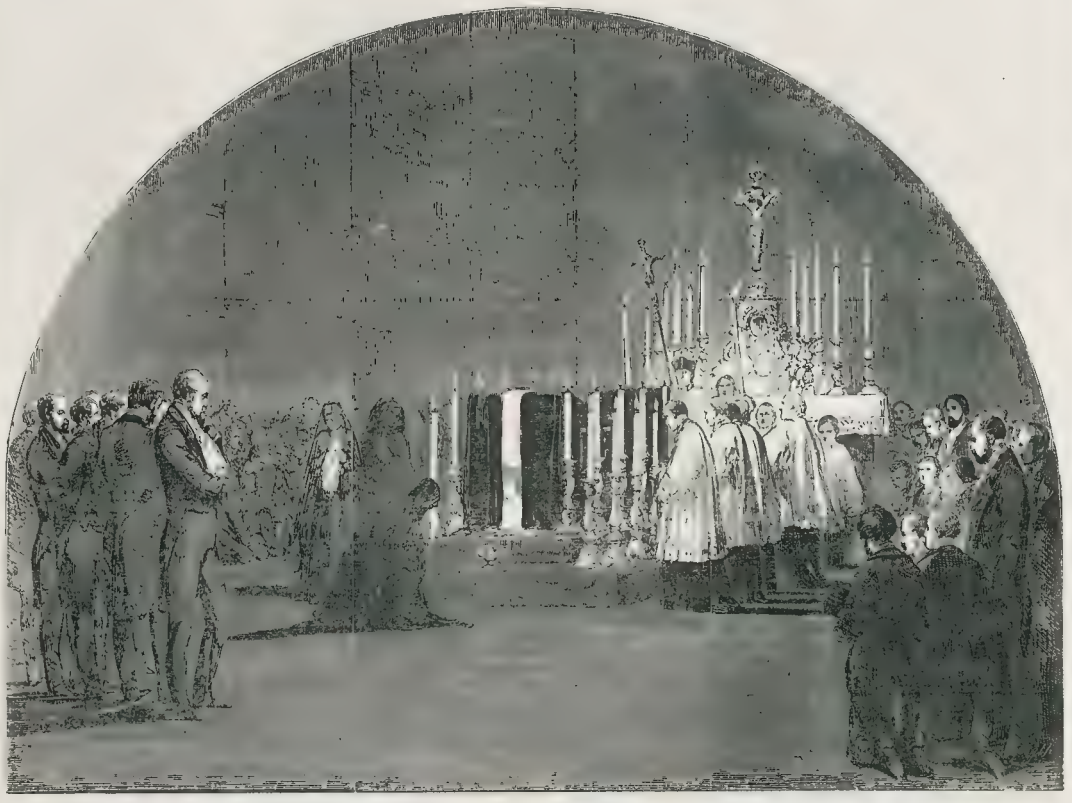
M. Jules Janin has published in the *Débats* an affecting eulogium on the late King. On the occasion of a visit to the Théâtre Français, and a notice of the embellishments that it has undergone, he says:—

"Yes, this theatre that he had repaired he had not time to see to judge of the effect produced. He has not set his foot in the Royal box which was fitted up to receive him. The box of the King adjoined his palace, and was next to the saloons of which Cardinal Richelieu had made his Louvre. It had been hoped that the King would soon be present at the performance of some old comedy of his youth. He liked Molière by Royal tradition, he liked Marivaux, and did not detest Beaumarchais. A tragedy of Corneille was for him a *fête*. He liked that Voltaire from *Semiramis* to *Tancrede*. He did not hate as a child in this same Palais Royal which had been the rendezvous of such divers fortunes. But suddenly in the midst of peace, in the midst of glory, when the tree of Minerva protected the world with its happy shade, and when this august throne is surrounded with honour, with respect, with fortune, and with a numerous progeny worthy of their ancestor Henry IV., the conspiracy burns and destroys all these grand things in its course. Three bowls of a few bourgeois, armed with new muskets, overthrew in less than a day the sacred rights based on the consent and obedience of so many millions. A quarter of an hour of passion and delirium delivers up to the flames the throne founded on the prudence of such a Monarch, the fine houses of the best of queens, the zeal and courage of so many youths, the legitimate princes of the '*honnete Frangaise*,' of valiant swords and generous hearts. Alas! pitiless exile severs across the terrified ocean this accomplished glory and budding victories, as the autumnal leaf is carried away by the wind. A dozen men, emerging from obscurity, shamelessly affront the light of day, and another royalty is sent to join the royalties and empires which have disappeared from the surface of the universe."

Having paid this affecting tribute to the old king, M. Jules Janin proceeds to enumerate the splendid things done by him for the encouragement of the arts, and then he adds:—

"We may praise him now that he is dead. We may say to his coffin and his grave what we did not say to his power and his favour. He laboured night and day as no other man of his time laboured. He went to bed very late at night,

FUNERAL OF LOUIS PHILIPPE.



THE "CHAPELLE ARDENTE," AT CLAREMONT.

for he watched over the city that slept. Three or four hours of good sleep on a hard bed sufficed for him. He was called at seven in the morning, and his labour was resumed. *Régner, gouverner*, for these words a conflict ensued, and yet the King fully comprehended them. To reign and to govern was in his sense to do his duty—to live and to die in the performance of it. . . . He said (later, for his words are the words of a sage) that the Throne derived its principal force from public liberty—that a King can demand no more power than what is necessary for the execution of the laws, the maintenance of order, and the defence of the state, that anarchy engenders despotism, that the will of a people should be the will of the King, and that the interests of the nation are the interests of the Throne."

The grief of the King at the loss of his eldest son, and the noble fortitude with which he rose after having knelt for seventeen days and nights by the side of the corpse to resume his duties, and, with a firm voice, addressed his Parliament, to place under its protection the youthful heir to the Throne, are manfully described by M. Janin.

"I shall conclude (says M. Janin) with a letter from the King to his son. This letter, worthy of being preserved as a monument of excellence and paternal tenderness, was cast to the four winds of heaven when the Tuileries were given up to pillage. Listen, and say if you ever met with anything more worthy of your sympathy, your tears, and your respect:—

St. Cloud, Tuesday, 25th November, 1845.

My very dear friend and very good child. I am afflicted to think that every body should have witnessed the burst of impatience that I manifested towards you, and I was anxious to tell you, my good and faithful son, how deeply I appreciated, not only your sentiments, but your entire conduct as regards me. I wished to embrace you, and to tell you this on leaving the table; but I missed you. I do it, therefore, in writing, in great haste, and with the sincere regret of not having done so in the presence of the persons who heard me. I embrace you with all the warmth of my heart.

The letter is addressed "To my well-beloved son the Duke de Nemours, at the Tuileries—in haste."

"And as to you, Prince, forgive me for publishing this letter, which is in the same degree honourable to the father and to the son. Be tranquil, however, as to this letter: a pious hand plucked it from amid the ruins of a great storm—a pious and faithful hand will place it in yours."

ENTRANCE TO THE VAULT IN THE CHAPEL, AT WHICH THE GENERAL COUNT D'HAUTPOUL, THE DUKE DE MUMAIN, AND PRINCE DE JOINVILLE.

FUNERAL OF LOUIS PHILIPPE.

THE remains of Louis Philippe, ex-King of the French, were on Monday removed from Claremont, and deposited in the vault of a Roman Catholic Chapel attached to the residence of Miss Taylor, at Weybridge. (At this Chapel, it will be recollected, Louis Philippe and his family attended immediately after their first location at Claremont. There are two views of this incident in the ILLUSTRATED LONDON NEWS for March 25, 1848.)

The obsequies of the ex-Monarch were conducted with the utmost simplicity, and there was an entire absence of that pomp and state which might almost have been expected to mark the funeral procession of an individual of such distinguished rank.

Many gentlemen, most of them foreigners, had by half-past eight o'clock in the morning assembled in the entrance-hall of Claremont, where they were received by Generals Dumas and Chabannes, and other gentlemen connected with the household of the ex-King. Here they remained, their numbers being augmented by others who arrived by a later train until nine o'clock, the time appointed for the commencement of the religious ceremony.

Soon after Louis Philippe became the occupant of Claremont, a temporary chapel was formed for celebrating the services of the Roman Catholic church, by partitioning off a portion of an apartment which had been previously used as a picture-gallery. The dimensions of this chapel, which is of an oblong form, do not exceed 30 feet by 20 feet, and considerable space is taken up by the altar with its paraphernalia. In the centre of the chapel a platform was raised, ascended by two steps, each about half a foot in height, upon which was placed, on trestles, the coffin containing the body of the ex-King. The coffin was surrounded by twenty-four lighted wax tapers, and was covered by a black velvet pall, fringed with silver, and in the centre of which a cross, extending the length of the coffin, was worked in silver. The walls of the chapel were hung with black cloth, and the external light was carefully excluded. On one side of the chapel a bench was placed for the accommodation of the ex-Queen and the female relatives of the ex-Monarch; but the space within the chapel was so limited, that none but the members of the late King's family and their immediate attendants could be admitted within its precincts. Seats were, however, provided in an adjoining room, into which a small door opened from the chapel, for the strangers who attended the solemnity; but they could merely obtain a glimpse of the tapers burning on the altar, and hear occasionally the low tone of the officiating priest chanting in solemn cadence portions of the mass for the dead.

At nine, the Queen, the Princes and Princesses, entered the chapel and took their places, the Queen and Princesses on the left, and the Princes on the right, of the *catafalque*. Their Excellencies the Ministers of Belgium, of Naples, of Spain, of Brazil, and of Portugal, who had arrived spontaneously to pay their last respects to the King, were introduced into the chapel, as well as all the persons who were attached to the households of the King, the Queen, the Princes and the Princesses, and as many of the other attendants as the narrow limits of the chapel would allow. The former aides-de-camp of the King were placed behind the *catafalque*.

After the service of the lesser hours, mass was celebrated by Dr. White, Grand Vicar, performing *pro tempore* the functions of Vicar Apostolic of the London district, assisted by the Abbés Touzel and Levasseur, of the French Chapel in London; and by the Abbés Guelle and Crabet, respectively almoner and chaplain to the King; and by the Abbé Coquereau, Canon of St. Denys, who arrived on the previous day to perform the pious duty. After the mass, during which the prayer for the dead was chanted in full choir, the Abbé White gave the absolution. Immediately after the clergy, the Queen, passing round the *catafalque*, sprinkled with holy water the coffin of her Royal husband.

At a quarter past ten o'clock it was intimated that the body was about to be removed to the hearse, which had previously drawn up at the principal entrance to Claremont. The visitors immediately formed a double line from the door of the chapel along the vestibule; and the melancholy procession, which had been arranged in the chapel, passed between them in the following order:—

Two boys carrying tapers
The cross bearer and acolytes
Six clergymen, two and two
Members of the suite of the late King.

THE COFFIN

The pall, borne by the Duke de Montmorency, General Count d'Hautpoul, General Baron de Berthier, General Count Dumas, General Count Chabannes, and General Count Friant.
The Count de Paris, the Duke de Nemours, the Prince de Joinville, and the Duke d'Aumale, as mourners.

Such was the weight of the coffin, that ten stout men had some difficulty in bearing it safely down the flight of stone steps leading from the mansion to the lawn. The hearse, which was drawn by eight black horses, bore a shield on either side, in which were worked in gold, upon a blue ground, the initials "L. P." beneath a crown. The coffin having been deposited in the hearse, it moved slowly off towards the public road, preceded by the clergy, cross bearer, and acolytes, and followed by the Royal mourners, their attendants, and about two hundred other persons, all on foot and uncovered. The procession proceeded

FUNERAL OF LOUIS PHILIPPE.—THE PROCESSION LEAVING THE PALACE AT CLAREMONT.

In this manner, at a walking pace, to the entrance gate of the park, a distance of nearly a mile, where the mourning coaches were stationed. The mourners having entered their several carriages, the *cortège* was arranged in the following order:

His late Majesty's Grooms on horseback.
Four Mutes, two and two on each pole.
Two carriages, containing the Physicians who attended the funeral
THE HEARSE
A carriage and four, containing the Count de Paris, Count Rodolph de Noailles, and Duc de [illegible]
A carriage and pair, containing the Duke [illegible], Marshal Count Gérard, and Count de Dumas, and Admiral Count Mackau
A carriage and pair, containing Generals Bernard, Berthezène, and Count Friant, Colonel Count de Montebello, and Admiral Hernoux
A carriage and pair, containing M. de Rémusat, Count de Jaucourt, M. Bignon, and M. Thomas
A carriage and pair containing M. Freslon, M. de Mornay, M. Lefebvre, and M. Legrand
A carriage and pair, containing Prince Castelcicala, M. Van de Weyer, M. Isturiz, and M. Moreno
A carriage and pair, containing Baron de Pfuel, M. Fabvier, Mr. Featherstonhaugh, and Mr. Cass
A carriage and pair containing the Duke de Noailles, M. le Baron de Mortemart, M. Pasquier de Barbier, and M. Schaeffer.
Two other carriages containing Members of his late Majesty's Household

On each side of the funeral car walked each of the former *aides-de-camp* of the King as were at Claremont: on the right, the Duc de Montpensier, General Baron de Berthier, General Comte de Chabannes; on the left, General Comte d'Houdetot, General Comte Dumas, and Comte Tristan. Close with the rear of the Princes came their Excellencies M. Van de Weyer, Minister of Belgium, M. Isturiz, Minister of Spain, the Prince Castelcicala, Minister of Naples, the Marquis de Loulon, Minister of Brazil, and the Chevalier de Ribeiro, Secretary of the Portuguese Legation. On each side of the Ministers were the officers attached to the household of the Princes—Colonel Comte de Montguyon, M. Regnier, M. de Boismilon, Admiral Hernoux, M. Frogmon, M. Guérard, Comte Perrot de Chezelles, M. Mesnard, Drs. Gudrean de Mussy and Moreau, &c.

As soon as these gentlemen had taken their last homage with that of the Royal Family, the carriages were directed. The Marquis de Remigny, the Baron de Bussières, Peers of France, M. Lutteroth, formerly Master Ironmonger, the Comte de Jarnac, the Duc de Guiche, Sir Edward Cust, Mr. Seymour, Comte Victor and his sons, many persons attached to the administration of the estates of the late King, M. de Carnot, formerly Director of the Museums, M. Lefebvre Duruflé, M. Odilon Barrot de Rethel, M. Nepveu, M. Ségrétel, M. Rivet, M. Benoît Champy, the Valdeburon and Archibald Prosper, M. Marcescaux (de St. Omer), M. Lemaire, Chef de Bataillon of the National Guard of Paris, many of the most celebrated men connected with the arts in France, MM. Harry Scheffer, Ginain, Marochetti, Eugène Lamy, Gérard, Gavarni, Grenville, &c., M. Salamanca and his sons, M. Davis, M. Vanlil, and several other distinguished manufacturers and merchants habitually resident in London.

Soon after the funeral procession had passed the park, the ex-Queen, her daughters, and their attendants, left Claremont for Weybridge in three carriages and four, and by private roads they arrived at that village long before it was reached by the procession. The first carriage contained the Queen, the Duchess of Orleans, and the Duchess de Nemours. In the second carriage were the Princess de Joinville, the Duchess de Saxe-Cobourg, and the Duke de Chartres. The third carriage contained Madame la Comtesse Mollien, Madame la Marquise de Vins, Madame Angelet, Mlle Comte de Montguyon.

The Royal party went at once to the residence of Miss Taylor, and after waiting for some time in the grounds of that lady, they proceeded to the seats which had been prepared for them in the organ gallery of the chapel.

Meanwhile, the funeral procession, after passing the gates of Claremont park, was to some extent altered. The clergy, bearers, and acolytes headed the *cortège* in two mourning coaches, then came the hearse, followed by the carriages containing the invited mourners; and the rear was brought up by about a dozen private and several hired carriages. Between Esher and Weybridge, the procession was joined in different parts by many gentlemen on horseback, who fell in before the hearse, filling three abreast.

The procession moved slowly towards Weybridge along the narrow lanes overhanging with oak, chestnut, and beech trees. At Esher, the green was crowded with peasantry. Many of the small farm-houses had their windows filled with females, who received the sad procession with every demonstration of respect, many of the men remaining uncovered while the hearse passed.

The procession having reached Weybridge, the mortal remains of the King, followed by the Princes and all the attendants, were borne across Miss Taylor's garden to the chapel, and a low mass was celebrated by the Abbé Orcel. The ex-Queen and the Princesses occupied the gallery of the chapel, their Royal Highnesses the Comte de Paris and the Duc de Nemours were on the right of the coffin, the Prince de Joinville and the Duc d'Aumale on the left. Only a very small number of the attendants were able to enter the chapel. After the service was finished, the coffin was removed to the vault where it is destined to remain until Père-la-Chaise receives its guests to the family of Orleans, and again to the sons of the ex-King the mournful duty to deposit the mortal remains of their father in the tomb with the humble inscription on the sepulchral chest of Dreux, and which already contains the relics of his wife and his eldest son. The coffin was borne once more under the arches, and through the ranks of the mourners, and was accompanied to the vault by the four Princes and their aides. After the last prayers had been pronounced, the Princes once more sprinkled holy water on the coffin, and kneeling around the bier of all the attendants fervently kissed the remains of their father. They were most deeply and painfully affected, and it was not without some difficulty that they were eventually induced to quit the vault.

After the Princes had retired, the vault was closed and sealed, in presence of the Duc de Montmorency, General Comte Hulhier, General Comte Dumas, and General Comte de Chabannes, aides-de-camp of the late King.

The tomb in which the coffin is enclosed is a simple monument, covered with a large slab attached to the north end of the vault, and supported at the foot by two small columns. On the portion nearest to the wall are sculptured the arms of the ex-King, surmounted by a Royal crown, and beneath the escutcheon is engraved the following inscription:—

[illegible]

Requiescat in pace.

The Queen, the Princes, and Princesses, having performed their melancholy duty, reached Claremont, on their return, at two o'clock in the afternoon.

The arrangements for the funeral were conducted by Mr. Banting, of St. James's-street.

MUSIC.

MUSICAL EVENTS.

A miscellaneous dress concert was given in the Manchester Concert Hall on Monday night, conducted by Mr. Charles Hallé, with Mr. Seymour as leader of the band. The overtures were Mozart's "Don Juan," and Weber's "Ruler of the Spirits," with Mendelssohn's "Wedding March." The solo instrumentalist was Vieux, who was rapturously encored in his horn solos. The vocalists were Mdlle Parodi, Mdlle de Meric, Signori Gardoni and Coletti, who were encored in nearly all their pieces, the concert passing off with the greatest spirit. On Tuesday, the same singers were heard at a concert in Liverpool, and on Wednesday at Shrewsbury, with the addition of M. Vivier. The party will be heard again at Liverpool and Manchester on the 5th and 6th; and this day (Saturday) will terminate their week's tour with a morning concert at Harrowgate

The Cecilian Society, on Thursday, performed at Albion Hall, London Wall, Handel's "Joshua;" Mr. G. Perry organist, and Mr. Walker conductor.

Some of the subscribers and frequenters of the Foundling Hospital chapel complain that the musical portion of the service is no longer executed so effectively as in the times when Miss Birch, Miss Rainforth, and, latterly, Miss Louisa Pyne were the leading vocalists—the services of the professional singers having been dispensed with since Midsummer, and the boys of the establishment having been substituted.

The Grand Opera in Paris has been re-opened this week with Donizzetti's "Favorita:" *Lucrezia* by Mdlle. Alboni, a part which she has very successfully played in the French provinces and Belgium. Roger, Wartel, and Levasseur were included in the cast. Mdlle Alboni was to appear in *Rosina*, "Il Barbière," prior to her departure for Madrid. Madame Viardot was to reappear, on the 16th of October, as *Fidès;* and subsequently was to play in French, for the first time, *Ninetta*, in Halévy's "L'Juive," and *Valentine*, in Meyerbeer's "Huguenots"—characters in which she has gained glory already in the Italian and German versions. The "Enfant Prodigue" of Auber was in active preparation, and a new ballet for Carlotta Grisi. Nothing had been definitively arranged as to the opening of the Italian Opera House in Paris: Signor Ronconi has the lease, the privilege, and, what is more important the *subvention;* but it was probable he might transfer his rights to another person acting on behalf of Mr. Lumley, as only a Frenchman or a naturalized foreigner could become the director.

The accounts from Gloucester indicate that there will be a brilliant festival next week, and that the enterprise and liberality of the stewards, in securing the services of so many leading *artistes*, will be amply rewarded by full attendances to all the morning and evening performances. The meetings on Tuesday, and there will be full rehearsals in the Cathedral and Shire-hall on the preceding day. Such a combination of vocal and orchestral talent is rarely collected in the provinces. There will be balls both on the Tuesday and Friday evenings; so that, with morning concerts, the week's entertainment, the musical world and the public at large are likely to be fully gratified

Grisi, Mario, and Tamberlik slept at the Dolphin Hotel, Southampton, on Wednesday night, on their way to the Isle of Wight, where they will sojourn for a few days, after the fatigues of the season Grisi, in consequence of the state of her health, will not visit St. Petersburgh this season; but Mdlle. de Meric, Madame Corti, Lumbertini, Corelli, and Formes, the Meyerbeer's "Huguenots"—characters in which she has gained glory already in the Italian and German versions. The "Enfant Prodigue" of Auber was in active preparation, and a new ballet for Carlotta and Mr. Lanza

Six and Eight Guineas each; or, in Gold Cases, Ten, Twelve, Fourteen, and Sixteen Guineas each. The very large Stock offered for selection includes every description, enabling a customer to select that which is more particularly adapted to his own use. Each Watch is warranted.

A GOLD WATCH and fine GOLD CHAIN, complete, for Eleven Guineas, at 25 Ludgate-hill, London. The Watch is of the horizontal construction, jewelled in four holes, in the most improved action, with adjustable pendulum spring, the finest gilt dial, and capped. The chain is of the best quality, and pattern. The above elegant presents are sent with perfect security per post, upon receipt of a remittance for the amount, or a private watch by Parcels for the accurate performance of the watch, and a twelvemonth's trial allowed.

SARIL'S ARGENTINE SILVER PLATE.—This remarkable metal continues to stand unrivalled amongst all the substitutes for silver in intrinsic excellence, combined with its brilliant appearance and cheapness in competition. It is upwards of ten years since this new alloy was introduced by Sarl and Sons to the public, and the numerous testimonials in many signatures and unprompted solicitations the present demand exceeds all former precedents, thus giving a convincing proof of its having attained the highest degree of favour, and produced an assurance of the durability and appearance of solid silver at one sixth its cost. The magnificent stock has recently been much increased in splendid novelties in every form, and made for fast services, and most judicious to many circumstances as to the present time. The spoon and fork department includes a very extensive variety that are manufactured in solid silver, and orders to any extent can be immediately executed. A new and enlarged pamphlet of sketches and prices is just published, and now ready for circulation. It may be obtained gratis by applying at the manufactories.—SARL and SONS, 16, Strand, London.

DEANE'S TABLE CUTLERY has during the last hundred and fifty years, maintained a reputation for superiority and excellence unrivalled by any house in Europe. Table Knives, Spoons, and Forks Handles at prices which defy competition. Their Monument Razors, in Black and Ivory handles, remain unrivalled, and the Penknife Scissors, and Pocket Implements, are of the highest quality. Deane's Patent Ivory Handles, which do not separate with age, have been pocket compasses for many generations. Their Electro-plated Spoons, forks or Spoons, are prepared by the Ladies now, as they were by their ancestors, and every article is guaranteed of the best quality.—GEORGE and JOHN DEANE, Wholesale and Metal Cutlers, opening to the Monument, London Bridge.

METCALFE and CO.'S NEW PATTERN TOOTH-BRUSH and SMYRNA SPONGES.—The Tooth-brush searches thoroughly into the divisions, and cleanses them in the most extraordinary manner; hairs never come loose: is Peculiarly penetrating Hair-brushes, with the durable unbleached Russia bristles, which will not soften like coloured hair. Improved Cobden-brushes, that cleans easily, and is cherished on hand. An assortment Stock of genuine and carefully Smyrna Sponges, at METCALFE, E. ENGLEY and CO.'s only establishment, 130b, Oxford-street, one door from Holles-street, next to Marshall's Tooth-Powder. 2s. per box.

Also, in this Series—
Dark Scenes of History | By Dawson
Hope Leslie | Waterwitch
Light Dragoon. By Gleig | Spy. By J. F. Cooper
Lafitte. By Mackay | Sense and Sensibility
Pride and Prejudice | Jane Eyre, &c. &c.
London: GEO. ROUTLEDGE and Co., and all booksellers and newsvendors.

Just Published.
THE AUTOBIOGRAPHY of LEIGH HUNT, with Reminiscences of Friends and Contemporaries. Part I. now, post 8vo, with Three Portraits, price 7s 6d cloth.
"The Autobiography of Leigh Hunt" ought to be a valuable and interesting work. His life has been a long and varied one; he has played on the stage of literature, and on the larger stage, has seen and suffered much, and has mixed in his time familiarly with indefinite of every kind. In spite of the many faults of the work, there are chapters to be found in these volumes worthy of Mr Hunt's pen, and very delightful to read. Beautiful fragments of criticism shine here and there, and considerable humor.—Times.
"There is much worth a perusal in all that is important. Leigh Hunt

THE WARWICK RACE PLATE.—1850.

THE BRITISH ARCHÆOLOGICAL ASSOCIATION.

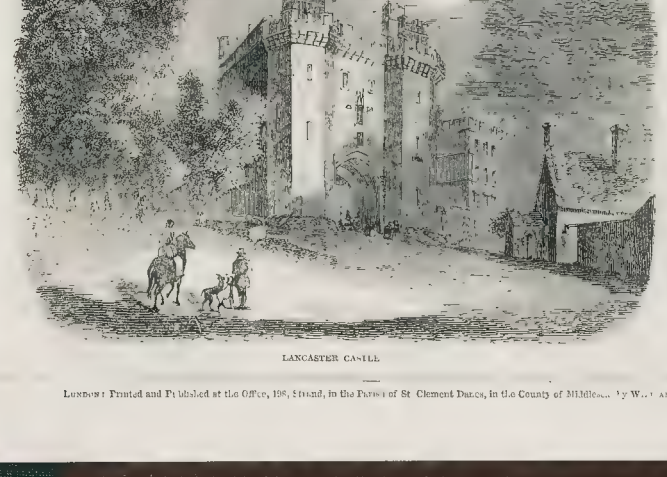
LANCASTER CASTLE.

ONE of the most interesting inspections made by the British Archæological Association, during their recent annual meeting, was the visit to Lancaster Castle, on Thursday morning, the 23rd ult., when, with Captain and Mr. Hansbrow as *cicerони*, they examine. different portions of the fine old fortress.

Lancaster lies on the south bank of the river Loyne, or Lune, not far rom its mouth. Dr. J. Johnson, in a pape read to the Association, derived "the name of Lancaster, or Loncaster, anciently, from the same name as Luna in Italy, London, Bonlogne, Cephalonia, *Vitulonia*, &c. In going over the well-trod path of its Roman antiquities, an inscripti was adduced, in corrupt Latin, recording the re-building of the bath and basilica, which had fallen down through old age; as the Romans did not build by contract, this would indicate a long possession, corroborated also by the dates on coins. The name of Sabinus on the stone occurs in an altar to Mars found near a mound two miles above Lancaster, and also an inscription referring to the Notitia; also Longovica is stated to be garrisoned by a numerus Longovicarii, and the words Deo IALONO are in evident allusion to the name of the place or river; the frequent turning up of altars, statues, &c., in the neighbouring country would agree with the probable early occupation of the land by the Roman soldiers."

From these antiquities, and from the termination the name, "caster," the the town is believed to have been a Roman station. Camden will have it to be the Longovicus of the Notitia, and others the Ad Asanam of Richard of Cirencester. The Castle is supposed to have been erected in the year 306, by Constantius Chlorus, who, on the division of the Roman empire, in 304, was appointed to govern the western part of it, and died at York in 306. The town is supposed to have been dismantled by the Picts after the departure of the Romans, but restored by the Anglo-Saxons of Northumbria, under whom it first gave name to the shire. The Castle was enlarged, and the town, which had previously received a charter from King John, was favoured with additional privileges in the reign of Edward III., who conferred the Duchy of Lancaster on his son, John of Ghent, or Gaunt, in whose favour the county was made a palatine county. The town suffered severely in the Wars of the Roses, and was again the scene of contest in the civil wars of Charles I.

Lancaster stands on the slope of an eminence, the summit of which is crowned by the towers of the Castle; it is spacious, and comprehends a large courtyard, some smaller yards, and several differently shaped towers: it has been fitted up, at a great expense, as a county goal and court-house. The large square keep is very ancient, and prodigiously strong. The gateway, defended by two semi-octangular projecting towers, is attributed to John of Gaunt, and this was the first part examined by the Archæologists in their recent visit. They then ascended the Well-tower, the oldest portion of the whole pile, with the exception of Adrian's Tower: the other parts of the Castle are much more modern. After surveying the prospect from John o'Gaunt's Tower, the Association visited the courts, and inspected a number of curiosities collected in the Grand Jury-room.



LANCASTER CASTLE.

The party then left, and were conveyed by railway to Hornby. On arriving here, a few of the visitors took their way to the tumuli in the vicinity of the village, but the greater portion of the party set out for the Castle, where they received a most courteous welcome from Rudsey Dawson, Esq., and accompanied by him entered his splendid mansion. The oldest part of this Castle is dated at a few years after the Conquest. This part of the country was granted to Roger de Poictou, by whom this portion was given to one of his retainers. The Castle was commenced by him, it is said, on the remains of a Danish hold. It has been judiciously re-fronted by Mr. C. Sharpe.

Mr. Dawson exhibited to his antiquarian guests the interesting relics which were given to his ancestor, Sir Ralph Pudsey, of Bolton Castle, by Henry VI., who remained here for several weeks after the fatal battle of Hexham: they consist of the king's spoon, gloves, and riding-boots. Among Mr. Dawson's original letters is the following letter from Oliver Cromwell to the Mayor and Corporation of Doncaster, the Mayor being an ancestor of Mr. Dawson's:—

Gentlemen,—I intend (God willing) too be at Dowsash with ye arm on Wednesday night or Thursday morning: and forasmuch as the soldiers will need a supply of victuals I desire you to give notice to the countrey and to use yor best endeavours to raise bread, butter, cheese, and flesh to be brought in and to be in readiness there against ye morning, for w'ch the country shall receive ready money; not doubting of y'r care herein, I rest

Y'r very loving friend,

Ripon, 18th of August, 1651. O. CROMWELL.

Among the proceedings of the Association at Lancaster, was a paper, read by Mr. Planché, on the "Badges of the House of Lancaster," in which he traced the traditions of the Roses, both red and white, in an interesting manner. The mother of Edward I. was Eleanore', Provence, and he was strongly inclined to believe that we were indebted to that land of chivalry and song, not only for the *odoriferous roses centifolia* which perfumed our gardens, but also for the floral emblem of the House of Lancaster. The assumption of the red rose as a principal badge of the whole line would have been naturally influenced by the display of the white rose of York; and the face of the livery colours of the Plantagenets being white and red, would render the opposing hues of the rival flowers most singularly applicable to the divisions of the family. He accounted for the famous Temple Garden scene in Shakspeare as being possibly true in authentic history, upon the ground of existing distinctions: and concluded with a pleasant excuse for the length of his remarks—that he had probably said too much under the rose.

We quote the latter from the report in the *Literary Gazette*, whose Editor notes:—"At Hornby, we seized an opportunity to pay our respects to the venerable historian, Dr. Lingard, whose house is just opposite the Church; and found him, though crippled with rheumatism, in tolerable health and enjoyment of his faculties at the age of 79!"

WARWICK RACES.

THE Warwick Meeting commenced on Tuesday, with a promising list of fourteen events for two days. Annexed are the results:—

TUESDAY.

The FOAL STAKES of 10 sovs each, with 25 added.—Mr. B. Austin's Miss Judy Macan (Marson), 1. Mr. E. R. Clark's The Old Commodore (Dockeray), 2.

The RACING (SELLING) STAKES of 5 sovs each, and 25 added.—Mr. Edward's Hind of the Forest (Nat), 1. Mr. Wadlow nd Blister (W. Sharpe), 2.

The CASTLE PARK STAKES of 10 sovs each, and 50 added.—Mr. Halford's Prime Minister (Marlow), 1. Mr. Payne's Catalpa (Nat), 2.

The LEAMINGTON STAKES of 25 sovs each, with 100 added.—Mr. Meeson's Doubt (W. Sharpe), 1. Mr. Drinkald's The Juggler (Rodney), 2.

The CORINTHIAN STAKES of 10 sovs each.—Lord Strathmore's Magician (Capt. Little), 1. Mr. Beville's nd. Goodwood (Mr. Beville), 2.

The QUEEN'S PLATE of 100 guineas.—(HEATS.)—Lord Exeter's Little Jack (Nat), 1. Mr. Merry's First-rate, 2.

WEDNESDAY.

The GREAT WARWICKSHIRE STAKES of 10 sovs each, and 50 added.—Mr. G. Hawkes's Milcote walked over.

The TOWN PLATE of 50 sovs, added to a handicap of 10 sovs each.—Mr. Carew's Agis (Capt. Little), 1. Mr. Waller's Captain Parry (Davenport), 2.

The COUNTY STAKES of 20 sovs each, with 100 added.—Lord John Scott's Turnus (Lye), 1. Lord Exeter's Little Jack (Harlock), 2.

The AVON STAKES of 15 sovs each.—Mr. Halford's Harriott (Whitehouse), 1. Lord Exeter's Turtle (J. Mann), 2.

The BOROUGH HANDICAP of 10 sovs each, and 50 added.—Lord Exeter's Little Jack (Nat), 1. Mr. Fowler's Jack Briggs (Whitehouse), 2.

The GOLD CUP of 200 sovs, with 100 added.—Lord Leigh nd. Priestess (Lye), 1; Mr. Clarke's Made Safe (Hiett), 2.

The SCURRY HANDICAP of 3 sovs each, and 20 added.—Lord Cardross's Scarborough (Dockeray), 1. Mr. Wagstaff's b m by Sandiford (Evans), 2.

The SELLING STAKES of 5 sovs each, and 25 added, were won in two heats by Lord John Scott's Defaulter.

THE WARWICK PLATE—1850.

THIS magnificent prize has been executed by Messrs. Elkington, Mason, and Co., London and Birmingham, after a design by the Chevalier Schlick. It consists of a massive piece of plate in the Grecian style, designed for a Rose-water Dish. The border is composed of a frieze of elaborate scroll-work laid on a plate of gold, in the centre of which, at the base, is attached a piece of ornament formed of foliage, and enclosing the inscription plate, which is supported by two demi-horses, emblematic of the race; at the top, two figures support a shield, on which is emblazoned the arms of the borough of Warwick.

The group in the centre of the dish is from an antique painting restored from the ruins of Pompeii, and mentioned by Bernardo Quarante, in the "Museo Borbonico," as a work of rare excellence.

The Relievo represents Venus davigating the sea, seated on the back of a triton or sea-god; one of her feet is slightly immersed in the water. As the Queen of the gods, she holds in her hand a golden sceptre: she is attended by three love-gods, Eros, immeros, and Pothos; two of these are supporting a part of her mantle as a sail, into which two god-winds are blowing from the clouds: the third cupid is seated on the extremity of the triton's tail, preserving his equilibrium in this perilous and difficult position by the aid of his expanded wings, while he accompanies with the double flute the song of the Ictiocentaur and the sound of his lyre

The size of the salver is twenty-six inches diameter; weight, 340 ounces; value, £200.

LINCOLN RACES.—THURSDAY.

The REVIVAL STAKES.—Hippogriff, 1. Palais Royal, 2.

The LINCOLNSHIRE HANDICAP.—Haricot, 1. Gladiole, 2

The HUNTERS' STAKES.—Smuggler Bill, 1. Squire of Malton 2.

NATIONAL SPORTS.

The absurdity of not taking advantage of the open days in the early part of the season, is made evident enough by the appearance of the calendar for the ensuing week, the fixtures embracing no less than a dozen meetings, and falling at a time when every racing-man's thoughts are on the great event of the following week—the St. Leger. Fortunately, the places of sport are not of much eminence, so that the public will not lose by being away. The engagements stand thus:—Tuesday: Lichfield, Radcliffe, Werneth Low, and Cheadle. Wednesday: Marlborough and Bromley. Thursday. Leicester, Hoylake (Liverpool), Totness, Lynn. Friday: Ashington and Dover.

CRICKET FIXTURES.—*Monday*, an All England Match, at Bradford; *Tuesday*, Return match, at Eyton: *Thursday*, an All England Match, at Langton Wolds.

The water "frolics" will not be of a character to attract the public: the season is near its termination.

TATTERSALL'S.

THURSDAY.—A thin attendance, and only business enough transacted to admit of the following brief quotations:—

YORKSHIRE HANDICAP.

9 to 2 agst Strongbow	6 to 1 agst The Castle	12 to 1 agst Clothworker
to 1 — Mark Tapley	8 to 1 — Post Tempora (t)	12 to 1 — Urio (t)

ST. LEGER.

Even on Voltigeur	20 to 1 agst Cruiskeen colt	30 to 1 agst Mildew
2 to 1 agst Flatfoot	20 to 1 — Lanercost	33 to 1 — Marchioness d'Eu
to 1 — Rose-hamber	20 to 1 — Usage Sec	100 to 1 — Cimcher

CESAREWITCH.—50 to 1 each agst Clothworker, Fanny Khan, and Calmar (t)

CAMBRIDGESHIRE.—33 to 1 agst Urio (t)

DERBY.—16 to 1 agst Prime Minister (t). 50 to 1 agst Oleander (t).

MATCH AGAINST TIME.—A pedestrian has commenced the task of walking 1000 miles in 1000 successive hours. The feat, which will occupy six weeks within a few hours, is undertaken for a wager of £200, the stakeholder being a highly-respectable gentleman on the other side of the water. The ground selected is a field near the Tranmere Hotel, where a suitable covering has been erected. The pedestrian will walk a mile at the close of the first hour, and another at the commencement of the second hour, thus securing for himself an hour and a half's rest between every walk of two hours.

PROPOSED SUPPRESSION OF DONCASTER RACES.—A meeting of unusually righteous people was held, on Tuesday last, at Doncaster, for the purpose of taking measures for the suppression of the well-known and world-famous races of Doncaster. These meetings are held to be demoralising and degrading to humanity by the pious gentlemen who promoted the objects of the meeting; but the people, by the use of yells, hootings, cat-calls, and discordant sounds of all kinds, clearly showed that their opinion as well as interest lay in an opposite direction. The whole affair was a dead failure.

THE ILLUSTRATED LONDON NEWS.

SUPPLEMENT.

VOL. XVII.] SATURDAY, SEPTEMBER 7, 1850. [GRATIS.

THE PEACE CONGRESS AT FRANKFORT.

THE proceedings of the Third General Peace Congress were opened on Thursday, the 22nd ult., at Frankfort-on-the-Maine, in St. Paul's Church, the building made memorable by the recent meetings of the Frankfort Parliament. It is a handsome circular building, with a gallery supported by marble columns, and was fitted up in its present state for the German Parliament. Behind the President's chair was a large shield blazoned with the German eagle, whilst above the crimson drapery on which this heraldic decoration rested were three flags, each black, crimson, and gold, the staves surrounded by triumphal wreaths. The aspect of the interior of St. Paul's Church on the 22nd attracted, however, much less attention than did one of its visitors, when it was whispered round the place that General Haynau was present. He sat for some time near one of the side doors, listening apparently, with much attention, but left before the termination of the proceedings. The seats lately occupied by the members of the Frankfort Parliament were, on the present occasion, filled by a numerous company, made up of Germans, Englishmen, Americans, Frenchmen, and Belgians. The seat put up for the Archduke John, and subsequently occupied by M. Gagern, was now filled by the President (for this year) of the Peace Congress, Herr Jaup, late Minister of Hesse-Darmstadt. There were about 650 English present out of a total audience of 2000.

Amongst the delegates to the meeting were R. Cobden, Esq., M.P.; Charles Hindley, Esq., M.P.; J. B. Smith, Esq., M.P.; Lawrence Heyworth, Esq., M.P.; Dr. Lee, F.R.S. (of Hartwell); Rev. J. Burnett, A.M., and H. Richards; Elihu Burritt, Joseph Sturge, [illegible] (of Leeds), Dr. Dick, and others, from England. The list of American deputies included—Massachusetts, Rev. Mark Trafton; Boston, Rev. Dr. Hitchcock, Rev. Mr. Sargent, John Tappan, Esq.; Maine, Rev. David Thurston; Rhode Island, Rev. Dr. Hall; New Hampshire, Hon. John Prentiss; Connecticut, Rev. G. W. Pennington; New York, C. Williams, Henry Garnett, Pennsylvania, Professor C. D. Cleveland, Samuel Sartain; Kentucky, W. H. G. Butler, Patrick Joyes; Missouri, Rev. Dr. Bullard, — Scott; Illinois, T. Eastman; Indiana, A. R. Forsyth; Michigan, W. H. B. Dowling; American Peace Society, L. S. Jacoby. An ex-Indian chief, Ke-ge-gah Bouch, now described as the Rev. George Copway, also attended, in a somewhat remarkable costume. From France the following gentlemen attended:—M.M. Cormenin, *ancien député*, member of the French Council of State; Emile de Girardin, Editor of *La Presse*; Joseph Garnier, Professor of Political Economy; Guillaumin, Editor of the *Economiste*; Cognerel, fils; Lavan, Frerot, Pottier, &c. From Brussels: M. Visschers, M. Depetiaux, Inspector-General of Prisons; M. Jaup. Germany contributed delegates from Darmstadt, Leipsic, Wiesbaden, Mainz, Homburg, Bonn, Giessen, Frankfort, and other places.

The Congress sat three days—there being a morning and evening sitting each day.

FIRST DAY (THURSDAY).

The centre of St. Paul's Church was appropriated to the members of the foreign delegation and to the German members of the Congress; the galleries, both on the ground-floor and above, being devoted to the accommodation of the visitors, among whom were a large number of ladies.

The business of the Congress commenced each day at ten o'clock, A.M. The first resolution submitted to the Congress was to the following effect:—

1. The Congress of the Friends of Universal Peace, assembled at Frankfort-on-the-Maine, on the 22nd, 23rd, and 24th of August, 1850, acknowledges that recourse to arms being condemned by [illegible] and humanity, it is the duty of all men to adopt measures to call [illegible] Congress recommends all its members to labour in their respective countries by means of a better education of youth, by the pulpit, the platform, and the press, as well as by other practical methods, to eradicate those hereditary hatreds and political and commercial prejudices which have been so generally the cause of disastrous wars.

D. JAUP, PRESIDENT OF THE PEACE CONGRESS.—1850.

The following members of the Congress spoke in support of this resolution, which was carried by the unanimous vote of the assembly:—The Rev. John Burnet, Le Pasteur, Bonnet, of Paris; M. de Cormenin, of Paris; H. J. Garnet, of New York (whose appearance, he being of pure negro blood, excited considerable sensation and interest); M. Emile de Girardin, of Paris.

The second resolution, which was as follows, was presented in a speech of great power by M. Visschers, of Brussels:—

This Congress is of opinion that one of the most effectual means of preserving peace would be for Governments to refer to arbitration all those differences between them which cannot otherwise be amicably adjusted.

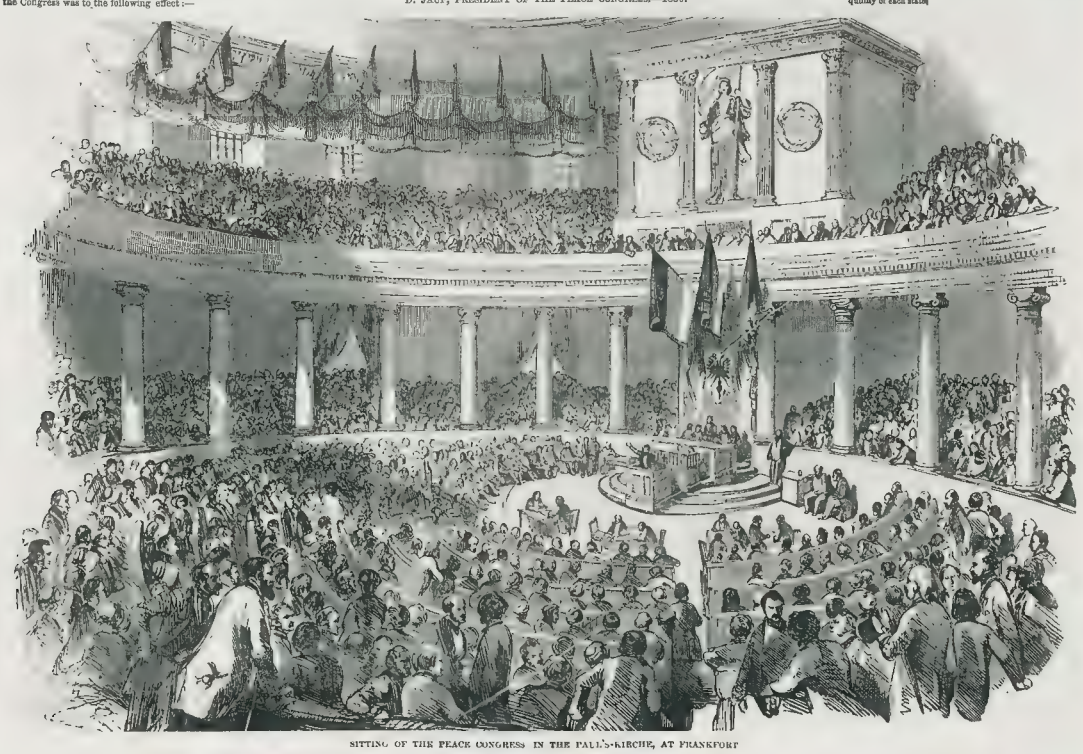
This was supported by M. Bach, of Darmstadt; M. Mourch, of Frankfort; M. Emile de Girardin (this gentleman rising to reply to some difficulties which had been suggested in the practical application of arbitration); Professor Cleveland, of the United States; and Richard Cobden, M.P.

Mr. Cobden said it was not his intention to have spoken that day, but he must say a word or two on the supposed difficulties of arbitration. No doubt there were difficulties—but were there not difficulties in war, too? and what he wished to put before the diplomatists of Europe and America was, which of these difficulties will you choose—war or arbitration? One of them it must be; for you confess that neither your diplomacy nor your mediation enable you to settle your quarrels—generally about some point of etiquette, or some trumpery debt of a few thousands of pounds. What he wanted was, that if ever the people of England or America saw their Governments again involved in a quarrel with some weaker power, whether on the shores of Portugal or Greece, and refusing the offer made by such a power to settle the dispute by arbitration, but resorting to the sword to enforce their demands, then he did hope that the people would drive such governments from power, and supply their places with men who would dispose of the question in a more workmanlike manner. Mr. Cobden alluded to the progress which the peace cause had made during the past year, and said that two remarkable illustrations of this progress had occurred in the last peace meeting which he had attended in London, and in the meeting which he was then addressing at Frankfort. At the meeting in London he sat side by side with General Klapka, the general who had unsuccessfully fought the battles of liberty in Hungary. At the meeting of this present Congress at Frankfort, no less a person than General Haynau had for some time occupied a place among the visitors (General Haynau had left the Hall before Mr. Cobden rose to speak); he (Mr. Cobden) thought it very significant, when they found at their meetings such men as the military leaders both of liberty and despotism. It incited in these men's minds something like the dawn of a suspicion that their own profession was not of the most stable and satisfactory character. (Cheers.)

SECOND DAY (FRIDAY).

Charles Hindley, Esq., proposed the third resolution:

That the standing armaments with which the governments of Europe menace one another impose unbearable burdens and inflict grievous moral and social evils upon their respective communities; this Congress cannot therefore too earnestly call the attention of governments to the necessity of entering upon a system of international disarmament, without prejudice to such measures as may be considered necessary for the maintenance of the security of the citizens and the internal tranquility of each state.



SITTING OF THE PEACE CONGRESS IN THE PAUL'S-KIRCHE, AT FRANKFORT.

The hon. gentleman brought forward a vast body of statistics, with a view to show that war had always contributed to national ruin, for which reason it was necessary to abolish the existing standing armies, the prime cause of war. He expressed the belief that the time would arrive at which national hatred would cease, and all men be brethren. He was loudly applauded.

The Rabbi Stern, of Frankfort, said that war ought not to be admitted, even in self-defence, as the limit at which self-defence began would be difficult to define. Instead, he remarked, of making weapons of war, let men be employed in cultivating land, and if Europe were not large enough, there was America. Let the governments of Europe, instead of dividing men by the sword, employ them in making railways.

M. Joseph Garnier showed that permanent armies render unproductive a great part of the force of man, and that consequently armies diminish the wellbeing of societies. He showed also that the governments, by standing armies, are obliged to crush the people by taxation.

The Rev. Mr. Buller, of the state of Missouri, dwelt on the fact that the United States had no permanent army, though they were larger than any European state.

M Emile de Girardin next spoke. He remarked that the immense sums which armies had cost would have enabled great works of peace to be undertaken, and all social problems to be solved. He cited the revolution of February, he had, he said, cried "Disarm, disarm! Have confidence in the justice of our cause, and in the sentiments of all the nations of Europe!" But he had not been listened to, and had been accused of treason. Well, two armies had been sent to the Rhine and the Alps, and what glory had Frenchmen gained? They had given themselves two enemies—misery and hunger, and had lighted up war in their streets.

Mr. Cobden said that standing armies were more dangerous in peace than in war. War was a state of madness and passion for which some excuse might be made, but a standing armament was a permanent injustice.

The third resolution was then adopted.

The fourth resolution was then brought forward. It was as follows:—

This Congress reiterates its strong disapprobation of all foreign loans negotiated for the purpose of furnishing to one people the means of slaughtering another.

M. Druckem, of Amsterdam, considered that the participation among the different nations of 25 milliards of paper money was a powerful guarantee for peace.

M. E. de Girardin said that certain democrats regarded war as the only means of reconquering their lost liberties, but the money he thought might be employed in more useful purposes. War could not be carried on without money, and therefore if loans were refused it could not take place; he should consequently support the resolution.

M. Z. de Stettin remarked that a general customs union between all nations of the world would be the best guarantee against war.

The fourth resolution was then carried, and the second day's sitting closed.

THIRD AND LAST DAY (SATURDAY).

Notwithstanding the inclemency of the weather, the meeting of the Congress was well attended. Some excitement was produced by the appearance of the Rev. Mr. Copway, formerly a native Indian chief, who was present at great length and with much energy on the immorality and irreligion of war. The preceding speakers had been limited in their observations to speeches of twenty minutes each; but, in consequence of the peculiar circumstances of the case, he was allowed to address the meeting for forty minutes. The speech of this person was received with much enthusiasm. He proposed the fifth resolution, viz

This Congress acknowledging the principle of non-intervention, recognises it to be the sole right of every state to regulate its own affairs.

He was followed by two German gentlemen, Dr. Nell and Dr. Bodenstedt. The latter speaker urged the Congress to undertake the settlement of the Schleswig-Holstein question. The proposition did not apparently meet with a very cordial reception.

The Chairman suggested that the introduction of this subject would involve a breach of their rules, which prohibited the discussion of any existing political question.

Mr. Cobden also observed, that it would be impossible for the Congress then to go on with the subject, as neither party appeared to be duly represented at the meeting.

The resolution was adopted.

The next resolution (the sixth) was as follows:—

This Congress recommends all the friends of peace to prepare public opinion in their respective countries for the convocation of the representatives of the various states, with the view to the formation of a code of international law.

Mr. E. Miall repudiated the notion that there was anything visionary or Utopian in the peace movement, and made a strong protest against what are called "practical men."

Elihu Burrit entered into a history of the progress of the peace theory, which he maintained owed its origin to France and Germany, and not to America.

Mr. Chipple, of New York, astonished the assembly by a burst of Yankee eloquence, and the novel colouring which he gave to rather old materials.

The resolution was carried, together with an additional one against duelling. On the latter, M. Corrards spoke. A vote of thanks to the municipal authorities of Frankfort followed, in honour of whom Mr. Cobden led an English "Hip, hip, hurrah," to the intense astonishment of the Germans.

It was then resolved that the proceedings should be printed and circulated at a small charge, and a vote of thanks to Dr. Jaup having been passed, the proceedings were declared at an end.

The Congress, it was announced, would be held in London next year.

FISHING EXCURSIONS UP THE THAMES.

EXCURSION II.—TEDDINGTON TO SUNBURY.

OUR next Excursion will be up as far as Sunbury, making Hampton Court our head-quarters. Some of the finest barbel in the river are caught just above Teddington Lock, and there is good fishing thence all the way up to Kingston. Here the Jolly Anglers will afford tolerable refreshment to those who require it on their way. But let us not loiter long over our "tiffin," but proceed towards Thames Ditton, one of the most beautiful, secluded, tempting little spots on the whole length of the river. In fact, all the way from Kingston to Hampton Court the scenery is exquisite; pictures of a modest pastoral character, suggestive of countless "cabinet" studies of that peculiar class for which the school of English landscape painting stands unrivalled. Buried amongst the trees is the snug little "Swan," long a favourite resort of anglers; and a little lower down is the "Crown and Anchor," still more modest in its pretensions, and they say somewhat more moderate in charges. Higher up, at Hampton Bridge, Middlesex side, you will find "the Mitre," opening its hospitable doors to receive you, and on the opposite side "the Castle," both flourishing houses.

The worthy host of the former, by the way, is a true sportsman himself, enthusiastic, indefatigable, and upon the whole fairly successful. He aspires after the highest class of game, and a few days since a fine wager ago was rewarded by catching a fine trout, weighing eleven pounds and upwards, under circumstances of no little difficulty. It happened to be one of the days of the Hampton Races, when all the "surfeiters" were down from London to witness their favourite sport. So, also, our host of the "Mitre," untempted by the Judge's noisy bell, betook him to *his* favourite sport on the banks of the calm stream. After "setting" patiently for an hour or two, a fine trout—and such such a fish!—rose, rod, fisher and all, and made for the deep water. Full three-quarters of an hour did he play with the monster before he could think of attempting to land him. At length the critical moment came, but it so happened that by this time a considerable crowd of miscellaneous persons, from the racecourse had collected round our hero of the rod, staring open-mouthed at his wonderful manœuvres; and at length some of them volunteered their *services* and, and, in spite of all remonstrance, seized hold of the line to help to drag in the fish. Imagine the angler's vexation, his wrath—it was a miracle he ever got his fish landed at all, amongst such barbarians; and, as it was, an honest boatman who happened to be at hand to the rescue of the fish, just in the nick of time, and lifted the fish out in his arms instead of a landing-net; and he was then marched off in triumphal procession to the "Mitre," where he became the admiration of many beholders, and is the talk of the town to this day. When at Hampton Court on the day, I heard of several other good-sized trout which had been caught in those parts in the course of this summer; some half-dozen, at least, weighing from three to six or eight pounds, fairly attested, to say nothing of others unrecorded. Not all these were caught in the "Tumbling Bay," a little above the bridge—a spot which, in the memory of many old fishermen, used to divide the honours with Sunbury for the noble fish. The Thames, in former days, used to be celebrated for its trout, which, hardly an exception the largest and finest in England; but of late good things they have lately become so extremely scarce as to be seldom fished for, except by an occasional devotee, who wrestles for sport, not to fill the weight of his basket, but rather more by his disappointments than his triumphs. The angler Thames appears to be in a transition state; for, not only at Hampton, but at Teddington and Sunbury there have been a very fair number of good trout taken in the course of the present year. In like manner, it should be added, that all other fish appears to be on the increase, from Richmond upwards, and this is mainly owing to the exertions and watchful care of the Thames Angling Protection Society, there can be no reasonable doubt, any more than that, for this service, they have become entitled to the thanks and support of the fishing world.

Trout fishing is now over, and pike fishing is hardly begun; but when the weeds begin to grow, the latter may be caught at various spots all the way up, from Thames Ditton to Hemlow. There is a favourite spot at Moulsey, extending from below the Ait towards the Surrey shore, where some young jack have already been caught this year, and where, in a month or six weeks, some and a very bold biting fish," in the words of old Izaak Walton—will now begin to be in fine condition, and may be found all the way from Ditton upwards. You may fish for him either with a worm (No. 7 hook), or with a minnow or small gudgeon. If the former be used, you should fish within an inch of the bottom; if the latter, about mid-water. With the perch a little more delicacy of handling is required than with the barbel: the latter should be done the moment he bites, the perch, on the contrary, is very tender in the mouth, and, after he has taken your bait, will require a little time to gorge it comfortably, before he will be prepared to accompany it on shore. The perch, unlike the solitary pike, go about in shoals; and, quoth old Walton, himself citing some older authority, "if there be twenty or forty in a hole, they may be, at one standing, all catched, one after another; they being like the wicked world, not afraid, though their fellows and companions perish in their sight."

With regard to barbel-fishing, which was the greatest feat of our first day's "excursion," a diversity of opinions exists about the character of the sport it affords. Walton says: "the barbel affords the angler choice of sport, being a lusty and a cunning fish—so lusty and cunning as to endanger the breaking of the angler's line, by running his head forcibly towards any covert, or hole or bank, and by that means to get his sharp back fin off with the soil, as is observed by Plutarch in his book 'De Industria Animalium;' and also so cunning, to nibble and suck off your worm close to the hook, and yet avoid letting the hook come into his mouth—all which the young hand had better be aware of. On the other hand, Sir John Hawkins, in his notes to Walton, says, "Fishing for barbel is, at best, but a dull recreation." Who shall decide when doctors disagree? It may certainly be observed, that barbel-fishing, though lusty and a cunning fish—so lusty and cunning as to endanger the breaking of the angler's line, by running his head forcibly towards any covert, or hole or bank, and by that means to get his sharp back fin off with the soil, as is observed by Plutarch in his book 'De Industria Animalium;' and also so cunning, to nibble and suck off your worm close to the hook, and yet avoid letting the hook come into his mouth"—all which the young hand had better be aware of. On the other hand, Sir John Hawkins, in his notes to Walton, says, "Fishing for barbel is, at best, but a dull recreation." Who shall decide when doctors disagree? It may certainly be observed, that barbel-fishing, though affording some amusement when it comes to the struggle with the newly hooked fish, does not require that exercise of science, skill, observation, and patience which are brought into play when fishing for pike or trout. The Thames anglers, even of the present day, are very expert in dealing with this boisterous customer. They fish with very fine tackle; and there are well-authenticated cases of their catching barbel of upwards of nine pounds, and three pounds and a half in weight, with a single hair.

And now a few words to the tyro whom the other day I put into the hands of one of the professionals of the river, for the purpose of learning the a B C routine of his art. I suppose he began with him several times since then; caught "no end" of gudgeon, roach, and barbel, smoked "no end" of cigars; drunk "no end" of ale or cold-without—for the Thames fisherman is a "dry" fellow, and has a peculiar knack of cold-without—for the Thames fisherman is a "dry" fellow, and has a peculiar knack of cold-without—for the Thames fisherman is a "dry" fellow, and has published in the Blue Book of the Board of Health) that the Thames water is "unwholesome," particularly when drunk neat. I suppose he has grown tired of the long stories which his instructor will have to tell him, all about the wonderful achievements of sundry "gents," pupils of his own, and their wonderful gratitude in the shape of half-crowns. I will suppose that, while he has begun to acquire a taste for the line, he has grown a little tired, perhaps somewhat disgusted, at the coarse companionship for the sake of Cockney sportsmanship, and aspires to set up in business for himself. Let him not discourage the idea; but, on the contrary, selling his rod, his basket, and his tackle, proceed at once and alone along the river's edge for anything and everything. He will be no means disappointed if, after trying many a promising bay or hole, he has no better sport to boast of the whole day than was recorded by Dr. Franklin of a friend, who, in reply to his inquiry, "What sport?" he had had after a day's fishing in one spot, replied "Very good;" and then, upon being pressed by the Doctor as to how many fish he had caught, replied, sore abashed or disheartened, "None at all; but above a hundred in the day I have caught before now!"

To the true angler, the pleasure of a day's fishing is made up of a thousand and one little incidents and reflections, in which the mere catching and carrying home of fish forms but an unconsiderable item. The cool crisp air of the morning, fresh from the sea-bathed hill-side, and as yet but faintly perfumed with the odour of a thousand flowers; the gorgeous sun just emerging from behind that distant clump of trees, whilst the overhanging boughs beneath which you wend your way along the margin of the stream, still protect you from the fierceness of its rays; the hum of a hundred insects blending with the steady ripple of the water which has flowed on, and rippled, and gurgled in the same fashion and mood any summer's day this hundred years. The solemn silence thus made audible (if I may be allowed to paraphrase a poetic figure, which has not itself escaped criticism), and which is broken occasionally by the sudden splash of fish eager to fill his breakfast than his comrades. These are a few amongst the natural features and circumstances which impress the chosen fishing spot with a peculiar charm, and send the father's mind to rest in pleasant reflection and pleasant reminiscence through the idlest day; and, when he happens to have "a glorious nibble," it is an incident of notable excitement; if he catch a fish, it is an event which serves to mark an era in the day's slow progress

That an angler's estimation of "a favourite spot" does not depend upon the number of fish he may take in it, is a fact amusingly illustrated in an anecdote quoted by Mr. Ronnie, in his notes appended to Hawkins's edition of Walton and Cotton's "Complete Angler:"

"The River Lea angler," says Daniel, "being daily seen at one particular spot, a brother angler conceived it must be the resort of abundance of fish, and the next morning, began his operations. The usual attempts in the neighbourhood of the place arrived some hours after and threw in his line. A long silence ensued, when the first comer remarked that he was out of luck in not having caught any fish in this favourite hole. 'What!' replied the newly arrived, 'is it with you, from the constant attention I have seen you pay to it?' 'Sir,' replies the gentleman, 'I confess long custom has rendered me extremely partial to the spot; but, as for the fish, I assure you that *here* I have angled for *forty years*, and never had a *bite yet*.'"

Don't let the experience of this remarkable individual alarm the reader; it is merely referred to as an extreme case, to show the tone of mind in which no old sportsman pursues his art. Let him but love it, and he is sure to love it. A shrewd suspicion, indeed, may cross the imagination of the sceptic, that "the River Lea angler," the hero of the story, did not deal quite candidly by the intruder whom he found pursuing his favourite art on the favourite spot. But I will not count he gave of it was not likely to encourage the unwelcome visitor to "call again to-morrow."

If anything that has been said above induce the reader to try a day's fishing along the shady bank of a snug, quiet stream, in preference to the coarse carnage of a punt "battue," with its battle array of rods, he may do so now,

By the soft winding of the silent Mole,

a little river, which empties its slow stream into the Thames opposite Hampton Court. Pursuing the devious course of the Mole (interrupted occasionally by private grounds, through which it runs), he will find a delightful, rural, and picturesque—upon a miniature scale its true—and meet with good spoil in the shape of roach, dace, and gudgeon, with an occasional trout and pike, in their respective seasons. Indeed, the trout are tolerably abundant in this river, particularly at Leatherhead, where, if he be fatigued, hungry, or sleepy, he will find good accommodation at Leatherhead, Mickleham, or Dorking, or if he prefer the quietness of a farm-house to the bustle of a village inn, he will meet with many in the neighbourhood of the river's course, where he may be lodged and boarded by the day, or week, or year, and have the fish of his own catching for breakfast if he like.

This seems to be the proper place to say a few words about the various "fishing-houses" or inns, established in a great measure expressly for the entertainment of fishermen at the various stations along the river. In the good old times of coaching—"those were merry times, when merry men congregated at the inns"—the angler frequently going down for his day or two—his Saturday to Monday, at least—by which means he had an opportunity of commencing his sport at sunrise, and ending it at sunset—those houses were, of course, in a flourishing state. It seems that the railroads have destroyed, or at least injured the traffic of the inns here, as elsewhere. The cockney angler takes his run down in the morning and back at night, never pursuing his foot wanderings in the neighbourhood of the railway stations. With very false principle of economy, the keepers of these hostelries, instead of accommodating themselves to the times, and endeavouring to attract customers by the goodness of their cheer and the moderation of their charges, do nothing to every unhappy wayfarer who confides himself to their tender mercies, by charging high prices for very inferior accommodation, being not over civil to boot, and when remonstrated with, quite ready to quarrel with the audacious as their excuse, plainly averring that they make those who come, pay for those who keep away. This is bad policy, to say the least of it; and reminds one of the story of Mahomet, who, finding the Jews and Christians up to a very pious purpose, came forward and burst out into a volley of abuse of those who were present, some half-dozen or so, whom he denounced as "a shabby, mean, ragamuffin lot," and sent them away—returning, however, their money. O.

GLASTONBURY ABBEY

(To the Editor of the ILLUSTRATED LONDON NEWS.)

SIR,—I have read with interest the notice of Glastonbury Abbey, given in the ILLUSTRATED LONDON NEWS for August 10; and having myself recently visited those venerable ruins, I am induced to take the liberty of troubling you with a few remarks on their probable age.

Your Correspondent is quite correct in stating that St. Joseph's Chapel is ascribed to Abbot Herlewin (1102-1130); but I submit that there is no sufficient evidence of its being his work. On the contrary, it appears that the whole of the Church, and most of the buildings of the Abbey, were destroyed by fire in 1184, and that the rebuilding of them was not completed until the year 1459. The density of this circumstance, the style of the architecture of St. Joseph's Chapel would show it to belong to the period of transition from Anglo-Norman to Early English, and to be a part of the twelfth century; and to this date it is referred by Mr. Rickman, the author and the author of the "Glossary of Architecture" (Oxford, 1845), both of whom are high authorities. I presume that a much later date cannot be assigned to the [illegible] remarks of Mr. Rickman, who goes up to a very much earlier period, as they say, for the examples of the pointed arch, ornamented with the double [illegible] and springing from capitals that closely approximate to the [illegible] mouldings of the Anglo-Saxon, which formed the connection between St. Joseph's Chapel and the Anglo-Norman. The chapel, which exhibits the features of the thirteenth century, is [illegible] by Earl [illegible] and from which [illegible] enough of the details to offer an opinion as to its exact date, but I do not remember to have seen it ascribed to Abbot de Blois (1196-1171); but this date is, I think, commonly ascribed to Abbot de Breo (1189-1217). The existing remains may probably occupy the site of his building.

Your Correspondent must excuse the expression of a doubt as to the "fair stone building" he mentions having been the original "holy thorn" stood on the ground-plan of the ruins. [illegible] "History and Antiquities of Somerset"), or marked in its [illegible] Great Rebellion, and which remained [illegible] Wenwall Hill, near the town; but, during the [illegible] d "Ironsides" of those days, ing of it was hacked down by one of the [illegible] the garden adjoining the trunk from this remarkable tree is now growing in [illegible] saw.

NEW MUSIC.

ELEMENTARY WORKS.

No. 1. The ART of SINGING. By D. F. CRIVELLI.—No. 2 ELEMENTS of SINGING. By GIACINTO MARRAS. R. Mills.—No. 3. PHYSIOLOGY of the VOICE. By F. ROMER. Leader and Cock.—No. 4. The PIANIST'S DEPARTMENT in EDWARD PROUT. R. Cocks and Co.

Signor Crivelli, the Professor of Singing, and honorary member of the Royal Academy of Music, has issued a third edition of his elaborate work on the cultivation of the vocal power. This volume, appropriately dedicated to the Earl of Westmoreland—to whom, as the author observes, England is indebted for the formation of a "Conservatoire," or Royal Academy—contains there-sult of an experience of thirty-eight years. In the introduction, Signor Crivelli enters at some length into the theory of the development of the voice: he protests against the notion of founding a system on mechanical experiments and musical rules, as fallacious; and insists on the necessity of instructors making a careful study of the functions and constitution of the vocal organs. The author's remarks are full of interest; and his advice to students, to cultivate the mind as well as the organ, is sound: he cites many instances of celebrated *artistes*, whose fame has been acquired by a superiority of intellect, in overcoming difficulties of nature. The pages devoted to the quality, compass, style, and change of voice, and the ornamental exercises, progressive scales, and *solfeggi*, are written and composed in the best taste, and with a thorough comprehension of the true principles of art. The work is published in double columns; Italian on one side, with the English translation on the other—an excellent arrangement.

The work of Signor MARRAS, the accomplished vocalist and professor of singing, is written both in Italian and English, and, as may be conceived, from the well-known taste, skill, and experience of the writer, excellent advice is given to pupils for the preservation of the voice, and the proper mode of studying. The observations on the respiration by the professor Marras is evidently an advocate of the *cuantier in modo* in his system of tuition. The lessons for the training of the voice combine elegance with instruction; but in some of these exercises the author has followed a contrary system to the generality of opening with one key and concluding in another. With this exception, the "Elements of Singing" is a welcome addition to the collection of vocal works.

Mr. F. ROMER, Somer's book is a treatise, chiefly especially the difference between the speaking and singing qualities of tone, and adding certain laws for the formation of the musical voice. The work is practical as well as theoretical, two additional chapters having been added in the second edition. Mr. Romer is known as a clever composer, and has had many years' experience as a vocal instructor. Mr. Romer's theory is, firstly, "that the human voice has two distinct points of production, and that all proper musical sounds are formed in the lower tube (the throat); that the musical tones of the voice are divided into two qualities, the same as in all musical instruments—namely, double vibrated notes and single vibrated notes or harmonics, produced by the latter being down by the acoustics. Mr. Romer also maintains "that there is no sudden or fixed break in the voice when produced according to nature; and, finally, that no contraction whatever of the throat or mouth should take place in the tube by moving the larynx or glottis, all such movements tending to harden or weaken the purity of the tone." These principles Mr. Romer enforces by a very ingenious train of reasoning, and appends to his system of vocal tuition. Some remarks on the nervous obstruction and impediments of the vocal organs are extremely useful and valuable, whatever opinion may be entertained of Mr. Romer's theories, which are certainly novel and ingenious.

Mr. Frost, in a series of one hundred scale exercises, has afforded to pupils very great facilities in mastering the distance and chromatic scales. The explanations are clearly and intelligibly written, and are accompanied by a plate indicating the proper position of the hands.

SACRED COMPOSITIONS.

No. 1. The CHURCH HYMN BOOK. F. and J. Rivington.—No. 2. The CHURCH ANTHEM BOOK. D'Almaine and Co.—No. 3. STABAT MATER. By Dr. GAUNTLETT. Lonsdale No. 4. LAYS and LEGENDS of the NATIVITY. By Dr. GAUNTLETT. Lonsdale.—No. 5 O GOD BE MERCIFUL. DITTO.—No. 6. HEAR MY WIFE. By Mr. HENRY SMART. D'Almaine.—No. 7. THOU art my KING, O GOD. By J. L. ELLERTON, Esq. Lonsdale.—No. 8. WARREN'S PSALMODY. R. Cocks and Co.—No. 9 The CHURCH MUSICIAN. Edwards and Hughes.—No. 10. ETHEREAL VOICES SPEAK TO ME. By Miss A. L. MORRIS. Sutman.

In the Church Hymn-book it is the intention to assign to every season its proper hymns, with fixed and appropriate tunes. The work will be completed in eight parts, with distinctions for Christmas, Epiphany, Septuagesima, Lent, and Passion Tide, Saints' Days, and special seasons and services. The plan of the editor is that the whole shall be sung in unison in the daily and proper offices of the Church, and expressly adapted for congregational expression, the melodies being simp e and nearly syllabic. "No churchman," state the editor and compiler, "can attend the Mendelssohn Festival in Exeter Hall, and hear the olden hymn tunes interspersed in his compositions, without a feeling of regret, that such many, vigorous, and congregational melodies should be heard there but seldom, and then only." Amongst the 300 tunes of the ancient sequence 'Laula Sion,' and that of the older hymn 'Ach Gott von Himmel sich darein,' in the 'Attaile;' and the harmonized arrangements of the olden melodies in Luther's 'Lobgesang,' may be said to have been the means of Mendelssohn in the hearts and affections of all Englishmen." The work is carefully and well got up, and, from its moderate price, will be no doubt popular.—Nos. 2, 8, and 9 are proofs of the increased attention now paid to improve congregational singing. The prefatory remarks in No. 3, on the "Stabat Mater," are full of antiquarian interest. Dr. Gauntlett is of opinion that the preponderance of probability as to its composition is in favour of Jacopone da Benedettus, a Franciscan, of the early part of the 14th century. Dr. Gauntlett has set the words to eight melodies, ancient and modern, for four voices, with organ accompaniment. No. 4 are Christmas Carols, "old and new," and the words, "original, pointed, composed, and edited. The musical attainments of Dr Gauntlett are well displayed in these Carols. In No. 5, a Sacred Song, he has admirably arranged a fine composition by Alessandro Scarlatti. The Sacred Song, No. 6, is in the same vein, is replete with devotional feeling. No. 7 is an anthem for four voices and chorus, with organ or pianoforte accompaniment, skilfully laid out and wrought. The composition of Miss A. Morris, of the Royal Academy of Music, is well adapted for the voice and style of Miss Catherine Hayes, for whom it was written. The poetry, by Emily Varndell, is affecting; and the composer, in an expressive andante, has produced a creditable specimen of vocal writing. It is gratifying to find lady professors devoting their talents to compositions of the sacred school. Religious art is evidently now much cultivated, as is proved by the increasing number and variety of congregational works issuing daily from the press, and by the increased excellence in the music and mechanical intricacy of Church tunes" to be adopted, the Gregorian chant discussion being now at its height.

PIANOFORTE PIECES.

No. 1. GRANDE FANTASIA, "Don Pasquale," by Thalberg; and No. 2. INTRODUCTION ET VARIATIONS, "Elisir d'Amore," by Thalberg.—No. 3, LES FADAISES, "Caprice Caracteristique."—No. 4. CAPRICE No. 1; No. 5. PENSIERI FUGITIVI; and No. 6. FANTASIA SUR DES MOTIFS FAVORIS. By E. Delaz. Cramer, Beale, and Co.—No. 7 The VESPER HYMN By BRINLEY RICHARDS. C. and S. Ollivier.—No. 8. FOUR ROMANCES By E. DEANE. Wessell and Co.—No. 9. SONATA. Op. 1. By CHARLES SWEET. J. A. NOVELLO.—No. 10. DJALMA. Overture. ANTONIO MIRASI. Wessell and Co.

Of Thalberg's two pianoforte productions it is scarcely necessary to write, familiar as these flowing and masterly works must be to all concert-frequenters. The airs are brilliantly arranged for the display of the well-known themes from Donizetti's two masterpieces of comic opera, in all its fine variety of conception and illustration. How delicately and charmingly Thalberg preserves the melodies, through all the marvellous intricacies and mechanical intricacies Ex eberant as is his fancy, incessant as are the changes of key, dazzling as are the transitions, the ruling *motif* is heard distinctly through the wildest variations. The "Don Pasquale" is dedicated to Thalberg's fellow-pupil, Lablache, whose tones of rich humour in this work must be conceived in listening to the treatment of the celebrated quartet. The "Elisir" barcarolle was a good subject for Thalberg, and wonderfully has he wrought it. It will be recollected that he astounded the Parisians with a similar display at his matchless performances of these variations. M. Silas is the young composer who made his first appearance in London at the concerts of the Musical Union this year. He is a native of Amsterdam, and received his musical education in this city, in the Parisian Conservatoire and his studies in Germany having been but limited. It is impossible to glance over the productions enumerated in the above list, without coming to the conclusion that M. Silas is more than ordinary promise in Silas. There is evidence of original thought and of an honourable striving after new forms; and, whilst the general tone of the compositions exhibits subtlety, it is without that affectation of originality which is ridiculous and *chevalier*. M. Silas writes in what is conventionally called the "classical school"—Bach, Beethoven, and Mendelssohn are his models. In the works before us, the two Caprices indicate novelty of treatment in their peculiar effects, although not free from a certain degree of the appearance of scholastic effort; but it is in No. 6, the "Songs without Words," that the fancy and imagination of M. Silas are so strongly developed. The Andante, No. 1, is replete with beauty and refinement. The arpeggios in No. 2 keep the ear on the stretch. The sentiment in the adagio, No. 4, is enchanting, whilst the graceful piquancy and spontaneity of the concluding allegro, No 5, shows his thorough knowledge of the resources of art. The career of this gifted musician, so young in years, yet so matured in talent, will be looked to with deep interest. Mr. Richards's arrangement of the Vesper Hymn is clever and effective. The four "Songs without Words" of Mr. Deane afford evidence of poetic feeling and musician-like skill. Under the title of "Sweet Summer Time," the "Sonata Pastorale," with the poetic quotations at the head of each movement, must be cited, as a praiseworthy attempt at originality, seasoned with much grace and delicacy. The overture is fanciful, and when played by the band of the 2nd Life Guards before her Majesty, at Buckingham Palace, as stated in the title-page, must have been startling.

VOCAL PIECES.

No. 1. PERSIAN LOVE-SONG. By AMELIA EDWARDS. Ewer and Co No. 2. THE LAST ALICE. By T. H. WILSON. C. Jefferys.—No. 3 THERE'S MUSIC In the WILD WAVES' ROAR. By W. TRANTT. Duff and Hodge on No. 4. DEAR FRIENDS AFAR. By SOLEMN REEVES. Reid.—No. 5. FISCHIA IL VANTO. By EMILY S. YOUNG. Addison and Co No. 6. BEAUTIFUL FLOWERS. By E. F. BLACKBEE. J. J. Hatch.—No. 7. WHEN ELFIN BELLS RING SOFTLY,

SWEET. By HERBERT RODWELL. D'Almaine and Co.—No. 8. LET US BE JOYOUS; and, ADIEU, YE WOODS. By JOHN ASHMORE. R. Addison and Co. —No. 9. PEACE TO THEE, Ballad; No FORM BUT THINE, Canzonet; and BENEATH THY CASEMENT Serenade. By H. C. LUNN. R. Addison and Co. —No. 10. SONG OF the STARS to the EARTH'S DIRGE. By J. L. ELLERTON, Esq. C. Lonsdale.—No. 11. O TIME, thy HOURS of PLEASURE; Trio. By CURSCHMANN. C. and R. Ollivier.

"Haste, Leila, haste! the night winds sigh"—the Persian love-song—is as fragrant as a rose, and the melody is ear-haunting. The poem of No 2 is from "Household Words," by W. Allingham, Esq., and there is considerable merit both in the words and the composition. There is too much sickly sentimentality in No. 3. The song of Mr. Boleyne Reeves, the poet laureate of the harp, has rather a nice subject. The "Preghiera" (No. 5) will pass muster in these barren days of original melody. No. 7 is a graceful, flowing, and vivacious air for a tenor. The ballads of Mr. Addison exhibit a certain amount of individuality, and we shall be pleased to hear of him again. Mr. H. C. Lunn, if he does not display decided originality of thought, is neither commonplace nor insipid.

ILLUSTRATED MUSIC.

No. 1. THE HIBERNIAN QUADRILLE. By JULLIEN. And No. 2. THE HOLY FAMILY. By W. H. CALLCOTT. Jullien and Co.—No. 3 WHY DO SUMMER ROSES FADE? By C. SEDGER. Cocks and Co.—No. 4. SPRING, SPRING, BEAUTIFUL SPRING! By H. M. WEBB. Webb.—No. 5 THE ELFIN'S HOME. By LABITSKY. R. Cocks and Co.—No. 6. THE LAST MEETING. By RICARDO LINTER. No. 7. GOMS is the FAVORITE. By ISAAC WILLIS. Willis.—No. 8. THE MOUNTAIN RILL. By J. F. DUGGAN. And No. 9. THE NIGHTINGALE By G. A. MACFARREN. Houlston and Stoneman.—No. 10. UN ANGEL MAN. By ANTONIO DE KONTSKI. Madrid.

In Nos. 1 and 2, the illustrations are very beautiful, the application of printing in oil colours being quite a novelty in music titles. The monody on the death of Sir Robert Peel is written by Mr. W. Hall. The title-page is encased in a florid Gothic façade of a temple, with two sculptured female saints in niches. Nos. 8 and 9 have rare borders. No. 10, "One Angel more," an elegy to the memory of the late Prince of Asturias (the poetry by Bastamente, and the music by the pianist to the Queen of Spain) is curious on account of its truly Spanish illustrations, with the forgotten Moorish crown and sceptre; in the distance is seen the Escurial, with dark clouds hanging over the edifice. Above the gloomy clouds the Infant, supported by flying Cupids, is ascending; and behind this central group is a school of angels playing the triangle, lyre, fiat violin, guitar, with a violoncello bow, &c. Nothing can be more absurd; but the music, opening with a funeral march, and ending with an elegy, nine-eight measure, has merit.

DANCE MUSIC.

No. 1. L'ALIZE. Two Waltzes. By ANTONIO MIRASI. Wessel and Co.—No. 2. PRINCE PATRICK'S POLKA. By JOHN WEIPERT. C. Jefferys.—No. 3. THE NEAPOLITAN POLKA. By CHARLES JOSEPH LONSDALE and Co.—No. 4. The GEM WALTZES. By T. ADAMS. D'Almaine and Co.

The above dance-compositions reflect credit on their respective composers. The Neapolitan Polka has a quaint local colouring, and the waltzes of Mirasi and Adams are melodious. The Prince Patrick's Polka was performed by the author's band at the last state ball at Buckingham Palace.

LITERATURE.

NINEVEH and PERSEPOLIS. An Historical Sketch of Ancient Assyria and Persia, with an Account of the recent Researches in those Countries. By W. S. W. VAUX, M.A., Assistant in the Department of Antiquities, British Museum.

The latter part of Mr. Vaux's title designates the most interesting portion of his book. A popular account of the recent researches in ancient Assyria and Persia, and of the information they have supplied of the condition of these countries, is a very useful undertaking. Mr. Layard's discoveries have, indeed, been very much spoken of; but, being yet in rapid progress, almost every arrival from the East bringing some fresh and startling intelligence, it is, perhaps, too early to give a description of them. They are far from complete. The same may be said of the discoveries at Persepolis and in other parts of Persia; but, to those we at present less known to the public, and less progress is making in them, the account of them is more immediately useful.

Scattered over various parts of Persia and Persepolis, Mourghal, Behistan, and other places, are remains of ruins, which Mr. Fergusson terms as ancient, perhaps, as any in the known world. Some of those of Assyria, recently brought to light by Mr. Layard, if they do not actually date from a period very little posterior to the Flood, are at least the nearest to it of any that have yet been met with. Next, perhaps, to these, come the ruins in Persia, and for many centuries the inscriptions on them have mocked the interrogatories of men and science. What do they mean? was asked, and asked in vain, and no answer. If the Greek writers could read them, they did not hand down the knowledge to their successors. The natives of the spot look on them with wonder and sacrifice them to their gods, or to the demons of ruin. Even the Persians, of late years, do not understand. For ages have travellers from Europe recorded their existance, with a conviction that on them was engraved the history of the past, and with deep regret that it was a history which they could not read. But, at length, Niebuhr, Beauchamp, Ker Porter, Sir John Malcolm, and Sir Robert Ker Porter, have visited and described the spot, and Grotefend, Rask, Burnouf, Lassen, and Rawlinson, have deciphered the inscriptions, and restored to us a knowledge that has been lost for more than twenty centuries.

The person who led the way in the successful investigation was Professor Grotefend of Hanover, and to him, therefore, the credit is due, and he ought to look for the titles of Kings in inscriptions placed over their portraits, found one word continually repeated, which he concluded must be their title That gave him a clue to several letters. Then he ascertained from history that the ruins of Persepolis referred to the Achæmenian dynasty of Persian Monarchs, and amongst the remains he found a record of a father and son. The dynasty was not numerous, and the names, Darius and Xerxes, Artaxerxes, Hystaspes, the names did not begin with the same initial letter; hence the conclusion was arrived at, and afterwards confirmed, that the record and the portraits referred to were Darius and Xerxes. From the fact that the exact form of the names, derived to us from the Greek, was the next difficulty to be overcome; and it was luckily overcome by the Persian names of Darius, Dariaves, having been preserved in Strabo. Then it was ascertained that the letters composing it on the monument were DARIAVES, or Dariavesh, as now written; and those composing the name which the Greeks called Xerxes were KSHARSHA. By this kind of diligent comparison the meanings of many of these ancient characters was ascertained, and Dr. Grotefend deserves the name that has been given him of the "Young of cuneiform inscription." What that learned investigator did for Egyptian hieroglyphics, Grotefend did for the lost language of the ancient Persians. His researches were begun about the commencement of the century, and were continued almost to his death. Of course, such a field once opened tempted many labourers—Rask, Copenhagen; St. Martin, in Paris; Burnouf, another Frenchman; and Lassen, another German; who supplied, at least, twelve letters, which had been mistaken or not made out by his predecessors, and who ranks only second to Grotefend in the interest men engaged in the investigation. It was not till 1835 that our countryman, a soldier rather than a student, Major Rawlinson, began his career of investigation. He then only knew that Professor Grotefend had deciphered some names, but in his isolated position on the mountainside, on the western frontiers of Persia, he could get none of Grotefend's books, and had to make again Grotefend's great discovery for himself. When he became acquainted with the labours of that learned man in 1836, he had not a structure to assist having, in the inscriptions around him, a great opportunity of materials, he had advanced beyond his precursor. The cuneiform alphabet has since been made out much more completely, but he had then identified eighteen characters, which further researches have found to require no alteration. In 1840, Major Rawlinson could state that he had given a literal and correct grammatical translation of nearly two hundred lines of cuneiform writing. Since that time, Mr. Westergaard (a Dane), and several other gentlemen have diligently pursued the subject; and the admirable and wonderful result is, that the ancient inscriptions at Persepolis, Behistan, and at various points of Assyria, can all now be read. Several have been read; more are

PICTURES IN THE NEIGHBOURHOOD OF BALMORAL.

ABERGELDIE CASTLE.

We are enabled, this week, to present our readers with four Illustrations of the neighbourhood of Balmoral, from sketches by Mr. W. Henry Fisk. The interest her Majesty takes in thus yearly visiting her residence in Scotland, has not only drawn attention to a portion of the Highlands to which even the Scotch themselves rarely gave a thought, but has also in name, if not in fact, rendered familiar to the public at large. The intrinsic merit of the scenery, the grandeur of the Grampian Chain, its rocky and almost inaccessible heights, together with the quiet and cultivation of the valley, watered by the winding Dee—grasping, as it does, at one view almost every variety of hill and dale—not only shows her Majesty's appreciation of grand and beautiful scenery, but renders it dear to every lover of nature in all her picturesque variety of valley and mountain, homestead and stream.

Her Majesty possesses a set of finished studies of the localities represented in the accompanying Engravings.

ABERGELDIE CASTLE

Is situated immediately on the banks of the river, and, approached by the high-road from Aberdeen, seems, as it were, closed in by the mountains at the foot of which it rests, and thus appears to be isolated; though, in fact, it stands in the midst of the valley, and may be seen from the private grounds of Balmoral, almost buried in the deep masses of the woodlands which intervene. There is a rough, simple grandeur in the building itself—massive, as the original walls amply testify—while the large square clock-tower, mounted on another no less strong, but circular in its form, the deep-set windows, and the rough material of which it is composed, give it, as is due, an antique and romantic appearance. Built for another age, and for less peaceful times, it is still in keeping with the craggy mountain sides; but when we

> Think what is now, and what hath been,

it is neither with disappointment nor ill-will that we see cultivation creeping almost in at its doors; while the corn and cattle rest secure from those predatory excursions, at one time not uncommon, to gratify the pleasure or revenge, as the case might be, of some powerful chief with a no very distinct idea of *meum* and *tuum*, as regarded his neighbours' property or his own.

Abergeldie Castle has been taken for a term by her Royal Highness the Duchess of Kent, who is now sojourning there, within sight of the Highland home of her illustrious daughter.

Mr. James Browne, in his "New Deeside Guide," describes Abergeldie as a very stately and ancient castle, which was long in the possession of the Gordons, one of the oldest and most honourable families in Aberdeenshire or any other shire in Scotland. With its bartizans, turrets, and sculpture, the Castle is very picturesque. This place is much renowned for its grandeur, and more especially for the extraordinary beauty of its noble birch trees, of which mention is made in an old Scots song,

THE BIRKS O' ABERGELDIE.

Bonnie lassie, will ye go,
Will ye go, will ye go;
Bonnie lassie, will ye go
To the birks o' Abergeldie?
Ye shall get a gown o' silk,
A gown o' silk, a gown o' silk,
Ye shall get a gown o' silk,
And a coat o' callimankie.

Na, kind sir, I dare na gang,
I dare na gang, I dare na gang;
Na, kind sir, I dare na gang,
My mamy will be angry:
Sair, sair, wad she flyte,
Wad she flyte, wad she flyte;
Sair, sair, wad she flyte,
And sair wad she ban' me.

LOCH MUICK.

PICTURES IN THE NEIGHBOURHOOD OF BALMORAL.

Robert Burns has written a song (the chorus and measure of which he has borrowed from this song) upon the Birks of Aberfeldie, which is a place in Perthshire, and the birks whereof are nowise comparable to the noble and beauteous birks of Abergeldie. Likewise, anent Abergeldie Castle there is a machine contrived for crossing the river, called a cradle. Here, some years ago, there befel a grievous and lamentable tragedy. A bride and her bridegroom, both no doubt, as was natural, elate with joy, and their minds filled with happiness and glee, went into this cradle to get across the river; but, woeful to relate! while they were in the middle of the passage, some part of the machine gave way, and they were both thrown into the river, where they perished by a cruel and untimely death. Nor should we forget to mention that, at Abergeldie, by piercing the bark of the trees, they extract the juice and sap of the birks, and then by a curious process ferment the same, and make wine of it, which wine is very pleasant to taste, and thought by some to be little inferior to the wine of Champagne and other outlandish countries. The word Abergeldie, in the Gaelic, signifies the place were the burn of Geldie falls into the Dee, just as the word Aberdeen signifies the place where the Dee falls into the sea, or the word Aberader signifies the place where the Arder falls into the Dee. About half a mile above Abergeldie, and on the same side of the river, that is, the south side, was the small village of Clachanturn, where there were a ferry-boat and a ford. This has ceased to be a village, and is only one solitary farm-house and steading; and the ford and ferry-boat have both been rendered unnecessary, by the erection of a neat suspension-bridge across the Dee, about half a mile further on.

BIRK HALL.

CRATHIE.

The view of the Manse and Kirk of Crathie was taken, by permission, from the private grounds at Balmoral. The Kirk is a very small square building, slightly elevated on a knoll, and is seen from a considerable distance. It was here, last season, that (in a storm of rain which had lasted from early morning), on her Majesty leaving the kirk—for nothing prevented the regularity of the Queen's attendance at Divine worship—the ground was so thoroughly drenched with rain that it stood in pools between the church door and the carriage, so as seriously to inconvenience her Majesty's reaching it, when Mr. Fisk spread his plaid upon the ground, over which her Majesty and suite passed to their carriages.

The Manse is a plain but elegant building, surrounded by a pleasure-garden, where the flowers, in their profusion and beauty, form a strange contrast to the Hut at Loch Muick. But there is a more strange contrast yet.

From a "muckle knowe," nearly opposite Balmoral, is a noble view. At once are seen, in the vale beneath, the castles of Balmoral and Abergeldie, the Kirk, the Manse, farmhouses, and distilleries, together with herds of cattle, and well-cultivated fields, sloping, by an easy descent, to the "tortuous winding" Dee. On all sides rise the *hills*. Those nearer to the vale covered with pine and birch-trees, those more remote clothed in the variegated heather; while, a little on one side of Balmoral, stand, in bold relief, the bleak, precipitous sides and the alpine peak of Loch-na-gar. Further down the river the pass is closed in by lofty hills, over which, and in the distance, may be descried Aberdeen, the harbour and the lighthouse; and beyond these, the sparkling waves of the German Ocean; while, opposite to it, and at the further extremity of the valley, stand Ben-Muick-duhi and other of the loftiest of the Grampian chain—altogether forming one of the grandest panoramic views that could be desired. Abounding in luxurious cultivation, and with all the necessary adjuncts of mountain and valley, it has, with its grandeur, a "busy quiet" and repose that adapts it well for a retreat,

Where *state* is thrown aside,
And ease and quiet rule the happy scene.

BIRK HALL.

BIRK HALL is one of the three Royal residences in this part of Scotland, with which Abergeldie and Balmoral form the *trio*. In itself it has little to recommend it, beyond the fact of its being a Royal demesne; being comparatively modern in its construction, yet by no means ungainly, and, moreover, exquisitely planted in the midst of clustering woodlands. It has the advantage of being within a short distance of the town of Ballater, from the opposite side of which, at a little distance on the high-road, is one of the grandest views that can well be conceived. Immediately in front, and below the spectator, is the town just named: beside it flows the Dee; beyond is Birk Hall, towering over which and the surrounding scene are the lofty hills, while Loch-na-gar, far above them all, closes in, and completes the view.

LOCH MUICK.

Leaving Crathie, and over a mountain road, where, for many miles, not even a shealing is to be seen, rough, bare, and rugged mountains piled around, where the grouse, the blackcock, with their four-footed companions the rabbits and hares, are the only denizens, such is the approach to the hut at Loch Muick.

The Loch is well stocked with excellent trout, and is as good a place for a day's sport in fishing as could be desired. Close to the junction of the Muick with the Dee stands the Manse of Glenmuick, and the old church which was formerly the parish church, until the parish of Glenmuick was joined with Ballater. Brackley lies about a mile to the south of Ballater: this is a place of much renown, on account of a mournful tragedy which took place here, and is recorded in the old ballad called the "Barrone of Brackley."

Wild and dreary Loch Muick is, but a paradise almost compared with the wildness of the scenery surrounding the hut, which stands in a little belt of woodland, something like a park enclosure of very limited extent, and on the verge of a morass, through which the river Muick (which springs from the Loch of the same name, and of which we give an Illustration) winds its course down the valley, solitary—alone—for here not a habitation is to be seen, save one or two poor farmhouses at the upper end near the loch. Where there is scarcely a sign of other vegetation, save heather and moss, wild, grand, desolate, and even sublime, a wildness and a grandeur full of poetry, and picturesque in the extreme in its solitary extent—a fit home for the bittern and the stork—it is nevertheless here that the Monarch of Great Britain and her Consort have passed, and doubtless will pass, many of their days, while thus yearly visiting the North.

In the Number of our Journal with which the present Supplement is published, we have duly reported the progress of her Majesty to the North, and the Royal *sejour* at Edinburgh.

The Queen and Prince Albert, with the Royal family and suite, left Holyrood Palace on Saturday, exactly at a quarter past eight, on

CRATHIE KIRK AND MANSE.

route for Balmoral. As the hour of her Majesty's departure was generally known the previous evening, and also the route which her Majesty would take in proceeding to the railway, the lieges were seen flocking from all quarters in the direction of the Palace and the Queen's Park as early as six o'clock, and taking up their position in the grounds, to give a parting farewell to their Sovereign.

At half-past seven o'clock, the military forming the escort and guard of honour arrived at the Palace, and took up a station in the square fronting the grand entrance.

At eight o'clock, four of the Royal carriages arrived to convey her Majesty and suite to the Meadowbank station, where it had been arranged the Royal party should join the railway. As the Queen entered her carriage, a Royal salute was fired from the Castle battary, and amid the roar of artillery and the cheers of the multitude, the Royal party proceeded through the Queen's Park. Her Majesty and the Prince alighted at the station at a quarter past eight o'clock, and in a very few moments the Royal train was proceeding rapidly northwards.

The Royal party reached the Cupar Angus station at half-past eleven o'clock precisely, and immediately proceeded thence in four Royal carriages and four to Balmoral, where they arrived at about half past five o'clock on Saturday evening.

It is now said that her Majesty may be expected to return to Holyrood in the course of the first week in October, and spend a couple of nights in the Palace, after which the Court will proceed to London, thus of course setting aside all idea of a levee or drawingroom being held at the Palace this season.

NOTWITHSTANDING the county of Somerset is one of the most extensive in England—comprising, according to the Ordnance survey, an area of 1,028,096 statute acres, a large portion of which is composed of a very productive soil—yet it presents no very prominent agricultural feature, if we except the excellence of its cheese, the celebrated Cheddar and West Pennard cheese being the produce of this county. Some of the choice Cheddar dairies are, perhaps, unequalled for richness throughout the world.

A great variety of geological formations are to be found in Somerset; commencing with the slate or Silurian rocks of Exmoor, and terminating in a small patch of chalk, which is to be found in the eastern extremity of the county. In the centre, along the banks of the Parrett, the Brue, and the Axe, are considerable tracts of alluvium, forming rich grazing grounds, but apt to be flooded.

The general climate of Somerset is mild, particularly on the sea-coast, but this proximity to the sea causes it to be rather moist, especially in the vicinity of the hills which intersect the county in various parts. Where the red sandstone is largely developed, such as the Vale of Taunton, the porous nature of the soil counteracts any ill effects that might arise from this cause, in cultivating corn crops. Owing to the dryness of soil compensating for the humidity of the climate, added to its extreme mildness in consequence of being sheltered from north-east and south-west winds, it not unfrequently happens that the wheat harvest is secured a full week in this beautiful vale before that in any other part of England. The higher part of the Mendip Hills is cold and bleak, and is principally occupied in rearing young cattle and grazing sheep. In consequence of the difference of climate between the vales and hills, the periods of seed-time and harvest vary greatly in different parts of the county, the mountainous parts being months later than the vales, for which reason it is customary, on exposed and elevated districts, such as the Mendip, Quantock, and Brandon Hills, to sow a fortnight earlier in the autumn and a fortnight later in the spring than that which the vale farmers are accustomed to.

The surface of the inland parts is varied by lofty hills, rich level plains, and bold aspiring woods, which prevents the county of Somerset from presenting a monotonous aspect. The soils found on the Quantock Hills (between the town of Taunton and the sea) are composed of a thin variable soil, according as the subjacent rocks are greensones or alumstone, covering a loose shelly rock, interspersed occasionally with limestone. Poulden Hill (between Bridgewater and Glastonbury), a strong soil covering a bed of clay; Mendip Hills (between Wells and Bristol), Broadfield and Leigh Down (near Bristol), a gravelly loam on a limestone rock; Black Down (near Devon), a thin vegetable soil, mixed with gravel and sand, superposed on a bed of the same material. Where the lias spreads out to any extent, there are found patches of stiff intractable clay, not unfrequently covered with a coat of peat.

Arable husbandry might be greatly and advantageously extended, to the benefit of the farmer, the labourer, the landlord, and the country. In many parts, no doubt, the stiffness of the soil, and in others the chance of being flooded, are drawbacks to arable cultivation. It is, no doubt, to the general stiffness of the soil of this county that we find the practice of using oxen for ploughing still so extensively adopted; to the like cause we may, probably, attribute the continued use of waggons in preference to carts.

Splendid samples of wheat are grown in the Vale of Taunton, and the major part of the low lands grow excellent beans. Teasels are occasionally grown on the strong clays; this crop is, however, so precarious, that its cultivation is not much countenanced. Good barley lands are found on the light calcareous soils in the eastern parts of the county. The spring crops grown in the western districts principally consist of oats, for which both the climate and soil is more peculiarly adapted.

The breed of cattle in Somerset is of a very mixed character: this remark applies to other cheese districts, the nature of the pasture, rather than the kind of stock, giving the distinctive quality to cheese, modes of management having doubtless considerable influence.

In Somerset, where cheese only is made, the annual produce per cow is usually estimated at from three to four cwt. per annum. The whey, mixed with ground peas or beans, makes excellent pork.

It is not an uncommon practice with some farmers in the warmer vales of this county to give a preference to the Dorset sheep, in consequence of their valuable property of early lambing, combined with their being so prolific. The climate and rich herbage of several of the vales of Somerset render them peculiarly well calculated for this kind of husbandry; and now that a railway communicates through its centre, the practice may be expected to increase. There are two native breeds of sheep, one without horns, covered with a thick fleece of wool; they are locally known by the title of Exmoor Notts; they are the type of the old English long-woolled sheep, and when crossed with Leicester blood are not to be distinguished from the improved Cotswold. Specimens both of the old species and the crossed breed are frequently met with in the same flock, the characteristics of the old breed greatly predominating. The breeders of Bampton sheep assert that it is the most profitable for wool and mutton of any breed in the kingdom; but no doubt these qualities are dependant on the richness of the pastures and mildness of the climate in which they are bred and fattened: they doubtless possess valuable qualities, fully equal to ordinary Cotswold sheep.

The Exmoor sheep are a horned breed, the general shape of which is something like that of the Glamorgan, on the opposite side of the Bristol Channel. It is a wild mountain breed, inhabiting the most sterile heights of the Exmoor range on the borders of this and the adjoining county, Devon. Their wool is coarse, averaging about 4lb. or 5lb. per fleece; and usually they are allowed to roam over the hills until they are three years old or upwards. When fattened, the meat is of excellent flavour.

In the south-west of Somerset, as in the adjoining county of Devon, water meadows are somewhat prevalent; the first watering here commencing about the end of October, being continued until February with occasional intermissions. In some very temperate districts these meadows are fit to receive ewes and lambs as early as Candlemas, and a constant and regular succession of food from that time to the beginning of May enables the farmer to bring his stock rapidly forward during some of the most trying months of the year.

At the beginning of May the land is unstocked again and watered, after from six to seven weeks, they mow from 30 cwt. to 40 cwt. per acre. A deficient attention to the construction of fences, and a general want of drainage are the principal drawbacks to the agriculture of Somerset. The general character of the soil of this county, combined with its stiffness, will in a great measure account for so large a part of the soil being occupied in pastoral husbandry.

T. H.

AMERICAN DRINKS.

(To the Editor.)

BRECON BARRACKS, South Wales, 20th August, 1850.

SIR,—I send you a slight account of some of the many American drinks, strong and weak (some worthy of imitation, others to be used in moderation), for which the Yankees are famed, and which may be considered amusing as acceptable to some of your readers.

Mint Julep is brandy and water, sweetened with pounded white sugar, in which are stuck eight or ten leaves of fresh-gathered mint. Pounded or pulsed ice is then put into the tumbler, and the drink is imbibed through a straw or glass tube. N.B., as made at the American bars: The brandy and water is first put into a large silver or glass goblet, then the ice, pinned or broken very small; pounded white sugar is then dashed over them with a table-spoon; the whole is then violently shook or tossed from one goblet to another, and served up in a clean goblet, the fresh mint stuck in the ice, a piece of lemon peel hanging over the brim, and a straw tube put in the glass.

Sherry Cobler.—Made precisely as mint julep, *sans* lemon peel or mint, sherry being used also instead of brandy; and, when served up, nutmeg is grated over the top.

Stone Wall, or Fence, is merely an English cider cup, which contains a portion of cider, wine, brandy, &c. This is also served up with their universally-used ice, and taken through a straw.

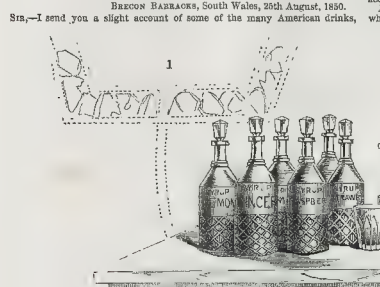
Gin Sling is the same as those above, with gin as the spirit.

Mississippi Punch.—One glass of cutard brandy, half dutto of Jamaica rum, tablespoonful of arrack, quarter of a lemon, one tablespoonful of pounded white sugar; fill the tumbler with water and ice, and let it be thoroughly mixed, and serve with a straw. This last recipe was given me as the greatest favour by the *gentleman* at one of the bars of the most celebrated hotel in the United States; he having first ascertained that I was not a Yankee, but an Englishman on my way to the old country. He boasted that he was the only one in America that could make this punch. Indeed, all these persons swagger a good deal as to their peculiar knowledge in this way, and, in serving these drinks, assume a most important air of consequence, concocting them with much dispatch, address, and dexterity. Nay, from the constant call for these divers drinks, a large room is especially provided in all hotels for this purpose alone; and the barkeepers severally pride themselves on their individual skill in the proportions and choice of the various ingredients. To a stranger, on first witnessing their operations, it appears, by the extension and undulating motion of the gentleman's arms and body, while pouring from one goblet to the other, as if he were employed in dancing the Spanish Cachucha, the legs being hid by the counter; while his self-satisfied smile, and turns of the head following the liquid stream, add much to this delusion. The affair is done, as they say, "right away," and the mixture is ready in half the time it takes to relate the process.

Iced Soda Water from the Fountain is also consumed in great quantities in hot weather, flavoured with various syrups, as syrup of ginger, ditto of lemon, strawberry, raspberry, sarsaparilla, &c. This is drunk in summer by crowds of persons all day, and late in the evenings, at the chemists' shops, everywhere in the United States. The demand being so great, the fountain is contrived to supersede the trouble, delay, and inconvenience of fastening up and opening bottles of soda water. From a large cistern of iced soda water a communication pipe appears above the counter in the shop, generally in the shape of a T, at each end of which is fixed a cork, the size of which fits the mouth of a soda-water bottle. One of these corks is forced into a soda-water bottle when applied and regulated by a tap. One hand holding the bottle pressed into the cork, and the finger or thumb of the other regulating the tap from the cistern, which is closed when the bottle is full. The bottle of soda-water, with a noise from the fixed air, is then turned instantly into a tumbler prepared with the required syrup. The counters are fitted up with marble slabs and ornamented most tastefully, there being on them numerous tumblers and gay bottles filled with the syrups. There being generally two places of supply, no time is lost in serving every one. The charge for a tumbler of this, flavoured, is only from four to six cents. During my short stay in a shop to get a drink, I have often counted as many as twenty ladies and gentlemen all bent on the same errand.

All seems in America, from cheapness, to minister to the wants of the many and thousands there, in hot weather, partake of these simple, grateful, and wholesome drinks,* who, in England, resort to the tavern or the gin palace for strong, stimulating, and injurious ones.

Something of what I have described is now, I learn, established in London. Would it were more universally adopted throughout the country, and the cost brought within the reach of all classes.



1. Large Cistern of Iced Soda-water, with Tube connected with Fountain T; Ice surrounding Cistern, &c. 2. Fountain. and 4. Places of Supply, with taps.

AMERICAN COUNTER.

a. Goblets often used to toss, shake, and mingle the mixtures in. They fit into each other.

AMERICAN DRINK-GLASSES.

In hot weather all persons naturally have a desire to drink to supply the loss that takes place in the system from perspiration, from which we feel a weakness or lassitude; but no popular error is so monstrous, so fatal, and so general, as to suppose that this lassitude, or craving for liquids, is to be assuaged or cured by gulping down beer, porter, or strong drinks. These only add "fuel to the flame," and, after but a partial stimulus, leave the party weaker and thirstier than ever. The gross and determined ignorance on this subject by all classes has induced me to send you this particular account of the simple drinks (which at present they do not get credit for) used by the Yankees in hot weather, in fervent hope of their being more universally adopted in this country.

I am, Sir, your most obedient servant,

THOMAS UNETS, Brigade-Major, 19th Regiment.

* There is in every small town or village in the United States a bar-room and a newspaper; and in their late Mexican war the bar-room and newspaper were established at every halt the American army made.

PATENT SWIMMING STOCKING.

On the 15th ult., a person performed the unprecedented feat of swimming across the Frith of Forth, with great ease, by means of Cox's patent Swimming Stockings—the swimmer leaving the North Ferry pier at eight minutes past two o'clock, and grounding in South Queensferry harbour at two minutes to three, thus being exactly fifty minutes on the passage. The distance traversed could not be much under two miles. Captain Roxburgh kindly supplied a boat to accompany the swimmer, and also ordered the ferry steamer to diverge from her usual course, so as not to interfere with the experiment.

COX'S PATENT SWIMMING STOCKING.

The Swimming Stocking, made by John Cox, Edinburgh, consists of a circular piece of cloth sewed round the leg of a stocking, and kept in a proper position for expanding by means of cords and wooden ribs: it thus resembles a small umbrella round the leg, expanding when pushed against the water, and closing when drawn in the opposite direction. To make the most rapid progress through the water, the best position is on the back, the swimmer drawing well up and striking smartly out each leg alternately, in the line of the motion of the body, as shown in the Engraving.

RAGS.—It is like the Mill of the child's story, that ground old people young. Paper! White, pure, spick and span new paper, with that fresh smell which takes us back to school and school-books; can it ever come from rags like these? Is it from such bales of dusty rags, native and foreign, of every colour and of every kind, as now environ us, shutting out the summer air and putting cotton into our summer ears, that virgin paper, to be written on, and printed on, proceeds? We shall see presently. Enough to consider, at present, what a great deal of dress this rag-store is; what a lesson of vanity it preaches. The coarse blouse of the Flemish labourer, and the fine cambric of the Parisian lady; the court dress of the Austrian jailer, and the miserable garb of the Italian peasant; the woollen petticoat of the Bavarian girl, the linen head-dress of the Neapolitan woman, the priest's vestment, the player's robe, the Cardinal's hat, and the ploughman's nightcap; all dwindle down to this, and bring their littleness or greatness in fractional portions here. As it is with the worn, it shall be with the wearers; but there shall be no dust in our eyes then, though there is plenty now. Not all the great ones of the earth will raise a grain of it, and nothing but the Truth will be.—*Dickens's "Household Words,"* No. 22.

LIFE AND PROPERTY AT THE DIGGINGS (CALIFORNIA).—By a gentleman who arrived yesterday from the southern mines, we learn of several murders and other atrocities committed there, which develop a very bad state of society. On Friday night last two Americans were murdered in their tent at Jamestown, by some persons unknown. One of them was a Mr. Chase, of New Bedford, and the other a Mr. Hathaway, of Dighton, Massachusetts. The first had his throat cut from ear to ear, besides a stab in his breast; Mr. Hathaway was stabbed in the breast and neck in several places. The tent was robbed of about 1000 dollars that were known to be in possession of the murdered men. On Wednesday evening, the 19th inst., a Frenchman, named Jean Fernando, was shot by some person unknown, near the Oregon Tent, about twelve miles above Stockton. On Saturday last, on Wood's Creek, about one mile below Sonora, a Frenchman was shot in the head, and died the next day. On Saturday night last, at Columbus, in the New Diggings, a Chilian was shot by a Mr. John Brannan, in self-defence. The Chilian called upon Brannan for some assistance; he told the applicant he had none to give then, but that if he would call the next day, he would let him have some. The Chilian became enraged at a refusal, and as he reached the door, turned about and fired his gun at Brannan, and a man named Jackson Roark, who were standing together. They dodged under a table; but Roark's hand being up, one of his fingers received the ball. Brannan then ran to the door, and there being several around, he was at first unable to distinguish who fired, and while standing a moment, he received three stabs of a serious but not fatal character. He then drew a pistol and shot the fellow down. An examination was had, and Brannan was justified in the act. A few days ago a Frenchman shot a Chilian in the streets of Sonora. A case happened, a day or two since, in the neighbourhood of Weaverville. A person demanded of a man, known as Dutch George, a debt in an insulting and threatening manner; but the latter, not feeling disposed to be threatened into a measure, made no response at all. Upon this the bully deliberately pulled out a pistol and shot him dead. An old man standing near, remonstrating with the scoundrel, was struck on the head with a weapon, and fired upon twice by the same villain. A reward of 1000 dollars has been offered by the citizens of the place for the apprehension of the murderer.—*Pacific News*, July 1.

PASSENGERS' STORES.—It appearing that a diversity of practice prevails in charging the duty on small quantities of cigars or manufactured tobacco, the unconsumed stores of passengers arriving in this country from abroad, the authorities have given orders that any quantity under half a pound in weight may be delivered duty free, but that cigars or manufactured tobacco, brought by passengers of the weight of half a pound and upwards, is to be charged with duty on the actual and entire quantity.

PARIS FASHIONS FOR SEPTEMBER.

The bonnets are always made of Italian or rice-straw, ornamented with leaves and flowers Fruits have completely disappeared. The favoured flowers are bunches of rose-buds or of China pinks, of reseda, of forget-me-not; likewise all drooping flowers, such as the convolvulus, the velutilis, and others. The bonnets are of a deeper shade as the season advances; amongst others, a violet and lilac bonnet (*capote*). the front in lilac is encircled by three rows of trimming in violet; the crown is in lilac *crêpe*, plaited on the cross way: violets of two shades ornament the interior of this charming bonnet.

BOY'S DRESS.

GIRL'S DRESS.

THE changes in Summer dress begin to slacken, and to be little more than slight alterations in the fashions that have reigned throughout the season. The costumes for Autumn already occupy the *modistes*.

In *nouveautés de bal*, we have remarked some dresses of tulle, embroidered in coloured silks. They are ready to be made up, and the embroidery of the skirt ready worked, either with separate bouquets, or with wreaths for one or more skirts.

The dresses are always with a plain body, open in front, and high in the back, with very open and rather short sleeves. This fashion necessitates the wearing of bracelets; and of these there are some of every sort. The most simple, and consequently the prettiest, are those of ribbon velvet (No. 7), fastened by a buckle, the elegance of which relieves the simplicity of the velvet. There are some very handsome ones, ornamented with diamonds and turquoises, and ordinary ones in marcasite stone. The buckles in the style of Louis XV., however, are very much worn; for the style of those sleeves is exactly the same as that which we find in all the portraits of the last century. Enamelled bracelets are very *recherchés*; those, in particular, which imitate a simple ribbon are in good taste Bracelets formed of medals, either antique or of the middle age, are much worn; and the amateurs of numismatics may find in the *salons*, on the arm of a charming dancer, the rare Vespasian or the Trajan which is wanting in his collection.

A skirt made of *taffetas d'Italie*, or any other silk, with a canezon of India muslin, the front of which is closed by buttons of brilliants, rubies, or enamel, is a favourite costume. Sometimes these buttons are of different sizes, and diminish in size as they approach the waist.

TOILETTE D'INTERIEUR.

Toilette d'Intérieur.—Coiffure in white blonde, with rosettes in *gros-de-Naples* ribbons. This coiffure is placed quite at the back of the head, and is, therefore, as it were, supported by the back hair alone. The dress is in *taffetas d'Italie* (*bleu Louise*), with high and closed body, ornamented with brandebourgs, but embroidered on the stuff. The embroidery is either in satin stitch or in tambour, and sometimes laid on in narrow gimp trimming; the sleeves, wide and turned over, are also slightly embroidered.

The promenade mantelet in *taffetas d'Italie*, is trimmed with lace.

For little Boys.—A blouse, either of Valencia or plain poplin, of a medium colour, forming flat plaits on the breast, and fastened close to the shoulder by a brandebourg, rather wide at the waist, and held by a belt of similar stuff, or of back varnished leather; short trousers, trimmed with English embroidery; little boots, grey pearl, and buttoned, with varnished tips; small Scotch cravatte, and puffs of white muslin at the end of the sleeves.

For little Girls.—A poplin or Scotch Valencia dress, short in the skirt; trousers, a little longer than for little boys.

PEIGNE.

PROMENADE MANTELET.

The Autumn Fashions are in preparation; but the light, zephyr-like dresses are still worn. The toilettes, however, are already adapted to the coolness of the evenings, hence glacé silk manties are replaced by cashmere shawls—those elegant resources of all seasons. Silk dresses have replaced muslins, and dark shades are chosen in preference to light ones. It is evident that the same fashion will prevail for silk dresses as for muslin. The manties will be of the same colour and material as the dress, and they will only be trimmed with worsted lace of the same shade as the dress. The patterns, up to this time, have undergone very little change. The sleeves will still be in the Chinese or Pagoda style for evening dress; but, for morning wear, they will fasten tight at the wrist *à la*

LITERARY SOCIETY OF JERUSALEM.

(To the Editor.)

It may not be uninteresting to you to learn that our small English colony in Jerusalem has instituted a Society for the investigation of all subjects of interest, ancient or modern, scientific or literary, belonging to the Holy Land; with his Lordship the Anglican Bishop for our patron, and corresponding members in Jaffa, Safed, Beyrout, and Damascus. We have also commenced the formation of a Library and a Museum, to which liberal access will be afforded to persons of all nations and religions, under certain simple regulations.

The Library, it is proposed, shall be not only of a general character, but shall have an express Oriental department for books and manuscripts in Asiatic languages. The trustees are his Lordship the Bishop, R Sandford, Esq., M.R.C.S., and myself all being members of the Literary Society, with which the idea of a public library originated

But we are under the necessity of appealing to patrons of such associations, and friends of such pursuits as ours, in Europe, for pecuniary aid in the purchase of books, especially old books relating to this country, and a few philosophical instruments.

During the few months of our literary existence we have had twenty-two weekly meetings, for reading original papers and exhibition of curiosities, and have erected a handsome sun-dial for public benefit. We are now about to begin an experimental garden for practical horticulture.

The interest felt for this country by Europeans is now far greater than has been known for many ages past; and it is chiefly shown by the increase of travellers resorting hither, many of them being persons eminent in rank and learning. For their advantage, as well as our own, it becomes desirable to have a Library of reference and something of literary intercourse to offer them.

As for our Literary Society, as distinguished from the Library and Museum, we believe it to be capable of a far higher development than our humble talents or amount of learning have as yet been able to afford it. For this we require not only books, but men—men of science, erudition, and religious feeling. And there is scope enough here for the exercise of great talents and industry, in the birth-place of Christianity, surrounded by Asiatic institutions and processes of the human mind: there is an interesting range of investigation to be found among unknown products of nature; we have strange combinations of the human family presented for study in this religious centre of the world; and ancient languages are spoken here every day, and all day long.

The land given to Abraham, with all its chequered history subsequent to the donation, can never fail to demand attention; and our aim is to explore not only what might be matters of curious research in any country, but impartially to record whatever may corroborate the sacred Scriptures of the Bible.

Contributions for the Library will be received by Wertheim and Macintosh, Booksellers, 24, Paternoster-row; who will forward to us boxes occasionally, by sea, to Jaffa.

J. FINN, H.B.M. Consul,
Member of the Royal Asiatic Society, London.

June, 1850.

REGATTA PRIZE.—The Plymouth Regatta Town Plate for this year is a very handsome silver vase and cover, weighing 112 ounces; it is eighteen inches in height, and has yachts in full sail, elaborately chased and in bold relief, on the body. At the base are dolphins and other marine emblems, richly chased. The handles represent two female figures, pointing to the sailing match between the yachts; and the cover is surmounted with a bold figure of Neptune, with his trident, in a car composed of shells, drawn by six horses. The *tout ensemble* is a good specimen of artistic skill as a regatta prize, and is highly creditable to the taste of the goldsmith who furnished it, Mr. I. A. Page, of Plymouth.

CHRISTIAN JULIUS DE MEZA, MAJOR-GENERAL, AND COMMANDER-IN-CHIEF OF THE DANISH ARTILLERY.

THE French-sounding name of Major-General de Meza, whose promptitude and decision determined the fortunes of the battle of Idstedt, may, perhaps, have led strangers to infer that, though serving in the Danish army, this distinguished officer was not born to be a defender of the country whose cause he has so nobly served. But, happily for Denmark, she has not in her hour of trial had to seek abroad for men capable of leading her brave sons to battle; and Christian Julius de Meza is a Dane by birth and education. Born in 1792, in Elsinore, where his father followed the profession of a doctor of medicine, he entered, in 1804, the artillery branch of the Royal Military Academy in Copenhagen; and, in 1807, then only fifteen years of age, he served his apprenticeship in war against the English, who in that year made their memorable attack upon Copenhagen

In 1811, Lieutenant de Meza was appointed teacher of military geography and Danish history in the military school for artillery cadets, in Copenhagen: and, in 1813, he was raised to the position of Adjoint on the Staff of the Quartermaster-General. Owing to a reduction which took place, he soon again lost this appointment, and resumed his position in the corps of Artillerists and at the Military Academy.

In 1821, Captain de Meza married Miss Tscherning (sister of Captain Tscherning, the first Minister of War under the new constitutional *régime* in Denmark), and in 1825 he commenced a foreign tour, being charged by the Government with examining into and reporting upon the *matériel* of the artillery and the state of the principal military schools in the Rhenish provinces of Germany, as also in Holland, France, Italy, and England. In this country the attainment of Captain de Meza's object was facilitated by the especial kindness of Lord Fitzroy Somerset, who, in spite of the dislike then prevailing to allow foreigners more than a superficial glance at our establishments at Woolwich, wrote to General Ramsay, requesting that he would permit the Danish officer to take small sketches of the various objects which might seem to him to deserve especial notice. Having been equally successful in the other countries which he had visited, the result of his tour was a mass of valuable notes and drawings, the arranging and copying out of which occupied several years. In 1828, the year after his return home, De Meza advanced to the command of a battery; and in 1829 he was made a Knight of the Dannebrog. He had already resumed his duties as teacher at the Artillery Academy; and when, in 1830, this establishment was superseded by a Military High School, Captain de Meza, being distinguished for his knowledge of the languages and literatures of Europe, was appointed professor of both in the new institution. In this position he continued until 1847; undertaking, however, in the interval, a new journey to Paris, with a view to the publication of a French pronouncing dictionary prepared by him, but which, owing to the disastrous circumstances of the publishing trade in France at that period, was not carried out.

Up to this moment it had been the fate of Major de Meza to belong to an army for a long period of years not called into active service, and whose efficiency for such an emergency remained untested: but as an indefatigable man of science he had gained for himself a position among the honoured in his country.

On the breaking out of the war in the Duchies, Major de Meza, who had re-entered active service in the corps of Artillery, was, in March, 1848, ordered to take the command of the batteries of Artillery forming part of the North Jutland Army Corps. The artillery force engaged in the campaign of that war was subsequently considerably augmented, and continued until the end of the year under the command of Major de Meza, who directed its operations at Ban and Flensburg, as also at Schleswig, at Wybel, and at Dyppel. The great skill and gallantry evinced by the commander in these various employments obtained for him the warmest thanks of the General commanding the army and of the Minister of War, who, immediately after the affair of Dyppel, promoted him to the rank of Lieut.-Colonel. On the 18th of September, the grateful acknowledgments of his Sovereign were added to those of his superior officer, King Frederick VII. presenting to him with his own hands, after the great review of the army of the north, the silver cross of the Dannebrog, saying, "Wear this in remembrance of me."

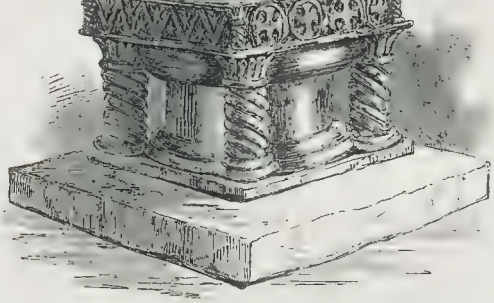
In December, 1848, de Meza was promoted to the rank of Colonel, and appointed to the command of the 6th Brigade of Infantry, which assembled at Als in 1849. On the 16th of April of that year, Colonel de Meza, having obtained the brevet rank of Major-General, succeeded Major-General von Bülow in the command of the three brigades (about 15,000 men) then stationed in the island, as well as of the whole artillery force on the spot. In this position he abstained with wise moderation from all unnecessary and profitless waste of powder and shot, and remained on the defensive, thus saving the town of Sönderburgh from repeated bombardment, which would inevitably have followed, had he given in to the opinion of those who wished the batteries on the coast to keep up a constant cannonade against the earthworks thrown up by the enemy to protect their position on the opposite shore. Every attempt at advance on the side of the enemy was, however, instantly and energetically repelled. According to a secret understanding between De Meza and Major-General Bülow, who had assumed the command of the north army corps, the 6th Brigade was, towards the end of June, conveyed over to Funen; and, on the 1st of July, De Meza himself left the island of Als for that of Funen, under pretext of inspecting various sea-coasts and ports, but in reality to repair to the quarters of the Commander-in-chief in Funen, where the sortie from the fortress of Fredericia, which was afterwards so gloriously effected, was determined upon. On the memorable night between the 5th and 6th of July, 1849, Major-General de Meza commanded the vanguard, formed of the 6th Brigade. As he was issuing from the gates of the fortress at the head of his staff, an aide-de-camp came galloping up to ask if it would not be advisable for the soldiers to take their bayonets off their muskets, as the glittering of the steel in the moonlight might attract the enemy's attention, and too early reveal their intentions. "We cannot remove everything that glitters," was the General's reply. "The principal thing is to have the bayonets in readiness at the decisive moment, and that will soon be here; therefore, leave them on." On the preceding evening the General had, indeed, intimated to his troops that, in the coming engagement, they would be called upon to thrust down, rather than shoot down, their enemies, and the men had responded enthusiastically to the intimation. The first assault of the Danish vanguard on the batteries of the besieging army was, in consequence, made bayonet in hand, without a shot being loosened; and though received by a murderous fire, the 6th Brigade did not quail, but went on storming and taking entrenchment after entrenchment until sunrise, when all the works on Igurn road were in the hands of the Danes. In the afternoon, such of the enemy as had not fallen or been made prisoners were in full flight, and the Danes remained undisputed victors on the field of Fredericia. "I had given you a difficult task to perform," said the Commander-in-Chief to Major-General De Meza, when the assembled generals were congratulating each other on the success of the day; and the brave officer replied, warmly thanking his superior for having entrusted him with so honourable a post. During the whole of this sanguinary battle he maintained his position in the centre of his own line: the imperturbable coolness which he evinced, while the balls of the enemy's musketry and artillery were raining down about him, being only once disturbed by an ebullition of feeling, which did not surprise those acquainted with the vivacity of his temperament and the warmth of his feelings. His favourite

horse, which had borne him through all the previous engagements, having received several wounds, he dismounted, and under the melancholy impression that he had lost the faithful animal for ever, he commenced writing a report to the Commander in-Chief. When, therefore, this being concluded, the horse was brought back to him refreshed and strengthened, he was so overcome by emotion that he threw his arms round the neck of the animal, and gave it an affect onate kiss.

Immediately after the battle of Fredericia, De Meza was promoted to the rank of Major-General, and on the 12th of September he was nominated Knight Commander of the order of the Dannebrog. On the 1st of January, 1850, he was appointed Commander-in-chief of the Royal Artillery, but having during the winter suffered from a most painful malady, and undergone a dangerous surgical operation, he was unable, at the expiration of the armistice, to accept immediately an active command in the army. As soon, however, as his health permitted it, and he was able again to mount a horse, he repaired to the army, and held himself disposible. He was thus present, when, on the morning of the battle of Idstedt (25th July), the general commanding the army, Von Krogh, received intelligence that the brave General Schleppegrell, commanding the

CHRISTIAN JULIUS DE MEZA, MAJOR-GENERAL, AND COMMANDER-IN-CHIEF OF THE DANISH ARTILLERY.

second division, was mortally wounded, that the greater number of the officers forming his staff were either killed or wounded, that several other officers of rank or of distinguished merit had fallen, and that in consequence a certain degree of confusion reigned in the division, and that it was feared that it would not be able to bear its part in the general attack projected. On hearing this, General Von Krogh turned to General de Meza, and requested him to repair to the field of action, and see what could be done; and the latter instantly departed, followed by six ordonances only. Subsequently two distinguished officers were despatched to serve as his staff, and one of General Schleppegrell's aides-de-camp, though wounded in the arm, continued during twelve hours to do service. Three-quarters of an hour after his arrival on the field of battle, General de Meza was able to inform the Commander-in-Chief that he had succeeded in rallying the division Schleppegrell, and in gathering a force sufficient to execute the projected movement. He then led the army to the attack, and after some



NEW FONT FOR EASTON CHURCH.

hours of despe rate and sanguinary fighting, the battle of Idstedt was w y the Danes. Notwithstanding his chivalrous bravery, General de Meza has escaped unhurt from every engagement in which he has taken part; but at the battle of Idstedt, the favourite charger, mentioned above, was shot under him, and the servant who brought him another horse received two wounds while holding it for his master to mount. This faithful attendant, who nursed the General through his late severe illness, did not, however, give up his charge, but continued near his master to the end of the battle.

NEW FONT FOR EASTON CHURCH.

EASTON Church, near Winchester, is of the latest Norman or transitional work. It is said to have been built in the reign of Stephen, by William de Blois, and is dedicated to Mary. The church is vaulted, and has an apse; the arches are pointed and horse-shoed, richly moulded and ornamented. The south door-way is a rich specimen of the period: the shafts have three bands; the arch is round, but the capitals are more of early English work than Norman. On the ridge of the roof there are some very good and singular crest tiles. Like many other country churches, the interior fittings of this little edifice did but small justice to the antiquity or early associations of the building. The first step, however, towards improvement was effected by the present Rector (the Rev. R. D. Buttemer), about two years since, by the removal of a cumbrous reading-desk and of the chancel pews, for which were substituted oak sittings of suitable ecclesiastical design; and this was followed by the repair of the beautiful door before noticed. The comparative poverty of the parish rendered any general renovation impracticable, but, through the exertions of the Rector, and the liberality and industry of the few who had hearts and hands to dedicate to the holy work, something has yet been done. The Rector himself has placed a small window of stained glass in the south side of the chancel, and a relative of his has presented an altar-cloth of crimson velvet; it has been further enriched by a cross of most exquisite workmanship, executed by some ladies in the parish. Within the communion rails there is also a carpet, worked and presented by one of the parishioners, exhibiting great beauty of design and brilliancy and harmony of colours. The crowning gift, however, to this little church has been that of a font, executed entirely by the hands of a lady, also resident in the parish. It is of Caen stone, the design being taken from the well-known old font in New Shoreham Church, which, bearing the characteristics of the late Norman, was appropriately selected for the model. It is 2 feet 9 inches square, and has a massive centre pillar and four spiral shafts; the sides have each a different pattern, deeply cut; the stopper is of bronze, in the form of a lotus cross. The *artiste* of this valuable gift was employed somewhat less than twelve months in its completion; she determined that no other hands should share with her own the labour, and rejected, therefore, all aid, even in the mechanical part of excavating the basin or preparing the shafts for the chisel. It was begun in June, 1849, and was used for the first time on Sunday, the 23rd of June, at the baptism of the infant son of the respected Rector.

As the Norman style is now very popular with church architects, the following observations may be acceptable. they are from the "General Antiquities" section of the able "History and Description of the Great Western Railway:"—"It is probable that by far the greater number of the churches throughout England were rebuilt, or more or less extensively repaired, during the Norman period. In many cases, the masonry, always of a substantial character, remains but little changed; in others, the old carved and dressed stones are seen built up into the later parts. In the absence of ornament, the Norman work may be detected by the thickness of the wall, by the absence of buttresses, or by their extreme flatness when present, and occasionally by the appearance of herring-bone and other oblique patterns in the masonry, borrowed from the Roman works. Frequently the font, and sometimes the doorways, or the arch into the chancel, are the only parts preserved of the old Norman structure. The windows were inconveniently small, and have generally been removed." At Upton, for example, some of the windows have been replaced by Early English.

MUSEUM IN THE ROYAL BOTANIC GARDENS, AT KEW.

THE leading characteristics of this collection is its great variety of manufactured specimens of vegetable substances; the inspection adds even a charm to the Gardens.

The Museum is a plain building, in size and style resembling that in the Gardens of the Zoological Society. The objects are exhibited in cases fixed to the walls, and in a double row in the centre, all ticketed in plain language, and of a character to interest the least educated person; and consisting generally of the raw and manufactured produce of the vegetable kingdom.

Among the specimens are straw and grasses, beautifully worked up; cotton in all itsstages of perfection; flax, from the rude stem to its manufacture into the most costly fabrics for dress or the table; native cloths from New Zealand, China, Ceylon, the Sandwich Islands, and some of very delicate texture and elegant design, made of grasses, palm fibres, and paper mulberry; India-rubber and gutta percha in every form: also teas, of which many varieties are almost unknown in Europe; coffee, sugar, spices, gums, resins, drugs, and woods for dyeing; seeds, leaves, and roots used in medicine. Such fruits and produce as cannot be dried are beautifully preserved in spirits. Among foreign and British woods, polished and unpolished: one case, in particular, contains sixty-six varieties of Brazilian woods, collected at Candoza, by John Taylor, Esq. An exceedingly curious and important series consists of specimens showing the internal injuries produced by pruning timber, and also by insects.

There is a small, and, it is to be hoped, increasing collection of flowers and trees, painted from the life, with full descriptions. Two of them must not be passed over: the side-saddle plant (*Sarracena purpurea*) of South America, the serrious tabular leaves of which have a number of inverted leaves at the mouth, which facilitate the entrance of numerous insects, but retain them until they die, being nourished by animal juices; and the *Omiranda fenestralis*, the leaves of which are natural skeletons, the places between the vascular tissues never being filled up.

There is a collection of tropical fruits, modelled in wood and coloured from nature.

Some very beautiful household utensils, made in Para, have been presented by Sir E. Horne: they are formed of the ashes of the *curipa*, or pottery tree, mixed with clay, which neither break nor burn in the fire

An elegant coronet, brought from the South Sea by Capt. Kellett, R.N., is made of the young cuticle of palm leaves, and looks like shreds of gold, curled.

Various sea-weeds, used as food, both in savage and civilized life, are exhibited, as also bread made of seeds, bark, berries, and pollen.

The remarkable and indispensable tree of the tropics—the palm is richly illustrated in its produce, uses, and most wonderful specimens of fructifying flowers, especially those of the *Maximiliana regia*, presented by E. G. Boughton, Esq., of Demerara. A cluster of cocoa-nuts, truly gigantic, presented by N. B. Ward, Esq., and the double cocoa-nuts of the Seychelles Islands, are very fine. There is a portion of the trunk of an ela palm, which measured 7½ feet from the ground to the first leaves, brought from Para.

The curious bunches of the *Nipa fruticas*, from Malacca, were presented by Sir W. Norries. Wax is shown, as scraped from the Wax Palm, and candles made of it; as also some made of acorns, and closely resembling common tallow; with *Kok*, scraped from the base of palm leaves, used as matchlock tinder in Malacca; and a sort of cotton, from the *Etaa malanocarpa*, with which they kindle fire; also, a portion of the aërial roots of the *Aroactes axorhiza*, used by the natives of New Grenada as a grater. A white hat, made of pith taken from the palm tree, was brought from Singapore. Hats and cloaks, made of the fibres of palms, and quite waterproof, are exhibited, from China, Ceylon, and New Zealand; the body-cloth of the Dyaks of Borneo, made of the same fibres; and spoons of the Navigators' Islands, made of leaves cut and closely strung. A shawl, made in Manilla, of the fibres of the *Musa textilis*, and beautifully worked, is equal to the finest cambric.

Some whips, from Jamaica, are made of the leaves of the lace-tree, and ornamented with bunches of the same, which, from their delicate pen-work appear-ance, derive their name

Captain Bowerbank has presented some beautiful specimens of silver and copper electrotypes of skeleton leaves and flowers, which vie with the most delicate filagree work; and some small beetles, by the same process, resemble frosted silver. The skeleton leaves, fruits, and flowers are prepared by Mrs MacLean Smith, of Chelsea. who has presented some flowers and leaves, in colour and texture like white lace

Some approximate analyses are shown of the substances contained in bread, potatoes, &c., made by Professor Henslow.

Here are concrete milk and butter, made from the trees of that name in Para: also, cones, seeds, pods, nuts, and berries from all parts of the world; among them acorns as large as a wine glass, which are found growing on the Himmaleh Mountains, in clusters several hundred together. There are some

MUSEUM IN THE ROYAL BOTANIC GARDENS, AT KEW.

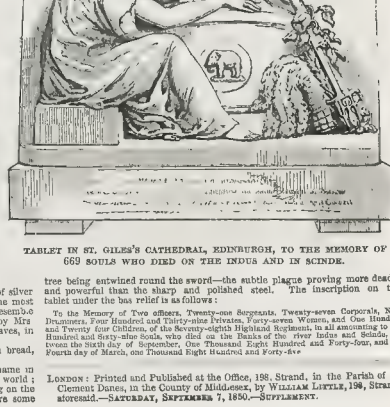
stems of Brazilian creepers thicker than a large arm, which hang 100 feet o more from the top of the loftiest trees in the forest, and render it quite impenetrable to man. In proof of the extreme fertility of grain, there are shown the stalks of some gigantic potato oats, produced from a single grain, which contained 1750. Some very singular natural sacks are shown, as stripped from the tree of that name growing in Bombay; they are from six to eight feet high, and in appearance like felt, the only joining being at the bottom.

Many elegant gourds and calabashes are here collected: the snake viper gourd resembles a convoluted serpent, having the extremity pointed, and the part by which it is attached formed like the head, a miniature gourd of Thibet, of elegant proportions and bright scarlet colours, is used by the Lepsin Tartars as a snuff bottle. A portion of a matted mass of willow-ash root fibres, measuring 18 feet long and 1½ feet round, which had choked up a drain at Hitcham, in Suffolk, is a remarkable proof of the power of vegetable life to force and sustain its vigour under the most unnatural circumstances.

E. J. C.

TABLET IN ST. GILES'S CATHEDRAL, EDINBURGH.

THIS interesting piece of monumental sculpture, from the chisel of Mr. Steell, has lately been erected on the western wall of the great central entrance-lobby of St. Giles's Cathedral. The memorial consists of a large tablet, with bas-relief and inscription, and it is dedicated to the memory of six hundred persons belonging to and connected with the 78th Regiment, who died in Scinde in the short space of six months, between September, 1844, and March, 1845. This fearful mortality was the result, not of the fatal chances of war, but of the still more deadly influences of a pestilential climate. The design of the bas-relief consists of a single female figure, seated on the ground, in an attitude expressive of the prostration of deep and settled grief, the nerveless arms extended over the end of a sarcophagus (on and around which are some of the insignia of the regiment to which the sufferers belonged), the head sinking forward, as if to be shortly buried between the recumbent arms, while the exquisitely moulded features are charged with "a rooted sorrow." Full but simply arranged folds of drapery envelope the whole figure, and those around the head are contrived so to fall over and encircle the face as to cast it into appropriate shade, thus, as it were, guarding and keeping sacred the calm absorbing grief of which the features are so tenderly expressive. The cause of the immense mortality the monument commemorates is indicated by a branch of the upas



TABLET IN ST. GILES'S CATHEDRAL, EDINBURGH, TO THE MEMORY OF 669 SOULS WHO DIED ON THE INDUS AND IN SCINDE.

tree being entwined round the sword—the subtle plague proving more deadly and powerful than the sharp and polished steel. The inscription on the tablet under the bas relief is as follows:

To the Memory of Two officers, Twenty-one Sergeants, Twenty-seven Corporals, Nine Drummers, Four Hundred and Thirty-nine Privates, Forty-seven Women, and One Hundred and Twenty four Children, of the Seventy-eighth Highland Regiment, in all amounting to Six Hundred and Sixty-nine Souls, who died on the Banks of the river Indus and Scinde, between the Sixth day of September, One Thousand Eight Hundred and Forty-four, and the Fourth day of March, one Thousand Eight Hundred and Forty-five

THE LATE ATTACK UPON MARSHAL HAYNAU.

THE COAL-CELLAR AT THE "GEORGE," BANKSIDE.

THE BED-ROOM IN WHICH MARSHAL HAYNAU WAS CONCEALED.

ESCAPE OF MARSHAL HAYNAU IN THE POLICE GALLEY.—(SEE NEXT PAGE.)

THE ILLUSTRATED LONDON NEWS. [SEPT. 14, 1850.

THE ATTACK UPON MARSHAL HAYNAU.

Since the publication of our last week's Journal, some additional details of this affair have been collected, but they do not differ materially from the particulars we have already given. It appears that no sooner had the Marshal written his name in the visitors' book at Messrs. Barclay and Perkins's Brewery, than a commotion was visible in the office, and ere many many minutes had elapsed, several of the clerks and collectors were seen to leave the brewery hastily, and in a short space of time the carters, draymen, and others from the opposite premises of the establishment, with a host of labourers from the neighbouring Borough-market congregated outside the gates of the brewery. Some of them were armed with long carters' whips, and others had the heavy brooms. The General had been shown over most of the departments, and had arrived at the stables, when the series of assaults commenced.

On his escape from the brewery, and, with his nephew and interpreter, reaching the street, they were met with the most fearful yells and execrations from the mob who had collected outside the gates. Some of the carters, who were in waiting with their heavy whips, cried out, "Oh, this is the fellow that flogged the women, is it?" and instantly commenced lashing him with all their might. The Marshal then quickened his speed, but the mob, which had considerably increased, crowded round him, and all that could get near him were kicking and pushing him, and crying, "He's a murderer; give it him!" "Down with the Austrian butcher!" "Shove him into the river." With some difficulty he contrived to reach the corner of Bankside, when he was knocked down, and an attempt was made by the more excited of the populace to drag him away. His nephew and interpreter, however, managed to keep hold of him, and again got him upon his legs. He then made another effort to get away between his attendants. The mob, however, followed him up, and lashed, pelted, and hooted him most furiously. Several gentlemen who witnessed the attack made an attempt to protect the Marshal, who seemed to be fast sinking from exhaustion and ill-usage, while his interpreter implored the mob not to kill him. Two young men in the service of Mr. Winter, the ironmonger, in Bankside, met the man, and endeavoured to restrain them, but in vain. Another rush was made at him; his hat was thrown up in the air amid loud derisive shouts, and his clothes nearly torn off his back. By this time the party had reached the George, on Bankside, and in the confusion the General succeeded in getting from the mob, and running into the house. The nephew and interpreter rushed after the door as long as it was practicable; they, however, were soon compelled to seek shelter inside, the mob beating them and rushing up-stairs. In an instant, the lower part of the house was filled by the mob, while hundreds collected in front. Loud were the cries: "Out with the butcher!" "Drag the murderer out!" "Down with the wretch!" Several rooms were then entered, but the Marshal could not be found. Several men sealed the front of the house, and got into the front room windows. The nephew and interpreter were found on the landing, but the object of their fury was nowhere to be seen. In a few moments a loud yell proceeded from the back part of the premises: some coalheavers had discovered the Marshal crouched in a dog-kennel attached to the house. By the hair of his head they dragged him out, shouting, "We have got the Austrian woman flogger!" This announcement was received with almost frantic cheers by the mob outside the house, and the Marshal was being dragged along the passage into the streets, when his cries attracted the sympathy of some strangers, who, with the aid of his nephew and interpreter, succeeded in getting him from the grasp of his assailants, and in locking him up in one of the bedrooms, while others stood sentry at the door, and prevented it being forced. On the arrival of the police, the fury of the mob was quelled: the inspector, on entering the house, found the General seated on the edge of a bed, much exhausted, and complaining severely of the pain he endured from the injuries inflicted upon him. Under the protection of a strong body of police, he at length ventured to make for the Thames police galley that was lying at the bottom of the stairs fronting the George. Getting safely into the boat, it was rowed to Waterloo Bridge. A cab was then procured, and the exhausted Marshal was then conveyed to Morley's Hotel, Charing-cross. When he took his departure from Bankside, he was greeted with yells, and his hat was thrown into the river after him.

During the remainder of that day, the General was confined to his bed at his hotel. On Friday, he was still suffering from the injuries he had sustained. He was visited by several of the Austrian nobles and others resident in London; and, in the course of Friday night, he took his leave.

It has been mentioned that the Bank of Barclay and Perkins had suspended the whole of the hands employed on the establishment. Such, however, is not the case. Although the firm greatly regretted the occurrence, they did not see that any good would result by their stopping such a course. And in order that the excitement may be allayed in every possible manner, the signature of General "Haynau," in the visitors' book, has been obliterated.

TOTAL LOSS OF THE "INDIAN" INDIAMAN.

This fine Indiaman, 500 tons burden, was wrecked on her outward voyage from England to Bombay, on a reef of rocks named the Cargados Garuyos, or Newcastle-bank, with a melancholy loss of human life. The annexed narrative is from a gentleman who was a passenger on board:—

"Nothing of any note occurred until the night of the 4th of April last, when, at eight o'clock, the captain informed us, that, if his reckoning was correct, we should either be clear or very nearly upon the Cargados reef. Being rather taken aback at the news, I went to the forecastle, and, I can forward to the forecastle, followed by the captain and one of the passengers. Twenty minutes had not elapsed before I distinctly saw breakers ahead, which I immediately pointed out to the captain, who was standing by himself

COUNTRY NEWS.

REPRESENTATION OF HEREFORDSHIRE.—The *Hereford Journal* announces that Mr. Booker is now a candidate for that county

REPRESENTATION OF LYMINGTON.—The Protectionist Association of this borough have forwarded an address to Mr. Mackinnon, to ask him to form the honourable gentleman that he does not possess their confidence, and that they will oppose his re-election at any future period. The uniform support which Mr. Mackinnon has given to the policy of Free Trade is assigned as the reason for this manifestation of political feeling.

REPRESENTATION OF MONTGOMERYSHIRE.—Mr. Herbert Wynn, who has announced himself as a candidate for the suffrage of the electors, issued an address on Monday morning, in the course of which he says:—"I shall, therefore to secure to the agricultural interest protection for their just rights; and to co-operate with the friends of that interest in Parliament in relieving it from the distress and ruin our recent legislation has entailed on the English farmer; and I shall oppose any proposal to admit into Parliament the enemies of the Christian religion."

RE-OPENING OF ST. PETER'S CHURCH, LIVERPOOL.—On Sunday last this fine edifice was re-opened, after a lapse of ten weeks, which had been occupied in the renovation of the whole of the oak carving and oak work of the interior, and the decoration of such portions as admitted of the application of the artist's taste and skill. For adornament of such a description and handling character (but which had been unaccountably neglected for many years) the congregation is indebted to the liberality of the churchwardens, whose efforts will not fail to be appreciated as they deserve. The decorations (which are executed in a high style of art) are most conspicuous in the refreshing and enlivening of the fine oak carving, particularly of the splendid and elaborate device over the communion table, and in the great ceiling and grofined side arches, which latter are lined with delicate blue, fine tracings, plaster, and pillars being of a light stone colour, and the capitals white, etched with gold. The centre-pieces of the arches are relieved by dead white, with gilded drops, and those of the great ceiling by richly gilt. The effect of this portion of the work is rich and pleasing in the extreme, and reflects no little credit on the discrimination and skill of the decorator. In the altar window a tasteful improvement has been effected by the introduction of a stained glass border, which will accord with the rich floral character of the wall itself. The whole of the panelling, including the front of the galleries, organ, &c., has also been renovated and varnished, and the inside of the pews painted to match. The pulpit is also richly gilt, and the communion, as well as baptismal, panelling re-lettered and ornamented in a pleasing style. The trusses and beams of the gallery are newly painted, so as to correspond with the general effect of the wood-work decoration. The corporate pews are beautifully furnished.

THE SCOTCH EPISCOPAL CHURCH.—THE NEW PRAYER BOOK.—At a special meeting of the Episcopal Synod held at Edinburgh on Monday, for the purpose of considering the new Prayer Book which has been under the review of the Church of Scotland a Prayer Book unsanctioned by its authority, and intended to occupy the place of the Book of Common Prayer of the Church of England, the following resolutions were adopted:—

1. The Synod of Edinburgh, in the first place, resolve respectfully to address the Right Reverend the College of Bishops, in order to testify their grateful acknowledgments for the communication of their services for the revision of the Scottish Communion Office, published, and titled "The Book of Common Prayer and Administration of the Sacraments and other Rites and Ceremonies of the Church, according to the use of the Church of Scotland, &c.—Edinburgh, 1849."

2. The Synod express their regret and astonishment at an assumption of power so unauthorised and so dangerous to the peace of their Communion as that of issuing a Prayer Book for the use of the Church, without the authority of a General Synod or Convocation; and this humbly pray that their spiritual fathers in Christ will take decisive steps for the restoration of the authority as governors of the Church, and as the guardians of her existing laws—an authority which, by the continued publication, and advertisement of the book, they regret to find has lately been resisted and denied: and further, this Synod earnestly implore their right reverend fathers to issue such a pastoral Declaration as shall satisfy the members of the Episcopal Church in England, and the Bishops of the United Church of the United Churches of England and Ireland, and of the colonies, and to that of the Episcopal Church in America, that this Prayer Book is not put forth under any competent authority, and that it is not recognised as a formulary having the sanction of any law of the Church.

PROPOSED ELECTRIC TELEGRAPH ACROSS THE MERSEY.—Experiments are about to be tried on the Mersey with the view of carrying an electric telegraph line across the river from Liverpool to Birkenhead, and it is said that the dock authorities will now no longer delay to fulfil their long-entertained idea of establishing wires northward along the shore to Formby, &c., and westward to Bidston. No question can exist of the importance of such a measure, as, largely calculated as it is to render the existing marine telegraph effective in foggy weather. On the occurrence of a mist, or an east wind, Liverpool, under the existing system, is entirely prevented from obtaining intelligence of ships off the harbour, waiting steam, &c.; and we trust the opportunity will not now be permitted to lie unimproved. The wire to be used will resemble that in use for the telegraph across the British Channel.

THE CATHOLIC CHURCH.—On Wednesday, another splendid Roman Catholic church was opened at Sheffield with great pomp Many bishops were present, and about forty of the secular and regular clergy. The decorations are very splendid, and the entire building manifests neither a lack of zeal nor money.

POSTAL REGULATIONS IN SOUTH WALES.—The recent alterations in the route of the mail, by which letters are forwarded from London to the principal ports and the west of England into South Wales and Bristol, and across the river Severn at the Old Passage, instead of through Gloucester, has caused much dissatisfaction and inconvenience at Swansea and other towns on the route. The grievance appears to be that the mail in crossing the passage is subject to the delays and irregularities inseparable from that mode of transit, and that in the winter time these inconveniences will be much increased. A short time ago the London mail was delayed before its arrival in Swansea, and likely to be so often in the summer season. Other delays have arisen, and, in consequence, the inhabitants anticipate that when the winter really sets in, their correspondence, instead of arriving at eight A.M. at Swansea, will not reach them until eleven and twelve o'clock. To the west of Swansea a postal delay is of much consequence, as it reduces the opportunity for reply by return to a very short time; at Llanelly not more than two hours remaining. At Carmarthen the mail is still less. The inhabitants are about to memorialize the proper authorities on the subject.

THE Dundee Short Time Committee has been dissolved; but it is alleged that the factory operatives of that place are dissatisfied with the compromise of which the act of last session is the result. The *Dundee Advertiser* says they are preparing to agitate again for the shortening of factory labour to its former limits.

THE MOORS AND THE RIVERS.—We learn from our Scotch contemporaries that the sport upon the moors has, upon the whole, been very good during the past week; and in the forests the deer-shooting has been everything that could be desired. In the rivers in the north of Sutherland the sport has been very indifferent; but in the Ness, particularly on the upper waters, anglers have been very successful. From all parts we hear that game is more than usually abundant. The birds, however, are very strong upon the wing, and the sportsmen have, in the majority of instances, returned with light bags

CLEVER CAPTURE.—A Mr. Frederick Oliver Rawlinson, confidential clerk in the house of Messrs. Brandt and Co., merchants, Liverpool, has lately absconded, taking with him a large sum of money, has been apprehended through an ingenious device of the head of the Manchester Detective Police (Mr. Beswick), at Birmingham. Rawlinson had been traced to Manchester, but there lost sight of. The case was consequently placed in Mr. Beswick's hands, who, learning that the gentleman had paid his addresses to a lady in the neighbourhood, visited her with a view to making inquiries concerning Rawlinson's present condition, and to ascertain, if possible, the place of his retreat. This at length said he had gone to London, and had attempted to persuade her to accompany him. A watch was placed upon the house where the lady resides, and as a letter was delivered to her next morning, the police-officer on watch (Inspector Neaves), having reason to believe it might be from Rawlinson, directly it was placed in her hands, demanded to see it. It was yielded up, and was in the following words:

Birmingham, Friday Afternoon.

MY DEAR MARGARET,—I arrived here this morning about ten o'clock, quite hearty and well (thank you), wishing all day you had been with me, as I was quite to myself and consequently low-spirited. Perhaps you will come by the quarter past ten train to-morrow, and I shall meet you at the station on arrival here. Should however, we miss each other, which is not at all likely, I will then take a cab and tell the man to drive direct to the King Edward Parade. Bewlingham (do not forget), and remain there till I come, as I have been stopping there since I have been here. Do not, dear Margaret, forget the caution I gave you upon leaving Manchester, not to tell anybody where you are going, or where I am at present. If you cannot come by the train I name to-morrow, then you must not fail at night. In both cases I shall be at the station. I trust you will make this out, though I write in a great hurry. Will you be good enough to post the enclosed, and oblige. Now, dear Margaret, I remain the pleasure of seeing you soon.

Yours, ever faithfully and affectionately, FREDERICK.

Miss ——, Salford.

The result was, that the unfortunate lover, when the train reached Birmingham, instead of clasping his "dear Margaret" in his arms, was astounded to find himself in the hands of a police officer, at whose call was Mr Daniel, one of his fare employers. Money was found upon him to the amount of £212 8s.; and other sums which he had recently spent and otherwise disposed of, to the amount of £200, were traced to his credit. He is expected, at the next Liverpool

EXTENSION OF ADULT MALE LABOUR IN THE GLASGOW FACTORIES The Factory Act does not directly interfere with adult male labour. Operatives falling within that description are supposed to be able to make arrangements with their employers, regarding hours of labour and wages for work, although no statutory obligation exists. One house in town determined to dismiss their female and juvenile operatives, and work twelve hours daily. The experiment is, we believe, quite legal, although it may not be profitable. In the meantime their adult male operatives have struck work. The new arrangement would so evidently correct various evils, that many individuals may be disposed to see a fair trial of the scheme. We do not fully comprehend the plan, as hitherto the labour of comparative children and females has been considered necessary in the business; but the practical department is for the judgment of interested parties alone; while the moral result, in the substitution of a certain quantity of adult male labour for that of females and children must be favourable, in a short period, to the factory districts and their population *Daily Mail*

BANK DEFALCATION IN GLASGOW.—We regret to learn that Mr. James Dewar, a teller in the Western Bank here, has disappeared, and, on investigation, has been found a defaulter to the extent of £2500. He left Glasgow at an three weeks ago, on the usual vacation, but not having returned in due time, suspicion was excited, and it was discovered that he had defrauded the bank to the above-mentioned extent. Intimation was immediately made to his sureties, upon whom the loss will principally fall, and who are endeavouring to trace the fugitive. *Daily Mail.*

THE HARVEST.—Throughout the country the weather continues highly favourable for harvest work, and a large proportion of the crops of all kinds have been already gathered; and if the weather should continue fine for a week or ten days longer, nearly the whole of the crops will be secured in the stack-yards. The agricultural reports, although very contradictory, seem to indicate that the yield of wheat, both in quality and quantity, will be better than was at one time anticipated.

NEW WHEAT.—At the Leicester corn market last Saturday, a large quantity of new wheat was offered for sale, and from 44s. to 46s. per quarter was asked for it, and with confidence, the general impression being that those rates will be maintained, if not increased

PARKHURST PRISON.—Another attempt was made on Wednesday night to set fire to this prison. Parkhurst, as burnt down on that occasion, a portion of the establishment recently erected on the northern side of the bridge, upon Horsestream-hill, which is known as the juvenile prison, and is generally occupied by the more depraved of the pilfering community. The endeavour was first discovered, and luckily frustrated, by a warder named Wilson. The attention of the warder was drawn to something extraordinary occurring by a strong smell of burning linen. On entering one of the sleeping compartments, which are constructed of thin and light wood, similar in shape and appearance to those in the C ward dormitory, which was destroyed by fire a few weeks since, a vast body of fire was discovered, the flames from which were then reaching the ceiling. The surrounding partitions were scorching with heat, and in less than another five minutes the whole building would have been in a blaze. The alarm having been promptly given, assistance arrived, and the fire was, with some difficulty, prevented from spreading. A strict examination was then made, when it was clearly ascertained that about a shovel full of burning coal had been obtained from one of the tailor's stoves used for heating irons, which had been placed on the flooring of the cells, and over this the prisoners had placed their beds and bedding

THE NEW PACKET STATION AT LOWESTOFT.—One of the new steam-ships, the *Prince*, designed by Captain Andrews, the harbour-master at Lowestoft, for the station between that port and Harwich, and built at Hamburg, made an experimental trip down the river on Tuesday. She is a fine stately-looking vessel of 446 tons burden. Her style of build, engines, and internal arrangements have been framed with a benefit of every improvement in the profession, and are such apparently as will secure, as far as possible, speed, security, and accommodation. Leaving her moorings at half-past ten o'clock, with several eminent engineers and other scientific gentlemen on board, she proceeded down the river below Sea-reach in excellent style. During her progress, she had frequent opportunities of testing her speed with the fast river steamers, and in every instance she exhibited a superiority of rate in the second and intermediate mile exceeded fifteen miles an hour. She is fitted with engines of 200-horse power, with oscillating cylinders by Penn. They worked with the greatest ease, scarcely any vibration being perceptible. The wheels are 10 feet in diameter, each wheel being fitted with twelve paddles 9 feet by 3, and during the trip the average number of revolutions was thirty a minute. Her dimensions are—Length, 160 feet; breadth, 24 feet; and depth, 13 feet; and no expense seems to have been spared to render her a first-class packet.

THE CAB STRIKE IN LIVERPOOL.—The difference between the Liverpool Town Council and the car proprietors is likely to be compromised. The Council has appointed a committee to revise the rates, and the car proprietors have placed their vehicles at the service of the public. Should a satisfactory arrangement be made, the revised rules must lie on the council-table a month before they can be approved, and then remain in the hands of the Secretary of State at least forty days, thus preventing the sanction being given before May. Until the lapse of that time, provided the council agree to any alteration, the car-owners will be liable to a penalty if they charge other than the new scale of fares. Dissatisfaction has now spread amongst the car-drivers; for they, taking advantage of the leisure which the strike gave them, met to discuss their grievances After much conversation, they agreed to present a memorial to their employers, praying that their wage be raised from 14s. to 18s. per week.

A NEW PHASE IN HOP-PICKING.—The commencement of this important part of the harvest operations in Kent has drawn together multitudes of strangers mostly Irish labourers and their families—in the hope of getting employment. In the parishes of East Farleigh and Hunton and the villages there are probably not fewer than 2000 poor creatures swarming about the roads, and "squatting" on any bit of waste land they come to. At nightfall, the scene is often very romantic and striking. Two Roman Catholic priests have been sent down from the oratory mission in London, to administer the rites of their creed, to which the far greater part of the "strangers" belong, and vile celebrate matins and vespers in a marquee erected for the purpose. "Their presence," says the *Maidstone Journal*, "ensures a degree of decorum and quiet among the crowd never before observed."

THE dead body of a respectably dressed man was found on Tuesday morning, on the Liverpool branch of the London and North-Western Railway Company, between Eccles and Patricroft. Both his legs had been cut off by a train passing over him; but whether he was a person who had been crossing the line, or thrown himself in the way of a train with the view of suicide, cannot be ascertained. There were no papers in his pocket which could lead to a discovery of who he was, nor has he been identified by friends. It was at first thought that he might have been a passenger, and had fallen off the train, but none can be found upon him. The driver of a late train on Sunday evening recollects feeling a jerk of the engine on or about the spot, and says he looked behind as well as his darkness would enable him to do, but could perceive nothing, and in taking care the wheels had come in contact merely with a bad joining of the rails. The unfortunate man appeared to have been dead some hours when found.

INCENDIARISM.—On Saturday night last, shortly after eight o'clock, a fire was discovered in the rick-yard of Mrs. Hannam, of Gadbridge Farm, Hyppert, about three miles distant from Windsor, and although engines from Maidenhead, Bray, Hirst, and Windsor were speedily on the spot, the fire was not got under before a large barn full of old wheat, and two other barns, with six large ricks of new oats, and four large ricks of wheat just housed, a six-stall stable, three pig-sties, and two sheds, were destroyed: indeed, in addition to the large stock of old wheat, the whole of the produce of the farm, save the with the exception of some barley and beans, and a few potatoes, was totally destroyed. The property is insured in the Royal Exchange office to the amount of £4000, but this sum will not cover the loss. Fortunately, Mr. Hannam, the master, who manages the farm for her, was at home, and he, on immediately proceeding to the rick-yard, observed three men making their escape, two of whom he distinctly recognised, and warrants have been issued for their apprehension.

POISONOUS FUNGI.—In consequence of a recent case of poisoning in a family at Bristol, and of representations made to the magistrates of that city that persons were in the habit of bringing poisonous fungi into the public market, and palming them off upon the unwary as mushrooms. an examination was made on Saturday last, and the officers succeeded in seizing a basketful of so-called mushrooms, which presented a suspicious appearance. They were taken to the station-house, and submitted to the examination of a competent judge, who found that only twelve of the whole lot were veritable mushrooms, the remainder being poisonous fungi. The magistrates intend to issue a notice that they are very dangerous to persons eating them. The parties exposing them were taken before the justices; but it turned out that they had merely acted as agent for another person, and were ignorant of the true character of the fungi

ACCIDENT ON THE EASTERN COUNTIES RAILWAY.—On Sunday morning, the 10 A.M. train from London to Enfield, instead of being stopped at the ticket platform, as usual, was run at great speed into the Enfield station, by which the sa'v buffers were broken, and several of the carriages damaged, the imaged, the collision causing about a dozen of the passengers to be injured about the head and body by bruises, two, it is stated, somewhat seriously. The greatest confusion prev ailed, the passengers being jumbled together, and, from the blood flowing from the wounds of those injured, it was imagined that much greater mischief had been done than was really the case. Both the guard and fireman jumped off the engine and tender, the former being considerably hurt in his hands and face. The driver, who escaped unhurt, was sent to Stratford, and in place supplied by another driver, who drove the engine into the carriage shed, had caused considerable damage to it

APPREHENSION OF A RUNAWAY BANKRUPT.—A few weeks ago, Mr. John Hunt, a small silk-manufacturer at Middleton, absconded, and sailed for America, leaving his creditors minus to the amount of about £2000. It appears that he arrived in Philadelphia on the 24th of May, remaining, at all events, till June. On the 22nd of the same month, one of his creditors, Mr. Delauney, of Blackley, was sent in pursuit of Mr. Hunt, and sailed in the *Europa* steamer, on the above date, from Liverpool. He arrived at Philadelphia before Hunt, and had him apprehended on his arrival. Mr. Delauney has received instructions to bring the runaway bankrupt back to England, where he is expected in the course of a few days.

The directors of the Sunderland Subscription Gas Light Company have announced that, from the greatly increased consumption of that article, they have been enabled to reduce the gross price of gas from five shillings to four shillings per one thousand cubic feet, subject to a discount of twenty-five per cent for prompt payment during the month after close of each quarter, making the next price three shillings, at which price they are prepared to treat with consumers for a term of years.

EVERY parish in Scotland is crowded with prisoners sentenced to transportation. In that of Edinburgh alone there are upwards of sixty male transports, and the other parts of the prison allotted to criminals of a less advanced stage are crowded to excess. The burning of Parkhurst has crammed the convict *depôts* at Millbank, Wakefield, and in the Isle of Wight, and it has been resolved to quarter as many as possible in the Perth Penitentiary. A selection has been made of the most healthy in the prisons of Edinburgh, Glasgow, and Aberdeen, and they are to be removed to Perth in the course of next week.

PROFESSOR AIRY having stated to the Lords of the Treasury that M. OTTO VON STRUVE, of the Imperial Observatory of Pulkowa, St. Petersburg, is expected to arrive in England with the standard bar employed in the great Indian survey, which had been entrusted to the Russian astronomer for comparison with the standards used in the Great Russian survey, and that it was important that the bar should be landed in its case with as little disturbance as possible, their Lordships have given directions that the bar be examined with the utmost possible care, and at once delivered

The *Scottish Press* states, that the Hon. Stuart Wortley has intimated to his constituents in Bute that it is not his intention to renew the measure for legalising marriages with a deceased wife's sister; and that, in the event of another member of the House taking it up, he will use his endeavours to get Scotland exempted from its operation.

IRELAND.

TOUR OF THE LORD-LIEUTENANT IN THE NORTH.

The Lord-Lieutenant arrived in Belfast on Saturday afternoon by the Ulster Railway, from Armagh. The troops forming the garrison lined the streets from the terminus, and his Excellency was received with every possible mark of respect. The people of Belfast still cherish, with more than their usual enthusiasm, the recollection of her gracious Majesty's visit to their city last year, and were, no doubt, prepared in the present instance to bestow on the representative of royalty much of the demonstration of regard which those feelings prompted. On arriving at the terminus an address was presented to his Excellency by the railway directors, and in his reply Lord Clarendon said:

I have much pleasure in invite attention to the means by which the abundant resources of Ireland might best be brought to account, and, if you consider that during the last three years the national industry has been promoted, and a healthy stimulus to enterprise has been imparted by the Government, I venture to hope that the objects which I had in view have, to a considerable extent, been accomplished. I need hardly assure you that I look upo facility of intercourse between different parts of the country as indispensable to its prosperity and progress, and that, consequently, no exertion shall ever be wanting on my part to extend gratuitously throughout Ireland the important benefits which the Ulster Company took the lead in affording to Belfast and the districts traversed by that railway.

His Excellency was then conducted to an upper hall, where a lunch was prepared, and, in returning thanks for his health, he expressed his acknowledgments to the company for the welcome which they had given him.

A special train then started for Ballymena, to convey his Excellency to Garron Tower, the marine seat of the Marquis of Londonderry.

THE QUEEN'S COLLEGES.

The list of the senate of the new university has been completed, and will consist of eighteen members, including the Lord Chancellor, the Archbishop of Dublin, Dr. Whately, Chief Baron Pigot, and Lord Dufferin, with other equally qualified and eminent men. The visitors have also been appointed, and, amongst them, several Protestant and Roman Catholic prelates, with the moderator of the several assemblies of the Presbyterian Church, with some noblemen and public functionaries without distinction of creed or party. Dr. Slattery and Dr. Delany are visitors for Cork College; Dr. M'Hale and Dr. Denvir, Galway; and Dr. Cullen and Dr. Crolly, Belfast, for Belfast, all Roman Catholic Bishops. It will be seen by the following that two of the Roman Catholic Prelates appointed visitors to the colleges, viz. Archbishop M'Hale and Archbishop Slattery, have declined to act. The following are their letters to the Under-Secretary.

Thurles, Sept. 9, 1850

SIR, I am in receipt of your letter of the 3d inst., stating that you are directed by the Lord-Lieutenant to inform me that the Queen has been pleased, by warrant, under her Majesty's signet manual, to appoint me to be a Visitor of the Queen's College Galway

Having the strongest conviction that the aforesaid college in Galway (together with the other Queen's Colleges in Ireland) is fraught with grievous and intrinsic dangers to the faith and morals of the Catholic youth as may resort to them—and this conviction is within I am fortified by the repeated solemn condemnation of those institutions by the successors of Peter, who have commanded the Catholic Bishops of Ireland to take no part in frequenting them—I could not, without a betrayal of the sacred duty I owe to the flock confided to my care, as well as to the ecclesiastical authority to the head of which I belong, accept the proffered office. Were I even free to accept it without a risk of disobedience. I feel that, far from diminishing, I should be augmenting the inherent evils of those institutions by giving a sanction to professing Catholics to associate themselves with the enemies of our faith, and thus give them a hand in carrying out a system fatal to religion, under the specious pretence of affording it protection.

I beg, therefore, respectfully to decline the honour to be Queen's College, and have the honour to be your obedient servant, ✠ JOHN, Archbishop of Cashel.

Thomas Redington, &c.

Thurles College, Sept 7

SIR,—I have the honour to acknowledge the receipt of your letter of the 2nd inst., stating that I am directed by the Lord-Lieutenant to inform me that the Queen has been pleased, by warrant, under her Majesty's sign manual, to appoint me to be a Visitor of the Queen's College, Cork.

In reply, I beg to say that, having always be of opinion that these colleges were pregnant with danger to the faith and morals of our Catholi youth—being confirmed in that opinion by the reverential sentiments of the Holy See to the same and being admonished by the same venerated authority not to have any part in carrying them out, it is obviously impossible for me, as a Catholic Bishop, to accept of any situation whatever in connexion with those institutions—I have the honour to remain, sir, your obedient servant, ✠ M. SLATTERY.

Sir T. Redington

The *Evening Post* gives the following as a correct list of the appointments of Visitors to the Queen's Colleges:—

"VISITORS TO THE THREE COLLEGES.—The Lord Chancellor, the Duke of Leinster, the Earl of Donoughmore, Mr. Justice Ball, Mr. Richard Wilson Greene, Q.C., Sir Henry Marsh, Bart., the President of the College of Surgeons, the President of the College of Physicians, and the Moderator to the General Assembly.

"VISITORS TO QUEEN'S COLLEGE.—The Most Rev. Lord John G. Beresford, Primate and Archbishop of Armagh; the Most Rev. Dr. Cullen, Catholic Primate and Archbishop of Armagh; Right Rev. Dr. Knox, Bishop of Down and Connor and Dromore; and the Right Rev. Dr. Denvir, Catholic Bishop of Down and Connor

"VISITORS TO CORK COLLEGE. The Most Rev. Dr. Whately, Archbishop of Dublin; the Most Rev. Dr. Slattery, Catholic Archbishop of Cashel; the Right Rev. Dr. Wilson, Bishop of Cork; the Right Rev. Dr. Delany, Catholic Bishop of Cork.

"VISITORS TO GALWAY COLLEGE.—The Most Rev. Lord John G. Beresford, Primate and Archbishop of Armagh; the Most Rev. Dr. M'Hale, Catholic Archbishop of Tuam; The Hon. and Right Rev. Dr. Plunkett, Bishop of Tuam; the Right Rev. Dr. O'Donnell, Catholic Bishop of Galway."

THE PRIMACY.—Archbishop Slattery and Dr. Furlong, of Munster, are to associate with themselves as many priests, and a similar number of laymen are to be associated with both, to form a provisional committee for carrying the project into effect. Dr. Cantwell, the Bishop of Meath, it is said, commences by a subscription of £11,000.

"We are enabled to announce, upon authority, that his Grace the most Rev. Dr. Cullen, Archbishop of Armagh, and Primate of all Ireland, has resolved on declining the acceptance of any office or appointment in connexion with the colleges or the University proposed to be annexed to them; and we have reason to believe that, but for his Grace's delicate health, and the great pressure of ecclesiastical duties devolved on him during his Synod, he would have already signified such his determination to the Government officials who assumed the liberty of nominating him."

LAW APPOINTMENTS.—The vacancy caused by the death of Chief Justice Doherty will be filled up by the promotion of the Attorney-General to that valuable post. Mr. Hatchell will be Attorney-General; and for the offices of Solicitor-General and Law Adviser to the Castle, the names of Mr. Serjeant O'Brien, Mr. Berwick, Q.C., Mr. J. D. Fitzgerald, Q.C., Mr. Hughes, Q.C., Mr. Whiteside, Q.C., and other members of the bar, are mentioned; the three first-named gentlemen with most prospect of success. Mr. Hatchell's promotion will cause a vacancy in the representation of Windsor.

LYNCH-ORDINARY SHOT.—A few days ago, Mr. Plunkett, brother to the Bishop of Tuam, and son of Lord Plunkett, while shooting seals, at the Bishop's lodge, in the county of Mayo, fired at a cormorant on the wing with a rifle; and, having shot it in the neck, the bullet cut in two a large conger-eel, which the bird had in the throat at the time.

The addition to the Conciliation Hall funds, at Monday's weekly meeting, was only £8 8s. 8d.

NAVAL AND MILITARY INTELLIGENCE.

THE COMMAND OF THE BOMBAY ARMY.—Major-General Sir Joseph Thackwell (in India), will, it is understood, succeed to the command of the Bombay forces, on Sir William Gomm assuming the higher office of Commander-in-Chief in India.

ROYAL MILITARY REPOSITORY.—The commandant of Woolwich garrison has issued an order permitting visitors to go over the Rotunda and grounds in the Repository three days a week, viz. Monday, Tuesday, Wednesday, Thursday, and Friday.

10TH HUSSARS AND 78TH HIGHLANDERS.—According to the latest accounts from Bombay, these regiments have suffered much from cholera, some cases of which disease have terminated fatally amongst the men.

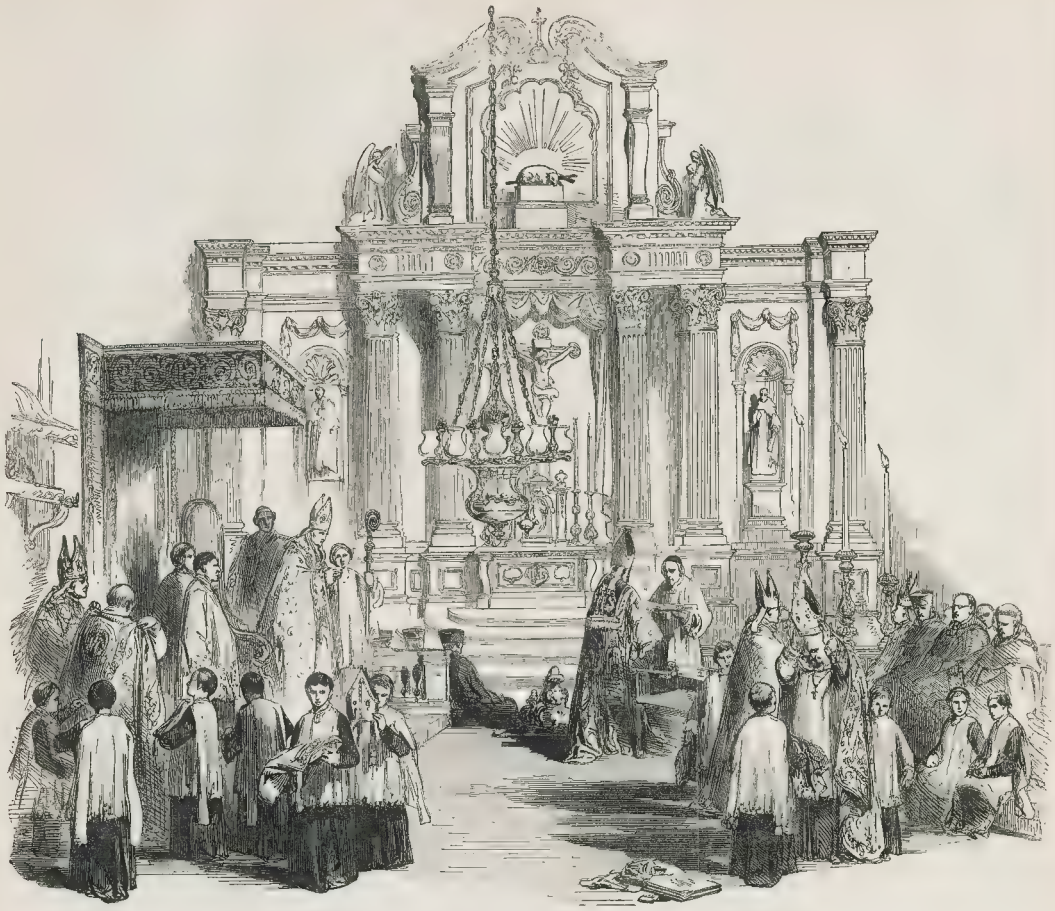
REWARDS FOR DISTINGUISHED SERVICES.—Major-Gen. Vernon, C.B., formerly of the 66th Regiment, has lately been placed on the list of officers recommended for reward for distinguished military services.

INFANTRY AMMUNITION.—The following memorandum has lately been issued from the Horse Guards on this subject:—"It appearing to the Commander-in-Chief that the ammunition as well as the pouches of the infantry would be much more liable to damage if at least one of the compartments of the pouch was kept constantly filled with ammunition, his Grace has entered into arrangements with the Ordnance department for completing the present ordinary supply to twenty rounds per man, on requisition of commanding officers, who will be careful to cause it to be packed and carried in the centre compartment of the pouch. By command, G. BROWN, Adjutant-General."

NATIONAL FREEHOLD LAND SOCIETY.—Two new estates have just been purchased by this society. The first consists of nearly seventy acres, in the village of Penge, near the Croydon Railway. The second is in West Surrey, and contains about one hundred acres, most pleasantly situated on the South-Western Railway, close to the Godalming station. Both these estates are adapted for villa residences, and will be divided into allotments sufficiently large, not only to confer the right of voting, but as are adapted to the respective neighbourhoods, and to the wants of a large c ass of the members of the society.

AN EXTRAORDINARY GIANT.—The *Cincinnati Gazette* gives an account of the thigh-bone of a human being having been found, containing six times the number of cubic inches that the thigh-bone of a man in these degenerate days can furnish! Also a human collarbone, and other relics to match Physicians say that the person to whom they belonged must have been 12 feet high. But the western country is famed for marvels, real or imaginary; and we suppose some way is anxious to furnish fossil proof of the record that "there were giants on the earth in those days."

THE SYNOD AT THURLES.



THE BISHOPS ROBING.

Throughout the past month, the town of Thurles, in the county of Tipperary, has been the scene of the most imposing ceremonials to be witnessed in a Catholic country—the assembling and sitting of the Great Council of the Prelates and Dignitaries of the Roman Catholic Church of Ireland, to deliberate and pronounce upon questions of the deepest moment to the interests of that religion, the purity of faith and morals, the strength and dignity of the Church

THE PROCESSION FROM THE COLLEGE TO THE CATHEDRAL.

and the general well-being of the community. No Synod has been convened in Ireland for two hundred years, when that of Kilkenny was held, though no fewer than five Synods were held in Ireland during the 12th century. However important the objects of previous Synods may have been, it is considered that at no period during the eventful history of the Irish Church did her learned fathers assemble in solemn council for graver or more exalted purposes than those which have lately called them together. These were stated to be to restore the Church as much as possible, and as far as compatible with the existing state of society, to her former condition, when, as a free church, her discipline was strict and rigid, her observances were uniform, and her laws were universally binding. The practice of administering the sacraments out of the church is one of those relaxations of discipline or practice consequent on evil times and violent persecution; and it is supposed that the canonical practice in this respect will be restored, and that all the sacraments, including baptism and matrimony, will in future be administered only in the church, unless where a case of necessity—such as the imminent danger of the new-born child—may compel a relaxation of the stringent rule.

Having given the reader an idea of the objects of this solemn convocation of the National Church of Ireland, so far as a prevailing impression upon the subject admits us to do, we shall now proceed to describe the constitution of the Synod, and then attempt a brief detail of its gorgeous and imposing ceremonials.

The Synod is constituted of two distinct classes—those who assist as members, and those who assist as officers. The former class may be divided into those who have the right of deliberating and voting, who possess both a consultive and decisive voice; and those whose privilege is confined to a consultive voice only. The Bishops in communion with the Holy See, "placed by the Holy Ghost to rule the Church of God," possess the decisive voice. Others, whose privileges are defined by law and usage, share it with them, much, however, being left to the discretion of the Bishops. These are abbots, procurators of absent prelates, generals of religious orders, &c.

The officers and assistants of the Council are, the Judges or Complaints, disputes, and questions relative to apologies for absent members, and the appointment of procurators; Theologians and Canonists, whose duty it is to attend as consulters for the examination and discussion of the subjects under consideration; Masters of Ceremonies, Secretaries, Promoters, Notaries, Janitors, and Messengers The Judges of Complaints are selected from amongst the Fathers of the Council. There are also Notaries, who draw up attested instruments of the proceedings at the instance of the Promoters, whose office it is to move the Council for the performance of the various steps to be taken in the course of the proceedings. There are, besides, two Sub-Deacons appointed to escort the prelates to their apartments; to whom may be added the sacred ministers in the solemn ceremonies performed during the Council. The place selected for the Synod was Thurles, the centre of an Archiepiscopal diocese, and the residence of an Archbishop.

We pass over the preliminary forms of procedure, commencing with private conferences of the fathers, and next assuming the more solemn form of general conferences or congregations.

THE FIRST SESSION.

We next proceed to the formal opening of the Synod, which took place on Thursday, the 22nd ult. From an early hour, the town of Thurles exhibited that stir and bustle which give unmistakeable indication of the approach of some remarkable event. For some days previous, the lodging and hotels had been engaged; and on Wednesday night it was almost impossible to procure a place whereon to lay one's head, unless at prices that, in times like these, seem exorbitant. Including the clergy of the surrounding dioceses, besides several who came even from the most remote parts of the country, and the strangers who had travelled from North and South, from East and West, to be present at the imposing ceremonial of their Church, there could not have been fewer than 600 applicants for sleeping accommodation. The town was, besides, crowded with an immense concourse of the inhabitants of the surrounding towns, and the peasantry of the neighbourhood. Even as early as eight o'clock in the morning, groups of gravely-attired clergymen might be seen making their way towards the College, from which building the procession was to issue at ten o'clock, the time appointed. This building presents a grand and imposing aspect externally, its splendid range of front being all constructed of cut stone; while, internally, its spacious and lofty halls, its beautiful chambers, its long corridors, as well as its broad staircase of stone, impart to it a true collegiate character. The interior was eminently imposing: its halls, and landing-places, and staircases were crowded with groups of priests, in surplice and soutane, some of whom also wore the stole; and now and then there appeared a bishop, dressed in his robes, with his attendant train-bearer; or a general of one of the religious orders habited in the peculiar dress of his order, which was partly concealed under a gorgeous cope. These, and the officiating priests of the solemn ceremonials of the day, unconsciously imparted an animation and picturesque beauty to the scene which could not fail to impress one who beheld it for the first time. As some great man approached, his name was circulated in a whisper from group to group, frequently with admiration, but occasionally with enthusiasm

We must not here omit to state that Charles Bianconi had lent some exquisite pictures from his collection, which is one of the best in the country, to decorate the hall of the College and the walls of the Cathedral. Two were suspended in

THE RIGHT REV. DR. M'HALE, ARCHBISHOP OF TUAM.

the outside hall, and represented "The Death of St. Francis of Assysium," and "The Visitation." The hall was further decorated by several busts on pedestals; and, amongst others, there were two busts of O'Connell, one in a niche, and another on a pedestal; also these of Dr. Doyle and Father Kenney.

Exactly at ten o'clock, the Prelates, dignitaries, and officiating clergy assembled in the beautiful chapel, or oratory, of the College, where the hymn "Veni Creator Spiritus" was chanted; and shortly after, the procession filed through the long corridors, descended the great stairs, passed through the hall, and along the broad path leading from the door of the College to the grand entrance of the Cathedral, both of which buildings may be about 500 yards distant. The public gates of both open on the high-road; and along the avenue, as well as on the road and in the yard of the Cathedral, police were stationed at intervals, almost as much as a matter of form as to preserve the procession from being intruded upon by the eager crowd. The bell of the Cathedral tower tolled solemnly, and the Litany of the Blessed Virgin was chanted in true Gregorian cadence by the choristers; while the procession passed along in splendid array, until it was lost sight of under the arched door of the church. First in the procession came the Crucifer, in rich vestment of crimson and gold, attended by acolytes; then the clergy, to the number of at least 300, walked two and two, the parish priests of the arch-diocese being distinguished by wearing a stole over their surplice; then followed the *cantatores*.

Next came the notaries and secretaries of the Council; then the Very Rev. Dr. O'Brien, bearing the Archiepiscopal cross, and attended by acolytes. Then came the dignitaries of the second order of Clergy; then the Promoters of the Council; then Procurators of absent Prelates; then Provincials of religious orders; Deacon and Sub-Deacon for the Mass; next the Mitred Abbot of Mount Melleray; then the Bishops, in the order of promotion, attended by Chaplains and Mitre-bearers; then the Primatial Crosier-bearer; and lastly the Lord Primate, vested in amice, alb, cincture, pectoral cross, stole, red cape, and rich mitre, supported by the assistant sub-deacons, who were also his Grace's Theologians, and followed by his attendants. The laity then closed the procession.

Nothing in the way of pageant could be imagined more gorgeous than this array of coped and mitred bishops, their vestments of the richest and costliest materials—velvet, brocade, or cloth of gold; and their mitres glistening with jewels.

All eyes were directed to the Primate. Though the head of one of the oldest churches in the Christian world, and the representative of its illustrious Apostle, Dr. Cullen seemed to every eye the lowliest and meekest of that glittering crowd of dignitaries. His face is pale, but not absolutely colourless; his eyes are generally cast down, and covered almost entirely by the lids. Mildness and benevolence are the prevailing characteristics of his countenance. Dr. Cullen, it is said, is not more than forty-five years of age, and is therefore in the full vigour of man's intellect.

The church had been decorated especially for the solemn occasion. The throne erected at the Gospel side of the sanctuary was covered over with superb crimson damask and brocade, lavishly adorned with gold. On entering the church, those who had not an appointed place filed off at either side, and the Prelates and dignitaries occupied the places set apart for them at each side of the throne, according to rank and seniority. After chaunting the prescribed verses and hymns, the solemn High Mass of the Holy Ghost was then commenced.

The Primate officiated as High Priest, the Rev. Mr. Hanrahan, of Drogheda, deacon; the Rev. Mr. Quinn, of Dublin, sub-deacon; assistant deacon, the Rev. Mr. O'Reilly, of Maynooth; the assistant sub-deacon, the Rev. Dr. Dixon, Maynooth. The Rev. Dr. Forde acted as Master of the Ceremonies.

The music might properly be described as choral in character, and in style a mixture of the Gregorian and Italian.

After the conclusion of the Mass, the right Rev. Dr. Blake ascended the steps of the altar, and preached the sermon appointed for the occasion, taking his text from the first Epistle to the Corinthians, 4th chapter and 1st verse. At the conclusion of the sermon his Lordship descended the altar.

The Primate had, in the meantime, laid aside his officiating robes; and, at the conclusion of the sermon, the Prelates and those qualified to take part in the Council took up their places inside the rails of the Sanctuary, the Primate being seated on the faldstool in front of the altar. The Primate then intoned the "Exaudi," and the choir chanted it, together with the Psalm "Salvum me fac Deus." The antiphon was then repeated; and the "Adsumus" was chanted by the Primate, assisted by the deacons and the priests. The Litanies were then sung by the *cantatores*, the whole body of clergy responding, and all kneeling. The Primate then rose, took the pastoral staff, and blessed the Council with the sign of the cross, and in these words—"That Thou vouchsafe to visit, direct, and bless this present Synod, we beseech Thee, O Lord!" At the conclusion of the Litanies, the faldstool was placed on the platform of the altar, when the Primate sat and blessed the incense in the usual manner; and, after other ceremonials, the Deacon sang the Gospel beginning with "And at that time Jesus, calling together the twelve apostles, he gave them power and authority over all devils, and to cure diseases." The Primate next intoned the first verse of the "Veni Creator Spiritus," which was sung by the choir. The Primate then pronounced from his seat the allocution in Latin. The secretary then received from the hands of the Primate the decree of the opening of the Synod, which he read, concluding by asking the Prelates was the decree just read agreeable to them; to which they replied to the secretary in the affirmative. The Primate then announced the result in these terms:—

"The decree has seemed agreeable to the Fathers; therefore we ordain that this National Council do now commence, and be forthwith commenced."

Other decrees of a formal character were then read and approved of. The Promoter then applied to the Primate to have the roll containing the names of all who should be present called on, and also for an order respecting the profession of faith; both of which were ordered. The Primate then knelt towards the altar, and, laying his hand on the Gospels, made the solemn profession of faith prescribed by the Church, during which all stood uncovered. His Grace then resumed his seat, and took the Gospels in his hands; and each Prelate (and *only* a Prelate) knelt before him, made the same declaration, and then kissed the sacred volume in attestation of his truth and belief. The Promoter then applied for an announcement of the next session, which, after a formal consultation of the Bishops, was announced by the Primate to commence on the 29th ult. The Notaries were then required to draw up an attested copy of the proceedings, which they retired to do; the document so drawn up was then announced, and after a short time being spent by all in mental prayer, the Primate gave his

SITTING OF THE SYNOD.

blessing to the Synod, the Prelates standing, and the inferior clergy kneeling. The sacred vestments were then laid aside, and all left the Church.

THE SECOND SESSION.

The ceremonial of the 29th differed in some respects from that of the preceding Thursday. There was no strictly formal procession, though the Prelates, attended by their theologians, the mitred abbots, and the representatives of the various religious orders, proceeded at ten o'clock in the usual order to the cathedral.

The attendance, both of surpliced priests, who were seated within the lower choir, and of the higher, the middle, and the humbler classes of the people in every part of the church, was more than double the number present at the session on opening the Synod.

Shortly after ten o'clock, the slow peals of the cathedral bell intimated the commencement of the ceremonies, and in a few minutes the prelates, provincials, and superiors of religious orders, theologians, and clergymen, issued forth from the College in processional order, the bishops wearing only the mozetta and rochette, and the priests surplices. The clergymen representing the religious orders were attired in the proper ecclesiastical costume of their respective brotherhoods. The bishops and clergy having taken their places in the cathedral, his Grace the Primate came forth from the sacristy to the foot of the altar, followed by the officiating high priest, the Very Rev. Dr. Meyler, the deacon, Rev. Dr. Quinn; and the sub-deacon, Rev. Dr. MacHale, of the Irish College, Rome.

The solemn high mass of the Holy Ghost was commenced by the choir intoning the hymn, "Veni Sanctus Spiritus," which was sung with admirably harmonious and impressive effect. And we may take this opportunity of observing that the choral department of the grand services at the cathedral since the opening of the Synod has constituted one of the most interesting features among the many with which the ceremonial abounds.

The high mass having been concluded, and the same observances followed as we have already described, the votes of the prelates were then taken as to the period for the holding of the next session, when Monday, the 9th of September, was fixed for the purpose.

These proceedings having been fully gone through, and the Primate being seated at the epistle side of the altar, his Grace the Most Rev. Doctor MacHale ascended the altar, and delivered a sermon on the text, "And the angel said to her—Fear not, Mary, for thou hast found grace with God. Behold, thou shalt conceive in thy womb, and shalt bring forth a Son, and thou shalt call his name Jesus. He shall be great, and shall be called the Son of the Most High, and the Lord shall give him the kingdom of David, his father, and he shall reign in the house of Jacob for ever, and of his kingdom there shall be no end."—Luke, ch. i., v. 30, &c.

His Grace having descended the altar, a short prayer was offered by the Primate, in which the congregation joined, and at its close the prelates and clergy returned to the College in the same order as they proceeded from it.

Next day there was a high mass and requiem for the deceased pastors of the Church, which was celebrated with the strictest ecclesiastical observances.

During the week the Synod was engaged in discussing the question of the Queen's Colleges, the result of which is noticed in another portion of our Journal.

THE THIRD SESSION.

On Monday last, as announced, the proceedings were brought to a close. The attendance, both of clergy and laity, was extremely numerous; and there was an immense multitude of country-people assembled about the precincts of the Cathedral. At half-past ten o'clock, the Bishops, wearing sontans and rochets, with pectoral cross, entered the Cathedral in procession from the College High mass was celebrated by his Grace the most Rev. Dr. Slattery. When the high mass was concluded, the Primate took his seat between his theologians at the epistle side of the altar, and, it having been announced by the secretaries that the business of the Synod had now concluded, and that it only remained for the Prelates to affix their signatures to the decrees agreed upon, the Very Rev. Dr. Cooper came forward, and deposited the records on which those decrees were inscribed on the Gospel side of the altar. The secretaries, namely, the Rev Dr O'Brien of Waterford, the Rev. Dr Leahy of Dublin, and the Rev. Dr. Leahy of Thurles, then took their places close by the altar, to witness the signing and final attestation of the decrees of the Synod by all who were qualified by ecclesiastical rank to take part in its councils and vote at its deliberations. First came the Primate, who signed and declared his adoption of the decrees contained in the record before him; and then followed the other Prelates and procurators of absent Bishops, who each affixed their signatures in like manner. When the signatures of them all had been duly affixed to the decrees, and the same attested by the secretaries as witnesses, Primate Cullen proceeded to address his brethren in the episcopacy and the assembled congregation. His exhortation was brief.

The conclusion of the proceedings are thus reported by the *Freeman's Journal*:—

"The Rev. Mr. Ford, speaking from the altar, said that the proceedings were now about to terminate by a solemn procession of the Bishops and clergy, and it was the wish and command of the Primate that none but the ecclesiastics taking part in the ceremonial should leave the chapel until the procession returned.

"Their Lordships then went forth from the cathedral in procession to the College, and in less than half-an-hour returned and resumed their places during the progress, the *Te Deum*, so grandly and arranged by the Abbé Lai, was chanted by the choir in a style of the richest and most sublime ecclesiastical harmony, beautifully and impressively conveying the sentiments of praise and adoration which are imparted in the opening verse of this glorious hymn of jubilation.

"On the return of the procession some psalms were sung in plain 'Gregorian' chant, and at the conclusion the choir intoned the grand 'Benedictus,' harmonized for four voices, the effect of which was truly sublime, and afforded a grand and fitting consummation to the magnificent ceremonials which marked the close of the national Synod of Ireland, the greatest and most auspicious era in the religious history of our country which has been witnessed for centuries past, or may be for centuries to come.

"Before the Bishops left the cathedral, the Rev. Dr. Cooper ascended the altar, and announced, at the direction of his Grace the Primate, an indulgence of forty days to all the faithful who had assisted at the ceremonial of the Synod, and offered their prayers to the Almighty in favour of the deliberations of the council."

The preceding details have been selected and abridged, for the most part, from the *Cork Examiner* and *Freeman's Weekly Journal*.

THE ILLUSTRATIONS.

These impressive scenes are from Sketches by our own Artist, who has visited Thurles, and has been considerably assisted in his somewhat difficult commission.

The first Scene shows the Bishops Robing. The Cathedral is, in ornament, within nearly as plain as without, save and except the high altar, which is rich and florid in the extreme; but, what is of more importance, the buildings are large and convenient, and were, upon this occasion, fitted up with much care and costly taste, having a spacious passage, shaded off from the chief entrance to a large dais facing the high altar; and this again so arranged as to be surrounded with seats for the hierarchy, with others at their feet for the attendants. At the extreme right was a lofty throne for the Primate, standing without and behind Mulleray, the floor, the flooring and bishops' benches were covered with crimson and maroon cloth, whilst the throne of the Primate was composed of the most costly velvets, and richest embodery in gold and silver. The Diocesan Synod commenced with the procession of the hierarchy commenced to change the simple mozetta for the more costly cloak and jewelled mitre: this presented a *coup d'œil* of the richest colour and brilliancy. At the conclusion of the mass, these robes were also removed for the more simple mozetta and rochet; when, after having had such portions of the Synod business as was to be [illegible] publicly promulgated, read, they retired to their places on the dais from within the sanctuary rail, where they had assembled.

Next is a small portion of the procession from the College to the Cathedral. As it was impossible to do more than select a part of the line, which must have extended at least a mile in length, our artist has chosen that part of it which shows a few of the Bishops, the Abbot from Mount Melleray, the heads of the religious houses, and the commencement of the theologians, when passing through the crowd assembled on the road, as the procession entered the yard of the Cathedral, where the people knelt down to receive the blessings of the Bishops.

The fourth scene is a sitting of the Synod. "I am enabled," writes our Artist, "owing to the great kindness of the Rev. Mr. Leahy, President of the College, who, amidst the great labour thrown on him, found time most obligingly to explain the whole proceedings of the Synod when sitting in full council, in the chapel of the College, and enabled me to portray their Lordships in deliberation."

[illegible] is a portrait of the Right Rev. Dr. M'Hale, Archbishop of Tuam. He was born in 1792, in the village of Tubbernavine, in the parish of Ackergoole, midway between Mount Nephin and Lough-Con, in the county of Mayo. He received his early education in the parish school, and his classical education in Castlebar. He entered the College of Maynooth in 1807; was ordained a priest in 1814, when he became appointed lecturer, and subsequently Professor of Theology. He was, in 1825, consecrated Bishop of Maronia *in partibus*, and coadjutor of Killala. On the death of Dr. Waldron, in 1834, he succeeded to that see, from which, in October of that year, he was translated to Tuam. While at Maynooth, Dr. M'Hale contributed largely to the periodical literature of the day; and published a series of controversial letters under the name of "Hierophilus," which then excited much interest. His appointment to the Archbishopric of Tuam was in opposition to the wishes of a large and influential English party, who desired to see the double cross hang on a quieter and more passive bosom Of Dr. M'Hale's political position and influence it would, both among the ecclesiastical and laity, little need be said; his acts, as well as his untiring aid to the late Mr. O'Connell being, doubtless, still fresh in the memory of the reader.

EXPENSES OF PUBLIC BOARDS.—On Wednesday a Parliamentary paper was printed, showing in detail the expenses of the General Board of Health, the Commissioners in Lunacy, and the Poor-law Board. The expenses of the General Board of Health to the 31st of March last were £8084 6s. 2½d. The travelling and personal expenses of the Commissioners in Lunacy, in the year ending the 31st of July, were £2305 11s. 11d.; and of the Poor-law Board, for the year ending the 31st of March last, £9879 0s. 2d., leaving a surplus of £1261 19s. 10d. For the General Board of Health £8000 was voted; for the Commissioners in Lunacy, the exact sum; and for the Poor-law Board, £10,000.

POSTSCRIPT.

FATAL ACCIDENT TO LIEUT. GALE, THE AERONAUT.

WE learn from the French papers of Thursday, that on Sunday last Lieut. Gale made an ascent with the Royal Cremorne Balloon, on the back of a pony, from the Hippodrome of Vincennes, at Bordeaux, in the south of France, which has unfortunately terminated in the death of the gallant aëronaut. The ascent was a capital one, and the pony was perfectly calm, with his legs hanging and the rack lent. After having been in the air about a quarter of an hour, the aëronaut descended without danger, between Merignac and Cestas. His horse was detached from the car by some peasants, who hastened to his assistance on hearing his cries, and who held the ropes of the balloon; but, misunderstanding the instructions given by the aëronaut, let go, and the balloon, having still sufficient gas in it to give an ascensional force, after losing the weight of the horse, rose suddenly, and the anchor, which held by a tree, being loosened by the sudden motion, the balloon rose in the air, and the balloon proceeded for the distance of nearly two miles. During the night the balloon was found half empty in the commune of Cestas; and the lifeless body of Mr. Gale was found at some distance amongst the trees, where he had fallen. The unfortunate man has left eight children.

ARTFUL ROBBERY.—On Thursday afternoon, Mr. Millman, of Ebury-street, Pimlico, was walking in St. James's-park, when opposite Buckingham Palace he was accosted by two men, who made numerous inquiries as to the Palace, informing him that they were strangers, having arrived in London that morning. While thus engaged, a well-dressed man, who passed them, was observed to drop a purse heavily filled with gold and silver. Mr. Millman and the strangers made him acquainted with his loss, and gave him his purse. He said they were three honest fellows, and insisted on treating them to a bottle of wine: they accordingly adjourned to a tavern in James street, Buckingham-gate. Here the owner of the purse produced a roll of notes, announced that he had just come into a fortune of £5000, and, in gratitude to them for restoring his money, he would, by providing they could prove themselves respectable, present them with £10 each. The two others produced what appeared a considerable sum in notes and gold, and Mr. Millman showed fifty-three sovereigns he had just received. The stranger at once drew out £10 notes, and wrapping Mr. Millman's gold in one, he returned it to him. They all then left the house. Mr. Millman felt a misgiving, and put his hand to his pocket: the three fellows instantly took to their heels and got clear away, leaving Mr. Millman with a note on the bank of elegance and some gilt counters. On Wednesday the same fellows fleeced a gentleman in the George Tavern, Commercial-road, of £28, by a like stratagem.

THE SUBMARINE TELEGRAPH.—The *Boulogne Gazette*, after quoting the account of the rupture of the telegraph, comments on the manner in which it is said to have been broken, and adds—"We confess we are at a loss to rightly comprehend the real merits of this unfortunate affair in presence of the fact, which we have ascertained to be quite correct, that it is the work of a certain length of the telegraphic wire and coating, and demands 60 francs for the damage done to his nets in obtaining it. It seems pretty clear that the wire must be broken in at least two places. The circumstance demands every possible inquiry."

LATEST FOREIGN NEWS.

FRANCE.

Our accounts of yesterday (Friday) from France state that the Minister of Commerce has received applications from 1212 individuals, who propose to forward their productions to the London Exposition in 1851.

The President of the Republic had not yet arrived at the Elysée. Considerable anxiety was experienced in Paris, in the fear that some troublesome manifestations would be made by the Bonapartist Society upon Louis Napoleon's return to the capital. The military and civil authorities were, however, on the qui vive.

GREECE.

According to the *Cologne Gazette*, M. Korfo Tamis, the Greek Minister of Public Worship at Athens, has been assassinated; six balls passed through his body. This foul deed is believed to have arisen out of the late disturbances.

METROPOLITAN NEWS.

THE EXHIBITION OF 1851.

The preliminary proceedings connected with the building in Hyde Park are being carried on with considerable vigour. During the past week several temporary sheds have been erected on the space now enclosed by the hoarding, for stores—including a large one, 200 feet in length, intended to be used as workshops, and another, sixty feet in length, for the use of clerks, draughtsmen, and others connected with the works. The latter shed has a roof constructed upon the same plan as that designed for the building itself, consisting of five series of ridges and valleys, filled with glass of the same size as that intended to be used throughout the whole of the building. Sheds have also been erected for the engineer and for visitors, and as a pay-office for the men employed in the works. In addition to this, a number of men have been employed in preparing for the construction of the mail sewer, which is intended to be connected with a similar work formed by Mr. Algar, the builder, between Knightsbridge-barracks and Kensington.

THE BUILDING.—The first castings for the iron columns were delivered on the ground on Friday last, having arrived the previous day at Kensington-canal basin, from the foundry at Dudley. The sashes are making in London, and it is expected that several hundred hands in a very few days will be engaged on the works.

THE READING-ROOM OF THE BRITISH MUSEUM.—NEW CATALOGUE.—The re-opening of the reading-room of the British Museum on Monday was attended with unusual interest, in consequence of the introduction of greater accommodation than heretofore conceded. The principal addition is a new supplemental catalogue of 153 volumes folio, of which two copies are supplied. These and the old catalogue (removed from the west room) are ranged on lower shelves along the sides of the east room. Before the latter stand eight rows of strong oaken desks. The convenience of the new arrangement was manifested by the number of students who were able to consult the catalogues without incommoding each other. The new catalogue contains manuscript titles exclusively; but the manifold machine has been employed to produce duplicates requisite for the production of a second copy of so voluminous a supplement. The volumes are handsomely bound in red and blue morocco, goldlettered at the back. The titles of the widest as well as the newest books not in the old catalogue are given in the new. A great improvement on the past system of keeping back new works for a couple of years or more, on the plea of there not being catalogued, is that now any book of authority, if only kept at the basin, from the foundry at Dudley. The sashes are making in London, and it is expected that several hundred hands in a very few days will be engaged on the works.

THE READING-ROOM OF THE BRITISH MUSEUM.—NEW CATALOGUE.—The re-opening of the reading-room of the British Museum on Monday was attended with unusual interest, in consequence of the introduction of greater accommodation than heretofore conceded. The principal addition is a new supplemental catalogue of 153 volumes folio, of which two copies are supplied. These and the old catalogue (removed from the west room) are ranged on lower shelves along the sides of the east room. Before the latter stand eight rows of strong oaken desks. The convenience of the new arrangement was manifested by the number of students who were able to consult the catalogues without incommoding each other. The new catalogue contains manuscript titles exclusively; but the manifold machine has been employed to produce duplicates requisite for the production of a second copy of so voluminous a supplement. The volumes are handsomely bound in red and blue morocco, goldlettered at the back. The titles of the widest as well as the newest books not in the old catalogue are given in the new. A great improvement on the past system of keeping back new works for a couple of years or more, on the plea of there not being catalogued, is that now any book of authority, if only kept year, at Queen's Bench—amounted to 24, who have been incarcerated for periods varying from one to thirty-eight years, without any hope of release. The Court had now £100,000,000 sterling under its jurisdiction; and as every man was liable, by the merest accident, to be brought within its meshes, it behoved all to join so amending it as to make it a blessing instead of a curse to society. A resolution affirming the necessity of reform in the Court was passed.

ELEMENTARY TEACHERS' ASSOCIATION.—On Saturday the last twelve-month an association of male teachers has been formed—holding its meetings at the school in Harp-alley for the purpose of mutual improvement, one of these purposed objects being a free conference as to the most effective means to be used by them in the management of their various classes, and discussions on the theory and practice of teaching. This association held its first annual tea meeting on Friday week, at Bloomsbury Chapel, at which about 200 of the metropolitan teachers attended, when H. Althans, Esq., and several other gentlemen, addressed them in approval of the contemplated objects. A very gratifying report was also read, detailing the proceedings of the past year.

VACATIONS OF THE COURTS OF LAW.—The Courts of Exchequer and Common Pleas at Westminster are about to be ventilated by the steam jet. The arrangements are settled, and preparations are making by the office of Woods and Forests. The estimate, exclusive of Mr. C. Barry's plan, is to be brought in at a high level above the courts, and the vitiated air withdrawn by a separate jet from each court. In winter they are to be warmed, and in summer cooled, by a peculiar application of this principle. The operations are to be carried out under the superintendence of Mr. William Clark, late of King's College.

METROPOLITAN SEWERS.—The last official return of the Court of Metropolitan Sewers gives the following statement:—Eastern Division of Westminster Sewers: Total length finished, 926,780 lineal feet; number of sewers, 81; removed, 11,339 cubic yards; amount paid to contractors, £466 14s. 11d. Western Division of Westminster Sewers: Total length finished, 1,320,206 lineal feet; number of sewers, 81; removed, 17,767 cubic yards; amount paid to contractors, £524 0s. 3d. Total length finished, 2,219,986 lineal feet; total quantity of deposit removed, 29,706 cubic yards; amount paid to contractors, £990 15s. 2d.

TALLOWCHANDLERS' BENEVOLENT SOCIETY.—On Wednesday evening, a meeting of the Court of Assistants and subscribers to this society, instituted in 1843, for the relief of indigent and incapacitated tallow-chandlers, their widows, and others connected with the trade, was held in Basinghall-street, for general business. On the receipts for the past year being announced, there being now on the funds forty-one pensioners, the men receiving 18s., and the women 14s. per month. The funded capital now amounts to £3400. The amount paid to pensioners during the last twelve months amounted to £362. The income for the past year, including the previous balance, was £1239 14s. 4d. The expenditure left a balance of £414 4s. 10d. At the anniversary festival £386 18s. was collected, Mrs. North, the wife of the secretary, having, unaided, collected 102 guineas in aid of the funds.

MANSION-HOUSE.—The Lord Mayor entertained on Wednesday evening the directors of several banking and public institutions with which his Lordship is connected, and some private friends. Covers were laid for about seventy. Amongst those assembled were Mr. Alderman Kelly, Mr. Alderman Gibbs, Mr. Sheriff Lawrence, Mr. Sheriff Nicoll, the Rev. Charles Marshall (the Lord Mayor's chaplain), &c.

LONDON PENNY SAVINGS-BANK.—On Wednesday the managers published the following results of the experimental Penny Savings-bank in London, which was opened in Commercial-street, Whitechapel, on the 30th January last, up to the 9th instant:—Deposits, 49,516; depositors, 7833; amount of receipts, £2017

ST. MARY'S HOSPITAL, PADDINGTON.—On Wednesday afternoon a quarterly board of governors was held at the Hospital, Cambridge-place, Paddington; Mr. Spencer Smith in the chair. The board was also made special for the purpose of electing the trustees. The minutes of the previous meeting having been read, Mr. Frederick Ouvry, seconded by Mr. Gutch, moved—"That, in pursuance of the recommendation of the working committee, the following gentlemen be elected trustees of this hospital:—The Rev. A. M. Campbell, Mr. B. B. Cabbell, M.P., Captain Frederick Manning, and Mr. Henry Morris Kemshed." Carried unanimously.

BARTHOLOMEW-CLOSE.—The inhabitants of Bartholomew-close, though a mate in the heart of the city of London, have hitherto claimed exemption from Corporation services and fines as non-freemen. That right, however, is about to be disputed by the Bakers' Company, who have commenced proceedings for the recovery of penalties against some of the inhabitants, and subscriptions have been opened amongst them to defend their claim, which is made under a charter granted by Henry I. to Prior Bolton, and confirmed by John and VIII. to Sir R. Rich. The district includes all the part of the city lying between Smithfield and Aldersgate-street and Little Britain and Long-lan

On Wednesday, omnibuses commenced running between the South-Eastern Railway and the Bank at a penny.

CHRIST'S HOSPITAL.—On Saturday next, the 21st inst. (being St. Matthew's Day), the Lord Mayor, Aldermen, and Sheriffs, with the governors of the several Royal Hospitals, will attend divine service at Christ's Church, Newgate-street, where a sermon will be preached by the Rev. Joseph Charrie, M.A., of Pembroke College, Cambridge, Assistant Master of the City of London School, after which they will repair to the great hall in Christ's Hospital, where four orations on the benefits of the Royal Hospitals will be delivered, according to annual custom, by four of the senior scholars:—In Latin, by A. Sweeting; in English, by C. S. Townsend; in Greek, by H. C. P. Jones; in French, by G. W. Brown. Six poems will also be recited by others of the senior scholars; viz. a Latin Alcaic Ode on "Westminster Abbey," by H. B. Parkin; a translation of "Prince Henry's Apology and the King's Reply," from Shakspeare, by Erick Jambles, by James Gill; Latin Sapphics on "Bondica," by J. W. Gauntlett; Latin Elegiacs on "His Royal Highness the Duke of Cambridge," by R. A. Lloyd; Greek Sapphics on "Hannibal at the Altar," by B. D. Sweeting; and a translation of the "Apostrophe to Philosophy," from "Thomson's Seasons," by G. C. Bell.

SPECULATIVE STOCK EXCHANGE TRANSACTIONS.—The following notice was posted on Wednesday in the Stock Exchange, with reference to some speculative transactions lately carried on by certain brokers without the inquiry as to the character and position of the person for whom they were acting:—"The attention of the committee having been called by Messrs. Barclay and Bevan, to the fact that speculative business to a large extent had been carried on by members of this house for one of their clerks, who, to meet the loss arising out of these transactions, had robbed them from time to time to the amount of nearly £5000, and has since absconded, the committee proceeded to inquire into the circumstance of the case, and have ascertained that such information is correct, and that the parties who thus transacted the business did so without sufficient knowledge of the respectability, circumstances, or connections of the individual in question. Under these circumstances the committee have felt called upon to visit such conduct with their severe censure, and have caused this public notice to be given, that it may discountenance and prevent such practices for the future."

REMOVAL OF THE MARBLE ARCH IN FRONT OF BUCKINGHAM PALACE.—For the last week, men have been engaged in erecting scaffolding round the marble arch in front of Buckingham Palace, for the purpose of its removal. A part of the railing of the Green Park opposite to the northern corner of the Palace has been taken down, and a short distance on the other side of it hoarding has been erected for a space of sixty yards long by thirty wide, within which the entrance of the arch will be taken down, and they are otherwise disposed of. The turf of the space within the enclosure is being used in lining a new path which has been made from the south-west entrance into the Park's drive, which Grace the Duke of Sutherland's splendid mansion, and proceeding in a more direct line than the old path to Hyde Park Corner. When the marble arch is taken down, which will be effected in about a week, the new front of the Palace, which has just been completed, will have a much greater advantage, and will greatly add to the beauty and imposing appearance of the building.

IMPROVEMENT OF BILLINGSGATE MARKET.—The Corporation Markets Committee have prepared a report, recommending the adoption of a plan of sanitary arrangement for draining, ventilating, and supplying water for the use of Billingsgate Market, and for flushing the drains, at an expense not exceeding £1940; and the report and plan have been ordered to be printed and circulated amongst the members of the corporation. The plan proposes that the water for the rough purposes of the market shall be drawn at once from the river, and forced by an engine and pumps to the different heights required; and that the pure water be obtained by sinking a perforated cast-iron cylinder into the bed of the river similar to that which has been sunk by Messrs. Calvert and Co.

THE LATE SIR ROBERT PEEL.—The executors of the late Right Hon. Sir Robert Peel have, within the last few days, remitted fees to the various medical gentlemen who attended him, and endeavoured to alleviate the effects of the fearful accident which was the means of terminating his life. To Sir Benjamin Brodie, Bart., 260 guineas; to Alexander Shaw, Esq., 100 guineas; and to the other gentlemen proportionate sums.

MIDDLESEX REGISTRATION.—The following are the places appointed by the Sessions Barrister, at which he will hold his court for the revision of the list of voters for the county of Middlesex, viz. The Castle Inn, Brentford, September 17, at twelve; the Black Dog, Bedfont, September 18, at twelve; the Sussex Hotel, Bouverie-street, Fleet-street, September 19, at noon; the Vice-Chancellor's Court, Westminster, September 20, at ten; the Isle-of-Dogs Tavern, Pentonville, September 25, at twelve; the New Globe Tavern, Mile-end-road, September 26, at eleven; the Green Man, Bethnal-green, September 27, at twelve; the Albion Hall, Hammersmith, September 28, at eleven; the King's Head, Enfield, September 30, at twelve; the Chandos Arms, Edgware, October 1, at twelve; Jack Straw's Castle, Hampstead Heath, October 2, at twelve; and the White Horse, Uxbridge, October 3, at twelve. Every claim will be taken in at the courts in the order in which they stand on the register.

CHANCERY REFORM.—On Tuesday evening, a lecture on the administration of the Court of Chancery was delivered in the mechanics' institute, Southampton-buildings, by Mr. Carpenter, under the auspices of the Chancery Reform Association. Mr. E. Wilson presided. The lecturer described the process of a Chancery suit from the commencement to the close, and pointed out the many causes of delay and procrastination which, almost in every case, will, are invariably attendant upon Chancery suits. Amongst these he enumerated the practice of referring questions to the Masters, by which a suit was frequently locked up for eight, ten, or twelve years. Another cause was the long vacations, the practice of the Court in making so many persons parties to suits, the frequent abatements caused by the deaths of parties, and the supplemental bills and answers consequent upon the birth of children. The new orders recently issued from time to time by Lord Chancellors, he contended, effected no amelioration. Numerous instances were cited of the working of the system, and it was asserted that, at the present time, the persons of no fewer than 24 individuals in the

SITTINGS OF THE INSOLVENT DEBTORS COURT.—The sittings of the Insolvent Debtors Court will be resumed on Tuesday next for the hearing of cases, when the Chief Commissioner will preside. In accordance with a rule just made, all future cases will be allotted to three Commissioners, in consequence of the continued indisposition of Mr. Commissioner Harris.

MAIL-PACKETS TO AND FROM NEW YORK CEASING TO CALL AT HALIFAX.—General Post-office, September, 1850.—Henceforward the British contract mail-packets on the New York line will proceed direct from Liverpool to New York, and from New York to Liverpool, without calling at Halifax. Letters and newspapers, however, for Nova Scotia, New Brunswick, and Prince Edward's Island may still be forwarded in closed mails, by these packets, if specially addressed, "*viâ* New York," or "*viâ* the United States;" but those letters and newspapers which are not so addressed will be forwarded in the regular mails to Halifax, by the contract packets proceeding from Liverpool *viâ* Halifax to Boston. Letters for Nova Scotia, New Brunswick, and Prince Edward's Island, directed to be forwarded through the United States, will be liable to a postage of 1s. 2d. the half-ounce, and so on, which may be paid in advance, or not, at the option of the senders. Newspapers for those provinces, directed to be forwarded through the United States, will be liable to a postage of 1d. each, to be paid on delivery at their destination.

IRON STEAM YACHT FOR THE EMPEROR ON RUSSIA.—A beautiful yacht, built of iron, by Mr. Mare, at Blackwall, is at present in the East India Docks, having her engines of 140 horse power put on board by Messrs. George and Sir John Rennie, and is expected to be ready for trial down the river in about three weeks. This fine vessel, when completed, will be navigated to St. Petersburgh for the special use of the Emperor of Russia. She is 180 feet long by 21 feet 6 inches in breadth, and 10 feet 6 inches in depth; and, although 300 tons burden, will draw only four feet of water. Her cylinders are on the oscillating principle, 464 inches in diameter, with a stroke of 3 feet 6 inches, and the whole of the working connected with them are finished in the best style of workmanship, and more like the works of the superior description of clocks than the machinery of a marine steam-engine. The eccentrics are concave, and do not require flanges, and the bearings are of a composition of metal, which will not heat, however great the friction or numerous the revolutions of the machinery working upon them. The parts are all so well arranged and under the most admirable control, that a very young person could work and manage them with the greatest ease. The vessel is to have paddle wheels with the latest improvements, and is expected to have a speed of seventeen miles per hour

EXTRAORDINARY DURATION OF LIFE WITH A BROKEN NECK.—An inquest was held on Wednesday, by H. M. Wakley, Esq., at the Royal Free Hospital, Gray's-inn-road, on the body of William Glover, who died in that institution on Monday last. The deceased, who resided at No. 40, Laystall-street, Gray's-inn-road, was a carman, and had been for upwards of fifteen years in the employment of Mr. Limpus, coal contractor. On Saturday evening he and another man were going homewards with their carts, the deceased riding on the hind-board. The latter, he had let down to form a seat for that purpose. When they got into King's-road, the horse in deceased's cart started suddenly, by which the deceased was thrown with violence to the road. His companion immediately went to his assistance, and he was driven to the Royal Free Hospital, where he was received and attended to by Mr. Jackson, the house-surgeon. That gentleman made a minute examination, but could discover no further injuries than a few bruises on the back, for which he prescribed. On the Sunday Glover complained of pains, and was seen by the surgeon two or three times, who considered that his illness was but slight, and that he would shortly be sufficiently recovered to leave the hospital. On Monday morning, however, he suddenly expired, no dangerous symptoms having previously been apparent. Mr. Jackson then made a *post mortem* examination of the body, and discovered the cause of death in the neck, which had been completely broken, the result of the fall. Having seen a case similar to this exposure he had never known so extraordinary a duration of life under such circumstances. It was his opinion that there had been merely a fracture in the bone, until the deceased became restless in bed, which moved the bone from its former position, and so caused immediate death. The jury returned a verdict of "Accidental death by a broken neck, caused by a fall from a cart."

THE CENSUS.—The official routine preparatory to taking the census of the population of Great Britain on March 31, 1851, has now commenced, and a suite of offices has been taken in commodious houses in Cra.g's-court, Charing-cross, whither some of the clerks of the registrar-general's department, Somerset-house, have migrated, in the duties of the census, have proceeded, acting under the superintendance of Mr. Farr and Mr. Horace Mann, the newly appointed assistant commissioner. The census was last taken and calculated under the direction of a commissioner at Somerset-House, and took upwards of three years to complete, the results being published in a compendious blue book.

SEIZURE OF AN ILLICIT SPIRITS OF NITRE MANUFACTORY AND TWO STILLS.—On Saturday, Messrs Elmy and Forgeter, detective officers of Excise, made a seizure of an extensive illicit establishment, No. 1, Cook's-grounds, Chelsea. On entering the house they discovered that it was fitted up as a chemical manufactory, with two stills in full operation, each capable of containing 100 gallons. Besides the stills there were several cooling-tubs, containing spirits. About 200 gallons of molasses wash were in a state of preparation for continuing the operation of the stills. The officers found three persons in the house—one named Cook, upon seeing them, seized a large iron chisel, and struck a carboy with it, breaking it into pieces, and the whole of the contents were lost. This would have destroyed the rest had he not been prevented. The persons found in the house gave the names of Sawyer, Smith, and White, who were all given into custody. The value of the spirits seized is considerable, and would form a revenue of upwards of £5000 annually. On the previous day the same officers seized another still at a house in York-street, Bethnal-green.

OMNIBUS ACCIDENT AND ROBBERY.—On Saturday afternoon, a boy, carrying a box, hailed a Paddington omnibus at the corner of Little Queen-street, and as two omnibuses belonging to rival companies were on the look-out for passengers, they both drew up together in front of the path. He got on the one nearest to the curb, and, having left the set of skating fixed upon the roof, when the sudden jerk of driving on threw him over the railings on to the ground; and before he had time to get up, the other omnibus, which had drawn in behind, ran over his chest, and broke it. He was cut off, and all the four wheels passed over the boy's two over his chest, and two over his legs. He was placed in a cab as speedily as possible, and conveyed to King's College Hospital, where he remains in a very precarious condition.

ALARMING EXPOSION OF GAS AT ST. MICHAEL'S CHURCH, CORNHILL.—Last Sunday evening, shortly before the commencement of divine service at St. Michael's Church, Cornhill, an occurrence took place, which, had it been a few minutes later, would in all probability have been attended with disastrous consequences. At the usual hour the men proceeded to light the gas preparatory to opening the sacred edifice. After some of the gas lamps had been lit, it was found that the flare was not equal in height to what it had previously been, and a strong smell of gas having attracted the attention of one person, he traced it to the churchwarden's pew, when he incautiously took a lighted candle to the spot. He had no sooner done so than he came in contact with the gas which was escaping, and an explosion took place, which knocked the man down, and set fire to the flooring of the pew. Fortunately, the damage done is not considered serious, but the churchwardens issued a notice that no service would be performed in the church in consequences.

SAD CATASTROPHE.—On Tuesday afternoon, Mr. Allen, a shoemaker, residing in Union-street, Chelsea, was taking a walk with his wife on Battersea-fields, when observing a number of little boys playing upon some logs near the Equitable Gas Works, and suddenly heard a cry that one of them had slipped off into the water, upon which he let go the arm of his wife, and ran down to save the child; but, unfortunately, he got upon the same log, which turned over, and he fell into the river also. An alarm was made, and assistance quickly rendered, but to no effect, as both man and boy perished together. The screams of the wife, who stood looking on all the time, were heart-rending. The bodies were taken to the parish for inquisition, and after searching for upwards of an hour, the body of Mr. Allen was brought out, but that of the boy had not been found up to a late hour.

BIRTHS AND DEATHS.—Births registered in London in the week ending Saturday, September 7. Males, 724; females, 750: total, 1474. Deaths during the same period: Males, 466; females, 433: total, 899. The mortality is, therefore, near the average; and the births registered exceed the deaths by 575. In the first week of September last year, 1849, persons died in London 273 by diarrhœa, and 2026 by cholera. It was the week in which the mortality was highest. In the corresponding week of the present year, the deaths by diarrhœa have been 75, by cholera 8. The deaths from diarrhœa are now rapidly declining; cholera was fatal in 8 instead of four cases, the numbers registered in the previous week. Two of the deaths from cholera were in the parish of Mary-lebone. On the 3rd September, at 2, Silver-street, St. Giles's, the wife of a porter, aged 30, "low fever (7 days), cholera Sirius (16 hours)." Mr. Yardley states that "this woman had been delivered of a still-born child about ten days before her death," and informant states that "she vomited continually, but suffered no pain. The situation is airy, and not badly drained." On the 2nd September, at 403, Oxford-street, the son of an optician, aged three years, "malignant cholera morbus." The father of the child states that "the house is ill ventilated; there is a constant smell arising from a privy under the kitchen stairs; and his family have all been ill from this cause." On the 3rd September, at 13, Bacon-street, Bethnal green, the son of a hawker, aged three months, "cholera infantum (2 days)." On the 31st August, at 1, Claremont-place, Greenwich West, the son of a hairdresser, aged 23 months, "cholera infantum (10 days)." 35 persons (chiefly children) died of scarlatina or putrid sore throat, 48 of typhus. The deaths from the latter disease have been 35, 37, 33, 40, 48, in the last five weeks. 99 males and 49 females died in public institutions, which is less than the usual proportion.

METEOROLOGICAL OBSERVATIONS.—By the Greenwich observation, the mean reading of the barometer was 29.196 inches; the mean temperature of the air in the shade was 56.5 deg. through the week, or 2.4 deg. less than the average of the last seven years; the mean temperature of the 7 nights was 59 deg. Nearly an inch of rain fell on Sunday and Tuesday. The wind blew chiefly from the west and north, and passed over Greenwich at an average rate of 19 miles a day.

THE PRESIDENT IN THE RUE ST. JEAN, AT CAEN.

THE FRENCH PRESIDENT AT CHERBOURG.

The preliminary "moves" of a high game are being carefully adjusted at the present moment in France by Louis Napoleon and his adherents, and the whole country, watching with intense interest, is patiently awaiting the playing it out; prepared to applaud the skill of the parties if success attend their manœuvres, and ready, with characteristic fickleness, in case of failure, to turn their regards to other aspirants after the perilous distinction of being the head of the executive.

The progresses of the President of the Republic through the departments, for the purpose of ascertaining with his own eyes and ears the feasibility of his retaining the highest office in the State for a longer term than that fixed by the new Constitution of the Republic, are accompanied by an almost simultaneous movement amongst the great municipal bodies of France—the Departmental Councils—a large number of which have pronounced definitively in favour of such a revision of the Constitution as might, amongst other changes in it, enable the President to remain for a more lengthened period than four years at the head of the Government. From this it may be inferred that the majority of the "governing classes" are favourable to Louis Napoleon's pretensions, and his "progresses" do not in the main exhibit that a contrary feeling animates the great body of "the people."

Last week we noticed that the President, indefatigably pursuing his object, had set out from Paris for the Western departments, the ostensible object being a visit to the important naval station and dockyard at Cherbourg, and the French squadron lying there. He arrived at Caen *en route*, on Wednesday evening (the 4th), shortly before nightfall. He was received by the Prefect and the authorities at the Demi-Lune, the junction of the three roads leading to Lisieux, Pont-l'Evêque, and Trouville, and which forms a crescent. At that spot a magnificent triumphal arch was erected, with banners and suitable inscriptions. The houses were decorated with banners and garlands of flowers; the streets were lined with troops. The President was received with cries of "*Vive le President!*" "*Vive Napoleon!*"

Immediately on his arrival several addresses were presented by the authorities and the clergy, to which the President having given suitable replies, proceeded to the Hôtel de Ville, where he had invited the members of the Corporation, the officers of the troops and National Guards, the principal inhabitants, &c., to the number of 300, to meet him at a sumptuous banquet. At the banquet the President's health was proposed in flattering terms by M. Thomine Desmasure, representative of the people. The toast was received with immense applause, all the guests standing up, and shouting "*Vive le President!*" After silence was restored, the President of the Republic rose, and replied to the speech of M. Desmasure in the following terms:—

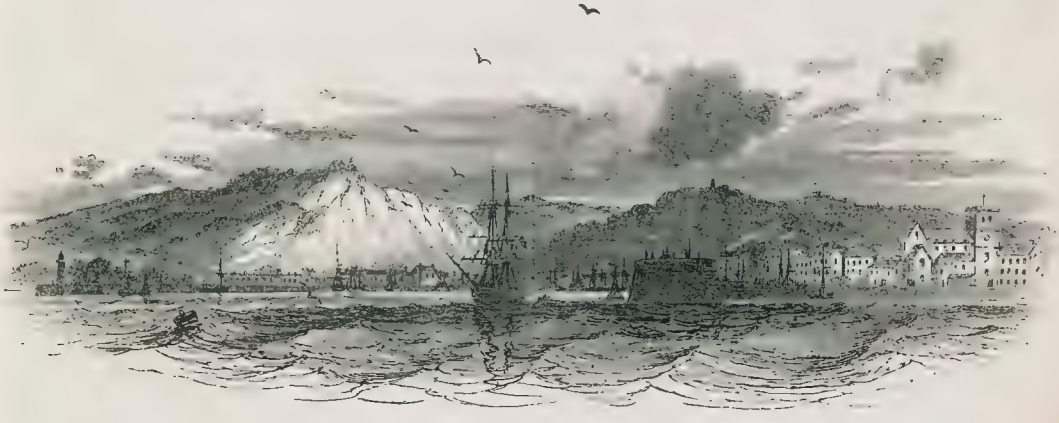
"The benevolent, sympathetic, and, I may say, enthusiastic reception I have met with in the east, as well as in the west of France, has indeed produced a profound effect upon me. feel, however, no overweening vanity at this reception, I attribute the smallest share of it to myself personally. What you applaud in me is the representation of order, and of more happy days for the future. (Applause, cries of "*Vive Napoleon!*") While I traverse your country, surrounded as I am by men who merit your esteem and your confidence, I feel proud at hearing it said: 'Our evil days have passed away, and we hope for better ones.' (Applause. While on every side prosperity seems to reappear that man would indeed be guilty [illegible] who would [illegible] [illegible] [illegible] changing what now exists, to sever imperfect it may be. Brave [illegible] in such manner, if stormy days be destined again to appear and that the people wish [illegible] to pose a new [illegible] as the Chief of the Government, that Chief, for his part, would [illegible] [illegible] [illegible]

SKETCH EN ROUTE TO CHERBOURG.

and classes to Cherbourg, which, from being one of the dullest and most insipid of French seaports, had been all at once transformed into one of the most bustling. The population of the town was nearly doubled. The vast harbour, which, in ordinary times, seldom possesses more than one or two ships of war laid up in ordinary, with a sprinkling of coasters, fishing-vessels, and other small craft, now contained the finest fleet of ships of the line ever brought together in France, a considerable number of magnificent steam and other frigates, and smaller ships. Besides this, there was a numerous fleet of English yachts—no less than sixty-three, and among them were some of the finest belonging to the Royal Yacht Squadron, the Royal Victoria Yacht Club, and the Royal Western Yacht Club, besides representatives of almost every other yacht club in the United Kingdom.

THE PRESIDENT EN ROUTE TO CHERBOURG.

The French fleet was under the command of Admiral Parseval-Deschenes, and had been brought from the Mediterranean for the sole purpose of being reviewed by the President of the Republic. As it lay in the roads, it presented a magni-



HARBOUR AND TOWN OF CHERBOURG.

ficent sight when viewed from the Quai Napoleon. There were no less than eight first-rate line-of-battle ships moored in two lines.

The weather line consisted of the *Valmy*, 144 guns, 1000 men, Vice-Admiral Dubordieu

	Guns.	Men
Henry IV.	100	850
Jena	100	850

The lee line consisted of the

	Guns.	Men.
Jupiter	120	1000
Jemmappes	100	860

Steamers:—

	Guns.	H.P.
Magellan, frigate, paddle	18	500
Descartes, frigate, paddle	16	450

The *Inflexible* (Rear-Admiral Romain-Desfosses, Flag-Lieutenant Cochrane), 100 guns, 850 men; *Reserve* (frigate), 60 guns, 650 men.

The *Friedland*, 120 guns, 1000 men (Bearing a Rear-Admiral's flag).

	Guns.	H.P.
Caffarelli, frigate, paddle	18	450
Caton, steam-sloop	16	220

The *Bucephale*, 20-gun corvette guard-ship, was also in the roads, but not considered as belonging to the squadron

This fleet of ships, the sailing-vessels of the line being two three-deckers and six two-deckers, may be safely considered the most powerful squadron afloat. They all mount guns along their gangways (carronades), and may be, therefore, considered to be two three-deckers and six three decks; they are all well painted, appear exceedingly well manned with young stout able men, with a good portion of *esprit* in their composition. Their boats are well rigged and fitted, and are admirably clean and well manned. In this squadron are at the least 10,000 men, with ships ready for service at a moment's notice.

With respect to Cherbourg itself as a naval station, it is a most important harbour, and consists of three parts, namely, the merchants' or inner harbour, which is commodiously situated at the mouth of the Divelle; the Government dockyard and arsenal, which are quite distinct from the above, and are situated to the north-west of the town; and the great outer harbour, or roads, through which the vessels must pass in order to reach either the mercantile harbour or the Government dockyard. The outer harbour is a large bay, the extremities of which are formed by Cape Levy on the east, and Cape Point Omanville on the west. Being exposed to the full force of the north winds, it was exceedingly dangerous till Louis XVI. began, and every Sovereign who has since reigned in France has continued, the works, which have made it one of the safest, most commodious, and most important ports in Europe. The principal of these works is a huge digue, or breakwater, which extends between the Ile Pilée and the Pointe de Querqueville, for a length of nearly two miles and a half, leaving only openings at each end for the entrance and exit of vessels. For a long period the history of this breakwater was a mere catalogue of disasters. The work of years was several times swept away by the storm of a night, and it was for a long time a problem of great doubt whether or not it could be completed at all. These doubts now no longer exist. Under the active government of Louis Philippe, the works were brought to such a state of forwardness that the real difficulties are at an end, and the digue may be considered done for their completion is the finishing off of a small portion of the upper masonry, which can be easily accomplished whenever the money is forthcoming. The effect of this great Digue is to enclose the bay of Cherbourg in such a manner as perfectly safe from whichever direction it may blow. The extent of the harbour thus gained from the ocean is upwards of four miles in length, by two in breadth. It has excellent anchorage throughout, and is so capacious as to contain more than fifty ships of the line could ride at anchor in perfect safety. In fact, between the outer harbour and the two inner harbours, Cherbourg could contain nearly the whole of the French navy.

The morning after his arrival (viz. Friday) the President held his levee at nine o'clock in the Maison de Prefecture de la Marine. He was courteous and pleasing to all, though the numerous persons, of all ranks, that attended it made the individual presentations very short indeed. The Admirals, the Captains, and officers of the fleet; the Colonels, officers, and others of the different regiments; the civil authorities, and other persons of the town, were presented. The President had also notified that he would receive any English officer of the navy or yacht squadron; consequently numbers were presented, amongst whom were Rear-Admiral Berkeley (who had landed that morning from the Admiral's yacht, the *Black Eagle*), Admiral Sir Thomas Cochrane, Captain Sir Charles Napier, Captain Michael Seymour, Captain W. H. Hall (*Nemesis*), Captain Eden, Captain Chads (of the *Excellent*), with about forty officers belonging to that ship and the Royal Naval College at Portsmouth. A number of yachtsmen were also presented: The Earl of Cardigan, the Earl of Yarborough, the Earl of Orkney, Lord Middleton, Mr. Ackers, the Hons. Captain and D. Pelham, the Duke of Marlborough, Earl De Grey, Lord J. Churchill, and a host of others. The business of the levee was concluded at eleven, and shortly afterwards the general review of the troops took place, when the 9th and 26th regiments of the line, about twelve companies of artillery, about the same number of the battalion of sharpshooters, and the National Guard of Cherbourg and the surrounding district (some of the latter appearing in the ranks with musket and bayonet, but without uniform), and a few mounted gendarmes, who kept the ground, and cleared away the crowds as required, were assembled: altogether, there were about 4000 troops present, and about 50,000 spectators. The President was well received, and seemed highly pleased with the greetings from the people, to whom, as in rode round, he constantly bowed in acknowledgment. The troops having filed past and given three cheers, were marched off to their several quarters.

Upon the whole, the feeling displayed at the review was by no means so warm as might have been expected. No symptoms of hostility or dislike appeared, and the prevailing silence seemed to be the effect of mere indifference.

At three o'clock the grand banquet given by the Municipal Corporation of Cherbourg took place in the great Salle de Gabarets, which, for the occasion, was splendidly fitted up for the occasion with a profusion of military flags, arms, and trophies. The number of guests was not less than 600, including, besides the President and his suite, the Admirals, Generals, and field-officers of all the ships in the harbour; the civil, municipal, military, and naval authorities, and a considerable number of the most distinguished strangers. Among our countrymen, the following were honoured with invitations:—

The Earl of Wilton, Commodore Royal Yacht Squadron; S. Talbot, Esq., Vice-Commodore; Earl of Cardigan, Commodore of the Royal Southern, Thomas Legh, Esq.; Vice-Commodore; G. Ackers, Esq., Commodore Royal Welsh; Lord Alfred Paget, Vice-Commodore; Marquis of Conyngham, Commodore Royal St. George's; J. W. Freed, Esq., Vice-Commodore; the Duke of Marlborough, Commodore of the Western; Admiral Sir Thomas Cochrane; Admiral Sir Charles Napier; Marquis of Ormond, *The Mirage*; Colonel Bowers, *Storm Fiend*; Captain Smith, *Talisman*; Joseph Wild, Esq., *Alarm*; M. Gee, Esq., *Curaçoa*; Colonel Markham, *Merlin*; Lord Alfred Churchill, *Wyvern*; T. le Marchant, Esq., *Aurora*; Capt. Mackinnon, *Julia*.

Besides the above, the following were also invited:—Mr. Turnbull, the British Consul at Avranches; Captain W. W. Hall, who came from Portsmouth in command of the *Lightning* steamer; — Hamborough, Esq., and Vaughan Allan, Esq.

The Mayor of Cherbourg presided at the dinner, which was remarkably well served. At the dessert the chairman proposed the health of the President of the Republic, which Louis Napoleon having acknowledged in a neat speech, then proposed the following toast:—

In presence of that sea which we have dominated; . . . presence of that fleet which has so . . . d the flag of France in the East, and which is ready to carry it with glory wherever the nations glory may respond to its summons, I propose a toast to which these foreigners, to-day our guests, who may convince themselves to-day that if we wish for peace it is not because we were disarmed, but through all sides and cries of "*Vive Napoleon!*" "*Vive l'Empereur!*"), but by that community of interests and by those sentiments of mutual esteem, which unite together the two most powerful nations. To the Port of Cherbourg! Loud and prolonged acclamations, with cries of "*Vive Napoleon!*")

These were the only toasts given.

Immediately after drinking the last toast, Louis Napoleon rose, and his example having been followed by the rest of the company, the party immediately dispersed. The feeling displayed at the banquet formed a striking contrast to that at the review. Indeed, nothing could be more cordial or more unanimous than the reception given to Louis Napoleon

In the evening, Admiral Desloffres, the maritime prefect, gave a splendid ball at the prefecture, which was attended by all the principal residents and visitors in Cherbourg, and of the latter by the English ladies who arrived in the Yacht Squadron. The President entered the ball-room shortly after nine o'clock, and remained for about two hours. He was accompanied by his cousin, the Princess Demidoff, and his usual suite. The ball, which was very brilliant, was kept up till a very late hour.

BRITISH SQUADRON OF YACHTS

In the course of the day (Friday) the squadron of English yachts presented the visitors a species of entertainment perfectly new to the French; and which none but Englishmen have the means for displaying, namely, a cruise of all their handsome yachts, accompanied by a variety of beautifully-executed manœuvres of the line of the evolutions of the great broadsiders, which they worked round, returning by the other again to manœuvre in the bay, to the great delight and surprise of the French of both sexes, who could hardly credit that such a scientific display of seamanship could be made, even in a Lilliputian fleet, by men not all of the naval profession. The manner of executing their evolutions and getting up to their anchorage in two lines, gave so much satisfaction, that they were loudly cheered by the people of the port. The captain of the French line-of-battle ship *Jemappes* avowed his admiration by exclaiming that the display of their prowess and tactics was "*Superbe et très-délicieuse.*"

At eleven, A.M., the yachts got under weigh by signal, and stood out to the westward of the harbour mouth, where, by signal, they formed into two lines.

STARBOARD DIVISION.—1. *Xarifa*, schooner, Commodore, Earl of Wilton; 2. *Brilliant*, schooner, G. H. Ackers, Esq., Commodore, R. V. R. C.; 3. *Alarm*, cutter, J. Weld, Esq.; 4. *Fair Rosamund*, schooner, W. Lyall, Esq., the Hon. H. T. L. Corry on board; 5. *Coral Queen*, schooner, Earl of Mountcharles; 6 *Amazonia*, schooner, Sir G. Buxton; 7. *Arrow*, cutter, J. Pearse, Esq.; 8. *Freak*, schooner, Lord Alfred Paget; 9. *Wyvern*, cutter, T. le Marchant Thomas, Esq.; 10. *Rival*, cutter, 11. *Aurora*, cutter, J. Le Marchant Thomas, Esq.; 12. *Will-o'-the-Wisp*, cutter, 13. *Harpooner* cutter, H. Stanley, Esq.; 14. *Cygnet*, cutter, R. Hamilton, Esq.; 15 *Lauderdale*, — —

PORT DIVISION.—1. *Alarm*, schooner, Commodore Talbot, M.P.; 2. *Constance*, schooner, Marquis of Conyngham; 3. *Julia*, schooner, — —; 4. *Merlin*, schooner, Colonel Markham; 5. *Lotta*, schooner, — —; 6. *Martin*, schooner, Colonel Mark — —; 7. *Ariadne*, schooner, Colonel — —; 8. *Rowers*, 9 *Coatsel*, schooner, — —; 10. *Medora*, cutter; 11. *Bertha*, cutter; 12. *Bertha*, cutter; 13. *Forest Fly*, cutter; 14 *Phantom*, cutter 15. *Ewen* cutter

Reaching to the eastward till four P.M., when, by signal, they bore up in succession, entering the east end of the breakwater on return to their anchorage. All did past their colours to the flag-ship, the courtesy being returned; the bands of several of the fleet playing while the yachts of each line were passing, that of the Admiral occasionally with "God save the Queen." Each line throughout the manœuvres preserved with wonderful regularity, considering the difficulty of restraining the speed of several of the cutters in relation to the schooners which they had to follow according to station. The last signal from the *Xarifa* was in acknowledgment of the zeal displayed by all.

In addition to the Royal Yacht Squadron were four vessels from Portsmouth, with the British pendant; they arrived on Wednesday evening, and were—the *Lightning* steam-vessel, with Admiral Sir J. Ommanney, K.C.B., Captain H. Hall, and Captain Rodney Munday; the *Fire Queen*, steamer, with Captain Chads and the officers of the College at Portsmouth; the *Portsmouth*, yacht, with Captain C. Eden and others; and the *Nemesis*, which was in this vessel; and the *Fanny*, tender, with Commander Ogle, Flag-Lieutenant Cochrane, &c.

THE NAVAL REVIEW.

Saturday broke with as favourable a promise of fine weather as the preceding days. The first active movement afloat was the simultaneous dressing of the ships, at a few minutes after eight—the French fleet, according to their fashion, bringing their flags no further down than the lower yards, and totally omitting to decorate the stays from the bowsprit end to the spanker-boom end; the yachts, according to the more tasteful English custom, wore the colours of all nations—the tri-colour, however, in honour of the French, formed the most numerous and most conspicuous. The French had only signal-flags, with the exception at each mast-head, and also at the peak. Yachts now began to weigh, boats commenced to ply, steamers, with crowded freights of all classes, and apparently of all countries, steamed out from the harbour, round the fleet, and through the yachts, and all the quays assembled on the jetty, wharfs, roofs, and shores. First, there was a regatta commenced at nine o'clock in the morning. The first race run was open to all gigs, and several of the gigs belonging to the English Yacht Squadron were entered and ran for the prizes which, however, was won by the French boat *Maquis*. The course was run twice round, which is about a mile and a half in length. The second race was for pinnaces, being boats belonging to the French fleet, and ran also twice round the same course. This was, as the former, stoutly contested, and afforded much amusement to the immense crowds which had congregated on every spot in the town, on the fortifications and esplanade, and which elicited a good deal of laughter from the Frenchmen at the expense of the English.

The President and staff then proceeded to the arsenal, a royal salute from the batteries welcoming his arrival. Every department of this magnificent establishment, still incomplete and in its infancy, was visited, and industriously inspected; the basin, the finest work in the world capable of holding forty sail of the line; the seven superb building slips, on one of which was a large frigate half finished, the immense range of furnaces, all of which were in full work at this time, and the admirable machinery and workmen, with their invaluable contents, formed the subject of inquiry, comment, admiration, and congratulation of the President.

The Prince was received at the dockyard by the maritime prefect, who accompanied him all over the works; but, on quitting the establishment, at half-past twelve, under another salute of the seaward battery, the Vice-Admiral commanding the fleet proceeded to the arsenal, and left the state barge, a very handsome boat, painted white, with scarlet awning and gilt decorations, rowed by sixteen oars. The procession of boats then rowed out towards the flag-ship, and, on nearing the guard-ship *Bucephale*, the first salute was fired from that, accompanied by the yards of all the ships that were also manned them, and the others manned their rigging. The most rapid firing was made by the line-of-battleships; every gun was fired on both sides, to the number of 21 each, and with the most excellent time. The flag-ship *Friedland*, in particular, fired with such regularity and celerity, that her massive sides appeared in one sheet of lurid flame. The yachts also, that had guns, fired salutes of twenty-one guns; and amid the thunder of the cannon and the roaring cheers of the crews, caught up from ship to ship, and running for many miles, from the breakwater to the town bridges, and from the eastern side to the dockyard shores, the President boarded the *Friedland*.

After staying for two-three-quarters of an hour, the Prince proceeded to the breakwater, a mighty and stupendous work (exceeding in length the breakwater of Plymouth), with a battery of heavy guns in the centre.

On the breakwater the Prince visited the fort, and battle-ship in succession, and though each ship cheered a little, his reception was decidedly cool. The President minutely inspected every one of the fleet, and did not quit the last vessel the *Veneres*, 84-gun frigate, until fifty minutes had elapsed. When on board some of the vessels, the crew were exercised hoisting topsails, topgallant sails and jib, and dropping courses. They did not, in the estimation of the English, perform this evolution quickly as they had been led to expect. Whilst on board the *Inflexible* frigate, three targets were placed on to seaward, and sixty rounds of shot were fired with good aim, several being hit at 800 yards distance

On leaving the frigate, the President came in through the yachts, and paid a visit to the noble Commodore of the Royal Yacht Squadron, the Earl of Wilton, on board of his splendid schooner the *Xarifa*, and then went on board the *Enchantress*, to pay a visit to the Earl of Cardigan. On leaving these vessels, both Lord Wilton and Lord Cardigan manned yards and fired Royal salutes; and as the Prince then passed through the line, every yacht's crew on the yards, in the rigging, and on the decks, gave him three hearty English cheers.

The procession now returned, and the Prince on his return took his leave of a most glorious day. This was the moment for a parting salute, as it was also the time for undressing the ships, when a scene was produced of which it is impossible to give a faint description with mere words. The most luxuriant imaginary beautifully dispersed their golden tints across the roads, brightening every object that stood out in relief against the horizon, from the dark-frowning sides of the line-of-battle ships, and white-veiled transports to the graceful yachts, bedecked within the vast expanse of the sparkling deep blue ocean waters, when the lightning flashes of nearly 2000 pieces of ordnance crashed forth with a tremendous roar; short, sharp, and decisive were the reports, enveloping each vessel in a thick smoke curling up to masts' heads, and only now and then dividing or clearing to allow the beautiful flag of the tri-colour to be seen; 50,000 voices on the yards and decks added, and on the wharfs and piers, swelled the gladdening din, and as if by magic, the bulky ships and the slender yachts having been stripped of their flaunting colours, reposed in silent unostentatiousness on their own shadow.

In the evening the Earl of Wilton, the inhabitants of Cherbourg to the visitors generally in the arsenal, the buildings having been handsomely fitted, and tastefully decorated for the occasion. It was, of course, a crush, like the ball of the preceding night, but was by no means so select.

Late in the evening the Earl of Wilton announced to the squadron that it was the intention of his Lordship to weigh at eight o'clock on Sunday morning for England; but by daylight every boat had manœuvred the tune of starting, and at the hour appointed most of the yachts had their anchors up.

The Government steamer *Lightning*, however, with Sir Thomas Cochrane, K.C.B., and the *Fire Queen* steamer, with Captain Chads and the College officers, remained, in order to witness some evolutions.

SHAM SEA-FIGHT.

On Sunday, the President of the Republic was on board the fleet the whole day. He left the town for the roads at eight o'clock A.M., accompanied by General La Hitte, Admiral Roman-Desfosses, M. Baroche, M. Rouher, Prince Lucien Murat, M. de Persigny (who arrived the day before from Berlin), and the rest of the suite, and went directly on board the *Friedland*, where he remained until after the review. A mass was said on the upper deck, by the Abbé Audubert, the almoner of the fleet, in presence of the President and the whole of the crew of the ship. For this purpose an altar was fitted up between the main and mizen masts, which had a very imposing and picturesque effect. The clerks who assisted the clergyman were four of the youngest midshipmen. The President, the Admiral, and his friends were seated in front of the altar, while the crew were drawn up on each side, with the officers between them

After the mass, the President, together with a large party of the authorities of different descriptions, and principal officers of the fleet, breakfasted with Admiral Parseval Deschesnes. Immediately after breakfast the President proceeded on board the *Locarne* war-corvette, which is navigated by aspirants to the rank of midshipman, which was sent from the fleet for the purpose of being inspected. The boys went through a great number of evolutions in presence of the Prince, such as furling sails, manning yards, &c., and the quickness and precision with which they performed them excited great admiration. The Prince next visited the *Triton*, the *Caffarelli*, and *Descartes* steamers, and examined their machinery and fittings-up with great attention. The *Descartes* is one of the largest steamers in the French service, and her engine, which is particularly fine, is of 450-horse power. On every one of the ships visited, the President decorated several of the officers with the cross of the Legion of Honour.

Immediately after the return of Louis Napoleon to the *Friedland* a sham fight took place, in which all the ships of the fleet took part. Up went a signal, and, with a tremendous and terrible roar, the floating cradels poured forth their broadsides; and without the smoke, the scene was grand and sublime to view. Each ship fired 500 times, and the effect of firing 5000 cannon in a quarter of an hour was very tremendous, as far as the sense of hearing was concerned; but it afforded little gratification to the sight, as the whole of the ships were rounding objects were enveloped in a cloud of smoke during the whole operation, [illegible] arable as a London fog

After this general engagement a more interesting spectacle took place. Suddenly, a fleet of boats darted out from under the sterns of the great ships, and, armed with howitzers, commenced an attack upon the *Descartes* and her consort. Several thousand rounds of musketry were fired, and the steamers responded with their huge pivot guns, and they been charged with the usual ambuscade of eighty-pound shot, would have made sad havoc with the attacking flotilla. At length the steamers were supposed to have beaten off their assailants, the smoke cleared away, and the *Descartes* got under weigh, and sailed about through the fleet, coming up close-hauled alongside the *Friedland*, when she saluted the President. She then sailed about the roads, and afterwards left for Brest.

These different operations had occupied the whole day till six o'clock, which was the hour fixed for the great dinner given by the President of the Republic to the admirals and captains of the fleet, and to which all the public authorities and the suite of the Prince were also invited. The dinner was not of a public character, and there were no speeches. Among the English visitors invited to the dinner, were Admiral Sir Thomas Cochrane (whom, by the bye, the French mistake for Lord Cochrane), Admiral Sir Charles Napier, Commodore Chads, Captain Eden, R.N., Captain Mackinnon, &c. In the evening, a splendid exhibition of fireworks took place, in which not only the ships but the town and the Digue participated. The only one of the English yachts which let off fireworks was that of the Marquis of Ormonde.

(*Continued on page 232.*)

CANTERBURY SETTLEMENT, NEW ZEALAND.

TESTIMONIAL TO THE BISHOP DESIGNATE OF LYTTLETON.

On Tuesday, another interesting advance in the prospects of this new settlement was made in the presentation of a testimonial to the Rev. Dr. Jackson, Bishop Designate of Port Lyttleton, and late principal of the Training College at Battersea. The gift emanated from the masters, students, and office-bearers of that establishment, in grateful acknowledgement of the eminent services and unvarying kindness of Dr. Jackson, through a period of six years; and the presentation took place at a *déjeûner*, given in the grounds of W. H. Fownes, Esq., almost within the shade of the beautiful new church at South Battersea. Here a spacious marquée was erected for the festival; and in an emigration tent, presented by the students to the Bishop Designate, was exhibited the testimonial, an elegant silver epergne, bearing upon the three faces of the pedestal the following inscriptions:—

Presented to the Rev. THOMAS JACKSON, D.D., Bishop Designate of Lyttleton, New Zealand, and late Principal of the Training College, Battersea, by the masters, students, and officers of that College, Sept. 10, 1850.

This offering is respectfully made by the masters and students of the Battersea Training College, in grateful remembrance of valuable talents and services devoted to the training of schoolmasters for the Church of England during a period of six years; they survive in parting, but, whilst they remember his persevering zeal and the distinguished blessings which have attended his labours as principal of a large college, they fee the assurance, that, in his extended situation, he will be as favoured and successful as he has been in England

Testimonial Committee, Treasurer, G. W. Martin, Esq.; Secretary, C. F. Zorbach, Esq.; J. F. Visser, Esq.; J. I. Kenworthy, Esq.; Mr. G. J. Stevenson, Mr. J. W. Marriot, Mr. W. Wilkins.

Resident Students.—Mr. J. P. Glass, Mr. A. Hilton, Mr. W. Blatchford, Mr. R. Hanley, Mr. C. Statham, Mr. W. Humphreys.

The *déjeûner* was excellently served to about 150 guests, parents of Battersea College, and friends of Dr. Jackson, among whom were several ladies and many clergymen. Lord Ashley was expected to preside, but was prevented by illness in his Lordship's family; and the chair was taken by the Rev. C. B. Dalton, Rector of Lambeth.

At the close of the repast, the toast of "Church and Queen" was drunk with enthusiasm. The reverend Chairman then announced that the office of presenting the Testimonial had devolved upon Mr. Tate, Professor of Mathematics in the College. The Chairman next spoke of his long friendship with Dr. Jackson, the unostentatious fervour of his piety, the unwearying ardour of his labours in the cause of education, and the great benefit and humbleness of Mile End, where not only was he loved for the affectionate solicitude of his ministration to the poor, but he was greatly admired for the soundness of his teaching, and the power with which he set forth the truths of the Church's doctrine. At the examination of the College, he was appointed by the Bishop of London Principal of the Training College at Battersea, and how far he was beloved by the students was testified by that day's proceedings. (Cheers.) Great zeal, great disinterestedness, great gentleness of spirit, and great devotion to the work that he believed in his heart to be right, and a thorough love of his work—these were the most remarkable attributes of his character, and there could be no doubt that they would be displayed at least as effectively in the new and more elevated sphere of duty to which he was about to be called as they had been in that sphere which he was now about to leave. (Cheers.)

Mr. Tate then addressed himself to the Bishop Designate, who was seated apart from the general company, and having read a brief address, spoke in high terms of the talents and energy of Dr. Jackson, to which the success of the College was mainly to be attributed. He had endeared himself beyond expression to all as a Christian and a kind-hearted gentleman. (Vehement applause.) He treated the students with paternal care, and the masters with respect; for he was too manly and too noble-hearted to imagine that the degradation of any of the office-bearers would tend to elevate the system. (Loud cheers.) With heart and soul they wished him "God speed." Mr. Tate then presented the Testimonial, the students, who were ranged upon his right, evincing an enthusiastic participation on the occasion, which was delightful to witness.

The Rev. Dr. Jackson, who was received with the warmest applause, then acknowledged his deep sense of the exceeding great kindness of his friends, and assured them that the masters, office-bearers, and students of the College, had the beautiful present they had bestowed upon him should grace the centre of his table so long as he lived a Christian bishop; and when he was about to be gathered to his fathers, he should wish it to be an heir-loom to his eldest child, who, if was to be hoped, would, as often as he looked upon it, be reminded of the traditions with which it was associated, and of the duty which had been imposed him of preparing the sons of the working classes according to the maxims of the Gospel of God, as interpreted by the Reformed Church of England. (Hear, hear.) Dr. Jackson then spoke with the most affectionate remembrance of his long connexion with the College, hoping that its present members would vindicate to posterity the character of that institution, not only by their zeal in that admirable institution, not only by the earnestness of their professions, but also by their persons, piety, and the practical benevolence of their lives. The Rev. Dr. then adverted to the Bishopric of New Zealand in connexion in mathematics, as followed in Battersea College, adding that there was scarcely a quarter of the world in which the preceptors who had been trained in this institution were not now employed with efficiency and success. He had been in barbarous seas, in the central schools of Quebec as in those of Sydney, they were to be found working zealously and ardently and successfully in their noble vocation. In conclusion, Dr. Jackson most cordially accepted his testimonial with gratitude. his family, and his work, to the special blessing of that God who was alike their Father and his Father.

The rev. gentleman resumed his seat amidst the most cordial applause. The students then sang, with admirable effect, the glee entitled "Canterbury Pilgrims," the words by M. F. Tupper, Esq., D.C.L., and the music by Mr. W. G. Martin, resident singing-master of the college.

Mr. Gladstone, one of the Council of the College, then proposed "Health and Success to Dr. and Mrs. Jackson, and their family." The Rev. H. Moseley, Government Inspector of Schools, expressed his cordial approbation of the sentiment, which was drunk with great enthusiasm. Dr. Jackson returned thanks, and then proposed "The health of his dear and valued friend, their reverend Chairman." The Chairman briefly responded.—The health of Mr. Edgington, who had attended the entertainment to superintend the refreshments for his kind superintendence of the festival; and of Mr. Fownes, who had placed his grounds at the disposal of the College authorities; were then duly honoured. The students sang their parting g.ee, and the company separated, after a day of unmixed gratification.

It is expected that the Bishop Designate will sail for New Zealand on Tuesday next. We trust that the College at Battersea, of the success of which such abundant testimony was given throughout the whole proceedings, will continue in its good and great work of national benefit.

[An Engraving of the Mansion at Battersea appeared in the ILLUSTRATED LONDON NEWS for June 24, 1848.]

THE LOCHLOMOND HERRING, OR PROVAN.—We were (says the *North British Mail*), through the politeness of the manager of the Dumbarton Railway, favoured with some specimens of this fine fish, which had just been received from Lochlomond. At first sight they appeared to be very herring, in general appearance, but, on comparing them with the more common fish, marked differences appear. The provan has a crescent tail, forked like that of a trout; and the fins are more delicate and stronger; the fish is firmer, the fins are larger in proportion; and there is an additional caudal fin near the tail. It would appear as if it was a cross between the trout, the herring, and the salmon-trout, combining the qualities of all. When we found that they resembled in flavour the eel, with the delicacy of the sole. We believe they neither take bait nor the fly, and are only to be caught with nets. They are, at present, abundant in Lochlomond.

SOCIETY OF ARTS.—EXHIBITION OF 1851.—The Society of Arts has just issued the following notice in reference to the Exhibition:—"The intimate connexion of the Society of Arts with the Exhibition of the Works of Industry of all Nations, in 1851, will be a sufficient explanation to the members of the Society, as the successful enlargement of an idea the Society has long cherished to realize, has appeared to the council to render altogether superfluous any further notice on the part of the Society. The ordinary course for the encouragement of arts, manufactures, and commerce, by the offer of its annual prizes for the session of 1850 and 1851. The council have, therefore, considered the present session might most usefully apply that portion of the revenue of the Society to the particular circumstances of the year. The council are of opinion that the most useful work they can undertake, and one they believe to be strictly ancillary to the views of their Royal President, his Royal Highness Prince Albert, and of the Commissioners for the Exhibition of 1851, will be to encourage the production of philosophical treatises on the various departments of the Exhibition, which shall set forth the peculiar advantages to be derived from each to the arts, manufactures, and commerce of this country. The council accordingly order, in the name of the Society, the large medal and £25 for the best, and the Society's small medal and £10 for the second best treatise on the objects exhibited in the section of raw materials and produce; the large medal and £25 for the best, and a small medal and £10 for the second best treatise on the objects exhibited in the section of machinery. A large medal and £25 for the best, and a small medal and £10 for the second best treatise on the objects exhibited in the section of manufactures. A large medal and £25 for the best, and a small medal and £10 for the second best treatise on the objects exhibited in the section of fine arts. Each treatise must occupy and not exceed eighty pages of the size of the Bridgewater treatises. The Society has also award his large medal and 30 guineas for the best general treatise upon the Exhibition, treated commercially, politically, and statistically, and small medals for the best treatises on any special object or class of objects to be named. The treatise for which awards are given are to be the property of the Society; and, if deemed suitable for publication, should the council see fit, they will cause the same to be printed and published, and will award to the author the net proceeds of any profits which may arise from the publication after the payment of expenses. The treatises to be delivered at the Society's house on or before the 30th of June, 1851. In announcing this list, there is no intention on the Society's part to confine the attention of the society to the subjects named there, though, for the reasons given, they do not anticipate that communications of interest on other subjects will be submitted."

The pictures lately purchased at the King of Holland's sale have just been placed in the Louvre. They are to be exhibited in a short time.

The Lords Commissioners of her Majesty's Treasury have directed Mr. G. Cornewall Lewis, one of their secretaries, to acquaint the Commissioners of Customs, that their Lordships are pleased to authorize, in all instances when pearls are imported into a country, to charge the duty upon the setting only (the stones themselves being admitted free of duty), as is now the case with respect to diamonds, under an order of their Lordships, dated April, 1817, on the subject.

FINE ARTS

ARCHITECTURAL EXHIBITION.

It is to be regretted that the older members of the profession have not contributed to the Exhibition, which is now open "free" to the public, at 53, Pall-mall, for the promotion of a popular taste for architectural beauty. About a hundred professors, however, have contributed their various designs, and among them there are not a few which, if not entirely satisfactory, are at least suggestive. We recognise, to begin with, an exceedingly appropriate elevation for a new church now in progress of erection at Ambleside, by G. Gilbert Scott; and a very pleasing design for a schoolroom to be erected at Lacey Green, Bucks, the cost being limited to £130, by J. P. Seddon. Mr. Ashpitel's selections from the Palladio are instructive Mr. Britton has exhibited several copies, such as the Scott Cenotaph, at Edinburgh, and a design for a Naval Cenotaph Gallery by himself, which are attractive. The designs submitted in competition for the Royal Arch, Dundee, are various in merit and character. Those by Mr. W. Young are elegant and ornamental; that by Mr. Fripp is massive; while that by Mr. E. B. Lamb combines the grand with the embellished. Messrs. Fergusson's and Allom's designs for a new National Gallery or Royal Academy, on the site of the present, are both meritorious. The improvement in King-street, leading to Westminster, by Mr. Wyatt Papworth, demands consideration. We have not, however, space to set forth at large the merits of the Exhibition, which we trust may meet with the encouragement that it evidently deserves.

We are happy to find that the public already resort to it, and that the numbers daily increase.

NEW SCULPTURE.

M. S. Raffaelle Monti has brought from Milan to Messrs. Colnaghi's, Pall-Mall, some statues by himself, which will well repay inspection. A head of a maiden at first communion is an exquisite and ideal of a veiled vestal, very skilfully manipulated. There are two full-length portraits of maidens fishing, in one group, remarkably pleasing and expressive; and a statue of Eve meditating, after her transgression, on the forbidden fruit, which indicates epic power: a cherubic serpent is most poetically twined about the base and back of the pedestal. The artist has, indeed, to a certain extent, in all his pieces, accomplished the beautiful, but has not attempted the sublime.

STATUETTE OF JOHN WESLEY.

An exquisitely executed statuette, reduced from the Wesley statue in the Wesleyan College, Richmond, has been recently completed by the original sculptor, Mr. Samuel Manning. This marble miniature is only sixteen inches and a half high, the pedestal being about ten. All the measurements are in exact proportion to the original, and the manipulation is everywhere elaborate in the extreme. It may be viewed at the sculptor's studio, Union-place, New-road.

BUSTS OF THE LATE SIR ROBERT PEEL.

Two Cabinet busts of this lamented Statesman have lately appeared, and are acknowledged to be in every respect truthful memorials.

The first has been modelled from Mr James Palmer's popular portrait of Sir Robert Peel, by Mr. T. S. Westmacott, and cleverly executed in Copeland's statuary. The likeness is strikingly characteristic.

The second bust, issued by Messrs. Hedley and Co., of Soho-square, was modelled by Mr. George Blackett, at the time Sir Robert Peel was sitting as Chairman of the Parliamentary Committee of Investigation on the Evesham Election. It has thus the recommendation of being from the life.

NATIONAL SPORTS.

The racing campaign is now beginning to draw towards a close, and in another fortnight will have only the three Newmarket October meetings, and some autumnal gatherings at Epsom, Liverpool, and Chester, to attract the public. Steeple-chasing will be combined with the legitimate sports at the three last-mentioned places, and will be followed by the commencement of the season for racing "across the country." The fixtures for next week are, Walsall, on Monday and Tuesday, and three following days; Tenby, on Tuesday; and Brecon, on Wednesday. Of this small batch Doncaster alone excites public attention; it promises to be a brilliant one in the great essential of sport, and, from the extraordinary facilities offered in the shape of special trains from the metropolis (and the Great Northern), as well as from all the sporting districts, will be fully attended. The St. Leger will be the "feature" of the second day, and the Cup of the last; the first of these events will be contested by a strong field, and the Flying Dutchman, if well at the post, cannot lose the other

The cricketing appointments are confined to a match on Monday, at Brighton, between a eleven of England and sixteen amateurs; one on the same day, at Copenhagen House; and one on Wednesday, at Kennington Oval, between Kennington and Epsom.

TATTERSALL'S.

MONDAY.—The sudden appearance of Minimum, and his elevation to the premiership, gave some interest to the betting, which, in other respects, was flat in the extreme. Bolingbroke and Muldew were sent to the right about for the St. Leger; and the Irish lot, saving Whistlejacket, found little favour; the "cracks" maintained their position.

GREAT YORKSHIRE HANDICAP.

5 to 1 against Minimum	7 to 1 agst The Castle	8 to 1 agst Post tempore

ST. LEGER.

11 to 10 agst Voltigeur (t)	8½ to 1 agst Roi Hantar	25 to 1 agst Russborough
11 to 1 — Buford (t)	15 to 1 — Cyprus	25 to 1 — Bolingbroke
7 to 1 agst Windischgrätz (t)	20 to 1 — Chatterbox	35 to 1 — Marchioness d'Ra
		40 to 1 — Mildew

CESAREWITCH

40 to 1 agst Clothworker	40 to 1 agst Montagu (t)

CAMBRIDGESHIRE

50 to 1 agst Turnus (t)	50 to 1 agst Officious (t)

DERBY.

10 to 1 agst Prime Minister (t)

THURSDAY.—The betting was so extremely flat this afternoon, and with so little effect on the prices, that any introductory observations are uncalled for:—

GREAT YORKSHIRE HANDICAP.

9 to 2 agst Mark Tapley (t)	5 to 1 agst Strongbow (t)	6 to 1 agst Minimum
	5 to 1 agst The Castle	

ST. LEGER.

11 to 10 agst Voltigeur (t)	13 to 2 agst Bolingbroke	16 to 1 agst Cyprus
5 to 1 — Pitsford	8 to 1 — Bashaster	25 to 1 — Chatterbox

CESAREWITCH

25 to 1 agst Knight Errant	33 to 1 agst Legerdemain	40 to 1 agst Bookstor

DERBY.—15 to 1 agst Prime Minister

LICHFIELD RACES.—MONDAY.

The PRODUCE STAKES of 10 sovs each, and 20 added.—Mr. Fowler's Zack Briggs (Whitehouse), 1. Mr. Minor's Modestina, 2.

The STAFFORDSHIRE STAKES of 15 sovs each, with 50 added.—Mr. Copeland's Candiewick (Sharpe), 1. Mr. Meeson's Doubt (Whitehouse), 2

The TWO-YEAR-OLD STAKES of 10 sovs each, and 30 added. Mr. G. Barton's Madame Wharton (Oates), 1. Mr. Palmer's True Love, 2

The WILTON CUP of £100, added to a handicap of 15 sovs each. Mr. Reid's Clothworker (J. Haw), 1. Mr. Osborne's Lady Hyde (Abdale), 2.

SCULLERS' MATCH BETWEEN SAVAGE AND WIGGETT.—

The scullers' match between Savage and Wiggett, both of whom belong to the lower part of the river, for £20 a side, took place on Wednesday. The distance selected was from Putney-bridge to Mortlake, and Savage was slightly the favourite. The men went to their stations in the presence of a tolerable muster of spectators, and effected a very good start. They were scull and scull up to Messrs. Searle's yard, both rowing very capitally, but here Savage began to draw away from his opponent, and continued to gain considerably to the finish. Wiggett made some strenuous efforts to better his position, but without effect. At Hammersmith-bridge he was three or four lengths astern, at Chiswick Eyot considerably more, and a long way behind at the finish.

THE HERTFORD SEASON IN WARWICKSHIRE.—Preparations for an extended hunting establishment in Warwickshire have just been completed, of which Leamington is to be the central point of attraction to sporting men during the forthcoming season. Mr. Barnard, the gallant master of the "Old Warwickians," has liberally consented to hunt this pack six days in each week—north and south of Leamington, and especially has he undertaken to secure the visitors at that place meets within a convenient distance four days out of the six. To render this arrangement more satisfactory to the town, and more effective in its operation, commodious and complete kennels have been provided in the immediate neighbourhood of the town, which, taken in connexion with those already in existence at Kineton, hold out to the lovers of the "noble science" in Warwickshire, promises of the most brilliant and continuous sport in drawing the well-preserved coverts of that celebrated country.

HOLYHEAD AND DUBLIN MAIL BOATS.—Four steamers are employed by the Holyhead Company for the mail service between Holyhead and Kingstown, viz. the *St. Columbia*, one of the Admiralty packets, and purchased by the contractors; the *Ebiana* and *Iron Duke*, built of iron, at the expense of the company; and the *Llewellyn*, also purchased from the Admiralty. In consequence of the latter vessel, however, undergoing some repairs, the *Banshee* has been lent by the Admiralty until the *Llewellyn* is ready for service again. The following is the official statement of the working of the contract boats:—*Banshee*, 37 passages: shortest, 3h. 30m.; longest, 4h. 48m.; average, 4h. 7m. *St. Columbia*, 41 passages: shortest, 4h. 11m.; longest, 5h. 26m.; average, 4h. 31m. *Ebiana*, 44 passages: shortest, 4h. 20m.; longest, 4h. 50m.; average, 4h. 34m. The *Iron Duke*, one passage, in 4h. 59m., with a light air. The greatest speed of the *Banshee* was 14.61 miles; lowest, 11 666 miles; the average speed being only 13.6 miles per hour. The average rate of the *Ebiana* was 12 4 miles; and that of the *Ebiana* and *Iron Duke* is under the contract speed, which is 12 knots per hour, the *Iron Duke* having attained little more than 11 miles per hour.

CHESS.

TO CORRESPONDENTS.

CAPE TOWN will probably favour us with his address, and at the proper time full particulars of the measures in progress for carrying out the assemblage shall be forwarded to him

C G.—According to the modern rules, stale-mate makes a drawn game

W T. Guildford.—In a game of Chess, by correspondence, our opponents send us as their move "Castles;" now, as they are legally able to Castle on either the King's side or the Queen's, what should be our course? Refer the move back to your adversaries for amendment, requesting them to state on which side they have Castled We do not think you can enforce a penalty for the omission

MAG M.—Our correspondent "Judy" is a lady; and, however incredible it may appear to "MAGM," the first party who furnished us with the true solution of the extremely difficult Problem, No. 340

KING FIPPS.—The solution of Enigma No. 664 is as follows:—1. R to Q 8th (ch); 2. R to K 8th (dis); 3. B takes P; 4. K to B 7th; 5. B mates

W H E, Bradford.—I Have the goodness to send us a diagram of the Problem in question, and we will give the solution next week. 2. The other position you have sent is not admissible, the Black King being already in check of the White Queen

A RETIRING CHESSPLAYER'S little shilling "Manual," published by Bogue, of Fleet-street

SUBSCRIBER ALDOVER.—A knight's tour is chess in the best workmanship and material, of Leuchars, at Brady's, 244, Regent-st., or Piesse and Lubin, 2, Hanover-st., Hanover-square. 2 Your question respecting the Set-to at a Chess Club is under consideration

R B W, Oxford.—The game is promising; yet it does not promise as well as your problem, which is peculiarly neat and amusing

DERVOS.—Your former letter never reached us. If, after a few more days' examination, you fail to discover the modus operandi in Major Jenisch's three positions, we will supply you with the key

MORRIS.—Apply to the Chessmen manufacturer at the Polytechnic Institution

CANTAB-DIENSIS.—Try and put it into better shape: the idea is amiable, but the composition is by no means. How could the White King ever get into such a position as he occupies?

EXONIENSIS; PHILO CHESS; MURPHY. Too obvious, though not without merit

G Pratt seems to be ingenious; but the Pieces are too numerous, and most inartistically arranged. Send a complete solution of it next week

J. H is—Perfectly correct, as far as we at present see, and very clever also

R D M Sutherland has shown to "King Fippis"

SOLUTIONS of the fine study by Messrs Horwitz and Kling, by CAPE TOWN and R V, P, Bolton, M P, FERRET are correct

SOLUTIONS of No. 846, by R H T, K, Yarmouth; R V, CAPE TOWN, F G R, M P, DIGORY, F E S, MILO, HENRICUS JOSAPHEUS, KING FIPPIS, E D M, ARGUS, SIMPLE SIMON, LYEN VICAR, G P, TYRONIUS, SY EDMUND, BATH DUO, DERVOS, JUVENTUS, PERIDUS, FERDNS, OXONIENSIS, CAMILLA, MINOR, JACOBUS, HERMIT, CAROLUS, are correct. All others are wrong

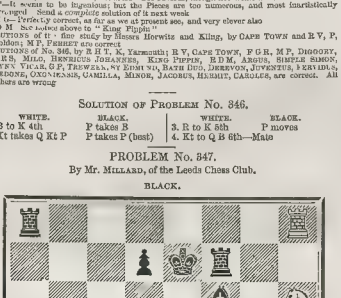
SOLUTION OF PROBLEM NO. 846.

WHITE.	BLACK.	WHITE.	BLACK.
1. B to K 4th	P takes B	3. R to K 8th	P moves
2. Kt takes Q Kt P	P takes P (best)	4. Kt to Q B 6th—Mate	

PROBLEM No. 847.

By Mr. MILLARD, of the Leeds Chess Club.

BLACK.



WHITE.

White, playing first, gives mate in five moves.

MATCH BY CORRESPONDENCE

BETWEEN THE CHESS-CLUBS OF BERLIN AND POTSDAM.

For the previous moves, see our Journal for June 29th of the present year.

WHITE (Berlin).	BLACK (Potsdam.)	WHITE (Berlin).	BLACK (Potsdam).
14. K to Q Kt sq	K to Q 2d	19. R takes R	B takes Kt
15. B to Q Kt 5th (ch)	K to his 3d	20. B to Q B 7th (ch)	K to K 2d
16. P to Q Kt 4th	B takes K B P	21. P takes B	Kt to K B 3d
17. Kt to Q 5th (ch)	K to Q sq	22. P to Q 6th (ch)	K to K 3d
18. B takes Q P	R takes R (ch)	23. B to Q B 4th (ch)	K to Q 2d

Berlin has to play.

CHESS IN THE METROPOLIS.

Mr. STAUNTON gives his Queen's Rook to an Amateur.

(Evans Gambit.)

(Remove White's Q Rook from the board.)

WHITE (Mr. S.)	BLACK (Mr. T.)	WHITE (Mr. S.)	BLACK (Mr. T.)
1. P to K 4th	P to K 4th	15. P to K Kt 3d	P to Q Kt 3d
2. K Kt to B 3d	Q Kt to B 3d	16. Q Kt to B 3d	Q B to Q Kt 2d
3. K B to Q B 4th	K B to Q B 4th	17. Q Kt to his 5th	Q to her B 3d
4. P to Q Kt 4th	B takes Kt's P	18. P to Q 5th	Q to her 2d (d)
5. P to Q B 3d	B to Q R 4th	19. Q B to Q Kt 2d	Q Kt to K B 4th (e)
6. Castles	B to Q Kt 3d	20. K Kt to K 4th	Q R to Q sq
7. P to Q 4th	P takes P	21. Q to her sq	P to Q R 3d
8. P to K 5th (a)	P to Q 4th	22. Kt takes B	Q takes Kt
9. P takes P (en passing)	Q takes P (b)	23. Q to K R 5th	P to Q Kt 4th
10. K Kt to his 5th	K Kt to K B 3d	24. Q to K R 6th	P takes B
11. R to Kt sq (ch)	Q Kt to K 2d	25. B takes K Kt P	Q Kt takes B
12. Q B to Q R 3d	P to Q 3d (c)	26. Kt to K B 6th (ch)	K to R sq
13. P takes Q P	Castles	27. Q takes K Kt, and wins	
14. Q to her Kt 3d	K B to Q B 2d		

(a) This variation first occurred in a game between Mr. Staunton and Mr Cochrane, and was afterwards elaborately analysed by the Hindostanee player, Ghulam Kassem.

(b) In Ghulam's analysis, the following result is given as the consequence of the second player taking the Pawn with Pawn

WHITE.	BLACK.	WHITE.	BLACK.
9	Q R P takes P	13. Q to K R 6th	Q R to K 3rd †
10. R to K sq (ch)	K Kt to K 2nd	14. Q to K Kt 7th	K to Q 2nd
11. K Kt to his 5th	P to Q 4th	15. K Kt takes B	P takes Kt
12. Q to K R 5th	P to K Kt 3d *	16. K B to Q Kt 6th	Q to K B sq.

and white has lost the attack and two Pawns

(c) Not K B to Q B 4th, on account of White answering with Kt to K 4th, and winning a Piece.

(d) Taking the Pawn would cost Black an officer.

(e) Again, it would not take the Pawn without great loss.

* Better than taking the Bishop † A prudent and essential move

BRILLIANT LITTLE GAMBIT BETWEEN CAPTAIN EVANS AND LIEUTENANT-COLONEL NESBITT.

(Muzio Gambit.)

WHITE (Col. N.)	BLACK (Capt. E.)	WHITE (Col. N.)	BLACK (Capt. E.)
1. P to K 4th	P to K 4th	12. K to Q B sq	Q to K 6th (ch)
2. P to K B 4th	P takes P	13. Kt to K 2d	P takes Kt
3. Kt to B 3d	P to K Kt 4th	14. Q to K B 7th (ch)	K to Q sq
4. B to Q B 4th	P to K Kt 5th	15. Q takes B (ch)	K to Q B 2d
5. B takes K B P (ch) (a)	K takes B	16. Q to K Kt 7th (ch)	B to Q 3d
6. Kt to K 5th (ch)	K to his sq (b)	17. Q takes R	Q Kt to K 2d
7. Q takes P	Q to K B 3d (c)	18. Q takes P (ch)	K to Kt 3d
8. Q to K R 5th (ch)	K to his 2d	19. R to K B 3d	R to K sq
9. Q to K B 3d	P to Q B 3d	20. R takes Q (d)	R takes Q
10. P to Q 4th	P to Q 3d	21. P takes R	
11. Q B takes P	Q takes B	And Black surrenders.	

(a) This mode of pursuing the attack is not nearly so forcible as the ordinary way, of giving up the Kt by Castleing

(b) If he play K to his 3d, with the view to win the Kt, he must lose the game.

(c) Leading to a fine game but it is proved now to be inferior to P. K Kt to B 3d

(d) White must win in this manner, by dint of large force; but we should have preferred the more scientific termination arising from 20. Q to K Kt 3d

CHESS ENIGMAS.

No. 606. By "JUDY."

White: K at Q B 3d, R at Q sq, B at K B 8th, Kt at K 5th, Ps at K B 3d and Q 4th.

Black: K at Q 4th, P at E 3d.

White to play, and mate in three moves.

No. 607.—By H T., Tunstall.

White: K at his Kt 2d, Q at K 3d, R at Q 4th, Bs at K R 6th and Q R 6th, Kt at Q 2d.

Black: K at Q B 4th, Q at her 8th, Rs at Q B 3d and 8th, B at Q Kt 3d, Kt at Q 2d and K 4th, Ps at K 5th and Q R 4th.

White to play, and mate in three moves.

EPITOME OF NEWS—FOREIGN AND DOMESTIC.

The King and Queen of the Belgians have arrived at Ostend. The stay of their Majesties is intended to be prolonged to the end of the present month, in the hope of improving the health of the Queen.

On Saturday the fund of the Incorporated Society for Promoting the Enlargement and Building of Churches and Chapels was considerably increased by the munificent bequest of £500 from C. S.

Very important news has reached Liverpool from Rio Janeiro (*sic* Bahia), dated July 18. It appears that the Brazilian Chamber of Deputies has passed a law declaring the slave trade to be piracy, and seems altogether to be in earnest to terminate the inhuman traffic. Sickness was very prevalent all round Rio

South Shields has just received a charter of incorporation. The whole of the parliamentary boroughs in Durham and Northumberland have now municipal corporations.

The inauguration of the Saxon Coronation Stone at Kingston-upon Thames will take place next week, in the presence of a large body of Freemasons, some of the county members, &c., who will afterwards attend a public breakfast. A grand display of fireworks, by Southby, will be exhibited on the river in the evening.

Thomas Lang, of Nenthal, on Alston Moor, Scotland, whilst shooting on Greenhill Moss, started a covey of 15 grouse, about 30 yards off. Six fell by the first barrel and four by the second, seven of which were shot dead, and three lamed. The day before he shot 12 brace in succession.

The Court of Queen's Bench have sanctioned a change in the dietary of the several prisons of Ireland, for persons under short sentence, so as to equalise it to that of the poor-houses. This will prevent so many leaving poor-houses and committing larceny to get into gaol.

The Bishop of London has licensed the Rev. Conrade Making Wimberley, M.A., of St. John's College, Cambridge, to the curacy of Isleworth.

The Bishop of Manchester has consecrated a new church at Lytham, near Blackpool.

The Empress of Russia, it is said, is about to go to Italy for the benefit of her health; she is to be accompanied by the Emperor. Dr. Jungken, one of her Majesty's physicians, has recommended a residence at Palermo, from the climate of which her Majesty formerly derived great advantage; and Dr. Mann, another of her physicians, has already gone to Italy to prepare for her reception

Mr. Lillingstone, of Lochalsh, Inverness-shire, has introduced the planing of tobacco on his estate, and fields which formerly grew potatoes now bear a luxurant crop of this plant. It remains to be seen whether the plant will decline in autumn or "end in smoke."

The negotiations for the purchase of the *Great Britain*, to carry on a trade between Panama and San Francisco, have failed, and this noble vessel is destined, for a time at least, to remain idle in her present quarters.

An arrival in the Thames has taken place by a vessel from Guernsey of 27 casks of black currants, preserved in spirits

A contract has been entered into by the Lords of the Admiralty for the supply of 11 tons of cocoa, including about one ton of screenings, for the service of the Victualling Department of the Royal Navy

In the hop market of Worcester, last Saturday, a number of packets of hops were sold as the following high rates:—Growth of 1846, 31s.; 1848, £2 2s.; and 1849, £4 12s.

On Monday morning, shortly before eight o'clock, in the vicinity of Salmon-lane, Limehouse, a fire broke out in the works belonging to the Patent Metallic Composition Company, in Gloucester-place. The flames originated in the mixing shop on the ground-floor; and owing to the combustible nature of the stock therein, the fire spread with great fierceness, at one time threatening destruction to the surrounding property. The mixing shop was burnt out, and the contents consumed; part of the roof was also destroyed.

The extension line of the East Lancashire Railway, from Lostock Hall to Preston, was opened last week.

Accounts this week from Canada state that a very destructive fire has taken place at Montreal, consuming property to the amount of 500,000 dollars.

In Mexico the cholera has nearly ceased, but the deaths in the capital by its ravages had been no less than 18,000. The Mexican Congress had been variously installed, and urgent measures set on foot to replenish the treasury and restore the credit of the Government

In California, new and rich mines continue to be discovered in seemingly inexhaustible numbers.

A revolution—or rather an insurrection, for its result is not known—recently broke out in the Ecuador (South America), and General Egaldi was beaten, and forced to retire on board a British vessel for safety; but he again landed and assumed command of a considerable force, with the intent to re-assert his supremacy.

Miss Weld, a member of the family of Cardinald Weld, recently "took the veil" at the convent at Westbury, near Bristol.

It is not true that the Lord Lieutenant of Ireland has been elected an elder brother of the Trinity House corporation, in the room of the late Sir Robert Peel. The Right Hon. Henry Labouchere, the President of the Board of Trade, has succeeded to that vacancy.

The passenger trade between Southampton and Madeira is rapidly increasing. The last packet took out thirty passengers for that salubrious island.

The rate-payers in Lancashire, with whom originated the movement for applying the representative principle to the nomination and election of county financial boards, are preparing to take the field with a view to renewing the agitation of that question.

On Saturday morning last, David Griffiths, shoemaker, Cornelly (Wales), undertook for a wager to hand-reap one acre of wheat in one day, which task he accomplished in a very creditable manner.

The Lords of the Admiralty have directed that henceforth the British and North American Royal Mail steam-ships, sailing between Liverpool and New York, shall cease calling at Halifax on their outward and homeward passage. The company's ships sailing between Liverpool and Boston will continue to call at Halifax, both out and home, as usual.

At Lowestoft, preparations are now being made for the herring-fishery voyage. Not more than 20 of the large boats will go to sea. One of the boats went to the north a week since, and came up with six lasts of herrings, which realised £120 at Yarmouth.

The influx of stranger visitors into Ireland, arriving from England and Scotland, in the last three months, has been calculated at upwards of 7000, many of whom, it is stated on their own authority, came for the purpose of seeing for themselves the capabilities of the country, and the most eligible places to locate as future residents.

The sailors stopping at the Dublin Sailors' Home, during the last three months, from time to time deposited in the hands of the superintendent, for safe keeping, no less a sum than £140, all of which would most probably have been squandered in dissipation, or stolen from them, had they not this refuge to protect them.

The Poor-Law Commissioners have ordered an inquiry into the general management of the Limerick union for the years 1848, 1849, and 1850, in accordance with a resolution of the board of guardians to that effect, and forwarded to the commissioners.

Two additional regiments (the *Limerick Chronicle* says) will shortly be despatched to Australia, where the malcontents are anxious to separate from the Government of Great Britain.

On Sunday morning a destructive fire occurred in the farm-yard of Mr Fellis, innkeeper, Rutherglen-bridge (Glasgow). Much was done in checking and confining the progress of the flames; notwithstanding which, a considerable amount of damage was inevitably effected by them. The origin of the disaster is imputed to incendiarism.

A committee has been appointed in the United States to receive subscriptions for the erection of a monument to Goethe, over the remains of John Wilson, the Scottish vocalist, who died in that city last summer.

The Brussels papers of the 8th instant announce the arrival at Verviers of General Haynau, on his way from London to Cassel.

The Bavarian Government has issued a decree prohibiting subscriptions and collections in aid of the cause of the Duchies of Schleswig-Holstein.

The hills and ravines around Nevada (Mexico) have every appearance of abounding with gold. It has lately been found scattered over the hills, mixed with the top soil, which is light and dusty like ashes.

A thriving trade has sprung up between San Francisco and South America, most of the substantial vegetables in the market being supplied from the latter place.

During a gale of wind on the 29th ult. two boats belonging to Yell, in the Orkneys, while crossing Otter Sound, by some unaccountable cause were swamped, and three men, a boy, and a man and a boy, perished.

A letter from Constantinople of the 26th ult. states that great sensation had been caused by the wife of Mehemet Pacha having strangled one of her eunuchs, assisted by a groom and some other servants. She had been arrested, She pretended that by law she had a right to kill him if she pleased. She was formerly the wife of an English physician named Milligen, but was divorced from him. It was believed that in spite of her high rank she would be condemned

A French paper states that regulations have just been issued by the Prefect of Le Seine with respect to the admission of persons who desire to send their goods to the Exhibition. All persons who have obtained gold or silver medals at French exhibitions are to be admitted of full right.

Four white deer, a present from his Majesty the King of Denmark to the Marquis of Breadalbane, arrived this week at the North British Railway station, Edinburgh, from Hull, in charge of two of his Majesty's keepers, and were forwarded by railway to Perth, on their way to Taymouth.

Another of the splendid lionesses contained within Wombwell's Royal Menagerie gave birth to two remarkably fine cubs on Tuesday last in Edinburgh, and, strange to say, they are pure white. Mr. Wombwell states that he has bred lions, &c., for upwards of 40 years, but never knew or heard of such an occurrence previously.

THE FRENCH SQUADRON IN POSITION.

THE FRENCH PRESIDENT AT CHERBOURG.

(*Continued from page 230.*)

The President, during his visit, distributed 30,000 francs among the crews of the ships. The only cry uttered by the sailors in saluting Louis Napoleon was that of "*Vive le Président de la République!*" orders having been issued from head-quarters forbidding any other cry.

On Monday morning the President left Cherbourg at nine o clock, for St. Lo, whence he proceeded *viâ* Avranches and Evreux to Paris, where he was expected to arrive on Thursday night.

The President will shortly proceed to canvass the southern departments.

M. de Salvandy, late minister of Louis Philippe's Government, has, it is said, by his visits to Wiesbaden and to Claremont, effected a complete reconciliation between the Bourbon and the Orleans families.

General Cavaignac is suffering from severe indisposition, and it is considered very doubtful if he will ever again be able to take a part in the public services of his country.

The returns from the departments give fifty-three as the number of Councils General who have adopted resolutions in favour of the revision of the constitution; nine against; and thirteen who have separated without adopting a resolution for or against. There now remain only eleven whose decisions are unknown.

THE ROYAL YACHT SQUADRON SALUTING THE FRENCH SQUADRON.—SKETCHED BY THE HON. DUDLEY PELHAM.

SHIPS' BOAT-RACE AT CHERBOURG.

MUSIC.

GLOUCESTER MUSICAL FESTIVAL.

(From our own Correspondent.)

GLOUCESTER, WEDNESDAY.

GLOUCESTER CATHEDRAL.—THE SUPPOSED PILGRIM'S DOOR.

THE history of the origin and progress of the gatherings of the three choirs of Gloucester, Worcester, and Hereford, if carefully compiled, would supply a very interesting work to be added to the musical library of art progress. With the exception of Lyson's book — a very imperfect review of these ancient meetings, and which only extends to the year 1811 there are no published records as to the early struggles of the lovers of music to establish these annual performances on a permanent basis. A few amateurs assembling originally only for practice and recreation, prepared the way for the festivals, exchanging, as they did, visits between the three towns at stated intervals. And this musical fraternity was gradually enlarged, until a charity collection was organized. The amount, in 1724, at Gloucester, was £31 10s.; and, owing to the indefatigable exertions of Dr. Bisse, Chancellor of Hereford, the annual meetings soon rapidly increased, to the "exaltation," as he once preached, "of holy worship, to the improvement of the choirs, the credit of the foundations, the benefit of the cities, the comfort of the fatherless, and the delight of mankind." The institution has been invaluable for the cause of music and this country, as well as for the cause of charity. It is to the grand combinations of sacred and secular music at these celebrations, that the capital towns of Great Britain are indebted for the formation of choral societies and orchestral associations, thereby improving national taste and enlarging musical knowledge. How far the Musical Festivals of the three choirs have kept pace with the marked advance of late years, it is not now the time to discuss; and whether the quality of the performances, considering the amelioration of metropolitan execution, may not be vastly improved under experienced control, is a vexed question that we shall not open at present, the details of the doings of the actual assemblage exacting already a heavy call on our space and attention.

The 127th anniversary is now in full progress, under her Majesty's especial patronage; the presidency of the Duke of Beaufort, and the vice-presidency of the respective county Lord-Lieutenants, Earls Fitzhardinge and Somers, and Lord Lyttelton, and of the Diocesan Bishops of Gloucester (who is in residence), Worcester, and Hereford. The stewards who have undertaken the financial risks are T. G. Parry, Esq., High Sheriff, the Rev. Lord Saye and Sele, the Rev. [illegible] the Hon. T. Evans, D.D., the Rev. W. L. Darell, the Rev. H. B. Evans, the Rev T. Peters, Sir Martin H. C. Brevoy, Bart., W. Deal, W. H. H. Hartley, E. Sampson, T. Turner, J. W. Walters, and J. Yorke, Esqrs. This is an unusual number of stewards, and shows that the determination to maintain the festival is strong. It should be explained that the collections, each day, at the Cathedral, are appropriated without reduction to the charity—that is, for the exclusive benefit of the Widows and Orphans of the Clergymen of the three Dioceses, the receipts from the sale of tickets being devoted to the expenses, any deficiency in the receipts being paid by the stewards. According to present indications the deficit will be little or nothing; and the weather is so fine and brilliant, that the acceptable, but rare word, a surplus, is even whispered. May it prove so, for it is too bad to tax the local gentlemen with an annual loss in each town, especially when, by the exercise of a proper combination in the three counties, a mighty musical meeting could be ensured, of vast results for art and artists, and financially prosperous. It is, however, astonishing how antagonistic is the spirit of each Cathedral city; and, as regards the meetings, the feuds of the Guelphs and Ghibellines, of the Montagues and Capulets, of the white and red roses, were as nothing compared with local animosities and jealousies; the only union being between the three respective organists, who are quite satisfied with the existing order of things, musical as well as administrative.

On Saturday, signs of activity in the town were manifested. Artists were seen rambling in the streets, and huge placards announced the attractions of the week in shopocracy. Madame Sontag, accompanied by her daughter and the Count Rossi, arrived on that day. Madame Castellan, who, on her way, sang at two services on Sunday at St. Swithen's Church, Worcester, for the benefit o the organist and choir, the Rev. R. Sarjeant, M.M., the rector, preaching excellent sermons, reached here on Monday, with Miss Dolby, who has been on a tour with Jullien's band. The rehearsals in the Cathedral and Shire Hall, on Monday, were, as usual, long, as in our railroad musical system one day suffices for such purposes. On Tuesday, the ringing of bells announced to the population, native and foreign, that the Festival had commenced. The aspect of the interior of the Cathedral at the morning service was truly grand. Our artists come to our aid to depict the noble nave, and here we claim a marked advantage over our contemporaries of the pen. We are not called upon to present to the mind's eye the characteristics of this sublime spectacle: there it is—the scene of devotional and musical grandeur. The large circular pillars separating the nave from the aisles will be recognised as of the Norman style, with semicircular arches connecting them at the top. The raised amphitheatre at the western window is, perhaps, the best spot to view the assemblage of amateurs seated on numbered forms in the nave until within a few feet of the orchestra, with the organ at the summit, beyond which may be seen a portion of that exquisite specimen of pointed architecture, the choir. The organist (Mr. Townshend Smith, of Hereford Cathedral) is not seen, because his seat is on the choir side; but, through the agency of a mirror, fixed at one of the slender columns of the ribs of the vaulted roof, he is enabled to follow the [illegible] of the conductor's baton. Mr. [illegible] the organist of Gloucester Cathedral, has each side the conductor's desk. Between are ranged the principal singers and the choralists, in raised seats, up to the platform for the instrumentalists. In the centre of the group is Mr Henry Hugues, the leader, with Willy as principal second, and Messrs. J. Loder, Cooper, Dando, A. Griesbach, Watkins, Marshall, Betts, W. Blagrove, Thirlwall, Banister, E. Chipp, Watson, Zerbini, Kelly, &c., first and second violins; Messrs. Hill, Glanville, R. Blagrove, Thompson, Trust, &c., violas; Messrs. Lucas, Hatton, Phillipps, W. Loder, Chipp, &c., violoncellos; Messrs. Howell, Severn, Pratten, Rowland, Winsor, &c., double basses; Card, sen. and jun., flutes; Nicholson and Horton, oboes; Williams and Egerton, clarionets; Baumann and Larkin, bassoons; C. and E. Harper, Bae, and Kielhach, horns; T. Harper and Irwin, trumpets; Smithies, sen. and jun., and Healey, trombones; Chipp, drums, &c. The Mayor and Municipal Councillors came in state, and the Bishop occupied a chair at the right of the nave, looking at the orchestra, opposite the pulpit. The service began at eleven, but did not end till near three o'clock. Nothing could be finer than the *coup d'œil*, with the splendid flood of sunlight through the pierced and highly ornamented windows, so rich in the pointed style. The service was intoned by the Rev. Mr. Kent, and the Rev. Mr. Luscombe read the lessons of the day, "Micah 2," and "Matthew 11." The *preces* and *responses* were from Tallis, the giant of English ecclesiastical music; but the use, or rather abuse, of the organ in the responses was a mistake. Nothing can be more grave and solemn than the responses in their simple state. There were many thrilling points in the execution of the service—the broad harmonies of Tallis, and their massive grandeur, accord with the colossal proportions of the sacred locality. There are sensations experienced from the devotional associations, not to be felt in profane edifices. The "Te Deum," of Handel, composed for the Dettingen victory, was, on the whole, well rendered, the solos were sung by Miss Byers (in the absence of Miss Lucombe, from indisposition), Miss Williams, the contralto; Mr. Lockey, Mr. Lawler, Mr. Barnby (who sang Miss Dolby's part for the same reason), and Mr. Phillips. The choral singing was [illegible]. The trumpet playing of Messrs. Harper and Irwin, whose duties yesterday were so onerous, and the oboe and bassoon of Nicholson and Baumann, deserve especial mention. Handel's "Jubilate" might have been dispensed with; it is very inferior to the "Te Deum" as a composition. The "Esther" overture was steadily rendered, and Handel's coronation anthem,

THE GRAND MUSICAL FESTIVAL IN GLOUCESTER CATHEDRAL.

GLOUCESTER CATHEDRAL.—THE PORCH.

"The King shall rejoice," is very elaborate. Dr. Boyce's anthem, "Blessed is he," with the interpolated duo "Here shall soft charity," is a stereotyped piece at these meetings, and finds ardent admirers even in this fast age: except to praise the singing of Miss Williams, Lockey, and Phillips, it is not requisite to discuss how far Mr. Boyce's reputation is justified, but an invitation to a modern English composer to write an anthem for these meetings would be both politic and graceful. The sermon was preached by the Rev. Townshend Selwyn, Canon of the Cathedral. His text was 2d Corinthians, 9th chapter, 12th verse: "For the administration of this service not only supplieth the wants of the saints, but is abundant also by many thanksgivings unto God." The eloquent preacher was unfortunately inaudible to the greater portion of the congregation. The collection at the doors was £: : s. 8d., of which £50 came from the Worcester funded property, the only contribution of that kind; and £50 from the Dean and Chapter of the Cathedral.

The attendance at last night's concert was more numerous than had been anticipated, the first evening programme being generally scantily patronised. The ball at the close probably had considerable influence in the attraction. Spohr's "Last Judgment" was the first selection, and took a more than usually solemn character from the "Trompeta," and took a more than usually solemn character from the "Trompeta," and took a more than usually solemn character from the "Trompeta,"

ADVERTISEMENTS.

ASTLEY'S ROYAL AMPHITHEATRE.—Proprietor and Manager, Mr W Batty. 80th Night of Mazeppa — On MONDAY, September 16th, 1850, and during the week, the Entertainments will commence, at 7 o'Clock, with MAZEPPA and the WILD HORSE. THE GREAT EXHIBITION OF 1851.

THE ILLUSTRATED LONDON NEWS

IN THREE LANGUAGES

The Proprietors of THE ILLUSTRATED LONDON NEWS have pleasure in announcing to the public generally, that they have made arrangements for the publication of a complete, where fully written, and profusely Illustrated History and Description of the GREAT EXHIBITION OF THE INDUSTRY OF ALL NATIONS, to be held in London in 1851. During the whole period of the Exhibition there will be published, in the form of SUPPLEMENTS of THE ILLUSTRATED LONDON NEWS, containing the fullest and most authentic Reports of the Progress of the Building, and of the Articles of Art and Manufacture, with Illustrations designed by the most competent Artists, and executed in the highest style of the engraver's art.

No expense will be spared to make the Publication, in all respects worthy of the great undertaking, of which it will form the Permanent Record; and no pains will be taken to render it as useful as it will not only be a possible competition, but place it within the reach of all classes of the community.

In order, also, that the Artists and Manufacturers of Foreign Nations, who shall send their productions to the Exhibition of the World's Industry and Skill, may have the full advantage of a permanent and extensive record of their exertions, an extra SUPPLEMENT of THE ILLUSTRATED LONDON NEWS will be published in FRENCH and GERMAN LANGUAGES, as well as in ENGLISH.

GRANDE EXPOSITION DE 1851. ILLUSTRATED LONDON NEWS EN TROIS LANGAGES

Les Propriétaires de THE ILLUSTRATED LONDON NEWS ont l'honneur d'annoncer au public français, qu'ils ont disposé avec de grands soins une complète, intéressante et riche relation de l'Industrie Universelle de toutes les nations de la GRANDE EXPOSITION DE 1851. Pendant toute la durée de l'Exposition, il paraîtra des SUPPLEMENTS à L'ILLUSTRATED LONDON NEWS, contenant les plus complètes et les plus authentiques Rapports de l'Exposition, et des Articles de Manufacture, avec des Illustrations dessinées par les premiers Artistes, et exécutées avec la plus grande perfection, en Gravure sur Bois.

Comme ces Suppléments seront publiés en Publication en trois langues—de la grande Exposition, de la quinzaine—de la grande Exposition, de la quinzaine—de la grande Exposition, de la quinzaine

THE AFRICAN EXHIBITION, AT THE COSMORAMA, REGENT-STREET.

AFRICAN EXHIBITION.

A VERY interesting exhibition of three natives of Southern and Eastern Africa has just been opened at the Cosmorama, Regent-street, and is worthy of visit, perhaps, from more sight-seekers than happen to be in London at this moment.

These individuals are a Kaffir man and an Amaponda woman from the south, and "Larcher," a Zoolu chief from the eastern coast, bordering on the Mozambique Channel. They speak, however, the same language, but with different dialects. The exhibition-room is hung round with skins and horns of wild animals of Africa, and with various weapons, and on the tables are some specimens of their domestic implements.

The Kaffir, Bonzaquai, is a fine athletic fellow, twenty-five years of age, of middle stature, with a copper-coloured skin, heightened in places with red clay: his features are unmistakeably African, in the large jaw, the broad nose, the dark eye, and the woolly hair. These are, also, the characteristics of the Zoolu-man—but he is larger in stature, and quite black. They are both dressed in cow-skins. The mantle of the Zoolu is, however, decorated with a profusion of animals' tails, and his head is dressed with ostrich feathers. The Kaffir wields the light and sharp assegai, or lance, with great dexterity; and his prowess was often proved against the British in the late war. He hurls the assegai, while the Zoolu uses a shorter implement, with which he stabs. They go through a sham fight, in which the shaking of shields is very prominent; and howling and stamping strive to outvie the report of gunpowder.

Homcaumba, the Amaponda wife of the Zoolu, is usually introduced carrying a water-jar on her head, after the manner of her country. She is about twenty-five years of age; her costume is of cowskins; and her short hair is rolled into small tags, kept stiff by means of red clay, rubbed into them as freely as any vendor of bear's-grease could desire.

The Kaffir is quickest of apprehension, and has already picked up some words of English, the others are either duller or more lazy. In common with most Africans, they have no notion of time, cannot tell their own age, or fix a date for any event in their lives. They have very odd snuff-boxes, and most curious receptacles for them. The snuff-boxes are either small horns or hollow reeds, and these they carry in their ears, in lieu of ear-rings.

From their performances our Artist has selected a native dance, such as is common daily during the ripening of the grain, and at the period corresponding with the English harvest-home. The Zoolu is dancing before his wife, and stamping most violently with his feet on the floor, at the same time that both sing a wild and monotonous chant, the burthen of which is "Azshee, azshee!" whilst the wife, with her body bent forward, keeps time by clapping her hands. This dance is a considerable exertion; and after it the chief is evidently exhausted.

The Africans have been brought to this country by Mr. Cawood, subject to a bargain made with them before leaving the Cape, with the consent of Sir Harry Smith, the Governor, and their chief. The agreement is for two years. Their behaviour, since their arrival, has been unexceptionable; they seem pleased with the change, and enjoy English living, giving preference to mutton as food.

Altogether, this is a most attractive exhibition, and entitled to special encouragement.

WHIRLWIND AT EXETER.

WE have been favoured by an accredited Correspondent at St. David's, Exeter, with the accompanying Sketch and details of an extraordinary phenomenon, witnessed by many persons of respectability, among whom were Mr. Webber, landlord of the Port Royal Inn, and boat-builder; besides other persons whose testimony can be relied on. Mr. Webber states that on Saturday afternoon last, between the hours of three and four, whilst working in his shed, his attention was arrested by a loud rushing sound, which proceeded from a path immediately outside the building. On hastening thither, he saw large stones, dust, &c. taken up as in a whirlwind, from a space on the ground as large as a coach-wheel. This revolving column gradually drew towards a small punt afloat in the adjacent river, and moored to a post by the bank; the boat was then lifted as high in the air as the painter would allow, and was held there by the force of the wind, spinning round like a top. The column then moved on towards a four-oared gig, moored in a similar manner; when, simultaneously, the punt fell, and the gig was elevated precisely in a similar manner, the painter holding her head down to four or five feet from the water, whilst the stern was raised about fifteen feet. The column then seemed to have expended its strength, and fell, so to speak, in water, with the noise of a ton weight, dashing and stirring up the bed of the river with foam. The gig is thirty feet long, and had in her, at the time she was taken up, from twelve to fifteen gallons of water; she has been rendered quite useless. What renders this occurrence the more remarkable is, that at the time scarcely a breath of wind was stirring, and the sky was nearly cloudless.

WHIRLWIND AT EXETER.

THE SEA-SERPENT.

The mysterious stranger has been again seen by Mr. Travers and his enterprising yachtsmen. They have brought four rifles to bear upon his left eye, which, it seems, he most merrily winked at his pursuers. He would have laughed in his sleeve at the pleasant conceit, but we learn that he had just put off his coat. He, however, wished them a polite good morning, and descended to unknown depths.

"On Saturday last," writes Mr. Travers, "the weather having the appearance of being settled fine, I put out to sea, determined, as far as the capabilities of my little craft would permit, to go any length in finding out the position of the stranger, hoping, by keeping a constant look-out in every direction, to discover him. Nor was I disappointed, the animal, lured no doubt by the dense masses of fish now off the coast, having remained within a comparatively short distance of the land. At about eleven o'clock a.m., when off Dunworley Head, one of my crew on the look-out sang out, 'The sea-serpent on starboard bow!' and on looking in the direction indicated I had the pleasure of at once recognising the same monster that I had before seen; and greatly do I regret indeed that you, or some party conversant with natural history, were not on board with me. We drew as close as I thought consistent with safety, and had ample proof of the creature being plesiosaurus, he being at the time engaged in bolting a number of large hask, or conger eels. I had now for the first time a view of his tail, which entirely differs from the usual form of that extremity in most descriptions of fish, being furnished with no fin, but somewhat resembling a huge elephant's trunk or proboscis, the end long drawn out, and curling and twisting in a very remarkable manner. I really feel afraid to hazard expressing in figures what I judge to be the dimensions of the animal, but I do believe that if it were stretched straight from head to tail that it would be rather over than under thirty fathoms long, and of that length I am satisfied fully half is seven feet in diameter. The mouth is a most capacious organ, and opens something like that of an alligator. The small size of the gills—for I could discern nothing like the blowing holes of a whale—rather surprised me. The nose, I think, is formed of a soft flesh-like substance, not bony; and from the broken condition of the external coat of scales, I am satisfied, as before observed, that the beast is now in its 'casting' state. After a little time it appeared evident that he had fallen asleep, as we could perceive him rapidly drifting on the shore, at the east side of Dunworley Head; and I once more, although I now feel with more rashness than discretion, resolved to try the effect of fire-arms in capturing him. Four rifles were prepared, brought simultaneously to bear on the animal's head, and, giving the word myself, and directing all to aim for the eye turned towards us, bang went the pieces in a volley, the shots taking evident effect. His first movement was to shake his head and wink the wounded eye in a rapid manner and then, as if to cool the painful wound, he suddenly dived, since when I have't had the slightest trace of him, either by my own observation or through others."

The *Cork Constitution*, referring to the foregoing, says:—"Since the above letter was received, the following information on the same subject came to hand. Monday last, a party of gentlemen, belonging to this city, were enjoying a sailing excursion in the *Antelope* yacht, belonging to Mr. Wheeler, along the coast from Glandore to Kinsale. Passing the Old Head of Kinsale, the day unusually fine, they observed an extraordinary commotion of the sea, apparent to every one on board. The bay of Kinsale was at the time filled with fish. In a few moments they perceived a large serpent-like fish on the surface, that could not be less than 120 feet in length. In shape it resembled a long funnel of an immense steamer. Unfortunately they were not sufficiently near the monster to give a description of the head and body. After lying on the surface for a few minutes it suddenly dashed ahead, with a velocity, as far as could be seen for a distance of two miles, of at least sixty miles an hour. It then disappeared. It was believed that the sea-serpent must have been in pursuit of the shoals of fish that throng the bay. It is a singular circumstance, that, notwithstanding the unusual quantity of fish that was observable, the Kinsale hookers were most unsuccessful, as it was stated they did not obtain a single take during the evening. The gentlemen who have witnessed the visit of this monster, and whose statement is detailed above, may be relied on as above all suspicion."

PRIZE MEDALS.

THIS interesting Medal has been designed and executed in gold and silver, by Mr. Aronson, of Bangor, for distribution to the successful candidates at the Rhuddlan Royal Eisteddfod and North Wales Musical Festival, to be held at Rhuddlan Castle, on the 24th instant and three following days. The Illustration shows the obverse of the Medal, with a view of the ancient Castle, which has been roofed and otherwise fitted up for the performance, at an expence of £800. The reverse of the Medal bears a portrait of the Right Honourable Lord Mostyn, President of the Festival. The Prizes will be awarded for the best poems, essays, and musical performances; for proficiency in education, and the best productions in useful arts and manufactures.

THE RHUDDLAN ROYAL EISTEDDFOD PRIZE MEDAL.

SUSPECTED INCENDIARISM.—On Tuesday afternoon, between two and three o'clock, a fire of rather a serious character broke out in the premises in the joint occupation of Mr. Child, a private gentleman, and Mr. Solomon Stern, an importer of foreign cigars, in Matthew-terrace, Hackney-road. On the neighbours entering the building, they found one of the rooms on the second-floor, which was used as a warehouse, and filled with cigars, in one mass of flame. The heat at that time was so intense, that it was impossible to approach near the place to render the least assistance in checking the fury of the fire. The flames speedily reached the roof, and were not extinguished until Mr. Stern's property was nearly all destroyed, and the building partially gutted. From an inspection since made, it is the opinion of Mr. Stern that the premises were wilfully fired. Fortunately his loss will be covered by an insurance in the Scottish Union Fire-Office.

THE SHOOTING SEASON IN BELGIUM.—So strange and perplexing is the operation of the game-laws in France and Belgium, that the sportsman, especially the foreigner, is sadly puzzled to know when he may legally enter upon the enjoyment of dog and gun; for, whilst the law would hold him harmless for enjoying his love of the same at a certain time in one particular spot, it would amerce him in heavy penalties were he to venture on the practice some two miles distant. Thus, for instance, in Belgium, whilst shooting legally commenced in the province of Brabant, Eastern and Western Flanders, Limbourg, Namur, and its provinces on August 31, the law strictly forbids the same sport in the provinces of Anvers, Liege, the provinces on the left bank of the Meuse, and Luxembourg until the 8th instant. In the province of Hainault, and some others, the sportsman must remain quiescent until the powers that be in those parts give him leave to shoulder his gun.

The wife of General Avezzana, the distinguished Italian patriot, lately met with a shocking accident, in New York, from the effects of which she will not recover. While attempting to shut an open window-blind, at her residence in Broadway, she was precipitated into the street upon the pavement. The window, which extended to the floor, was in the second storey, about 12 feet from the ground. Madame Avezzana fell upon the side of her head, and was taken up senseless.

RAILWAY EXCURSIONS.

ONE of the most prominent social characteristics of the present time is the growth and progress of pleasure-travelling among the people. It is not so very long ago, that to make the "grand tour" of Europe was a thing to boast of, even among the rich. Since the peace of Waterloo, the rich have not contented themselves with the grand tour of their ancestors, but, having exhausted Europe, have spread themselves over every part of the civilised, and even of the uncivilised, world. From Lapland to the Cape—from New Orleans to Canton—wherever there were sights to be seen, the English travelling class, in possession of the means of locomotion, turned their idle or their adventurous steps, in search of health, of novelty, or of excitement. The introduction of the railway system, and its extension over Europe, increased the facilities of travelling, and rich foreigners began to imitate the example of the rich English, and to visit us as we had visited them. The middle classes were next seized with the love of locomotion, and, not content with visiting the watering-places, the mountains, the lakes, and the coasts of their native land, thought themselves in arrear with the world's knowledge, and with the world's pleasures, if they had not seen the gay life and beautiful thoroughfares of Paris, the glorious scenery of the Rhine and Switzerland, and made acquaintance with the architectural splendours of Rome and Naples, of Florence and Milan, and even with the remoter and less-known attractions of Berlin and Vienna. Within the last two or three years, the "people," popularly so called, have been enabled—thanks to the railways, and to the organisation of cheap pleasure-trips—to indulge in that love of novelty of scene and circumstance, which is so natural to the human mind, and to travel to distances which their forefathers had neither time nor money to undertake. The working classes of thirty, or even fifteen years ago, did not know their own country. Very few travelled for pleasure beyond a small circle around the places which they inhabited. The longest trip of the London mechanic or small tradesman was to Hampton Court on the one side, and to Gravesend on the other; and if he could occasionally indulge himself and family with either, he had acquitted himself to the utmost possible extent of a pleasurable duty. It was not for him to indulge in romantic and Utopian dreams of visits to such remote districts as the sea-shore or the Highlands. The chances and changes of life and business might possibly, at some time or other in his career, compel the working-man to change his residence, and send the inhabitant of a village or a small town to a larger town, or to the capital; but beyond these comparatively narrow limits money and time forbade him to stay. He could not afford to see the world, and he therefore remained ignorant of it. The case at present is, happily, very different, and travelling bids fair to become, not only the necessity of the rich, but the luxury of the poor. The great lines of railway in England, by granting facilities for "monster" or excursion trains at cheap rates, have conferred a boon upon the public, and have increased, let us hope, the dividends of their shareholders. The circle of men's vision has become extended. The villager can take a trip to London without making an enormous sacrifice; and the Londoner can see the villages, and inhale the fresh air of the fields without trenching too severely upon his scanty resources. The industrious men of the Midland Counties, whose forefathers never saw the sea that encircles these islands, are now enabled to gain physical as well as mental enjoyment by a view of its mighty waters. The dweller in the flat fens of Lincolnshire can, at small expense, be transported to the mountains of Wales, of Westmoreland, or of Scotland; and the man of the mountains may refresh his eyes with the luxuriant vegetation and rich woods of the lower landscapes, hitherto unfamiliar to him. By this new agency Ireland has been opened up to the middle classes of England; and it may be said that the happy thought of periodical excursion trains to Dublin, Cork, and Killarney, has done more to remove difficulties in the future government of Ireland than any other circumstance of our age. The English and the Irish for the first time begin to know each other, and the mutual knowledge cannot fail in due season to bring forth satisfactory results. To the traveller of small means, no place within the limits of the three kingdoms may be considered as really inaccessible. Once a year, if not oftener, he may make his choice of a place to visit; he may bathe in the sea, or climb the mountain-top, or wander amid scenes that are celebrated in history. In whatever direction his taste may lie, cheap and ready means of transit are at his command. Among the excursions of the present season there have been many from all parts of the country to London inwards, and from London outwards to places quite as numerous. Holiday folk have started to Birmingham, to Liverpool, to Manchester, to Wales, to Windermere and the mountains, to Carlisle and the Border Land, and to Edinburgh, Glasgow, and the Highlands. There have been excursions to our fine old cathedral towns, to enable the people to behold the wonders of the past. There have also been excursions to Stonehenge, to enable the working-man to inspect that rude and gigantic monument of his British ancestors. Trips of pleasure-seekers and health-seekers have been arranged to the hives of our actual industry, where working-men have beheld in full operation the mechanical marvels of the present day. Mountain and stream and lake—ruins of palace and abbey—moorland and manufactory—all have been visited during the present year by swarms of small traders and working-men, with their families; and the money but too commonly expended in former years in drinking and smoking, and perhaps in debasing and enervating amusements, has been applied to healthful recreation, and the gathering of the knowledge that usually results from travel. Should these excursions continue as popular as they are at present—and there is every reason to believe that they will become still more so—an effect upon the national manners and character must be produced which cannot be other than beneficial. The travelled working-classes of 1860 will rank as much higher in the scale of intelligence over the untravelled workmen of 1820, as those of 1820 ranked over their progenitors of a century or two earlier.

It has become a slang phrase of disparagement to talk of literature or any thing else "for the million;" but travelling for the million, however disparaged, must be productive of good. Though rival sects may impede the education of our young children, our young men and women will educate themselves, by acquiring a knowledge of their own country; and cheap and good literature will further aid the work which travelling has begun. Petty local jealousies, if not annihilated, will be reduced to a *minimum*; and the health and morals, as well as the knowledge, of the great bulk of the people, will be improved. Already the working classes in Manchester, Liverpool, Sheffield, Birmingham, the Potteries, and the great iron districts between Glasgow and Airdrie, as well as other places, have commenced laying by their weekly

DONCASTER RACES.—THE DEAD-HEAT FOR THE ST. LEGER STAKES, BETWEEN "VOLTIGEUR" AND "RUSSBOROUGH."—"BOLINGBROKE" THIRD. —(SEE NEXT PAGE.)

pence to form a fund for visiting the metropolis during the great Exhibition of 1851; and it is not the least gratifying of the many pleasant associations connected with that event, that it has been the means of eliciting such a praiseworthy organization among the working classes. Were it not for cheap excursion trains, this great source of amusement and instruction would have been unattainable by hard-working poverty, and the Exhibition would have lost one of its greatest attractions. The next step will be to enable the "million" to visit the Continent; and, in the course of a few years, we do not doubt that working men will think it as necessary to see Paris, the Rhine, and Switzerland, as they now do to visit the formerly inaccessible beauties of their own country, or of the sea that surrounds it.

Nationally and internationally, these trips are of social and political significance. The respectful salute paid, a few days ago, by a party of French excursionists to the Duke of Wellington, was an admirable commentary upon their benefits. Had these Frenchmen never seen England—had they never strayed out of the atmosphere of Paris—or had they never conversed with countrymen of their own who had made an English trip before them, it is likely that the name of Wellington would have excited their contemptuous sneers, or their more violent hatred. But their hearts, as well as their eyes, were opened. They had learned in a short visit to respect the country so long considered the natural foe of their own; and, in respecting the country, they respected the venerable captain who had made himself an immortal name by leading its armies to victory. There was a time, before railways were opened, when a Frenchman would have thought it a matter of conscience and duty to hate England and Englishmen, and of all Englishmen the Duke of Wellington most—but *nous avons changé tout cela*. The excursion trains have changed it, and feels more correctly. Such visits and such incidents are the great peacemakers. These, and submarine telegraphs, will make future Waterloos impossible.

THE "DEAD HEAT" FOR THE DONCASTER ST. LEGER.

THE race for the St. Leger of 1850 has been attended by one of those rare and exciting incidents denominated "dead heats!" Voltigeur, the winner of the Derby, and whose triumph upon the great northern course was looked forward to as a "dead certainty," and upon whom 6 to 4 was freely offered against the whole of the field, was run to a level nose by Russborough, an Irish horse, hitherto unknown to fame. The St. Leger is always an exciting race. Although by no means so heavy a betting event as the Derby, it possesses many features of peculiar interest for the connoisseur of the turf. It is not the same hap-hazard affair as the great three year-old scramble over the Epsom Downs; the horses engaged have, for the most part, had sundry opportunities of developing their qualifications, and have been so tried one with the other, that, to the judge of horseflesh, it is a mere matter of arithmetical calculation to "measure the length" of the respective nags, and, as a consequence, to pick out the winner. And very successful these sagacious gentlemen have proved themselves for three successive years (to say nothing of many former occasions), although this year the judge's fist of a "dead heat" for a brief time held the case in suspense, and pulling a Pelion on an Ossa of excitement, gave us two St. Legers instead of one. The effect upon the immense crowd of spectators, to use a good set phrase, "may be imagined better than described." Immense, we say,—for such a crowd was never seen on Doncaster Race-course as on the present occasion—thanks to the cheap trains, which poured in their thousands all parts. During the final struggle the whole compact mass heaved and swayed, one might almost say boiled over, with agitation; and the huge and confused roar of many lusty voices of "Voltigeur wins!"—"Russborough wins!"—"Vo! vo!"—"Russ!" "Vo! vo!"—"Hurra!" can be compared only to——we are at a loss to say what, so must leave the appropriate figure of speech to the ingenuity of the reader. Well, at length—for it does seem a long time while all this is going on, although only comprising a few seconds—the horses pass the chair. It is all over, one way or the other; but whether you win £10,000 or lose £9000 there, is still a slight question about, for it was "a very near thing." A very near thing indeed, for up goes the telegraph to announce nothing at all—in other words, a "dead heat." The agony of five months' conflict between hope and fear is not yet over. Like the man who has had his leg clumsily amputated, we have to undergo another operation. To the backers of the winner a dead heat is perplexing in the extreme. As the affair stands until the deciding heat is run off, he sees himself placed, like *Desdemona*, between "a divided duty:" and, should the owners not run it off, but agree to divide the stakes (such, however they never do on a great event like this), he would have a very complicated account to settle. For instance, in this case, having laid, we will suppose, £1000 even against Voltigeur and £500 to £250 against Russborough, he would have to receive £1000 on the former and pay £1000 on the latter, and,

COUNTRY NEWS.

CANTERBURY DIOCESAN ASSOCIATION.—THE EDUCATION QUESTION.

On Tuesday afternoon the annual meeting of this association was held at the Sevenoaks; his Grace the Archbishop of Canterbury in the chair. His Grace was supported by the Marquis of Camden, Lord Homesdale, Lord Sidney, the Earl of Romney, the Rev. Sir C. Farnaby, Sir B. Bridges, Sir Edward Deering, the Hon. and Rev. F. Noel, Mr. Deedes, M.P., Mr. W. Marsh, M.P., Archdeacon Harrison, the Rev. F. V. Lockwood, and other clergymen.

The report stated that the society had abandoned the training schools of Canterbury, but it had made grants for the support of pupils in the Training Institution of St. Mark's, Battersea, Whitelands, and Westminster, and that application had be received to learn the management of schools at the Maidstone and Canterbury model schools. In the financial department, £904 had been voted during the year for the erection of schools and the support of pupils in training. There were applications for grants to the amount of £845, and there was still a sum of £800 due for unpaid grants. The income of the association for the year had amounted to £1394 15s. 11d., and the expenditure had fallen short of that amount by £734 17s., which sum remained as a balance in the hands of the society.

On the motion of Mr. Bell, seconded by the Marquis of Camden, the report was agreed to; and after the appointment of officers for the ensuing year, the following resolution was carried unanimously

That this meeting has learned with satisfaction the arrangement which has been made by the board for the inspection by clergymen of the diocese, under the immediate authority of the archbishop, of such schools as may be desirous of such inspection

The Archbishop said he could not avoid thinking that this arrangement was a very wise one. It might be interesting to the meeting to know that the Battersea School at Battersea was likely to be given up for want of subscriptions. It was a school from which some of the best masters had gone forth, and one to which those interested in the education question looked as a very important feature in the system. It was intended to unite, if possible, that school with the school at Westminster. The schools at Westminster were essentially different from that at Battersea and St. Mark's, as they were intended to receive pupils not only for three or six months, and not to give a complete system of education, and therefore they were of less importance. The Battersea schools had been provided for the special purpose of providing efficient masters for the manufacturing districts; and Lord Lonsdale had been in a great degree provided for, and for some time past there had been more masters to send out than occupation could be found for. This fact would, at all events, be gratifying, as no such difficulty need be found in obtaining property trained masters as had been heretofore experienced. He hoped that the system lately commenced would, under the blessing of Providence, prove the means of materially altering the condition and habits of the younger classes of the country, and of the class of masters who emanated by the knowledge that the poor could only be reached at a very early age as they were so early called out to the active duties of life. Thus this obstacle, however, could be overcome; and he sincerely trusted that the zealous aid of the association, and of the promoters of education generally, would enable them to give to the children of the poor such complete and efficient instruction as would guide and help them in their after course through life.

A vote of thanks was then given to the Rev. Dr. Griffiths, the officers of the association, and finally to his Grace the chairman, after which the meeting separated.

UNIVERSITY OF CAMBRIDGE ELECTION.—The opposition to Mr. Cowling has assumed a definite shape, and active steps are now taking to secure the return of Mr. Loftus Wigram, Q.C., of Trinity College (9th Wrangler, 1825). It is understood that Mr. Wigram is opposed to allowing any but Christians to legislate for a Christian country, to all schemes which do not regard a man's religion as the most important part of his education, to refusing to members of the Church in Ireland the facilities for availing themselves of educational grants which Dissenters and Romanists enjoy in England, and also to the provisions of Mr. Sidney Wortley Mackie's Bill. He is opposed to the "experimental policy" of free-trade, to the recognised admission to our Universities of students who could not be required to join in the common worship, or submit to the religious teaching of the University, and in general to any course of policy not "animated by Christian principles." Mr. Wigram's supporters represent further, that they are led to bring him forward by a sense of duty "rendering it imperative upon them to do what they can for securing to the University a representative of sound and earnest for great principles, and of an ability and position to make him their efficient advocate in the House of Commons;" and also because, "with every respect for Mr. Cowling, and for the high place which (as a sound lawyer) he holds (by no means as an efficient advocate) he holds in his own profession, they are unable to be satisfied that he has not, on the present occasion, altogether mistaken the effectual discharge of which his undoubted talents and high legal qualifications fit him." Continuous committee meetings are being held on both sides, and it is likely the contest will be a spirited one.

POOLE ELECTION.—On Tuesday evening, Mr. Gordon met an immense body of electors and other inhabitants of the borough in the Town hall, and, having stated his views as a decided convert to the principles of Free Trade, the result of his observation and experience as an extensive landowner in England and Ireland, a conviction that Free Trade would not injuriously prove disadvantageous either to the land-owner, land-occupier, or merchant, declared that he would not endanger the success of the Free Trade candidate by going into a contest, but was an opponent of offering himself when there could be no such result. His address was very well received; and, three cheers having been given for the cause of Free Trade, the assembly dispersed, evidently pleased that no further opposition would be offered by any one professing the same principles as those avowed by Mr. Seymour to his election.

WESTMINSTER FREEHOLD LAND SOCIETY.—On Monday, the members of this society took possession of their newly-acquired estate at Kent Town, East Moulsey, in the western division of the county of Surrey. A train had been conveyed the members to the Hampton-court station of the South-Western Railway, whence they walked in procession to Kent Town, about a mile distant, preceded by a band. The estate consists of 30 acres, which is to be laid out in 230 allotments, each of which, it is expected, will realise between £2 and £3 per annum in the shape of ground rent. Each allotment will cost the purchaser between £35 and £40. [illegible] the members sat down to dinner in a marquée; Mr. G. Thompson, M.P. presiding. The chairman, after disposing of the loyal toast, said he was anxious to propose the health of Mr. James Taylor, the founder of freehold land societies, and in doing so took occasion to enter somewhat at length into the merits of the scheme. Mr. Taylor, in acknowledging the compliment, dwelt upon the social benefits of freehold land societies, and of their great national importance. Mr. Horton, Miss Chief Justice Cockburn, Mr. G. Hargood, Mr. Bowyer, and other gentlemen having addressed the meeting, Mr. Thompson and Mr. Taylor proceeded to Uxbridge for the purpose of assisting at the ceremony of taking possession of another estate which the society has recently purchased near that town. The remainder of the company returned to town by special train.

THE ONE THOUSAND MILES MATCH.—Searles, of Leeds, still continues his walking match of one thousand miles in the same number of hours, at Tranmere. On each mile at the commencement of each hour, he runs; and at present appears as free from fatigue as when he started on Monday fortnight. Owing to difficulty of watching him during the night on the ground now enclosed near the Tranmere Hotel, he walks along the turnpike-road in company of two men, one of whom is engaged to watch his progress, and see that each mile is performed. He lives well, is in robust health, and sleeps well, especially in the night, when not engaged in walking. He performs each mile in nearly the same space of time, generally twelve minutes, though some have been accomplished in ten minutes. The odds are, however, against him, by two and three to one, and several wagers have been, at two to one, taken by himself within the last few days.

HUNTING PROSPECTS IN SOMERSETSHIRE.—Mr. Theobald and the gentlemen of Bath, it would appear, have completed their arrangements for staghunting in the neighbourhood of that ancient city, and after having undertaken to contribute £750 towards the expenses of Mr. Theobald's establishment during the hunting season. We congratulate the inhabitants of Bath, as they could not possibly have obtained a better man than Mr. Theobald, whose absence from Cheltenham during the ensuing winter will be sincerely regretted by many of our sporting characters.—*Cheltenham Looker-on.*

THE HOP-GROWERS OF KENT.—On Saturday last, a very numerous and influential meeting of the hop planters of Kent and Sussex was held at the Railway Hotel, Staplehurst, for the purpose of adopting measures to obtain a further abatement of the remaining moiety of the 1848 hop duty, payable on the 1st of October next. Among the company present we observed Sir E. Filmer, Bart., M.P.; T. L. Hodges, Esq., M.P.; A. E. Fuller, Esq., M.P. for East Sussex; Rev. W. H. Smith Marriott; W. P. Croughton, Esq.; Captain Patterson, Messrs. Punnett, F. B. Elvy, Parton, Elphick, Farley, Osborne, Sheppy, Snepp, Piper, Hilder, Neve (Benenden), Board (Boughton), Willis (Cranbrook), T. White (Maidstone), Bensted, &c. The principal resolution was expressive of the ruinous consequences that would ensue if the collection of the remaining half of the duty due upon the crop of 1848 were enforced at the present time; and requested the members of House of Commons connected with the hop-growing districts to seek an interview with the Chancellor of the Exchequer, and impress upon him the necessity of a further postponement.

EXTRAORDINARY GAME AT SKITTLES.—Mr. Ireland, a tradesman of Southampton, played skittles for twelve hours incessantly on Thursday week, at Mr. Woolferston's brewery, in St. Mary's-street there. The conditions were that the play was to commence at ten in the morning and last ten at night, during which time, as fast as the pins could be set up, Mr. Ireland was to throw at them till he got them down; for every time he knocked them down at twice he was to receive sixpence from Mr. Woolferston, and if he exceeded the twice he was to pay sixpence. Five minutes only was allowed for refreshment. The pins were set up by two men in a twinkling of time, and for twelve mortal hours Mr. Ireland kept up his play, throwing a ball above ten pounds weight accurately during the time, generally getting the pins down in what, in the language of the "alley," is termed "a twicer." At the close of the play Mr. Ireland was a winner of £14 and upwards.

REVIVAL OF STAGE-COACHES.—Two stage-coaches have been started to run daily between Cambridge and London.

The Liverpool Town Council have claimed £2100 from the parish as magistrates' clerks' fees, and threatened "to take steps for the recovery of the amount." This demand has caused some commotion. It has accrued by granting summonses for rates and passes for paupers

ACCIDENT ON THE EASTERN COUNTIES RAILWAY.—NINE LIVES LOST.

A very melancholy occurrence took place on Thursday morning, about half-a-mile eastward of the Brentwood station, on the Colchester line, by which nine plate-layers, servants of the company, lost their lives.

It appears that these men, with about forty of their fellow workmen, had just unloaded a train of ballast-trucks, which was on the down line, and, to allow the engine and empty trucks to move on, stepped aside, some of them between the metals of the up line, probably not apprehending that any train of importance was at that moment due. This train arrived quite punctual to its time. The moment the engine-driver perceived the men on the line, he whistled loudly, and the guard of the foremost train of their approach. But it was too late; a violently became paralysed, and before the train could be stopped nine unfortunate creatures were run over and killed on the spot.

The shock of the ballast-train was blowing off its steam, which may, perhaps, have prevented the men from hearing the approach of the passenger-train. A fog prevailed at the time.

The spot on which the occurrence took place was a curve between cowbridges about 460 yards asunder.

The names of the sufferers are:—James Fisher, James Wardel, William Butler, John Shippey, William Harrell, William Burrell, B. Hales, William Ward, and James Brown.

A NEW PORT FOR FOREIGN CATTLE.—LOWESTOFT.—The terminus of the Eastern Counties Railway, on the Suffolk coast, was on Monday the scene of extraordinary rejoicing, in consequence of the arrival of the *Queen* steamer with 164 head of cattle, in excellent condition, from the mouth of the Weser, being the first cargo of the kind that ever entered Lowestoft. The *Queen* made the voyage from the German to the English port within thirty hours, but the distance might be easily be performed in considerably less than half the number of hours. The passage was made in consequence of the prohibition against landing cattle from foreign boats, which are likely, it is said, to be speedily put upon the station for the experiment of Monday is conclusive of the expediency of making Lowestoft available for the traffic from many of the continental ports. The cattle recently became paralysed, and before the train could be stopped nine unfortunate creatures were run over and killed on the spot.

The spot on which the ballast-train was blowing off its steam, which may, perhaps, have prevented the men from hearing the approach of the passenger-train. A fog prevailed at the time.

The spot on which the occurrence took place was a curve between cowbridges about 460 yards asunder.

A NEW PORT FOR FOREIGN CATTLE.—LOWESTOFT.—The terminus of the Eastern Counties Railway, on the Suffolk coast, was on Monday the scene of extraordinary rejoicing, in consequence of the arrival of the *Queen* steamer with 164 head of cattle, in excellent condition, from the mouth of the Weser, being the first cargo of the kind that ever entered Lowestoft. The *Queen* made the voyage from the German to the English port within thirty hours, but the distance might be easily be performed in considerably less than half the number of hours. The passage was made in consequence of the prohibition against landing cattle from foreign boats, which are likely, it is said, to be speedily put upon the station for the experiment of Monday is conclusive of the expediency of making Lowestoft available for the traffic from many of the continental ports. The cattle recently from the Texel, for instance, being only 90 miles. Captain Andrews, the harbour-master, ran out in the *Lowestoft* steamer, and brought in the *Queen* himself, amid the acclamations of the towns-people and visitors who thronged the beach and piers. The cattle, instead of being immediately sent on by rail to Smithfield, were turned out to grass for a day or two, by direction of the foreign feeder (Mr. Lubken) who accompanied them, and who congratulated himself on having the voyage round the coast and up the Thames, by which the beasts would have been materially damaged, and probably several have died, as is usually the case with such cargoes imported from the Continent direct to London. The *Queen* is already on her way back to Bremen for another cargo, which will be landed at Lowestoft; after which, her owner (Mr. Kappin) who came over with her, directs that she is to proceed to Hyeting, on the coast of Jutland, for a third cargo. The friends of the cause are sanguine that it will speedily establish itself greatly pleased, exclusive of the important consideration that the cattle may be landed almost directly into the railway terminus out of the steamer, and put down close by the very spot where they are to be sold in London.

The Westminster Freehold Land Society held a public meeting at the Rochester Theatre last Tuesday evening; S. Steele, Esq., in the chair. Mr. James Taylor, the founder of freehold land societies, in a speech of an hour and a half's duration, excited great enthusiasm amongst the audience, and a resolution was unanimously carried approving of the objects of the society, and before the meeting separated a great number of shares were taken.

PEEL MONUMENT AT MONTROSE.—On Monday, a public meeting was held in the Guildhall, Montrose, Provost Mackie in the chair, for the purpose of raising a public subscription for erecting a monument in Montrose as a tribute of respect to the memory of Sir Robert Peel. The meeting was addressed by the Chairman, Provost Jamieson, Mr. C. H. Smith, Mr. Allan Barnes, Mr. Hampton, and Mr. Arbuthnott. Resolutions were unanimously adopted expressive of the opinion of the meeting of the great loss the country had sustained by the death of Sir Robert Peel, and their admiration of his splendid talents and patriotic conduct as a public man; and that to perpetuate his memory a suitable memorial should be erected in Montrose, for which a public subscription should be made by the inhabitants

POOLE SAVINGS' BANKS.—The accounts of this bank have during the last fortnight been under the investigation of Mr. W. H. Grey, of No. 48, Lincoln's-inn-fields, the accountant recommended by Mr. Tidd Pratt, the barrister. It is evident that the defalcation of the late cashier, J. B. Bloomfield, who was appointed to the office in 1831, commenced in 1835, and has, consequently, been continued during the long period of 15 years. The system purchased by the trustees appears to have been to appropriate certain sums to his own use, paying the interest regularly out of the funds of the bank, and keeping a private check-book of the sums thus appropriated, which book has been placed in the hands of the officials, and have thus always accounted for the profits on which the deficiency has been created. Had there been a proper inspection of the books at any period, the dishonesty must have been discovered before the death of the defaulter. The deficiency is about £36,000, and the sureties and the depositors will each receive a dividend of about 16s. 9d. in the pound, including interest. Since the exposé the bank has closed, and it is said that at present there is no intention entertained of opening the same again. It is hoped that property to the amount of about £2000 may be recovered from Bloomfield's estate, in which case the dividend would be increased.

SPORTING AT ENVILLE.—The Earl of Stamford had a shooting party on his estate in Staffordshire, on Saturday, the 7th inst. The result of the day's sport being as follows:—Earl of Stamford killed 146 partridges, 10 hares, and 6 rabbits; E. L. Gutacre, Esq., 146 partridges, and 1 rabbit; the Hon. S. Lyttleton and H. W. Foley, Esq. (who formed a second party), 157 partridges, 19 hares, and 5 rabbits; making a total of 449 partridges, 29 hares, and 12 rabbits. The shooting did not commence till eleven o'clock

HAY-MAKING AND THE HARVEST.—The fine weather of the past week enabled the agriculturists to get forward the whole of the grain in England; and the greater portion of the fields in Scotland have been cleared under very favourable circumstance.

STRATFORD MONUMENT.—The gentlemen who have originated the subscription for the purpose of erecting a monument to the memory of the late Mr. Edward Baines, of Leeds, have received from the Earl of Carlisle, Lord Brougham, and other noblemen and gentlemen of the country, letters expressing their desire to join the inhabitants of Leeds in accomplishing that object.

MALICIOUS BURNING OF AGRICULTURAL PRODUCE IN CAMBRIDGESHIRE. A serious fire occurred on Sunday last at Comberton, in Cambridge-hir on the premises of Mr. Bonnett, one of the most extensive farmers in the district. The flames were first discovered in a pea stack, and, notwithstanding the speedy arrival of the Cambridge engines, the greater portion of the homestead was destroyed. An immense quantity of wheat, beans, barley, clover, &c., the produce of more than 150 acres, together with several carts and farming implements, was entirely consumed. Some of the out-offices were burned, but Mr. Bonnett's house and barn containing nearly £1000 worth of wool were saved. There appeared to be no doubt that the fire was the act of an incendiary. When all danger of a spread of the conflagration had subsided, a strict investigation of the circumstances attending it was entered into before the Earl of Hardwicke, but without any definite result.—On the night of Sunday some more stacks were fired in the same village, but the damage was but slight, plenty of assistance being procured at that time. Hayes of Barrington ought to be hanged, and the Rev. Thomas Breteton, at Steeple Morden, was fired, and all destroyed, except the newly erected brick house; damage £3000; premises and crops insured.—On Monday night Mr. Bonnett, one of the most extensive farmers in the district, had his barns, containing nearly £1000 worth of wool, burned down; damage £3000.

FATAL CATASTROPHE.—A fearful accident occurred on last Saturday morning at the convict establishment at Portland. A large number of convicts had been for some time past engaged in the construction of a pier for supplying material for the construction of the breakwater at Portland Roads. A powerful crane of a peculiar construction is employed at the works; the machinery of this crane was not properly attended to, and the whole framework of this ponderous machine fell, by which three of the convicts were killed on the spot, and fourteen others seriously wounded; of the latter, three or four are not expected to live.

DRAWING LIGHTNING FROM THE CLOUDS.—Some Belgian *savants* were engaged on Monday in making meteorological observations on the heights of Belleville (Paris). Having raised to a certain height some kites furnished with pointed needles, they drew from the clouds, although the weather was perfectly serene at the time, flashes of electricity similar to those of lightning in a storm. Suddenly one of the gentlemen, says the *Patrie*, was struck by a flash, and thrown to the ground, in a state of insensibility. He had, it appeared from evidence, held in his hand a wire which served as a non-conductor, and a fluid, descending by the cord, struck him. He was soon after restored to animation, but his right arm remained paralysed, and there is a doubt whether he will ever recover the perfect use of it.

REGATTAS took place at Havre on Sunday. They attracted a vast crowd, and the ordinary pleasure and an extra express train took down vast numbers of persons from Paris.

By an act of the late session (13 and 14 Vic., cap. 105), facilities are given for the union of liberties with the counties in which they are situate. It seems that there are various liberties having separate commissions of the peace, and justices may in general or quarter sessions petition for a release from such jurisdiction, and be united to the counties. There are twelve sections in the act respecting the trial of prisoners, and the procedure to be observed after the union is effected.

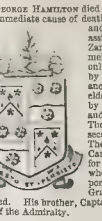
For the two weeks ending the 11th instant, there have been imported into Liverpool from America, France, and other parts abroad, the following quantities of food:—160,232 bushels wheat, 19,698 barrels flour, 8674 bags ditto, 24,896 bushels oats, 21,320 ditto beans, 2184 ditto peas, 12,206 ditto barley, 4500 ditto Indian corn.

Letters have been received from some of the pauper girls sent out to Australia from Kilkenny Workhouse in December last, stating that they had arrived safe, and experienced every care and attention on the passage, and were in the prospect of immediate employment as farm servants at from £10 to £15 a year. The passage was made in the remarkably short time of three months, the ship having arrived on the 31st of March.

The Duke de Nemours, the Prince de Joinville, and the Duke d'Aumale have addressed a collective letter to General Changarnier, testifying in their names, as well as in those of the Queen and the Princesses, their gratitude for the service which he had rendered to be celebrated in the chapel of the Tuileries for the repose of the soul of the King, their august father.

OBITUARY OF EMINENT PERSONS RECENTLY DECEASED.

SIR GEORGE BAILLIE HAMILTON, K.C.H., BRITISH MINISTER AT FLORENCE.



SIR GEORGE HAMILTON died at the Villa Normanby, Florence, on the 3rd inst. The immediate cause of death was the rupture of a blood-vessel in the chest, and the violence of the attack rendered the prompt assistance of his phy-cian, Dr. Harding, as Professor Zaneth, who was called in, totally unavailing. The melancholy event is deeply deplored at Florence—not only by his immediate relatives and dependants, but by every one who had the pleasure of his acquaintance. Sir George was born 4th October, 1798, the eldest son of the late Rev. Charles Baillie Hamilton, by the Lady Charlotte his wife, daughter of Alexander, ninth Earl of Home. He was grand-nephew of Thomas Hamilton, seventh Earl of Haddington, and second cousin, consequently, of the present Peer. The deceased received his education at Trinity College, Cambridge; and, entering the diplomatic service, was for several years Secretary of Legation at Berlin, whence he was promoted, in 1846, to the more important position of Minister Plenipotentiary to the Grand Duke of Tuscany. Sir George has died unmarried. His brother, Captain A. H. Baillie Hamilton, R.N., is Second Secretary of the Admiralty.

THOMAS THISTLETHWAYTE, ESQ., OF SOUTHWICK PARK, HANTS.

THIS gentleman, one of the chief landed proprietors in Hampshire, and formerly one of the county members, died at his seat, Southwick Park, on the 14th inst, aged 71. The Thistlethwaytes, a family of Saxon origin, was first settled in Yorkshire, but removed thence, in the time of Henry VII., to Winterslow, in Wiltshire, and have since been allied to the most eminent houses in England. The Sunderlands, the Pennefathers, the Pelhams, the Whitheds, the Nortons, the Bathursts, the Shirleys, &c.

Mr. Thistlethwayte, whose death we record, was son and heir of the late Robert Thistlethwayte, Esq., formerly M.P. for Hampshire, nephew of Selena, Countess of Chesterfield, and grand-nephew of Francis Thistlethwayte, Esq., of Norman Court, who received as heir-at-law after his uncle, Mr. Norton's decease the Castonville estate, which his wife bequeathed, in an extraordinary will, to Government. This Francis Thistlethwayte, the intimate friend of Horace Walpole, was to have been raised to the Peerage as Lord Castonvon, but died previously to the time of his intended elevation.

Mr. Thomas Thistlethwayte married, first, in 1803, Miss Guitton, by whom he leaves one son and several daughters, and, secondly, in 1827, Tryphena, daughter of Dr. Bathurst, Bishop of Norwich, by whom he had two sons and a daughter. He was a Magistrate and Deputy-Lieutenant for Hampshire, and served as High Sheriff in 1805.

EXPLOSION IN THE CITY, AND GREAT DESTRUCTION OF PROPERTY.

A frightful explosion of fireworks occurred in the metropolis, on Monday, at noon, which speedily laid in ruins a vast amount of property, besides seriously injuring the proprietor of the manufactory where it happened and one of his men; independent of which, a great many other persons, some of them many hundred yards from the immediate scene of the catastrophe, were badly hurt; and we regret to state that a lad, named Alexander Dupree Denning, who was passing during the progress of the engines to render assistance, was knocked down by one of the ponderous vehicles, the wheels of which passed over his neck and head, and caused his almost instantaneous death.

The scene of this dreadful disaster was Weaver-street, Spitalfields. The premises were in the tenure of Mr. John Clitherow, an artist in fireworks, who carried on an extensive shipping and wholesale business at No. 13 in that street.

The first explosion happened in what is termed the mixing-room, in which time only Mr. Clitherow and one of his men were at work therein. It is supposed that whilst engaged at their dangerous calling some of the rockets must have fallen to the ground, and that the force of the blow caused them to explode, for in an instant a series of explosions followed. Some hundred rockets shot through the roof and ascended many feet above the houstetops; whilst two men, who have since been ascertained to be Mr. Clitherow and one of his workmen, were blown from the building into the open yard. Another explosion then followed, and some scores of fireballs and maroons discharged their contents in every direction. Houses nearly a quarter of a mile distant suffered severely, whilst the buildings nearer were partially rent, the furniture destroyed, and the occupants thrown into an indescribable state of alarm

The noise occasioned by the second explosion had scarcely subsided, when the contents of the large workshops in the centre of the factory took fire in a line with the back fronts of the houses in Weaver-street, whilst Buxton-street bounded it on the other side. New Church-court, and another alley termed Harvey's-buildings. Where the third explosion took place has not been ascertained, although those buildings so closely surrounded the manufactory, they proved of infinite avail in preventing the work of destruction from being carried a further distance. Where the third explosion, which is described to have been the magazine as well as the store, occurred, the houses in Weaver-street, Spicer-street, Buxton-street, and New Church-court, were shaken to their very foundations; window-frames were forced from their bearings, the roofs broken in, and the furniture thrown into terrible disorder or broken into fragments.

Nearly every window in All Saints National School was forced in, and the glass sent flying amongst the children. In the lower school-room there were no fewer than 118 infants in the gallery at the time, and these were forced from their seats, with the exception of a few slight cuts occasioned by the shower of broken glass, they escaped unhurt. Mrs. Campbell, one of the teachers, who was sitting in the lower room, in the school-house at the time, was thrown down, and, the door, which was forced off its hinges, fell upon and injured her shoulder. The church of All Saints had also most of its windows demolished, and heavy pieces of timber were flung upon the roof.

Immediately after the explosions, the fire extended to the remainder of the manufactory. This, at one time, threatened destruction to Mr. Dew's timber-yard and carpenters' workshops, which, fortunately, were divided from the factory by a narrow space. Fortunately, the engine belonging to Messrs. Truman and Hanbury, the brewers, two of the parish, several of the London Brigade and West of England Company quickly attended, and, owing to the exertions of all present, the flames were prevented from extending.

The extent of the mischief done is considerable, and is stated to be as follows:—The premises of Mr. Clitherow, used as the firework factory, blown down, the contents consumed, and private residence very extensively damaged. The roof being displaced, window glass demolished, and furniture much broken. About 90 houses, belonging to Mr. Dew, the builder, in Buxton-street, are very severely damaged. The major portion of the large sheets of plate-glass in the goods depôt of the Eastern Counties Railway, in St. John's-street, a long distance off, is demolished. All Saints National School and the church are seriously injured, especially the former building, as scarcely a window is left entire. Nos. 10, 11, 12, 13, and 14, in Spicer-street, have the windows forced in, the roofs broken, and the furniture of the occupants destroyed. Nos. 12, 14, 15, 16, 17, 18, and 19, in Weaver-street, are similarly damaged, besides seven others which have to be raised to the ground in Clitherow-place. On the other side of the same street, the houses numbered 1, 2, 3, 4, 5, and 6, are extensively shattered and the furniture broken. The Spitalfields' Catholic Schools have also received their share of injury. The silk works of Mr. Jeffrey, in front of the factory, have also sustained great damage, and so has the costly stock in trade. The whole of the windows in Mr. Dew's carpenters' workshops are demolished, and the roof of his painters' shops forced in. Nearly the whole of the houses on the north side of Buxton-street are also more or less injured. In fact, as far as the eye can reach, nothing but broken glass and roofs displaced can be seen.

Scarcely a person who occupied any of the above houses escaped without being thrown down; but, fortunately, with one or two exceptions, they received but trifling injuries. Mr. Clitherow and his workman, John Wheeler, have been removed to the London Hospital, where they remain in a state of great suffering, though progressing favourably. The principal injuries which Mr. Clitherow received were owing to his attempts made to save the life of Wheeler, his workman. He states now that he saw the commencement of the explosion, and could have run out in time to avoid any injury; but, being anxious to save the life of his man, he stopped behind to pull him out, and whilst so doing the fireworks exploded, and both were terribly burned

Some idea of the power of the explosion may be formed, when it is stated that a cart laden with firewood, while proceeding along Church-street, near Bishopsgate, was completely overturned, and the contents scattered over the road. A child named Cornwood, living in Agnes-street, Bethnal-green, was thrown from a near Truman and Hanbury's brewhouse—his arm was broken and his leg terribly cut. A female named Potter, living at No. 14, in Clitherow-place, whilst dressing her children, was thrown backward by the power of the explosion from her chair and driven across her room; but knowing to some extent the dangerous nature of the materials in Mr. Clitherow's factory, she threw one child out of the window and its grandmother, and jumping out with another infant in her arms, her clothing caught a nail in the wall, and during two separate explosions the poor creature was suspended some feet from the ground. Fortunately, neither she nor the child sustained any material injury, but the whole of her furniture was demolished.

NEW POPULATION ACT FOR IRELAND.—There is a separate Act of Parliament for taking the census in Ireland. The census in Great Britain, it will be recollected, is to be taken on the 31st of March, of all persons living in the house on the preceding night; and by the act relating to Ireland (13 and 14 Vict., cap. 44), it is directed that the account shall be taken by the constabulary force as the Lord Lieutenant shall order, with other competent persons, "on the 31st of March, and one or more consecutive days." Some of the causes are similar to the Population Act for England. Parties are liable to penalties for giving false answers or obstructing the officers in obtaining information. In taking the census in Ireland, it is expressly declared that in the instructions to be filled up, no reference shall be made to the religion of any person or persons.

REPOSE IN CAMP.

THE WAR IN SCHLESWIG.—ADVANCE OF THE HOLSTEIN TROOPS.

THE severest engagement that has taken place between the two armies since the battle of Idstedt, occurred on Thursday, the 12th inst., the Schleswig-Holstein troops having made a *reconnaissance* towards Eckernförde and Missunde in strong force, and attacked the bridge across the Schlei at the latter point, but without success. After cannonading the defences of the bridge on the north bank of the Schlei for more than an hour, the artillery was recalled, and the troops supporting it retired along the line of country by which they had advanced during the day, bivouacking to the north of their original positions. After the cannonade ceased, and as the troops sent forward with the batteries were retiring, the Danes issued from the entrenchments with several field-pieces, and for some time considerably annoyed the Holsteners, who were on the *chaussée* to Eckernförde, and immediately south of it; but they were in too great force to be pursued, and as soon as the Danes discovered the strength of the battalions which had not been engaged, they ceased the pursuit and regained their fortified position.

The *Times* Correspondent gives the following interesting sketch of the preparations for the attack:—

"It was known on the evening of the 11th, that a movement somewhat more important than usual was contemplated. A large number of waggons, put in requisition for the baggage, the knapsacks of the infantry, &c., left Rendsburg during the night; the head-quarters of the advanced guard, under Colonel Gerhard and Major Von Stutterheim, were at Holebunge, a little hamlet between the two lakes Wittensee and Bistensee. The waggons that had gone in the night were already packed with the knapsacks of the infantry and chasseurs, which are thus taken on without compelling the men to march under an oppressive weight. Further on, two pontoons were mounted on waggons, with others carrying the materials for bridging over a stream; but they were never used, and this part of the train did nothing but encumber the narrow roads. The first purpose of the movement was to clear all the country north from the head of the Wittensee Lake to Eckernförde, Missunde, and as far west of it towards Schleswig as might be possible, of the Danish troops encamped in the intervening space, but not entrenched. A force quite strong enough to effect it was taken; the whole of the advanced guard of Colonel Gerhard's brigade moved up through Damendorf to Osterbye; the 4th and 12th battalions of infantry formed the right wing of the advanced guard and took a parallel route, but more to the east, upon Kochendorf; a corps of Jagers, still more to the right, advanced on Westerthal and Eckernförde itself. I took the same road as the 4th battalion of infantry to Osterbye, since one route must needs be chosen, and cannot speak of what occurred on the left and centre except from report.

"For some time, our route lay along the shore of the Wittensee, close to the water's edge. It was a lovely morning, cool, with a brilliant sun—one of those days which make the early autumn one of the pleasantest seasons of the year. The lake shone like a sheet of silver, and the wooded banks were reflected clear and sharp in it to every minute detail in its depth. Beyond the village of Great Wittensee we turned off the Eckernförde road to the left, and by various indirect and crooked ways we got on the ground till lately within the Danish lines. It was anticipated that the Danish outposts would be found somewhere about Osterbye, and the calculation proved pretty correct. About half-past twelve o'clock, an irregular fire of small-arms to our right indicated that the Jagers, advancing in that direction on Westerthal, had come upon them, and it was equally as evident that the Danes were retiring; the same process was going on on the left, and we had nothing to do but speculate. We had got beyond Osterbye, and were approaching Kochendorf before anything was visible; but there we saw the last of a Danish company being driven from a wood to the right of the latter village. The Danes retired so readily, and were dislodged from point to point with so little difficulty, that they plainly acted on orders to fall back if attacked in any force, without exposing themselves to loss, and retire within the fortified position behind them, thus the advance was little more than a march. By three o'clock the whole staff were in Kochendorf, and the extensive camp constructed by the Danes to the north of the village abandoned. But the country between Kochendorf and Missunde was not quite cleared of them; a few flankers were still keeping up a fire on them as the 2nd and 4th battalions of the Holsteiners were coming up from the rear and forming a little in advance of the village itself.

"It was four o'clock before the force intended for the attack on the bridge at Missunde was sent forward, accompanied by the above-named battalions.

* * * * * * *

"A cannonade in front indicated that the attack on the bridge had begun. The 2nd and 4th battalions were stationed to the south of the Eckernförde *chaussée*; the artillery was on the rising ground overlooking the Schlei, beyond Cissel, supported by a body of Jagers and infantry and cavalry.

The following details are from the Correspondent's subsequent letter:—

"The bridge was defended from both pounts at once; though the *tête du pont* being behind some higher ground could not be seen from our post to the west, and nearly parallel with the line of Count von Holstein and the Danish batteries were, indeed, firing across the water, but the bridge was not withdrawn, and the Danish guns on the *tête du pont* were fully engaged. The bridge itself is so completely covered by works, which must be constructed with great skill, that from no point the Holsteners reached could they fire with any effect on the bridge itself, or it must have been shot to pieces; only some guns far to our left were brought to bear on a portion of it, but did no damage. I was with a group of spectators on the high-road to Eckernförde, just at its junction with the country road to Kochendorf, when the Danes opened a smart fire on the 4th battalion, through which we had just come, and they had to bear the brunt of the onset, which luckily did not last long. The peasants with the waggons and wounded put their horses to the top of their speed down the sandy road; and for a quarter of an hour there was a curious race worthy of any ancient arena. I made my legs compasses over as pretty a piece of ground as I ever measured in the same space of time, and was by no means sorry when the whistle of the heavier balls became a little less sharp and distinct, though I knew that half of them were from our own guns, and that the other half were flying among my friends of the morning march. It was the only time they were under fire during the day. Some of the shots went right through the column, and, I understand, caused some loss and a momentary confusion; but the mass stood firm, and, as before described, the Danes did not pursue in the face of the superior force. They soon drew back again to their *tete du pont*.

"Thus was the close of the encacement. The Holsteiners, as they retired, set fire to the Danish camp at Kochendorf; and several Danes who could not get away soon enough in the morning, and had hidden themselves in nooks and corners under the straw, were turned out of their hiding-places by the flames, to the no small amusement of the Holsteiners, who did not suspect the place had any living tenants at least human ones. In two hours the camp was entirely destroyed. Other encampments at other points were given to the flames in the same manner, and our route southward was illuminated by several conflagrations on the hills behind us. The moon set calm and silvery, exactly opposite to the scene of destruction. The narrow roads were choked up by the waggons conveying the wounded and baggage and the artillery, but, as we were not pressed on, no casualties occurred.

HOLSTEIN CHASSEURS AND NIGHT FIRE.—SIGNAL-POST.

"The heavy firing at Eckernförde, to the east, continued after nightfal, it is said it was only intended to check the advance of the Holstein infantry on the town while the Danish troops were embarked in their ships and boats and taken across the bay, but I cannot answer positively for what I did not see. A mill behind the town was set on fire, and burnt for many hours. It is reported this morning that Eckernförde is in possession of the Holsteiners, but it is a question if they can hold it, as they are always open to an attact from the water.

"The artillery was brought back to Damendorf, and the infantry to other points south of it, but still in advance of their former position. The men bivouacked by their watch-fires, and appeared in nowise discouraged by the result of the day's proceedings, for they were singing and cheering merrily, as the waggons, laden with their wounded comrades, crawled along the road by the side of their posts towards Rendsburg.

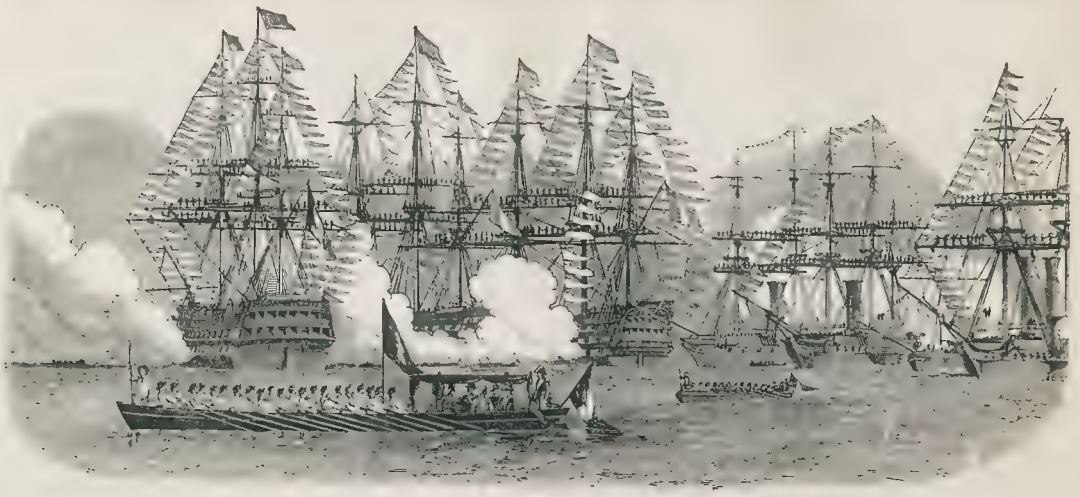
"The result of the affair may be briefly stated. If the object was to force the bridge at Missunde, it was decidedly defeated, as no impression was made on the works, and the Danes were able at the close of the day to become the assailants; if it was a mere *reconnaissance*, it only proved that the Danes are very strongly intrenched, which was pretty well known before. On the other hand, the Danes appear to have declined defending Eckernförde at all on the land side, and, assuming report to be correct, it is in the hands of the Holsteiners. Their loss is described by their own semi-official authority to be 120 killed and wounded; among the latter are five officers; an officer and 50 men of the Jagers were also taken prisoners, having been cut off from the main body by the sally of the Danes from the *tête du pont* at Missunde, when the Holstein batteries were recalled. Their total loss, therefore, is little less than 200 men.

"The opinion already expressed, that the Holsteiners could not long hold Eckernförde, proved correct, for the corps that advanced on it at mid-day of the 12th was withdrawn late in the evening. The firing from the Danish steamers in the bay during the afternoon and up to seven o'clock was heavy, though not rapid; the guns were evidently of large calibre, and their report can be easily distinguished from that of field-pieces. It is feared the town is much damaged

"Two English officers of artillery rode with General Willisen's staff throughout the day, and were present at the attack on the bridge. The action lasted from half-past four till nearly six o'clock."

SCHLESWIG-HOLSTEIN CHASSEURS ON THE MARCH

OUTPOST DUTY.—THE VIDETTE.—HOLSTEIN CAVALRY-MAN.



THE FRENCH PRESIDENT QUITTING THE SQUADRON AT CHERBOURG.

THE FRENCH PRESIDENT AT CHERBOURG.

In our Journal of last week we fully described the visit of Louis Napoleon to the French fleet at Cherbourg. We now engrave the scene of his departure.

The following details of the principal vessels at Cherbourg on this occasion are interesting.

The *Friedland*, 120, flag of Admiral Deschenes, is an old but serviceable ship; she carries 1184 men, and stows all her provisions, water, &c., with ease; roomy between decks, but rather too little space between each gun. The Admiral is a mild, gentlemanly man, a kind good officer, who has seen service against Nelson in the old war. The armament consists of long and heavy French 30-lb. (equal to English 34-lb.) guns, with some 68's on the main deck. The *Valmy*, 120 (flag of Admiral Dubourdieu), is an immense vessel. Reckoning all her flats, she has no less than six decks (including the orlop and a lower orlop deck. She was originally pierced for 140 guns, but would not "stand up" at all when launched, so that they were obliged to double her, which gives her a swelling outline to the water line. She has a handsome round stern, with splendid galleries (the *Friedland* has a stern of the old cut), carries 1160 men, and has no less than eighteen 84-lb guns on her main deck. From her great height out of the water, she would give her opponent a great deal of trouble, not to speak of her other sources of annoyance. The cabins are nicely fitted up. The *Henri IV.*—an ominous name among all those Republican sisters has never yet been to sea, but is a very fine-looking three-decker of 100 guns, with 1021 men. Indeed, there is not one of them (the *Jena*, 92, 967 men, the *Jemappes*, 100, 1000 men, the *Jupiter*, 92, 980 men, *Hercule*, 100, 995 men, *Minerve*, 60, 600 men, for gunnery practice) which would not be able to take her own part in sailing or fighting. The *Inflexible*, 100, is the crack ship of the fleet, and is equal to our smartest vessels in most manœuvres in harbour. There is a great deal of brass-work about the ships, and a good deal of our old polishing system is still maintained. Admiral Dubourdieu, a stern, grim, silent old officer, who lost an arm at Navarino, when in command of a small frigate, is said to have a weakness in favour of rubbing up cannon-balls and nailheads. Certainly, his ship is as bright as a new pin.

The steamers are by no means handsome, but they are better—they are good. The use of long pivot guns on the upper deck is entirely discarded, if, indeed, it was ever adopted: instead, they have very heavy batteries at the bow and stern on the main-deck, so as to be very useful in sailing to or from an enemy in a direct line. The *Descartes*, the largest steamer they have except the *Mogador*, is of 540-horse power, can work up to 600; her engines, made in Holland, weigh 702 tons; consumption of coals, 60 tons *per diem*, steam for 10 days; has carried 2000 troops, it is said, and can go 10 knots an hour. Her ports are nearly six feet out of water with all stores on board. She has eight guns on deck; on upper-deck six 8-inch shell guns and two 22-pounders, on main-deck has the same armament; was pierced for 38 guns, but only carries 16; her scantling is 18½ inches (that of the *Terrible* is 2 feet). With the exception of the *Terrible*, *Sidon*, and *Retribution*, we have no such steamers in our service. The following are some *data* for comparison:—The *Retribution*, just commissioned at Portsmouth, carries on the upper-deck one 68 (solid) pound gun, nine 68 (hollow) pound guns; on main-deck, twelve 32-pound; scantling, 1 foot 8 inches; engine, 400-horse (can work to 1200-horse power). The *Mogadan* (engines by Cané, of Paris) is less than the *Descartes*, having been built for packet service, but has been found very serviceable. The other vessels call for no particular remark.

AERIAL NAVIGATION.

M. Petin, an ingenious Frenchman, has just invented what is termed a "System of Aërial Navigation," by which he hopes to attain the long-desired power of rendering the balloon subservient to our will. As yet, we have but the instrument; it is necessary to know how to make use of it, to subdue it, to direct it in fact, else we shall continue to have nothing but a toy upon our hands. This, then, is the problem to solve which many illustrious dreamers have dedicated their studious hours, without having as yet obtained the results for which they labour.

We gather from an interesting paper in our Parisian contemporary, *L'Illustration* (whence the accompanying Engraving has been copied), that "to attain this end courage alone is not sufficient; M. Petin must inspire confidence, enforce conviction, make himself understood, in fact; and in this," adds the writer, "we must do him the justice to say that he has perfectly succeeded. No one among those who have been to hear him at the Palais National doubted as long as he spoke; so logical was all that he said, so strict were his deductions, so much had the wings the appearance of propelling his machine *par passe* with his demonstration, that if, at the termination of his lecture, he had thought proper to state that the Palais National was an immense aërial machine, which had been sailing in the clouds during the whole sitting, none would have been surprised, and none would have appeared afraid! Let us endeavour, then, following M. Petin, to give to those of our readers who have not heard him an idea of the principle of his invention, at the same time that we place before them the gigantic apparatus."

Up to the present time, those who have sought to direct balloons in the air have not properly investigated natural laws: this appears paradoxical, and yet nothing is more true. Let us explain. Some have studied the mechanism of the wings of a bird, and have sought to apply it to the balloon; others have looked for their model in the depths of the ocean, and with them the solution of the problem has been in the construction of an immense aërial fish: but no one, to our knowledge, has sanctioned the causes of the movement of the bird in the air or of the fish in the water; no one has recognised, or, at least, set out with this principle, that bodies, animate or inanimate, never move but by the combination of the action of the heavy body with the resistance of the surrounding medium. Such is the law which has served M. Petin for his starting-point. But in order that there may be motion, intelligence must direct the actions of the heavy body.

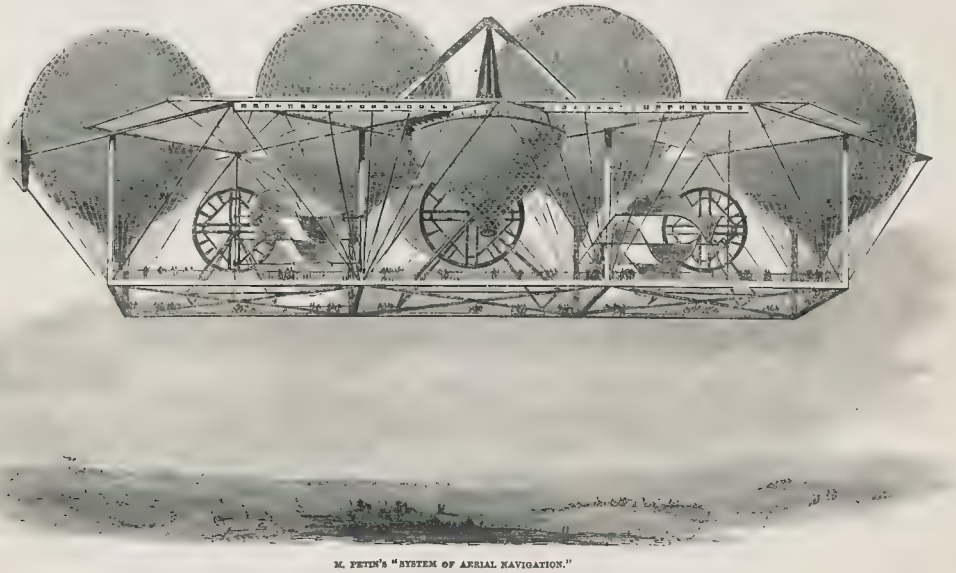
For locomotion, then, we require a lever and a fulcrum. Let us see how these are obtained in aërial navigation. There are in physics two simple machines the lever and the inclined plane: the lever, by means of a fulcrum conveniently placed, transmits to one extremity force which is exerted upon the other; the inclined plane also transmits force, but diminishes it. Behold, then, in three words, the whole system of M. Petin the lever, the fulcrum, and the inclined plane. The fulcrum is everywhere in nature—it is upon the earth for man and terrestrial animals; it is in the water for fishes; and, finally, it is in the air for birds; and the Creator, in his admirable foresight, has given to each animal the form best adapted to the fulcrum which must aid it in moving: thus, to select our examples from one class of animate beings, a cock, whose foot rests upon the earth, has the toes far apart; with the duck, the toes are united by a membrane which enables it to find a fulcrum in water; and, finally, with the bat, there is a large web, which, when spread out, supports it in the air. For the balloon, it is scarcely necessary to tell our readers that its fulcrum is in the air; and we will explain presently in what manner M. Petin establishes his lever upon this fulcrum, so as to be able to progress in the atmosphere.

Now, what part does the inclined plane perform in nature? We have said that it transmits force; we can conceive it at all inclinations from horizontal to vertical; and, according to inclination, the force which it has to transmit will act with different effect. A river runs upon an inclined plane—it is rapid or slow, according to the inclination of its bed. If we wish to obtain a powerful effect from it, we construct a canal which conveys it to a mill-wheel, and a whole manufactory is set in motion. Thus it is we are to understand that an inclined plane transmits force in lessening it: this same mass of water which would dash in a few seconds from a height of two or three yards, would take a considerable time to reach the same level lower down, if it continued to run upon the plane which formed the bed of the river. Let us suppose a heavy body left to itself upon an inclined plane: in the first second of its fall it would run through a certain space; then the motion would continue increasing; and this rule of nature is defined in mechanics thus:—The spaces passed over are to each other as the square of the periods employed in passing over them. It follows from this, that as long as a body is upon an inclined plane, its motion will increase; and it is only upon a horizontal plane that this motion can of necessity be diminished or stopped.

If our readers have clearly comprehended what we have endeavoured to illustrate—the nature of the lever, the fulcrum, and the inclined plane—they will easily understand what we have yet to say upon the aërial apparatus of M. Petin.

All bodies are heavy: they are only called heavy or light by comparison with a given medium. Thus, cork, which is heavy in relation with air, will fall; but being light in comparison with water, it will rise to the surface. The fulcrum is a force contrary to the actions of the heavy body united in a fixed point upon the lever: hence it follows that the fulcrum of light bodies is superior to the actions of the heavy body, and that for heavy bodies it is inferior.

M. Petin has sought to give to his apparatus the greatest possible power, while diminishing the resistance he has to overcome. This resistance is the surrounding medium the air. He has given himself great power by employing four spherical balloons of immense volume. Now, in the sphere, capacity increases as the cube of the radius, while the surface increases but as the square of the radius. Thus, a balloon which should be three times larger than another, would only present nine times greater surface, whilst it would give a capacity, or an ascensional power, twenty-seven times greater. M. Petin has, always with the view of diminishing resistance, placed his balloons one behind the other; and he has armed the prow of his ship with a conical appendage, that it may cleave the air more easily. His balloons, of which each, says he, should have the diameter of the Corn-Exchange of Paris—say 90 feet—are joined together by an immense framework, 162½ yards long by about 70½ yards broad, upon which the passengers will be placed. In the middle of this vast machine are found four kinds of parachute, two above and two below the middle plane, which act as



M. PETIN'S "SYSTEM OF AERIAL NAVIGATION."

follows: When the machine quits the earth, it is by reason of its lightness compared with the air: its fulcrum is then superior to the action of the heavy body (it is the column of air situated above the balloon). This resistance to ascent at last concentrates itself upon one point—the centre of the lever (the lever is the whole machine); then the parachutes situated below the plane of the apparatus open by reason of the resistance of the air, and the lever is complete—we have the fulcrum, the fixed point round which we must gravitate. If, on the contrary, the machine descends, the upper parachutes open, and our lever is again complete.

It only remains for us to show how M. Petin has realised, in his apparatus, the inclined plane. The vast framework, which holds the four balloons together, is so constructed that one portion, whether before or behind, can be exposed in an instant. Imagine a system of Venetian blinds, if you will, of which the splats are opened and closed by a very simple mechanism. When one portion of the apparatus is thus exposed, the resistance which the air offers to vertical movement is no longer experienced upon it, while upon the unexposed part it still exercises its force undiminished. The equilibrium is thus destroyed, the lever oscillates upon its fulcrum, the machine takes an inclination, and shoots forwards in the direction of the inclined plane; its rapidity of motion is thus increased, and it is enabled to pass through considerable spaces; then, by closing the splats, the lever becomes horizontal, and its motion can be used upon the horizontal plane. This manœuvre, which may be repeated as often as desired, either in front or in the rear, will enable the speed to be accelerated, and allow the machine to be directed towards any given point.

Up to this, we have supposed progression only to have taken place by virtue of the specific gravity of the balloons; but there is another element of which the aëronaut must take account, i. e. the wind, which directs all the wild will balloons launched into the regions of air: there is yet another case, where the machine shall have reached a region where the surrounding medium shall be in perfect equilibrium with the ascensional force of the aërial ship. We must then have recourse to other machines, capable of engendering the tractile force necessary for progression. M. Petin has established for this purpose two horizontal helices, which, being set in motion by the aëronaut, produce a rectilinear progression in the direction of their axis. They can also be employed with the atmospheric resistance of the ascensional force: they then transmit the motion to other tractional helices, which are placed vertically on the anterior and posterior quarter of each side of the machine, they screw into the air, as it were, and assist the act of progression. Our readers will perceive that lateral movements can be obtained from these helices, by stopping that of one side whilst the other continues in motion. Thus, by stopping alternately one or other of the helices, the whole apparatus can be manœuvred like a ship. It is easy to see that the movement of the horizontal helices (the effect of which will be to raise or lower the ship on a vertical line) will allow of progression or elevation in the air without casting out ballast or losing gas (means to be employed only when ascending or descending), without which all extended locomotion would be impossible, on account of the continual loss of power experienced by the machine. The helices, moved either by the hand of man or by a machine (and the dimensions of the apparatus allow of the supposition), would equally bore into an atmospheric current which might oppose its progress, just as a ship would make head against currents at sea.

CALENDAR FOR THE WEEK.

SUNDAY, September 22.—17th Sunday after Trinity.
MONDAY, 23.—Autumn begins.
TUESDAY, 24.—Sun rises 5h. 49m.; sets 5h. 54m.
WEDNESDAY, 25.—Mrs Hemans died, 1835.
THURSDAY, 26. St. Cyprian.
FRIDAY, 27.—Great fire at Constantinople, 1729.
SATURDAY, 28. Sheriffs of London sworn in.

TIMES OF HIGH WATER AT LONDON-BRIDGE,
FOR THE WEEK ENDING SEPTEMBER 28, 1850.

Sunday		Monday		Tuesday		Wednesday		Thursday		Friday		Saturday

TO CORRESPONDENTS.

E Y W J H, Holt: B; NEMO, Leamington—We are not in possession of the information required by your communications
A YOUNG HERALD.—The ducal coronet, or cap of maintenance, from which a crest may issue, does not of necessity denote the descent of the bearer from a noble house. The blazon of the arms sent is perfectly correct
F E, Bow-common.—The late Earl of Radnor died January 27th, 1828, and was succeeded by his eldest son, William Viscount Folkestone
N M.—The Crest of the Myddeltons, of Chirk Castle, county Denbigh, is, "A bloody hand ppr. issuing out of a ducal coronet or"
T J. Wigton—Mr Haydon, the painter, died June 22, 1846. (See memoir and portrait in Number 216 of our Journal.)
A SUBSCRIBER, Dover—The penny postage came into operation on January 10, 1840
ANY OLD WAIF, and ANOTHER.—The Arms of the Cheshunts cut was the Artist's error
YOUNG CARS should consult the images to our volume
WILSON, Rochester, will, perhaps, favour us with a sketch
I S, Dublin, had better write to the journal in error
NEMO, Liverpool—The settlement will be valid, if the person be solvent at the time it is executed
K H should apply to a police magistrate of the district in which he resides
T F P. The School of Hydrotherapy at Malvern is closed. This is all we have space to reply to
MICHT UNDERGO—Hyperion was the son of Cœlus and Terra. He married Thea, by whom he had Sol, Luna, and Aurora. Nemo his name is frequently used to denote the Sun. A stereotype edition is printed from cast plates, not from movable type. The old saying is a case for the "Notes and Queries"
AIR-PUMP.—See the Treatises on PNEUMATICS in the "Cabinet Cyclopædia"
PETELL.—"And Hermes is an immortal man," in Mary Howitt's version over the body of Cebriones, is fine irony, to be increased by the speaker with each repetition of the line
Q, St Leonard's.—See The Printer, in Knight's London, vol. iii. p. 309
X Y Z, Erfurt—Apply to an agent for patents, as Mr Jabez Hare, Arundel-street, Strand.
EXHIBITION OF PERLE FINE.—The two wreaths of the Forth, with portrait of Sir Malcolm, was engraved in our Journal for March 17, 1849
SCHOLASTICUS, Oswaldtwistle.—We do not know anything of the individual or the association
J G.—The first Engraving of Mr. Paxton's design for the Great Exhibition building appeared in our Journal for July 6, 1850. There has since been added to the design, barely midway, a transept, with a semicircular roof, which is the only change in the ground plan, the elevation, and much out the central entrance. We have in preparation some enlarged Views of this stupendous building
G G, Great Milton, is thanked though we could not avail ourselves of his proposition.
H H M—Read Mackay's "Western World." See, also, the Emigration paper in our Journal for July 6, 1850
J B A, Adelaide, is thanked for the Lithograph
QUERIES.—See Mr Goldney Higgins's queries on the "Celtic Druids." The Rev Mr Duke's small volumes, the "Druidical Temples of the County of Wilts" contains considerable information upon Druidism, generally
AN OLD SUBSCRIBER had better send an impression of the coin. We cannot form any idea of the value of the pennies
W C H, Swallow, is thanked; but the subject is not adapted for our Journal
A C, Leamington.—The Sketch and Account of the Baths of Leamington
P E W, Gosport.—Any "Dry Paper" used in every street of London
JOHN HOWARD.—Apply to a respectable solicitor
STUDENT, Hemingford.—The Seal for the Chancellor and Vice-Chancellor of the University of London were made by Mr Eole, 29, Southampton-street, Strand, who designed all the robes belonging to that body, and makes the gowns, including the B.A. hood for 4s. 6d
AB ARMIGER, Liverpool—See "Outlines of Astronomy" (J. W. Parker, West Strand)
L C K had better provide himself with one of the useful. "Charts of Architecture," published by Mr. Bell, Fleet-street
COELEB, Huddersfield, had better read the large work published on Australia
M M, Swansea.—We shall be glad to see your Sketches of the church
O, Isle of Ely. is thanked, but we have not room for the epitaphs
PISCATOR.—See Carpenter's "Angler's Assistant," a practical book
TO THE POPE.—The marriage in question will take place in November, as an excalibur or. *Motto*: Sæt fortuna domus
R K.—It is not allowable to adopt a crest or motto without due heraldic authority In the absence of an hereditary bearing, the Kings of Arms would permit the assumption of a crest, properly differenced, derived from either the male or female ancestor of the mother
AN ORPHAN.—An illegitimate son cannot claim to be next-at-law in right of his mother
STRADIVARIUS.—I. The phrase is correctly printed as you have written it. 2. Mr Hill's name on an escutcheon of pretence, when he is married to an heiress or co-heiress; in other cases he impales them
F. Bolton We can trace no arms to the name in question
RHYS AP LLEWELYN.—A person, having no hereditary right to arms, cannot assume the armorial bearings and crest of his maternal grandfather unless under the sanction of the King of his matrimonial, permitting him to take the name and arms of that gentleman, or by grant from the Heralds' College
MILES.—You are not too old; but your application will require to be well-backed by influent al interest. Apply to Lord Fitzroy Somerset
ALPHA.—1 *Plumb* might be used; but *calamus stilus*, or even *penna*, would be more correct. 2. Maria Theresa Beatrice Gaëtana, Duchess of Gordonne. 3 Frederica Catherina Sophia Prisca, 4 Wurtemberg, left issue a son (Napoleon) and a daughter
G G. Under th. present state of the law, it is not permitted to a woman to marry two brothers
ARA, Sunning. The only means of obtaining a commission in the Army or Navy is by purchase or exchange. In application at the Horse Guards: and no money will enable an applicant to become a lieutenant or captain in the line without having served as Ensign
X Y Z. York—George II silver penny is worth about 3d
SAINT VI George III sovereign, in proof, is worth about 6d
E O W, Sa op James II crown, judging from the wax impression sent, is only worth its intrinsic value
S H S.—The arms of the Earl of Yarborough are, "Quarterly first and fourth grand quarters, quarterly first and fourth as three pelicans arg. valning themselves ppr. for PELHAM second, a lion, third as two demi-bats palewayz in fess, with buckles in chief arg., second and third grand quarters, arg. a chev between three crosses flory sa. for ANDERSON"
C H. ANTIS SPENCER asks, "To arms of the great Irish family of O'Conor, represented by O'Conor Don, &c.—Arg an oak tree vert." O Conor, of Kerry, bore—"Vert, a lion rampant or, crowned of the last." and O Conor, of Connaught, "Vert, a stag passant ppr." The *Crest* of O Conor Don is "An arm embowed, holding a sword arg.; pomelled and hilted gold, entwined with a snake ppr."
A CONSTANT READER.—The only printed lists of Yorkshire genealogies are to be found in the Indexes of the Local Histories. The "Visitations" have never been published
A BELFAST SUBSCRIBER. The Lord-Lieutenant of Ireland is the higher dignitary

G C B.—A knight is not entitled to wear, with the Garter or Collar of his Order, the arms of his wife—only of the lady he an heiress
HARK. The crest required is "an eagle displayed with two heads ppr issuing from a ducal coronet, surmounted by a fiery sword in two snakes"
T J C.—The only sure mode of testing the arms is by reference to the Herald's Office. The fee is small
INQUIRER.—We can find no arms registered to the name of Straun Possibly the spelling is a corruption of Strahan The arms of the latter are "Az a buck passant or"
MELETES.—In the scale of precedence, Knights Bachelor are above Companions of the Bath, and these latter rank higher than Doctors of Divinity, Sergeants-at Law, Queen's Counsel, Admirals or Colonels in the army
F W.—Lord John Russell was born 18th August, 1792
A CONSTANT READER—The arms of Sir A. Buck were, "Ba. a bend erm between two cottises fleury, counterfleury or. *Crest*: Out of a mural crown, a maiden's head erm., purfled or, her hair dishevelled, of the same, and issuant, adorned with a chaplet vert, and garnished with roses ppr." Ramsbph de Mowbines bore "Or a lion rampant guardant arg."
GREENWICH.—We can find no arms on record to the name of "Smithett."
ENTHUSIAST. The inheritance of property has nothing to do with the right to quarterings. If a gentleman has daughters only, all their children will be entitled to quarter their grandfather's arms, even if they do not inherit an acre of landed property
AN OLD SUBSCRIBER.—The arms in the first quarterly are clearly those of De Ros, but we will make a further research, and give our more decided opinion next week

ANTHONY, Burnley—Charles II passed, struck for India, of no value
OXFORD—Such marriage would be valid | G C—No it is not legal
J H.—We have not the pamphlet | MINER—Agreed
D.EDALUS—We have no faith in the matter | G V, Counsel—Declined

The ILLUSTRATED LONDON NEWS for Saturday next, September 28 1850, will contain Engravings of the RHUDDLAN ROYAL EISTEDVODD, and NORTH WALES MUSICAL FESTIVAL.—Also, Views of the GREAT EXPLOSION at SEAFORD CLIFF, on Thursday last.

GREAT EXHIBITION OF THE INDUSTRY OF ALL NATIONS.

SPLENDID PRESENT TO SUBSCRIBERS
TO
THE ILLUSTRATED LONDON NEWS.

IN PREPARATION,
A MAGNIFICENT VIEW OF
THE EXTERIOR OF THE VAST BUILDING
DESIGNED BY MR. PAXTON,
FOR
THE GREAT EXHIBITION IN 1851.

This View will be Engraved in a very superior style, and printed on a large sheet of fine paper: it will be published at the time of the opening of the Great Exhibition. The Print will be given to all Regular Subscribers to the ILLUSTRATED LONDON NEWS.

Also in preparation,
A SPLENDID VIEW
OF THE
INTERIOR OF THE GREAT EXHIBITION BUILDING.

. Further particulars of these Prints, together with other Engravings in preparation connected with the Great Exhibition, will be duly announced.

198, Strand, September, 1850.

THE ILLUSTRATED LONDON NEWS.

LONDON, SATURDAY, SEPTEMBER 21, 1850.

THE complicated affairs of Germany have received a new interest from the events that have just taken place in the electorate of Hesse-Cassel. Although that state is not much larger than Yorkshire, and only contains a population of about 800,000 souls, its situation between the two rival powers of Austria and Prussia, and the greatness of the principle for which its people have been contending, cause the present crisis within its limits to be regarded with much curiosity, if not anxiety. Hesse-Cassel obtained a free constitution after the events of 1830; and for about eighteen years its Sovereign seemed to delight himself to the task of annulling it. He restored, from time to time, to make encroachments upon the most valuable of the popular rights which had been wrested from, rather than conceded by, him; and was more than once placed by his own acts in a state of hostility against the public sentiment as well as against the law. On each occasion he yielded before his position became too perilous, but came out of every successive struggle with a loss of popularity and influence. The great point of dispute was that most essential of all points in any country claiming to be free—the power of the purse, or the right of voting the taxes. The Chambers of the Legislature, which were supported very quietly, but very firmly and generally, by the people, uniformly refused to relax their hold upon this privilege, their only safeguard for good government; and things were on, not comfortably, but without violence, until a new French revolution in 1848 aroused Europe. The Elector of Hesse-Cassel was startled, like all the other potentates of Germany; but finding in his subjects a feeling of determined hostility to the wild schemes of the German Red Republicans, and an intense love of order as the only possible basis of liberty, he took courage. Miscalculating utterly the temper of the Hessians, and supposing that a *régime* of Absolutism had commenced for all Germany, he judged it advisable to take advantage of the state of siege in which nearly all the States of the Germanic Empire were placed, to abrogate once for all the constitution that was still obnoxious to him. Aided by a congenial Minister, Herr Hassenpflug, he has been engaged for some months in a struggle to levy taxes without the consent of the Chambers. The Chambers have constitutionally, but peremptorily, declined compliance, and have been backed by public opinion in every legal act of resistance. Last week the dispute came to a head. The Elector was alarmed at the prolonged and calm opposition of all classes; at the defection of men upon whom he had counted for assistance; and at the wavering of the army. The result was, that he and his Minister fled secretly from the capital in the dead of night, and Hesse was left without a Government. The Elector, first of all, took refuge in Hanover; and the Hessians, without the slightest disturbance of public order, established a Provisional Government.

The King of Hanover declined the request of the Elector to intervene by force of arms for his restoration; and the Elector and Herr Hassenpflug proceeded to Frankfort, to urge a similar request. The King of Prussia is understood to have declared himself against the policy of interference by any party, or by the Confederation. Austria is not likely to interfere in his behalf, after such a declaration by Prussia; so that the ambitious rivalry of the Houses of Hapsburgh and Hohenzollern will possibly have the effect of leaving the Hessians to settle their own business.

The people of England, in whose history a similar struggle stands recorded as having laid the foundations of all the liberties they enjoy, will watch the progress of the Hessian cause with a friendly interest; but, considered with reference to the questions that agitate Germany, the whole of Europe is more or less concerned in the solution of the difficulty by the Hessians alone. Any interference from any quarter could not but embarrass all the Governments of Germany, destroy the present equilibrium, and lead to ulterior consequences from which no State could gain, but by which every State might suffer. Upon these and other grounds, it is to be hoped that the Hessians will be left to themselves. They have hitherto managed their cause with strict legality; and if Austria and Prussia both hold aloof, there can be little doubt that the end will do no discredit to the commencement.

POSTSCRIPT.

HER MAJESTY, &c.
(FROM THE COURT CIRCULAR.)

BALMORAL, Tuesday.—Her Majesty and his Royal Highness Prince Albert returned this afternoon from the Hut on Loch Muick. The Hon. Miss Lennox was in attendance on her Majesty.

The dinner party this evening will include her Royal Highness the Duchess of Kent, his Serene Highness the Prince of Leiningen, Lady Augusta Bruce, Baroness Speth, Lord James Murray, and Sir Edwin Landseer.

OSBORNE, Thursday. Their Royal Highnesses the Princess Helena, the Princess Louisa, and Prince Arthur take their accustomed rides and walks daily, and continue in the enjoyment of perfect health.

GRAND EXPLOSION AT SEAFORD CLIFF.

The blasting a portion of Seaford Cliff—an operation which has for some time past excited much interest and attention in the scientific and engineering world in this neighbourhood—in the presence of an immense concourse of spectators, Seaford, it may be stated, is a small town, or rather village, lying on the coast between Brighton and Hastings, and about three miles to the east of Newhaven. It is one of the Cinque Ports, and in the number of being represented in Parliament by Pitt and Canning. Its population scarcely amounts to 1000.

The extensive operations which have been recently carried on, and were on Thursday completed, at Seaford Head, have been rendered necessary by the changes which the sea is slowly, but perpetually, working in the aspect of the coast, and by the operation of which harbours and estuaries, in some places, are being filled up, and portions of the shore continually swept away in other localities. It is said that in the reign of Charles II. a 64-gun ship could float in the harbour of Rye, where now no vessel above 200 tons can enter.

Hastings, which formerly had a commodious harbour, now has none, and vessels lying off the coast are in hourly danger of being driven on the beach and wrecked. In like manner, Seaford, which, three centuries ago, was possessed of a convenient port, is now separated from the sea by nearly half a mile of low marshy shingle, and the Wash was, some dozen years since, the rise of Newhaven as a port. The coast from Newhaven Head to Seaford Head, a semicircular sweep of about three miles, is, for the greater part of the distance, below high-water mark, and was defended from the sea by the bank of shingle, which is being gradually, by the action of the waves, swept out of the bay; and if this barrier is once carried away, a vast tract of low-lying country will be inundated and rendered useless. It has been ascertained that the tendency of the shingle is to travel, by the action of the tides, from west to east, and the object of the blasting of the cliff on Thursday was to throw down a mass of chalk so as to form a groyne or breakwater, which would prevent the shingle being carried out of the bay. How far this will be to prevent the further encroachments of the sea, and preventing the beach travelling to the eastward, will be attained by the formation of this chalk groyne, remains to be seen; but it is confidently anticipated that the effect will be to preserve the extensive tidal mills erected at the mouth of Newhaven River by Messrs. Catt, and also the forts and martello towers on the coast.

During the whole of the forenoon of Thursday special trains were running from London, Hastings, Brighton, Lewes, and every point within fifty miles of the scene of operations; and the fineness of the day, and the vast scale on which the blasting was to take place, brought together several thousands of spectators.

At three o'clock (the hour appointed for the explosion), the flags were hoisted as a signal of preparation, and every breath was hushed—an unnatural stillness fell upon the vast multitude, broken only by the long heavy roll of the sea, as it swept over the shingle. Five minutes of anxious and almost painful expectation passed, and then the murmur went round that the wires had failed from some defect or breach of continuity, and this surmise became strengthened in the course of the next five minutes. When all were preparing themselves for a disappointment of their high-raised expectations, about twelve minutes after three a low rumbling sound was heard, like the muttering of distant thunder, or the appalling report of an approaching earthquake. Simultaneously with this the earth trembled beneath the feet of those who were nearest the cliff, although fully a quarter of a mile off. The whole face of the cliff moved outward, as if impelled by some invisible agency, the upper part at the same time toppling over. The immense mass fell with a roaring, crashing, deafening sound upon the beach below, crumbling into fragments, and rolling far out into the sea, which it drove before it in a high wave, the shock of which was felt by the boats stationed far out in the offing. From the surface of the mass a thick white cloud of finely pulverised particles flew out before it, like the smoke that follows the discharge of a piece of ordnance, and the whole atmosphere was at the same instant filled with a cloud of white dust, which, mixed with the stench of the gunpowder, almost choked the spectators. The moment the mass of rock reached the beach, a loud and hearty cheer burst from the spectators, which was taken up and repeated along the cliffs. It is impossible to estimate with anything like accuracy the quantity of rock that has been dislodged, but it presents a vast mound at least one hundred feet in height and twice as broad, running out to a point from 300 feet from the cliff. During the afternoon several additional masses were detached from the cliff, but this did not prevent many hundreds of persons climbing to the top of the mound and examining the fissures and extent of the chasm that had been effected, and an inspection of the summit of the cliff, after the explosion had taken place, furnished most satisfactory evidence of the accuracy with which the calculation of the engineering gentlemen who had been employed had been realised. The space defined by the trench had been entirely swept away by the force of the explosion, and deep fissures extend a considerable way back, one of them not many yards from the hut in which the batteries were placed. All the stones were carried over and buried in the sea, and some considerable masses of rock will probably fall in the course of the next few days. The result is highly creditable to the engineering skill of the officers employed upon this service, although it remains yet to be seen whether the action of the waves will not, in the course of a few years carry off the greater portion of the chalk thrown down, unless some additional means are resorted to to protect it from the sea."

CITY BANQUET.—On Thursday, the Lord Mayor and Sheriffs, Messrs. Lawrence and Nicoll, gave a most sumptuous entertainment to the Judges and others at the Sessions House, Old Bailey. Covers were laid for 50. Amongst the distinguished guests we noticed the French Ambassador, the American Minister, Mr. Justice Williams, Mr. Justice Talfourd, Aldermen Sir Jcy. Gibbs, Hooper, Hunter, Moon, Challis, and Finnis; the Common Serjeant, Mr. Commissioner Gurney, Q.C., Sir J. J. Hansler, Mr. Under-Sheriff Millard, Mr. Under-Sheriff Wyse, Colonel Reich, U.S., Mr. Philip, Mr. Rose (of the United States bar), Professor Davies, U.S., Messrs. W. Lawrence, Pawson, J. Lawrence, Alfred Dale, Campbell, H. J. Nicoll, G. Smith, Dr. Davidson (chaplain to Mr. Sheriff Lawrence), the Ordinary, &c.

We regret to announce the death, by fever, of Lord William Clinton, fourth son of the Duke of Newcastle, which melancholy event occurred at Athens on the 3rd inst. Lord William was in his 36th year, and had been for some time an attaché of the British Embassy at Athens.

SUICIDE BY A LOSER ON THE ST. LEGER.—On Thursday morning an eating-house keeper in Charlotte-street, Fitzroy-square, was found drowned in the water-butt. He had lately been in the habit of betting upon races, and had heavily backed the bay that "if Voltigeur won the Leger, he should be a lost man."

ACCIDENTS ON THE RIVER.—On Thursday two fatal accidents took place on the river. The first was that of a boy named John Walker, aged ten years, who was employed on a barge which was moored off the Tunnel Pier, Wapping, and who whilst walking along the side of the vessel fell overboard. An alarm was raised, and every exertion made to save him, but he never rose to the surface of the water, and was consequently drowned. The body has not yet been found. The second accident happened to a man named James Conway, a mariner belonging to a vessel called the *Scarborough*, lying off Hermitage Stairs, near the London Docks. He by some means fell overboard, and before assistance could be obtained was carried away by the tide.

LATEST FOREIGN NEWS.

FRANCE.

Our accounts of yesterday (Friday) from Paris state that the review in honour of the Neapolitan Ambassador is not to take place in a week, but at Versailles. The reason assigned for the alteration is to avoid a Republican manifestation, which would probably occur if this military pageant were to come off on the ground originally intended.

The cholera is revived that a change of ministry may shortly be expected.

At the Permanent Parliamentary Committee questions had been put to Ministers regarding the conduct of the Bonapartist society on the night of Louis Napoleon's return from Clarchemp. The Minister of the Interior explained by saying, that the society in question was not a political one, but was exclusively instituted for charitable purposes. He believed that the acts charged upon some of its members had been considerably exaggerated; but if any had been guilty of the crimes alleged against them, let them be punished according to law, but do not suffer the whole society to be disgraced for the offences of a few.

The *Constitutionnel* says, that the revenue for August exhibits an increase of 4,925,000f. over the same month of 1849, which this journal attributes to the greatly improved state of trade.

PATENT LAW REFORM LEAGUE.—An association is now in course of formation under this title, having for its object the promotion of the amendment of the Patent Laws, which it is needless to remind our readers, as at present administered, are found to operate to the injury of all inventors, and in the most oppressive manner against inventors of small pecuniary means (and they are the majority), principally on account of the great expense attending the obtaining and securing patents for the United Kingdom. The support of several gentlemen of influence is promised; and we trust inventors, whether mechanics or gentlemen, will not be found wanting in the matter, for all are interested—in fact, it is difficult to say who is not interested, either directly or indirectly, in this subject, when it is considered that this is an age of steam-engines, power-looms, electric telegraphs, and that even our social existence is every day improved by some new contrivance or design, tending to our greater comfort or convenience—all produced by the neglected class of inventors. On the eve of the great Exhibition of 1851, which is expressly designed to encourage the national industry, the powers that be cannot surely overlook the claims of inventors, more especially as the Government has so recently admitted their validity.

METROPOLITAN NEWS.

THE GREAT EXHIBITION OF 1851.—A meeting of the managers and directors of the various railways connected with the metropolis was on Tuesday held in the New Palace, Westminster, for the purpose of conferring with the Royal Commissioners on the subject of the facilities to be afforded for the conveyance of the working classes to London during the Great Exhibition of 1851. Colonel Reid, R.E., chairman of the executive committee (who occupied the chair at the meeting), Captain Boxer (of Woolwich), Rebetson, F.R.S., Colonel Lloyd (on a special commission), Mr. Redgrave, A.R.A., and Mr. Dilke were present on the part of the Commissioners. The London and North-western Railway was represented by Captain Huish, the Great Western Railway by Mr. Saunders, the Brighton Railway by Mr. Frederick Slight and, Mr. George Hawkins, the South-western by Mr. Wyndham Harding and Mr. C. Stovin, the Eastern Counties by Mr. G. Richardson. The pressure of business on the Great Northern Railway in consequence, doubtless, of the Doncaster races, prevented the attendance of any representative from that company, and prior engagements alone prevented the attendance of the gentlemen deputed to represent the South-Eastern Company. The meeting lasted a considerable time, and broke up without coming to any final decision. It is understood, however, that the representatives of the different companies expressed themselves desirous of affording every assistance in their power, but declined to arrange any conclusion until they had had an opportunity of further discussing the subject among themselves. A meeting was arranged to take place in the ensuing week, when they expect to be able to communicate their decision to the Commissioners.

THE REGISTRATION.—The barristers appointed to revise the lists of voters in the election of members to Parliament for the cities of London and Westminster, and knights of the shire for the counties of Middlesex, Surrey, &c. hold their courts on the following days:—City of London: on Monday, the 16th inst., the list of parishes were taken alphabetically: East Surrey: on the 16th inst., at Reigate; the 17th inst., at Croydon; on the 18th inst., at Wandsworth: on the 19th inst., at Kingston; on the 20th inst., at the Horns Tavern, Kennington; on the 23rd inst., at the Vestry-hall, Camberwell: and on the 24th inst., at the Committee-room, Bermondsey. County of Middlesex: the 17th inst., at twelve, noon, at Brentford; on the 18th inst., at Bedford; on the 19th inst., at the Sussex Hotel, Bouverie-street, Fleet-street, at ten A.M., for the parishes within the city of London; on the 20th inst., at ten A.M., at the Vice-Chancellor's Court, Westminster Hall, for Lincoln's Inn and the parishes and places in the city of Westminster; on the 21st inst., at twelve, at the Belvidere Tavern, Islington; on the 26th inst., at the New Globe Tavern, Mile End-road, at eleven A.M.; on the 27th inst., at twelve, at the Green Man, Bethnal-green; on the 28th inst., at eleven A.M., at the Albion Hall, Saffron-hill, and on the 30th inst., at twelve, at the King's Head, Enfield; on the 1st of October, at the Chandos Arms, Edgware; on the 2nd of October, at Jack Straw's Castle, Hampstead-hill; and on the 3rdtof October, at the White Horse, Uxbridge.

THE RECORDERSHIP OF LONDON.—The Recorder of London and Judges, members of the long robe, for the vacant office of Recorder of the city of London, are in the field. Amongst them are Mr. Montagu Chambers, Q.C., Mr. Gurney, Q.C. (recently appointed City Commissioner), Mr. Serjeant Merewether (City Town Clerk), Mr. Bodkin (of the Old Bailey bar), and Mr. Bullock (the Common Sergeant). The salary hitherto has been £2500 a year, besides fees received by the Recorder for certain City business, independently of the emoluments. The office, which is much sought after from the dignity which it confers on the occupant, is in the gift of the Court of Aldermen, but the Court of Common Council have the power of fixing the salary. The late Recorder had had, in addition to the salary of £2500 a year, an annual present of £500, making the income £3000; and on Tuesday last, a committee of the Common Council, to which the matter had been referred, having reported in favour of continuing the salary at £3000 in full of all fees, emoluments, &c. the recommendation was adopted by the Council, on a division, by a majority of thirty-five to twenty four, the minority being in favour of £2500

THE GREAT CENTRAL GAS CONSUMERS' COMPANY.—On Monday, a large number of the shareholders connected with the above-mentioned company met at their works on Bow-common, for the purpose of inspecting the progress of the same, and reporting proceedings. Mr. Charles Pearson, City Solicitor, "greet, and sundry" also put in an appearance, and the whole party proceeded to view the enormous gasometers, four in number, now being prepared for the supply of the City, and the several subordinate works, after which they re-assembled in the commodious premises attached to the extensive retorting, refining-house, coal-sheds, and other necessary appurtenances. The site is close by the Blackwall (branch) Railway to Bow, from which point it may be seen to advantage. It was stated upon the ground that the whole of the works for supplying the city of London are now laid, and that such supply might be expected in the course of a few days. Both the quantity required and the quality of the gas has been tested, and the result has proved highly satisfactory. The directors and, highly pleased with the statements made by the engineer and his officers, by whom the shareholders were assured that they would receive their supply of gas by the time specified in their contract, viz. the 29th instant.

GREAT CENTRAL GAS CONSUMERS' COMPANY.—INJUNCTION.—An application was, on Thursday made to the Lord Chancellor in order to get an injunction to restrain this company from further continuing their works to the injury of the Chartered Gas Company. The motion was ordered to stand over until Tuesday next, the Great Central Company undertaking in the mean time not to lay their mains in contact with the main or service pipes of the Chartered Company, and not to prosecute any works in such a manner as to interfere with the works of the latter Company.

NATIONAL INSTITUTE OF MEDICINE.—On Wednesday, a meeting of the council of the National Institute of Medicine, Surgery, and Midwifery and other members of the medical profession, was held in their rooms in Hanover-square, Sir Charles Clifford, Esq., the president, in the chair, to transact business. sent to take measures to insure the passing into law the bill introduced into the House of Commons, at the end of the last session, by Mr. Wyld, M.P. "to the incorporation of general practitioners in medicine, surgery, and midwifery." The report of the council exhibited a mass of important documents bearing upon the case of the general practitioners, and the measures which had been adopted by the institute for securing the passing of the bill.

BREAD AND BISCUIT BAKING BY STEAM.—A new process of making and baking bread and biscuits by steam has been recently patented by Messrs. Lee and Robinson, of Wapping. By this process, the flour is placed in a hopper, in its descent through which it comes in contact with carbonated water, which immediately converts it into dough, in which form it issues from a cone below, and is cut off into portions of a given size, when, being received by an attendant boy, it is passed through other machines as it may be required for bread or biscuits, into which form it is almost instantaneously converted. The batch of bread or biscuits is then placed in an oven heated by the same steam machine, by which the whole of the machinery is worked, and within a few minutes (ten or twelve) is ready for table. This application of the powers of steam is most ingenious, and appears likely to effect a complete revolution in the baking trade, as two or three boys will be capable, under one man as an overseer, to conduct the baking operations of a pretty large establishment; while the baneful night-work, of which the journeymen bakers now so much complain, in watching the sponge, and preparing the morning's batch of bread, may be entirely superseded. The whole cost of the machinery for carrying on the process does not exceed £150, and a saving in the cost of bread-making of from 20 to 40 per cent. will be effected by it. Should any parties, desirous of availing themselves of the advantages to be derived from the machine, object to the use of the carbonated water, barm (as at present in use) is equally applicable by the machinery in the process of converting the flour into dough.

THE FOUNDLING HOSPITAL.—We have received contradictory statements from known correspondents on the subject of the musical service. Our musical critic will take an early opportunity of hearing the service, to judge how far the cessation of the engagements of professional lady singers may have really affected the efficiency of the execution.

TESTIMONIAL.—The congregation of Bayswater Episcopal Chapel have just presented to their much respected pastor, the Rev. C. Smalley, M.A., on his cessation from his ministerial duties in that chapel, a very handsome silver centre-piece for the table: around the tripod base are figures, beautifully modelled, of Faith, Hope, and Charity; the stem is a palm-tree, the upper part of which is interspersed with foliage and flowers, surmounted with a richly chased vase (not unlike a Portland vase), filled with elegant wax flowers presented by some young ladies of the congregation. The weight of silver is 140 ounces. The design and finish is highly creditable to the manufacturer, Mr. C. Wilkinson, 232, Oxford-street. The presentation of the testimonial took place on Tuesday evening, at the residence of Mr. Smalley, by the committee.

REMOVAL OF THE OLD TELEGRAPH AND SEMAPHORE AT THE ADMIRALTY.—Instead of communication with the country by electric wires having superseded the old telegraphic system of conveying orders, &c., the building erected on the south-west corner of the Admiralty, together with the modern semaphore (altogether an unsightly object), has not been taken down, and in its place an admiralty flag floats at the top of the establishment. The building at the corner was erected in the year 1794, for setting up the first telegraph used in this country, and communicated with the dockyard at Chatham. It was the old-fashioned one, with six shutters, each divided into three parts. The building was increased in 1796, and extra shutter telegraphs were put up, communicating with Portsmouth and Plymouth. To the latter place, from the difficulty of obtaining proper elevations, and in order to avoid as much as possible the London fogs and thick atmosphere, the line was of necessity taken to a hill near Barnet, thence to St. Albans and Dunstable, and then the stations were worked back from the north to westward. All these, however, have been superseded by the electric wires, and the old telegraphs and semaphores having fallen into desuetude, the officers in charge have been paid off, and the stations and their assistants have been abandoned.

The wife of a coiner, residing near Farringdon-street, this week, poisoned herself by taking cyanide of potassium, the agent used for plating the base coin. Mr. Ross, surgeon, who attended the inquest, stated that so much case had before occurred in England, the only two deaths known to have resulted from cyanide of potassium having occurred in France.

On Tuesday night, a large building upon the premises of Mr. Thacker, cooper, near the Bricklayers' Arms station, was accidentally destroyed by fire.

The following inscription may be seen chalked upon a wall at Bankside, in the neighbourhood of Barclay and Perkins' brewery:—"Near this spot in the arms of the police, and covered with dirt, fell General Haynau, September 4, 1850 "The very stones do prate his whereabout."

A new church is about to be erected in the district of St. Thomas, Lambeth, contiguous to the Roman Catholic Cathedral in St. George's-fields

NATIONAL FREEHOLD LAND SOCIETY.—A public meeting of the supporters of this society took place on Wednesday evening, at the British School-room, Kingsland, and was numerously attended. Samuel Morley, Esq presided, and several resolutions were adopted, to the effect "that the National Freehold Land Society affords to the industrious classes a secure and profitable investment for their savings, and enables them, by their combined and accumulated savings, to work out their own political enfranchisement." Mr. H. Elkington seconded the resolution He stated that the society had bought land in that neighbourhood at £300 an acre, having expended £10,000 in the purchase. The society made the roads, investigated the title as a single title, and then contracted with their solicitor to whom the conveyance of all the allotments for 30s. each to their members. They could not deal thus liberally with the members, but for the funds received from those who paid up at once. Twenty houses might be built on one acre of ground, which cost, including the roads, £360; so that the cost of the land for each house was only £18, while in most other parts of the suburbs it was at least £40. (Hear, hear.) By letting the ground on a chief rent of 4s. or 5s. per each plot—a plan very generally pursued in Manchester, both the owner of the land and the owner of the house obtained votes; and this plan was far preferable to that generally prevailing in the metropolis, of granting 99 years' leases, whereby the property, at the end of all the leases, fell to the capitalist, or ground landlord, every twenty-five years. Nothing could more strongly show the iniquity of our existing legislation than the fact that the immense wedding was completely destroyed, leaving nothing standing but the outer walls, and they were in a very tottering condition. The premises of Messrs. Hayter and Howell, army packers, were also burnt down, and likewise those of Coverdale and Smith, merchants. The front of Messrs. Barber's warehouse was situated in Mark-lane, but the rear was in Seething-lane, the whole intervening area being occupied by them. When the flames were issuing out of the rear, they for a short time caught the front of the two houses on the opposite side of Seething-lane; but, owing to the judicious superintendence of Mr. Braidwood, the fire-hose was directed against the outer walls, which happily prevented their being burnt down, although Nos. 35, 36, 37, and 38 are considerably damaged. The flames took effect on the rear of the Corn Exchange, and quickly spread to the roof, which is destroyed, and several other portions of the interior of the building so much injured as must of necessity for some weeks put a stop to the regular transaction of business. As it was known that at least eighty butts of oil were in one of the cellars, it was feared that they would catch fire, when the damage must have been considerably increased; but this was happily prevented by the falling of the rubbish. The extensive wine-cellars of Messrs. Allnutts and Arbourn escaped without the slightest injury.

An accurate estimate of the loss which will, in the aggregate, be sustained has not yet been made, but it is supposed that it cannot be reckoned at less than £100,000. No personal injury was sustained by any one.

The house where the fire broke out was known by the name of Old Queen Elizabeth's House: it was standing at the time of the Fire of London, and was for some time occupied as the residence of one of the Spanish Ambassadors to this Court.

The following is a list of the damages, taken from Mr. Braidwood's official report

[illegible] Premises burned down

[illegible] Warehouses burned down.

[illegible] Premises burned down

Mr. H. Jones, wine-merchant. Stock in cellar damaged by water, &c. Insured in the Phœnix Fire-office.

The Corn-Exchange. Mark-lane. Roof of the Exchange damaged by fire and heat, and back premises burned down

[illegible] Insurance unknown.

Mr. W. Smith, bristle merchant, &c. Smaller damage. Insured.

Mr. James Coverdale, ditto. Insurance unknown

Mr. A. B. Bleaksley (private). No. 35, Seething-lane [illegible] premises scorched and cracked

[illegible] Premises damaged by fire and water

Mr. J. Stuchbury, tighterman, No. 38, Seething-lane. Premises damaged by fire and water. Insured

The fire was extinguished by firemen who had only a scanty supply of water.

The engines which attended belonged to the London Establishment, with those of the Custom House, parish, and West of England Office

Too much praise cannot be given to Mr. Braidwood, the superintendent, and Mr. Fogo the foreman of the Engines, and Mr. Commerell, of the West of England, and the men under them, for the manner they exerted themselves in getting the fire out speedily.

CORN EXCHANGE, LONDON. Notice is hereby given, the Corn Exchange will be opened for business on Monday next, as the damage done to the premises in Mark-lane not having materially damaged the building. By order of the Committee of Proprietors, THOMAS LEWIS, Secretary.—September 16, 1850.

BIRTHS AND DEATHS.—The deaths registered in the metropolitan districts in the week ending last Saturday were 929; the births in the week were 1409: the former being rather above, and the latter rather below the average. Assuming last year, in which the rate of mortality was excessive from a violent epidemic, the deaths at present do not differ much from the average of the corresponding weeks in previous years. Last week there were 7 fatal cases of small-pox, one of which occurred to a woman who had turned 26 and another to a child under 1 year; 5 of scarlatina 36 of hooping-cough 20; and of croup 7. None of these complaints seem to prevail to an unusual extent a the present time. But typhus numbers 47 persons as its victims, and this disease now claims a slight increase. The registrar of Kenton Old Town observes that it has increased considerably in his district during the last month. The deaths from diarrhœa diminish as is usual in this month, and last week they were 29. There were only 4 deaths from cholera; two of these happened to young persons, and two to men of somewhat advanced life. The following are the cases in detail: In Camden-town, at 7, Hertford place, on the 13th September, the child died, aged 4 years, "English cholera (24 hours), convulsions (4 hours)." Mr. Hoal, the registrar, adds that "the neighbourhood is crowded and dirty, and the stench from butchers' stables in Skinner's-place, close adjoining, is much complained of. Last year a mother and child died of malignant cholera in Hertford-place, Camden-town, which were shocked last year by the appointment of an inspector, are again appearing." In Holloway, at 4, Palmer-mews, on 7th September, a girl aged 11 weeks, "cholera infantum (24 hours), diarrhœa (2 days)." She was was brought up by hand, and fed on rice milk for the last 6 weeks, the mother having gone out as a wet-nurse." In St. Olave's, at 17, Webb-street, on the 12th September, a man, formerly a journeyman shipwright, aged 58 years, died of "cholera diarrhœa (3 days)." "He was of weak health, and had severe rupture." At 8, Newington-causeway, on 7th September, a hat-dyer, aged 58 years, "cholera (29 hours), inflammation of the bowels."

METEOROLOGICAL OBSERVATIONS.—At the Royal Observatory, Greenwich, the mean reading of the barometer was above 30 inches on every day of the week; it was highest on Sunday and Monday; the mean of the week was 30.117 inches. The mean temperature of the week was 55.7°, and less than the average of the same week in seven years by 4.4°. The mean temperature was less than the average during the whole week The wind blew generally from the north-east

DONCASTER RACES.

The "sympathies" of every racing man have of late been so completely enlisted by the "grand demonstration" at Doncaster, that the "past" and the "future" have alike been neglected. The Meeting attracted an immense an very respectable assemblage, and went off with brilliant success.

On Monday, several special and ordinary trains arrived, all of them being more or less overdue. They brought a very large accession of company. The Subscription-room was the rendezvous after dinner, but, although the crowd was great, there was very little disposition to speculate. The business turned chiefly on the Champagne Stakes, for which Storm, the Venus filly, and Hippolyta were severally in force. Mark Tapley and Minimus were in high favour for the Yorkshire Handicap, and Priestess was backed rather freely by a section of Dawson's party; 8 to 1 was offered against any other. Scarce, y anything was done on the St. Leger: but 5 to 4 was laid seven times, fives on the crack, and 8 to 1 taken in hundreds about Beehunter. The Irish horses were not in much favour, and the Marchioness d'Eu's starting was stated to be doubtful. It was subsequently the current of the morning that the stewards were of opinion that Clothworker was not disqualified from starting.

TUESDAY.

The continued fineness of the weather, and a vast influx of visitors from the manufacturing districts, gave an *eclat* to the commencement of the races. The assemblage on the course this afternoon was unusually numerous—a clear proof that the stewards, in strengthening the list with the Great Yorkshire Handicap, exercised a wise discretion. Of late years, the first day has been the least attractive. The Grand Stand was patronised by a large and fashionable company, and the enclosure was densely crowded by men of business from all the sporting districts

The subscription-room was thronged until long after midnight, but the business transacted was of a very limited character, and, with one or two exceptions, with scarcely any effect on the prices of the St. Leger favourites; 2 to 1 was laid once, and 7 to 4 currently, in the early part of the day, on the crack; but at the close 5 to 4 was bold to be put on by the fielders, 6 to 4 was the highest offer. 5 to 1 was laid aget Pitsford, and 9 to 1 aget Beehunter; 12 to 1 offered at Windsheargrat, and 20 to 1 each aget Chatterbox and Russborough. No offers were mentioned

THE FITZWILLIAM HANDICAP STAKES of 5 sovs each.—Sir C. Monck's Vanguard (Flatman), 1. Mr. W. P. Hobson's Gladiole (Osborne), 2

SWEEPSTAKES of 100 sovs each. Sir J. Hawley's Vatican (Templeman), 1. Colonel Anson's Don Jean (F. Butler), 2.

THE CHAMPAGNE STAKES of 50 sovs each.—Sir J Hawley's f. by Bay Middleton out of Venus (J. Marson), 1. Mr Johnson's Confidence (A. Day), 2.

THE SELLING STAKES of 10 sovs each, with 40 added. Mr. Hewlett's Snowdrift (Osborne), 1. Mr. Dawson's Gardenia (Abdale), 2.

THE GREAT YORKSHIRE HANDICAP of 25 sovs each. Mr. Dawson's Mark Tapley (Arnull), 1. Mr Sutton's Harriet (h. Harrison), 2

SWEEPSTAKES of 200 sovs each. Col. Anson's Satar to Sweetmeat walked over.

WEDNESDAY.

The number of railway lines which now communicate with Doncaster, and

DONCASTER RACES.—1850.

DONCASTER RACES.—THE ROAD TO THE COURSE.

the extraordinary inducements offered to all classes in the shape of cheap special trains, have driven nearly all the traffic off the road; hence, instead of having one's rest disturbed this morning by the constant rattle of wheels from daybreak, the town remained in a state of comparative repose until ten o'clock. The monster trains from Sheffield then began to disgorge their thousands. These as the day advanced were followed by others of equal magnitude from Liverpool and the great manufacturing districts in Lancashire and Yorkshire, from Newcastle, Edinburgh, Birmingham, Derby, Worcester, and the metropolis, and up to two o'clock, the hour at which the racing commenced, "the cry was still they come." The influx was continuous and immense, and we venture to say that what Doncaster has lost in the grade of its supporters was on this occasion amply made up in numbers. The streets for two or three hours were almost impassable, particularly in the vicinity of the betting-rooms, to obtain an entrance into which was a task of no ordinary difficulty. There the crowd was quite in keeping with that without, but business was the very opposite of what we have had so often to record on the morning of the St. Leger-day.

It would be in vain to attempt to give an idea of the concourse on the race-ground, we will simply state that it was "prodigious," and that both the stand and enclosure were so densely crowded as to materially interrupt the transaction of business.

The following is a list of the running:—

DONCASTER PLATE (handicap) of 15 sovs each, with 80 added.—Mr. Eddison's Eliza Middleton (W. Sharpe), 1. Sir J. Hawley's Slang (G. Brown), 2.

MUNICIPAL STAKES of 200 sovs each.—Sir J. Hawley's Ban (Flatman), 1. Lord Stanley's Croupier (F. Butler), 2.

ST. LEGER STAKES

of 50 sovs each; the second to receive 300 sovs out of the stakes, and the third 100 sovs; the winner to pay 100 sovs towards expenses, and 25 sovs to the judge.

Lord Zetland's Voltigeur	..	..	..	(J. Marson) 0
Mr. Mangan's Russborough	..	..	..	(Robinson) 0
Mr. W. Edwardson ns Bolingbroke		..	..	(Boyce) 3

One of the most exciting struggles ever witnessed on Doncaster race-course issued in a dead heat between Voltigeur and the Irish horse Russborough. Bolingbroke, whose chance, as well as Italian's, was prejudiced by Russborough running against him, finished a bad third, and Italian fourth.

The details of this exciting scene, with an Illustration, and an Engraving of "The Doncaster Cup," will be found in page 252.

The following also ran:—Captain Archdall's Windischgratz, Lord Enfield's Beehunter, Mr. H. Hill's Pilsford, Mr. Jacques's Mildew, Mr. Meikiam's Italian, Mr. Watts's Chatterbox. Betting: 6 to 4 on Voltigeur, 5 to 2 agst Pilsford, 12 to 1 agst Windischgratz, 12 to 1 agst Beehunter, 20 to 1 each agst Russborough and Chatterbox, 25 to 1 agst Bolingbroke, and 40 to 1 agst Italian. After the horses returned to scale, an examination of Russborough's mouth was ordered by the stewards; he was found to be of the right age.

The next week will be a busy one in the provinces—the fixtures comprehending Richmond (Yorkshire), Uttoxeter, and Basingstoke, on Monday; Sandbach Leintwardine, and Bedford, on Tuesday; Whitby, on Wednesday; Manchester on Thursday; and Cirencester, on Friday. Most of them will last two days.

An All England match at Louth is the only Cricket fixture; and the Aquatic register is "blank."

DONCASTER RACE-COURSE.

FESTIVITIES AT CHIPPENHAM.—THE HIGH-STREET, FROM THE BRIDGE.—ARRIVAL OF MR. NEELD, M.P.

FESTIVITIES AT CHIPPENHAM.

OPENING OF THE CHEESE-MARKET.

The town of Chippenham, the scene of the festivities illustrated in the accompanying Engraving, is situate on the Great Western Railway, ninety-three miles from London, and thirteen from Bath, and forms the junction with the Wilts and Somerset Railway. The name is derived from its market, for which it was long known. It is an important seat for the manufacture of West of England broad cloths; and is fast acquiring celebrity from its great monthly markets for the sale of cheese, corn, cattle, &c., which have been established about sixteen years. For these benefits the town is principally indebted to one of its representatives, Joseph Neeld, Esq., a gentleman well known for his munificent patronage of the arts; and whose seat at Grittleton, Wilts, is enriched with some of the finest works in the kingdom.

Among other boons which Mr. Neeld has conferred on the inhabitants, is the erection of a new town or Market Hall, with the addition of an extensive market yard and sheds for the pitching of cheese, corn, &c. The hall is situated in the High-street, and was built some fifteen years ago by Mr. Neeld, at an expense of about £12,000, and placed by him at the disposal of the town. It has been since extended by the same gentleman three times, at an additional outlay of from £4000 to £5000. The alterations and extensions, the completion of which the demonstrations of this day were intended to celebrate, consist of the erection of an entire new shed of most commodious dimensions, for the cheese market, a very convenient exchange-room, and additional accommodation in the yard. The Cheese-market has a substantial and tasteful freestone frontage to the High-street, surmounted by the old borough arms in carved stone, beneath which are the words "Unity and Loyalty." The hall itself is 90 feet in length by 33 in width, and 19 in height, with spacious auto-rooms. The whole has been designed and executed by Mr. Thomson, of London, the architect of the Polytechnic Institution; and who has also, we are informed, erected several entire villages and churches, with school-houses, for Mr Neeld on his extensive estates.

Chippenham is surrounded by some of the best pasture land in the county, and, with its facilities of railway communication, its market has rapidly grown in importance; and, to meet this increase, Mr. Neeld has provided additional room for the pitching of cheese, so that the whole area now covered in for that purpose contains 15,500 superficial feet. A handsome room, named the "Exchange," has also been added.

The inhabitants of the town, to testify their sense of the important public benefits conferred upon them by Mr. Neeld, took advantage of the opportunity which the re-opening of the market yard afforded, to invite that gentleman to a public banquet on the 12th instant, and the demonstration then made was very striking. The whole of that part of the town through which the procession was expected to pass presented the appearance of rejoicings for some great triumph. Fir trees, planted for the occasion, lined the streets and road; triumphal arches were erected at almost every available point; festoons of evergreens and flowers extended across the streets in thick succession, whilst almost every house was profusely ornamented with laurels, flowers, and mottoes of welcome: it was a universal jubilee. The church bells rang, cannons fired, business was suspended the whole town was an emblazonment of flags and banners; every man and every woman and child waved welcome to Joseph Neeld.

At two o'clock, the Mayor and Corporation assembled at the Market Hall, and thence proceeded with the inhabitants towards Grittleton. An extensive procession was formed along the Grittleton road to the north of the viaduct, where it met Mr. Neeld accompanied by a large body of his tenants, who had met at a luncheon provided for them at Grittleton House. After loud and hearty greeting, the cavalcade turned towards the town, in the following order of procession:—

OPENING OF THE GREAT CHEESE-MARKET, AT CHIPPENHAM, SEPTEMBER 12, 1850.—THE MARKET HALL.

A Marshal on horseback
Twenty Market Porters, with their badges, carrying union jack and banners.
The Clerk of the Market
The Band
The Workmen engaged in the erection and embellishment of the Market, walking five abreast.
Mr. Horton and Mr. Morrell, Mr Brewer and Mr Watts, the Tradesmen by whom the
decorations and erection had been executed.
Mr Thomson, the Architect.
Mr Bullock's Man, carrying large banner
Mr Brotherhood's Man, carrying flags
Mr. Scott, leading about Seventy of Mr. Neeld's Tenantry on horseback, four abreast.
The Beadle Gentry, carrying large Banners
The Inhabitants of Chippenham, walking six abreast.
The Pastors and Deacons attending the Market.
The Clergy
The Members of the Corporation of the Borough.
Six Junior Councillmen Six Senior Councillors. Four Aldermen
The Town Clerk. The Mace Bearer.
The Mayor.
Mr Neeld, in an open carriage drawn by four horses,
Followed by Captain Holdero, M.P., J. Neeld, M.P., J. J. Calley, Hon. S. Methuen, J. G. Mc.., W. Everett, A. Lovell, B. Trelawney, G. L. H. Holdero, Esqs., in a four-in-hand.

LEAVING behind us the various decorations of the Gritliston road, the lofty railway arch at the entrance of the town was gaily festooned with evergreens, and surmounted by the device of a crown in flowers and a large union-jack. The Great Western Hotel was also nearly covered with evergreens and banners.

Passing under the archway, the procession came to the display made by Mr. Brotherhood a square of banners, upwards of forty in number, comprising complete codes of colours, at an elevation of nearly seventy feet. A Royal standard and upwards of a dozen union jacks were also ranged in front of the house, whilst a festoon of evergreens across the road supported a gigantic "N."

In the roadway fronting Chippenham Mill was a beautifully-constructed arch, supporting the word "Welcome"

At the extremity of the bridge, and adjoining the North Wilts Bank, was another triumphal arch, surmounted by flags, and the word "Welcome" in flowers.

An immense Royal standard floated from the top of the Market Hall, from the roof of which to the top of Mr. Baliff's house was also suspended a line of evergreens, supporting over the centre of the street a very large union jack.

At the corner of the High-street, leading to Cook-street, was an arch of evergreens, with festoons, and a banner—"Welcome." Success to the Market;" and next, a festooned arch, with banner—"Truth ever was our rallying star, Humanity our aim," and the letters "J. N." in flowers.

The Wilts and Dorset Bank was very tastefully festooned, and a large standard and union jack floated from the summit.

The Angel Hotel was festooned with laurels; a pyramid of banners floated from the roof, and flags from nearly every window. The doorway was also surmounted by a beautifully-devised device of flowers, in the form of a harp.

Mr. Henry Gale, clerk of the market, had his house decorated very tastefully, and a large device of "Success to the Cheese-Market." The "Five alls" had also an arch of laurels, and was profusely decorated with evergreens.

The Procession passed up the High-street, and round the Market-place, amidst the enthusiastic cheers of the people. On returning to the front of the New Hall, the carriage of Mr. Neeld was drawn up in front of the principal entrance, and the Town Clerk read an Address from the Mayor and Corporation.

The reading of the address was followed by loud applause.

Mr. Neeld, in the course of his reply, said that he trusted that the hall and market-buildings which he had erected, would long remain memorials of his gratitude to the inhabitants of the borough, alike useful and advantageous to them, and to the agriculturists of the surrounding districts. Mr. Neeld then addressing Mr. Goldney, the Chairman of the Market Committee, said, "Mr. Chairman, I place these keys in your hands, as Chairman of the Committee appointed by me for the management of the affairs of the market, and I request the favour of you and of the other members of the committee to make such orders and regulations respecting the same as will best promote the interests and convenience of all persons attending the market." (Loud and long-continued cheering.)

The Hall having thus been formally opened, the parties retired to prepare for dinner.

The dinner took place in one of the new sheds, which was tastefully fitted up for the occasion. It is about 150 feet long by 25 wide, and lighted by a raised roof with fluted glass sides in the centre. On this occasion gas was also introduced. The walls, roof, and the iron pillars by which the roof is supported, were covered with laurel and other evergreens, interspersed with ribbons, flowers, streamers, and mottoes. A table extending the entire length of the building was placed on one side, in the centre of which was the Mayor's chair. From this thirteen tables were arranged transversely, and then, leaving an aisle up the length of the shed, an equal number of tables were placed to match, extending to the opposite side. Behind the Mayor's chair was a banner, with the motto "Unity and Loyalty;" and on the opposite side several banners were arranged, on which were emblazoned "Nomen extendere factis," "Factum vire dignum," "Pro bono Publico," "Good Luck to the Flock and the Fleece," "Good Luck to the Hoof and the Horn," and "Good Luck to the Growers of Corn." There were two bands in attendance. The Chippenham Harmonic Society also contributed to the pleasures of the evening, by the performance of several pieces of vocal music. The place was quite crowded, and we should imagine not less than 500 persons sat down to the dinner, which was provided by Mr. Lawes, of the Angel Hotel.

His Worship the Mayor, R. Little, Esq., presided, supported on his right by the guest of the day, Joseph Neeld, Esq., M.P. Amongst the gentlemen at the upper table, were John Neeld, Esq., M.P.; Captain Boldero, M.P.; Mr. Goddard, M.P.; Mr. Sotheron, M.P.; Hon. S. Methuen; the Rev. C. Law, Rev. L. Philpotts; Rev. — Coates; Rev. R. Mayo; Colonel Estcourt; Colonel Methuen; Captain Rooke, R.N.; Captain Budd, R.N; Mr. Sergeant Merewether; Henry Merewether, Esq., Recorder of Chippenham; G. M. M. Esmeade; J. R. Mogg, Esq.; — Calley, Esq.; — Trelawney, Esq.; — Long, Esq.; &c. Mr. Wilson occupied the seat of Vice.

The cloth having been withdrawn, and the customary loyal and national toasts duly honoured, the Mayor in a most charming manner proposed the health of Mr. Neeld. In the course of his address, he particularised the liberality of Mr. Neeld, in building for the inhabitants of Chippenham, on the ground formerly occupied by a set of dwelling-houses, the handsome building in which that day's meeting had assembled market under it. (Loud cheers.) Then a cheese-shed was also erected by the honourable gentleman, and their business so increased that it was discovered that they ought to have accommodation for as much as 400 tons of cheese in their town. Accordingly, for the first time, a requisition was sent to Mr. Neeld to assist them in their necessity, and the result was the erection of the splendid Market in which they were now assembled. (Cheers.) The chairman added, that since the establishment of the Corn Market [illegible] tons of cheese had been pitched in it (hear, hear), ranging from about 200 tons in 1835, to 1020 tons last year. (Applause.) Calculating the price of cheese at 50s. per cwt., which had been about the average, it gave the large sum of £102,000 as the value of the cheese pitched in their town since the Market was [illegible]. It was calculated that the farmer had gained an increase in the price equal to 74 per cent., by having a Corn Market, or a bonus of £35,000 on the total produce brought to that town. (Applause.) And it was estimated that, in future, they would have, on the average, 1000 tons per annum pitched in the Market, and that, at 74 per cent., would produce £2750.

The toast was drunk with the greatest enthusiasm

Mr. Neeld returned thanks in a speech replete with amiable feeling; and, in referring to what he had accomplished for the town, he said, it was fresh in his mind, and it was, perhaps, in the recollection of many of the present years ago he said he would do all he could to benefit the neighbourhood in which, under Providence, he had fixed his abode. (Hear, hear.) That same Providence had influenced the heart of a kind master to place at his disposal a handsome fortune, free from restrictions as to its use, by which he was enabled to keep his promise to a great extent. (Loud applause.)

Song "The Old English Gentleman"

Mr. Sergeant Merewether proposed the health of "the Members for the Northern Division of the County," whom, together with the honoured guest, he highly eulogised, and referred to with approbation the characteristics of Wiltshire men, in selecting their representatives from gentlemen in their own neighbourhood, whose sympathies and feelings were in consonance with their own. The toast was drunk amidst loud cheering. T. H. S. Sotheron, Esq., M.P., responded, and drew an elaborate picture of the virtues of Mr. Neeld, whom he held up to the admiration of the company as the model of an English gentleman.

A tenant farmer having acknowledged the benefit conferred upon his class, in the neighbourhood of Chippenham, by Mr. Neeld, in the erection of the markets,

The vocalists sang the "Market Chorus."

After a variety of other toasts and been drunk, the dinner party broke up; and a numerous company retired to the large room in the Market Hall, where dancing was kept up till near midnight; thus appropriately concluding the day's festivities.

FATAL ACCIDENT TO LIEUT. GALE, THE AERONAUT.—In our Postscript of last week we noticed this lamentable occurrence. It appears that on Sunday week, Lieut. Gale made an ascent with the Royal Cremorne Balloon, on the back of a pony, from the Hippodrome of Vincennes, at Bordeaux, in the south of France, which he unfortunately terminated in the death of the adventurer. The ascent was a capital one, and the pony was perfectly calm, with his legs hanging and the neck bent. After having been in the air about a quarter of an hour, the aëronaut descended without danger, between Morignac and Cestas. His horse was detached from the car by some peasants, who hastened to his assistance on hearing his cries, and who held the ropes of the balloon; but misunderstanding the instructions given by the aeronaut, let go, and the balloon, having still sufficient gas in it to give an ascensional force, after losing the weight of the horse, rose suddenly, and the anchor, which held by a tree, long loosened by the sudden motion, the shock upset the car, and the balloon proceeded for the distance of nearly two miles. During the night the balloon was found half empty in the town inn of Cestas; and the lifeless body of Mr. Gale was found at some distance amongst the trees, where he had fallen. The unfortunate man has left a [illegible] children.

The inhabitants of Hertford and Hatfield have memorialised the Great Northern Railway Company to construct the railway between those points [illegible] which they already have parliamentary [illegible].

CONFESSION TO ROME.—Intelligence has reached England, that the Rev. Henry W. Wilberforce, Vicar of East Farleigh, and brother of the Bishop of Oxford, was, a few days since, received into the Roman Catholic Church at Brussels

BRITISH AGRICULTURE.

PART V.—GLOUCESTERSHIRE AND WILTSHIRE.

GLOUCESTERSHIRE.

THERE exists a great variety in the climate and soils of Gloucestershire: the temperature of the Cotswolds being occasionally severe, as compared with the mild and rich vales of Gloucester and Berkeley. The Tortworth district in the last-named is an exceedingly favourable locality for studying the effects which certain underlying rocks exercise upon the agricultural economy of a country. It is amongst "the Vale" farms that the celebrated Gloucester cheese is produced. It is, also, in the vale of the Severn, extending from Tewkesbury through Gloucester and Newnham, to the Avon, that the cider manufacture is carried on. The best orchards in this, as in the adjoining counties, are found in those portions of the old red sandstone known as corn stones—so called in consequence of having nodules of argillaceous and magnesian limestones interspersed throughout the red sandstone rock; their united decay giving rise to a rich, impalpable soil, not difficult to work, but, from its finely divided form, apt to "run" or "sett" after rain.

The Forest of Dean and Rowland district is more valuable for its mineral than its agricultural productions, and does not contain any particular feature worthy of notice.

The Cotswolds, so called from the ancient practice of cotting sheep on the Gloucester wolds—a custom followed in this and the adjoining counties centuries ago; for Camden states that cots were long ranges of buildings, three or four stories high, with low ceilings and a slope at one end of each floor, reaching to the next, by which the sheep were enabled to reach the topmost one. The Cotswold is a large sheep, and is the stock from which the improved Oxford is sprung. Folding sheep at night on fallows in preparation for wheat is still followed here. Paring and burning is much practised. A singular practice prevails in the wolds of not ploughing more than four or five inches deep; for, say the farmers, if the surface soil is penetrated by the plough, and an opening made into the subjacent porous rock, the first rain that descends will wash the soil into the rock, together with the richer portions of the manure. We surmise that on such light soils the absence of moisture during seasons of drought is the cause of barrenness, rather than the obstruction of manure from this cause. We would recommend deep ploughing and the growth of clover and sainfoin, breaking the land up at long intervals, as a more profitable practice. The vale of the Isis or Thames is celebrated for its excellent water meadows. In the rich stiff lands of the vale of Severn, beans are grown for the use of the cloth manufacturers. Gloucestershire occupies an area of 790,470 acres.

WILTSHIRE naturally comprises two districts of almost opposite agricultural character, which may be denominated North and South, but which would be more properly be defined as North-West and South-East. The entire county comprises 868,060 acres. North Wiltshire consists principally of enclosed pasture lands, and its dairies are of great excellence, whereas South Wilts has much unenclosed arable and down land, grazed by extensive flocks of Southdowns. In no county has so complete a change taken place in the character of its live stock as in Wiltshire: forty years ago the sheep stock were almost wholly composed of large sheep with long horns, that were not fit for market until they were five years old; these are now almost if not entirely extinct, being replaced by Southdowns; the long-horned cattle have also given place, in a great measure, to the short-horns, and other breeds that come to maturity at an early period.

Few counties present a greater variety of geological features; for, without going out of the county, there may be enumerated the lias, marlstone, inferior oolite, fullers'-earth, great oolite, Bradford clay, forest marble, Stonyfield clay, coinbrach, Oxford clay, calcareous grit, coral rag, Kimmeridge clay, lower greensand, gault, upper greensand, chalk marl, lower and upper chalk.

In South Wiltshire, farms extend from 100 to 2000 acres; the celebrated Salisbury Plains are in this district. The arable soils principally consist of flinty and chalky loams, with occasional chalk marl, greensand, and gault. It is traditionally related that irrigation was practised in the vicinity of Salisbury in the time of the Romans. The combined existence of a dry soil and climate renders this valuable adjunct to the farm of more value in this and the adjoining county of Dorset, than to one placed where the rain-fall is greater or the soil more retentive

NORTH WILTS contains some inferior cold pasture, situate on the Oxford Clay, the widest extent of arable land being found on the stonebrash. There are rich gravelly loams on the alluvial banks of the Avon and Thames. We attribute the mildness of North Wiltshire cheese to the fact of great care being taken in extracting the whole of the whey; the small size also greatly facilitates this operation. The cause of cheese being strong-flavoured generally arises from decomposing caseine, facilitated by the moisture and sugar present in the uncurded whey.

The most prominent points of Gloucester and Wiltshire agriculture being the manufacture of cider and cheese, which will form separate articles, we have necessarily abridged our notice of these two counties.

T. R.

CHEESE-MAKING.

CHEESE and the curdling of milk are mentioned in the book of Job. David was sent by his father, Jesse, to carry ten cheeses to the camp, and to look how his brethren fared. "*Cheese of kine*" formed part of the supplies at David's army at Mahanaim during the rebellion of Absolom. Homer states that cheese formed part of the ample stores found by Ulysses in the cave of the Cyclop Polyphemus. Euripides, Theocritus, and other early poets, mention cheese. Lndolphus says that excellent cheese and butter were made by the ancient Ethiopians; and Strabo states that some of the ancient Britons were so ignorant, that, though they had abundance of milk, they did not understand the art of making cheese. There is no evidence that any of these ancient nations had discovered the use of rennet in making cheese, but they seem merely to have skimmed the milk to sour, and to have formed their cheese from the caseous part of the milk, after expelling the serum or whey. As David, when too young to carry arms, was able to run to the camp with ten cheeses, ten loaves, and an ephah of parched corn, the cheese must have been very small.

As butter is formed from the oily part of milk, cheese is composed of the curd or caseous portion. The perfection of cheese making consists in separating the curd and butter in one mass from the watery sugar: these last ought to be wholly taken out in the whey. In well-made cheese, such as the North Wilts, Cheddar, and some double Gloucester, this is effectually performed, as may be easily tested by toasting; whereas in many Cheshire, and particularly rich American cheeses, the casein and butter are seen to separate on toasting. Age also causes this separation. The strong flavour of Cheshire cheese is attributable to the whey not being so well separated as in the North Wilts, Gloucester, &c. Using too strong rennet, or putting the latter to the milk whilst too hot, produces the same effect

Rennet is the substance with which the cheese-maker "breaks" the milk. It is formed from calves, technically termed "vells;" those obtained from Ireland are preferred. The cause of this is not generally known, and may therefore be here stated The greater part of the calves in Ireland are killed before they are three days old, and the stomachs of these "stink kalves" are said to be much more powerful in breaking the milk than if older. Vells of more mature growth are, however, used

Colouring.—Cheese of a uniform yellow appearance called annatto: the species called roll annatto is the kind that ought to be used; the quantity is regulated by the richness of the milk and the height of the colour desired. If much cream has been taken from the milk, a proportionate additional annatto will be required to obtain the same colour. In Cheshire, one pound of good annatto is deemed sufficient for a ton of cheese; in Gloucester, double the quantity is used. If would be well if the public taste would so far change as to prefer uncoloured cheese, such as the white Cheddar. A piece of annatto of the requisite size is folded in linen, and placed over-night in a half or quarter of a pint of warm water, to dissolve; this infusion is poured into the milk; the linen bag is also dipped in and squeezed until the colouring is discharged.

Gloucester Cheese-making.—The cheese-tub being put in its place in the dairy, the ladder is put across it, and a large thin canvass cloth covers the tub and ladder to catch any of the milk that may run down the pail, and to prevent dirt from falling into the tub. Above this, and upon the ladder, is placed the sieve, through which the milk is strained. If the milk should not be of a temperature of 80 degrees, a portion of it is put into a deep tin, and set by the pump, and placed in a boiler used as a hot-water bath, by which means the whole is warmed to the proper degree. It is of the utmost moment to attend to this; for, if the milk is not warm enough when the rennet is put into it, the cheese will be "tender," and will bulge out in the edge, which spoils its appearance, and a great quantity of sediment of small curd will be found in the whey leads, which is so much curd lost. If, on the other hand, the milk is too warm, it will cause the cheese to "heave" or ferment, which injures both its appearance and quality.

When the milk is sufficiently warm, the colouring and the rennet are put into it. One pound of annatto is considered sufficient for half a ton of cheese

The rennet being added immediately after the annatto is put in, the tub is covered with a woollen cloth for at least an hour.

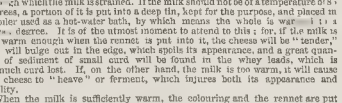

FIG 1

CHESHIRE CURD CUTTER.

When the curds sufficiently firm for breaking, it is gently and slowly cut across at right angles with a three-bladed knife, about fourteen inches long, close to the bottom of the tub, and around the sides of the tub The cuts should be about an inch apart. When it has stood five or ten minutes to allow it to sink a little, and the whey to come out as clear as possible, some of the whey is taken out with a bowl, and the curd is cut a second time very slowly to begin with: if the cutting is done hurriedly, a considerable sediment of very small curd will pass through the sieve, and be found in the whey leads; at the same time, a quantity of butter will escape—thus impoverishing the cheese. As the operation proceeds, the cuttings are made more rapidly and at a less distance; lastly, one hand, with the skimming-dish, keeps the whole in motion, turning up the lumps suspended in the whey, while the other with the knife continues cutting them as small as possible: this continues till no more lumps are brought to the surface, the whole mass being reduced to one degree of fineness. This occupies about a quarter of an hour.

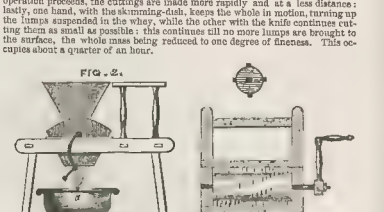

FIG. 2.

FIG. 3

REVOLVING CURD BREAKER.

The curd being allowed to stand a quarter of an hour to settle, and the whey being taken out in a great measure, the dairyman4 folding over a portion of it, and beginning at one corner, cuts the curd into lumps, and lays them on the principal mass, by which means the greater part of the remaining whey exudes between the cut fragments. From time to time the whey is taken from the tub. The curd is now put into vats, and pressed with the hand, the vats being covered with cheese-cloths of fine canvas, and placed in the press for half an hour, when they are taken out and the curd cut into slices and put into a mill fixed on the top of a tub, which tears it into small crumbs as small as vetches. Some scald the curd in this pulverised state, with hot whey; others, with more propriety, at once place it in the vats, pressing it closely with the hand in filling, to squeeze out any remaining whey, the vat being filled and rounded up in the middle so far as the whole can be pressed into the vat: cheese-cloths are spread over, and a little hot water thrown on it, which tends to harden the outside of the cheese, and prevents it from cracking. The curd is now turned out of the vats into the cloths, and the vats are dipped into whey to wash out any crumbs of curd which may cling to them;

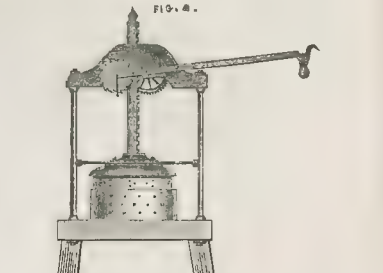

FIG. 4.

IMPROVED LION CHEESE PRESS.

the curd inverted, and, with the cloth around it, is again placed in the vat. The cloths are then folded over and tucked in, and the vats, as they are filled, are put into the press one upon another. The bottoms of the vats are smooth and a little rounded, so as to answer the purpose of cheese-boards, which are only wanted for the uppermost vats, or when the other vats are not quite full. The vats are allowed to remain under the press about two hours, when they are taken out, and dry cloths are applied, which, with double Gloucester cheese, should be repeated some time in the day: in this state they are removed to the salting-press. They are generally salted at the end of twenty-four hours. The salting should not commence till the skin is all closed, for if there is a crack in the skin of the cheese at the time of salting, it will not close afterwards. The salting is performed by rubbing both sides and the edge of the cheese with finely powdered salt; after which they are returned to the vats and put under the press, the newest cheese being placed uppermost, and the oldest uppermost. The salting is repeated three times with the single and four times with the double Gloucester, twenty-four hours elapsing between each salting. After the second salting, the cheeses are returned to the vats without cloths, that the marks of the cloths may be effaced. Double Gloucester remain in the presses five days, and the single four, but in damp weather they should remain longer. The quantity of salt generally used is about three pounds and a half to a cwt. of cheese. When taken from the salting presses, they are put on a shelf in the dairy for a day or two prior to removal to the cheese-room. In the cheese-room they are turned once a day on the floor or on the cheese-rack. In about a month they are ready for cleaning, which is done by scraping both sides and edge, after which it is covered with red paint made of Venetian red and small beer. It is rubbed on with a woollen cloth. They are subsequently turned twice a week, and oftener in damp weather, until fit for market. Other methods of cheese-making will be noticed in their respective counties.

CHIPPENHAM GREAT MONTHLY MARKET.

FRIDAY, SEPT. 13. Many persons anticipated, from the large supply of cheese at the previous market, that the present one would not show so great an increase. These anticipations, however, were not realised; for full 400 tons were brought in to this day's market, and the great bulk sold readily at the following quotations: Brand Cheddar, 42s. to 51s.; prime Cheddar, 50s. to 57s.; ditto, thin, 36s. to 40s.; ditto, loaves, 50s. to 56s. per cwt. The town, as on the preceding day, presented a most animated appearance. The immense quantity of waggons, carts, gigs, &c., which came pouring in, and the throng of business persons traversing the streets which remained gaily decorated, as on the preceding day, with brilliant banners—rendered the scene strikingly beautiful and picturesque.

An admirably executed statue, in marble, of the late Sir Michael O'Loghlin, by Moore, has just been received in Dublin, to be erected in the Solicitors' rooms, in the Four Courts.

The Right Hon. the Lord Mayor of London has accepted an invitation to the banquet of Free and Accepted Masons of Southwold, Lodge Fidelity, No. 813, on Monday next, the 23rd instant, at the Town Hall, Southwold. The Grand Master and other distinguished members of the craft are also invited.

On Saturday was printed a bill, introduced in the House of Commons at the close of the session, of 187 sections, called the Merchant Service Consolidation Bill. It is connected with the Mercantile Marine Act, which was passed last month. The object of printing the bill is that it may be considered before the next session. It is proposed to form a complete registration of all seamen and others employed in the merchant service.

The Rev. Dr. Lingard, rector of Lauriston, has received into the Roman Catholic Church on Wednesday last by the Rev. Mr. Newman, at St. Wilfred's, near Cheadle. The Rectory of Launton is in the gift of the Bishop of London, and is of the value of £618 per annum. Mr. Allies was appointed to the living in 1842

GENERAL HAYNAU AND BARON ROTHSCHILD.—Baron Rothschild has addressed the following letter to the morning papers:—

"SIR,—I have just been made acquainted with the various remarks which have appeared, during my absence from London, in some of the leading newspapers, respecting a letter of introduction which was given by my firm to General Haynau, and I hope you will find room to insert these few lines: not that it is my intention to offer any opinion on the attack on General Haynau, but I think the correction of the case ought to be made known. General Haynau introduced himself with a letter of credit on my firm, and having received some money, requested an introduction to Messrs. Barclay and Co., and a letter (a copy of which I enclose) was given to him

I hope I shall be excused for drawing your attention to this subject so long after it occurred, but a severe domestic affliction and absence from home prevented me from doing so sooner.

I am, sir, your most obedient servant,

New Court, 18th Sept., 1850. LIONEL DE ROTHSCHILD.

[COPY.]

New Court, Sept 3, 1850.

DEAR SIR,—We know the honour to introduce to you the bearer of these lines, Baron Jeremy Baron Haynau, and shall feel particularly obliged by your allowing the Baron and his friends to view your brewery.—We remain, gentlemen your obedient servants.

(For S. M. Rothschild and sons) B. G. HEN.

For Messrs. Barclay, Perkins, and Co., Southwark.

THE THEATRES.

OLYMPIC.

This theatre has been running a race with the Haymarket, and has certainly gained on the first heat, having, without previous underlining, produced on Thursday week the "Giralda" of MM. Adam and Scribe, minus the music of the former, as a drama for the stage. Further, as it would seem, to antagonise the rival establishment, the new farce was advertised for Monday, Mr. Bourcicault's version of the same piece having been announced for production at Mr. Webster's theatre on that evening. We very much doubt the policy of such manifestations: that the system of enacting translations from the French gives rise to this unanimable kind of competition, is one of the strongest arguments against the practice, which, in other respects also, is highly objectionable, particularly as it tends fatally to the discouragement of native talent. Let it be amended altogether.

The drama of "Giralda," divested of its music, depends entirely on plot. *Don Manuel de Galvados* (Mr. Murray) rescues from robbers *Giralda* (Mrs. Stirling), a village maiden about to be married to a miller, *Pegnillo* by name (Mr. Compton). The rescue takes place at night, so that *Manuel's* person is unknown to the bride, who besides, by an arrangement made by him with *Pigullo*, is furtively married to the *Don*. Still maintaining his invisibility, the latter contrives to acquaint *Giralda* that he is her Manuel; and proceeds to invade other parties most amusingly in the intrigue, until, working upon the jealousy of a Princess of Arragon, he is himself enabled to declare his marriage with safety. The piece was very nicely acted throughout, and well put upon the stage—a moonlight scene, by Mr. Shailers, presenting a view of a Spanish city under lunar influence, being especially deserving of praise.

The farce on Monday was entitled "The Oldest Inhabitant." It is a translation, the French "Le Fere Turlurette" being the work adapted. It brings Mr Farren into comparison with M. Bouffé, and is precisely suited to his style, and even to his infirmity, inarticulate delivery being a main feature in the character. The defects of senility, combined with the habit of cunning, were never better portrayed. Mr. Farren, indeed, is entitled to record a triumph on the occasion.

HAYMARKET.

The translation of "Giralda" at this house is, as we have said, effected by M. Bourcicault. The dialogue has more point than that on the rival stage. Miss Kathleen Fitzwilliam is inimitable in the heroine. She sings, too, a song composed by Mr. A. Mellon, entitled "The Heart's Appeal," very charmingly.

NEW STRAND.

Mr. Bolton has again revived Vanbrugh's comedy of "The Relapse." Why thus retread his old ground? He might do something new, if he would secure his hold on the public.

SADLER'S WELLS.

Shakspere's tragedy of "Coriolanus" has been revived at this theatre in the same costly style which marked its production two seasons ago. There has been little alteration in the cast of the principal characters, save that Mr. Waller is invested with the part of *Aufidius* Mr. Phelps seemed to put on energy in the interpretation of the patrician hero, and, on occasions, abandoned himself to the constitutional irascibility of the character with striking effect. But reverence to his mother is the root of *Coriolanus's* greatness, and was the one quality which Mr. Kemble was the proudest to exhibit. His by-play with this object, on meeting *Volumnia*, on his return from the wars, in the second act, was elaborate and admirable. When receiving her rebukes, in the third act, touching his behaviour to the people, the great actor, notwithstanding the passion of the scene, still showed the respectful son; and, indeed, but for the final sentiment, the result both of that situation and the catastrophe of the entire tragedy itself, as foreshadowed in it, would be unaccountable. We would recommend Mr. Phelps to bestow particular attention to this point. The *Volumnia* of Miss Glyn is both artistically conceived and executed. Her attitudes in the last scene are well studied, and full of dignity. The various phrases of her appeal were delivered with pathos and discrimination. The house was well attended.

ADELAIDE GALLERY.

A new exhibition, in the rooms adjoining the Adelaide Gallery, has been opened. It consists of articles of *vertu*, and divers mechanical curiosities, originally belonging to George IV., when Prince of Wales. These were designed for presents to the Emperor of China, and were intended to have been sent out with Lord Macartney. Much money was wasted on these gewgaws. Some of them, however, are of rare excellence; others of remarkable elegance. Among the latter, we may mention an automaton singing-bird in a cage of pure gold, the notes of which are delicious. No nightingale or canary can more sweetly descant. A lady organist, of life-size, also plays the "Blue Bells of Scotland," "Auld Lang Syne," and other airs. A large bronze elephant, swayed by a figure in a splendid car, looks costly; and a gorgeous temple of fountains has an imposing effect. A little jewelled theatre is really beautiful. The cosmoramic views of the private apartments in Windsor Castle cannot fail of being highly interesting to the public; and the rich needle-work tapestry with which the rooms are adorned, has much in it to repay the careful examination of connoisseurs. At present, the exhibition appears to be somewhat crude; but we doubt not, that, when fully arranged for general inspection, it will prove attractive. To the thoughtful, it reads a lesson of Royal vanity, highly instructive.

ENTHUSIASTIC RECEPTION OF JENNY LIND AT NEW YORK.

The enthusiasm of Jenny Lind's reception in America far transcends that of the leave-taking at Liverpool. She arrived in the *Atlantic* steam-ship, on Sunday, the last day, as she is thus described in the *New York Tribune*:—

"On the top of a light deck-house, erected over the forward companion-way, sat the subject of the day's excitement—the veritable Jenny Lind—as fresh and rosy as if she had not been tossed about for ten days on the wide ocean. She was aware of everything she saw, with an apparent unconsciousness of the observation she excited. At her side stood Mr. Jules Benedict, the distinguished composer, and Signor Belletti, the celebrated baritone. They came from the steamer with Mr. Barnum, who had by this time climbed on board, with a choice bouquet carefully stuck in the bosom of his white vest, was taken forward and presented by Captain West. Mr. Barnum then stolen a march on his rivals, having got on board in advance, and presented Miss Lind a bouquet about three times the size of Barnum's.

"The immense crowd was kept away from the immediate neighbourhood of the vessel by the gate across the pier, inside of which about fifty persons had been admitted. Mr. Barnum's carriage, with his pair of beautiful bays, was in readiness at the foot of the gangway. Just inside the gate a number of triumphal arches of evergreens and flowers had been erected. The first arch fronting the water bore the inscription, 'Welcome to Jenny Lind;' after which came another, with the American eagle in the centre, and the words, 'Jenny Lind, welcome to America,' in large letters around the span. The landing-place from the steamer to the gates was overhung with the stars and stripes, with the flags of various other nations tastefully disposed on either side. The beautiful display was got up under the direction of Messrs. Davidson, Stevens and Delmano, *attachés* of Barnum's Museum. A large number of the Muse ' people were on the ground, most of them carrying bouquets. We learned from those who boarded the *Atlantic* that the crowd on shore was most dense and suffocating, and that five or six persons had been pushed into the dock in the struggle, but were rescued without injury. Many had been in waiting on the ground for several hours.

"As soon as Capt. West had conducted Mdlle. Lind to the gangway, the rush commenced. Mdlle. Ahnansen, with Messrs. Benedict and Belletti, followed, and all four took their seats in the carriage, Mr. Barnum mounting to the driver's seat. The crowd inside the gate immediately surrounded the carriage, clinging to the wheels and crowding about the windows, cheering all the while with an enthusiasm we never saw surpassed. The multitude outside began to press against the gates, which were unbolted in all haste to prevent them being forced in. Scarcely had one gate been thrown back, however, before the torrent burst in, with an energy frightful to witness. The other half of the gate instantly gave way, the planks snapping like reeds before the pressure. The fence most rudely forced down upon the floor, and those behind, urged on from without, were piled upon them till a serious loss of life seemed almost inevitable. The spectacle was most alarming; some forty or fifty persons lay crushed by the inexorable weight, crying out their hands and crying for help. In the midst of this tragic affair we could scarcely restrain a laugh at the sight of a man hurriedly squeezed under the mass and hardly able to breathe, holding out his hat at arm's length, and imploringly soliciting to take it and prevent it from being smashed. Finally, some of the police-officers, and some of the gentlemen who happened to be near, succeeded with great difficulty in driving back the crowd and rescuing the sufferers. Many were severely bruised, none came off with bloody noses, and two boys, about twelve years of age, appeared to be seriously injured. Had not the rush been checked in time, many lives would have been lost."

We learn from the *New York Herald* that on Sunday afternoon the population of New York became so excited, that "after church hours we were obliged to issue an extra, which sold immediately." Her arrival at the Battery, Staten Island, where apartments had been prepared for her, is thus chronicled by the *Tribune*:—"Her arrival created nearly as much excitement in the Irving-house as in the streets. There are at present 800 guests in the house, and each several one is anxious to get a glimpse of her. All the passages leading to her apartments were crowded. The great flag of Sweden and Norway was hoisted on the flag-staff of the Irving-house immediately upon her arrival. Throughout the evening crowds continue to collect about the hotel; and so incessant were their calls, that she was obliged to appear twice again at the windows. Finally, being quite exhausted by the excitement of the day, she retired, and her faithful Swedish servants kept watch to prevent disturbance."

A serenade was given to the fair vocalist immediately after midnight by the Musical Fund Society of New York. The musicians performed a number of airs, among which "Hail Columbia" and "Yankee Doodle" were predominant. Jenny requested a repetition of the latter.

On Monday, 800 American ladies paid their respects to the Swedish Nightingale. Mr. Barnum was in attendance to convey her to the principal sights. After all this, we are not surprised to learn that she proposed to spend a few days at Fish-hill, on the Hudson, with G. G. Howland, Esq. The time for commencing her concerts had not been fixed. The tickets are to be sold by auction.

During the voyage, Jenny and Messrs. Benedict and Beletti gave a concert for the benefit of the sailors and firemen, and the receipts are said to have amounted to £64.

MUSIC.

GLOUCESTER MUSICAL FESTIVAL.

Our notice of the meeting was brought down to Thursday morning's performance inclusive in our last publication. At the third and last concert of that evening there were no less than ten encores:—Madame Sontag, in Rode's variations; Madame Castellan, in the "Sonnambula" rondo finale, and in Rossini's romanza, "Ange gentil;" Mr. Parry's harp obbligato; Mr. Lockey, in the "Minstrel Boy," Mendelssohn's "Wedding March;" Miss Lucombe and Miss Dolby, in Scotch ballads; Herr Formes, in Rossini's "Largo," and Morley's madrigal, "My bonny lass," in which the Worcestershire choral singers won deserved glory. By special desire of the stewards, Madame Sontag gave "Home, sweet home," in addition to the music assigned to her in the programme. Phillips's fine singing of Handel's "Revenge! Timotheus cries," must not pass unrecorded.

On Friday morning, the cathedral was filled in every part of the nave and aisles, for Handel's "Messiah." The oratorio was finely executed on the whole, although exception might be taken to the dragging of the time in many choruses. Madame Sontag gave the airs, "Rejoice greatly," and "I know that my Redeemer liveth:" Madame Castellan sang "There were Shepherds," "Come unto Him," and the air, "But thou didst not leave;" Miss M. Williams had the air, "Behold a Virgin;" Miss Dolby that of "He was despised;" Miss Lucombe, "How beautiful are the feet," and "If God be for us;" Mr. Sims Reeves was allotted the whole of the tenor parts; and Messrs. Lawler and Phillips divided the bass parts. The collection amounted to £344 3s. The Festival ended on Friday night with the fancy ball at the Shire Hall, which was prettily decorated for the occasion. There were about 250 present, but there were only two or three fancy costumes, and a few officers in uniform. The band for the two balls was selected from the festival orchestra. Amongst the players were Zerbini, Watson, Bourlay, Smithers T. Harper, jun., Irwin, Healey, Ras, C. Harper, Egerton, and Griffith. On the Friday night, Mr. T. Adams was engaged to play the flageolet.

Our musical readers will have seen that Tallis's name was incorrectly printed in our last week's Number.

The total receipts of the morning collections amounted to £864 6s. 6d., at the last meeting the sum gathered was £686 12s. 11d.; so that the charity has materially benefited. In Hereford, in 1849, it was £835; and in Worcester, in 1848, £959. The pecuniary results, as regards the sale of tickets, are confidently anticipated to secure the patriotic stewards from any loss. In an artistical point of view, the meeting left much to be desired. Admiring the improvement evinced in the selection of an effective band, and the care and attention bestowed on the choral singing, there was yet ample room for amelioration, if such materials had been at the command of an experienced conductor. When the orchestra was solely composed of the London players, as at the evening concerts, the advantages of their discipline and of their knowledge of the Mozart symphony and overtures were strikingly developed. Whenever there was occasion to accompany the voice with tact and delicacy, the total inadequacy of the local organists to accomplish their task was unmistakeable. And it is no imputation on the zeal and general ability of those fairly professional, thus to state the plain truth: it is but a definition of

TEMPORARY BARRACK AT BALLATER FOR THE QUEEN'S GUARD OF HONOUR.

TEMPORARY BARRACK AT BALLATER.

About eight miles distant from her Majesty's Castle of Balmoral is the delightful village of Ballater, where a temporary Barrack has been provided for the accommodation of the guard of honour in attendance upon the Queen, consisting of a detachment of the 93rd or Sutherland Highlanders, which is quartered in the village.

The house and enclosure used as a Barrack is situated in the centre of the village: it forms one of the sides of a spacious grass square, in the middle of which stands the church.

Ballater is most beautifully situated on the left bank of the river Dee, and lies embosomed in the hills; the blue summit of Loch-na-gar closing in the distant view. The appearance of the place, approached from the high-road from Aberdeen, gives one much the idea of a Swiss village. The surrounding neighborhood forms a favourite drive of her Majesty and the Royal children.

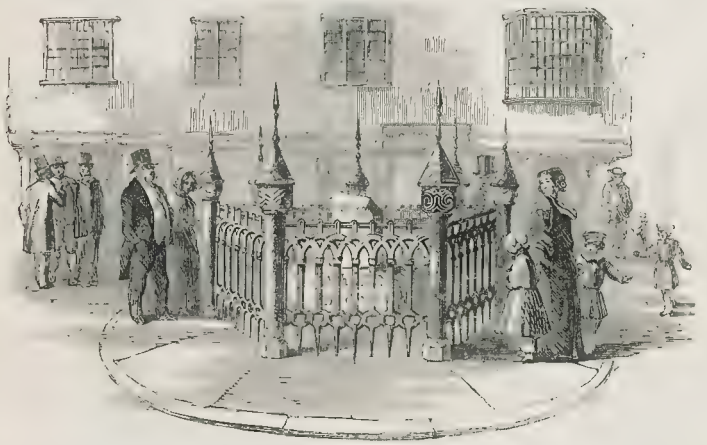
Birch Hall, now the property of Prince Albert, is distant from Ballater about two miles and a half.

INAUGURATION OF THE CORONATION STONE OF THE ANGLO-SAXON KINGS, AT KINGSTON-UPON-THAMES.

This ceremony took place on Thursday last, in the presence of a large number of spectators, amongst whom we noticed J. W. Freshfield, Esq., High Sheriff of Surrey; G. Harcourt, Esq., M.D.; Sir G. Smart, W. J. Evelyn, Esq., M.P.; Sir E. Sugden, J. Sim, Esq., J. Cook, Esq., Mayor of Guildford; Rev. Dr. Shepherd, Col. Smythe, 16th Lancers; Capt. Cameron, &c. Owing to the great interest excited, the ranks of the Freemasons, who attended to take part in the ceremony, were swelled to an unusual extent. At one o'clock a procession was formed, which proceeded to the Monument in the following order: -

Banners—Lodge of Odd-fellows—Band—Surgeons, two and two—Stewards of the Odd-fellows—Sergeants at Mace—Mayor of Kingston—High Sheriff of Surrey—Corporation of Kingston—Freemasons, two and two.

Upon arriving at the monument, the Mayor and the principal visitors ascended a low platform, and the Grand Master of the Freemasons having taken his place on another erected at a short distance, at a signal from the Mayor the covering was removed under a salute of seven guns, the bells striking up a merry peal, and the band of the Lancers playing the National Anthem. After formally inaugurating the Monument, the Master of the Freemasons thus addressed the Mayor:—"Sir,—In discharging the office which has this day fallen to my lot, I can only say, that I find the Monument has been erected according to the rules by which we are guided in our art, and I trust that as long as you retain the office which you now so worthily fill, you will take all due care of this valuable relic, and that those who succeed you in your office will also preserve it with the greatest care." The Mayor replied that he accepted the trust with pleasure, and it should be his care to preserve it.



AT KINGSTON UPON THAMES.

Most of the gentlemen having been joined by their families, then proceeded to the grounds of Charles Rowles, Esq., where a handsome *déjeûner* had been prepared, to which upwards of 450 ladies and gentlemen sat down; the Mayor of Kingston in the chair

At the close of the repast, the Chairman proposed the "Health of the Queen," saying, that having met to-day to inaugurate the throne of her ancestors, they drank with the greatest pleasure the health of the greatest Sovereign of the world.—Air, "God Save the Queen."

The health of "Prince Albert" having been duly honoured,

Sir Edward Sugden rose and said, it was with great pleasure he proposed the "British Army." They had always been the protectors of the country and the safeguard of the liberties of the people, and he had great pleasure in coupling with the toast the health of Col. Smythe, of the 16th Lancers, and he was sure that, when the company remembered the gallant bearing of that regiment in the late war in India, they would drink his health with great pleasure.

Colonel Smythe, in returning thanks, said that he had the greatest confidence in his regiment, and that, although an Irishman himself, he hoped they would always go hand in hand with the English.

The Mayor then proposed the "Health of the High Sheriff," who, on rising to return thanks, said he should be wanting in gratitude if he did not acknowledge the pleasure he felt on being present on this occasion. In almost every country some person had had a monument erected to his memory; but here they commemorated not an individual, but a race of Kings.

The Sheriff then proposed the "Health of the County Members," regretting that only one was present. W. J. Evelyn, Esq., M.P., returned thanks, saying he was sorry the old stone had not been noticed before.

The "Health of the Freemasons and their Grand Master" was then proposed, — Doby, Esq, returning thanks.

The "Health of the Ladies" was then given; and the meeting broke up.

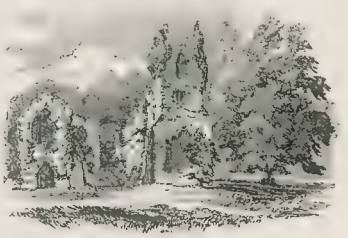
The town was enlivened throughout the day by continual peals from the church bells, and some excellent music from the band of the 16th Lancers, who attended by the kind permission of Colonel Smythe, and from another good brass band. At half-past four the school children of the neighbouring parishes, to the number of 650, were each presented, at the Monument, with a small book and a medal, and were afterwards regaled in the Cricket-field with coffee and cakes. During the afternoon boat-races and various aquatic sports took place; and at seven o'clock a grand display of fireworks, by Southby, closed the festivities of the day.

The Stone thus inaugurated is a "Druid's Stone," and similar to those used in the construction of Stonehenge: it is of a very irregular shape, and has always been buried in the ground to the depth of about a foot, as it will not stand upright; it is 22 inches square at its widest part, and about 3 feet 6 inches in height. It was afterwards removed from its resting-place under the the Town Hall, and taken to a yard adjoining the New Courts; prior to that it stood in an old chapel dedicated to the Virgin Mary, which fell down in 1730; in which was also a portrait or bust of each of the Kings crowned at Kingston: these were—Edward the Elder, crowned A.D. 901; Athelstane, 924; Edmund, 940; Edred, 946; Edwy, 955; Edward the Martyr, 975; and Ethelred, 979. The stone remained in the court-yard unnoticed, except by a few, till October last, when H. H. Young, Esq., a gentleman residing at Leamington, commented upon its neglected state, and succeeded in opening a subscription to remove it to its present site, in which he was ably assisted by Mr. S. Banyard and other gentlemen; a penny of each of the Kings was given by W. Hawkins, Esq., and J. D. Cuffe, Esq., for the purpose of being inserted in the monument, and thereby rendering it complete, both as a work of art and as a valuable national memorial. The pedestal is of Bath stone, and of an heptagonal shape, and on each face is engraved the name of one of the Kings crowned on the stone. The bronze railings are let into columns of polished Purbeck stone.

NOOKS AND CORNERS OF OLD ENGLAND.

PRIORY OF MOUNT GRACE, EAST HARLSEY, YORK.

In the parish of East Harlsey, near the village of Osmotherley, in the county of York, is Mount Grace, the site of the beautiful and extensive ruins of a Carthusian Priory, founded A.D. 1396, by Thomas de Holland, Duke of Surrey, Earl o



RUINS OF THE PRIORY OF MOUNT GRACE, EAST HARLSEY, YORK.

Kent, and Lord Wake, and dedicated to the Blessed Virgin and St. Nicholas. The pious founder not only endowed it with his own manor of Sordelby, but also succeeded in obtaining from King Richard an additional grant of the lands and possessions of three alien priories. Subsequently, however, having conspired against Henry IV., Thomas de Holland was beheaded in the early part of that monarch's reign. As a natural consequence of this event, the building of the Priory was at a stand for some time, and even the right of the monks to their possessions became matter of question until A.D. 1440, when Henry was pleased to confirm in Parliament all previous grants made in their favour. After this act of Royal justice the building was rapidly completed, and the establishment flourished until the general dissolution of religious houses in the reign of Henry VIII., when it was granted to James Strangwaies, Esq.

The secluded situation and romantic gloom of this monastery seem to have been particularly adapted to the austerities of the rigid order of the Carthusians, of which there were only nine houses in England. A Gothic archway forms the entrance into the chief quadrangle, the outer walls of which enclose about three acres of ground, and are still standing fantastically covered with ivy. The inner court is surrounded by double walls, where we may still detect, in spite of the masonry of a later age, the cells, fourteen in number, of the sterner devotees, or the delinquents of the order.

The church, which is now in ruins, was in the form of a cross; the tower, yet perfect, rising from the centre, and supported by four arches.

On the summit of the hill which shelters the Priory on the east, are the ruins of an ancient building called the Lady's Chapel, the ascent to which is steep and difficult.

The description of the Priory of Mount Grace, and the history of its fortunes, in Pierson's poem, are, for the most part, perfectly in accordance with the statements of Dugdale, Burton, and Tanner; but the poet commits the ludicrous blunder of mistaking for three separate persons the one and sole founder, with his three titles of rank; nor is he right in supposing that nuns ever inhabited this place.

The present owner of Mount Grace is William Mauleverer, Esq., of Armcliffe Hall, county of York.

Curious Circumstance.—On Saturday week, as the cook in a family residing in the parish of St Leonard, Exeter, was preparing a duck for the spit, her eyes were considerably dilated on seeing a large shining mass of a golden hue embedded in the contents of the duck's gizzard, and no doubt visions of "treasure trove" passed through her mind. With a great deal of anxiety, the unexpected but welcome something was released from its coating, and *sans cérémonie* submitted to "analysation" by the heads of the family. After mature deliberation, it proved to be nothing more or less than a brass tip belonging to a cow's horn. The tip weighs about an ounce and a half; and, from its appearance, has never been used for the purpose intended.

NEW CHURCH OF ST. EDWARD, AT ROMFORD.—CONSECRATED ON THURSDAY, SEPTEMBER 19TH.

NEW CHURCH OF ST. EDWARD, ROMFORD, ESSEX.

The foundation-stone of this beautiful Church was laid on the 26th of July, 1849, by Mr. Branston, M.P. for the county; and the sacred edifice was consecrated by the Lord Bishop of Rochester, in the presence of a great number of the neighbouring clergy and gentry, with great solemnity, on Thursday last, the 19th instant.

The Church, which is of Middle Pointed Gothic, of the fourteenth century, consists on plan of nave and aisles, 81 feet long, by 54 feet wide, and 55 feet high; chancel, 30 feet long, and 45 feet high; with north and south chapels on each side, for the children and organ. The tower is placed on the south side, facing the road and entrances: it is 21 feet square at bottom; it contains a peal of eight bells, and is surmounted by a spire. The tower and spire are together 150 feet in height. The walls of the Church are built of rubble, faced with Kentish rag-stone, and with Bath stone for the tracing and dressings of the windows, doors, &c. The roofs are of open framing, and, with the other deal fittings, are stained of an oak colour and varnished. The chancel is divided from the north and south chapels by rich oak screens and stalls on each side, and has a richly carved Caen stone reredos, filled in with illuminated texts, monograms, &c.; and the floor is paved with Minton's encaustic tiles. A corona lucis, of twelve lights, suspended from the roof, will light the chancel. The whole of the capitals of the columns to the nave, the corbels to the chancel arch, and also those supporting the nave roofs, are beautifully carved, with foliage, figures, &c., and various Christian emblems of appropriate character.

The pulpit (shown in our Engraving of part of the chancel) and font are of Caen stone: the first of rich design and elaborate execution, with statues of the Evangelists at the corners, standing on corbels having their respective symbols carved on them. The font, which stands on a raised step, is also richly carved and panelled, surmounted with an oak cover, enriched with ornamental wrought-iron work.

A hot air apparatus has been fixed for warming the Church. All the ornamental gas standards and branches for the gas-lighting are also fixed.

The new Church is enriched with various gifts, provided by the liberality of those connected with the parish. The fine east window, by Clutterbuck, of Stratford, and two others, were presented by three individuals in memory of departed friends. Three in the South Chapel, by Wailes, of Newcastle, likewise in memory of deceased relatives buried in the Church, were the gift of two ladies. The elaborately-carved reredos was a joint contribution of two ladies. The font is another offering of devotion. The velvet furniture of the communion-table, the encaustic tiles for the chancel, the oak screens, the service books, &c., have been also contributed by parties desirous of rendering the Lord's house the receptacle of the best offering they could make.

All that is now wanting to render the Church complete is the removal of the hideous stalls in front of the chancel, and the lowering of some of the tombstones in the church-yard: and, with this improvement, the edifice may compete with almost any of the modern churches in the beauty of design and the elaborateness of execution, which confer the greatest credit upon the architect, Mr. John Johnson, of John-street, Adelphi; and the contractor, Mr. Kelk, of South-street, Grosvenor-square.

The funds for building the Church are supplied by the sum of £2800 borrowed upon the rates; by the munificent gift of £1000 from the patron, New College, Oxford; by grants from the Church Building Societies; and by a long list of liberal contributions from private individuals. The cost will be about £8000.

The silver communion plate, presented by Mrs. Laurie, of Marshalls, is from an ancient design, richly engraved and part gilt, introduced by the Camden Society, and manufactured by Messrs. Turner of New Bond-street.

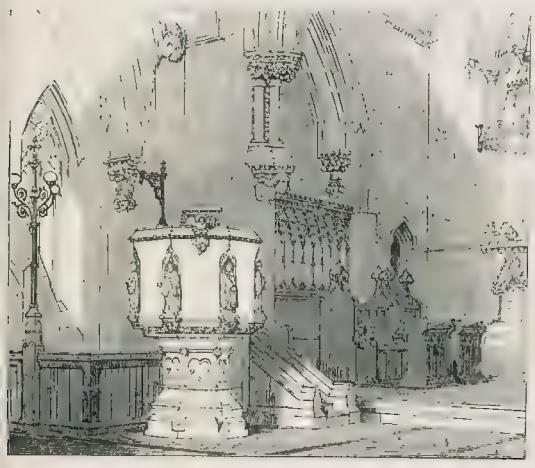
We add a few interesting particulars of the site of the new Church, formerly occupied by the old chapel. St. Edward, Romford, was built in 1407, by permission of Henry IV., who gave the land, situated then at the east end of the town, but now in the centre of the market-place, and some oaks growing on the soil, towards the building. In digging the foundations of the new tower, the roots and some branches of oak trees were discovered at the depth of sixteen feet beneath the surface, confirming, in a remarkable manner, the document which conveyed the grant to the parishioners.

In the reign of Richard II., the advowson of the whole liberty of Havering-atte-Bower, comprising the Mother Church of Horn Church, and the chapels of Romford and Havering, were sold by the monks of St. Bernard to William of Wykeham, who enriched his new college at Oxford with the patronage and tithes. In this body the patronage is now vested, and Romford has been erected by them into a distinct benefice, the present incumbent being the venerable A. Grant, Archdeacon of St. Alban's.

The old Chapel of St. Edward was in a very dilapidated state, the dry rot prevailing throughout the whole building. Some unsightly stalls or shambles were erected some forty years back, on the churchyard wall, fronting the market-place. These still exist, hiding the present beautiful structure; but it is hoped that the Lord of the Manor, David M'Intosh, Esq., will not permit such disgraceful erections to disfigure this ornament of the town. Some monuments of interest existed in the ancient chapel, the principal one being that to Sir Anthony Cook, the Preceptor to King Edward VI., his sons, and three learned daughters, two of whom were married to Lord Burghley and Nicholas Bacon, the father of the great Lord Bacon.

The interesting ceremony of the consecration of the new Church, on Thursday, was very numerously attended. The clergy began to assemble from an early hour at the Vicarage, and shortly after eleven o'clock proceeded thence in procession, to the Church—the parochial clergy and those engaged in the services of the day being in the front. They took their seats in the chancel and in the eastern part of the nave. At about half-past eleven the Bishop of the diocese (Rochester) arrived at the Church gate, attended by his chaplain, the Chancellor, and Registrar. He was there received by the parochial clergy, the churchwardens, and the members of the building committee. His Lordship having entered the Church, and taken his seat at the altar, the forms usual on such occasions were proceeded with; after which the Church was set apart by the Bishop, the clergy following his Lordship down the nave. Divine service was then performed, prayers were said by the Venerable Archdeacon Grant, Vicar; the lessons being read by the Curate. The sermon was preached by the Rev. Dr. Williams, Warden of New College, Oxford, who selected Isaiah 58, 12th verse, as his text. The Psalms and the hymns of the church were effectively chanted by a local choir, strengthened with some additional voices: the musical arrangements were presided over by Mr. Kinkee. At the conclusion of the sermon, the sum of £200 was collected, during the reading of the Offertory sentences. The Church was completely filled.

After the service, the Bishop proceeded, accompanied by his ecclesiastical officers and the clergy, to the consecration of a handsome Cemetery Chapel, recently erected in the new burial-ground at the extremity of the town. The architect of this elegant structure is John Johnson, Esq., who supplied the design for the Church. The company, to the number of about 150, then repaired to a spacious and handsomely-decorated tent, in the vicarage garden, and partook of a collation. Besides the Bishop, there were present, T. W. Braunton,



CHANCEL OF THE NEW CHURCH AT ROMFORD

NEW CORN EXCHANGE AT IPSWICH.—(SEE NEXT PAGE.)

Esq., M.P., the Hon. R. Denman and Mrs. Denman, the Hon. and Rev. E. Liddell and Mrs. Liddell, W. Cotton, Esq., John Laurie, Esq., of Marshall's; Thomas Mashiter, Esq.; Octavius Cooper, Esq., and Mrs. Cooper; J. Davis, Esq; Rev. C. A. St. John Mildmay; Rev. E. W. Childe, and a large body of clergy. Several appropriate toasts were proposed and responded to.

Nor were the poor forgotten in the midst of this festive meeting; a dinner was prepared in a suitable edifice for about seventy poor men and women, and to as many boys and girls, who thus felt that the interest shown in providing for their spiritual wants extended also to their bodily necessities.

An evening service, at which an eloquent and interesting sermon was preached by the Rev. J. C. M. Anderson, Preacher of Lincoln's Inn, to a crowded congregation, closed the proceedings which distinguished a day long to be remembered in the quiet town of Romford.

IPSWICH NEW CORN EXCHANGE.

THE opening of this building was celebrated on Tuesday week, by a public dinner, to which about one hundred of the gentry, tradesmen, and agriculturists of Ipswich and its neighbourhood sat down; the worshipful the Mayor, T. B. Ross, Esq., in the chair. The dinner, an excellent one, was supplied by Mr. Harrison, of the Crown and Anchor; and Mr. C. Christopherson furnished a very fine dessert.

Among a variety of toasts, the healths of the architect and builder were not forgotten.

The New Exchange is a neat edifice, with a handsome portico, surmounted by an appropriate emblematic figure. The whole has been erected from the designs of Mr. H. Woolnough, architect, of Ipswich; the builder being Mr. Robbans. The building is about 77 feet by 66 feet inside, and has a central light 23 feet by 37 feet. The whole of the entire area is for the use of the merchants.

The New Corn Exchange was opened for the first time for business on Tuesday last. The hall-keeper is a meritorious sergeant from one of her Majesty's foot regiments, whose staff of office is of oak, surmounted by a sheaf of wheat, cleverly carved by Mr. Wringham, and gilt. The Exchange, we understand, will be opened from twelve to three o'clock.

IRELAND.

THE ADDRESS OF THE SYNOD ON THE QUEEN'S COLLEGES.

On Saturday last, there was laid before the public, in the shape of a moderate-sized pamphlet, the "Synodical Address of the Fathers of the National Council of Thurles to their beloved flock, the Catholics of Ireland." This official document of the Roman Catholic Church in Ireland is chiefly remarkable for the unqualified condemnation which it pronounces on the system of instruction adopted at the Queen's Colleges, and an announcement that the Synod have determined upon the establishment of a Roman Catholic University in Ireland. It is set forth at the close, that "this Pastoral Address was read in full Synod, and unanimously adopted, and ordered to be published." In the opening it is declared, "Our enactments we shall immediately submit, with the profoundest reverence and submission, to the Holy See, to receive the seal of its sanction; and we will not publish them until we shall have obtained the necessary approbation." The address then refers to the state of religion and education, observing that:—

[illegible]

The following are the passages of the Synodical Address, condemning the Queen's Colleges as "a miserable delusion and a snare," against which the Pastors warn the laity with all the energy of their zeal, and all the weight of their authority. The University of Dublin and Trinity College are referred to in the second of these paragraphs:—

It is by the strongest sense of duty—by a paternal but irresistible feeling of necessity that we are compelled, dearly beloved, to announce to you, that a system of education fraught with grievous and imminent danger, has within the last twelve months been forced upon your very doors. It is presented to you, we deplore to say, in these collegiate institutions which have been established in this country, and associated in the minds of many with the most cherished and beloved Sovereign. Far be it from us to impugn for a moment the motives of its originators. The system may have been devised in a spirit of generous and liberal policy; but the statesmen who framed it were not acquainted with the inflexible nature of our doctrines, and with the jealousy with which we are obliged to avoid everything opposed to the purity and integrity of our faith. Hence, those institutions are regarded by us with feelings of fear and lasting gratitude, had they been framed in accordance with our religious tenets and principles, must now be considered as an object of anxiety and dread, which it at once imperative duty to warn you with all the energy of our zeal and all the weight of our author [illegible]. In pouring out the dangers of such a system we only pay the tribute of gratitude [illegible] given to us by the Vicar of Jesus Christ.

The solemn warning which we address to you, against the dangers of those collegiate institutions, extends, of course, to every similar establishment known to us replete with danger to the faith and morals of your children—to every school in which the doctrines and practices of your Church are hypocritically, and in bad faith, professed to be taught to your children. Alas! our country abounds with too many public institutions of this kind, which have been [illegible] curses of ruin to thousands of souls! [illegible] our flocks with which they are replete inscribed upon their front, [illegible] all is the most deceitful exterior. It is not necessary, nor [illegible] to raise our voice against establishments so avowedly hostile. It is when the wolf assumes the clothing of the sheep that the pastor has most reason to tremble for his flock, and to exert all his courage and energy for its defence.

In guarding you against the perils of error—warning you against those deceitful lights which lead to the [illegible] of eternal ruin, we would not, dearly beloved, leave you in the dark of ignorance—you cannot fail to recognise that character of true enlightenment and zealous concern for the real interests of knowledge which have invariably distinguished the religion to which you belong.

In reference to the Roman Catholic University, the address observes:—
